NOTICE TO CORRESPONDENTS.

No notice will be taken of anonymous correspondence. Whatever is intended for insertion in the "JAPAN WEEKLY MAIL" must be authenticated by the name and address of the writer, not for publication, but as a guarantee of good faith. It is particularly requested that all letters on business be addressed to the MANAGER, and cheques be made payable to same; and that literary contributions be addressed to the EDITOR.

YOKOHAMA: SATURDAY, JULY 5, 1890.

SUMMARY OF NEWS.

MR. TSUJI, a Senator, was created a Baron on the 27th ult.

PRINCE TOKUGAWA, ex-Shogun, who had been staying at Shidzuoka, proceeded at Atami on the 27th ult.

HIS MAJESTY THE EMPEROR was present at a meeting of the Privy Council held on the 27th ult., returning to the Palace at 3.50 p.m.

H.I.H. PRINCE KOMATSU gave a banquet at his residence on the 29th ultimo to the Turkish Envoy, Osman Pasha, and his suite.

THE tramway between Yoshiwara and Oniya, Tokaido, having been completed, the opening ceremony took place on the 24th ultimo.

T.I.H. PRINCESSES TOKO and KANE, attended by Count Sasaki and Dr. Ito, an Imperial physician, proceeded to Nikko on the 1st instant.

THE Law as to the re-organization of the Metropolitan Police will, it is said, be promulgated shortly, and be followed by various changes.

THE double line of the Tokaido Railway between Oyama and Numadzu, which is now in course of construction, will be completed in September.

ACCORDING to a telegram sent from Kanazawa on the 30th ultimo, some forty members of the *Daido Danketsu* and the *Kaishinto* parties were arrested in that city on the 29th

ultimo, on a charge of having contravened the Law of Election for Members of the House of Representatives.

THE Law as to the Administrative Court was promulgated on the 28th ultimo over the signatures of all the Ministers of State. It consists of forty-seven articles.

A MEETING of the Privy Council was held on the 1st instant, at which Counts Oki, Terajima, Soyejima, Higashikuse, and Katsup and Viscount Enomoto were present.

THE French Minister, and the officers of the French men-of-war now stationed at Yokohama, were received in audience by the Emperor on the morning of the 27th ult.

FIRE occurred on the night of the 18th ultimo in a house at Noha, Shimane, Shimane Prefecture, and seventy-eight houses were entirely destroyed before the flames could be subdued.

A SHOCK of earthquake was experienced in the capital on the 28th ultimo at 5h. om, 40s. a.m. The duration was 50 seconds, the maximum horizontal motion being 0.7 millimetre in 0.7. second.

A MEETING of the chiefs of various districts of Tokyo was held in the Tokyo City Government Office on the 28th ultimo to discuss matters in connection with the relief of distress in the capital.

A NOTIFICATION has been issued by the Finance Department to the effect that another lot of 10,000 bags of imported rice would be sold in the Asakusa Granaries on the 4th instant by public auction.

THE Law as to the re-organization of the Department of Communications was promulgated on the 1st instant over the signatures of Counts Yamagata and Goto. It consists of seventeen articles.

IT is reported that Mr. Takashima Kayemon, a well-known merchant of Yokohama, will be nominated a member of the House of Peers by the Emperor, in respect of meritorious services to the State.

THE father of Viscount Hijikata, Minister of State for the Imperial Household, died on the morning of the 30th ult. He was eighty-two years old, and had been suffering from illness for some time.

A PROJECT has been started by Mr. Matsumoto Tsunenobu, editor of the *Ise Shimbum*, and inhabitants of the city of Tsu, Miye Prefecture, to form a company to be named the Miye Electric Light Company.

MESSRS. ISHISAKI KIHEI, Torii Komakichi, and Taku Tokubei, *sake* brewers of Osaka, have been permitted to form a company under the name of the Osaka Beer Brewery Company with a capital of yen 150,000.

COUNT YAMADA, having been permitted to reclaim land extending over 400,000 *tsubo* at Shinoro, Sapporo, Ishikari, Hokkaido, has commenced operations. It is expected the work will be completed in seven years.

THE Law as to the re-organization of the Foreign Department was promulgated on the 27th ultimo over the signatures of Count Yamagata and Viscount Aoki, by Imperial Ordinance No. 109. It consists of 14 articles.

MR. NAITO RIUACHI, a member of the *Kaishinto* party, and thirty-eight persons residing in Hiimeji were arrested by the Authorities on the

28th ultimo on a charge of having contravened the Law of Election of Members of the House of Representatives.

THE usual meeting of the Cabinet was held on the 1st instant in presence of the Emperor, at which Counts Yamagata, Yamada, Saito, Matsukata, Oyama and Goto, Viscounts Aoki and Katsuyama, and Ministers Mutsu and Fushikawa were present.

A MAN named Oyama Sukegoro, residing at Myosai, Tokushima Prefecture, was arrested by the Authorities on the 27th ultimo on a charge of having given bribes to electors on behalf of Mr. Kamada Tokusaburo, who is a candidate for election to the House of Representatives, for the third district of the Prefecture.

AN action was raised in the Miyagi Correctional Court on the 1st instant by Mr. Matsuda Tsunekichi, who is a candidate for election to the House of Representatives, in the fifth district of Miyagi Prefecture, against Mr. Endo On, a rival candidate. Mr. Matsuda alleges that the defendant has given bribes to electors.

ACCORDING to investigations made by the Customs Bureau in the Finance Department, the quantity of rice imported from abroad during the week ended the 28th ultimo was 252,447 piculs, of which 107,749 piculs were imported into Yokohama, 57,079 piculs into Kobe, 50,432 piculs into Osaka, and 37,187 piculs into Nagasaki.

TWO students, named Minami Asasuke and Koshio Kiyo'ichi, were arrested by the police in the Koishikawa district on the 26th ultimo on a charge of having killed a school-mate named Yoshitomi Tomokuma, residing at Suidobata, Ichome, Koishikawa. On the following morning five students were arrested on suspicion of being implicated in the affair.

THE Osaka Mercantile Steamship Company has decided to develop steam communication between Osaka and Fusan, and will run steamers three times a month. Mr. Matsumoto, manager of the company, was to proceed to Korea on the 1st instant from Nagasaki in order to make the necessary arrangements. It is said that the *Asahi Maru*, the best steamer of the company, will run between the two places.

THE Yarn Market has become quite active during the past week, a demand having sprung up for English spinnings which led to considerable business at advanced prices. Bombays however, did not participate in the improvement. Shirtings received a good deal of attention, quotations advancing appreciably, and holders assuming a firm attitude at the close. Stocks of Metals accumulate and buyers are disinclined to do business. The market for Kerosene is weak, and with increasing stocks purchasers ask for substantial reductions in quotations. Little business has been done in Sugar and the market is firm. The Tea market is a little easier, but prices are unchanged. The leaf in stock amounts to about 11,000 piculs, and is nearly all of poor assortment. The upward movement in Raw Silk continued till the 2nd inst. when holders gave way, and a slight reduction took place, on which basis buying was resumed. As home telegrams report the Italian crop an average one, and neither in China nor Japan is a shortage expected, a further decline is probable. Sales of old Waste have taken place, but nothing has been done in new staple. Exchange has varied somewhat during the week, and closes lower.

EDITORIAL NOTES.

POLITICAL EARNESTNESS.

THERE is no denying, says the *Fiji Shimpō*, that Japan now possesses the form of government called a limited monarchy, since she has a published constitution and is on the eve of the opening of a diet. But she seems, none the less, to be unable to shake off the spirit educated by centuries of feudalism and to develop the characteristics essential to the proper exercise of her new polity. It has been well observed of European nations where limited monarchies exist that ministers and statesmen never lose their keen interest in political affairs even when out of office. Mr. Gladstone, for example, though he holds no portfolio, devotes himself heart and soul to affairs of State, and however distant may be the prospect of his return to office, his zeal never seems to flag. But in Japan an opposite state of affairs prevails. Take the cases of Counts Ito, Kuroda, and Okuma, or Viscounts Yenomoto and Mr. Iwamura. From the moment of surrendering their portfolios they appear to give themselves no concern about politics. It is true that Count Okuma and Mr. Iwamura are prevented by ill health from playing an active part, but Counts Ito and Kuroda, who held the high post of Minister President and who worked zealously and stoutly in the cause of Treaty Revision and other national problems, now maintain absolute silence. Count Ito resides in Odawara, quite outside the sphere of politics, and Count Kuroda devotes his time to rearing domestic fowls and gold fish. They appear to be radically altered men. So too with Viscount Yenomoto. In a word, it seems to be the accepted canon that men should follow the example of old-time Chinese heroes and retire from office into oblivion and indifference. Such a tendency is a relic of feudal days when a *Samurai* thought it undignified to attach himself to a second lord after he had left the service of his original chief. The custom in Europe is entirely different.

It would never have occurred to us to draw such an inference as this enunciated by the *Fiji Shimpō*. Two considerations would have stood in our way. The first is that against the apparent quiescence of Counts Ito and Kuroda, we may set the great activity shown formerly by such men as Counts Itagaki, Okuma, and Goto, Viscounts Tani and Torio, and others of lesser note. Why should a general theory be founded on two or three isolated examples when twice as many instances of an opposite character can be adduced? The second consideration is that no machinery exists in Japan by means of which men out of office may show themselves politically active, unless they happen to be leading members of political parties. They cannot speak in parliament; they naturally shrink from writing in the press; they are practically precluded from platform oratory unless they choose to figure as agitators. When it is explained by what means Counts Kuroda and Ito could properly and consistently play an active rôle in politics while out of office, we shall be in a better position to judge whether their reticence is attributable to the cause assigned by the *Fiji Shimpō*. At all events nothing, in our opinion, could be more extravagant than to hold up Counts Ito and Kuroda and Viscount Yenomoto as examples of men still governed by the habits of feudal days.

CHINESE DOINGS IN NEW YORK.

NEW YORK seems to be slightly excited over the case of a girl who is said to have been kept prisoner for a year, and compelled to earn money for her jailor by leading a life of shame. A portrait of the damsel, published by the *Sun*, represents her as a winsome and gentle maid, just such an one as might win hearts without having the strength to resist persecution. On the other hand, her tyrant, Li Ki, is depicted as a veritable stage villain, his pig-tail which is carried across his brow in the fashion of a coronet, giving him the appearance of a butcher who has just been crowned with

bays for his sanguinary prowess. The very contemplation of these pictures is enough to inspire people with a wish to lynch Li, so that the *Sun* may be said to have contributed materially to the cause of justice. Shun Yi, we are told by the faithful reporter who never exaggerates nor ever suffers prejudice to obscure his judgment, was the third daughter of a gambler and opium smoker of Amoy. Destitute of funds to purchase his favourite drug, the man sold his three children one by one, Shun Yi finally passing into the hands of a merchant for \$50. By and by her purchaser went to America leaving "his slave," as the placid reporters call her, behind him. She did not remain long in Amoy, however. By some mysterious process her father seems to have regained possession of her, for in the next steamer she, too, sailed westward with her parents. At San Francisco she fell into the hands of Li Ki, by marriage he says, by kidnapping says the veracious reporter. Proceeding subsequently with him to New York, she was forced to become a means of earning money immorally for her master, being kept a close prisoner and treated to doses of a slung-shot whenever she rebelled. Such a trade is lucrative, for at present there are only seven women plying it among the big Chinese colony in Mott Street. But after a year of suffering, the story of Shun Yi's sorrow leaked out. The police stepped in, removed her beyond the range of the slung-shot and lodged Li in prison, whence his family have subscribed a thousand dollars to rescue him, but whence he is not likely to emerge if the veracious reporter can keep him there. Meanwhile there is another Li burning to marry the persecuted beauty, and he will succeed if the impartial reporter can aid him.

THE DISTRESS IN TOKYO.

STATISTICS compiled by the police of Tokyo, after careful examination, show the number of indigent persons in the various wards of the metropolis to be as follow:—

Name of ward.	Number of persons in a state of absolute destitution.	Number of persons in a state of almost destitution.	Number of poor.	Totals.
Kyobashi	—	—	5	5
Sakamotocho	—	—	13	13
Hisamatsusho	—	—	117	117
Idzumibashi	9	134	877	1,020
Shiba Atagomachi	—	3	14	17
Azabu	—	—	97	97
Takanawa	3	7	121	131
Shinagawa	—	—	38	38
Kojimachi	—	—	129	129
Akasaka	—	4	597	511
Yotsuya	—	—	23	23
Ushigome	38	46	240	324
Shinjuku	19	—	103	122
Ogawamachi	4	3	75	82

San'yemachi	—	—	245	245
Asakusa Tamachi	—	—	148	148
Shitaya	—	4	20	24
Senju	—	—	80	80
Toniokamonzon	1	6	—	7
Honjo Aioicho	17	146	883	1,046
Adzumiabashi	—	—	40	40
Koinatsulawa	—	—	12	12
River and Coast	—	—	—	—

Totals...1615844,6785,423

These statistics show the state of affairs existing on the 23rd of June. The numbers in the first column show persons who are absolutely without food or means of obtaining it, owing to age, deformity, bodily infirmity, or complete indigence. The second class consists of persons who, though able to earn bread, cannot find employment and are at the end of their resources. The third class comprise unfortunates who earn something, but whose earnings are quite inadequate to sustain their families. It need scarcely be said that no one included in this list ever dreams of such a luxury as rice-eating.

KOREA.

THE troubles reported from Seoul at the beginning of this month remain still a mystery. It appears that after the demise of the Queen

Dowager Chwo, a detachment of American marines and blue-jackets entered the Korean capital and posted themselves at the United States Legation. Another detachment from the same vessel, the *Swatara*, is said to have been posted between Seoul and Chemulpo, and the *Chinese Times'* correspondent, writing under date June 8th, mentions a rumour that a steam launch filled with Japanese sailors was on the river en route for the capital. This last story is undoubtedly erroneous, but the arrival of a United States force must of course be accepted as true, and is probably the origin of the extraordinary rumour published and apparently credited by certain English journals, that the United States Government contemplated the acquisition of Port Hamilton for the purpose of handing it over to Russia. When such wild stories are gravely published in newspaper columns, the public may well be perplexed what to believe. But the purpose on account of which the *Swatara* sent a force to Seoul has still to be explained. The correspondent of the *Chinese Times* suggests that the step was taken in consequence of uneasiness in the Palace, and an appeal from the King to the American Legation. It is conceivable that apprehensions of an emeute may have been entertained, in connection with the taxation necessitated by the funeral expenses of the Queen Dowager. At all events Russia's share in this latest scare dwindles, as her share in previous scares has invariably done, into absolute nothingness.

HASHIMOTO GAHO.

MR. IMAIZUMI YUSAKU, an antiquarian and critic, writes in a recent issue of the *Art Journal* a brief sketch of the life of Mr. Hashimoto Gaho, whose large picture at the Exhibition has evoked various criticisms. Whatever may be the true value of the picture—and no one questions that it has many merits—Mr. Hashimoto is undoubtedly the most conspicuous artist of the renaissance school. He was born in 1835 at the Edo *yashiki* of his clan of Kawagoe, his father being painter to the chief of that clan. At the early age of seven, Gaho began to study art under the superintendence of his father, and when he was thirteen, he entered the studio of Kano Masanobu, at Kobikicho, where he made such rapid progress that before he had been there four years he was permitted by his master to assist him in decorative work, a favour usually given only to students of much longer apprenticeship. At first Gaho took for his models Tan-yō and Motonobu, but subsequently his fancy turned to Seshū and Sesson, and finally he took for models the works of some Chinese masters of the Sung and Yuan dynasties. As the result of this study of artists of different schools, he finally struck out an independent and original style of his own. Beyond these extremely meagre facts the sketch before us does not travel. It remains silent as to the details of the distinguished artist's career. The author, in conclusion, speaks of the latest production of Hashimoto Gaho, the picture exhibited at Ueno, in the following strain:—"The sinking sun appears just above the horizon; a streak of white cloud hovers over the maple trees as if to protect them; the lofty peaks of the mountains are robed in autumnal quiet; a rushing stream of water plunges into the haze of the evening; the rocks stand in rugged grandeur covered with ancient moss; and old decrepit trees lean against the rocks as if listening to the noise of the babbling current. Nobody can look at a picture like this without thinking that he actually hears the voices of monkeys at Hakyō or Sankyō (places in China famous for their autumnal scenery). We need scarcely call attention to the serenity of the scene, the originality of the conception, and the excellence of the execution. We are above all astonished at the wonderful freedom of a hand that can work on a canvas more than nine feet long without being betrayed into one superfluous stroke. No artist can do this unless he carries as it were, mountains and valleys in the palm of his hand. Usually artists, painting natural scenes, fall into the error of using colours too freely or too

sparingly; thus making the picture look vague and confused. In the case of the present picture, the happy mean has been struck with admirable effect. Further, in depicting trees the artist follows a method of his own, well calculated to give solidity and strength to the trunks. In all other respects, it is easy to notice, as every one who has looked at the picture must have noticed, that the artist has sought to develop a new style of manipulation quite distinct from the old method. We do not regard this picture as at all perfect. Blemishes and imperfections, always observable even in the works of renowned masters of art, are unavoidable in the case of an artist engaged in the difficult task of opening up a new route. We repeat, however, that Mr. Hashimoto's picture signalizes the dawn of a new era of Japanese art."

THE WEATHER.

Old residents have learned by experience that June always brings two or three days of great heat, which is all the more difficult to bear since it suddenly succeeds comparative cool. This year the rule has been observed to a most distressing degree. The week commencing June 21st ushered in a spell of hot weather of quite exceptional intensity. The temperature in Tokyo, in the shade, at 6 a.m. changed from 73° F. on the 20th to 80°·6 F. on the 21st, and thenceforth ranged in the neighbourhood of the latter figure until the 29th, when rain and a cool breeze enabled people to breathe again. It is stated in a Tokyo journal that his Majesty the Emperor, finding the heat sufficiently remarkable to warrant special enquiries at the Meteorological Bureau, despatched a Chamberlain thither for the purpose. The answer given by the Bureau was that, last year also, three very hot days were experienced in June, the 18th, 19th, and 20th, when the thermometer in the shade at noon read 90° F., but that this year the corresponding temperature on the 25th was 93° F. The difference is not great enough, however, to be worthy of special consideration. Probably the sensation of oppressive heat felt this year is due to the fact that the rainy season, which generally comes in June, cooling the ground and freshening the atmosphere, made its advent in May, and the naturally hot sun of the summer solstice was thus enabled to exercise its full force without any interposition of clouds or mist. It has been supposed by some writers that this dislocation of the usual order of things will prove disastrous to the crops. But no such apprehension need be felt. It does not greatly matter to the Japanese farmer whether the *utubai* (summer rain) comes a fortnight sooner or a fortnight later, provided only that it comes generously. This year the downfall was copious, and when the time arrived for planting out the young rice plants, not only was there plenty of water on the fields, but an ample store existed also in the irrigation canals. The result was an almost ideal state of affairs for the rice-grower—a blazing sun overhead and abundance of moisture below. In the districts surrounding Tokyo and Yokohama we have never seen the rice plants looking lustrier. If only the autumn abstains from deluges and tempests such as it brought with it last year, a plentiful harvest may be looked for with confidence.

WRECK OF A WHALER IN THE OKHOTSK SEA.

Information has been received in Yokohama by the arrival of members of the crew of the whaling barque *Launcelet*, of the wreck of that vessel in the North. The *Launcelet* left San Francisco on November 26th, 1889, for Okhotsk Sea in search of whales. On April 19th, about 8 in the evening, she was carried on a reef 12 miles off the White Top Rocks, 180 miles south of Vladivostok. The vessel was drifted on to the rocks by a strong current, there being a dead calm when she struck. Had the weather been at all rough not a soul could have been saved. When she struck the anchors were let go, and after three hours' work she was got off. Twelve hours afterwards a gale of wind sprang up which would certainly have destroyed her if it had caught her whilst aground. She was got to

Vladivostok five days after (having been kept afloat by continuous pumping), and was there condemned by the Russian Government. The crew, 44 all told, were sent by the Captain to Nagasaki, whence five of them have come to Yokohama.

CUSTOMS RETURNS.

The following is a summary of the Customs Returns for May, showing the foreign trade of Japan for the month:—

EXPORTS AND IMPORTS.	
1889.	1890.
SILVER YEN.	SILVER YEN.
Exports	5,440,213.850
Imports	5,877,329.530
Total exports and imports	11,551,644.500
Excess of imports	2,838,260.140

CUSTOMS DUTIES.

1889.	1890.
SILVER YEN.	SILVER YEN.
Exports	118,276.951
Imports	262,930.758
Miscellaneous	19,479.054
Total	319,676.763

TOTAL VALUE OF EXPORTS TO AND IMPORTS FROM VARIOUS FOREIGN COUNTRIES.

	Exports.	Imports.	Total.
	Silver Yen.	Silver Yen.	Silver Yen.
Great Britain	418,010.810	2,361,058.350	2,779,069.160

LANDSEER.

The great painter of animals, concerning whose prowess modern critics are disposed to be supercilious, still commands the admiration of the British public. The Wells collection of his paintings was recently brought to the hammer at Messrs. Christie's, the result being that the 30 pictures realized nearly £43,000. The highest price, £4,400, was paid for the well known fighting stag—"None but the brave deserve the fair"—but the picture of a young stag and hind—"The Honeymoon"—was a good second—£4,042 10s. The value of Landseer's time was shown by the price paid for "Trim." This is a picture of an old dog holding a rabbit in its mouth. On the trunk of a tree beside it are written the words "To W. Wells, Esq., with the author's respects; painted by E. Landseer in two hours and a half; Red-leaf, August, 1831." This painting fetched £787 10s., so that every minute spent over the work by Landseer was worth five sovereigns. *The Times*, writing of the sale, says:—"Besides the interest of prices unprecedentedly high, the occasion was marked by two incidents which gave rise to enthusiastic applause from the audience, and which may be said to have quite an historic

interest in these dispersions of great national pictures. These arose out of the auctioneer, Mr. Woods, remarking, when he put up the picture of Landseer at work modelling his colossal lion in the studio of Baron Marochetti, that it was well worthy of a place in the National Gallery, and he hoped that some gentleman would purchase it and present it to the nation. This was met with loud applause, and at once Mr. Agnew said 'I bid 50 guineas for it to present it to the National Gallery,' and the good taste of the audience and their hearty applause was shown unanimously, for there was not one bidding in opposition to Mr. Agnew's liberal gift. But quite a sensation was created when the fine portrait of Landseer, by Sir Francis Grant, came before the audience at the head of the works of Landseer, when Mr. Woods, with still more emphasis, insisted that this portrait ought to be in the national collection. Again there was a round of plaudits when, to the surprise of everybody, M. Rochefort, who was sitting immediately in front of the rostrum, said 'I bid 50 guineas to present this portrait to the nation,' and as this was announced by the auctioneer, amidst enthusiastic applause, it seemed that all were not content that a Frenchman should do this, and so M. Rochefort was opposed, but not to be driven from his point, for he fought bravely and carried it, buying the picture for 120 guineas, the hammer falling amidst a storm of applause. This little affair of cosmopolitan generosity in art, so new to the auction room, was very gracefully recognized by Mr. Agnew and M. Rochefort rising and lifting their hats to each other."

MR. MUTSU MUNEMITSU.

We take the following from the *Yiji Shimpō*:—When Mr. Mutsu returned to Japan from the United States various rumours prevailed as to his future political career. It was thought that he would cast in his lot with the Patriotic Party and coöperate with Count Itagaki. But, contrary to popular expectation, he accepted ministerial office, and it was concluded that all prospect was ended of his sitting for any constituency in the Diet. Mr. Mutsu himself has been the first to dispose of this theory, for when asked the other day as to his future intentions he declared that it was the custom in civilized States for Ministers to be also members of Parliament, and that he intended to sit as a member in the Diet if that were possible. Mr. Mutsu is said to have a large number of supporters in Wakayama Prefecture, indeed the feeling of the electors is entirely in his favour, so that there is every prospect of his being elected.

THE "NIPPON-JIN."

In the *Nippon-jin* of the 18th ultimo, Mr. Tanahashi Ichiro writes in a most disheartening manner on the possibility of introducing into Japan a system of party government. Everything, he says, conspires to make him take the gloomiest view of the situation in politics. He denies that there are any political parties worthy of the name, those that occupy the position being, in his opinion, nothing but so many factions. In the motives of the leaders of these factions, he fails to notice any public spirit or patriotism: their object is to promote their own selfish ends. As to the coming elections, he complains that the contest is not between intellect and intellect or between merit and merit but between money and money—so that in all probability the majority of successful candidates will be men of wealth, but of little or no moral capacity. Under these circumstances, Mr. Tanahashi is constrained to declare that a long time must elapse before his countrymen are ripe for Government by party. A pessimistic strain runs through the writing of many Japanese journalists at present, but few will be prepared to go to such lengths as Mr. Tanahashi.

Mr. Kikuchi Kumataro addresses some advice to members of the House of Peers recently elected in each locality from among the highest taxpayers. The majority of these men belong to the mercantile and farming classes. Mr.

Kikuchi reminds them of the vast difference between the position they have now obtained, and that occupied by them little more than twenty years ago. In those days, they received no sort of consideration, and were exposed to all kinds of taunts and insults from the haughty military class. But now they are to sit side by side with the highest peers of the realm, whom they could not formerly so much as look in the face. This elevation of their social and political status brings to them a corresponding increase of public responsibility. The occupation of a high position involves the discharge of certain duties. Mr. Kikuchi recommends the new members to show themselves worthy of the trust reposed in them, and the honour they have received.

Mr. Kon Sotosaburo writes on the subject of rice. He thinks that a considerable quantity of the grain is still lying in the stores of large landed proprietors, and he appeals to these, in the name of humanity and public spirit, to bring their hoarded rice into the market. We wish that it were possible to endorse this view. Formerly large farmers used, as Mr. Kon says, to store up quantities of surplus rice; but all evidence goes to show that such a state of things no longer exists, or at any rate does not exist to an extent comparable with former times. The price of rice is almost as high in remote farming localities as in the large centres of commerce; from which it follows, among other things, that not much grain is left in the hands of farmers.

Mr. Inouye Enryo commences a series of articles on the question whether the number of Buddhist temples and priests in Japan is not too great in proportion to the population. The essay is interesting, but we cannot fairly review it until it is concluded. Mr. Kaga Hideichi appeals to distinguished ladies to hold a charity bazaar for the relief of the poor. Another writer, under the *nom de plume* of "Akusoku-shi," discusses, though at the eleventh hour, the question of the *Shizoku* Fund of Tokyo. He advises the new Governor of Tokyo to prevail upon the recipients of the fund to return it. Last comes a long lecture to young women "who are guilty of aping the manners of their Occidental sisters." They are charged with immorality, disobedience, haughtiness, and in fact every kind of vice which is particularly worthy of condemnation in women. The writer is rather behind the time, for the fashion of raising a conservative outcry against the new system of female education has long since passed away. Every rule has its exceptions, and we do not doubt that particular instances may furnish warrant for the strictures of the writer in the *Nippon-jin*, but in general it may safely be inferred that prejudice, and prejudice only, directs the pens of such critics.

THE ILLUSTRATED INTERVIEW.

The illustrated interview is developing into something colossal. The interviewer need no longer have his attention distracted by the necessity of remembering or writing down what he hears. Accompanied by a skilled stenographer, he can be sure that every word uttered will be accurately recorded, while an instantaneous photographer, also in his suite, takes picture after picture of the person interviewed. Thus the public, instead of having an inaccurate and comparatively cold reproduction of the opinions of some celebrity, gets his exact thoughts in his very words, and is, at the same time, brought face to face with him at all the thrilling points of the conversation. The result is wonderful. How much additional publicity it will give to public men one can scarcely estimate. The interviewer, too, will become an important personage, for it will be more and more necessary that he should possess the faculty of suggesting and discussing topics of general interest. A remarkable example of such an interview occurs in the *New York World* of May 4th. Twelve columns are filled with Dr. Talmage's views, expressed by himself to an interviewer, and thirty-seven instantaneous photographs

show the celebrated divine in the act of uttering this or that sentiment. An idea of the interview may be gathered from the following extract, in itself very interesting:—

"A newspaper has several times contended that the criticisms of clergymen and others on the Faith-Curers and other modern miracle-workers are in effect denials of Christian doctrine; that the practice of the Faith-Curers is in exact obedience to the command in the Epistle of James, v.—14-15: 'Is any sick among you? Let him call for the elders of the Church, and let them pray over him, anointing him with oil in the name of the Lord. And the prayer of faith shall save the sick, and the Lord shall raise him up.' Does that passage, in your judgment, justify the practice of the Faith-Curers in refusing to call a physician when members of their families are ill and depending entirely upon prayer for healing?"

"My theory as to faith-cure is this: God does not give it to me to kneel down by a sick man and pray his maladies away; but I have no right to say that he does not give such power to others. It seems to me a fatal defect in the ministerial discussion of the subject that we deny to others the possession of a power merely because we do not possess it ourselves. I know cases in my own congregation where most marvellous cures have been wrought by faith in God.

"I know cases in which men have knelt down by the bedside, taken the hand of the patient and, after prayer, risen up and retired to another room. After a while the patient, who had not been able to walk for years, has risen and walked out into the room where the man who offered the prayer of faith was waiting for the answer. I have no more doubt of these facts than of my own existence. I have not this gift, but if any man has it the possession is a matter of everlasting congratulation. The familiar reply to all this is that the case referred to was one of nervous disorder, and that the cure was wrought by an appeal to the imagination. But I have personal knowledge of cases of cure which must have been direct from God. I saw one such in London. I went to the room, where there were perhaps fifty invalids, because I had heard that marvellous things were occurring at this, the most famous faith-cure in the world. I never believed nor disbelieved. I went to hear the testimony for myself. The Rev. Dr. Boardman, one of the best men this country ever produced, was in London at this time at the head of this faith-cure. I stood on the platform closely scrutinizing everything that went on. There was a poor woman near me who especially attracted my attention and sympathy. Her arm and wrist were twisted and distorted with what seemed to be inflammatory rheumatism. The wrist and hand were much inflamed and very red. The muscles were contracted into complete helplessness. It was a case which at a moment's glance you would have pronounced incurable. Dr. Boardman expounded the doctrine of faith, and told how Christ, when on earth, healed the sick. He declared that Christ was present still and ready to heal those who believe. Every now and then he would pause and ask 'Do you believe?' After a time this poor woman cried in a voice that resounded throughout the rooms, 'I do believe,' and stretched out her arm and hand as straight as you can stretch out yours. If I had seen one rise from the dead I could not have been more thoroughly stirred, excited, enthused, and inspired. Now, I don't know how other people would account for this, but I came away saying: 'There may be something in this faith-cure which it is best not to laugh at; something which it is best not to deride.' The progress of the government of God may after a while—I don't say it will, but it may—be in that direction. It may be that by the healing of the sick and the performance of other wonderful things the true Church of Jesus Christ will be established."

"Would you, then, justify those people in Brooklyn who refuse to call a physician when any of their number are ill, several of whom have died while waiting for faith to cure them?"

"I should say just this, that every family of people have a right to do as they please in such matters. If they want to try skill, they have a right; if they prefer to trust faith, their right to do so is just the same. They have a right to call in a homoeopathist or an allopathist or a faith-healer, just as they prefer."

"Would that cover the case of young children who are smitten with scarlet fever or diphtheria, for example, who have no capacity to choose for themselves? Are not their parents morally as well as legally bound to secure for them the best skill obtainable?"

"They are bound to do what they believe to be best. But what is best in such a case? The same objection which is made to the faith-curer whom they call would apply to the physician if they summoned one. If they sent for a homoeopathist and the child died some would blame them for not calling an allopathist instead. If they sent for an allopathist some would say that the child's life could have been saved by a homoeopathist. Children are in their parents' hands, anyhow. If their parents are imbeciles they should be sent to an asylum for the weak-minded, but if they are ordinarily capable persons they must be allowed to exercise their own judgment in caring for their children. In many cases the physician does more harm than good, anyhow. When then the public or juries in court come to consider cases where persons have died without medical attendance they should bear in mind how many persons have died under the hands of the doctors. My position on this matter is this:

I have not the requisite faith for the accomplishment of the things done by the faith-curers; but, while I do not possess it myself, I should be very slow to utter any criticism of the good men and the good women who, I know, have their prayers answered in marvellous ways which I cannot account for by ordinary laws of physiology."

SERVICES IN UNION CHURCH.

DR. THWING announced on Sunday that he had been urgently solicited to speak in Tokyo in behalf of the indigent insane, and commended to public favour the humane efforts now making to benefit this class of unfortunates here, as in China. Intelligent native residents feel the imperative need of caring for those who through poverty cannot secure that custody and care which are extended to paying patients. He then announced the text, "Lay hold on eternal life" and spoke on the soul's life hereafter as one of immeasurable development rather than of mere extension in endless years. Memory, will, imagination, and other increments of its eternal life will find unimpeded play. Spiritual accessories will be added to the resurrection body, doubtless, such as are foreshadowed now by the powerful and delicate auxiliaries given by science to human hearing, vision, touch and locomotion. One is appalled at the leaps made in the recent researches of material science by men like Edison. We seem to be on the confines of still more startling discoveries. These are but hints of the revelations of the phenomenal powers of the eternal life. The scope of being is also believed by many learned men to be broader than that of this planet alone. Sir John Herschel declared his belief in the fact that other worlds are populated. To the moral history and destiny of these "principalities in heavenly places" we may be related. Psalm singing, visiting, and idleness do not form the true ideal of heaven. The element of weariness and of sin will be eliminated from all effort, hence work will be exhilarating and restful. The practical duty is to grasp, "lay hold of eternal life," now and here; to rise above what is petty, paltry, puerile, those trivialities that delight childish, undeveloped souls, and seek the things which are above, so making sure of the glory and honour which are enduring, being prepared for their possession by the strenuous struggles and victorious conquests of this life. Dr. Thwing, in closing, desired that his hearers should pray for a blessing not only on the labours of love which he had put forth for five Sundays in Yokohama, but in some thirty places of worship during his wide travels the past year, and also in colleges and schools and on the lecture platform. He had proved the blessing "it is more blessed to give than to receive," and said that it had been a joy to be able to give his advocacy to so many and varied humane as well as religious and literary enterprises in the three empires of India, China, and Japan.

PRIESTS AND POLITICS.

Of late there has been a tendency among certain sections of the Buddhist priesthood to take part in the practical politics of the day. At one time some priests of the *Monto* (*Shinshu*) sect went so far as to send delegates to Tokyo, to memorialize the Authorities on the subject of amending the Constitution in the sense of allowing their order the right to elect and to be elected to the House of Representatives. More recently stories were circulated about the activity of certain priests in carrying on a secret, and sometimes even an open, canvass on behalf of parliamentary candidates. In most cases these stories relate to priests connected, either directly or indirectly, with that politico-religious association called the *Son-Nô-Hô-Butsu Daidôdan* (which, when literally translated, reads the Sovereign-revering and Buddha-believing Grand Combination), the true object of which has never been clearly declared in public. Mr. Tatsumi Kojiro, who canvassed for himself last month in the urban division of Shitaya, is one of the principal members of this mysterious association, while another no less well known member is on the staff of a leading daily paper in Tokyo. In the face of

these circumstances, the public seems to welcome with pleasure the intelligence that the Chiefs (*Kwancho*) of all the different Buddhist sects met recently at the Hanganji temple, Tsukiji, Tokyo, where, after discussing the subject of priestly interference in politics, they passed the following resolutions:—First, that no priest be permitted to join any political party; secondly, that no priest be allowed under any circumstances to labour for the benefit of any political party; thirdly, that every priest take care to warn his flock against the danger of allowing political differences to encroach upon the sphere of social intercourse—and against committing any breaches of the law in the excess of political zeal; and fourthly, that under no circumstances whatsoever, shall either the principal hall of a temple or any other building belonging thereto, be lent for the purpose of holding meetings or delivering speeches in connection with political parties. These resolutions, we are told, have already been made known to the whole priesthood throughout the country. Pleasant as the news must be to all thoughtful Japanese, it cannot fall agreeably on the ears of Viscount Torio, who has thus been deprived of his more influential wing, the other and far weaker pinion being the bigotted *Shinto* priests. The Viscount, however, being a man of undoubted energy and resource, nobody is sure that this apparent discomfiture may not rouse him to devise some fresh and more effective expedient.

FOR RELIEF OF THE INDIGENT INSANE.

A GOODLY audience gathered at 37, Tsukiji, on Tuesday afternoon. Dr. Whitney introduced the speaker, and other native and foreign gentlemen, whose earnest and practical suggestions must have been encouraging to the projectors of this humane enterprise. Professor Thwing remarked that "it gave him genuine gratification to plead here the cause of the insane, as it had been his privilege to do in China the past winter. In the absence of accurate statistics it is not easy to tell how generally mental maladies prevail in the East. Many lunatics are concealed. Some are killed. Not a few commit suicide. India has hospitals for the custody and cure of lunatics, managed by Europeans, and by natives trained in western methods, but China has none, and Japan is inadequately supplied. Intelligent natives admit this and welcome the alliance of those who have had larger experience elsewhere with the insane. We desire to avoid everything that is obtrusive, but cannot be unmindful of the demands alike of humanity and of scientific inquiry. The educated instincts of medical men, not less than their philanthropic impulses, cannot allow them to rest while this department of their equipment is so sadly deficient. The world is waking to the importance of doing something to arrest the wide-spread scourge of insanity, or if that is impossible, to limit its extent, to alleviate its features, to establish just legislation for the really insane, and to protect society from those who simulate madness to cover crime and to excite pity. As an accredited representative of the International Congress of Medical Jurisprudence held last year in New York city, which is a permanent body embracing 743 of the leading lawyers, judges, physicians, and alienists of Europe, Asia, and America, I urge upon the native and foreign physicians of this empire, as well as those who have influence in its legislative concerns, to coöperate with this body in the biological and sociological study of Eastern life; in the collection, collation, and transmission to us in New York of all those statistics and facts, physical, social, psychic, and political which may help to illuminate this opulent theme. Insanity is said to be the price we pay for modern civilization. Every advance in social refinement brings conflict and conquest that are to be paid for in blood and nerve and life. Barbarians are not nervous. Savages are rarely insane. They take no thought of the morrow. But 'we are born in a hurry, live in a hurry, die in a hurry, and are driven to Greenwood on a trot.' The emulous rivalries of business life and the speculative character of its ventures add to the strain imposed

upon those already bankrupt physical natures which multitudes have inherited and are transmitting to the next generation. The introduction of machinery has its mischievous features, notably in the depression coming from the specialization of nerve function where workmen keep doing one petty thing, monotonously year after year, and so sterilize mind and muscle in every other direction. Then there are our unphysiological systems of study, forcing youthful minds through severe curriculums and thus developing a neurotic diathesis by neglect of natural laws. The stimulus of liberty is a productive cause of neurasthenia, for the sense of responsibility which citizenship brings, the ambitions awakened by the prospect of office, position, power, and influence; the friction, disquiet, bickerings, wranglings, disappointment, and chagrin which attend the struggles and agitations of political life, do exhaust men, to say nothing of the curse of strong drink which is often associated with these excitements. Insanity is said to have increased in Italy since religious and political liberty have there been guaranteed. Liberty, like beauty, is a perilous possession. The ambitions it inspires add to the tremendous strain which is put on heart and brain by 'progress,' that merciless tyrant which is pushing its way into Japan and other Asiatic communities, bringing bane as well as blessing in its train." Dr. Thwing then told what had recently been done in Canton, and stated some of the requisites of an asylum as to location, architecture, officers, nurses, and management. The superintendent, he said, should be thoroughly versed in the treatment of lunacy and acquainted with Japanese character and tastes. Clinical details should be kept with fullness and accuracy, and careful classification observed in the custody of patients. Dr. Whitney cited a case, illustrating what he believed to be the condition of thousands of poor lunatics, and suggested that perhaps an annex might be added to one of the native hospitals, if money were furnished. It would be well to have a committee appointed to act as curators of funds raised by foreigners in Japan and elsewhere. A motion in reference to the committee was carried. Dr. Macdonald, Messrs. Page and Uchimura followed with cordial words. The latter has spent years in America studying insanity and kindred themes. He believed this to be a movement prompted not by humanity alone but by true patriotism, for neuropathic conditions were undermining the physical prosperity of his country. A second meeting will be called by the committee, the members of which will be selected and announced by the chairman in a few days.

THE ELECTIONS.

THE 1st inst. was a memorable day in the history of Japan, being the day when the members of the first national assembly were elected by the people. In the provinces and capital alike, everything seems to have passed off in the quietest and most orderly manner. Tokyo returns twelve members, and the voting took place at that number of centres, commencing at 7 a.m. and ending at 6 p.m. According to the Law of Election, persons registered as qualified electors and desiring to vote had to attend in person at the voting place. There, after identification by reference to the electoral list, each received a voting paper, upon which he inscribed the name of the person he voted for, and then his own name and residence, finally affixing his stamp. This paper the elector placed with his own hands in the ballot box, in the presence of the Headman of the District, acting as manager, and of from two to five witnesses previously nominated. At 6 o'clock the polling was formally declared closed, and the ballot boxes, having been shut—or, to speak more accurately, their two locks having been closed, one by the Headman and the other by the witnesses—were forwarded this morning to the District Office of the locality. At nine of the election centres in the capital the results of the polling were declared the next day, at the remaining three places, a day later. These simple facts describe almost exactly what took place. There was complete absence of excitement on the part of

the voters and the onlookers. Indeed, after the early hours of the forenoon, when most of the votes were recorded, it would have been impossible for an uninformed spectator to imagine that anything so momentous as a general election, above all an election for the first Japanese parliament, was in progress. There were no crowds, no posters, no bands, no processions, no dead cats, and no rotten eggs. People seemed to regard the affair as a matter of every day business. In short, throughout the empire generally a quiet and law-abiding spirit prevailed, and Japan's first elections were conspicuously free from disturbance.

DOUBLE MURDER IN YOKOHAMA.

Two men were found on Thursday evening in Ogi-cho, Gochome, Yokohama, severely injured, life indeed being extinct in the case of one, while the other man died after being taken to hospital. The former, who was identified as a man named Toyokichi, had been stabbed in the side, and the other whose name is Ume-kichi had received a knife wound in the stomach, the weapon being a *deba bocho* or kitchen knife. A man has given himself up to the police authorities and confessed that he inflicted the wounds. It is supposed that the double murder was the result of a quarrel over a gambling bout.

CHOLERA.

It is greatly to be feared that cholera in an epidemic form, and of a very severe type, has made its appearance in Nagasaki. The telegraph says that thirteen cases occurred in three days, and that twelve of them proved fatal. We can scarcely hope that Tokyo and Yokohama will escape. A system of careful medical inspection will doubtless be established, but medical inspection is not very efficacious under any circumstances, and railway facilities deprive it of nearly all value. It will be most unfortunate if the first Japanese parliament has to sit in a pest-stricken city.

THE "TEN-SOKU."

IN the current number of the *Ten-soku*, Mr. Kato Hiroyuki, its sole editor, devotes the first article to the sanctity of the Constitution of a State. At the outset, speaking of a Constitution in its broadest sense, Mr. Kato observes that every political community, however low in the scale of progress, possesses some form of constitution, and that there is no absolute standard by which the value of a constitution can be estimated, the question whether any particular Constitution is good or bad being only determined by the degree of its suitability to the political conditions of the country where it exists. Speaking of a Constitution, in its limited and modern sense, Mr. Kato at once refers to the case of the Japanese Constitution, and declares that it is in its general and fundamental spirit essentially liberal and akin to the constitutions of European countries. At the present stage of Japan's progress, nothing more can be expected. The writer condemns, in strong terms, rash and eager politicians who, utterly disregarding the practical requirements of the country, are foolish enough to deliver public harangues on the supposed imperfections and insufficiencies of the Constitution.

In the next article we find an essay on the importance of establishing free schools for labourers. As yet Japan is happily exempt from the labour question so perplexing to Occidental nations, but the day is not far distant when this country too will have to face the great problem. The thoughtful portion of the nation clearly foresees this contingency, and from time to time we notice discussions in the vernacular press as to the best means of averting or mitigating the evil. Mr. Kato urges noblemen and rich merchants and farmers to subscribe funds for the establishment of free schools for labourers. In these institutions, classes would be opened in the evening, and the course of study would consist of reading, writing, arithmetic, and lessons in morals, the principal object to be kept in view being to inculcate the prime importance of the sentiments of honour and self respect. By way of trial, four or five such institutions ought to be opened

in Tokyo. The fund necessary for this purpose need not be large. Thirty or forty noblemen and rich merchants and farmers, acting together, could support the schools without feeling the weight of the burden. Mr. Kato appeals to these persons, first because they can best afford to incur the expense, and secondly because it is notably to their interest that the moral and intellectual capacity of the working classes should be improved, to the end that the spread of socialistic and other pernicious ideas may be prevented.

In the third article we have the conclusion of a series of essays on the relation between Natural History and the History of Man. Mr. Kato demonstrates, by copious illustrations, that the principles of Biology govern the course of human history, and advises historians to study the sciences, especially Biology.

The fourth article treats of the importance of holding in high consideration men of learning and men in the military and naval services. As we formerly noticed, Mr. Kato expressed the opinion, in the early numbers of his journal, that Japan ought to be a military nation. The views put forward in the present article are the natural sequence of the opinions then enunciated. The writer deplors the decline of military spirit in Japan since the Restoration. With the military spirit has disappeared, he thinks, the high sense of honour developed to such a degree under the feudal régime. He appeals to the Government and the leaders of the people to set the example of honouring men of the warlike professions. As to men of learning, he also insists that they ought to be as highly considered by the nation as soldiers, for men of learning lead the country in its progress towards complete civilization. In this direction, he notes with pleasure a very healthy change in the sentiments of the people. Formerly men of learning were generally regarded simply as book-worms, little adapted for practical uses. But under the new educational system, such false notions have been entirely swept away. Young men who have received a thorough training in the different colleges are vigorously pursuing their way in every walk of life, and the public is awakening as to the true value of learning. As yet, however, those who have received collegiate education are young, and the sphere of their utility is limited; but as their value becomes more and more apparent, Mr. Kato believes and hopes that they will receive more and more favourable consideration.

The last article is the address which Mr. Kato sent to be read at the general meeting of the students of the German language—being unable to attend the meeting in person on account of indisposition. About seven or eight and twenty years ago, while serving under the Tokugawa Government in the Foreign Books Investigation Office, Mr. Kato commenced, together with Mr. Ichikawa Kaneyasu, to study German. He, therefore, believes himself the first pioneer of that language in Japan. His only teacher being a Dutch-German dictionary, he experienced indescribable difficulties in acquiring the new language. He expresses great pleasure that the study of German is steadily increasing in favour, because the Germans now stand far ahead of other nations in scientific investigation, a verdict which will not be accepted on the *ipse dixit* of Mr. Kato.

ARTISTS WITH PEN AND PENCIL.

JAPAN is very fortunate. Her scenic beauties and the sunny manners of her people attract a crowd of tourists who scatter gold along their route, and then write glowing accounts which attract others to come and be equally lavish. Just now she is to be especially congratulated on the temporary possession of two artists, one of the brush, the other of the pen, who are contributing materially to spread her reputation and their own. The literary painter is an admirable performer. He excels in verse as well as in prose. Still fresh in our memory is the classically constructed and graphic account he sent to the *Pall Mall Budget* of a certain famous residence at Azabu, where people enter as though they were stealing into the cave of Ali Baba, with hatted heads, heavy sticks, and bare feet, and where an atmosphere of subtle refinement reduces the profile of a young lady's face to a single line. But even that *chef d'œuvre* is eclipsed by the illustrated chapter which these masters have contributed to the *New York Herald* on the subject of Mr. Large's death. We are humiliated to discover how little we ourselves knew about the place where the Azabu tragedy occurred and about the events of that unfortunate day. We had no idea, for example, that Mr. Large came back to Tokyo from Miyanosita "under escort of a large body of troops," a point which certainly should not have been concealed by the Authorities. We did know, however, that the Japanese sword is "a terrible weapon" and that "in the hands of men who do not hold their lives at scarcely any value, and who are awake and alert against any danger, it makes them frightfully formidable antagonists for a drowsy man." This we did know, though we should certainly not have succeeded in conveying our knowledge so neatly and luminously. But the conviction of our ignorance is brought home to us with greatest force when we examine Mr. Landor's pictures. From them we learn that the Methodist Mission School in Azabu is a palatial building approached by a stately avenue; that the room where Mr. Large was sleeping is a species of barrack apartment so spacious that figures at one end seem dwarfed to the view of persons at the other; that Mr. Large's chief assailant wielded his sword with his left hand, carried a dagger in his right, and wore a colossal pig-tail which assumed all kinds of quaint angles at the moment of contest; and that the corridor where the tragedy occurred is approached by a giant staircase and flanked by bed-room doors about eleven feet high. It is fortunate that the two artists, now sojourning in our midst, take the trouble to correct our false impressions, and that they have access to vehicles so potent as the *Pall Mall Budget* and the *New York Herald*.

ANCESTRAL WORSHIP.

THE discussion of the subject of ancestral worship in China, and the adoption of a resolution radically condemning it at the Missionary Conference in Shanghai, naturally attract much attention. We commented on the matter in a recent issue, and we find the *Chinese Times* writing about it thus:—

In their attempt to introduce Christianity into China the missionaries proceed by methods which would be condemned in any other kind of enterprise, moral or material. Instead of looking for local allies, for existing foundations on which to build—as recommended by the minority—trusting to the divine alchemy of their religion to gradually transmute whatever is base into pure gold, they proceed on the more radical principle of destroying in order that they may build anew—the principle of the chimney in nature. Scarcely have they gained a footing in the country than they declare war to the knife against its most cherished institutions, converting the moral forces of the nation into bitter enemies. A foreign army invading a country makes use of all available auxiliaries, gains possession of communications, and of strategic positions, in the quietest and most unostentatious manner possible, and aims at reducing opposition to a minimum. The Christian soldiers, on the other hand, clamorously refuse to flank or climb the mountains. In their path, but insist on removing them bodily. Aiming at nothing less than setting up a spiritual kingdom in the hearts of the Chinese people, the missionaries begin by shocking such feelings of propriety as they already possess. That delicate piece of mechanism, the conscience, though susceptible of education in judicious hands possessing a nice touch, is nevertheless strong to resent outrages. The conscience even of the heathen was acknowledged by the early Christians to have been sufficiently well adjusted to be a law to them, whereby they were acquitted or condemned; and though it may become debased and its monente needle may be deflected by surrounding influences it never turns round and points the opposite way. The sense of right and wrong is never quite lost. It is perfectly useless, therefore, as a rule, to try to persuade grown-up men or women of sound mind that a certain thing is right which their conscience pronounces wrong, or wrong which their consciences affirm to be right. The plan has never succeeded of telling a non-Christian that the parents whom he revered were burning for their wickedness. He will go and burn with them, if he have the spirit of a man, rather than follow one who outrages his feelings. So, to come to the Christians who inherit from a hundred generations of ancestors such a love of them as to be to him the warp and woof of his character, and blantly tell him that the reverence he shows to his deceased parents is a gross offence which he must abjure if he would rescue the cause of God, seems the most unlikely way to gain him over. What is to be expected of that heathen but amazement at the impudence of the intruder, and in he steps short of reviving the Devil as presented to him, it only shows that the heathen has the virtue of endurance which is lacking in the evangelist. Humbly speaking, China can never be converted to Christianity while violence is done to the best feelings of the nation; and as ancestral worship is a religion which sits deep in their heart of hearts some means of accommodation will have to be discovered before Christianity can make any impression worth mentioning on this people. Hence the present attitude of the

body of missionaries—with a few notable exceptions—will in all probability retard the progress of Christianity for at least a generation. Not a very long period perhaps in the life of an ancient people, if delay were the only evil consequence attending the decision of the Conference. There is, however, a worse evil than even loss of time, for the revulsion engendered in the minds of the Chinese by unprovoked assaults on the objects of their affections is likely enough to keep alive and probably deepen their prejudice against the foreign religion. If the barrier, while slowly wearing away physically and geographically, should be at the same time increasing morally, and the problem of regenerating China, thereby becoming progressively harder, the present generation of missionaries may be not only spending their own lives and labour fruitlessly, but actually creating obstacles for those who may come after them.

These very opinions were expressed by ourselves seven years ago with reference to missionary effort in Japan. But since then the spirit of tolerance and liberality has largely permeated the methods of Christian propagandists, and the business of destroying the law and the prophets is no longer placed in the forefront of missionary duty. As to the question of ancestral worship, however, the difficulty for the missionary must be very great. He cannot consistently sanction such a proceeding, yet he knows that there have grown up about it a host of associations and traditions which lie at the very root of household life and domestic happiness.

THE TURKS.

THE Turkish Ambassador, Osman Pasha, and his suite have now been the guests of the Japanese Government for some time, and are likely to enjoy this country's hospitality for at least two months more, if our information be correct. Their voyage eastward has been intensely dignified. They have moved with all the deliberation of great men in whose eyes time is the veriest slave. We can conceive no more complimentary way of paying a compliment than to make the whole process a leisurely holiday. If his Excellency the Pasha had hurried from Constantinople to Tokyo by fast steamers and expeditious railways, his voyage would have smacked of the truthful Train or the brisk Bly. He did well, therefore, to divest his progress of every semblance of globe trotting by lightning or commercial travelling by electricity. How long it is since he left the Golden Gate we do not remember, but a year will certainly not be an extravagant estimate. No one ever conveyed a Grand Cross from potentate to potentate in a manner more befitting the transit of such august baubles, and we should be sorry if the fulness of the Pasha's delay were not rounded off by a good long spell among the beauties of Japan. Meanwhile, it is interesting to hear what the Japanese think of their illustrious visitors. The impression made upon Western folks when they first meet Turks has always been one of admiration and surprise—admiration of the noble type of humanity, and surprise that it should have fallen so completely from its once high estate. One cannot conceive why a Turk should need assistance in any national undertaking, or why his country's place on the map of the world should be a constantly diminishing quantity. And this appears to be precisely the idea which the Japanese have formed from their brief acquaintance with him. "Tall of stature, dignified in bearing, their speech placid and well modulated, their demeanour refined, and their general appearance as suggestive of moral capacity as it is calculated to inspire respect, one reflects with wonder," writes the *Nippon*, "on the present condition of the State which these men represent, and learns to understand that racial characteristics are not the only potent factors in a country's career."

A NEW KOREAN DICTIONARY.

WE have to acknowledge the receipt from the Rev. H. G. Underwood of a Korean Grammar and Dictionary which cannot fail to be of the greatest service to students of that little-known tongue. To others—to ourselves, for instance—the interest is chiefly theoretical. Nothing can be more instructive than the likeness in difference subsisting between Korean and Japanese. So far as structure is concerned, the two tongues are almost identical, but their respective vocabularies are wide as the poles asunder. There are cases, too, in which the Korean colloquial resembles rather the Japanese written language, and *vice versa*. As for litera-

ture, the advantage is almost entirely on the Japanese side. Mr. Underwood fully endorses what Mr. Aston recently told the Asiatic Society on that head. "Trashy love stories and fairy tales" made up the whole account to credit, the reason of this being apparently that the literary influence of China has made itself far more extensively felt in the Hermit Kingdom than in the Island Empire. Chinese formalism has there, much more than here, hampered and crushed the native genius. Mr. Underwood has done his work well, especially in the grammar, which has evidently profited by the models which our resident grammarians of Japanese have offered. Indeed, the author acknowledges his obligations to Dr. Imbrie's "English-Japanese Etymology;" and though he does not make any similar acknowledgment to Mr. Chamberlain's "Colloquial Japanese Handbook," the division of chapters and paragraphs, the treatment of honorifics, the two-fold division of the books into a grammar properly so-called and a practical part, and other points of likeness, show evident traces of that imitation which is the sincerest form of flattery. So far as we can judge, the defects in Mr. Underwood's grammar are not such as will in any way affect its value to students and comparative philologists. For instance, his explanations are always clear, though they are not always expressed in correct English. *Would* and *should* seem to trouble him. He says: "Frequently Koreans use 'each' twice and sometimes oftener, in the same sentence, where we *would* use it but once. For example where we *would* say," &c. (The italics are of course our own). Again Mr. Underwood transliterates in an unpardonable manner the word "Onmun," the name of the beautifully simple native Korean alphabet of twenty-five letters. He actually writes it "Enmun," with an *r*, which is much as if one should transliterate the French word *bauf* by "burt." No doubt, some of us—not to say most of us—have left off rolling our *R*'s; but we still have consciences. And is the dropping of the *R* in English a reason for inserting it in the transliteration of foreign words where no *R* exists? We believe that a committee of all the most learned residents in Korea, both missionary and lay, has undertaken the great work of bringing out a complete dictionary of the Korean language. We trust that, in their transliteration, they will adhere to the sober and scientific method employed by Mr. Aston in his various essays on Korean subjects.

THE RIFT WITHIN THE LUTE.

COUNT ITAGAKI, on his recent visit to Tochigi and Ibaraki, is reported to have expressed doubts as to the feasibility of coalition between his party and the *Kaishin-to*. He assigned as a reason for these doubts the fact that he himself differs from Count Okuma in respect of many important political questions, prominent among them being the problem of finance. Count Okuma, being recently interviewed by a member of the staff of the *Kokumin Shimbu*, expressed the opinion that to reduce administrative expenses is a matter of very great difficulty, inasmuch as the public expenditures of a State always increase in proportion to the growth of its prosperity and civilization. Count Itagaki, on the contrary, holds that to reduce the Government's outlay is a prime necessity of the time, and confesses that for years he has been looking forward to the opening of Parliament in order to be able to discuss this problem. He therefore thinks that however excellent in theory may be the union of all the liberal parties, their combined action will scarcely be found possible in practice. We imagine that many people will endorse this view. For nearly nine years the *Fuyu-to* and the *Kaishin-to* were in distinctly opposite camps, the latter, indeed, not seeming to give itself much concern about the former, but the former always seeking to thwart and discredit the latter. It is conceivable that this long-standing enmity should be temporarily softened by the desire of combining to overthrow a common adversary, but such a fusion could not survive the accomplishment of its purpose, if it even held together so long. As between Count Okuma and Count Itagaki we have

no sufficient materials for forming a judgment on general grounds, but as between their views in respect of this particular problem of administrative economy, there cannot be much doubt among Western critics. All history goes to show that Count Okuma is right. The expenditure of a State is precisely like that of an individual. The more important each becomes in the world, the wider does the range of expenditure grow. There is no instance on record of a progressive country, which has managed to reduce its national expenditure. The tendency is quite in the opposite direction. In this respect, therefore, Count Okuma spoke with the wisdom of the experienced statesman. A great financier, as he undoubtedly is, would be the first to advocate the reduction of needless outlay and to devise practical means of effecting that object. But he knows far better than Count Itagaki, we venture to think, how inevitable it is that the country should spend more as it progresses in civilization and prosperity. If Count Itagaki seriously contemplates staking the future of his party on an attempt to subvert the natural order of things, he will soon part company from the *Kaishin-to* and its shrewd leader.

MR. FENOLLOSA.

MR. E. FENOLLOSA, who leaves Japan on the 6th for the United States, had the honour of being decorated with the Third Class of the Mirror on Monday. His Majesty the Emperor, in presenting the insignia to Mr. Fenollosa, thanked him for his labours in the cause of Japanese art, and expressed the hope that, after his return to America, he would continue to familiarise the foreign public with the principles which he had studied so successfully and expounded so ably during his long residence in Japan. Mr. Fenollosa already possesses the Third Class of the Rising Sun. It is pleasant to find that his labours are appreciated in high places, and we venture to echo the Imperial hope as to his future work.

THE "PILGRIM'S PROGRESS" IN JAPANESE.

WE observe that the London Religious Tract Society has brought out a second edition of the Rev. J. White's translation of the "Pilgrim's Progress." It contains a preface by Mr. Hubbard, the former American Minister. The book is illustrated and to add to its interest here, the illustrations are all Japanese. "Evangelist" is a venerable old Japanese clad in native attire. "Christian's" fight with "Apollyon" takes place at the foot of Fuji-yama. "Christian" is clad in Japanese armour. "Vanity Fair" is peopled with Japanese damsels and young men, and all the scenes of temptation are of a Japanese type. The effect is odd in the last scene, where a man with long sleeves is succouring "Christian" as he crosses the river of death. Some of the translator's terms are well chosen. "Obstinate" becomes "Gwanroku," a name used in the *Koyeki-mondo*, and "Pliable" is called "Wadono" (和殿). As a specimen of the style we give in Roman letters the translation of the opening paragraph, which in the original reads thus:—"As I walked through the wilderness of this world, I lighted on a certain place where was a den, and laid me down in that place to sleep; and as I slept I dreamed a dream. I dreamed, and behold, I saw a man clothed with rags standing in a certain plain, with his face from his own house, a book in his hand, and a great burden upon his back. I looked, and saw him open the book, and read therein; and, as he read, he wept and trembled; and not being able longer to contain, he broke out with a lamentable cry, saying, 'What shall I do?' 'Ware kono yo no are no wo tadori-yuki to, aru hora-ana no hotori ni ikoinuru ma ni, nemuke moyo shitsu, uchi fuse-shi, kari-ne no yume ni hitori no hito, mi ni ran-i wo matoi, te ni ikkan no fumi wo tadzu-saye, se ni omoni wo oi, onoga kataku wo sonukete tadazumu wo miru, kono hito fumi wo himotoki yomu ka to omoeba mata oi, furui, ononoki itarishi ga urei ni ya tavezaru-keri, tsui ni ito kanashige naru koyo wo age, ware ikaga nasubeki ka to itaku kanashimi nageki-keri." The translation bears the marks

of having been made with great care; but we fancy the style will prove a little stiff for the class of readers whom the book is likely to interest most. All the difficult Chinese characters have *kana* at the side, but this does not greatly assist those who are unacquainted with their meaning. The work ought to prove useful as a help to the development of the imaginative powers of the Japanese. Taken as a whole, it is far beyond even the most striking of Bakin's conceptions, clever as some of these were. The Religious Tract Society is spending its money wisely in reproducing in Japanese standard books of this kind, instead of printing little goody stories about angelic children that never live to grow up, reclaimed drunkards, and the like.

THE HONOUR OF A SEAT IN THE HOUSE.

THE *Mainichi Shimbu* uses very sweeping language about the Peers who are seeking election at the hands of their order. It declares that their principal, if not their only purpose, is to obtain the distinction of legislating in common with Princes of the Blood and other great dignitaries of the realm. It hints also that they are disposed to resort to corrupt means of accomplishing their purpose, and it reminds them that if they make their way to the Upper House by a route involving loss of self-respect, the result cannot be at all comfortable. "A decoration," our contemporary says, "is an honorable badge, not because of its pretty sheen, but because it indicates the performance of some meritorious act. Men attach little value to decorations given indiscriminately; they even ridicule them as childish baubles. So it is with a seat in the House. In England and the United States of America, for example, members of Parliament are elected by similar processes, yet whereas a member in England is highly respected, his *confrere* in the United States is not looked up to. This is because the means resorted to by candidates in the latter country being often corrupt, while those employed in the former are pure, men of the first class seek election in England and men of the second class in America. On the eve of our first elections we cannot call the prospect satisfactory. In one district a candidate has been arrested for bribery, in another the police have had to resort to violence for the suppression of violence; in places where force is not openly employed, secret organisations for intimidating electors are said to be in vogue; here a candidate utters slanders which may permanently injure an opponent, and there a newspaper prostitutes its columns to purposes of political defamation. Truly there is little pure atmosphere in the world of politics. The opponents of the Meiji Government used to allege its corrupt practices as the grounds of their attacks. But now these very men, these self-proclaimed purifiers of the political air, are themselves resorting to every kind of corruption and impropriety. We warn electors that those who bribe them to obtain their votes, will be the first to sell the interests of their constituencies in the House. There are methods of bribery which, though, not defined by law, are as surely bribery as the actual payment of coin. Clean legislators cannot be created out of unclean candidates."

THE COST OF AN ELECTION.

THE expense incurred by a country in connection with a general election varies greatly, of course. In England it has been estimated at millions of pounds sterling, whereas in Germany a tithe of the sum is said to suffice. We can form no accurate idea about Japan. One important item of cost, an item which increases in direct proportion to the universality of the suffrage, is loss of productive labour. The people lay aside all business in order to cast their votes, so that, in effect the national machinery of production is stopped for a day. This is not the case in Japan. The qualifications of an elector are so high that comparatively few persons enjoy the suffrage, and in almost every case they are men who can attend the polling places and record their votes without any inconvenient interruption of their business. The expenses connected

with candidature are another matter. They are estimated by the *Fiji Shimpō* on a scale which we venture to think very liberal. The number of members to be elected for the Lower House is three hundred, and it is said that there have been three candidates, on the average, for every seat. Each candidate is supposed, by our contemporary, to have spent from one to two thousand *yen*. Thus taking the average at fifteen hundred, the total outlay of the candidates would be over thirteen hundred thousand *yen*. But is it conceivable that the candidates have really incurred so much expense? From personal knowledge we know that several of them could not have afforded to pay any such sums. Besides the *Fiji Shimpō* speaks as though this outlay were quite distinct from the money spent by persons who travelled from place to place canvassing in the interests of their favourite candidates. It is difficult to give entire credence to such figures. The manner of conducting the elections in Tokyo has been of the least ostentatious and most economical character. Not a *sen* appears to have been spent needlessly, and we should be much surprised to learn that the total outlay in connection with the return of the twelve members exceeded ten thousand *yen*.

MR. HENRY NORMAN.

MR. HENRY NORMAN, says the *Singapore Free Press*, returned yesterday (16th ult.) by the *Resident Haweyn* from Tringann from a journey across the Peninsula, taking over three months. Mr. Norman, who was accompanied by Mr. W. Warren, M.I.C.E., &c., and by Mr. C. F. Bozzolo as far as Temoh, travelled from Kwala Kangsa through Perak and Upper Perak (the disputed territory), through Rhaman and through Legé to Temoh, where his mining concession is situated. After spending a month there, he made his way down to the East coast by the Sungei Bimbing, Sungei Purgan, and Sungei Kelantan to Kota Bharu, whence he sailed to Tringann in a Malay boat, experiencing very bad weather. At Kemaman he met the fleet of His Majesty the King of Siam and met the *Haweyn* subsequently at Tringann. Mr. Norman describes his journey as extremely interesting, though rough at times, especially when complicated with dysentery. He took many photographs, had a little sport, and picked up an interesting collection of silver and weapons. The natives and rajahs were very friendly everywhere, Kelantan only presenting any unpleasantness, and this of the slightest character. In Ulu Kelantan he heard news of a European who had come on from Pahang, but was obliged to return by the same way, as the natives refused to accompany him down the Kelantan River for fear of the anger of the rajah. Mr. Norman, however, had an interview with that potentate, and found him quite amiable. The whole journey was accomplished without misadventure of any kind, and part of it—that from Temoh to the Kelantan River—was through country which no white man is known to have visited before. Mr. Norman leaves for Hongkong by the P. and O. steamer *Rome* this afternoon, and expects to return, *en route* for home, in a few weeks.

THE ELECTION.

THE election returns for some districts were known in the capital on Wednesday evening. We give the names and political professions of those elected, with the numbers of votes cast for them and their opponents, the first name given in each case being that of the successful candidate:—

TOKYO.

FIRST DISTRICT (KOJIMACHI, AKASAKA, AND AZABU).	
Mr. Kusumoto Masataka, Vice-President of Senate	106
Mr. Vano Sakuro (Independent)	80
SECOND DISTRICT (SHIBA).	
Mr. Tanimoto Michiyuki, President of Tokyo Tramway Company (Independent)	77
Mr. Yamada Chubei, merchant (Independent)	54
THIRD DISTRICT (KYOBASHI).	
Mr. Kazama Shinkichi, merchant (Independent)	506
Mr. Inada Masakichi, merchant (Independent)	54

FOURTH DISTRICT (NINONBASHI).

Mr. Fujita Mokichi, editor, <i>Hochi Shimbun</i> (<i>Kaishin-to</i>)	308
Mr. Yasuda Zenziro, merchant (Independent)	49
FIFTH DISTRICT (HONJO AND FUKAGAWA).	
Mr. Ota Minoru, former Chief of Honjo (Independent)	156
Mr. Shibusawa Ei-chi, President of the First National Bank (Independent)	94
SIXTH DISTRICT (ASAKUSA).	
Mr. Takanashi Tetsushiro, barrister (originally <i>Kaishin-to</i> , but subsequently <i>Fichi-to</i>)	130
Mr. Sato Tokichiro, brother of the above (Independent)	87
SEVENTH DISTRICT (KANDA).	
Mr. Oyagi Beichiro, barrister (Independent)	126
Mr. Tsunoda Shimpei, barrister (Independent)	79
EIGHTH DISTRICT (SHITAYA AND HONGO).	
Mr. Tsuda Shindo, Senator	125
Mr. Suzuki Shinnin, barrister	76
NINTH DISTRICT (KOISHIKAWA, USHIGOME, AND YOTSUYA).	
Mr. Yoshino Seikei, former President of the Tokyo City Assembly (Independent)	58
Mr. Hatayama Kazuo, former Chief of the Law Investigation Bureau in the Foreign Office, and now a barrister (Independent)	54
TENTH DISTRICT (SUBURBS OF HIGASHITAMA AND MINAMI-KITA-TOSHIMA).	
Mr. Mori Tokinosuke (Independent)	405
Mr. Aizawa Kiheiji	159
ELEVENTH DISTRICT (SUBURBS OF MINAMI-ADACHI AND MINAMI-KATSUSHIKA).	
Mr. Asaka Katsutaka (<i>Kaishin-to</i>)	533
Mr. Tomioka Hikotaro	402
TWELFTH DISTRICT (SUBURBS OF YEBARA AND IZU-SHICHI-TO).	
Mr. Takagi Masatoshi (<i>Kaishin-to</i>)	301
Mr. Hirabayashi Kuhei (Radical)	243
YOKOHAMA.	
CITY DISTRICT.	
Mr. Shimada Saburo, editor, <i>Mainichi Shimbun</i> (<i>Kaishin-to</i>)	146
Mr. Hiranuma Senzo, merchant (Independent)	83
KYOTO.	
FIRST DISTRICT.	
Mr. Hamaoka Kotetsu (Independent)	27
Mr. Sakamoto Nariyoshi (Independent)	20
SECOND DISTRICT.	
Mr. Nakamura Eisuke (Independent)	47
Mr. Yamazaki Keifun (Independent)	43
HYOGO PREFECTURE.	
FIRST DISTRICT (KOBE).	
Mr. Kashima Hidemaro (<i>Kaishin-to</i>)	168
Mr. Murano Yamato (Independent)	121
NAGOYA.	
Mr. Horibe Katsushiro (Independent)	

It will be seen from the above that the only political parties represented thus far are the *Kaishin-to*, the *Daido* and the *Fichi-to*, and that only two officials have been elected. The defeat of Messrs. Shibusawa and Hatayama in Tokyo has caused some surprise, but the explanation is that the former made no attempt to canvass, and that the latter's opponent is exceptionally popular in his district. It appears that 17 per cent. of those holding the franchise in Tokyo did not vote, but under any circumstances the small number of voters indicates the severe character of the qualification tests.

THE CHINESE CUSTOMS.

THE *Chinese Times*, writing of the Reports compiled by the Chinese Customs, says:—

These Trade reports are truly unique in many ways, and they are highly picturesque, especially when looked at in their mutual relations. The area which they cover has a kind of world-wide diversity in climate and local circumstances. From the regions of thick-ribbed ice to those of perpetual steam, from islands of the ocean to the far interior of the continent, we have independent observers writing simultaneously from twenty separate stations; separate and yet linked together by bonds of unity. Under conditions so favourable nothing could hinder the incessant production of interesting narratives, descriptions, and reflections, if only the men themselves were of the required quality. But it is just the selection of the men that best merits the epithet "unique," for there is certainly no service in the world bringing together such a variegated host of young men of promise as does the Chinese Customs. It might have been far otherwise of course. The principles of favoritism or of the operation of clumsy official forms which have condemned other services to mediocrity might quite easily have prevailed in China; nor was it the fault of the Foreign Ministers that the Customs was not long ago wrecked by the incompetency or the

disloyalty of its staff. With certain honourable exceptions these excellent reformers and volunteer advisers of China had nephews or other *protégés* for whom they were willing to do something at some one else's expense, nor were they at all bashful in forcing on the Chinese these creatures who, besides being useless, were in some cases inclined to look to their patron rather than to the head of the service as the pivot of their allegiance. These dangers having been long ago outgrown, as the vigorous youth outgrow whooping cough and chicken-pox, the service has for many years enjoyed the full advantage of its peculiar eclecticism without any perturbing influence; and the principle of selection being applied with intelligence which, in its turn, also deserves to be called unique, those features only which have been proved to be the most advantageous in the various systems in operation in Western countries are adopted, while many other tests, tending to bring to light excellences of other kinds, are added, with constantly improving results. Having the whole world to choose from, and the most eligible young men in every country being anxious to join the ranks, the Chinese Customs Service possesses special advantages over every other, which are again indefinitely enhanced by the concentration of the administration in a single individual, to whom the efficiency of the service is all in all.

Thus it comes about that talents and accomplishments of the most varied character being fully represented in the Customs' service, no emergency can arise in this land of the unforeseen that cannot be promptly met out of its unaided resources. What a valuable reservoir of organized intelligence this is to the Chinese Government has been proved on many occasions already, and will, if we are not mistaken, become even more evident hereafter.

These ambitious young men, imbued with the spirit of their chief, distributed among the twenty open ports, have every inducement to do well in their work generally, more particularly perhaps in that portion of it which comes conspicuously before the public, the reports on trade. The frequent changes which is one of the wisest features of the administration bring a constant succession of fresh men to each port, which, like the rotation of crops in agriculture, prevents the ground from growing sterile. Each new hand comes with a fresh zest to the description of his new locality, and has every inducement to discover fertile spots overlooked by his predecessors, and it is quite remarkable how warmly the Commissioners and Acting Commissioners make themselves the partisan of the port to which they are for the time being attached. A certain space is, we should judge, allotted to each in the great annual agglomeration of reports, which supplies an admirable discipline for writers disposed to be diffuse; and though there is a misty tradition that the "good things" are as rigorously suppressed by the stern censor in Shanghai as the good jokes are said to be kept out of *Punch* by Mr. Burnard, there is always enough left to supply an almost Homeric literary feast; and the collection constitutes a competitive examination of the most stimulating kind. The Reports on Trade are in many respects better than the Consular Reports from the same places; for one reason they are published before the business matters to which they relate have lost their interest, and the fact that they are written from the Chinese, that is the local, point of view by men who are in more direct contact with what they describe than almost any Consul can be, imparts to them an air of reality which the Consular reports, taking in a much wider horizon, are apt to lack. The stimulating queries which are from time to time put to the Commissioners from headquarters are invariably productive of interesting results, and taking the Customs Press as a whole, it contains a mine of detailed information about the commercial products and the commercial life of the Chinese, valuable above all to the administration itself, but also possessing much collateral interest for those who choose to make the country a study.

RICE.

THERE has been a decided fall in the market prices of rice since the 29th ultimo. The following comparative table will show the change:

PRICES PRIOR TO JUNE 29.		PRICES SUBSEQUENT TO JUNE 29.	
	Per koku.		Per koku.
First Class	15.38 Yen.	First Class	15.15 Yen.
Second Class	15.15 Yen.	Second Class	14.70 Yen.
Third Class	14.91 Yen.	Third Class	14.28 Yen.
Fourth Class	14.28 Yen.	Fourth Class	13.51 Yen.
Fifth Class	13.88 Yen.	Fifth Class	13.10 Yen.

These quotations seem to indicate the commencement of a permanently downward course. The reason assigned is that, up to the present, climatic conditions have been markedly favourable. The warm sunshine of last week followed by the soft rains which began to fall on the 29th, represent an ideal state of affairs for the growth of the young rice. Of course storms and floods in autumn may again undo everything, as was the case last year, but up to the present appearances are very promising.

MARRIAGE IN TOKYO.

ON MONDAY one of the best known and best liked among the foreign residents of Japan, Captain Bougouin, Military Attaché of the French Legation, was married to Mrs. E. W. Strange. The ceremony took place at the Roman Catholic Cathedral in Tsukiji, and the breakfast was given at the French Legation, where Madame Sienkiewicz held a reception afterwards. Among these who attended both at the Cathedral and the reception were Princess Sanjo, Counts Oyama, Yamada, and Saigo, Viscount Katsura, the members of the Foreign Corps Diplomatique, the French Admiral, Mr.

Watanabe, Mrs. and the Misses Hannen, a large number of Japanese officers and others. After breakfast the bride and bridegroom set out for Numazu, where they will spend the honeymoon in Count Saigo's villa.

NEWSPAPERS AND LOCAL CHARACTERISTICS.

In the recent numbers of the *Nippon*, we find very interesting jottings under the above heading. Our contemporary divides the country into six districts, and proceeds to seek a reflection of the character of the inhabitants of each district in the columns of its principal newspapers. Tokyo is left out of the category, for the evident reason that its newspapers vary so widely in their views and aims that general observations can hardly be trustworthy. With regard to the cities next in magnitude, Kyoto and Osaka, we are told that of all the provincial papers those in Kyoto and Osaka are least guilty of aping their contemporaries in the capital. Among them the *Chugai Dempo* and the *Kyoto Nippo* of Kyoto, and the *Kwanzei Nippo*, the *Shinonome Shimbun*, and the *Osaka Mainichi Shimbun* of Osaka occupy the leading position. All these journals have a character as common to themselves as it is different from the character of the Metropolitan press. Speaking generally, the newspapers of Kyoto and Osaka are lacking in seriousness and dignity, and manifest a marked propensity to indecency and licentiousness. In short, the papers of these cities echo the effeminacy and indolence of their readers, who are little disposed to take interest in political matters, being engrossed in the quiet pursuit of commerce and the enjoyment of luxury. The *Yushin Nippo* of Kobe and *Omi Shimpō* of Otsu belong to the same category, and are even more seriously tainted with the vices of their Kyoto and Osaka contemporaries. Turning next to the Tokaido, the *Nippon* avers that of all the papers throughout the empire, those in this district are of the worst type, and among them, the journals published at Nagoya, the third largest city in Japan, stand on the pinnacle of objectionableness. In vulgarity, indecency, and want of dignity, the people of the provinces along the Tokaido judged by their press, have no equals in Japan. The *Nippon* thinks that such a state of things may, perhaps, be accounted for by the demoralizing influence exercised, during two centuries and a half by the corrupting trains of the Daimyo, passing backwards and forwards, in feudal times. The only papers that can lay claim to any show of decency are the *Taimu Shimbun* of Shizuoka, the *Nichi Nichi Shimbun* of Yamanaishi, and the *Ise Shimbun* of Ise. The first two of these journals imitate their Tokyo contemporaries, while the last takes the Osaka papers for model. With regard to the Kwantō, or provinces round Tokyo, the newspapers are not distinguished for either literary merits or general make up, but they reflect in their columns the stout and independent character of their local readers. Their want of homogeneity and the limited scope of their views plainly indicate that the people of the Kwantō still retain much of the spirit of isolation resulting from long government by petty feudal chiefs and still pettier retainers (*daikwan*) of the Tokugawa Government. On the other hand, the romantic character of the people has led their journals to ally themselves with the leaders of the Liberal party. In the papers of this district reports of murders and other violent crimes are most abundant. Kyōshū and Shikoku are next considered. Here the newspaper are pre-eminently distinguished for the prominence which they give to political discussions and political news. They are also noted for their gravity and freedom from indecent news. Among the more important of them may be noticed the *Fukuryō Shimpō* (Fukuoka), the *Chinsei Nippo* (Nagasaki), the *Kyūshū Nichi Nichi Shimbun* (Kumamoto), the *Kagoshima Shimbun*, the *Doya Shimbun*, and the *Kochi Nippo* (both Kochi), and the *Tokushima Shimbun*. The papers in Shikoku are more limited in their scope than those in Kyōshū, but in other respects journalistic tendencies tread the same groves in both district. Turning now to the

San-in and San-yō, districts comprised in the narrow strip of land extending from Kobe to Shimonoseki, bounded on the north by the Sea of Japan and on the south by the Inland Sea, we find papers occupying an intermediate rank between the vulgar and sensational journals of Osaka and Kyoto, on the one hand, and the serious and polemical publications of Kyōshū. Papers published in the Provinces facing the Inland Sea have more affinity with the former class, while those in the Provinces along the Sea of Japan resemble the latter. Finally, coming to the north-east, or district comprising all the provinces along the Sea of Japan from Wakasa to the northern extremity of the mainland, and all the northern Provinces, we find journals astonishingly like those of Kyōshū in their general tone and tendencies. Judging from the columns of these papers, the *Nippon* thinks that the political ideas of the people of the wide north-eastern district are simpler than those of the inhabitants of Kyōshū, and that the minds of both are equally healthy and earnest. Such is the *Nippon's* analysis. It may be that the Tokyo journal's views are coloured by prejudice, but its comments are certainly very interesting and cannot be very wide of the mark. It is beyond doubt that, with rare exceptions, the tone of a newspaper's writings furnish a tolerably trustworthy index of the character of its readers.

THE DOSHISHA GRADUATION CEREMONY.

LAST Friday week witnessed the graduation at the Doshisha of twenty-seven students from the Academy and eleven from the Theological Seminary. At the graduation exercises noticeable features were the presence of the new principal, Rev. H. Kozaki, a very marked improvement in the music owing to the systematic teaching of that subject during the past year, and a very eloquent address from Rev. J. Y. Yokoi. The latter addressed the graduates substantially as follows:—"It is your great privilege to enter active life in this ever to be memorable twenty-third year of Meiji, when, after centuries of docile obedience, your nation will begin to guide itself. At this crisis more than all else, men of strong patriotism, men of thorough education, men of high character are needed, and such I am convinced you will prove yourselves to be. This year must ever be memorable also as that of the death of Dr. Neesima, the beloved and honoured founder of this institution. It will in a peculiar sense devolve upon you, who are the first to graduate after his lamented death, to promote the patriotic and Christian plans he formed. Anyone who in intellectual enjoyment at home or abroad can forget his native land is to be both pitied and condemned." Refreshments were served in the just barely completed Science Hall, the gift of Mr. Harris, which it is intended to open next school year. A canvass of the graduates of the academy has elicited the following facts as to prospective occupation, which however must be understood as only probable:—

JAPANESE ART IN PARIS.

Our Paris correspondent, writing on the 7th of May, says:—"A very beautiful Exhibition of Japanese Art has just been opened in the Government School of Fine Arts. The exhibits are limited to drawings, that is to say, to designs, of Japanese art, dating from the commencement of the present century. Hence the specimens are pure, and devoid of any foreign influence—might I add, of contamination? It is Japanese art, at once natural and national. The Paris International Exhibitions of 1867 and 1878 made known to France the application of Japanese art to industry; the commercial out-

put of Japanese talent in decoration. The present show consists of illustrations of unadulterated Japanese style, of those artistic beauties, bewildering in the variety of their designs, where every feather of a bird, every leaf, every insect, every fish treated, is an object of patient and loving study, executed with an incomparable delicacy of touch and freedom of hand. Visitors remain in rapt contemplation before these decorations, for it would be a misnomer to call them pictures—where all seem to be the same, yet no two subjects are alike; where nothing is repeated, and nothing copied, but from the symmetrical and infinite varieties of nature—gracefully portrayed by the artists' keen insight and marvellous accuracy of observation. Some squirrels playing on twigs rather than branches of bamboo; a hawk swooping down on its terrorised prey; two cocks fighting are gems of ideal motion. The exhibits are those of Japanese pristine talent: the show would have been complete, had there been a *vis-à-vis* collection of Japanese art of to-day, to decide whether the speciality of the Japanese as decorative artists is on the decline, as some allege it to be. May the day be distant when the Far Easterns will be drowned in the Mosaic or conglomerate styles of Occidental art.

JUDGMENT IN THE CASE OF DEGROM AGAINST GABARETTA.

JUDGMENT was given on Thursday in H.B.M. Court by Mr. Justice Hannen in the action brought by Henry Degrom against R. Gabaretta for arrears of rent. His Honour, in giving his decision, said he must hold that the lease was void, but that tenancy of some kind was created by occupation and payment of rent. Upon the facts of the case there was no evidence that either party intended a tenancy at will, and his Honour quoted authorities to show that the Courts would not construe it tenancy at will if they could imply any other tenancy. He thought on the facts that there was a monthly tenancy, for the determination of which a month's notice was necessary, taking effect at the end of a month. In this case no such notice was given, and therefore judgment must be given for the plaintiff for the amount claimed—subject to the deduction of the sum realized on the judgment against Guantini—with costs.

THE BANK OF JAPAN.

THE amounts of convertible notes and reserves in the Bank of Japan for the week ended the 28th ult. were as follows:—

CONVERTIBLE NOTES.		RESERVE AND SECURITIES.	
YEN.		YEN.	
Notes issued	72,818,391	Gold coin and bullion	24,290,914
		Silver coin and bullion	20,361,124
		Public Loan Bonds	13,476,480
		Treasury bills	—
		Government bills	—
		Other securities	4,738,182
		Commercial bills	3,959,723
	72,818,391		72,818,391

Of the above total issue of notes, the sum of yen 5,905,933 is in the treasury of the Bank, and yen 66,913,358 in actual circulation, the latter showing an increase of yen 771,898 as compared with yen 66,141,460 at the end of the previous week.

CHOLERA IN NAGASAKI.

H.B.M. CONSUL at this port has received the following dispatch from Mr. Asada, Governor of Kanagawa Ken:—

Kanagawa Kencho, July 1st, 1890.

Sir,—In consequence of an official communication received from the proper quarter, I have the honour to inform you that Cholera has broken out at Nagasaki, and that, judging from the severe cases which have already appeared there, the disease seems to be of an infectious character.

As it will therefore be required to pay some attention to the vessels arriving at this port from, or having called at Nagasaki, and Kencho officers may be despatched on board such ships, in order to make the necessary enquiries on their entering the harbour, I beg to request you to kindly notify this to the parties concerned.

I have, &c.,

(Signed) ASADA YASUNORI,
Governor.

We learn that Signor Majeroni's principal object in visiting Japan is on account of the Signora's health, which had run down somewhat during their Indian tour. They will remain in Japan two or three months, and may perhaps give one performance later on.

Original from

UNIVERSITY OF ILLINOIS AT
URBANA-CHAMPAIGN

“THE LIGHT OF THE WORLD.”

SIR EDWIN ARNOLD gave his promised reading at the Rokumeikan on the 27th ult. The room was filled to overflowing by an audience including nearly all the principal residents of Tokyo and Yokohama and not a few Japanese. The fame of the author of “The Light of Asia” would, of course, have attracted nearly all English-speaking persons, but there was further a feeling of intense curiosity to hear how the poet would treat the greater story of JESUS’ mission, the incidents of which, as the Bible has handed them down to us, are so vividly impressed on the heart of Christendom that little latitude remains for poetic representation. Let us say at once that this curiosity was fully satisfied, and that the largest expectations built upon Sir EDWIN ARNOLD’s previous achievements were amply justified by the noble and beautiful epic, to such portions of which as the author consented to read breathless attention was paid by his audience for nearly an hour yesterday. The reading was announced to commence at 5.30 p.m., but it began a few minutes sooner so as to enable the Yokohama folks to be quite sure of catching the 6.45 train for their return journey. H.B.M.’s Minister presided, and introduced Sir EDWIN ARNOLD, the Representatives of Austria-Hungary and the United States being also on the dais. We are of course precluded from speaking in detail of an unpublished poem, the privilege of hearing which the foreign public of Japan owes entirely to the charitable desire of its author to aid the poor of Tokyo. It will be permissible, however, to explain that the portion chosen for the reading was a scene of the highest dramatic interest, a meeting between PONTIUS PILATE and MARY MAGDALENE at the latter’s house, where the Governor of Judæa is represented as lodging for the night. The Roman officer, who for the sake of loyalty to CÆSAR, obeyed the savage mandate of a Hebrew mob and sent JESUS to the cross, becomes in the hands of Sir EDWIN ARNOLD a very different personage from the man whom all Christendom has agreed to execrate during nineteen centuries. It has persistently escaped the attention of zealous Christians that the New Testament narrative represents PILATE in the light of one who struggled with more than common patience to be just, and who, yielding at last under pressure of taunts and provocation which only a very strong man could so long have resisted, publicly recorded his final protest against the thirst for blood that swayed the Jewish rabble. In “The Light of the World” PILATE’s picture is drawn in true colours by a master hand, and when, crying with the bitterness of distracted remorse,

“Another watch
Like this would brand me Nazarene,”

he breaks away from the inspired utter-

ances of MARY MAGDALENE and sees the morning sun rise, “forgetting none,” over the lake by whose shores the feet of JESUS had so often wandered, we remember him no longer as the unjust judge who gave CHRIST to death, but as a ruler who, forbidden by fate to obey his nobler instincts, lived to expiate his one error by long years of repentance and pain. MARY, the central figure in the poem, is described in language which will surely rank among the richest and most beautiful word-pictures in English literature. We long to meet her again, as she is doubtless often to be met, in the remaining books of the noble poem, and to learn how the story of her life’s storm and calm is wrought into the framework of the everlasting creed whose expounder she loved so passionately. There is nothing rash in prophesying that “The Light of the World” will justify its title, and revive much of humanity’s enthusiasm for the creed of the Nazarene. Many a line fixed itself indelibly on the memory of its hearers on same day, and not a few among the audience were moved to tears. Sir EDWIN ARNOLD as he closed his book, must have been satisfied with the clamorous applause that succeeded the breathless silence in which he had held his hearers. Not, indeed, by the voices of a handful of Anglo-Saxons in Japan can his fame be swelled or the merits of his new work judged; but if it be true that applause is valuable for its intensity rather than for its volume, “The Light of the World” is surely destined to find a place in the hearts of many generations of English-speaking peoples.

FOREIGN TRADE IN PORCELAIN
AND POTTERY.

THE *Fiji Shimpō* devotes an article to the question of Japan’s export trade in porcelain and pottery. We are told that the business of export was first commenced by Messrs. MARUKOMA, a pottery firm in the Fukagawa suburb of Yedo (Tokyo), who obtained from the TOKUGAWA Government permission to sell Japanese porcelain and pottery to foreigners. The date of this event is not mentioned, but it must have been about 1850, for we read that in the *Ansei* era (1854-59) the same firm received a license from the Chief of the Saga Fief to include the porcelain of Hizen (Imari and Nabeshima wares) among its articles of traffic. The sale of Japanese Ceramic products to foreigners at that time must have been very small; so small that the Marugoma Company induced the TOKUGAWA Authorities to extend to its operations a measure of official protection. At the beginning of the *Meiji* era the Company opened a store in Yokohama, where Hizen porcelain only found purchasers among foreigners, and that to the paltry extent of 3,600 *yen* annually. Well do we remember this Hizen por-

celain, the so-called “Old Japan” of Western collectors. Needless to say that the adjective “old” was employed by pure courtesy, for in point of fact the ware could not boast either antiquity or prettiness. Its type was a big, clumsy vase, with bottle-shaped body, trumpet neck, and scolloped lip, decorated with deformed men in armour and mishapen courtisans in gaudy pigments. Why people acquired such things we never could conceive, but it is certain that they did acquire them, for in the third year of the *Meiji* era, a Nagasaki dealer, the TAJIRO firm, opened a shop in Yokohama, and the foreign public was induced to acquire more than twenty thousand *yen* worth of Imari porcelain. Those were the days when the barbarous habit of hanging plates on walls was beginning to come into vogue. Japanese householders were surprised to find that the dishes which had served them for fish and fruit and which, when not in use, stood on shelves in the kitchen, were regarded by foreigners in the light of oil paintings or choice tapestry. In the years immediately following the birth of this strange phantasy, many a Japanese scullery was denuded of its contents, and many a handsome plaque was elevated from its lowly place in a Japanese dinner service to a position of honour and admiration on the wall of a Western salon. The more legitimate and time-honoured taste for big jars with covers also asserted itself, and led to a vigorous foray upon the stores of oil-men, sugar-dealers, and confectioners. For it should be understood that the jars which, from the 17th century onwards, figured so conspicuously in those celebrated sets of five or three pieces which the European connoisseur learned to regard as typical garnitures of “Old Japan,” discharged most menial duties in the country of their origin, being in truth used there as trade insignia by merchants of comparatively low status. To set such things on handsome stands in the corners of Occidental drawing rooms, was much as though a Japanese dilettante should have acquired one of the coloured glass monster phials of a western apothecary and placed it in his alcove flanked by a Sesshu landscape or a Korin Cabinet. People rejoiced, however, in happy ignorance of these proprieties or improprieties. Hundreds of capacious jars travelled westward in the days of the Dutch Factory at Deshima, and were followed by inferior specimens of the same type as well as by plates and dishes in the early years of the *Meiji* era. It will be observed that the *Fiji Shimpō* speaks of the export trade in porcelain and pottery having had its origin about the year 1850, but this date must evidently be read as referring to the revived trade only. We know from mediæval records, notably *Les Ambassades mémorables*, that large quantities of porcelain were sent to Europe by the

Dutch in the 17th century. KÄMPFER relates that during the latter half of that century the annual export from Deshima consisted of about 100 bales of porcelain, and WAGENAAR, head of the factory at that place, received as many as 21,567 pieces from Arita at one time. The trade languished and well nigh disappeared altogether during the 18th century, but in the early part of the 19th a revival took place. It is recorded in Japanese annals that, in the year 1820, the greater part of the village at Arita was reduced to ashes by a conflagration. The potters, finding themselves in great straits, readily fell in with the suggestion of one of their number, HISATANI YOJIBEI, who advised them to manufacture porcelain expressly for export. The ware being made, the question arose, how to dispose of it. The consent of the Chief of Hizen had to be first obtained, after which HISATANI himself proceeded to Nagasaki to manage the business. There he found that the number of merchants licensed to engage in foreign trade was strictly limited to ten, and not until he had waited and worked for many years could he succeed in purchasing the privilege of one of these monopolists. Large or small, the trade established by him deserves to be mentioned in any history of Japanese exports. His wares were not confined to the highly decorated porcelain with strongly massed colours and elaborate designs generally known as *Imari-yaki*. They included also blue-and-white egg-shell ware of great delicacy and beauty, one type of which—a nest of cups having envelopes of exceedingly fine basket-work—is known to all collectors. The same classes of porcelain constituted the staple of the Yokohama trade during the first six years of the *Meiji* era, by which time a business of sixty thousand *yen* annually was done. Then began the manufacture of so called "*Satsuma-yaki*," for which branch of business with all its good and evil consequences a merchant named IMURA HIKOJIRO seems to have been chiefly responsible. The high quality and careful decoration of this ware rendered it inconveniently expensive, we are told by the *Fiji*, and at first only a few thousand *yen* worth was exported. By and by the three principal porcelain dealers, Messrs. IMURA, TAJIRO, and MII (of Hizen-ya) combined to push their business, and succeeded in raising the export to eighty thousand *yen*. Then followed (1876) the Philadelphia Exhibition, to which considerable quantities of ware were sent, porcelain decorated with blue under the glaze being, for the first time in modern days, largely exported. Seto had now begun to devote itself assiduously to the foreign market. There and in Arita innumerable sets of tea-cups, coffee services, dinner plates, and so forth were produced for the Philadelphia Exhibition, and it is said that the vogue they commanded gave an immense impetus to the trade. In

1877 the practice of decorating Seto porcelain over the glaze was revived by Mr. IMURA. The *Fiji Shimpō* alludes to this as an invention, but such a term is historically incorrect, since Seto "jewelled" ware had been manufactured forty years previously. On the other hand, it is true that during the first ten years of the *Meiji* era the Seto potters confined themselves to decoration in blue *sans couverte*, and that the atelier established there in 1877 by Mr. IMURA HIKOJIRO for decorating with vitrifiable enamels and pigments over the glaze, was an important revival. By and by the idea was conceived of carrying plain white ware to Yokohama and there applying its surface decoration, a device soon supplemented by the import of Sèvres porcelain for a similar purpose. Ere long there sprang up in Yokohama and Tokyo a number of *Etsuke-dokoro* where every variety of pottery and porcelain, but especially the wares of Owari (Seto) and Satsuma, were tricked out for the foreign market. Thenceforth the history of the trade offers no noteworthy incident. If suffered, like everything else, from currency depreciation and commercial depression, but nevertheless grew steadily, until from 3,600 *yen* in 1867 it reached the respectable total of 900,000 *yen* in 1889, having only once shown a tendency to retrograde, namely in 1882, when it fell from 700,000 *yen* to 500,000.

THE UNSOLD EXHIBITS AT UYENO

HOW to deal with the exhibits remaining unsold at Uyeno is a question that promises to cause some perplexity. According to the *Shogyō Shimpō*, the total value of the articles exhibited is about eight hundred thousand *yen*, whereas the sales have only amounted to a hundred thousand, in round numbers. Seven hundred thousand *yen* worth remain, therefore, on the hands of the exhibitors, whose disappointment at this unsatisfactory result is naturally great. There will, of course, be much reluctance to re-pack the unsold goods and carry them back to their places of manufacture where, as a rule, no market exists. It is therefore suggested that steps should be taken to dispose of them in Tokyo, but to make such a suggestion is much easier than to indicate any good method of carrying it out. Presumably the people of Tokyo, having already selected any articles of which they care to become the possessors, will not be persuaded to re-open their purses merely because the Authorities decide that exhibits which have been exposed for sale during four months without finding purchasers, must be disposed of. Everyone has been surprised at the enterprise displayed by the exhibitors on this occasion. In ninety-nine cases out of every hundred, the Japanese manufacturer, especially the art-artizan, carries on a

hand-to-mouth business. Selling as he produces, he is quite unable to keep any sum of money locked up in his goods. In former times he was not required to make any display of enterprise. Working almost entirely to order, the rare pieces produced on his own account were the outcome of his leisure moments; labours of love which he could afford to keep by him for years and even to bequeath to his children. But no such comfortable conditions prevail now. The manufacturing classes have lost their munificent patrons of bygone days, and are obliged to realize speedily the value of their work in order to buy bread for themselves and their families. To men thus circumstanced the prospect of an industrial exhibition cannot be welcome. For it means, first, that they must devote months of unrequited toil to the preparation of articles sufficiently choice to find a place, if possible a prominent place, in the show; and secondly, that they must wait several months longer before receiving any pecuniary return, even if fortune favours them with purchasers. There is another element of the situation, also, which must not be lost sight of. It is that in many, if not the majority of, cases the artizan knows that he is working for foreign custom. We have no statistics to show what proportion of the exhibits sold at Uyeno were purchased by foreigners, but undoubtedly a large number of those in the art class were thus disposed of. In truth, the market for such things is outside Japan. A very few exceedingly choice and costly specimens attract the attention of wealthy Japanese connoisseurs. But these are rare; a mere fraction of the total purchased by foreigners. One can see how a knowledge of this prospect affects the Japanese workman. It deprives him, as he imagines, of the canons by which he used to be safely guided in catering for the taste of his own countrymen. If he appreciated the truth, he would adhere strictly to those canons, understanding that the outcome of his own pure taste is far more likely to command admiration than the result of his unguided notions of foreign taste. And indeed the present Exhibition shows that this wholesome sense is spreading rapidly, for in the main the exhibits indicate a strong renaissance of genuine Japanese art. But there are exceptions, lamentable exceptions: pieces which recall the days when Japanese artizans turned aside to minister to the fancies that preside at the decoration of a schooner's cabin, or the parlour of a country inn. It is really sad to think of the effort, pecuniary and manual, involved in the production of these costly horrors, which can serve no purpose except to teach their manufacturers, perhaps by the rude process of bankruptcy, that Japan's introduction to the West has not imposed on her the duty of pandering to the vandalism of the vulgar, but has established her right to impose her own canons on her cus-

tomers. Too often, however, the vista of an Occidental market unnerves the Japanese artist. The consciousness that he is working for strangers whose ways are not as his, and who have little sympathy with his aspirations and traditions, deprives him of self-reliance, and adds immensely to the moral difficulty of undertaking any expensive enterprise. It is, indeed, surprising that under such circumstances so much has been done. Rumour says, with truth we believe, that many of the exhibitors were obliged to incur heavy pecuniary obligations in order to prepare their exhibits, and that the very interest on these debts is enough to embarrass them, without the disaster of having their productions left on their hands, which would mean nothing short of ruin. If there ever was a case where public aid might be fittingly given, it is surely this. The present intention, we understand, is to sell by lottery the articles for which purchasers are most urgently needed. The total value of these is roughly estimated at a hundred and fifty thousand *yen*, and subscribers for tickets to that amount would probably be found without much difficulty. Lotteries are not illegal in Japan provided that every ticket brings a prize, a condition which, in this case, would probably necessitate the fixing of the price of the tickets at a somewhat high figure. There is talk of one *yen* tickets, but since very few exhibits of less value than a *yen* would be included, we imagine that a higher price must be named. A considerable number of tickets might be placed among the foreign residents and visitors, but here, as indeed in respect of the sale to Japanese also, much will depend on advertising and organization. If the remarkable perfunctoriness that characterised the measures taken to announce the Exhibition abroad be carried into the management of the lottery, the result can be nothing but a failure.

THE HONGO TABERNACLE.

THE project of constructing the Hongo Tabernacle, which has just been burned, had its origin in the fact that no lecture hall capable of accommodating a large audience, and suitable for purposes of Christian teaching, exists in Tokyo. One of the chief obstacles to successful propaganda in Japan has always been the difficulty of reaching the upper classes. These exhibit towards religious subjects a mien of indifference far more serious as a barrier than bigotry or even fanaticism. Men who think strongly can be reached through the medium of their active antagonism to contrary opinions. But men who do not think at all are inaccessible because of their unconcern. To break down this barrier of impassiveness the missionaries have resorted to the weapon of secular education. In excellently equipped schools and colleges they provide for

Japanese boys and girls educational advantages which cannot be obtained elsewhere on similar terms. There are those who say that this is not the proper rôle for Christian propagandists; that the missionary should confine himself to preaching the gospel, and that the original intention of the societies which support him is not fulfilled when he devotes his time to the dissemination of secular knowledge. We fail to appreciate such reasoning. All churches in all ages have been secular educators. The useful scope of religious influence is not limited to preparing a man for the things that lie beyond the grave. It has to do also with equipping him for the efficient discharge of his duties in the present. Nowhere has this been more practically recognised than in Japan. The Buddhist priests in former times were the people's schoolmasters. It was within the temple enclosure that ninety-nine out of every hundred youths and maidens learned to read, write, and construe the "Four Books" and the "Five Classics," and so entirely was this sphere of work abandoned to the Bonzes that the term *tera-koya* (children's house at a temple) came to be regarded as a synonym for "school." We may truly assert that Buddhism maintained its place in the heart of the nation chiefly on account of its educating functions. Thus Christian propagandists have but placed their feet in a groove familiar to Japan for centuries. They could not have chosen any more effective means of combatting their rival than that of taking its chief weapon into their own hands. If Christianity ought to be disconnected from the systems of science and philosophy that have been developed under its civilizing ægis, then indeed it should take no part in secular education. But if its true aim is to contrive that men shall be taught everything good for them to know, then surely it has to do with the elevating of their minds as well as the direction of their morals. Schools and colleges, however, are not the only places where education can be profitably conducted. The lecture hall is equally useful, especially in a city like Tokyo, where the student classes as well as the older generation will always flock to hear lectures delivered by foreigners. If there were ever any doubts as to the effect which this agency is capable of producing, they would have been completely dispelled years ago by the conspicuous results of the courses of lectures organised by Dr. EBY in the Meiji Kaido, under circumstances of much discouragement and difficulty. Thenceforth it was plain that Christian propagandists must not suffer this new route to be abandoned, and that the construction of a commodious lecture hall in a central position could only be a question of time. In Dr. EBY's hands the project assumed larger and more logical dimensions. From his liberal point of view

everything that tends to ennoble and humanize men's minds falls within the proper sphere of Christian effort, and he accordingly designed the hall so that it should be capable of use as a place not only for theological discourses and religious services, but also for purely scientific lectures, musical performances, and so forth. That Christianity should be thus publicly associated with all the civilizing influences, direct and indirect, which it exercises in Western countries, indicates a wise and far-seeing propagandism. And from another point of view also the completion of the Hongo "Tabernacle" would have been a matter of congratulation. Protestantism is too apt to ignore the fact that men may be appealed to through their senses, though all experience goes to show that such an appeal, by means of music, architecture and attractive popular services, cannot be too highly estimated as a means of reaching all classes. Humanity is pretty much the same everywhere. Methods which are proving so successful in England at present, ought, with due adaptation to local peculiarities, to prove equally successful in Japan. Dr. EBY's Tabernacle, though not reaching the proportions of the Greek and Roman cathedrals on Surugadai and in Tsukiji, would still be a conspicuous material monument of the spiritual and intellectual vigour of Protestant Christianity in Japan, and would, we think, add materially to the efficiency of the work of Christian propaganda. We hope, therefore, that his appeal will elicit a hearty response, and that the work of re-construction may be commenced at once. If the process be taken in hand quickly, nearly all the brickwork left standing by the fire may be saved, whereas delay will probably convert partial into total loss. Those who originally contributed to the undertaking cannot surely be content that their charitable purpose should be entirely without result.

TWO NEW UTOPIAS.

EMIL DE LAVALEYE has an essay in the *Contemporary Review* bearing the above title, supplemented by a lengthy article on the same subject entitled "Communism." In both these essays the communistic views of EDWARD BELLAMY, expressed in "Looking Backward," and of CHARLES SECRETAN, embodied in *Études Sociales—Mon Utopie*, are traversed. The former of these books has had a wonderful sale, no less than 240,000 copies having been sold in the United States and 40,000 in England in the space of a few months. The style in which "Looking Backward" is written is insufficient to account for this success. The book discusses a subject on which men's thoughts were never more busy than now: a subject that has been forced on our attention by the conflict between capital and labour, which within the

last few years has assumed such gigantic proportions.

As M. DE LAVELEYE points out, no age has been without its Utopias. They have all had one characteristic in common: discontent with the present order of things, and the conception of a state in which the real or imaginary wrongs of the present age shall be righted. PLATO'S ideal Republic led the van. Selfishness was the principle with which it made war. It contended that the law of *meum and tuum*, when applied to property and family life, gives rise to covetousness, and makes harmony an impossibility. Family and property must therefore be done away with, that is, wives and goods must be owned in common. The details necessary for the carrying out of the scheme proposed by PLATO have shocked public taste in all ages. His ideal Republic has ever been regarded as an unrealisable dream, with human nature constituted as it now is. The Millenium Utopia, which Jews and Christians alike believed to be imminent for so many centuries, exercised a far greater influence over our Western world than the conception of PLATO. In that new era wrongs would be avenged, and the order of things to which we are now accustomed reversed, mourners would be comforted, and the peace-makers would inherit the earth.

The belief in the coming of a new world was common to a great many nations of antiquity. In the *Woluspa* of the Eddas the Palingenesis is conceived and stated almost exactly as in our Gospels. In lines attributed to the Scandinavian *SIBYL* and in some parts of *VIRGIL* the aspiration after a new world resembles that of Jews and Christians.

Later on, when men's minds were stirred to their very depths by the Renaissance and the Reformation, prophets of new Utopias appeared. Among them Sir THOMAS MORE, CAMPANELLA, and HARRINGTON were the most noted. The chief characteristics of these Utopias were the readjustment of men's relations to each other, the diminution of labour, in fact, the main elements of the communistic programme. Subsequent to this, Lord LYTTON amused himself by writing a novel on social reform entitled, "The Coming Race," which, though inferior to MORE'S work, is interesting as embodying many comparatively modern ideas on human progress.

Mr. BELLAMY'S "Looking Backward," while inferior in conception and execution to none of its predecessors, possesses the advantage of giving expression to the most advanced notions of communists, and of embodying in its imagery the results of the most recent scientific discoveries and developments. The supposed author is one JULIAN WEST by name, an inhabitant of Boston. WEST suffers from insomnia and is put to sleep by means of hypnotism. The doctor, who in a secret chamber was

in the habit of putting WEST to sleep, suddenly leaves the town and the patient sleeps on till the year 2,000, when he is roused by a Dr. LEETE. He is restored to vigour by means of a cordial, and received into the doctor's family. He visits the town and its institutions and describes all he sees. Dr. LEETE announces all his objections to the new order of things, and thus we have a complete picture of what, according to Mr. BELLAMY, will be the social organization of the future.

It is perhaps impossible to give in a few words an adequate idea of Mr. BELLAMY'S new world of things. Suffice it to say that all the minor monopolies of the present day have been swallowed up in one vast concern. The State owns everything. The principle of universal military service is applied to labour. The period of industrial service is twenty-four years, beginning with the close of the course of education at twenty-one, and terminating at forty-five. No wages are paid, and there is no money. Everyone, invalids included, receives an equal share of the products of the nation. All the chief pleasures of life are free—the theatre and the music hall are accessible at all hours of the day, and are supplied with relays of actors and performers. By means of the telephone sleepless citizens may be soothed with sweet strains of music at will.

M. SECRETAN'S Utopia is less removed from reality than that of Mr. BELLAMY. In his imaginary world machinery has been brought to a high state of perfection, and is kept in perpetual motion by relays of workmen. The accumulation of capital is not forbidden, but interest has become so low that for a man to be able to live on his revenue he must possess an exceptionally large fortune. Wages are high, averaging about £120 a year. The State here too is to manage everything and to own almost everything—all the land and all the houses.

In a later article on Communism, M. DE LAVELEYE gives his reasons for believing that the future is not for Communism. He deems it extremely improbable that men's deepest instincts will take a new direction. The system of private property now prevailing is founded on feelings which have existed in all times and in all countries. Among the stimuli to exertion private interest has ever proved one of the most powerful. The feeling that a man is responsible for the maintenance of the members of his own family is another. All attempts to impress on humanity that all human beings have equal rights, are brothers, and have a title to share the results of labour by whomsoever carried on, have invariably failed. Such a system could only succeed were a spirit of universal self-sacrifice to prevail, and even then, it is hard for ordinary mortals to see how the plan could do otherwise than encourage idleness. Communism destroys responsibility, and consequently

must sacrifice either justice or liberty. "Justice," says M. DE LAVELEYE, "in its practical sense, means giving to each his due, *cuique suum*. To each according to his merit and work is a very old maxim, which the consciences of all nations have ever accepted. It is the very principle of responsibility, and the basis of the moral law. . . . To each worker his produce, his entire produce, and nothing but his produce." M. DE LAVELEYE shows that Communism has ignored this principle, that with it diligence and negligence, cupidity and abnegation are alike. The idle and the industrious are fed alike. This system would unavoidably put a premium on laziness. With human nature constituted as it now is, nothing but the most despotic rule could ever make the communistic system work. To live under such a rule would be slavery such as the world has never seen. Instead of increasing brotherly feeling it would increase enmity. If we were bound to work for our neighbours, we should most probably dislike them. Every neglect on their part would be watched with envious eyes. The terrible injustice of the arrangement would soon put an end to its existence.

The only good in our opinion, that communistic theories elaborated in Utopias have done has been of a destructive character. They have ridiculed some of the evils of the existing order of things in a very clever way. As constructive agents they have accomplished nothing. They have solved no great social problem. They have given no assistance to those who are anxious to see the relations of capital to labour better adjusted than they now are. They make a wrong start in underestimating the strength of the instincts on which our present system of property rests, and consequently, though the literary ability with which they have usually been written and the wide discontent with the present order of things to which they appeal have combined to obtain for them a wide circle of readers, they form a remarkable exception to the rule that high, though unattainable, ideals tend to prove valuable agents of reform.

The Exhibition was visited by 833,818 persons during the period from the 1st April to the 1st instant, of whom 6,086 were distinguished, 33,419 special, and 769,395 ordinary visitors, 24,778 being students and 140 foreigners holding special invitations. The daily average was 9,063.

The receipts of the Post Office at Jinsen during April last were yen 230,680, showing an increase of yen 60,814 as compared with the same month of last year.

H.I.H. Prince Komatsu, Commander of the Imperial Body Guards, was to leave Tokyo on the 3rd instant for Otsuna, Chiba Prefecture.

During the month of June last the Foreign Department issued 34 passports to Japanese desiring to proceed abroad, of which 8 were for America, 4 for England, 1 for France, 1 for Germany, 1 for Russia, 7 for China, 8 for Korea, 1 Siam, 1 for Siberia, and 1 for Europe and America.—*Official Gazette*.

AMENDED ORGANIZATION OF THE AGRICULTURAL AND COMMERCIAL DEPARTMENT.

IMPERIAL ORDINANCE No. 102.

We hereby give our sanction to the present Amendment of the Organization of the Agricultural and Commercial Department, and order the same to be duly promulgated.

(His Imperial Majesty's Sign-manual.)
(Great Seal.)

Dated June 20th, 1890.

(Countersigned)

COUNT YAMAGATA ARITOMO,
Minister President of State.

MUTSU MUNEMITSU,
Minister of State for Agriculture
and Commerce.

Article 1.—The Minister of State for Agriculture and Commerce shall superintend matters relating to agriculture, commerce, manufactures, aquatic products, forests, mines, &c., inventions, designs, and trade-marks.

Article 2.—Besides those mentioned in the General Rules of Organization, matters relating to rewards shall be dealt with in the Minister's Bureau.

Article 3.—The following affairs shall be conducted by the Bureau of General Administration which shall be established in the Agricultural and Commercial Department, besides those mentioned in the General Rules of Organization:—

- (1.) Matters relating to meetings for the discussion of agriculture, commerce, and manufactures.
- (2.) Matters relating to the publication and superintendence of maps, books, and reports.
- (3.) Matters relating to domestic and foreign exhibitions as well as to competitive exhibitions generally.
- (4.) Matters which do not come within the scope of other bureaux.

Article 4.—The settled number of councillors special to the Agricultural and Commercial Department shall be 5, and of secretaries, 3.

Article 5.—Councillors shall be occupied in the inspection of mines, forests, and other agricultural, commercial and manufacturing affairs, in accordance with their special orders, in addition to the matters mentioned in the General Rules of Organization.

Article 6.—The following bureaux shall be established in the Agricultural and Commercial Department:—

- Bureau of Agriculture.
- Bureau of Commerce and Manufactures.
- Forestry Bureau.
- Mining Bureau.
- Patents Bureau.
- Financial Bureau.

Article 7.—The Chiefs of the Bureaux of Agriculture, Commerce and Manufactures, and Forestry shall be of 2nd *chokunin* rank or above 2nd *sonin* rank; the chiefs of the Mining, Patents, and Financial Bureaux shall be below 1st *sonin* rank and above 3rd *sonin* rank.

Article 8.—Assistant chiefs shall be attached to the Bureau of Agriculture, Commerce, and Manufactures, and Forestry.

Article 9.—The following affairs will be transacted in the Bureau of Agriculture.

- (1.) Agricultural meetings and associations (*sumiai*).
- (2.) The improvement and protection of agriculture and horticulture.
- (3.) The improvement of agricultural works and of the productive power of land.
- (4.) The prevention and checking of injuries by insects to agricultural products.
- (5.) The improvement of silkworms and tea, and the regulation of associations relative thereto.
- (6.) The examination and awarding of diplomas to veterinary surgeons.
- (7.) The examination and awarding of diplomas to shoeing smiths.
- (8.) The punishment of offences committed by licensed shoeing smiths and veterinary surgeons.
- (9.) The hygiene of domestic animals and poultry.
- (10.) The registration of cows and horses.
- (11.) Hunting licenses.
- (12.) The breeding and improvement of domestic animals, fowls, and useful insects.
- (13.) Fishery Association.
- (14.) The boundaries and superintendence of fisheries.

(15.) The improvement and control of fishing apparatus, boats, &c.

(16.) The increase and improvement of aquatic products, and the development of their production.

(17.) The improvement and protection of salt-pits.

(18.) The collection of materials for reports and statistics concerning agriculture, domestic animals, poultry, and aquatic products.

Article 10.—The following affairs will be dealt with in the Commercial and Manufacturing Bureau:—

- (1.) Commercial Clubs and Associations of persons pursuing the same occupation of commerce or manufacture.
- (2.) Weights and measures.
- (3.) Commercial companies.
- (4.) Commercial brokers and brokers' associations.
- (5.) Domestic and foreign commerce.
- (6.) Bourses.
- (7.) Factories.
- (8.) Insurance.
- (9.) The collection of materials for reports and statistics of commerce and manufacture.

Article 11.—The following affairs shall be dealt with in the Forestry Bureau:—

- (1.) Occupations connected with forestry.
- (2.) The examination of boundaries and limits of forests.
- (3.) The profitable use of land and products of Government forests.
- (4.) The protection and increase of Government forests.
- (5.) The administration of Government forests.
- (6.) The protection of private forests.
- (7.) The maintenance of forests (*hoshon rin*).
- (8.) The adjustment of forest records.
- (9.) The collection of materials for reports and statistics concerning forests.

Article 12.—The following affairs shall be dealt with in the Mining Bureau:—

- (1.) The granting of licenses for mining works.
- (2.) The adjustment of boundaries and the situation of mining districts.
- (3.) The amalgamation and separation of mining districts.
- (4.) The protection of mining works.
- (5.) Mining science.

Article 13.—Matters relating to inventions, designs, and trade-marks shall be conducted in the Patents Bureau.

A library shall be established in the Patents Bureau and maps, books, samples, and models shall there be preserved.

Article 14.—The estimates and settled accounts of the Department and of each forestry district office, and the financial affairs of the Department as well as the lands and edifices under its control, shall be disposed of by the Financial Bureau.

Article 15.—Two judges and 7 examiners shall be attached to the Patents Bureau of the Agriculture and Commercial Department.

Judges will be of *sonin* rank, and shall conduct trials and give judgments.

Examiners shall be of *sonin* rank and shall transact business connected with examinations (*shinsa*).

Article 16.—The settled number of probationers of the Agricultural and Commercial Department shall be 5.

Article 17.—Seventeen engineers, 12 assistant examiners, and 56 *gishu* shall be attached to the Agricultural and Commercial Department.

Assistant examiners shall be of *hannin* rank, subordinate to the Patents Bureau; and shall act as assistants to the examiners.

Article 18.—Twelve engineering probationers shall be attached to the Agriculture and Commercial Department.

Article 19.—The settled number of *akku* in the Agricultural and Commercial Department shall be 200.

AMENDED ORGANIZATION OF THE HOME DEPARTMENT.

IMPERIAL ORDINANCE No. 108.

We hereby give our sanction to the present Amendment of the Organization of the Home Department, and order the same to be duly promulgated.

(His Imperial Majesty's Sign Manual.)
(Great Seal.)

Dated June 26th, 1890.

(Countersigned)

COUNT YAMAGATA ARITOMO,
Minister President of State.

COUNT SAIGO TSUKUMICHI,
Minister of State for Home Affairs.

Article 1.—The Minister of State for Home Affairs shall control matters relating to local administration, elections, police, prisons, public works, health, geography, meteorology, shrines and temples, publication, copyright, census, measures of charity (*shifutsu*) and remedy; and shall superintend other Central Sanitary Association the Chief of the Metropolitan Police Board and local officials generally.

Article 2.—A Board of General Administration shall be established in the Home Department.

Article 3.—The settled number of Councillors special to the Home Department shall be 6, and secretaries 2.

Article 4.—The Councillors of the Home Department shall be employed in the inspection of prisons and penitentiaries in addition to the duties mentioned in the General Rules.

Article 5.—The following bureaux shall be established in the Home Department.

- Bureau for the Management of Prefectures.
- Police Bureau.
- Civil Engineering Bureau.
- Sanitary Bureau.
- Geographical Bureau.
- Ecclesiastical Bureau.
- Bureau of Maps and Books (*Dau-sho-Kyoku*).
- Accountant's Bureau.

Article 6.—The Chiefs of the Bureau for the Management of Prefectures, the Police Bureau and the Civil Engineering Bureau shall be of 2nd *chokunin* rank or above 2nd *sonin* rank; and the Chiefs of the Sanitary Bureau, the Geographical Bureau, the Bureau of Maps and Books and the Accountant's Bureau shall be below 1st *sonin* rank and above 3rd *sonin* rank.

Article 7.—There shall be Assistant Chiefs in the Bureau for the Management of Prefectures, the Police Bureau, the Civil Engineering Bureau, and the Accountant's Bureau.

Article 8.—The following affairs shall be conducted in the Bureau for the Management of Prefectures:—

- (1.) Elections.
- (2.) Matters relating to City and Prefectural Assemblies, city and prefectural administration and all other city and prefectural affairs.
- (3.) Matters relating to the Assemblies of rural and urban districts, the economy of rural districts and all other matters of Administration pertaining to rural and urban districts.
- (4.) Matters relating to the Assemblies of Municipalities, towns, and villages, the economy of municipalities, towns and villages, and all the other affairs of administration pertaining to municipalities, towns, and villages.
- (5.) The expenses of cities and prefectures.
- (6.) Charity and Relief.
- (7.) Charity hospitals, hospitals for the blind and dumb, hospitals for insane persons, hospitals for children, and other buildings for benevolent uses established by cities or prefectures or other communities.
- (8.) Matters relating to conscription and the appropriation of property for the public use (*Chohatsu*).
- (9.) Such matters of local administration as do not come within any other jurisdiction.

Article 9.—The following affairs shall be dealt with by the Police Bureau.

- (1.) Matters of Administrative police.
- (2.) Matters relating to Higher Police (*Koto Keisatsu*).
- (3.) Matters relating to prisons.
- (4.) Matters relating to conditional pardon (*Kuri-shatsu-goku*) and conditional release from surveillance (*Kanishi-kanen*).

Article 10.—The following affairs shall be dealt with in the Civil Engineering Bureau:—

- (1.) Matters relating to Public Works under the direct superintendence of the Department.
- (2.) The superintendence of the public works under the control of cities and prefectures.
- (3.) Matters relating to rivers, harbours, roads, and other public works affecting the interests of the people generally.
- (4.) Aiding in the expense of works directly superintended by cities and prefectures.

Article 11.—The following affairs shall be dealt with by the Sanitary Bureau.

- (1.) The prevention of contagious disease and local epidemics, the control of vaccination and all other affairs of public health.
- (2.) Quarantine affairs.
- (3.) Matters relating to the occupation of physicians and apothecaries, as well as the superintendence of drugs and other medicines (*baiyaku*).
- (4.) Matters relating to the superintendence of local sanitary works.
- (5.) Matters relating to local sanitary associations and local hospitals (*byoku*).

Article 12.—The following affairs shall be dealt with by the Geographical Bureau :—

- (1.) The disposition and superintendence of Government land.
- (2.) The appropriation of land for Government uses.
- (3.) Changes in the names of places and classes of land (*chishu-moku*).
- (4.) Reclamation of land from water.
- (5.) Matters relating to meteorology.

Article 13.—The following affairs shall be dealt with in the Ecclesiastical Bureau :—

- (1.) Matters relating to the preservation of shrines (*shingū*), the maintenance of government and state shrines, *shokonsha* (shrines for the souls of those who died for the State), shrines generally, and old shrines and temples.
- (2.) Personal affairs (*miibun*) of Shinto priests, Buddhist priests and lecturers, the rules and institutions of various sects, the maintenance or abolition of shrines, temples, and other ecclesiastical buildings; and all other ecclesiastical affairs.

Article 14.—The following affairs shall be dealt with by the Maps and Books Bureau :—

- (1.) The publication of maps and the registry of copyright.
- (2.) The preservation of maps and books.
- (3.) Matters relating to the census (*Koku oyobi minseki*).
- (4.) Matters relating to rewards (*hoshō*).

Article 15.—The following affairs shall be dealt with by the Financial Bureau :—

- (1.) The estimates and settled accounts of the Department, and of the offices under it, and the finances of the Department, as well as the lands buildings under its control.
- (2.) The estimates and settled accounts of boards, cities, prefectures, and other bodies under the Department, as well as the expenses of shrines.

Articles 16.—Twelve engineers and 29 experts (*gishu*) shall be attached to the Home Department.

Article 17.—The settled number of probationers of the Home Department shall be 10.

Articles 18.—Sixteen engineering probationers shall be attached to the Home Department.

Article 19.—The settled number of *soku* of the Home Department shall be 349.

AMENDED ORGANIZATION OF THE FINANCE DEPARTMENT.

IMPERIAL ORDINANCE No. 106.

We hereby give our sanction to the present Amendment of the Organization of the Finance Department, and order the same to be promulgated.

(His Imperial Majesty's Sign-manual.)
(Great Seal.)

Dated June 24th, 1890.

(Countersigned)

COUNT YAMAGATA ARITOMO,
Minister President of State.
COUNT MATSUKATA MASAYOSHI,
Minister of State for Finance.

Article 1.—The Minister of State for Finance shall control all the financial affairs of the Government; administer matters relating to finance, expenditures and receipts, taxes, the national debt, coinage, money deposits, securities, and banks; and superintend the financial affairs of cities, prefectures, rural districts, municipalities, towns, and villages.

Article 2.—A Bureau of General Administration shall be established in the Finance Department, and in it the following affairs shall be dealt with, in addition to those mentioned in the General Rules :—

- (1.) Receipts which are under the control of the Finance Department, and the preliminary examination of bills of special finance.
- (2.) Security for good behaviour of and compensation for money lost by financial officials who are attached to the Finance Department.
- (3.) The superintendence of buildings attached to the Finance Department.
- (4.) Special funds of the Government.
- (5.) Coinage.
- (6.) Matters relating to legal causes.
- (7.) The superintendence of the finances of subsidised companies.
- (8.) The translation of foreign documents.

Article 3.—The settled number of Councillors special to the Finance Department shall be 5, and of secretaries 3.

Article 4.—The following bureaux shall be established in the Finance Department :—

Accountant's Bureaux (*Shukei Kiyoku*).
Revenue Bureau.
Customs Bureau.
Treasury Bureau.
National Debt Bureau.
Bank Superintendence Bureau.
Deposit Bureau.
Disbursing Bureau (*Kwaishet Kiyoku*).

Article 5.—The Chiefs of the Bureaux of Accounts, of Revenue, of Customs, and of the Treasury shall be of 2nd *chokunin* rank or above 2nd *sonin* rank; and those of the National Debt, Bank Superintendence, Deposit, and Disbursing Bureaux, below 1st *sonin* rank and above 3rd *sonin* rank.

Article 7.—The following affairs shall be dealt with by the Accountant's Bureau :—

- (1.) The general budget and general settled accounts.
- (2.) The financial estimates and settled accounts of special finance.
- (3.) The inspection of the financial estimates of expenditure.
- (4.) The compilation of the actual accounts of yearly expenditure and revenue.
- (5.) Registration in the accountants' books.
- (6.) The disbursement of reserve funds.
- (7.) The inspection of repayments of settled sums (*teigaku madoshi-ire*): the defrayment of ready money before the beginning of a financial year, the certification of settled sums (*teigaku kurikomi*); and the extra disbursements of each financial year (*kwa nendo shi shutsu*).
- (8.) Items of receipts and expenditures.
- (9.) Reports of receipts and expenditures.
- (10.) The inspection of finance officials.
- (11.) Security deposited by financial officials.
- (12.) The sanctioning of expenditures by cities, prefectures, municipalities, towns, and villages in cases where the Treasury bears part of the expense.
- (13.) The financing of Securities.

Article 8.—The following affairs shall be dealt with in the Revenue Bureau :—

- (1.) The imposition of domestic taxes.
- (2.) The collection of domestic taxes.
- (3.) The control and inspection of domestic taxes.
- (4.) The Land Registry Book.
- (5.) The superintendence of officials who collect domestic taxes.
- (6.) The estimates of expense of collecting domestic taxes.
- (7.) The preliminary examination of accounts of the expense of collecting domestic taxes and of the receipt of the same.
- (8.) Expenditure and receipts on account of stamps.
- (9.) The taxes of cities and prefectures, and of municipalities, towns, and villages.

Article 9.—The following affairs will be dealt with by the Customs Bureau :—

- (1.) The carrying out of Rules as to Customs Duties and Customs Rules generally.
- (2.) The control and superintendence of matters connected with Customs Duties.
- (3.) The preliminary examination of accounts of customs duties, and general receipts of Customs Offices.
- (4.) Examination of the increase or decrease of customs duties (*Kai kan sei ritsu*).
- (5.) The condition, examination, and drafting of tables of foreign trade.
- (6.) The leasing of warehouses, guarantees for the payment of taxes (*hōsei shokuko*), and the disposal of Customs godowns.
- (7.) The supervision of carts and other taxable vehicles, and of vessels for foreign trade.
- (8.) The chartering of foreign vessels trading from special ports of export.
- (9.) Investigations relating to lands, buildings, vessels and other properties of Customs Offices.

Article 10.—The following business shall be transacted in the Treasurer's Bureau :—

- (1.) The superintendence, expenditures, and receipts of Treasury funds.
- (2.) The employment and distribution of Treasury funds.
- (3.) The keeping of records of the expenditures and receipts of the Treasury.
- (4.) The control and superintendence of cash in the Treasury vaults.
- (5.) The compilation of accounts of expenditures and receipts of the Treasury.
- (6.) The preliminary examination of the accounts of financial officials having charge of the Treasury vaults.
- (7.) All matters connected with the vaults of the Treasury.

Article 11.—The following affairs shall be dealt with in the National Debt Bureau :—

- (1.) Matters relating to the levying, borrowing, and repayment of public loans.

- (2.) The recording of public loans.
- (3.) The disposal of paper money, public loan bonds, exchequer bills, and other loan bonds.
- (4.) The issue and receipt of reserve paper money, public loan bonds and Exchequer bills.
- (5.) The compilation of accounts of the national debt.
- (6.) The granting of annuities, pensions, &c.
- (7.) The financial estimate of disbursements of capital and interests of public loans, commissions on public loans, annuities, pensions, &c.
- (8.) Payment of the expense of national loans.
- (9.) Examination of the accounts of national loans, pension, &c.
- (10.) The debts of municipalities, towns and villages, and the public loans of cities, prefectures, and rural districts.

Article 12.—The following affairs shall be dealt with in the Bank Superintendence Bureau :—

- (1.) The control of national banks, private banks, and other banks established in accordance with special laws.
- (2.) Convertible bank notes of the Bank of Japan, and the paper money of national banks.
- (3.) The issue and receipt of the paper money of national banks.

Article 13.—The following affairs will be dealt with in the Deposit Bureau :—

- (1.) The receiving and delivering of money and notes deposited with the Government.
- (2.) The compilation of accounts of money deposits.
- (3.) The use of funds for payment of money deposits, and the interest on money so deposited.
- (4.) The deposit, receipt, and expenditure of notes connected with the funds for the repayment of money deposits, and the interest on money so deposited.
- (5.) The registration of money deposits.
- (6.) The accounts of interest on money deposits.
- (7.) The compilation of the financial estimates and settled accounts of funds for the payment of interest on money deposits.
- (8.) The disposal of funds for the payment of interest on money deposits.
- (9.) The receipts of funds for payment of interest on money deposits.

Article 14.—The following affairs will be dealt with in the Disbursing Bureau :—

- (1.) The compilation of documents as to expenses that have to be settled beforehand, reports generally on the disbursements of the Treasury, &c.
- (2.) Disbursement of the expenditures of the Finance Department.
- (3.) All receipts under the control of the Finance Department.
- (4.) Matters connected with the treatment of Government property in use by the Finance Department.
- (5.) The deposit, expenditure, and receipt of property used by the Finance Department.
- (6.) The disposal of securities.
- (7.) The preliminary examination of accounts of the expenditure of Customs.

Article 15.—Eight accountants and 7 tax clerks of *sonin* rank shall be attached to the Finance Department, who shall discharge duties under the several Bureaux and may also take the place of chiefs of offices (*kwa*).

Article 16.—The settled number of probationers in the Finance Department shall be 10.

Article 17.—The settled number of *soku* in the Finance Department shall be 552.

THE RANKS AND SALARIES OF ENGINEERS.

IMPERIAL ORDINANCE No. 107.

We hereby give our sanction to the present Amendment of the Official Ranks and Salaries of *Gishu* (Engineers).

[His Imperial Majesty's Sign-manual.]

[Great Seal.]

Dated June 24th, 1890.

(Countersigned.)

COUNT YAMAGATA ARITOMO,
Minister President of State.
COUNT MATSUKATA MASAYOSHI,
Minister of State for Finance.

Gishu (Engineers) shall be below 1st *hannin* rank and above 6th *hannin*; and their ranks and salaries shall be in accordance with the Regulations relating to the Ranks and Salaries of *Hannin* Officials.

This Regulation shall come into force on and after July 1st, 1890.

AMENDED ORGANIZATION OF THE FOREIGN DEPARTMENT.

IMPERIAL ORDINANCE No. 109.

We hereby give Our sanction to the present Amendment of the Organization of the Foreign Department, and order the same to be promulgated.

(His Imperial Majesty's Sign-manual.)

(Great Seal.)

Dated June 27th, 1890.

COUNT YAMAGATA ARITOMO,
Minister President of State.
VISCOUNT AOKI SHUZO,
Minister of State for Foreign Affairs.

Article 1.—The Minister of State for Foreign Affairs shall conduct and control the following matters, and exercise superintendence over diplomatic officials and consuls:—

- (1.) Relations with foreign nations.
- (2.) The protection of Japanese commercial and other interests in foreign States.
- (3.) Conferences with foreign Governments in order to secure equal protection in foreign States for Japanese and foreigners in respect of occupations and other matters.

Article 2.—A Board of General Administration shall be established in the Foreign Department, and in it the following affairs shall be dealt with in addition to those mentioned in the General Rules:—

- (1.) Declarations, Conferences and Treaties concerned with the national policy.
- (2.) The carrying out of Treaties.
- (3.) Matters relating to the subjects of the empire resident in foreign States, and to the granting of foreign passports.
- (4.) Matters relating to the granting of interior passports to foreign subjects.
- (5.) The promotion, removal, and personal affairs of officials in the Department, diplomatic officials, and officials of Consulates.
- (6.) Matters relating to the credentials of diplomatic officials, State documents of appointments and reappointments, letters of dismissal (*kuininjo*), and His Imperial Majesty's letters-manual (*goshisho*).
- (7.) Matters relating to audience of diplomatic officials in the empire with His Majesty, and the mode of their treatment.
- (8.) Matters relating to ceremonies with regard to foreign States.
- (9.) Matters relating to the list of diplomatic officials and consuls in Japan.
- (10.) The granting of decorations to foreigners.
- (11.) Matters relating to the establishment (*ninkajo*) of consulates of other States in the Empire.
- (12.) Matters relating to foreign employes.
- (13.) Matters relating to the residence of foreigners outside the foreign concessions.
- (14.) Matters relating to the residence and passports of employes of foreign legations in Japan.
- (15.) Matters relating to marriages between foreigners and Japanese.
- (16.) The examination and publication of reports of Ministers, Consuls, and others in foreign States.

Article 3.—No Councillors special to the Foreign Department shall be appointed, but diplomatic officials with no fixed office (*nuninsho*) shall be attached to the Department.

Article 4.—The settled number of secretaries special to the Foreign Department shall be 4.

Article 5.—The following bureaux shall be established in the Foreign Department:—

Commercial Bureau.
Law Bureau.
Translation Bureau.
Accountant's Bureau.

Article 6.—The Chiefs of the Bureaux of Law and Commerce shall be of 2nd *chokunin* rank or above 2nd *sonin* rank, the Chiefs of the Translation and Accountants' Bureau shall be 1st *sonin* rank and above 3rd *sonin* rank.

Article 7.—Assistant Chiefs shall be attached to the Commercial Bureau.

Article 8.—The following affairs shall be dealt with in the Commercial Bureau:—

- (1.) Commercial and navigation conventions.
- (2.) Foreign coinage, &c.
- (3.) The concluding of conventions with respect to the protection of copyrights, designs, and trademarks.
- (4.) International telegraphs and mails.
- (5.) Matters relating to the fees to be levied by the Imperial Legations and Consulates.

(6.) Regulations for examining or publicly recognizing at Imperial Legations or Consulates, foreign passports (*kaigai-ryoken*) or other documents issued by domestic and foreign authorities.

(7.) The rights of Consuls.

(8.) Matters relating to credentials (*kuininjo*) of Consuls.

Article 9.—The following affairs shall be dealt with by the Law Bureau:—

- (1.) Matters relating to International Public Law and International Private Law.
- (2.) The interpretation of treaties.
- (3.) Questions arising from public documents or correspondence.
- (4.) Petitions filed and actions raised by foreigners against the Imperial Government, as well as petitions filed and actions raised by Imperial subjects against foreign Governments.
- (5.) Matters relating to the privileges and freedom from taxes of diplomatic officials and consuls.
- (6.) Conventions of Extradition, and questions arising therefrom.
- (7.) The carrying out of the laws of this Empire over subjects of the Empire abroad.
- (8.) Questions relating to cases in which Japanese subjects are in the service of foreign Governments, or in which foreign subjects are in the service of the Government of this Empire.
- (9.) Matters relating to the enforcement of the rights of the police of the Empire against foreign subjects.
- (10.) Matters relating to the control of foreign concessions.
- (11.) Matters relating to the expulsion of foreigners.
- (12.) Matters relating to the inspection, and recognition, as well as delivery of certificates of various persons (*midan shusho*).

Article 10.—The following affairs shall be dealt with by the Translation Bureau:—

- (1.) The translation of laws and regulations.
- (2.) The translation of documents of the Department.
- (3.) Answers to questions by other departments and offices of the Empire relating to the manner and style of official translations.

Article 11.—The following affairs shall be dealt with by the Financial Bureau:—

- (1.) The estimates and settled accounts, receipts and disbursement, adjustment of books (*chobo*), as well as the compilation of tables of accounts of the Department and foreign legations.
- (2.) The paying and receiving of money, and the examination of various documents.
- (3.) Matters relating to lands, edifices, and other property belonging to the Department.

Article 12.—Eight translators of *sonin* rank shall be attached to the Foreign Department, and shall transact the affairs of the Translation Bureau.

Article 13.—The settled number of probationers of the Foreign Department shall be 8.

Article 14.—The settled number of *soku* of the Foreign Department shall be 100.

POSTAL MONEY ORDER AND SAVINGS BANKS CASHIERS.

IMPERIAL ORDINANCE No. 105.

We hereby give our sanction to the present Regulations relating to the Cashiers of Postal Money Order and Postal Savings Banks, and order the same to be promulgated.

[His Imperial Majesty's Sign-manual.]

[Great Seal.]

Dated June 21st, 1890.

(Countersigned.)

COUNT MATSUKATA MASAYOSHI,
Minister of State for Finance.
COUNT GOTO SHOJIRO,
Minister of State for Communications.

Article 1.—Cashiers of Postal Money Order and Savings Banks shall deposit money as security for their good conduct without respect to the limitations of Article 1, Imperial Ordinance No. 4 of the 23rd year of Meiji.

Article 2.—The Additional clause of Article 2, Imperial Ordinance No. 4 of the 23rd year of Meiji shall not be applied to cashiers of 3rd class postal and telegraphic offices and 3rd postal office.

Article 3.—Offices placed under the control of the Minister of State for Finance in accordance with Article 6, Imperial Ordinance No. 4 of the 23rd year of Meiji, and Articles 104 and 105 of the Regulations of Finance shall be transferred to the control of the Minister of State for Communications.

CORRESPONDENCE.

THE POLITICAL CAMPAIGN IN IBARAKI.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—The political campaign in this province is quite lively. The candidates are numerous; and each is, of course, striving with all his persuasive power to convince a majority of the voters of his district that he alone is well qualified to represent them in the first National Diet of Japan. The *Ibaraki Daily News*, which is published in this city, and is the leading journal of the province, has been pretty much devoted of late to political affairs. Strange to say, however, it publishes chiefly only matters of general news, or contributed articles, or paid advertisements, and endeavours to maintain a "strict neutrality" so far as editorial utterances and official influence are concerned. Perhaps, its support depends upon this attitude, which seems strange when compared with the course of American or British newspapers in political matters.

Numerous meetings, sometimes social, sometimes oratorical, have been held all over the province in the interests of the various candidates. "Calls" to candidates, letters of recommendation, corrections of misrepresentations, in quite American style, appear daily in the newspapers. One morning, perhaps, a list of supporters of a certain candidate is published; the next morning half a dozen persons whose names were in that list come out in a "card" to say, that their names were used without authority, and that they favour a rival candidate. Accusations of bribery, intimidation, obtaining votes under false pretences, have been muttered, but no legal action has yet been taken against any candidate for such offences.

Count Itagaki has been here to infuse enthusiasm into the Liberal cause, but with what success is not yet known. In the First District, in which this city is included, two members are to be elected; and the probability is that the candidates of the *shiooku*, who are acting independently of party organization, will be successful. In the Second District, where likewise two members are to be chosen, it seems likely that Mr. Shō Nemoto, of the *Aikoku-ko* branch of the Liberal party, will gain a seat. His career has been so romantic, that a few words may not be out of place here. He was born in the country a few miles out from this city about 40 years ago. As his parents were poor farmers, they could not give him much education; but he succeeded in attending the common schools of this city for a while. Then he went to Tokyo, where he pulled a *junk* in the daytime for a living, and studied as he had opportunity, even into the night. He finally managed somehow to reach America, whereby sheer pluck he worked himself up through a high school, and entered the University of Vermont. From this institution he was graduated in the class of '89; and then, after traveling in England and on the continent, returned to Japan. Such indomitable energy and intellectual qualifications certainly deserve a seat in the House of Representatives. As an earnest Christian, he would be a power for good in that body.

The campaign thus far seems to teach that human nature is about the same the world over; and that the Japanese can adapt themselves readily to some phases of representative government. It is, of course, sincerely to be hoped that nothing will happen to indicate that they cannot maintain in purity the governmental rights and the political privileges they have received.

Mito, June 26th, 1890.

CLEM.

FEMALE SHAVERS FOR TOKYO.—THE DAWN OF A NEW ERA.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—Nothing but the extreme importance of the subject could justify me in venturing to beg you to reconsider the decision expressed in the *Japan Mail* of the 28th instant to award the credit of having initiated the great tonsorial revolution to the Kobe artists. The lady whose deft manipulations made so favourable an impression upon you, sir, has had many predecessors in the art—notably in Sweden. There and elsewhere I have had the advantage of being operated on by fair barberesses whose titillating touch yet haunts the stubble of my chin. The wiles of many a one of them have left no doubt on my mind but that the editorial prediction that the thing would work splendidly in Tokyo is peculiarly capable of fulfilment.

As a rule the lady of fashion entertains the firmest conviction that the possibilities of "hope" and "soap" are by no means exhausted by the thyming efforts of the poetaster on the outside sheet of

Pouch. Her conversation is not of racing, breach of promise cases, or the enormities of Mr. Gladstone; it is, nevertheless, irresistible. Between the insertion of the lather-coated brush into the corners of your mouth and the first graceful swoop of the razor you have eagerly purchased a picturesque box of scented soap, and ere the gentle pressure of her hands relaxes from the towel round your chin you are the proud possessor of the very latest razor strop. For the lady barber has discovered that the possession of "plump contours of a dimpled arm" is not incompatible with a strict attention to business.

And when, after your first visit, you leave her fascinating abode, with your hat in one hand, the box of soap in the other, and sundry parcels depending by a party-coloured string from between your teeth, you indeed feel that a new era has dawned for woman, barber, and for

SOMEBODY'S SOAP.

June 30th, 1890.

THE "NEW YORK HERALD" AND THE AZABU MURDER.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—Your paragraph in yesterday's issue of the Azabu murder was not a bit too severe, but you were in error in attributing it to me. I did send the *New York Herald* an article one third of the length about this murder, giving the plain facts and the probable reasons. They sent me my cheque by return of post, but thinking that my article did not sufficiently revel in that spicy subject, they did what they had a perfect right to do so long as they did not append my name, handed the article over to one of their theatrical narrators and told him to work it up. The curious error about the troops crept in thus. I said that Mr. Large went a day earlier because all the train accommodation the next day would be monopolised by the large bodies of troops returning to the capital from the manoeuvres at Nagoya.

The brilliant pieces of description about murderer McElvaine and the Pool of Siloam are, it is needless to say, not mine, indeed the only verbal extract from my letter is the passage about the bank robber.

With compliments, I am yours, &c.,

"THE ARTIST WITH THE PEN."

Yokohama, July 1st, 1890.

THE TABERNACLE.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—Permit me to thank you for your kindly note in your issue of last Thursday regarding the burning of the Tabernacle in Hongō, in which I am so directly interested, and at the same time to gratefully acknowledge in your columns, instead of writing separately, the many letters and verbal expressions of sympathy which kind friends have sent.

The suggestions of the Press, as well as the urging of friends, encourage me to make an appeal for help towards repairing the heavy loss, so that we may at once push forward the work of reconstruction. The season, I know, is exceedingly unfavourable, and claims on public sympathy are many. At the same time it is thought that there are many friends who would be able and willing to contribute at once, when gifts would be doubly helpful. If we proceed immediately we shall avoid still heavier loss, for the walls can be used again if used without delay, and it may be possible for us to open in October, and thus avoid adding another year to the already long delay.

There are two ways in which substantial aid may be given. First by direct subscriptions, either in cash or payable within three or six months, and second, by several friends, who may have a balance lying idle, each entrusting us with a small loan at reasonable interest for six months or a year, until we receive the response sure to come from an appeal to our friends in the West. We need from 3,000 to 4,000 dollars to complete the work as undertaken.

I trust your readers will pardon this appeal. It will at least serve to show those who are disposed to give that their help will be most gratefully accepted "In His Name." Others may pass it by. With many thanks for the constant kindness of the *Mail*.

I remain, yours faithfully,

C. S. EBY.

P.S.—It might be well to indicate in a word or two the genesis and character of the work aimed at by the "Central Tabernacle," for the benefit of those who may not have read the literature relating to the subject. My thought for many years was that in addition to the kind of mission work generally carried on, a supplementary undertaking

on a larger scale, with more varied methods and in which all denominations might unite, should be launched to appeal to the intelligent classes as well as give an opportunity of reaching the masses with still larger effect.

It was not to be wondered at that plans out of the common run, involving the expenditure of large sums of money, should meet with a cool reception and even with active opposition, to overcome which years of delay had to be patiently endured. No doubt both the difficulties and the delay have chastened the original plan into more practical shape. In response to persistent effort several thousand dollars were raised from private contributors and then the Mission Board in whose service I am employed (Canada Methodist) made a generous grant of 4,000 dollars, increasing this subsequently when a more expensive lot was purchased.

The design of the Tabernacle is: (1) To provide a large and well-planned centre for Christian work the very size and style and comfort of which will be an attraction to the best, a something somewhat commensurate with this immense and Imperial city, in this important stage of Japanese History. (2) In such a place to have, besides ordinary and extraordinary evangelistic work, a great variety of lectures, apologetical, scientific, philosophical, popular, illustrated with the aid of stereopticon views, &c.; concerts which should bring the educating and cultivating influence of music within the reach of everybody, and meetings for humanitarian and kindred purposes, in a word, giving the old Gospel in concrete methods adapted to the time, the place and the people. (3) While the specific union of denominations in the undertaking was found impossible, it is hoped to retain the soul of the original plan in perhaps more workable shape. Thus we are not to have a so-called "union" establishment which might lie in danger of splitting on the rock of "What's everybody's business is nobody's business," nor on the other, a so-called "nondenominational" concern which might develop into an Ishmaelite separation from all the churches. It is proposed along with the effective control and intense life of one denomination which takes responsible charge, to lay special emphasis on those points of teaching and those lines of thought and work which may be called *pan-denominational*, lying at the basis of every form of scriptural Christianity and shown in the general outcome of goodwill to men. It is hoped by this means to form a centre from which an influence shall go forth to help forward every branch of the Church, in the upbuilding of which lovers of every denomination may more or less contribute, and which will have indirectly a unifying influence among all Christians on the only feasible line, that of mutual recognition and helpfulness. And I am thankful to say that other churches are represented among the donors. Those who take the trouble to examine photographs of the ruins will notice that there are only three brick walls standing. The front wall is to be a temporary structure of wood and cement, the hope being to enlarge in a few years, extending the building forward, and adding a handsome tower to complete the architect's design. In the meantime the full width of 72ft. and 60ft. of the length, constitute the present building, which with music gallery and platform at one end and galleries on either side will make an attractive and ample audience room. The internal arrangement was suggested by the plan of Mr. John Wanamaker's great Sunday School building in Philadelphia, U.S., the gallery spaces being utilized by sliding doors or curtains when smaller gatherings call for such, and then by the removal of these sliding doors the whole building becomes one large audience room. The present lot, with indirect expenses, has cost us over \$7,000. The building complete and furnished was to be about \$10,000. About \$3,000 will put us back where we were before the fire, but we shall need still another \$1,000 to complete the building and its furnishing without debt. I may add that we expect to make the building fire proof. The word Tabernacle was chosen as less secular than Lecture Hall and less ecclesiastical than Church, and as a just expression of the *via media* arrived at.

PROTESTANT CHURCHES AND PASTORS IN JAPAN.

TO THE EDITOR OF THE "JAPAN MAIL"

SIR,—While heartily thanking you for your kindly reference in to-day's issue to the "Tabernacle" project, I would ask permission to put in a word for several exceptions to the prevailing rule of small chapels and small salaried men, and thus remove a possible though entirely unintended erroneous impression. The American Episcopal Church in Tsukiji, lately opened, though not

very large, is still a gem; the Methodist Church in Azabu, though not ornate, is of considerable size, and beside these there are two or three moderately sized churches in connection with the Ichi Kyōkai sufficient to be mentioned as exceptions to the general rule.

Then, although it seems to be too true that many of the native churches are under-manned, and many congregations, probably in order to be self-supporting, are satisfied with cheap substitutes for efficient ministers, still there are some native pastors who in addition to the earnestness which may be predicated of all, are really well-equipped and efficient men.

At the same time I appreciate and endorse the point you are aiming at, and am in hopes that the "Tabernacle" will make a conspicuous contribution in that direction, viz., that the spiritual and intellectual energy of Protestantism should find expression also in more imposing and better equipped public buildings dedicated to its work in this immense city.

Yours, etc.,

Tokyo, July 2, 1890.

C. S. EBY.

AT THE KANDA POLLING BOOTH.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—Tuesday was a great day for the whole Empire, but it may be doubted whether a day of such national importance was ever ushered in with equal sobriety and decorum. Everybody seemed alive to the tremendous interest of the occasion, and the schools were well-nigh deserted, the students—especially in Kanda—thronging the streets and eagerly discussing the chances of this or that candidate. It was a surprise to learn, however, the very small number of the voters; so many restrictions attach to the franchise that even in such a very populous district as Nishinobashi there were but 637 persons who could exercise the right, while in Kanda the number fell short of 500. It appears that very many well-to-do merchants and real estate owners, while residing *de facto* in Tokyo for quite a long period, are not recognized as citizens *de jure* of the capital, they being registered as residents in other provinces or cities. To take a case in point:—One of the wealthiest and most enterprising merchants in Kanda was debarred from the ballot because he is a native of Shizuoka Prefecture, registered as such, and not under the immediate supervision of the Tokyo City Government, although the owner of many houses in Kanda. Even should he have gone to Shizuoka he would still have been unable to vote, as possessing no taxable real estate in that province. In fine, though paying taxes amounting to quite a large sum annually and for many years a resident of the metropolis, he had not the right to cast a vote.

Owing to similar circumstances the number of voters was astonishingly small compared with the huge population of Tokyo, and for this reason, perhaps, those who could vote fully appreciated the solemnity of the occasion and the great responsibility in their hands.

The ward office (*Ku-yakusho*) was the polling booth in each urban district. A bamboo or board fence shut out the interested crowd of onlookers, and kept all would be intruders at a distance. Each voter was arrayed in his best, with crested haori, flowing hakama and—crucial contrast!—a sun topee. At the entrance he was met by two or three constables, by whom he was required to present his *senkyō-ken*, or voter's ticket. A sharp glance at his general appearance, and he was allowed to enter the ward-office. In Kanda this is quite an imposing building, next door to Mr. Masujima's English Law School. Upon entering the basement and running the gauntlet of some fifty pairs of curious eyes, belonging to the clerks and other officials of the office, each voter was required to remove his wooden *geta*, receiving a pair of straw sandals in return. A flight of steps led to the second floor, where was the all-important ballot-box. In this upper room were twelve persons, exclusive of the voters; one *senkyō-chō*, or supervisor of the ballot, five *tachiainin* or witnesses, 4 *kyōji*, or servants, and 2 *daishi*, or assistant-clerks. Immediately in front of the supervisor was the ballot-box, a large wooden receptacle having three slits. As each voter entered he was questioned as to his name, his address, and his occupation. Upon answering his interrogator (one of the *tachiainin*) the voter had then to produce his *senkyō-ken*; an entry was made in one of the voluminous registers, and with the words *yoroshū gosaimasu*, he was informed that the great moment had at last arrived. Before putting his ballot into the box he had to fold the little slip of paper (bearing his name in full as well as that of the candidate for whom he "plumped") in order to fit it to the narrow

slit, thereby giving the supervisor an opportunity of seeing that he held but one ballot, and that everything was *en règle*. A bow to the supervisor and the ballot was over. At a long side-table, covered with green baize, the voter could thereupon indulge in a cup of steaming tea, to refresh himself after his exciting ordeal. A few whispered words with some other voters waiting for their turn or about to return; a collective bow to the august assembly,—and all was finished. From personal observation I can affirm that no more than twelve voters were present at any one time; there was no opportunity for "wire-pulling"; everything was managed with the greatest decorum; there was no noise above a whisper.

In front of the Kanda ward-office an enterprising photographer was doing a roaring trade in *cartes-de-visite* of Messrs. Tsunoda Shimpei and Oyagi, the two most popular candidates. Reporters and representatives of the press were rigidly excluded from the ballot-room, and not a soul knew how the ballot was going, or who stood the best chance of election. In front of the ward-office was quite a crowd of people, eager to obtain the slightest information as to the probable result of the ballot, but not one syllable reached their curious ears, and the three constables at the entrance might have sat as models for the sphinx, so impressive were their features.

So the day wore on. Each office was open from 7 a.m. till 6 p.m., but towards evening the voters grew scarce and the silent crowd without as silently began to disperse. "How quiet everything is!" I ventured to remark to one of the officials. "Yes," he replied with a meaning smile, "Tokyo is all right, but there's a different state of affairs in the provinces!"

Your obedient servant,
July 1st, 1890.

E.

SPAIN, ENGLAND, AND JAPAN.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—During the past year Spain, England, and Japan have been actors in a scene which has attracted the attention of the civilized world. Important principles of international law and jurisprudence were involved. The last steamer brought to my table a leading journal from Chicago, U.S.A., which contains an excellent, though brief, editorial on this subject. It is from the able pen of Major Robinson, who is recognized, by the press and general public, as one of the wisest and most discriminating thinkers on topics of the day. As it may be of interest to your readers, at this time, to see what is the opinion of no small portion of the leading men in the United States on the whole question involved, I submit herewith a copy of the editorial which is as follows:—

"The question of the extraterritorial privileges of Western nations in Japan is again presented in a way that goes far to justify demand for their abolition. For the last thirty years foreigners have had the privileges of trade and residence in certain localities in the Empire, with local jurisdiction through their own consular courts, and the right of appeal to those courts in determining their relations to Japanese subjects. But for a long time there has been increasing objection to this system on the part of the Japanese, in that it implies their own inferiority, and the United States, France, Germany, and Russia have agreed to its abandonment if some adequate substitute shall be found. Great Britain and other Western powers have, however, declined to consent to any change, despite the almost positive refusal of Japan to submit longer to what is regarded as a national humiliation, on the ground that the Japanese are not yet sufficiently advanced in civilization to make such a course safe.

"But the maintenance of this position has in a recent instance resulted in a flagrant breach of international law on the part of Spain, with England as her direct abettor, and in leaving the little Eastern State, which both Powers insist is not yet in a position to be treated as an equal, the only one of the three fully cognizant of its rights. It appears a Spanish criminal (or criminals) was arrested in Japan by the Spanish Consular authorities, who in lack of a building of their own in which to confine him, were permitted to use the English prison. Such an arrangement would have been proper enough had the crime been committed on Japanese territory, but, unfortunately, the crime was committed in Manila, the arrest of the culprit by the Spanish Authorities being therefore a patent disregard of the Japanese right of asylum. The Japanese very justly insisted that they were entitled to legal jurisdiction in their own country, and that the culprit should be released and re-arrested by their own officers and formally surrendered to the

Spanish Authorities for extradition. They positively refused to permit the criminal to be returned to Manila in any other way, and for nine months stood guard over the English prison, until the Madrid Government instructed its Consul to comply with their just demand. The point once conceded, no further hindrance was offered, the Japanese objection being not to the arrest of the criminal, but to his arrest in defiance of a jurisdiction not surrendered by treaties with other Powers. Naturally, the incident has discredited England, which occupies the position of aiding a breach of international law, although keenly resenting such breaches on the part of other nations, and the press is already calling attention to the loss of prestige which it must involve. It urges that countries determined to maintain their extraterritorial rights must accept the obligations consequent thereon, and that England, with her large commercial interests in Japan, should be first to recognize the vast changes wrought in the Empire within the last few years. If the Japanese are not yet on as high a plane of civilization as they deem themselves to be, the recent incident at least proves that they have a clear perception of what law is and of the rights it conveys, and are prepared to stand strictly upon them. With the evidence they are giving of capacity to keep abreast of Western civilization, it is absurd longer to insist that they are incapable of affording sufficient security to British rights and interests, and if the agreement made with the United States is again offered to other nations, it should be promptly accepted."

Sincerely yours,

FREDERICK J. STANLEY.

June 30th, 1890.

POETRY.

A LITTLE IDYLL IN MOST IRREGULAR METRE.

Maiden childlike, in thy hands
Old Japan must live,
When the customs of strange lands
Curious blessings give.
When thou'rt learned in foreign ways
Think thine own the prettier;
Fragrance in the memory stays,
Fragrance of the vanished Mays:
Mark then all these Cherry days
With the reddest letter.
Dainty breath and dainty finger
Keep the dust and moth away
From thy old-world vestures;
Let its folds of soft cloud-grey,
With their silken texture,
Be the fairy land and gay
Where old Japan may have full sway
And memories fondly linger.
New Japan! no softer hours
Than those we spent among the flowers
The gods can ever send her.
Then once a year forget the West,
Take from thy closet what is best.
Go forth in flowered garments dressed,
Thy form by all their folds caressed,
Brave in them the blossom-showers,
Then lay them by in lavender.

THE TENDENCY OF ECONOMIC SOCIETY.

(Translated from the *Choya Shimbun*.)

The extreme appreciation of commodities in the 13th and 14th years of Meiji, was undoubtedly due to the increased issue of paper money, while the weakness of producing sources was an effect of the reduction of the volume of paper money. There were not wanting methods of remedying those evils, but the case is different with the present economic conditions. The elements that give rise to the depression of to-day are equally of natural and artificial origin: they are from proximate as well as remote causes: the rise in rice values, the depreciation of various shares, and the sudden rise in foreign exchange, are phenomena which threaten the future very seriously.

The appreciation of rice was expected on account of the occurrence of storms and floods last year. The dreadful natural calamities that took place in various parts of the country could not fail to result in unusually poor harvests. In the midst of these apprehensions, a few speculators began to buy rice in the summer and fall of last year. Since then, though the price of rice has undergone more or less temporary change, its general tendency has been towards appreciation.

Rice values began to increase portentously about the end of last year, and reached a climax in May,

when reports came to hand showing a yield of 70 per cent. less in the wheat crop as compared with the usual harvests, and when apprehensions began to be entertained with regard to the prospects of the rice crop for the present year. The Government abolished not long ago the system of providing stores of rice against emergencies, and this course, together with its recent action in opening special export ports for rice, led somewhat to a reduction in the quantity of grain stored in various localities. Even assuming that the harvests last fall were not so poor in reality as popular report estimated, there was still a reduction of 10 to 20 per cent. in the aggregate, and when we have added to this, the constant purchase of by rice merchants, appreciation in the value of the grain was not unnatural. The higher classes of the farming community found themselves placed in a somewhat unfavourable situation for the sale of their rice, and in addition to this, they followed the old fashioned course of keeping their storehouses closed with the view of providing against distress in the future. Under these circumstances the gap between supply and demand was emphasized and widened.

When the Government decided to appropriate the Central Famine Relief Fund for the importation of foreign rice, the popular belief was that the action of the Cabinet would be proportionate to the real wants of the case. For economic society is afflicted by a most acute and sensitive nervous system. The appearance of a large rice merchant in the market, either for the purpose of buying or of selling, has a most powerful effect in influencing the value of rice, and though the Department of Finance—which supremely regulates the finances of the State—might appear capable of lessening the pressure which prevailed, by carrying out the policy of importing foreign rice, yet as a matter of fact social affairs cannot always be regulated by laws. So in this case things came out all contrary to previous calculations, and the result was an accelerated increase in rice values. The sale by the Government of such a small amount as 5,000 bales of imported rice, which was the quantity brought forward on the first occasion, had only the effect of disclosing to the public the scarcity of the store of rice in the hands of the Government, a result that naturally contributed to increase rather than decrease the market quotation. These 5,000 bales were all acquired by a few speculators, and prices for this consignment actually mounted higher than those of the general market. This was certainly not the result that the Government expected to bring about. By the second and third sales of rice by the Government, the prospect for the future became somewhat better.

If the harvest of the present year should prove a failure—or if not a failure, should be as poor as last year's—the future will claim our most anxious consideration. The percentage of poor people to the general population is increasing daily; the highways are now seen lined with starving folk, and it seems to us that some united action should be taken by the rest of the community in order to remedy the prevailing distress. But this distress is merely the effect of the conditions that we have mentioned above.

The free monetary conditions of the 17th and 18th years of Meiji (1884 and 1885) gave rise to many corporations, the aggregate capital of which was correspondingly large. Now, even though these corporations could stand upon a solid basis and realize ample profits, there would still be inevitable trouble in the economic world as a consequence of this fixing of capital. How much more serious then is the case when we find that the greater number of those corporations were called into existence by a mania which has been well called the "company fever?" Precisely this point gave rise to grave apprehensions in the year before last. Fortunately, the more intelligent classes of the community were not behind-hand in their preparations to meet the economic troubles that seemed imminent; and these preparations of theirs were in a manner successful in preventing the occurrence of catastrophes. Nevertheless the root of the danger is deeply set in society, and various evils are apt to appear on the surface as circumstances favour their growth. With the appreciation of rice last fall, the value of various shares depreciated in proportion. In the months of February and March, the time for paying up instalments of shares, the circulating medium of the central markets was centred in the farming classes, and the lack of means to fulfil obligations led to a drop in the value of stocks. The Bank of Japan, realizing the emergency, facilitated the use of securities and placed at the disposal of the Specie Bank funds for the purchase of foreign bills, with which view it increased the issue of convertible notes by yen 15,000,000. But this step has not been productive of extensive benefit, and

since then, a period of about three months, the price of rice has augmented and the earnings of the labouring classes have to be charged into food as fast as they are won. There are a number of large landed proprietors throughout the country who in their fears as to the future, limit their expenditure as much as possible, and thus while there is a small demand for commodities, there is also a daily lessening necessity for labour. Meanwhile, the Bank of Japan has lowered the rate of interest, and raised the value of various securities. But how can these acts on the part of the Bank alleviate the present depression?

That imports exceed exports is not necessarily a circumstance to regret, for if increased imports mean increased consumptive power they cannot be injurious. On the other hand, the excess of exports over imports is not necessarily a subject for congratulation, especially if it involves decreased consumptive power in the interior, when wages become lower; and articles of inferior value are exported.

But the excess of exports in our commerce of last year is not due to the above mentioned cause. The excess of imports noticeable from last January up to May inclusive, was above *yen* 1,000,000, and among such imports is found one commodity that was introduced from the necessity of circumstances, namely, rice. We have now reached the time for the export of raw silk and in this direction we may look for compensation for other losses. We have just received a telegram from America communicating the decision of the United States in regard to the silver problem, and it is plainly apparent that henceforward the \$4,500,000 which the United States will buy monthly must tend to appreciate silver and consequently depreciate gold as against silver. This policy of the United States Government may bring benefit to the States, but the silver nations of the East, our country included, may find it advantageous to buy articles from gold countries, but disadvantageous to export to the latter. This circumstance will no doubt place serious hindrances in the way of the sale of our raw silk.

Since last January we have lost in foreign trade some *yen* 4,000,000 in gold and silver. But this sum was only exchanged for foreign articles, and must not necessarily be classed as loss. Still if this should continue without alteration, gold and silver must flow out of the country rapidly.

If in these circumstances credit should be injured in the interior, and a host of applicants appear before the Bank of Japan all anxious to exchange notes for silver, how will the Bank meet this demand? Surely therefore this outflow of gold and silver which is observable at the present time is not at all a favourable phenomenon. Does the Minister of the Treasury think that the policy of buying in foreign bills will be potential as a remedy? The above are among the most regrettable circumstances that are manifested in Japanese economic society at the present time, and for these the Minister of State for Finance is not necessarily to blame—nor indeed are those who blame him.

A POLITICAL CLOUD.

(Translated from the *Choya Shimbu*.)

No one will venture to doubt that constitutional systems have merits and recommendations far outweighing the abuses and evils that they give rise to. Indeed the drawbacks are not by any means few in number. One of these undoubtedly is the impossibility of assembling within the ranks of the government all the leading statesman of a particular era. In practice the existence of a constitutional system necessarily involves the rise of political parties, so that while one class holds the reins of government another will range itself on the popular side, and leading politicians will thus be divided into two sections. Under a well regulated form of absolute government it may happen that the best men of the country are in power and fill official positions, but that is a conjuncture which can only be hoped for once in centuries. On the contrary, it is more often the case, under absolute governments, that rogues and persons of low origin and dishonest methods mostly come to power and harass the people by their unprincipled policy. A representative form of government cannot be regarded as perfect in respect of this question of employing and utilizing men of power, and yet as compared with the other systems of government, the representation may properly be regarded as not far removed from perfection, if it can secure half of the ability and genius that the community can furnish.

People living under a representative system of government ought therefore to endeavour to elect as their representatives men who may be depended on to subserve their private interests to the dictates

of justice, and who can cooperate with each other in disposing with effect of political affairs. If it should happen that the nation is so far neglectful of its best interests, and so far ruled by mere circumstances, as to fail in its duty of electing fit and proper men, then the Diet will be crowded with selfish and unscrupulous persons. So that, assuming that the principle of a party cabinet be happily put into practice, the men who will come from the Diet to take the management of public affairs, will certainly not be those best suited for the purpose. How then can the public expect to see a just and enlightened government policy? If this is to be the result, although the representative form of government has the advantage of securing a large proportion of the best men of the country, it can hardly be regarded as superior to the absolute system.

In Europe and America it is often said that a constitutional system does not necessarily mean the accession to power of the most capable men, because of the fact above mentioned; and is there not perceptible a tendency among our own countrymen to elect as their representatives unworthy persons? Instead of using speech, that most valuable weapon, we find that some of our candidates are not ashamed in the heat of election contests to resort to the argument of brute force, thereby placing themselves on a level with the lower animals. This harmful tendency has already been noted by the general public, and its authors will no doubt be treated with the disapprobation which they deserve. But in cases where bribery and gifts are used for the purpose of obtaining votes, the effects may not come so prominently before public notice, though nothing could well be more despicable than such practices.

The persons who now strive to win votes by the aid of money are on the same low level as those who gained the rank of *samurai* in former days by the same means. The privileges which merchants and farmers were able to obtain dishonestly in the feudal times were no doubt of considerable moment to themselves personally, but we look in vain for any good that they as *samurai* ever accomplished for their country. They gave rise to the custom of leading extravagant lives among their comrades; they were the first who fled when their assistance was most needed; and they were invariably in the rear when an expedition set out, and in the van when retreat became necessary. What then did they accomplish for the country? The case stands the same with those who at present strive to obtain seats in the Diet; only that now the men whom they bribe are not their lords but their electors. They now administer their flattery not to their superiors but to their inferiors, and we may gather from this what their conduct will be when they gain admission to the Diet. In our times there are not lacking men who are concerned in seeing the danger which lies in the future, who can recognise and are able to apply the proper remedies. And just in the same way, there were in the old days *samurai*, perhaps of low birth but of military skill and gallantry, whose characters were conspicuously different from the debased clansmen who marked the period of the decline of feudal power. These were unable to gain access to their lords by reason of the clouds of worthless parasites by whom the latter were surrounded, and so also the people in our times are being led by selfish and unprincipled men, who take advantage of the general lack of political ideas among the electors, and are thus enabled to defeat the efforts of those who would fain direct popular action into proper courses. The educated and cultured men of the feudal times elected to wait for their opportunity, retiring for this purpose from public life, and in solitude devoted themselves to study and reflection; and so now-a-days their prototypes, seeing the futility of present action, withdraw from the political arena and wait for the time when they may with advantage to their country take part in public affairs. The comparison, however, is not completely sound, for with the great weapon speech, which now lies in their grasp, good and capable men may do much by remaining in the contest and boldly and fearlessly attacking the evils which are making their appearance. The prospect in any case is a somewhat unsettling one, and shows the fallacy of expecting that a constitutional form of government will necessarily involve the presence in the Government of a proportion of the country's best men, so that we look forward with no little anxiety to the opening of the first Diet.

HORSFORD'S ACID PHOSPHATE FOR SUNSTROKE.

It relieves the prostration and nervous derangement.

YOKOHAMA AMATEUR ROWING CLUB.

SPRING REGATTA.

The Spring Regatta of the Yokohama Amateur Rowing Club, which was held on Saturday, was a most successful meeting. Great interest was evidently taken in the races generally—but specially in the man-of-war contests—for in addition to a large company of shore people, including a goodly proportion of ladies, the verandah and grounds of the Club House were thronged with British, Japanese, and Turkish officers, while the fleet of cutters, galleys, gigs, and dingies that lay outside the course filled with applauding crews lent to the scene an aspect of much liveliness and animation. The efforts of the Japanese blue-jackets were watched keenly by the crews of four torpedo boats, which were evidently also drawn to the spot by no common interest. The afternoon was throughout a most enjoyable one, capital music being discoursed at intervals by the band of the *Imperieuse*. The following were the officials:—Committee—Messrs. W. W. Till, H. V. Henson, F. J. Hall, J. Walter, C. Giffens, W. W. Campbell, H. J. Gorman, J. Rickett, W. J. Kenny, E. W. Tilden, Mr. Rickett acting as Judge, Mr. Hennen, as starter and umpire, and Mr. Sutter as timekeeper. We append a list of the events:—

MEN-OF-WAR—SINGLE BANKED.—Handicap, 15 Sec., per Oar per Mile.—Two Miles.

<i>Imperieuse</i> , gig, 6 oars	1
<i>Severn</i> , galley, 8 oars	2
<i>Ertongroul</i> , gig, 5 oars	3
<i>Fuso Kan</i> , galley, 7 oars	0
<i>Takao Kan</i> , galley, 6 oars	0
<i>Leander</i> , whaler, 5 oars	0
<i>Alacrity</i> , galley, 6 oars	0
<i>Caroline</i> , whaler, 5 oars	0
<i>Imperieuse</i> , whaler, 5 oars	0
<i>Takachiho Kan</i> , gig, 6 oars	0
<i>Caroline</i> , galley, 6 oars	0

The crowd of eleven boats started in capital style, one of the Japanese craft showing up very well at the outset. They kept all well together out to the mark, but on the return trip the *Severn's* big galley drew ahead, and, gradually increasing her lead, came in first in 21 m. 50 secs. The *Imperieuse* gig finished next 40 secs. astern, thus winning the race by means of her allowance of two oars (30 secs. per oar over the course of two miles). The Turkish gig took third place, but no prize. The race was a most exciting one.

CLUB FOURS.—One Mile.

WHITE.	
L. Mottu (bow)	1
G. Philip	
C. H. Merriman	
B. H. Pearson (stroke)	
W. L. Robinson (cox.)	
BLACK (Plover).	
W. W. Campbell	2
K. Kingdon	
F. J. Hall	
F. H. Shepherd (stroke)	
J. Rickett (cox.)	
BLACK (Petrel).	
E. R. Morris (bow)	3
A. Churchill	
H. de Raasloff	
G. W. Barton (stroke)	
W. Sutter (cox.)	

Of the three crews that started, Shepherd's was most fancied, this with Barton's being those originally selected, while the white boat was manned by practically a made-up lot. Henson and Grant had to retire, their places being taken by Martin and Philip, and almost at the last moment Pearson had to take stroke in place of Martin. Barton in the outside berth, and Pearson inside, drew ahead immediately after the start, the third crew falling astern. Off the Creek, Barton had the lead, but Pearson spurred gamely a hundred yards out and though one of his men caught a crab and threw other two oars out of action, the crew recovered very promptly and, rowing with rare pluck, got level with their opponents and won by a quarter of a length. Time, 8.44.

MEN-OF-WAR—DOUBLE BANKED.—Handicap, 15 Sec., per 2 Oars per Mile.—Two Miles.

<i>Imperieuse</i> , cutter, 12 oars	1
<i>Alacrity</i> , cutter, 10 oars	2
<i>Ertongroul</i> , cutter, 10 oars	3
<i>Caroline</i> , cutter, 10 oars	0
<i>Caroline</i> , cutter, 12 oars	0
<i>Takachiho Kan</i> , cutter, 12 oars	0
<i>Takachiho Kan</i> , cutter, 12 oars	0
<i>Takao Kan</i> , cutter, 10 oars	0
<i>Fuso Kan</i> , cutter, 10 oars	0
<i>Yamato Kan</i> , cutter, 14 oars	0
<i>Ertongroul</i> , cutter, 8 oars	0

URBANA-CHAMPAIGN

METAL WORK.

Bronze working in Japan is a pre-historic art, bronze bells and arrow-heads being discovered, concerning whose origin and age nothing is known. Immediately prior to European intercourse, a complete revolution took place in the bronze industry, introducing a skilful arrangement of varied metal colouring, and a better sense of due balance in ornament. In this latter school, which is absolutely indigenous, high relief does not play so prominent a part, whilst inlaying and incrustation are artistically combined with chasing and engraving.

THE SWORD.

The art of welding steel was carried several centuries ago to consummate perfection, and sword blades made by such men as the Miyochins obtained a reputation equal to the old Persian.

IRON.

Most interesting developments in cast and wrought iron work are now produced in Tokyo and Kyoto, and an infinite variation shown in design, the inlaying of gold, silver, copper, and other metals. Amongst the most eminent living exponents of this craft are Komi, Iyenori, and Iko-kusa, and I consider the modern circular metal salver by the latter artist, which I have the pleasure to exhibit, shows breadth and force in combination, with microscopic detail, far beyond the skill of any metal-craftsman outside Japan.

Copper does not lend itself well to casting, but is adapted for working up into wire and sheet forms. The Japanese fully recognise this, and utilise this property by engraving copper, and forming with it decorated mounts for boxes, cabinets, &c.

CARVING.

The major glyptic art was for centuries represented in Japan by the wood-carver, the Mokubutsu, who produced half sized and colossal figures of the various impersonations of Buddha, and the saints and heroes affiliated with the Buddhist cult. The monotonous treatment was prescribed by formal rule, and Hindu in character. But since the disendowment of the Buddhist faith in 1868, the craftsman have diverted their skill in other directions, notably in the production of natural life-sized male and female figures. Passing to the minor glyptic works, we find in the class of carvings known as Netsukes an absolutely original and indigenous art. These Netsukes, in ivory, in wood, in bone, and other materials, are so much appreciated and so well known to Western collectors, the schools and principal carvers so duly chronicled and attested, that I need here do no more than allude to them.

JEWELLERY.

The jeweller's art, as applied to personal adornment, is not indigenous, save and except for the hairpins worn by the women and the specimens of "Japanese jewellery" with which we are now familiar in Europe are so many minor illustrations of the ready versatility of the Japanese craftsmen. To personal accessories, pipe pouch, &c., the goldsmith's art in Japan has heretofore been rigorously confined.

EMBROIDERY.

Japanese embroidery, which is akin to, yet markedly more diversified than, Chinese embroidery, is now so well known in Europe that it needs no descriptive comments. Recent influences have separated this beautiful craft into two divergent schools, in one the aim is cheapness, and the evil "sweating system" has been adopted with the inevitable results of vulgarity and deterioration; in the other, progress and a higher standard is the motto.

TEXTILE MANUFACTURES.

The most characteristic Japanese textile productions during the feudal era were silken brocades and plain stiff silken materials, adapted for male and female costumes. These fabrics combined original design, sobriety, and richness of colour with excellence in quality, but the material was abnormally thick, rigid, and stiff. One tendency of Western influence has been to reduce the substance of these silks, which was, indeed, thicker and heavier than seemed necessary or desirable; another to deteriorate both designs and colourings. There can be no reasonable doubt that the Japanese silk industries will in the near future greatly influence the European. Manufacturers are conforming to European requirements, the area appropriated to sericulture and the cultivation of the mulberry is being rapidly extended, the native hand-looms are being supplemented by power-looms and the latest scientific mechanical appliances of the West. The material is a home production, the workmen are industrious and deft, the cost of labour is far below the European scale, and the expense of ocean transit for an article occupying so small a bulk as manufactured silk is merely nominal. I have seen samples of what

is known as "gros-grain" silk, made on Japanese power-looms, which—lacking the meretricious surface lustre, and the substance produced by artificial weighting in Lyons silks at the same cost—are, as regards purity of material and prospective durability, far more satisfactory. Lyons and Milan will soon have no insignificant rival in the Japanese market.

After some remarks on the *Paper Industry* and *Flower Decoration*, the author passed on to the subject of *Exhibitions*.—He said:—I must not omit to bear witness to the persistent efforts of the present Japanese Government to induce their art manufacturers to conserve the spirit of past achievements. One method adopted is a free distribution among the principal craftsmen of admirable photographs of ancient and approved art examples suitable to particular industries. The industrial exhibitions first held in Japan after some twenty years' contact with the Western nations, revealed an immense deterioration in Japanese national art. These were the Tokyo Exhibitions of 1877 and 1881. Japan erred precisely as Great Britain had erred, and, with the far larger excuse of a restrictive past isolation, too hurriedly absorbed the scientific materialism of the West. In conclusion, I claim that the race-genius of the Japanese has preserved its individuality, known how to benefit by contact with older and seemingly more powerful foreign influences, and evolved from them new and progressive developments, moulding even the powerful cult of Buddhism and the teaching of the Chinese sages to its own form and special requirements. I claim that this race-genius has admirably conformed itself to the peculiar physical conditions of land and climate; to historical events which, at one and the same time, fettered it in social serfdom, and barred it from all contact with the rest of the world; and that in all varying circumstances, subject only to temporary aberrations natural to an emotional people, it has maintained its essential vitality. Therefore, for its art and industrial manufactures, I predict a renewed and progressive life, and a higher and broader perfection than has been attained in a unique and historic past.—*London and China Express*.

LATEST TELEGRAMS.

[REUTER "SPECIAL" TO "JAPAN MAIL"]

London, June 30th.

In a dispatch to the French Government on the subject of the condition of affairs in Newfoundland, the Marquis of Salisbury has intimated that England cannot allow French naval commanders to take the law into their own hands in the punishment of British fishermen.

London, July 2nd.

The Silver Bill Conference Committee of the Senate House is unable to meet for a few days, owing to the absence of two members, thus delaying the final framing of the compromise bill.

London, July 4th.

It has been decided to confer on Prince Komatsu of Japan the Grand Cross of Honorary Knights of the Order of the Bath.

The Silver Conference has assembled.

TIME TABLES AND STEAMERS.

TOKYO-YOKOHAMA RAILWAY.

DOWN TRAINS LEAVE SHIMBASHI Station at 6.05*, 6.40, 8.35, 9.30*, 10.25, and 11.45 a.m., and 1.25, 2.30, 3.55, 4.45† 5.50, 6.50, 8.30, 9.55, and 11.15† p.m.

UP TRAINS LEAVE YOKOHAMA Station at 6.30, 7.20, 8.10, 9.15† 10.22, and 11.30 a.m., and 12.45, 2.3, 4.25†, 5.30, 6.35, 7.50, 9.10, 10.05, and 11.05† p.m.

FARES—First-class, *sen* 60; second-class, *sen* 40; and third-class, *sen* 20.
Trains marked † run through without stopping at Omori, Kawasaki, Teurumi, and Kanagawa Stations. Those marked ‡ run through without stopping at Omori, Kawasaki, and Teurumi Stations.

TOKAIDO RAILWAY.

TRAINS LEAVE YOKOHAMA (down) at 6.50, 9.10, 10.20, 11.25 a.m., and 12.40, 2.25, 4.55, 5.35, and 7.45 p.m.; and KOZU (up) at 6.35, 8.40, 9.40, and 11.07 a.m., and 1.17, 2.45, 4.58, 7.25, and 9.46 p.m.

FARES—To Hadogaya, first-class *sen* 6, second-class *sen* 4, third-class *sen* 2; to Totsuka, *sen* 18, *sen* 12, *sen* 6; to Ofuna *sen* 36, *sen* 24, *sen* 12; to Fuji-shima, *sen* 42, *sen* 28, *sen* 14; to Hiratsuka, *sen* 66, *sen* 44, *sen* 22; to Oiso, *sen* 75, *sen* 50, *sen* 25; and to Kozu, *sen* 93, *sen* 62, *sen* 31.

Down trains at 6.50 a.m. run no further than Kyoto arriving there at 11.20 p.m.; at 10.20 a.m. no further than Nagoya, arriving at 10.10 p.m.; at 12.40 p.m. no further than Shizuoka, arriving at 6.50 p.m.; at 3.45 p.m. no further than Shinjuku, arriving at 8.48 p.m.; and the train at 5.35 p.m. runs to Kobe, arriving at 12.45 p.m. next day.

A tramway runs between Kozu and Yumoto (distance 4 *ri*). Jinrikisha may be hired between Yumoto and Miyazusuka (distance 14 *ri*).

OFUNA-YOKOSUKA RAILWAY.

TRAINS LEAVE OFUNA (down) at 7.30 and 9.40 a.m., and 12.05, 1.30, 4.03, 6.14, and 8.30 p.m.; KAMAKURA (down) at 7.41 and 9.51 a.m., and 12.16, 1.41, 4.14, 6.25, and 8.41 p.m.; and ZUSHIMURA (down) at 7.50 and 10 a.m., and 12.25, 1.50, 4.23, 6.34, and 8.50 p.m.; YOKOSUKA (up) at 6.45, 8.55, and 11.20 a.m., and 12.50, 3.50, and 7.45 p.m.; ZUSHIMURA (up) at 7.01, 9.12, and 11.36 a.m., and 1.06, 3.16, 5.26, and 8.01 p.m.; and KAMAKURA (up) at 7.11, 9.22, and 11.46 a.m., and 1.15, 3.26, 5.36 and 8.10 p.m.

FARES—To Kamakura, first-class *sen* 9, second-class *sen* 6, third-class *sen* 3; to Zushimura *sen* 15, *sen* 10, *sen* 5; and to Yokosuka *sen* 30, *sen* 20, *sen* 10.

TOKYO-SHIOGAMA RAILWAY.

TRAINS LEAVE UENO (down) at 6.40, 8.50, and 11.40 a.m., and 2.40 and 5.40 p.m.; UTSUNOMIYA (down) at 10 a.m. and 3.03 and 5.59 p.m.; SHIRAKAWA (down) at 8 a.m. and 12.36 and 5.41 p.m.; KORIYAMA (down) at 9.25 a.m. and 1.54 and 6.58 p.m.; FUKUSHIMA (down) at 7.35 and 11.33 a.m. and 3.45 p.m.; SENDAI (down) at 6.15, 10.25, and 10.40 a.m. and 2.30, 6.35, and 6.50 p.m.

TRAINS LEAVE ICHINOSERI (up) at 6.40 a.m., and 2.50 p.m.; SHIOGAMA (up) at 7 and 11.05 a.m., and 3.10 and 7.15 p.m.; SENDAI (up) at 7.35 and 11.40 a.m., and 3.45 p.m.; FUKUSHIMA (up) at 6.40 and 10.26 a.m. and 2.36 p.m.; KORIYAMA (up) at 8.29 a.m., and 12.22 and 4.28 p.m.; SHIRAKAWA (up) at 6.35 and 9.47 a.m., and 1.40 p.m.; UTSUNOMIYA (up) at 6.20 and 9.05 a.m., and 12.18, 4.14, and 6.33 p.m.

FARES.—Ueno to Utsunomiya, first-class *yen* 2, second-class *yen* 1.32, third-class *yen* 66; to Koriyama *yen* 4.10, *yen* 2.74, *yen* 1.37; to Fukushima *yen* 5, *yen* 3.32, *yen* 1.66; to Sendai *yen* 6.45, *yen* 4.30, *yen* 2.15; to Shiohama *yen* 6.75, *yen* 4.50, *yen* 2.25.

SHINJIKU-HACHIOJI RAILWAY.

TRAINS LEAVE SHINJIKU, TOKYO, (down) at 6.55 and 9.55 a.m. and 12.52, 4, and 7 p.m.; and HACHIOJI (up) at 5.25, 8.25, and 11.25 a.m. and 2.20 and 5.30 p.m.

FARES—First-class *sen* 50; second-class *sen* 60; third-class *sen* 30.

UTSUNOMIYA-MAEBAI RAILWAY.

TRAINS LEAVE UTSUNOMIYA (down) at 5.25 and 10.05 a.m., and 12.25* and 3.05 p.m.; and MAEBAI (up) at 7.38 a.m., and 12.13, 2.43, and 5.13* p.m.

FARES—First-class, *sen* 65; second-class, *sen* 42; third-class, *sen* 21.

* Through Trains to and from Utsunomiya.

OYAMA-MITO RAILWAY.

TRAINS LEAVE OYAMA (down) at 6.35 and 9.25 a.m., and 2.25 and 5.35 p.m.; and MITO (up) at 6.20 and 10.10 a.m., and 2.10 and 5.10 p.m.

FARES—First-class, *yen* 1.26; second-class, *sen* 84; third-class, *sen* 42.

TOKYO-MAEBASHI RAILWAY.

TRAINS LEAVE TOKYO (Ueno) (down) at 6.40, 8.50, and 11.30 a.m., and 2.40 and 5.40 p.m.; and MAEBASHI (up) at 6.55, and 11.50 a.m., and 2.50 and 5.50 p.m.

YOKOSUKA STEAMERS.

STEAMERS LEAVE THE NIPPON HATOBA daily at 7.55 and 10.30 a.m., and 1.45 and 4.00 p.m.; and LEAVE YOKOSUKA at 7.10 and 10.30 a.m., and 1.30, and 4.00 p.m.—*Fare*, *sen* 20.

LATEST SHIPPING.

ARRIVALS.

Telamon, British steamer, 1,557, R. N. Jackson, 23rd June.—Shanghai 18th June, General.—Butterfield & Swire.

PASSENGERS.

ARRIVED.

Per Japanese steamer *Yokohama Maru*, from Shanghai and ports:—Dr. and Mrs. Nevins, Mrs. H. Kimball and infant, Miss Bainbridge, Dr. W. Favils, General and Mrs. Nishi and 2 children, Mr. and Mrs. Ishiguro and child, Mr. and Mrs. Isahai, Messrs. H. K. Bather, H. Gün, Takeuchi, and A. S. Amann in cabin; Messrs. Neumeyer and Stoltzenberg in second class, and 118 passengers in steerage.

Per French steamer *Oxus*, from Hongkong via Shanghai and Kobe:—Messrs. Keizo Nosaki, Iwano, S. Takaki, Ruisi, Keizo Koga, Pertile, L. Andersen, R. W. Mostad, F. E. Theodor, W. Saunders, Mrs. Endor Davies and amiah, Mr. and Mrs. Mageroni, Mr. Bernard Espinasse, Mr. and Mrs. Moong Tam, Mr. Meudehowitz, Mr. M. Y. Trocky, Captain Browne, Mr. and Mrs. Giro, Messrs. Péro Lemaneier, Beauvais and servant, and Mr. Pigott and infant in cabin.

Per British steamer *Bellerophon*, from Singapore:—Mr. Roach in cabin.

Per British steamer *China*, from Hongkong:—Mr. Coward, Mr. Cumine, Mrs. Sinclair, and Lieutenant Lee in cabin. From Kobe: Captain A. H. Morse in cabin. For San Francisco: Messrs. Rolfe, Berg, Holley, Sickalorse, Miss Lewis, Mr. R. E. Withers, Mr. A. A. de Mello, Dr. Rigby, Rev. E. S. N. Gramsha, Rev. A. C. B. Periva, and Miss Niles, M.D. in cabin.

Per British steamer *Batavia*, from Hongkong via Shanghai:—For Vancouver: Mr. T. F. Pettus, Miss M. Pettus, Messrs. J. S. Bailey, H. H. Bailey, and J. R. Rich in cabin; 125 Chinese in steerage.

Per Japanese steamer *Saikio Maru*, from Shanghai and ports:—Mrs. Roberts, Surgeon G. H. Foott, R.N., Messrs. F. H. Mowatt, D. Munn, Mrs. Gardiner, Miss Milton, Lieutenant and Mrs. Reamey, Mrs. Belknap, General and Mrs. Yamagi and child, Admiral and Mrs. Akamatsu and child, Rev. and Mrs. Spencer and child, Rev. and Mrs. Fulkerson and 2 infants, Messrs. Johnson, Davidson, Miss Forbes, Miss Taylor, Mr. and Mrs. Woodhull and child, Mr. M. B. Martin, Mr. Shida, Mr. and Mrs. Harada, Rev. and Mrs. Bassett, Messrs. Limon, and Nevill in cabin; 2 Japanese, Mrs. M. Tokuda, Mrs. K. Tokuda and child, Miss Sogami, Messrs. Yoshiyama, and Oyeda in second class, and 79 passengers in steerage. For San Francisco: Rev. and Mrs. C. F. Reid, 3 children, and infant, Rev. and Mrs. J. N. Hayes, 3 children, and infant, and Mr. Boyd Bredon in cabin.

Per Japanese steamer *Nagato Maru*, from Hakodate:—Messrs. Dunn, Milne, Kumayo, T. Unchi, K. Ono, J. Otsuka, K. Sano, T. Honda, Miss Tsuji, and Mrs. T. Inakawa in cabin; and 24 passengers in steerage.

DEPARTED.

Per British steamer *Gaelic*, for San Francisco:—Major and Mrs. Brownrigg and maid, Mr. E. R. Hutchinson, Count A. Butler, Mr. A. Grappe, Mr. and Mrs. R. M. Jameson, Mr. and Mrs. J. Herbert, Miss Allen, Mr. and Mrs. V. A. C. Hawkins and infant, Mrs. C. J. Dudgeon and child, Mr. and Mrs. F. C. Bishop, Messrs. J. M. Ringer, W. R. Eastlack, Robert Kelley, H. J. Gifford, J. J. Wright, E. J. Humphrey, A. P. Blake, Misses Hickson, Smees, Bates, and Farrer, Messrs. Tong Sing Kow, Wong Leong, Tom Kin Chor, G. W. Dauce, Mrs. Large, infant and servant, Mr. E. T. Mason, Mr. W. Newbigging, Mr. and Mrs. S. J. Anthony, Mr. E. A. Armstrong, Mr. T. J. B. Worthington, Rev. and Mrs. F. M. Price and 2 children, Messrs. Scott Elliot, D. B. Paige, F. Bornemann, C. N. Choolingen, F. E. K. Widdelbin, H. Palmer and Japanese servant, W. Wolstencroft, T. H. Bradley, J. D. Keley, Mr. Chas. Dunne, Mr. B. C. Howard, child and Japanese nurse, Mr. T. Shidechi, and Mr. and Mrs. Chas. Lemox in cabin.

Per Japanese steamer *Kobe Maru*, for Shanghai and ports:—Mrs. Bayne, Mrs. McKim, Mrs. Paxton, Commodore Church, Rev. L. P. Crawford, Messrs. Akagi, Y. Miki, G. W. Whittier, A. Fukaya, Alex. Clark, Sasaki, and A. Grundy in cabin; Messrs. Matsuda, Hamaguchi, Ito, Shimachi, Tanaka, and Shibuya in second class, and 117 passengers in steerage.

Per British steamer *Verona*, for Hongkong via ports:—Captain and Mrs. Glubb, Mr. R. Combe, Lady Constance Combe, Captain Freckleton, Mr. and Mrs. Klebinkowski and servant, Mrs. Mitchell-Innes, Miss Johnstone, Miss Piercey, Mr. and Mrs. J. M. Forbes, Captains Reynolds and Macdonogh, Messrs. Crawley, Liebert, N. G. Jeaffreson, G. A. Leon, G. Lush, Sassoon and servant, J. M. Beck, R. Wilson, C. Wilson, Lapraik, Salmond, J. R. McFarlane, and T. Miyeno in cabin; 3 Chinese in steerage.

Per Japanese steamer *Yokohama Maru*, for Shanghai and ports:—Mrs. Delafield, Miss Eldridge, Miss Delafield, Mrs. Delafield's maid, Rev. F. W. Demaree, Mr. Delafield, Rev. J. C. Newton, Messrs. Paul Jaluzot, Nakahama, and C. Tooley in cabin; Mr. and Mrs. Nakada and Mr. John Harris in second class, and 121 passengers in steerage.

CARGOES.

Per British steamer *Gaelic*, for San Francisco:—

	SAN FRANCISCO.	NEW YORK.	OTHER CITIES.	TOTAL.
Shanghai	735	1,138	792	2,665
Hyogo	300	1,499	6,604	8,403

Hongkong	43	—	—	43
Amoy	74	7,832	431	8,337
Total	7,130	13,198	19,336	39,664

	SAN FRANCISCO.	NEW YORK.	OTHER CITIES.	TOTAL.
Hongkong	—	256	—	256
Yokohama	—	205	—	205
Total	—	461	—	461

Per British steamer *Verona*, for Hongkong via ports:—Silk for France 247 bales.

REPORTS.

The Japanese steamer *Yokohama Maru*, Captain Swain, reports:—Left Shanghai the 20th June at 1 p.m.; had moderate winds with fog and rain. Arrived at Nagasaki the 22nd at 5.30 a.m. and left the 23rd at 5 p.m. Arrived at Shimonoeki the 23th at 6.30 a.m. and left at 8 a.m.; had fine weather throughout the passage. Arrived at Kobe the 25th at 6.20 a.m. and left the 26th at noon; had moderate S.W. winds with fine weather throughout; passed ship *Austriana* off Rock Island. Arrived at Yokohama the 27th June at 5.10 p.m.

The British steamer *China*, Captain Seabury, reports:—Left Hongkong the 26th June at 2.28 p.m.; had fresh N.E. winds to middle Eastern Sea; thence light S.W. wind to Cape Ise and strong N.E. winds to port. June 27th at 7.40 a.m. off The Brothers, spoke ships *Lucille* of Freeport and *Charlotte Cram* of Glasgow for Nagasaki, all well and wishing to be reported. At 6 p.m. on the 29th, 357 miles from Kobe passed a large ship evidently steering for Kobe. Left Kobe the 2nd July at 7.55 p.m.; had heavy rain and thick fogs to Rock Island; thence to port occasional fog. Arrived at Yokohama the 3rd July at 8.07 p.m.

The British steamer *Batavia*, Captain Williams, reports:—Left Hongkong the 26th June and Shanghai the 30th June; experienced light westerly winds and fine weather to coast of Japan; thence overcast and squally.

The Japanese steamer *Saikio Maru*, Captain Conner, reports:—Left Shanghai the 28th June at 6.40 a.m.; had heavy fog throughout the passage. Arrived at Nagasaki the 29th at 10 p.m. and left the 30th at 5.15 p.m.; had moderate N.E. winds and squalls. Arrived at Shimonoeki the 1st July at 5.10 a.m. and left at 6.30 a.m.; had strong breeze from N.E. throughout the passage. Arrived at Kobe the 2nd at 4 a.m. and left the 3rd at noon; had moderate S.W. winds and haze weather throughout the passage. Arrived at Yokohama the 4th July at 3 p.m.

LATEST COMMERCIAL.

IMPORTS.

A pleasant change came over the Yarn market during the week in the form of a demand for English Yarns, and during the few days it lasted a considerable amount of business was done; 28 5/2's gained 12 1/2 to 25 cents per picul for spinnings in request, but 16 1/2's experienced little change, except that prices are firmer. There is no change to report in the position of Bombays. Shirtings have also had a large amount of attention, and prices for good and best makes are 5 cents higher, lower grades about 2 1/2 cents. Holders are very firm at the close. Sales for the week amount to 1,400 bales English Spinings, 200 bales Bombays, and about 40,000 pieces Shirtings and T. Cloths.

COTTON PIECE GOODS.

Wire Nails, assorted	4.00 to 4.75
Tin Plates, per box	4.80 to 5.10
Pig Iron, No. 3	1.40 to 1.50

KEROSENE.

Market weak at quotations, and buyers appear disinclined to operate unless at some considerable reduction, say 5 cents per case or thereabouts. The few thousand cases Comet oil which came per *Hampshire* are reported sold *ex hatoba* at \$1.76. This ship *Austriana* brought 57,000 cases of the same oil, which is not yet sold, and in spite of fair deliveries the stock has increased to 520,000 cases of all kinds.

QUOTATIONS.

Chester	Nom. \$1.77½ to 1.80
Comet	Nom. 1.75 to 1.77½
Devco	Nom. 1.72½ to 1.75
Russian	Nom. 1.70 to 1.72½

SUGAR.

With a firm market all round but few sales have taken place, which include 1,000 piculs at \$1.20 per picul, and 4,500 piculs at \$1.35, all of Takao brands. In other kinds, nothing doing.

White Refined	\$5.90 to 8.60
Manila	3.70 to 4.50
Taiwanfoo	to 4.50
Pentama	2.85 to 2.90
Namida	2.80 to 2.85
Cake	to 3.70
Brown Takao	4.20 to 4.35

EXPORTS.

RAW SILK.

Our last issue was of the 27th ultimo; from that date until the 30th settlements were 188 piculs, divided thus:—Hanks 16 piculs, *Filatures* 77 piculs, *Re-reels* 95 piculs, both old and new silk included. Total settlements for the season just closed may therefore be figured at 36,400 piculs. Our statistics given below refer only to the old season.

Since the 1st instant settlements are about 100 piculs *Filatures* and *Re-reels*, which will appear in the statistics we give in our next.

The upward movement continued until holders were asking fully \$100 above opening rates. Some buyers tried to keep up in the race, but had finally to pause for breath. Seeing this holders weakened a little and last night came down in their pretensions about 5 per cent. On this basis buying

re-commenced this morning. We do not think the market strong, however, at present quotations, and believe in a further decline, although we do not expect to see prices recede again immediately to those current a fortnight ago.

Further and reliable telegrams from Milan report the Italian crop a good average with no prospect of less silk than last year—probably more. It seems impossible that there can be any real shortage in China or Japan, and we see no reason for inflated values. Market news from abroad is none too good, and reellers here will be woefully misguided if they are led to buy Cocoons at high prices on account of the recent flash in the pan here.

The only shipping opportunity during the interval has been the English mail-steamer *Verona*, which left port on the 28th ult. carrying 247 bales for Lyons, Milan and London. Total export for the season is thereby brought up to 35,967 piculs against 41,665 last year and 39,692 at 30th June, 1888.

Hanks.—Nothing done since the 27th, when *Takasaki* were purchased at \$555, with *Hachioji* at \$525. Holders have since demanded an advance of about 5 per cent. on these figures but without being able to make sales, and would now probably be inclined to listen to something like the rates of a week ago.

Filatures.—On the 30th June top figures were scored, New *Mino* fine size being done in small quantity at \$755 and \$735 according to grade. Ordinary good 1½ *Shinshu* *Filatures* from *Koshu* Cocoons brought \$720, while the owners of some parcels true *Kofu* Silk either withdrew their parcels altogether or asked quite prohibitive rates. They would now sell at the figures in our quotation list, and would perhaps listen to an offer slightly below those prices.

Re-reels.—These were also rapidly rushed up, and \$685 was fully paid for 1½ *Foshu* like *Shorusha* chop, while a few boxes *Bushu* *Kodama* were actually taken into godown at \$700. This was the top notch, and to-day *Shorusha* have been done at \$675 with *Kiito* *Shokai* at \$682½. We look for some further decline unless unexpected good news should arrive from consumers.

Kakeda and all *Oshu* sorts are at present a dead letter, no silk having so far arrived from those provinces and districts.

Export Raw Silk Tables to 30th June, 1890:—

SHRIMP	1889-90.	1888-89.	1887-88.
Europe	15,128	21,343	17,904
America	20,377	19,920	20,564
Total	35,505	41,263	38,468
	35,967	41,665	39,692
Settlements and Direct	30,400	41,400	40,400
Export from 1st July	2,000	700	3,050
Stock, 30th June	38,400	42,100	43,450

WASTE SILK.

From the 27th to 30th June inclusive sales in this market of Old Waste reached 365 piculs, viz:—34 *Noshi* and 331 *Kibiso*. Nothing done in new staple. The season closed with total settlements of 29,600 piculs for the twelve months, leaving a stock in hand to be carried over to the new season of 4,500 piculs.

The transactions noted in our last for Low Curries was carried through at \$13, and although there are now a few parcels new Waste on offer,

so far no business has been put through. The parcels received are principally *Foshu* *Noshi* of ordinary grade, quality being equal to usual first arrivals.

The English mail steamer of the 28th carried on Waste. Export to the close of the season therefore stands at last week's figures, say 29,752 piculs against 31,731 last year and 28,785 at the 30th of June, 1888. So far this month there has been no export.

Noshi.—A few small purchases of *Foshu* *Noshi* at \$70 with *Yonezawa* *tegara* at \$103. Some new *Foshu* is being shown round the trade, but so far without any sale resulting.

Kibiso.—The settlements which were pending at the date of our last report have been completed on the basis of \$13 for *Hachioji* Low Curries. Nothing further has been done, and no new fibre has come in from the interior of any moment.

Mawata.—A sample bale or two of old stock has been taken into godown at \$135, and may possibly lead to business later on.

CONTRACTORS TO THE ADMIRALTY, LEADING STEAMSHIP COMPANIES, AND YACHT OWNERS.

STEAM LAUNCHES & YACHTS,

Fitted with KINGDON'S PATENT MACHINERY (of which we are sole makers) are far superior to any others. The chief advantages are:—

1. Wonderful Economy of Fuel.
2. First-class Workmanship.
3. Moderate Prices.
4. Greatest obtainable power for weight and space occupied.
5. Quickness in raising steam.
6. High rates of speed guaranteed.
7. Absence of noise and vibration.

We build Steam Launches of every description, from the smallest size suitable for carrying on yachts of 10 tons and upwards. We also build small light Draft Paddle Boats, Tugs, Stern Wheel Paddle Steamers, and Boats in Frames, &c., &c. We supply sets of Machinery separately. Illustrated Catalogue in English, French or Spanish. Send for Copy to

SIMPSON, STRICKLAND & CO.

WORKS:
DARTMOUTH, SOUTH DEVON (ENGLAND).

LONDON OFFICE:
181, QUEEN VICTORIA STREET, E.C.

MACHINERY.—Mr. ARTHUR WADHAM, proprietor of *The Machinery Market and Exporter* (illustrated)—the greatest machinery business journal published—(subscription 12s. 6d. per annum post free); London Agent of Messrs. Simpson, Strickland & Co., steam-launch builders, is also a large exporter of Machinery and Engineering Materials. Mr. Wadham is open to act as sole Buying Agent in England for one or two good firms in Japan desiring to deal with a reliable house. Mr. Wadham's intimate knowledge of the English Machinery and Engineering Trades enables him to save large sums to foreign customers placing their orders in his hands. Firms dealing with Mr. Wadham may rely upon being served in a prompt and straightforward manner. Address:—Mr. Arthur Wadham, Engineering Offices:—181, Queen Victoria St., London. Registered address for telegrams—"Wadham, London." June 28, 1890.

THE GREATEST WONDER OF MODERN TIMES. HOLLOWAY'S PILLS.

PERSONS suffering from weak or debilitated constitutions will discover that by the use of this wonderful medicine there is "Health for all." The blood is the fountain of life, and its purity can be maintained by the use of these Pills.

Sir Samuel Baker, in his work entitled "The Nile Tributaries in Abyssinia," says—"I ordered the druggist Mahomet to inform the Fakir that I was a Doctor, and I had the best medicines at the service of the sick, with advice gratis. In a short time I had many applicants, to whom I served out a quantity of Holloway's Pills. These are most useful to an explorer, as, possessing unmistakable purgative properties, they create an undeniable effect upon the patient, which satisfies them of their value."

SIMPLE, SAFE, AND CERTAIN!

HOLLOWAY'S OINTMENT

Is a certain remedy for bad legs, bad breasts, and ulcerations of all kinds. It acts miraculously in healing ulcerations, curing skin diseases, and in arresting and subduing all inflammations.

Mr. J. T. Cooper, in his account of his extraordinary travels in China, published in 1871, says—"I had with me a quantity of Holloway's Ointment. I gave some to the people, and nothing could exceed their gratitude; and, in consequence, milk, fowls, butter, and horse feed poured in upon us, until at last a teaspoonful of Ointment was worth a fowl and any quantity of peas, and the demand became so great that I was obliged to lock up the small remaining 'stock.'"

Sold by all Chemists and Medicine Vendors the throughout World. May 1st, 1889

KEATING'S INSECT POWDER.

BUGS, FLEAS, MOTHS, BEETLES, and all other Insects are destroyed by KEATING'S Insect Powder, which is quite harmless to Domestic Animals. In exterminating fleas the success of this Powder is extraordinary, and no one need be troubled by these pests. It is perfectly clean in application. Ask for and take no other than "KEATING'S POWDER," as imitations are noxious, and fail in giving satisfaction. Sold by all Chemists, in Tins and Bottles. May 3, 1890.

NOW READY,

WITH COLOURED PLAK,
A FULL REPORT on the ERUPTION of BANDAI-SAN, being a reprint from the "JAPAN MAIL" of copious translations from Tokyo Journals, a Description by "Our Reporter," and an "Editorial," written after a visit to the locality. Price 50 Cents.

To be obtained at the Japan Mail Office, or of KELLY & WALSH, Limited.

YOKOHAMA: SATURDAY, JULY 12, 1890.

MARRIAGE.

On the 5th July, at Christ Church, Yokohama, by the Rev. E. Champneys Irwin, M.A., FREDERICK WILLIAM, second son of the late Thomas James Hill, Purser, P. & O. S. N. Co., to MARGARET DUNCAN, youngest daughter of the late Robert Wigram MacLewen, formerly Manager of the (Old) Oriental Bank Corporation, Colombo.

SUMMARY OF NEWS.

HIS IMPERIAL MAJESTY THE EMPEROR presided yesterday at the distribution of prizes at the Exhibition.

THE elections throughout the country have been concluded and passed off without any disturbance worth noting.

MR. WATANABE, recently appointed Japanese Minister to Austria, will leave Japan about the end of August for his post.

It is stated that Count Oki, President of the Privy Council, will be nominated by the Emperor President of the House of Peers.

MR. KADA, a Judge of the Court of Cassation, who had been in Europe and America for some time, returned home on the 5th instant.

H.I.H. PRINCE HARU will leave Tokyo about the beginning of August for Shimidzu, Shidzuoka Prefecture, where His Highness will stay for four weeks.

ON the morning of the 28th ultimo twenty houses, three godowns, and one temple were burned to the ground at Sakaimura, Nanjo, Fukui Prefecture.

AN epidemic of cholera has broken out at Nagasaki, the death-rate at present being over 50 per cent. Measures have been taken to prevent its spread to other ports.

THE number of visitors to the Botanical Garden of the Imperial University during the

month of June last was 1,471, of whom 4 were foreigners, and 398 special visitors.

COUNT ITO proceeded to the Imperial Palace on the 4th instant to pay his respects to the Emperor.

MR. SUZUKI, Consul at Hongkong, was relieved from his duties on the 7th instant, at his own request.

ON the night of the 3rd instant a thief entered the house of Viscount Sugi at Hirakawacho Gochome, Kojimachi, and stole a sum of yen 22 and a number of articles valued at yen 398.

A SHOCK of earthquake was experienced in Tokyo on the 8th instant at 2h. 50m. 30s. p.m. The duration was 20 seconds, the maximum horizontal motion being 0.3 millimetre in 0.9 second.

MR. NAKANO, Prefect of Nagasaki, issued a notification on the 1st instant to the effect that in consequence of the prevalence of cholera, theatres and other places of public resort must be closed.

ON the morning of the 3rd instant a thief armed with a sword entered the house of Lieutenant Imadzu, I.J.N., at Kanaguchicho, Shitaya, and stole a sum of yen 15.50 and several articles.

A NOTIFICATION has been issued by Viscount Tanaka, Chief of the Metropolitan Police, to all chiefs of police in Tokyo, to the effect that the *Takuhatsu* (mendicancy) of Buddhist priests must be stopped.

A SPECIAL meeting of the Cabinet was held on the 7th instant at which Counts Yamagata, Saigo, Yamada, and Matsukata, Viscounts Aoki and Kabayama, and Messrs. Mutsu and Yoshikawa were present.

MR. SAGARA, of the Tokyo Stock Exchange, who recently returned to Japan from Europe, had a long interview with Count Matsukata in the Finance Department on the 8th instant regarding foreign bourses.

VISCOUNT TANAKA, Chief of the Metropolitan Police, had a long interview with Marquis Hachisuka in the Tokyo City Government Office on the 7th instant regarding measures for preventing the spread of cholera.

FIRE broke out early in the morning of the 3rd instant in a house at Idzumicho, Kanda, and seven dwellings and one godown were destroyed, two houses being partially burned before the flames could be extinguished.

MR. KIYOURA, Chief Commissioner of the Police Bureau in the Home Department, and Mr. Kurokawa, Chief of the Law Bureau in the Foreign Department, were raised to second class of *chokunin* rank, on the 7th instant.

MR. WATANABE, Vice-Minister for Finance, Mr. Hamao, Director of the Bureau of Special Affairs in the Educational Department, and Mr. Arishima, Superintendent of the Customs Bureau in the Finance Department, were raised to second class of *chokunin* rank on the 3rd inst.

FIRE occurred on the night of the 28th ultimo in a house at Oiawamura, Iwai, Tottori Prefecture, and destroyed fourteen houses. Early in the morning of the 29th inst. fifteen dwellings were burned to the ground by fire at Oyodamura, Yoshino, Nara Prefecture.

At a special meeting of the Central Sanitary Association held in the Home Department on

the 4th instant, it was decided that Nagasaki being a district infected by cholera, vessels coming from or having called at that port should undergo examination at disinfecting stations.

FIRE occurred on the morning of the 28th ult. in a house at Aitachimura, Korikami, Gifu Prefecture, and destroyed twelve houses. Early in the morning of the 29th ultimo thirty dwellings and four telegraph posts were destroyed by a fire at Yunoto, Ashigara, Kanagawa Prefecture.

COUNT SAIGO, Mr. Kiyoura, Chief Commissioner of the Police Bureau, and several officials of the Sanitary Bureau in the Home Department held a meeting on the 5th instant, for the purpose of discussing measures for preventing the extension of cholera, which now prevails in Nagasaki.

THE funeral of the father of Viscount Hijikata took place on the 5th instant in the capital, the ceremony being attended by Ministers of State, Count Ito, Viscounts Tani and Enomoto, and over a thousand persons. The interment took place at the Sonci Cemetery, the ceremony being conducted in accordance with Shinto rites.

A NOTIFICATION was issued by the Minister of State for Home Affairs on the 7th instant to the effect that there being signs of cholera spreading in Nagasaki and suburbs, vessels coming from or having called at that port shall undergo examination at the disinfecting stations for Shimomoseki, Kobe, Yokohama, and Hakodate.

MR. SAITO, Director of the Commercial and Industrial Bureau in the Agricultural and Commercial Department, and Mr. Suyematsu, Chief Commissioner of the Bureau for the Management of Prefectures in the Home Department were raised to second class of *chokunin* rank on the 7th instant.

A MEETING of shareholders of the Osaka Stock Exchange was held on the 6th instant. The receipts during the past half year were yen 46,967.70, of which yen 14,333.909 was set apart for business tax and miscellaneous expenses, yen 3,200.60 as rewards to officers, and yen 11,000 as a reserve fund, yen 18,000 being appropriated as a dividend at the rate of 36 per cent. per share for annum, and the remainder carried forward to the next account.

A MEETING of shareholders of the Tokyo Stock Exchange was held on the 7th instant. The net profits during the past half year were yen 75,829.291 to which yen 253.012 brought over from last account were added, making a total of yen 76,082.303. Of this amount, after adding a sum to the reserve fund the usual amount as rewards to officers and miscellaneous expenses, yen 56,000 was appropriated as a dividend, yen 82.303 being carried forward to the next account.

THE market for English Yarns has been fairly active, and Bombays have been in request at an advance. Shirtings have also met a moderate enquiry during the week, but the demand has toned down at the close. No change to report in the Metal market, and nothing is doing in Kerosene. Sugar is dull. There has not been much done in Silk in the total, though a small daily business has to be recorded, and prices will probably see a fall before any very extensive transactions take place. There has been a steady demand for Tea, and some of the grades of second crop now show an improvement in the cup. Values are about the same. Exchange has made several upward movements, and rates are considered strong.

EDITORIAL NOTES.

■ MONEY SCARC?

In a series of articles recently published, the *Tokyo Economist* (*Keizai Zasshi*) takes pains to explain that not scarcity of money, as is commonly supposed, but want of credit has been chiefly instrumental in bringing about the present depression of trade in Japan. A notion that the existing state of affairs is due to insufficiency of money seems to prevail in financial and business circles. Witness, for example, recent public utterances of Count Matsugata and Viscount Aoki, both of whom maintain that the volume of money now in circulation is inadequate to meet the increasing requirements of domestic and foreign trade, and consequently that the only exit from the present financial difficulties is to be found in putting more money into circulation. The *Economist* declares that those who endorse the contention of these two statesmen evidently suffer from a strange confusion between money and capital. Our contemporary cites the case of England, whose foreign trade reaches over 4,000,000,000 *yen* annually, whereas the total amount of her money in circulation (including paper, gold, and silver) does not exceed 370,000,000 *yen* in all. Is it not apparent, continues the *Tokyo* journal, that the greater part of England's foreign trade, as well as of her domestic business, is carried on without ever having recourse to the common media of exchange? It may hence be inferred that the volume of a country's currency need not necessarily be increased in proportion to the increasing magnitude of its commercial transactions. Credit supplies the place of money and serves as well as it. Further, even granting the common opinion that an increase of currency is absolutely demanded by an increase in the bulk of the country's trade, it does not necessarily follow that financial measures to swell the volume of circulating media should be carried out at a time when trade is in a languid state. The *Tokyo Economist* fears that the increase of paper money will result in disturbing the balance between that medium of exchange and commodities, and serious consequences may ensue owing to a sudden demand for the redemption of the notes. At a time when credit is shaken, and the financial world is on the verge of a panic, our contemporary considers it an extremely unwise policy to attempt by artificial expedients to control the course of events. The cause of the trouble being, not scarcity of money but want of credit, the *Keizai Zasshi* condemns any increase of the currency, and urges that the only salvation which is possible at present consists in men of business endeavouring to establish a system of credit.

We confess that these expressions of opinion perplex us in some respects. There is not the smallest doubt that the comparative slowness of industrial and commercial development in Japan is due to the want of a proper system of credit. The *Keizai Zasshi* does wisely in urging that fact upon public attention. But if, as is well known, one of the principal effects of an established system of credit is to dispense with the need of bank notes and metallic media of exchange, then it follows conversely that, in the absence of such a system, the demand for circulating media may grow with the growth of business. Besides, we do not understand that by empowering the Bank of Japan to increase its paper issues to the extent of fifteen million *yen*, the Government expects to give any special impetus to trade. The idea, as explained at the time, is rather, in the first place, to mitigate the inconvenient effects evidently entailed by the over rapid process of fixing floating capital during recent years; and in the second, to guarantee sound enterprises against suffering in common with unsound during a panic. It is beyond question, and has been pointed out by the *Keizai Zasshi* itself, that the eagerness of the public to form companies and start enterprises since 1887, supplemented by the issue of several large domestic loans, has produced an inconvenient tightness in the money market, to

relieve which it is desirable that the Bank of Japan should be in a position to free some of the locked up capital by issuing notes on the security of shares and other trustworthy paper. By conferring this power on the Bank another useful end also is attained, since a limit is fixed below which the shares of sound enterprises cannot fall in a season of panic. Such objects seem to us sufficient reasons for the Government's action, without attributing to Count Matsukata the long exploded doctrine that the vitality of trade varies directly with the volume of money available for carrying it on.

LOCAL CUSTOMS AND IMPERIAL LEGISLATION IN THE BRITISH EMPIRE.

THERE has occurred in Hongkong a curious example of the conflicts that sometimes arise between the spirit of British legislation and the customs of the numerous races that inhabit the British empire. Acting under direct instructions from home, the Attorney-General laid before the Hongkong Legislative Council a Bill, drafted in London, for the better protection of women and girls. The Bill, as originally drawn, fixed the age of consent for girls at 16, without any saving clause of any kind; but the Attorney-General in Hongkong, having regard to the fact that Chinese girls develop more quickly than English, and are treated as women at an earlier age, added a proviso that a charge laid against a man under the act would be satisfactorily defended by proof that he had believed the girl to be over 16, and further that no prosecution could be commenced for an offence of this kind if more than three months had elapsed since its commission. But when the Bill was submitted to the Legislative Council two difficulties were at once raised. The first had reference to the manner of counting age. It is well known that in China and Japan a child becomes two years old on the 1st of January following its birth. The most extreme example of this method of reckoning is that of a child which comes into the world at fifty-nine minutes past eleven on the 31st of December, and is said to be two years old at one minute past twelve the same night, though in reality it has only been in existence for two minutes. Such cases may be rare, but it is plain that, in almost every instance, a girl would arrive at the age of sixteen several months sooner by the Chinese than by the European fashion of counting. Which style then did the Bill contemplate? English of course, it will be replied, seeing that its drafters were English, and that it was intended to go into operation in an English colony. But, on the other hand, the vast majority of the inhabitants of the colony are Chinese, who know only one method of reckoning age. Was it intended that they should adopt a new method for the purposes of the Bill? Then again, Chinese in Hongkong and everywhere else are in the habit of keeping concubines under the age of sixteen, in addition to their wives. Were these persons to be considered law-breakers? The Bill made an exception in respect of girls legally given in marriage, but could the so-called "second," "third," or "fourth" wife of a Chinaman be regarded as a lawful spouse? These questions remain to be answered. It has always been the habit of the British Government to respect, as far as possible, the customs and traditions of the races under British sway, but the framers of the Bill for the protection of women and girls in Hongkong seem to have forgotten altogether that they were legislating for Chinese.

CHINESE CUSTOMS REPORTS.

No. 11 of the Special Series of the Chinese Imperial Maritime Customs Reports contains a number of medical records for the half year ended 31st March, 1888. The compilers of the volume are all medical practitioners of the highest standing and their contributions are, without exception, very interesting. Dr. Jamieson of Shanghai writes in a lucid and comprehensive manner on the subject of cholera, his immediate purpose being to discuss how far bacteriology is likely to assist the treatment of the terrible disease. He arrives at the conclu-

sion that the researches of Koch and others do not as yet, and are not apparently likely to, contribute anything of importance to the treatment of the disease, though their prophylactic value may be considerable. From Dr. Jamieson's writing we judge that means are still unavailable to determine how far the ravages of cholera extend among the Chinese. All native statements and statistics are treated by him as quite untrustworthy, but he nevertheless writes:—"There cannot be any doubt that the local mortality from cholera every year is extremely heavy." The Chinese have many specifics for the malady, as, for example, scraping the skin of the neck, applying moxa to the chest and limbs, acupuncture, and so forth, all these nostrums being equally inefficacious. Their medical practitioners nevertheless recognise the two forms of cholera—that which kills by immediate collapse without any natural effort to evacuate the poison, and that which is accompanied by purging and vomiting—and they also distinguish between cholera and heat apoplexy. Perhaps, after all, though their scientific knowledge is comparatively small, their practice is not much more unsuccessful than that of their foreign confreres. Dr. Jamieson is most emphatic in his declarations that cleanliness, and cleanliness only, is the way to disinfect successfully. He quotes with strong approval the following recent dictum of the medical director of the United States Navy:—"Where there are fresh air and dryness and cleanliness there can be no cholera; and where there are not it will come in spite of proclamations and perfunctory quarantines. Fumigations and disinfections which mask putrescence and substitute medicinal smells for sickening stenches are as ridiculous as the noise of gongs and tom-toms and exploding fire-crackers and gongs, by which the Chinaman hopes to frighten the devils who desolate his home and country, and worse than useless from the false sense of security which they give."

A considerable part of this volume is taken up with reports of cases of sun-stroke, the whole of one chapter being devoted to this subject. Here we find, for the first time, the term "heat-stroke" substituted for "sun-stroke," the reason assigned being that the phenomena of ardent fever frequently present themselves at night and when there has been no exposure to the direct rays of the sun. The partiality evinced by attacks due to caloric influences has often been noticed, and is discussed by the writer of the essay before us—Dr. Jamieson, presumably. But we are still left in the region of conjecture; still left to guess why it is that out of a number of soldiers on the march, all exposed to exactly the same conditions externally, only a few are attacked by heat-stroke in any form. Thus, when the 98th Regiment arrived at the scene of war in China in 1842, the men were paraded for action the next day (20th July) dressed exactly as they would have been at a review in London. On landing, they had to scale a steep but not high hill, and before the summit was crowned fifteen of the men died on the spot—"gave a few convulsive gasps and expired before any thing could be done for their relief," as Maclean describes it—while the rest escaped almost unscathed. Evidently there are great variations in the degree of people's susceptibility. Dr. Jamieson sums up the causes of these differences thus:—"Physical or mental exhaustion; prolonged anxiety; cardiac, pulmonary, hepatic, renal, or cutaneous inadequacy; malarial cachexia; as well as the general and indefinable tissue degeneration due to intemperate habits, are the chief personal elements which determine inability to sustain high degrees of external heat. There is undoubtedly a rapid fabrication of some deadly organic poison, whether sarcolactic acid, as has been supposed, or some other, which paralyses the heat regulating centre; and it is fair to assume that where heat-stroke falls it finds the albuminoids of the tissues in a condition of abnormal molecular instability. The well-known immunity of the Chinese, who expose their shaven heads to the

fiercest heat of the sun, cannot be exclusively a gradually-developed racial peculiarity; the nature of their food, abounding far less than ours in nitrogenous constituents, must enter into the explanation."

AFTER THE POLLING.

ACCORDING to a telegram in the vernacular press, Mr. Ito Ichiro, the successful candidate for the Fifth District of Kagawa Prefecture, has been assassinated. It does not necessarily follow, of course, that politics were the cause of this crime, but certainly it will not be an extravagant inference to conclude that they were. The Japanese are still comparatively strange to the incidents that so greatly disgrace political warfare in the West, and we can understand without difficulty that if the defamation and abuse which there disgrace such contests begin to be practised here also, they may often lead to physical violence. Mr. Ito belonged to the Radical Party, which has never been distinguished in this country for the courtesy and forbearance of its junior members. But whether or not he and his friends resorted to questionable means of canvassing, the disgrace attaching to his death by violence cannot be condoned. But for this incident Japan might fairly have been congratulated on the orderly conduct of her people at a period of novel trial.

Mr. Mori Tokinosuke, the successful candidate for the Tenth District of Tokyo, was arrested on the morning of the 4th instant, and a thorough search of his premises was made by the police. The offence charged in the warrant is not publicly known, nor have the particulars of the preliminary magisterial examination transpired. It was at first supposed that Mr. Mori's offence was connected with the elections, but subsequent information showed that the charge against him was one of embezzlement.

DEATH OF MR. WILLIAM DONALD SPENCE.

THROUGHOUT China, says the *N. C. Daily News* of the 27th ult., the greatest regret will be felt at the news which reached Shanghai by wire yesterday of the death of Mr. William Donald Spence, of the British Consular Service in China, and of Messrs. Jardine, Matheson & Co. Mr. Spence joined the Consular Service in China in 1869, and his conspicuous abilities, energy and geniality made him one of the most promising of the coming men in the service, while his popularity wherever he was known was unbounded. Some three years ago he was temporarily detached from the service, and joined Messrs. Jardine, Matheson & Co. He was taken seriously ill in the North last year and went home, but had apparently entirely recovered. When the last mail left home he was talking of coming out to China again in August, but was suffering from what seemed a slight attack of fever and ague, and it is only two or three days since news was received by wire that he was seriously ill. It is gathered that he died on Wednesday. The loss to the British community in general as well as to the "great house" is very severe, for there is no position in the Consular Service to which he might not have aspired, and he leaves also to lament him an unusually large circle of personal friends.

AN OPEN LETTER TO COUNT YAMAGATA.

IN the *Kokumin-no-Tomo* of June 23rd, we find a long and interesting open letter addressed to Count Yamagata. The writer signs himself *Tetsumen-sei* ("The Iron-faced Man"), but judging from the style of his writing and the nature of his language, we are disposed to think that, despite his *nom de plume*, he is no other than Mr. Tokutomi Ichiro, the editor of the journal. At all events the letter is extremely well written. After congratulating the Minister President on his recent promotion to the high position of full General (*Tai-shō*), the writer proceeds to observe that he cannot regard the Count as a happy man. "For," says he, "your Excellency happens to be Premier at a time not at all quiet and peaceful. An apparent calm, it is true,

reigns over the political world, but it is merely the calm before a tempest? To have accepted, under such circumstances, the difficult post of Premier must be interpreted as showing, according to *Tetsumen-sei*, that Count Yamagata has courageous and disinterestedly taken a grave public responsibility upon his shoulders out of pure patriotism. "But," the writer proceeds to say, "since you have accepted so difficult a post, it must be supposed that you have some well pondered policy of your own for the conduct of State affairs. This is the point on which I most desire to enquire your opinion. You are wont to assert, if rumour may be credited, that you are not a statesman. Do you really think so, or is it modesty that induces you to depreciate yourself? For my part, I believe your Excellency to be undoubtedly a statesman of a certain type; not indeed a model statesman, for in intellectual resources you are not equal to Count Okuma; in political sagacity you are no match for Count Ito; Count Inoue surpasses you in shrewdness and audacity; you cannot excel Count Saigo in assuming an appearance of simplicity while being in reality intelligent; and neither can you compete with Count Oyama in the art of moving gracefully in society, in dancing, and in the knack of entertaining your guests at dinner. Still, your Excellency possesses some distinguished qualities of your own. You have seldom originated an idea, but whenever you are convinced that an idea propounded by other people is good, you firmly and unflinchingly adhere to it. You do not easily come to a resolute decision; some even doubt whether you are a man of resolution. But it is certain that when you once make up your mind, your will is strong enough to pierce an iron wall. Especially noteworthy is your vigorous assiduity, which knows no relaxation, and your methodical way of doing business. When all the other Ministers of State are light-hearted and fickle like butterflies, you alone preserve a soldierlike gravity and regularity in your every step. In these respects you possess some qualities necessary to a constitutional statesman." The writer then goes on to remark that, whatever may be his reputation in the Army, the people at large have confidence in His Excellency, or more correctly, the people do not distrust him; that is to say, the confidence reposed in him is of a negative, not a positive character. He is also respected by the country at large. The Cabinet over which he presides is by no means weak. In Count Matsugata, the writer recognises an administrator of no mean capacity, while Count Saigo is an intimate friend of the Premier's and is no doubt a Minister of considerable weight. As to Viscount Aoki, his wide learning may stand him in good stead in a high scholastic position. Men say that Mr. Yoshikawa, the new Minister of Education, has too much the air of a clerk; but in the play of the *Chushingura* we find Washisaka Bannai standing on the same plane with Yuranosuke and the Hangan. There is, therefore, nothing incongruous in the inclusion of Mr. Yoshikawa in Count Yamagata's Cabinet. If again, keenness of intellect and abundance of energy could make a great man, there should be no greater man than Mr. Mutsu; while Count Goto would deserve the reputation of the greatest hero that ever lived, if inconsistency and audacity were the essential elements of a heroic character. Further, in addition to his colleagues, the Minister President possesses in the ranks of the government a number of talented young men, as Messrs. Inouye Ki, Suematsu Kencho, Kiyoura Keigo, and Omori Shioichi. General Katsura, Vice-Minister of War, and Mr. Shirane, Vice-Minister of Home Affairs, are also invaluable assistants. But Count Yamagata has been particularly happy in his selection of the Metropolitan Police Inspector-General. On all hands it is admitted that Viscount Tanaka is one of the best men that have filled that difficult post. With such a formidable force under him, what course of policy does Count Yamagata intend to pursue? An ominous tunnel lies in the path of the Cabinet. The Government is about to pass through the dark

passage. In what manner will the Premier conduct the train? There are three courses open to the Count. The best would be to anticipate the wishes of the people, and leave little or nothing for their representatives to complain of in the coming Parliament. The next course would be to create a Government party out of Government circles, and with the help of that party to obtain a working majority in the Diet. The worst course would be to remain inactive within the citadel and indolently await the attack of the enemy without.

We have translated this article as an example of the kind of writing indulged in by some of the leading Japanese journals. It is evident that where the law tolerates such expressions of opinion, the process of muzzling the press cannot be said to be carried to any great extent. Indeed we have generally found—whenever it has been possible to obtain exact particulars—that where newspapers are punished for violations of the Press Regulations, their offence has been of such a character as was deemed by the Authorities distinctly calculated to pervert the public peace or to interfere with the conduct of the administration. There have, of course, been exceptions; no rule is without them. But on the whole, we greatly doubt whether the free expression of journalistic opinion in Japan is hampered so seriously as critics imagine.

THE CENTRAL SANITARY BUREAU.

A SUMMARY of four Annual Reports (1884-7) of the Central Sanitary Bureau attached to the Home Department of the Japanese Government, published in English, lies before us. The Report contains a valuable compendium of statistics on sanitary matters, and cannot but prove of great use to medical practitioners and others. It is divided into six sections as follows:—Sec. I. Births and Deaths; II. Infectious, Contagious, and other special Diseases. These include (1) Cholera; (2) Typhoid fever; (3) Dysentery; (4) Diphtheria; (5) Typhus fever; (6) Small-pox and Vaccinations; (7) Other special diseases. Sec. III. Sanitation and General Cleanliness. Sec. IV. Medical Practitioners, Apothecaries, etc. Sec. V. Analyses and Scientific Researches. Sec. VI. Miscellaneous. The birth-rates in each prefecture per 1,000 inhabitants during the four years are given. The highest rate for the whole empire was reached in 1887, being 27.07 to every 1,000 inhabitants. Among the prefectures where the rate is high, Aichi, Tochigi, Toyama, and Fukuoka stand first; while Okinawa, Miyazaki, Wakayama, and Kumamoto are noteworthy for the lowness of their rates. The fatality attendant on various diseases, arranged in the order of their intensity is as follows:—(1) Cholera, (2) Typhoid fever, (3) Dysentery, (4) Diphtheria, (5) Typhus fever, (6) Small-pox. The report contains a detailed account of the ravages of cholera during the period embraced, and records the measures taken for its suppression. It furnishes a useful summary of the extent to which, and the localities in which, other diseases have prevailed, and closes with a history of the compilation of a Japanese Pharmacopoeia, in which Drs. Geerls, Divers, Beukema, Baelz, Eykman, and a number of well known Japanese medical men took part, with an account of the work of Hygienic Laboratories and of the inauguration and opening of a Sanitary Museum.

FREDERICK LEE AGAIN.

THE *Rising Sun* and *Nagasaki Express* returns to the subject of Frederick Lee in a note from which we extract the following:—"The man Lee, whom the *Gazette* goes out of its way to champion, and to blackguard us about, is too well known here to require describing; suffice it to say that for many months, some few years ago, he was a disgrace to this Settlement, and the name of "drunken Lee" was a byword. He had many opportunities of reforming, and, to our knowledge, at least one offer of employment, but he failed to avail of either, and continued downwards from bad to worse. At length he went away, and we were glad to lose

him. He eventually brought up in Yokohama, where he carried on until the Rev. Mr. Irvine, from the best of motives, no doubt, undertook to send him back here. By a strenuous effort, (here we quote from the *Gazette*, of the 4th ult.) he manages to keep sober long enough to be sent on board ship. What occurred until his arrival here we cannot say, but we know that within a few hours of his landing, and for several days subsequently, he was intoxicated, in the public streets, in broad daylight. More than this, we are informed on good authority that he paid several visits to the house of the reverend gentleman who had been entrusted with money for him, and on each occasion was so intoxicated that the money was withheld, and in reply to his plea of poverty and starvation, food was offered him, but he refused to accept it. This, then, is a brief outline of the recent career of a man we are accused of libelling!

MORE FIGHTING IN ACHEEN.

SEVERE fighting was reported by the American papers last received between the Dutch and Chinese. This, of course, was an error, Achinese being meant. The following details appear in the *Straits Independent*:—"We gather from private sources that a very serious and decisive battle was fought at Edie between the Dutch and the Achinese on the 11th instant. The loss on the side of the latter in killed and wounded was very considerable, no less than 80 dead bodies having been found on the field after the fight was over. The Dutch experienced no loss in killed. They had, however, 23 men wounded, one of them so very severely that he is not expected to survive. Amongst the wounded were also 2 officers, viz., Lieut. Vander Hegge Spies of I.L.N.M.'s *Prins Hendrik* and Lieut. Sward of the infantry. The former received a cut across his forehead in a personal encounter with one of the enemy. All the forts that were erected by the Achinese and occupied by them, have been taken by the Dutch, and are now in their possession. After the first engagement had come to an end and everything appeared quiet, the band that was with the troops struck up the Dutch National Anthem in one of the forts that were taken, when all of a sudden fresh shots were fired by some of the Achinese who had concealed themselves in the trenches they had constructed in the immediate vicinity of the forts. The Commander of the landing contingent of the *Prins Hendrik* at once passed the order for attack, and Lieutenant Vander Hegge Spies put himself at the head of his men and advanced. A hand to hand fight then ensued and every one of the enemy that was found in the trenches was killed. While this fight was going on, one of the Achinese sprang on Lieut. Vander Hegge Spies armed with a klaywan, and aimed a blow at him which the Lieutenant parried with his sword. The gallant officer's weapon was nearly cut in two, and the force of the blow causing the sword to rebound inflicted the cut on the Lieutenant's forehead. It is admitted on all sides that Lieut. Vander Hegge Spies behaved most bravely, and that he deserves great credit for the tact and courage he displayed during the whole engagement. The Achinese who had escaped the carnage ran into the jungle, hotly pursued by the Dutch troops. It is said that the Achinese have been taught a lesson which they will remember for many a day to come. We understand that the troops will remain at Edie for some time, as it is proposed to open a military road from Edie to Deli. This will, no doubt, prove very good news for our pepper and other merchants."

QUALIFICATIONS OF STATESMEN.

THE *Kokumin-no-Tomo* is responsible for the following ironical note:—"There are five qualifications requisite for statesmen in the present day: First, to present themselves at the Senate (*Genro-in*) and visit the Ministers of State in the capacity of popular delegates, as, for instance, a committee for the presentation of a memorial or petition; secondly, to have as fine and large cards as possible and to distribute them unsparingly among people; thirdly, to be always ready to say evil things of the Government."

ment, to calumniate Ministers of State, and to talk big words; fourthly, to be convicted of a state offence and suffer imprisonment; and fifthly, to be fat and large in body, with a striking countenance and graceful manners." It is curious to find a journal like the *Kokumin-no-Shimbun* giving a prominent place in its columns to such empty persiflage as this, which does not even rise to the level of vulgar humour.

THE PRICE OF RICE.

WE epitomize a series of articles on the price of rice from the *Tokyo Economist* (*Keizai Zasshi*) as follows:—"The question, whether the present extraordinary rise in the price of rice is or is not attributable to natural causes, can only be decided by ascertaining, as far as possible, the exact proportion which the rice crop of last year and the barley yield of this spring bear to the actual needs of forty millions of our countrymen; for, although artificial contrivances may succeed for a time in disturbing the natural course of things, the relation between demand and supply must ultimately re-establish its sway. According to a report of the Department of Agriculture and Commerce published in the *Official Gazette* of June 16th, the total quantity of the rice crop throughout the country for last year was 33,007,565 *koku*. Compared with the yield of the preceding year, this shows a decrease of *koku* 5,637,904; while a comparison with the average of the three consecutive previous years gives a falling off of 5,604,496 *koku*. It is scarcely necessary to observe that this diminution was caused by destructive inundations and violent storms throughout the country. As to the barley crop of the present spring, we are not yet in possession of figures representing the actual quantity of the yield, but all information goes to confirm the estimate that the crop is less than usual by nearly 20 per cent. Supposing that the barley crop of 1888 represents a fair average yield, we have, on the basis of the above mentioned estimate, 12,426,451 *koku* for the present year's harvest. To what extent the rice crop of last fall and the barley crop of this spring are deficient to meet the demands of the consumers, it is of course, not at all easy to ascertain exactly. We may, however, obtain some idea as to the approximate quantity required annually, by glancing over the produce of rice and barley for a number of consecutive years. The following table shows the produce of rice and barley from 1878:—

Year.	Rice. <i>koku</i> .	Barley. <i>koku</i> .
1878.....	25,282,540	9,411,460
1879.....	32,418,924	9,890,908
1880.....	31,359,326	12,503,060
1881.....	29,971,383	10,507,983
1882.....	30,692,327	12,938,752
1883.....	30,671,402	11,763,846
1884.....	26,340,883	13,105,841
1885.....	34,158,169	11,935,467
1886.....	37,191,424	16,033,960
1887.....	39,999,199	15,823,144
1888.....	38,645,583	15,281,658
1889.....	33,007,566
1890.....	12,426,451 (estimate.)

Lately some rice has been exported, but the quantity of the grain thus annually sent out of the country has as yet been extremely small, so that we may safely consider that the quantity produced is also the quantity consumed in the country. Let us look now at the annual returns of the population since the year 1879:—

Year.	Population.
1879 (Jan. 1.).....	35,768,584
1880 (Jan. 1.).....	35,929,060
1881 (Jan. 1.).....	36,358,994
1882 (Jan. 1.).....	36,700,118
1883 (Jan. 1.).....	37,017,302
1884 (Jan. 1.).....	37,458,764
1885 (Jan. 1.).....	37,868,987
1886 (Dec. 31.).....	38,507,177
1887 (Dec. 31.).....	39,069,691
1888 (Dec. 31.).....	39,607,234

As for the population last year and the present, we have not yet any figures. But seeing that during the ten years above mentioned the average annual increase of population was 426,405, we may estimate last year's population at 40,033,639, and that of the present year (Dec. 31.) will be 40,460,044, according to the same

standard of calculation. While the population has, on the one hand, thus rapidly increased year after year, the last rice and barley crops, on the other, fell far short of an average yield, the decrease in these two crops, as compared with figures for the preceding year, being respectively 5,000,000 *koku* and 3,000,000 *koku* in round numbers. Under these circumstances, it is only natural that the prices of these grains should appreciate. But the question is, whether the present rise of price is commensurate with the actual circumstances of the case. We must answer this question in the negative. In considering the appreciation of rice, we must remember to distinguish two periods since the summer of last year, viz., from summer to some time in April last, and thenceforward to the present. The rise in the first period is attributable, among other things, to four causes; (1) the purchase of a large quantity of rice by speculative merchants, (2) a general impression that last autumn's harvest was scanty, (3) an apprehension during the winter months that the barley crop would be poor, because the season was abnormally mild and destitute of snow, and (4) the incessant rains of March and April, which strengthened the last mentioned feeling of uneasiness about the barley crop. But the price of rice, which began its upward course last summer and continued it under the influence of such causes, reached in April last a point beyond which even the most daring operations of speculators could not push it, after which it began to show a tendency to return to its normal condition. We thought at the time that the depreciation which thus set in was only natural and inevitable, but contrary to our expectations, the staple again commenced to appreciate. Just then the public was informed that the Government had arranged for the importation of foreign rice to bring down the price of the home grain. But disappointment followed this announcement. Not only has the Government's measure failed to effect its end, but it has in our opinion, obstructed the realization of the purpose with which it was undertaken. What else indeed could be expected from the interference of the Government in matters that ought to have been left to the natural course of events? Had not the Authorities taken upon themselves the task of importing foreign rice, some persons, Japanese or foreign, would surely have engaged in the business and, if left to themselves, would have placed in the market enough of the commodity to supply the deficiency of the home produce. But seeing the Government already in the field, these persons naturally shrank from competing with it, and at last some of them, prudently sought to make a profit by purchasing the rice imported by the Government. We are thus compelled to think that the Government must be in a manner held responsible for the recent extraordinary rise of price. What is to be done now? The answer is plain; let the Government give up its injurious interference with the import of rice, and leave the business to the better management of shrewd merchants who know at least what they are about.

NORTH BRITISH MERCANTILE INSURANCE COMPANY.

WE have received a copy of the eightieth annual report of the North British and Mercantile Insurance Company presented to the shareholders at the last meeting, from which we learn that the losses by fire during the year have amounted to £710,801 16s. 2d., which includes all losses actually ascertained and paid, and a full estimate of all claims that had arisen prior to 31st December, 1889. The Directors have, as usual, set aside one-third of the fire premiums received during the past year, as a provision against liability on the unexpired fire policies of 1889. In the life department 1,217 policies were issued during the year 1889, assuring, after deducting sums reinsured, £903,916, and producing new premiums to the amount of £36,441 9s. 4d. together with 319 bonds securing the sum of £21,701 11s. 3d. yearly of immediate annuities, and £230 yearly of survivorship annuities, and £1,064 6d. of deferred annuities.

for which the company received the sum of £239,518 os. 4d. by single payment, and £106 os. 7d. by annual premium. The claims during the year, including 20 endowments, were 328 in number, under 400 policies; and the sums amount, with bonus additions, to £327,184 gs. 10d. Of the general results of the company's working it may be stated that profit and loss account, including the unappropriated balance of £65,125 17s. 9d. brought forward from 1888, and £19,506 gs. 10d., the profit of the fire department of the Scottish Provincial, the transfer of which company to the North British and Mercantile was finally completed on the 31st January, 1890, amounted to £318,226 1s. 4d., out of which a dividend of twenty shillings per share on 110,000 shares, one-half payable 1st May and the other half 1st November, was declared, together with a bonus of twenty shillings per share, and a sum of £50,000 was placed to the credit of dividend reserve fund, leaving a balance of £48,226 1s. 4d. to be carried forward.

MRS. FENOLLOSA.

We have already spoken of the exceptionally gracious reception given by His Majesty the Emperor to Mr. E. F. Fenollosa in connection with that gentleman's greatly regretted departure from Japan, and we have now to note that a no less signal mark of Imperial consideration was shown towards Mrs. Fenollosa. Owing to indisposition the Empress was unfortunately prevented from receiving Mrs. Fenollosa in farewell audience. Her Majesty therefore adopted the quite unusual course of sending three of her Maids of Honour, Miss Kitajima, Miss Yamagawa, and Miss Kawaga, to the Shinbashi terminus to convey the Imperial adieux to Mrs. Fenollosa when she left Tokyo. Miss Kitajima was also the bearer of an ivory fan, elaborately carved, beautifully painted, and richly set with brilliants, as a farewell gift to Miss Brenda Fenollosa.

MILITARY PIGEONS.

The use of pigeons for conveying intelligence from one place to another, though not unknown to the ancients, and occasionally resorted to in the Middle Ages, especially by the Turks, has assumed real importance only since the late Franco-German War and the famous siege of Paris. The *Military Weekly*, a German paper, in commenting on the recent advances made in this respect, points out that the breeding and training of pigeons for this purpose is by no means easy. It is necessary to have pigeons that are very intelligent, light, yet strong and muscular, and of that dull and unobtrusive plumage that enables so many birds, the larks for instance, to escape from danger. Belgian breeders have so far best succeeded in this, and the heavier Antwerp and the lighter Liège varieties are universal favourites with pigeon breeders on a large scale. Scarcely capable of flying, the young bird is taken from the cot, placed in a basket, taken to a distance of a few miles, and then liberated. The distance is gradually increased from 50 miles when the birds are six months old, to 200 miles when two years old, up even to 500 and more miles, according to the intelligence, trustworthiness, and strength of the bird. They are let fly with the best hope of success when they have young in their nests, which owing to their fecundity is often the case. When flying over short distances scarcely any birds are lost. Mountain chains, large forests and lakes, however, as well as fog, rain, tempests, and other atmospheric influences, seem greatly to disconcert the pigeon's wonderful instinct, and cause losses more or less proportionate to the distance involved. A great point is to let the birds fly at a distance calculated to enable them to reach their destination on the same day; otherwise losses are inevitable. The swiftness of the carrier pigeon can be pretty accurately ascertained, the record has steadily improved of late, and is, on the average, about three-fifths of a mile per minute. It is therefore possible, in summer and with favourable weather, for a well-trained bird to make 620 miles between half-past three in the morning and half-past eight in the evening, while

in the short days of winter 250 miles is a task heavy enough. One great difficulty—that of making the birds fly back and forth between two given places—declared insuperable by ornithologists of no mean repute, is in a fair way of being overcome. Captain Giuseppe Malagoli, director of the carrier pigeon stations of Italy, has by much patience and after incessant labour, succeeded in training the birds to fly from Rome to Civita-vecchia and back again to Rome, a distance of about 45 miles. If others succeed equally well, and if the distance is gradually increased, a new era for the conveyance of news both in peace and war will have begun. The less striking the plumage of the bird, and the smaller its size, the better protected the pigeon is against man as well as against that inveterate foe of all *Columbidae*, the falcon. That bird is in fact being trained, both in Russia and France, to catch the pigeons on the wing in order to enable its master to gain possession of messages otherwise out of his reach. Private breeders of pigeons, it is evident, should be encouraged by rewards in the shape of money or diplomas, and races should be frequently held to test the swiftness and endurance of these gentle and useful messengers.

CHOLERA IN NAGASAKI.

The *Official Gazette* gives the following figures with reference to the cholera in Nagasaki:—

July and	New cases 9 Deaths 5	(11 in the town of Nagasaki and 3 in the district of Nishisonoki).
July 3rd	New cases 14 Deaths 5	
July 4th	New cases 11 Deaths 4	
July 5th	New cases 24 Deaths 10	
July 6th	New cases 7 Deaths 5	
July 7th	New cases 25 Deaths 13	
July 8th	New cases 16 Deaths 7	
July 9th	New cases 41 Deaths 18	
July 10th	New cases 29 Deaths 11	
July 11th	New cases 47 Deaths 15	

The total number of cases from the commencement of the epidemic (June 27th) up to July 11th was 239 and the total number of deaths 114. It appears that there has also been one case, which proved immediately fatal, in Kamihirano-machi, Kyoto, and one case in the village of Matsushima.

There was also one case in Tokyo (Shinbatacho, Asakusa) on the 4th instant. Little hope can be entertained that Tokyo and Yokohama will escape. On the other hand, Yokohama has the immense advantage of possessing water-works. It will now be possible to form a fair estimate of the value of a pure water supply as a protection against the ravages of cholera. The test will not be absolute under existing conditions, inasmuch as a considerable percentage of the poorer classes in Yokohama do not use the water from the works, and these are precisely the people among whom the epidemic is likely to establish itself chiefly. But the Authorities will probably deem it advisable to adopt some special method of bringing the whole native community within the operation of a system which experience has proved to be more efficacious than anything else against the spread of zymotic disease.

It is further reported from Yamanashi Prefecture that on the 1st instant a man in the village of Keirin, and a woman in the village of Buzato, were attacked, and that both of them expired the next day. In Akita Prefecture, also, one case appears to have occurred on the 22nd ultimo.

The existence of cholera at Nagasaki in an epidemic form is now officially recognised, and it is announced that the system of medical inspection fixed by Notification No. 31, in June, 1882, shall be put into operation in respect of all vessels coming from that port. The stations for carrying out the system are to be, as on previous occasions, Wadamisaki, for passengers

entering Hyogo Prefecture, and Nagaura for passengers coming to Kanagawa Prefecture. It may be well to observe that quarantine, in the general sense of the term, forms no part of the system in question. The method pursued is simply to fumigate the ship thoroughly, to give the passengers a warm bath on shore and, while they are taking it, to subject their clothes to a degree of heat sufficient to destroy bacterian life. The whole process does not involve a detention of more than three hours. Whatever utility such measures possess will doubtless be obtainable so long as the cholera is confined to Nagasaki, but if it reaches Kobe and Osaka, there will plainly be nothing gained by fumigating maritime conveyances and their passengers while railways are left to spread the plague without restraint.

In the Haneda suburb of Tokyo, a fisherman, Yonemoto Heishichi, was attacked by cholera on the 4th instant and died next day. In Kyoto a woman residing in Ebisugawacho fell ill the same day and died within a few hours. From the village of Tokobayashi, Saitama Prefecture, another case is reported as having ended fatally on the 30th ultimo after five days' illness, and in the village of Yatsuho, in the same Prefecture, a man attacked on the 1st instant, died the next day. It is evident, however, that with the exception of the Nagasaki cases nothing has yet occurred which may not fairly be regarded as sporadic.

The *Official Gazette* further states that Mr. Nakahama, an expert of the Home Office, has found the cholera germ by microscopic examination in Nagasaki, and that another official of the same Department telegraphs the occurrence of two cases of violent illness resembling cholera at Kuchinotsu on the 6th instant. Attacks of spurious cholera are also reported from Yoshiwara, in Shizuoka Prefecture, and from Kitanaga, in Ehime Prefecture. At the Yobuko hot-springs in Saga Prefecture, one man attacked by Asiatic cholera on the 7th instant; at the village of Yashiro, in Fukui Prefecture, one man attacked by spurious cholera on the 5th instant, died next day; at Maruho village, in Shimane Prefecture, one man attacked by spurious cholera on the 3rd instant.

RAILWAY ENTERPRISE.

It is remarkable to observe the persistent disposition of the Japanese to sink capital in railways. A striking example is that of the Hokuriku line, for the construction of which a temporary charter was granted some time ago. The capital of the line was fixed at four million yen, but we read in the *Tokyo Shimpō* that the applications for subscriptions amounted to over twenty millions. The railway has undoubtedly excellent prospects, such men as Messrs. Shibusaawa Yeichi, Yasuda Zenjiro, and Okura Kihachiro being among the promoters, and Messrs. Narahara Shigeru, Takashima Kayemon, and Yamanaka Rin-no-suke among the councillors. Still it is astonishing to see what large sums are constantly forthcoming when any enterprise with a fair outlook is proposed.

RELEASE OF HARDMEAT.

On Sunday Joseph Hardmeat, late chief mate of the *Sakata Maru*, who was sentenced on October 8th last year, in H.B.M. Court for Japan, to five years' penal servitude for manslaughter—having fatally wounded by shooting a quarter-master of the *Sakata Maru*—was released from prison, by order of Her Majesty's Minister, who we learn has remitted the remainder of the sentence. It is understood that this step has been taken in consequence of the grave change for the worse that has taken place in Hardmeat's health, confinement having reduced him to a condition of complete prostration. He left Yokohama same day in the *Bataria*.

SMOKING CONCERT.

The second Smoking Concert took place on Tuesday in the Public Hall, and proved like its predecessor a pronounced success, the hall being well filled despite the moist state of the

weather and the very muddy condition of the roads, with a most appreciative audience. We append the programme and will only add that so highly were some of the pieces appreciated, especially Mr. Hopkin's songs, that encores had to be allowed; that Mr. Walkinshaw's stump speech abounded in local hits and allusions which kept the audience on the laugh all the time, and that the Band of the *Imperieuse* under Mr. Milo's leadership contributed as on the former occasion very materially to the enjoyment of the evening. The following is the programme:—

- 1.—Capriccio "Echo des Bastions" The Band.
- 2.—Song "Mr. Launay" Mr. Launay.
- 3.—Character Song "Mr. Kenny" Mr. Kenny.
- 4.—Song "Queen of my Heart" Mr. Robinson.
- 5.—Song "Comic" Mr. Hopkins.
- 6.—Minuet "La Joyeuse Reunion" The Band.
- 7.—Song "Petticoat of Gold" Dr. James.
- 8.—Concerted Music "Concert Party" Concert Party.
- 9.—Song "Mr. Launay" Mr. Launay.
- 10.—String Quartet "Violin Party" Violin Party.
- 11.—Stump Speech "Mr. Walkinshaw" Mr. Walkinshaw.
- 12.—Song "Dr. Eames" Dr. Eames.
- 13.—Dance "The Maypole" The Band.
- 14.—Song "Comic" Mr. Hopkins.
- 15.—Recitation "Mr. Goodrich" Mr. Goodrich.
- 16.—Song "Comic, and Dance" Dr. Eames.
- 17.—Selection "The Gondoliers" The Band.

OFFICIAL PROMOTIONS.

ACCORDING to a *Gazette* published yesterday, Senator Ozaki Saburo and Messrs. Hirata Tôsuke and Iwamura Waro, Councillors of the Legislative Bureau, are appointed chiefs of Sections in that Bureau, under the new Departmental organization, the two last named gentlemen being, at the same time, raised to *Chokunin* rank, second class—Senator Ozaki is already a First class *Chokunin*. The same *Gazette* announces the elevation to Second class *Chokunin* rank of Mr. Kurokawa Seichiro, Chief of the Law Bureau in the Foreign Department; Mr. Kiyoura Keigo, Chief of the Police Bureau in the Home Department; Mr. Saito Shuichi, Chief of the Bureau of Trade and Industry in the Department of Agriculture and Commerce, and Mr. Suyematsu Kencho, Chief of the Bureau of Prefectures in the Home Department.

"THE LIGHT OF THE WORLD."

MR. H. DEAKIN's taste for beautiful things, of which anyone can obtain convincing evidence who inspects the really admirable specimens of modern Japanese art displayed at his store, has induced him to become the possessor of the American copyright of "The Light of the World." Upon what terms the acquisition has been made we have not learned, but we feel persuaded that Mr. Deakin will not have reason to repent this new enterprise, while, on the other hand, Sir Edwin Arnold will be guaranteed against the risk of unprincipled piracy in the United States. It seems peculiarly apposite that a Yokohama resident should so materially assist to give to the world the beautiful product of Sir Edwin Arnold's leisure in Japan, and of the inspiration he has derived from her incomparable scenery.

SECURITY FOR LEGAL COSTS.

ON Tuesday morning in H.B.M.'s Court a motion was heard (in Chambers) before Judge Hannen, in a case between Kato Sagoro and R. A. Wylie for a sum of \$500 for building work alleged to have been done by the former. The defendant moved that the plaintiff pay into Court a sum of money as security for costs before further proceedings. Mr. Litchfield appeared for the defendant, and the plaintiff appeared in person. The plaintiff objected to pay a sum of money into Court. Mr. Litchfield, in reply to his Honour, said he thought \$75 would be ample security for costs. His Honour, however, thought \$50 would suffice, and made an order for plaintiff to pay that sum into Court. In the meantime all proceedings would be stopped until the amount was deposited.

COMMENCEMENT EXERCISES AT FERRIS SEMINARY.

ON Thursday afternoon the commencement exercises of the students attending Ferris Seminary took place in Van Schaick's Hall, before a large audience. Rev. Mr. Booth, Principal of the School, presided, supported by the foreign and Japanese teaching staff. The hall, which was decorated with flags, was further adorned by

specimens of drawing from the pencils of the students, some of the work thus exhibited being of a very high character. The best drawings, being tastefully framed, formed a most pleasing decorative feature of the hall. The essays were exclusively in Japanese, and the music was also of a national character, but both were listened to very attentively by the company. At the close Mr. Booth presented certificates to the graduates. The following was the programme of the exercises:—

National Hymn (*Kimi-ga-ya*).

- Organ Solo Miss Hirano Hama.
 Essay "Ambition" Miss Umeno Fumi.
 Essay "The Past Two Years" Miss Nogami Sen.
 Singing *Kuni-no-huta* Singing class.
 Essay *Omoi-yori* Miss Arai Kiku.
 Singing Eight students.
 Koto *Shiki-no-oshie* Misses Watanabe Kumi, Umeura Fumi, and Onozato Tsune.
 Essay "Japanese Female Schools of the Future" Miss Serada Haru.
 Debate "Which is better—Music or Painting?" Third year's students.
 Singing *Wakare no tori*, "The Parted Bird" Singing Class.
 Essay *Doki Kanjo*, "The Moral Sense" Miss Sato Tetsu.
 Debate Second year's students.
 Koto *Kodomo-no-asobi* Misses Watanabe Kumi, Umeura Fumi, and Onozato Tsune.
 Essay *Kokosui*, "Nationality" Miss Katayama Yoshie.
 Singing *Mikuni-no-Tame* Singing Class.
 Presentation of certificates.
 Piano Diet Misses Arai Kiku and Hayashi Sada.

VARYING VIEWS OF THE ELECTIONS

THE newspapers, according to their political bias, take very different views of the results of the polling. Here, for example, are the numbers recently given by three journals:—

	<i>Jiji Shimpô</i>	<i>Daido Shimbun</i>	<i>Hochi Shimbun</i>
Independent	69	82	85
<i>Kaishin-to</i>	51	49	56
<i>Kokumin-ha</i>	21	—	—
<i>Fichi-to</i>	15	12	13
<i>Daido</i>	51	63	48
<i>Aikoku-to</i>	25	30	—
<i>Fuyu-to</i>	20	15	57
<i>Kokumin Shimpô</i>	9	—	—
<i>Hoshu-to</i>	5	14	15
<i>Go-to</i>	—	2	—
<i>Kiushu Shimpô</i>	—	19	—
<i>Kiushu Doshikai</i>	—	—	20

THE BANK OF JAPAN.

THE amounts of convertible notes and reserves in the Bank of Japan for the week ended the 5th inst. were as follows:—

CONVERTIBLE NOTES.	RESERVES AND SECURITIES.
Yen.	Yen.
Notes issued	Gold coin and bullion, 24,295,247
72,754,303	Silver coin and bullion, 26,299,793
	Public Loan Bonds, 13,476,450
	Treasury Bills, —
	Government Bonds, —
	Other securities, 4,732,189
	Commercial bills, 3,959,721
72,754,303	72,754,303

Of the above total issue of notes, the sum of yen 3,824,105 is in the treasury of the Bank, and yen 68,930,198 in actual circulation, the latter showing an increase of yen 2,016,840 as compared with yen 66,913,358 at the end of the previous week.

ECOLE DE L'ETOILE DU MATIN.

THE ceremony of presenting prizes to the scholars of the Ecole de l'Etoile du Matin, in Bancho, Tokyo, took place on Wednesday afternoon, under the presidency of his Excellency the French Minister and in presence of a very large audience of Japanese and foreign ladies and gentlemen. A series of exercises, musical, recitative, and dramatic, was performed by the pupils with a degree of accuracy and verve that testified the excellent system pursued, and the high quality of the instruction imparted at this now deservedly popular school. After the programme had been concluded, the Representative of France spoke a few eloquent words, congratulating the faculty of the school, the scholars, and their parents on the highly satisfactory results achieved, and imparting to them the good news that a suitable site had at length been obtained for a new building, and that, on the resumption of studies in September, the scholars would find themselves in commodious and thoroughly well equipped premises, a very large sum of money having been appropriated for the purpose by the home Mission. The

Vice-Minister of Education, Mr. Tsuji, also made a short speech of a highly complimentary character. The Tokyo residents are most fortunate in the possession of such an exceptionally excellent educational institution, and the public will learn with satisfaction that the success of the school warrants its transfer to premises which will be second to none in the capital.

SPENCER, THE BALLOONIST.

MR. SPENCER, who recently announced his intention to visit Japan, has had the misfortune to lose his balloon. Referring to the incident, the *Singapore Free Press* says:—"Mr. Percival Spencer's balloon ascent in Sourabaya, a few days ago, was a great success. The gardens, band, and fencing round the enclosure were given him free by Government. He went up, so it is said, some three thousand feet before coming down with his parachute. His balloon, however, went up and disappeared behind the clouds. When next it was heard from it had dropped some thirty miles away in the jungle. The natives saw it and thinking it was a present sent them by 'Tuan Allah' cut it up and made sarongs and bajes of it. A subscription has been raised in Sourabaya to present Mr. Spencer with a new balloon."

THE MAJERONIS.

SIGNOR AND SIGNORA MAJERONI have left for the interior, and after visiting the principal places in Japan will return to Yokohama in about two months, when, if the necessary assistance of amateurs can be secured, these accomplished artists will give a performance before leaving for Australia. It is not too much to say that no such acting has ever been witnessed in the Public Hall as would be placed before the audience if a performance by the Majeronis can be arranged.

REPORTED ASSASSINATION OF A MEMBER OF THE DIET.

IT appears that the reported assassination of Mr. Ito, one of the members elected for Kagawa Prefecture, was an exaggeration. Later telegrams say that Mr. Ito was "beaten," but whether he suffered any serious injury, we are not told. The probability is, however, that the affair was of a trifling character, since nothing has subsequently been reported about it.

THE ADDRESS TO THE DUKE AND DUCHESS OF CONNAUGHT.

A LETTER has been received by Mr. Ensley from Colonel Cavaye, Military Secretary to the Duke of Connaught, dated Canada, 7th ult., stating that the address of the British Community was received on board the steamer *Abyssinia*, and that their Royal Highnesses are much obliged and greatly admire the form of presentation in the pure Japanese style, which is exceedingly handsome.

EXPENSES CONNECTED WITH CHOLERA AT NAGASAKI.

THE Authorities at Nagasaki having reported to the Central Government an expenditure of 43,125.55 yen on account of sanitary measures necessitated by the outbreak and threatened spread of an epidemic of cholera, the Imperial consent to the disbursement of that sum by the Treasury was given to the Minister of Finance on the 7th instant.

POLICE STRIKE IN LONDON.

THE strike of the London Police, announced by telegraph, was foreshadowed by the *Pall Mall Gazette* on the 13th ult. The London paper says:—"It is probable if the resignation of Munro, the Chief of Police, is accepted, that the superintendents and inspectors, who keep the force together, will resign within a month, and a strike by the policemen is by no means improbable."

SIR EDWIN ARNOLD'S READING.

THE sale of tickets for Sir Edwin Arnold's Reading realized \$241, an excellent result under the circumstances. With this addition the Relief Fund subscribed in response to the Venerable Archdeacon Shaw's appeal amounts to some fifteen hundred dollars.

THE ELECTIONS.

I.

THE first returns published gave the names of fourteen successful candidates for the Diet, namely, nine for Tokyo, two for Kyoto, and one each for Yokohama, Hyogo, and Nagoya. We are now in possession of the returns for ninety-two districts in all. The results will be found elsewhere in our columns. This information, having been forwarded from the provinces by wire, is not as detailed as that which has already been given about Tokyo and Yokohama. The names of the unsuccessful candidates are not mentioned, and in many cases the numbers of votes cast for those elected have not been telegraphed. We have, therefore, omitted these incomplete details from our table, and entered only the points of principal interest, namely, the political persuasions of the new members and their social status.

Summarizing the results shown in the table, we have the following grouping of the ninety-two successful candidates:—

Independent	Tokyo	8	36
	Other localities	28	
<i>Kaishin-to</i>	Tokyo	3	16
	Other localities	13	
<i>Daido Danketsu</i>	Tokyo	0	14
	Other localities	14	
<i>Jiyu-to</i> (Radicals)	Tokyo	0	
	Other localities	8	
<i>Aikokukoto</i>	Tokyo	0	19
	Other localities	8	
<i>Koin club</i>	Tokyo	0	
	Other localities	3	
<i>Jichi-to</i>	Tokyo	1	3
	Other localities	2	
<i>Kokumin-ha</i>	Tokyo	0	1
	Other localities	1	
<i>Doshikai</i>	Tokyo	0	3
	Other localities	3	

With regard to the term "Independent" used in this table, it should be explained that independence of political parties is alone referred to. Men are described as "Independent"—whether *dokuritsu* or *chiuritsu*—who have hitherto refrained from publicly avowing their allegiance to any of the recognised political associations. It is not absolutely certain that all members in this category will give their allegiance to the Government, but we may fairly assume that inasmuch as they have always held aloof from parties in opposition, their sympathies are with the authorities. At the same time we have to notice that in almost every case where officials sought election, they failed to obtain support. Tokyo, indeed, returned two Senators among its twelve members, and the rare name of an official is to be found among the successful provincial candidates, but other signal failures quite eclipse these exceptions. When we read that Mr. SUYEMATSU, one of the ablest and most eloquent officials of the Home Department, received only two votes in his candidature for the Second Electoral District of Tokyo; that Mr. WATANABE, formerly President of the Imperial University, obtained only one vote in the same District; that Mr. MIURA, a dis-

tinguished Senator, could induce only nine voters to ballot for him in the Third District; that the well-known Mr. KANDA KOHEI, also a Senator, received only two votes in the Seventh District, and that the still more celebrated Mr. KONO TOYAMA found only one supporter in the same District, it is difficult to avoid the conviction that any suspicion of official connections proved injurious to a candidate's chances of success. This point will be better elucidated when detailed returns indicate how many officials were included among the unsuccessful candidates in the provinces.

The *Jichi-to* is not, strictly speaking, a political party. It was founded in 1888 by Count INOUE, avowedly not for party purposes, but merely with the object of enquiring into the principles of self-government. The public, however, has always persisted in speaking of the *Jichi-to* as a party, or at any rate as the nucleus of a party, and we suspect that the public is not very far wrong, though certainly no organization on party lines has as yet been attempted by Count INOUE and his friends. In a parliamentary division the *Jichi-to* members would probably be found in the Government camp, so that the official side may be said to have secured about 39 seats out of the 92 thus far known.

It will be remembered that, some time ago, a coalition was effected between the various sections of the Radicals—the *Daido Danketsu*, the *Jiyu-to* and the *Aikokukoto*—and that the combined party took the name of the *Koin Club*. In view of these events some perplexity may be caused by the fact that, according to the election returns, the nominally united sections appear to have been working independently under their old names. The truth is, we believe, that the leaders, while agreeing to coalesce, agreed also to maintain their separate organizations and distinguishing appellations wherever such a course seemed likely to be beneficial. For purposes of parliamentary analysis, however, the several sections must be regarded as parts of a whole, their aggregate members numbering 33.

The *Doshi-kai*, which has adherents in various places, professes progressive principles, and leans towards the *Kaishin-to*, except in Kagoshima, where its members preserve an obstinate independence. The *Kokumin-ha*, a representative of which has been returned from Shiga Prefecture, is a body of nondescript principles, concerning whose parliamentary attitude we cannot predict anything.

Re-grouping the successful candidates according to the above consideration, our result is:—

Government Party.....	39
Radicals (led by Counts	
Goto and Itagaki)....	33
<i>Kaishin-to</i> (led by	
Count Okuma)	18
Uncertain	1

(Including two of the *Doshikai* members).

An interesting question, which can be

answered with tolerable confidence by the aid of the returns already received, is whether or no the privilege of the franchise was eagerly availed of by those enjoying it. To determine this we have to compare the number of votes actually cast with the number of registered voters. The figures stand as follow for nine Districts of Tokyo, concerning which accurate records are obtainable:—

District:	Number of possible votes.	Number of votes actually cast.
First	233	194
Second	203	145
Third	231	216
Fourth	639	499
Fifth	271	256
Sixth	338	273
Seventh	279	213
Eighth	246	207
Ninth	182	162
Totals	2,622	2,165

It will be seen from these figures that there were only 457 abstentions (17 per cent.) among 2,622 voters. Of course, when we remember how high the franchise is, we can easily understand that the possession of a vote becomes a privilege not to be lightly esteemed, and that the voters are of a class not likely to be indifferent about the discharge of public duties. Still the fact that eighty-three persons out of every hundred handed in their ballots, speaks significantly as to the interest taken in the business of election.

Another point bearing on this question is the number of candidates who entered the field. The returns published in our last issue showed only two names for each district, those of the successful candidates and the second on the list. But, in point of fact, the total number of candidates for the twelve Tokyo seats was, not twenty-four, as might have been inferred from our table, but ninety-two, an average of nearly twelve candidates for every vacancy. Thus, in the Third District (Kyo-bashi), where Mr. KAZAMA, a merchant, carried the day, no less than fifteen candidates were in the field; in the Fourth District (Nihonbashi), the successful candidate, Mr. FUJITA, editor of the *Hochi Shimbun*, had ten opponents; and in the Sixth District (Asakusa), Mr. TAKANASHI had to contest with nine others. The desire for election was not quite so extensive in other places, but that it was tolerably keen will be understood from the fact that the 80 Districts outside Tokyo from which returns have been obtained were contested by 221 candidates. When 92 seats bring 313 candidates into the field, it is plain that the honour of being a member of the Diet is highly prized.

Classifying the 92 members according to professions, we find the following results:—

Farmers	20
Journalists	4
Barristers	8
Head-men (past or present, i.e. local officials)	24
Bankers	4
Merchants	7
Members of Local Assemblies	13
Officials	4
<i>Shizoku</i>	8

It must be understood that the last category in our list does not include all the *shizoku* (gentry) who have been returned. Many of this class are doubtless to be found in the other categories. But the 8 *shizoku* separately entered in the table appear in the election returns as *shizoku* only, from which we judge them to be following no trade or profession.

II.

WE are now in possession of returns for all the electoral districts with the exception of one in Ibaraki Prefecture, where, owing to some error on the part of the election officials, the ballots have to be cast again. It is not possible, in the absence of an official statement, to determine with certainty the proportion in which the seats have fallen to the various parties, but the following analysis seems fairly trustworthy:—

Independent	84
<i>Kaishin-to</i>	64
<i>Daido Danketsu</i>	55
<i>Aikoku-to</i>	38
<i>Jiyu-to</i>	14
<i>Kiushu Shimpō</i>	9
<i>Hoshu-to</i> (Conservatives)	18
<i>Fichi-to</i>	17

The four parties classed in this list as "Radicals" are, in effect, one association, and may be regarded as a single party for all practical purposes, the leaders being Counts ITAGAKI and GOTO, Messrs. NAKASHIMA, KATAOKA, and OI. The *Kaishin-to* is led by Count OKUMA and Messrs. YANO, SHIMADA, and OZAKI. In principle it is scarcely less progressive than the Radical party, but until lately the two held resolutely aloof from each other, and nothing seemed less likely than union between them. A *rapprochement* has, however, been brought about to a limited extent. It is understood to have been arranged that while each remains distinct as before and maintains its general independence, nothing need prevent a junction of forces for certain definite objects. Such a junction, representing 180 votes in a house of 300, would plainly be of overwhelming strength for the purpose of overthrowing a Cabinet, but its capacity to administer the Government would depend on the improbable contingency of a permanent union between the two parties. Without recourse to conjectures, however, it is possible, we think, to arrive at a tolerably clear estimate of the situation created by the elections, and to forecast the outlines, at least, of its results.

In the first place, we have to observe before everything that these elections do not represent the issue of an appeal to the country by a party in power. The Government has made no appeal nor allied itself with any party. Such a step even though it had not been contrary to the resolve enunciated by the principal members of the Cabinet after the promulgation of the Constitution, would have been forbidden by other and obvious reasons. The theory of Government at present in Japan

is that the Cabinet, presided over by the EMPEROR in person and holding office solely at HIS MAJESTY'S pleasure, is nothing more than the Imperial mouthpiece. Its responsibility is towards the Sovereign alone and it owes no allegiance even to the voice of the Diet, still less to the behests of a political party. When parliament is opened the expediency of a consensus of opinion between the Cabinet and the majority in the Lower House will soon secure practical recognition of the principle of government by party, although a change of the constitution in that sense may be very long deferred. But in the meanwhile the Cabinet is simply a piece of administrative mechanism, owing its motive force entirely to the Throne, and nominally insensible to popular influence. It follows, therefore, that in theory no opposition exists between the present Government and any of the parties whose members have been elected by the nation. The *Jiyu-to*, the *Kaishin-to*, the *Daido Danketsu*, and all their affiliated coteries were organised originally for purposes of opposition, but they had no recognised status, nor did any lawful machinery exist for the endorsement or rejection of their opinions by the public. Nevertheless, a careful retrospect of the administrative and legislative history of the past sixteen years shows that many of the views advanced by these various parties were accepted by the Government and gradually embodied in laws, ordinances, or departmental practice. Thus, by cautious but steady steps, the interval between the systems elaborated by those in power and the theories enunciated by those in opposition was narrowed, until, in 1888, the leader of the *Kaishin-to*, for example, found nothing to prevent his return to the Cabinet, nor his party anything to forbid their cordial support of the Government which, in welcoming him, made no deviation from the course it had previously been pursuing. Now, however, the representatives of the several parties having become also the lawful representatives of sections of the people, their opinions have acquired a new title to respect, which can be the more easily accorded to them inasmuch as the Government has prudently refrained from making the elections any test of the popularity of its own views or any occasion for proclaiming its own programme. In brief, there is as yet no opposition on practical lines. The Cabinet is not pledged either to adopt or to reject the opinions of any political party. It is just as free to ally itself with the Radicals or the *Kaishin-to* as with the Independents or the *Fichi-to*. This, in our own opinion, is the saving clause of the situation. If the divisions of the Diet were to follow the lines hitherto marked out for themselves by political parties, the prospect would be serious for the Government, since it could only count on a following of

101 (84 Independents and 17 *Fichi-to*) against a probable opposition of 180 (Radicals and *Kaishin-to*). But it is no more possible to predict the lines of division than to foretell on what side the Government will be found ranged. In fact everything must remain in the region of conjecture until the boundaries of the various political camps are mapped out clearly by parliamentary discussion. It may be taken for granted that the Government will meet the Diet in a conciliatory spirit, and that it will even go so far as to give practical effect, before that time, to views which have found common expression in the platforms of the Radicals and the *Kaishin-to*. Foremost among the measures which this course would entail are the repeal of the Peace Preservation Regulations and a large modification of the Press and Public Meeting Laws—reforms which we shall not be surprised to see carried out at an early date. But in respect of measures advocated by one party and condemned, or at least unsupported, by the other, it is obvious that the sense of the Diet must be definitely taken before the Cabinet shows its hand. Thus, on the whole, our conclusion is that the elections cannot yet be interpreted with any pretence of certainty, and that the parties which are to-day counted the Government's strongest opponents may ultimately be found in the same camp with it. We look for nothing in the shape of a political crisis, but rather for the elaboration of a *modus vivendi*. These, of course, as we have already said, are the mere outlines of the situation. The details cannot yet be discussed.

MR. FUKUZAWA.

THE public is familiar with the spectacle of men refusing to offer themselves as parliamentary candidates, but we have seldom heard of anyone taking the precaution of inserting an advertisement in the newspapers warning electors not to vote for him. Such, however, was the very practical step taken by Mr. FUKUZAWA on the eve of the recent elections. Few Japanese of the present day command a larger share of popularity among the younger generation than Mr. FUKUZAWA, and there can be no doubt that, even though he had not canvassed, or even offered himself as a candidate, many votes would have been cast in his favour by the electors of the Shiba District. Since, however, he is thoroughly resolved against sitting in parliament or taking any share in public life, ballots bearing his name would have been so much waste paper. He accordingly issued the following notice:— "My age renders it impossible for me to discharge the duties of a member of the Diet. I therefore take the precaution of warning electors in the Shiba District and elsewhere that ballots in my favour will be

useless." This decision of Mr. FUKUZAWA'S is, in our opinion, regrettable. Whenever it has been our good fortune to hear him address an audience, we have been struck by his marked possession of that magnetic power with which so few men are fortunate enough to be endowed. The well remembered incidents of the first occasion when we had the privilege of listening to an address by him, grow more vivid as we consider his present abstention from a parliamentary career. A large number of the Tokyo residents had assembled by invitation at the Nakamura-ro to celebrate the inauguration of an important educational scheme. Among those present were several foreigners. The programme of addresses was quite long, but the speeches themselves being ably conceived, terse, and well delivered, were listened to without weariness. None of the orators, however, succeeded in awakening any semblance of vivid interest until Mr. FUKUZAWA ascended the rostrum. The moment he appeared a stir of expectation passed through the audience, and before he had spoken for a minute those of his foreign hearers to whom his face was unfamiliar began to enquire curiously who he was. It is indeed impossible to hear Mr. FUKUZAWA speak in public without being strongly attracted towards him, and keenly interested in his words. His figure and mien suggest the student, and his face, when at rest, though it implies intellectual power and determination, does not invite sympathy. But no sooner does he begin to speak than his eye glows with fervent thought, and the lights and shades of strong but subdued emotion chase each other over his massive features. Such a man would certainly have occupied a prominent place and been a great power for good in the Diet. It is just possible, indeed, that he may still enter parliament as a nominee of the EMPEROR to the Upper House, for certainly the intention of that clause of the Constitution which provides that HIS MAJESTY may appoint to the House of Lords a certain number of men distinguished for erudition, would be fulfilled in the choice of Mr. FUKUZAWA. But, unless we misapprehend his mood, the cause assigned by him for declining a seat in the Lower House would be equally an obstacle to his entering the Upper. It is not likely, as a mere matter of courtesy and respect to the Peers, that he would plead the disabilities of age in the one case and ignore them in the other. Evidently there is small probability of his taking an active part in parliamentary affairs, and evidently also the true motive of his abstention is not age. It is well nigh absurd, at all events from an English point of view, that a man still in the fifties should assign length of years as a reason for declining a seat in parliament. We are inclined to believe that Mr. FUKUZAWA'S real reason is want of confidence in the success of the system now about to be inaugurated. He has

never hesitated to declare that he considers the country still unripe for the experiment of parliamentary institutions, and it may well be that this want of faith induces him to stand aside. Abstention for such a cause is doubly regrettable, first as indicating scepticism in the people's condition on the part of one who should be competent to form a clear estimate; and, secondly, because, if men like Mr. FUKUZAWA refuse to assist in organising and directing, their own action will materially contribute to the failure they apprehend. There is another possible explanation, however; one which, whether applicable to Mr. FUKUZAWA'S case or not, has been advanced on behalf of several prominent persons whom the public had expected to find actively interested in parliamentary affairs. It is that the first Diet is not likely to play any really controlling part in matters of State: that it will, in fact, be the shadow, rather than the substance, of a parliament. Men entertaining this view are disposed to await the next general election, occupying a post of observation in the interval. Possibly Mr. FUKUZAWA is among them. It is true that he will be four years older when that time comes, and that the opening words (*rosei-gi*) of his advertisement of abstention may then be recalled by his opponents with unpleasant appositeness. But the country can ill afford to dispense with the assistance of men of his experience and character at this critical stage of its career.

GOVERNMENT SALES OF RICE.

THERE has been much talk and some writing about the method pursued by the Government in disposing of the rice imported by means of the Central Famine Relief Fund. Foreign critics have added their voices to the discussion, and, as is not infrequently the case when strangers attempt to pass judgment on Japanese affairs, errors of fact have impaired the value of the opinions expressed. A cardinal mistake, for example, is the idea that the Government has a sum of twenty-two million *yen* available for the import of rice. It ought to have been easy to ascertain that such is not the case. At the close of the last financial year, the Famine Relief Fund did indeed aggregate 21 million *yen*, but of this total only 4 millions were in the hands of the Central Government, the remaining 17 millions being in the keeping of the various Local Governments. And since a moiety of these 17 millions had been contributed directly by the people of the localities, the money could not be employed for importing rice at the discretion of the Cabinet. The Imperial Rescript of May 3rd, directing that rice should be imported for the purpose of relieving the market, sanctioned the employment of the Central Famine Relief Fund only for that purpose, so that the sum available was four millions, not

twenty-two. The Authorities were evidently not a little puzzled as to the best means of disposing of the imported grain. Under ordinary circumstances the details of such a transaction would have been left to the discretion of the Minister of State for Finance, but on this occasion the whole affair seems to have been discussed and regulated by the Cabinet in a body. The course adopted was governed by broad considerations of supply and demand. Assuming that the prime cause of the abnormal prices ruling in the rice market was deficiency of supply, the Government evidently decided to deal with the question on this basis. Accordingly, considerable quantities of rice were imported and put up to public auction, the presumption being that by this method the deficiency would be gradually and naturally supplied, without involving any of the confusion and embarrassment which must have ensued had large supplies of grain been suddenly thrown on the market at prices forty or fifty per cent. below ruling figures. There has been some want of perception on the part of the critics, who speak as though what the Authorities had to deal with were not the large problem of reducing the general level of rice prices, but the comparatively petty problem of feeding these who find themselves partially or wholly deprived of the means of livelihood. Men argue on the hypothesis that the main object to be accomplished is to provide cheap rice for the poorer classes, whereas the difficulty with the poorer classes is that, owing to the indirect consequences of dear rice, they cannot buy a sufficiency of food of any kind. It is not the competition of the poorer classes that has driven rice to its present level. It is the competition of well-to-do folks, who insist upon having home-grown rice and nothing else, and who will curtail their expenditure in other directions rather than eat daily bread of a comparatively unpalatable kind. Indeed, for this reason we have always doubted whether the importation of foreign rice could affect the situation as materially as some people seemed to expect. The Japanese have a radical dislike for all foreign rice except that of Hawaii: the majority of them prefer to eat barley or *mochi-gome*. But when prices reach a certain level, they will, albeit reluctantly, mix foreign rice with Japanese, and if an ample supply of the former were procurable at moderate rates, the market price of the latter must necessarily descend. Now, apart from the great practical difficulties of the course advocated by some persons—namely the selling of rice tickets at fixed prices to people in straitened circumstances—it is more than doubtful whether such a measure would produce the desired result. The recipients of the tickets would certainly be enabled to eat foreign rice at comparatively small cost, but inasmuch as, if our

Original from

analysis be correct, they had not previously been considerable consumers of Japanese rice, the demand for the latter would not be materially relieved by their improved facilities as to the foreign grain. Add to this the immense perplexity and the inevitable abuses attending any official attempt to classify the people for such a purpose, and it will be evident that those who advocate the distribution of imported rice by means of tickets sold at cost price, or less than cost price, to poor families, have not maturely weighed the problem. If the Government decided to constitute itself a retail merchant for the purposes of the present emergency, its only prudent plan would be to sell imported rice at cost price to all comers, without distinction, but in small fixed quantities. This would effectually obviate any wholesale purchases by monopolists, and would bring the imported grain within reach of all who cared to purchase it. Of course to carry out such a system without any risk of abuses would entail an intricate and troublesome organization. But it would certainly be far wiser and more practical than an attempt to discriminate in favour of certain classes. Further, it is plain that so soon as the Government determines to place itself in direct contact with the consumer, it must do so everywhere, or at least at all important places in the empire. To sell imported rice at cost price to the citizens of Tokyo, without extending a similar privilege to consumers in all districts, would probably lead to very serious disturbances. This consideration doubtless weighed greatly with the Authorities and induced them to prefer feeding the normal channels of distribution, namely, the wholesale and retail dealers, instead of attempting to undertake the work of official distribution in a necessarily partial and vexatious manner. After all, it is not to be supposed that every rice dealer is engaged in a conspiracy to "bull" the market. Some large operators may have taken advantage of the situation, but at bottom it is a question of supply and demand, and if foreign rice is imported in sufficient quantities the "bulls" must soon prove unable to carry it. The fight had better be fought with all the forces engaged. Every additional *yen* paid by the "bulls" exposes them to an additional influx of imported rice, and with a capital of four million *yen* engaged on the other side, victory ought not to be doubtful. When it comes it will be complete. Meanwhile what we have written may help to show that the problem is by no means so simple as some critics imagine, and that to prefer charges of mal-administration is much easier than to indicate a system which shall be secure against them.

The point chiefly open to criticism, as it seems to us, is that the Government's procedure has necessarily put a stop to all enterprise on the part of private importers. There are many Japanese and fo-

reign merchants who would have hastened to obtain large supplies of rice from abroad, had not the Authorities effectually blocked the way. As a general rule official interference in matters of commerce works more or less mischief, and many good judges hold that the present case is no exception. On the other hand, the Government's contention is that private enterprise had shown itself backward and inadequate before any official action was taken, and it would be exceedingly rash to deny that this argument is partially sound, especially when we remember that in a country where merchants are exposed to the risk of finding themselves at any moment in competition with the Treasury, individual initiative must always be timid and inefficient. This, however, brings the blame back to officialdom after all, and we are ourselves disposed to think that it should rest there.

MEASURES TO RESTRAIN POACHING.

WE read in the vernacular press that the Minister of State for Foreign Affairs, with the approval of the Cabinet, has resolved to adopt strong measures for the restraint of poaching in the Kurile Islands. It is a perfectly open secret that for years foreign vessels have been in the habit of poaching in Japanese waters, and that, in pursuance of this illegal business, they constantly violate the treaties by entering ports to which access is not given by the provisions of those documents. The thing has long been a scandal, not alone as an unwarrantable defiance of law and propriety, but also on account of many disgraceful incidents inevitably accompanying such doings. When men deliberately engage in enterprises which they know to be dishonest and illegal, it is certain that their conduct will be disfigured by acts and accidents in accord with their immoral purpose. They place themselves outside the pale of the law from the outset, and this taint of wrong-doing naturally runs through all the history of their undertaking. It is for this reason that the Consular Courts in Yokohama are often required to try the masters and seamen of otter schooners for various crimes and misdemeanours, until the public begins to understand that poaching, piracy, and such pursuits, however strictly their votaries may seek to conduct themselves, are sure to involve outbursts of the lawless spirit that inspires their inception. Curiously enough, the Consular Courts, while punishing the otter hunters severely enough for incidental offences, have always carefully abstained from noticing their fundamental breach of the law. They punish a master for deserting his men and they punish the men for beating or stabbing one another, but they take no cognisance

of the fact that these wrong acts are performed in places where the ship has no right to be, and in the pursuit of a trade which is nothing more or less than stealing. Of course it is not to be supposed for a moment that the Consular Courts have any desire to ignore or condone the grave offences of treaty-breaking, poaching, and piracy. It has hitherto happened that charges under these counts have not been brought before them. None the less strange does it appear to find masters and officers of schooners describing with impunity in open court how they visited this place, anchored at that, or landed on the other, while in every instance their procedure was distinctly contrary to law. Of a piece with such undisguised illegality is the whole behaviour of the poachers. They come to Yokohama to victual and man their vessels, they carry thither their cargoes of skins for sale, and they openly publish the amount of their catch during the season. It is true, indeed, that they have always a saving clause. The seals and otters whose fur they trade in were not necessarily taken in preserved districts: they may have been caught on the high seas or in waters over which no Power claims exclusive rights. But the value of this subterfuge is clearly appreciated, and if it has hitherto been suffered to pass muster, nobody is really deceived by it. The poachers, on their side, probably argue that since no active measures are adopted by Japan to restrain them, their misdeeds do not seem very serious. Moreover, they generally find defenders. It is claimed that the dangerous character of their enterprise atones for its illegality, and that, under any circumstances, poaching is a very venial sin—pleas the more readily recognised because of the plucky, pleasant character of some of the leading poachers. But when all excuses have been urged, the indisputable fact remains that this poaching business is discreditable to the reputation of countries whose nationals engage in it. We shall be glad, therefore, to see the Government carry out the resolve attributed to it by the vernacular press, namely, that of sending ships of war to watch the scene of the trespasses. Japan's right to protect her own property is beyond all dispute. Up to the present she has not enforced that right in respect of the otters and seals frequenting the Kuriles, but if she sets about doing so in earnest now, she will have the support of all self-respecting Powers. Of course, she is not in a position to adopt the summary procedure employed by Russia for protective purposes: she will not confiscate ships and imprison their crews. Her action will be confined, we presume, to arresting poachers and handing them over to the nearest Consular authorities. Six years have elapsed since she issued an edict forbidding even her own subjects to capture seals and otters on her northern coasts with-

out official permission, and if foreigners persist in disregarding this injunction, it is time that she either treated it as a dead letter or took active steps to enforce obedience.

THE STUDENTS OF TOKYO.

IN a long series of articles recently concluded, the *Nippon* gives some interesting figures about the students of Tokyo. According to our contemporary's calculation, there are 107,312 students in the whole Empire, studying in the various colleges and other higher schools (primary schools and ordinary middle schools excepted). Of this number, 38,114 represent students prosecuting their studies in the capital; that is to say, about 40 per cent of the whole number are congregated in Tokyo. What are the effects of so disproportionate an assembling of students in the capital? Our contemporary looks at the question, in the first place, from its economical side. Among the 38,114 students, 6,899 are domiciled in Tokyo, so that the number of those coming from other localities is 31,215. Some of these latter look for support to relatives or friends in the capital, but the number of youths having such means of subsistence is extremely small, and steadily decreasing. Most of the students are dependent on their parents or relatives in the country, and are disbursing in the capital money brought from the provinces. The amounts which individual students spend vary from seven or eight *yen* to about fifteen *yen* per month. Taking the average, it may be assumed that each student spends ten *yen* a month, or a hundred and twenty *yen* a year. Thus the total amount of money annually disbursed by these lads is a little over 3,700,000 *yen*. In other words, money aggregating over three millions and a half is being yearly drawn from the provinces to the capital through this channel. What do the provinces receive in return? Nothing or very nearly nothing, for few of the students ever return to their homes, their sole ambition being to remain in the capital, and there rise to eminence in some walk of life. The few who drift back to their provinces are the worst specimens of the class, lads who, being neither enterprising nor intelligent enough to join the ambitious race in the city, are not likely to accomplish much in the country either. The *Nippon* then proceeds to discuss the effect which a sojourn in Tokyo produces on the character of the students. If the capital possesses more educational facilities than provincial towns, it also offers far greater temptations. Moreover, the bad food, and worse air of the city produce very evil effects on the intellectual and physical health of many promising students. Robust and simple-minded lads coming from the provinces to Tokyo at an extremely impressionable age, are in danger of losing their originally sturdy,

single-hearted character, and adopting the fickleness and inconstancy of the Tokyo folks. The *Nippon* is thus strongly opposed to the present steady influx of students from the country to the city. Having discussed this phase of the question, it publishes a comparative table, showing the number of students attending the educational institutions under the Government, and those attending private schools, and also the number of students representing each *Fu* and *Ken*. From this table, it appears that 31,126 attend private schools, while only 6,597 are registered at Government schools. It follows, therefore, that the great majority of the youths coming to Tokyo study at private institutions, where instruction is given in ordinary branches of knowledge. "Is it worth the money," the *Nippon* enquires, "for lads to travel long distances from the provinces to the capital in order to receive a liberal education? So far as that is concerned, they may stay at home without much loss. What, then, is the motive that impels them to flock to Tokyo." The *Nippon* answers this question confidently. It says that the young men are influenced by vain ambition to get the reputation of having studied in the capital, as, under the TOKUGAWA Government, no physician thought himself entitled to command the confidence of his patients unless he could boast of having studied at Nagasaki. As to the comparative number of students from the different localities, the *Nippon* takes into consideration only those studying at private institutions. We, however, think it more interesting to consider the totals of those attending Government schools and those studying at private schools. Following this method of computation, we find that the Prefecture of Niigata heads the list with 1,545. There are other six localities represented by more than 1,000 students in Tokyo, viz., Chiba, Nagano, Shizuoka, Yamaguchi, Saitama and Kanagawa. Next come Aichi, Ishikawa, Hyogo, Ibaraki and Fukuoka. Kagoshima stands within fifteen of the bottom with 483; Okinawa coming last with 40. It is a noteworthy fact that, in respect of the number of students attending Government Schools, Kagoshima comes very near the head of the list with 416, the first position, from this point of view, being occupied by Ishikawa with 429; while Niigata and some other localities come far lower down. Yamaguchi closely follows Kagoshima with 383. When we notice that the majority of the students from Kagoshima and many from Yamaguchi are found in the military and naval colleges, a comparatively small number devoting themselves to civil professions, our readers will see that a great change is inevitable in the distribution of political power when the rising generation comes to the front. Turning now to the question of what kind of study attracts the largest number of students, we find the

following figures:—Jurisprudence and Literature, 7,578; Medicine, 1,568; Engineering, Technology, and Art, 1,118; Sciences, 1,694; Commerce and Book-keeping, 2,075; Agriculture and Dendrology, 895; Military and Naval Science and Arts, 1,073; Ordinary Education (mostly English) 114,844. These figures relate to male students. There are, besides, more than two thousand female students in Tokyo, the number of female schools being about 20. It is thus seen that Jurisprudence and Literature are at present most in fashion. It would be interesting to know what special attractions these subjects of study possess. One explanation offered is that the students, being for the most part *shisoku*, find in jurisprudence and literature a field of research congenial to their former history and present position in society. But the *Nippon* is inclined to give greater weight to another circumstance, namely, that, with *shisoku* and *heimin* alike, the one absorbing desire among students is to enter the civil service, or to fit themselves for such professions as are, in popular opinion, most closely allied to official life; as for example, the bar, journalism, general literature, oratory, and so forth. The Government is blamed by many for encouraging this tendency among the students by granting subsidies to law schools and conferring special privileges on graduates of these institutions. On the other hand, little encouragement is given, says the *Nippon*, either by the Government or the people, to the study of those arts and sciences which are really the most important factors of national progress. Our contemporary bitterly deplores the injustice of relegating to obscurity, and even ignoring, men who have spent years on years studying hard in the highest educational institutions in the land, while raw youths, on the completion of an extremely imperfect course in law or literature, are raised suddenly to responsible positions in the Government, or are at any rate regarded by the public with respect and high consideration. Finally, as to female students, 1,500 out of their whole number (above 2,000) are said to be from the provinces, and our contemporary is extremely sceptical that any benefit can be derived by young girls who, leaving their native places and separating themselves from the direct supervision of their parents and the wholesome influences of family life, are introduced at a tender age to the circumstances of city residence.

There offers, perhaps, no more momentous problem for solution by Japanese public men than that of education. The *Nippon* presents some interesting phases of the question, but leaves untouched others of even greater importance.

ELECTION RETURNS.

KYOTO CITY.

Third District.—Mr. Itano Shinkuro (farmer). Independent.
 Fourth District.—Mr. Ito Kumao (President of the Yamashiro Tea Company and of the Fushimi Bank). *Fuyu-to*.
 Fifth District.—Mr. Tanaka Genjiro (President of City Assembly). *Fuyu-to*.
 Sixth District.—Mr. Kamimuchi Tomotsune (Retired list. Formerly assistant chief of the Revenue Bureau of the Financial Department). Independent.

OSAKA CITY.

First District.—Mr. Awaya Shimazo (member of City Assembly). Independent.
 Second District.—Mr. Toyoda Susaburo (member of City Assembly). *Daido Danketsu*.
 Third District.—Mr. Akita Keizo (former Headman). Independent.
 Fourth District.—Mr. Nakaye Tokusuke (journalist). *Aikoku-to*.
 Fifth District.—Mr. Kikuchi Kanji (barrister). *Daido Danketsu*.
 Sixth District.—Mr. Matano Kagetaka (Former chief of a rural district). Independent.
 Seventh District.—Mr. Higashino Heitaro (Chairman of City Assembly). *Daido Danketsu*.
 Eighth District.—Mr. Yukoyama Katsusaburo (Member of City Assembly). Independent.
 Ninth District.—Mr. Sasaki Seiyu (banker). *Aikoku-to*.

TOKYO CITY.

Tenth District (suburbs of Higashi-tama and Minami-Kita-Toshima).—Mr. Mori Tokinosuke. Independent.
 Eleventh District (suburbs of Minami-Adachi and Minami-Katsushika).—Mr. Asaka Katsutaka. *Kaishin-to*.
 Twelfth District (suburbs of Yebara and Izu-shi-chi-to).—Mr. Takagi Masatoshi. *Kaishin-to*.

KANAGAWA PREFECTURE.

Second District.—Mr. Yamada Taizo (barrister). Radical.
 Third District.—Mr. Ishizaka Masataka (farmer). *Aikoku-to*.
 Fourth District.—Mr. Yamada Toji. *Kaishin-to*.
 Fifth District.—Mr. Nakajima Nobuyuki. *Koin Club*.
 Sixth District.—Mr. Yamaguchi Sabichiro (farmer). Radical.

NIIGATA PREFECTURE.

First District.—Mr. Yamakiwa Hichishi (farmer). *Daido Party*.
 Second District.—Mr. Jango Naohi. *Daido Party*.
 Third District.—Mr. Takaoka Chuhei. *Daido Party*.
 Fourth District.—Mr. Nishigata Tamezo (farmer). *Daido Danketsu*.
 Fifth District.—Mr. Kobayashi Yuhichiro (Editor of the *Toku Nippo*). *Daido Party*.
 Sixth District.—Mr. Matsumura Bunjiro (farmer). *Daido Danketsu*.
 Seventh District.—Mr. Sekiya Magozayemon. *Kaishin-to*.
 Eighth District.—Mr. Muro Kojiro. *Kaishin-to*.
 Ninth District.—Mr. Ukai Ikujiro (farmer). *Daido Party*.

MIYAGI PREFECTURE.

First District.—Mr. Masuda Shigeyuki. Independent.
 Second District.—Mr. Musha Denjiro (former Headman). Independent.
 Third District.—Mr. Jiumonji Shinsuke (former Headman). Independent.
 Fourth District.—Atsumi Magojiro (Retired List. Headman). *Miyagi Political Section*.
 Fifth District.—Mr. Yendo On (Vice-President of Prefectural Assembly). *Miyagi Political Section*.

SHIZUOKA PREFECTURE.

First District.—Mr. Inouye Hikozaemon (farmer). *Kaishin-to*.
 Second District.—Mr. Kageyama Hideki (farmer). *Daido Danketsu*.
 Fourth District.—Mr. Okada Ryoichiro (farmer). *Fichi-to*.
 Fifth District.—Mr. Ushio Denzo. Independent.
 Sixth District.—Mr. Kondo Jumpei (former Headman of *gun*). Independent.
 Seventh District.—Mr. Yoda Sajiei. Independent.

KOCHI PREFECTURE.

First District.—Mr. Takenouchi Ko. Radical.
 Second District.—Mr. Kataoka Kenkichi. *Aikoku-to*.
 Third District.—Mr. Ueki Yemori. Patriotic party.

AICHI PREFECTURE.

Fifth District.—Mr. Mori Tachino (former Chairman of Prefectural Assembly). Independent.

Sixth District.—Mr. Aoki Yeiji (former Headman). Independent.
 Seventh District.—Mr. Hayama Chingyemon (former Chairman of Prefectural Assembly). Independent.
 Ninth District.—Mr. Imai Jsoichiro. Independent.
 Eleventh District.—Mr. Minobe Teiyo. *Koin Club*.

YEHIME PREFECTURE.

First District.—Mr. Fujino Masataka. *Aikoku-to*.
 Second District.—Mr. Ishihara Shigeki. *Kaishin-to*.
 Third District.—Mr. Aritomo Masachiga (farmer). *Kaishin-to*.
 Fourth District.—Mr. Suzuki Shigeto. *Daido Party*.
 Fifth District.—Mr. Masano Junzo (farmer). *Daido Danketsu*.
 Sixth District.—Mr. Suyeshiro Shigeyasu (journalist). *Daido Danketsu*.

TOKUSHIMA PREFECTURE.

First District.—Mr. Inouye Kokaku. Radical.
 Second District.—Mr. Morino Tamogoro.
 Third District.—Mr. Kawamada Tokusaburo.

TOCHIGI PREFECTURE.

First District.—Mr. Yokobori Saunshi. Independent.
 Second District.—Mr. Arai Shogo (President of Prefectural Assembly). *Fuyu-to*.
 Third District.—Mr. Tanaka Shozo. *Kaishin-to*.
 Fourth District.—Mr. Shoda Okuzo (former Chairman of Prefectural Assembly). *Aikoku-to*.

GUMMA PREFECTURE.

First District.—Mr. Arai Go. Independent.
 Second District.—Mr. Takei Itei. Independent.
 Third District.—Mr. Nomura Toda (member of Prefectural Assembly). Independent.
 Fourth District.—Mr. Kigurashi Taketayu (Merchant). Independent.
 Fifth District.—Mr. Yuasa Jiro. *Kaishin-to*.

HYOGO PREFECTURE.

Second District.—Mr. Hori Zensho. Conservative Party.
 Third District.—Mr. Hoki Hatsu. *Aikoku-to*.
 Fourth District.—Mr. Ishida Kwannosuke (President of Prefectural Assembly). *Aikoku-to*.
 Fifth District.—Mr. Uwazumi Itsuji. *Kaishin-to*.
 Sixth District.—Mr. Takase Tojio (farmer). *Aikoku-to*.
 Seventh District.—Mr. Naito Rihachi (President of Assembly of Rural Districts). *Kaishin-to*.
 Eighth District.—Mr. Shibahara Masataro (farmer). *Aikoku-to*.
 Ninth District.—Mr. Sato Bunpei (farmer). *Kaishin-to*.
 Tenth District.—Mr. Sano Sumisaku. *Aikoku-to*.

TOYAMA PREFECTURE.

First District.—Mr. Sekino Zenjiro (merchant). *Kaishin-to*.
 Second District.—Mr. Tamura Koremasa (farmer). *Kaishin-to*.
 Third District.—Mr. Minami Isoichiro (Member of Prefectural Assembly). *Daido Party*.
 Fourth District.—Mr. Shimada Takayuki. *Kaishin-to*.

FUKUSHIMA PREFECTURE.

First District.—Mr. Sato Tadamochi. Independent.
 Second District.—Abei Hankon (Member of Prefectural Assembly). Independent.
 Third District.—Mr. Kono Hiroaka. *Daido Party*.
 Fourth District.—Mr. Yamaguchi Chiyoaku. *Aitsu Kyokai*.
 Sixth District.—Mr. Shirai Yenpei (Headman of Nishi-Shirakawa gun). Independent.

SHIGA PREFECTURE.

First District.—Mr. Sugima Choko. *Kokumin-ha*.
 Second District.—Mr. Yamazaki Tomokichi. Independent.
 Third District.—Mr. Daito Gitsuo (President of the Tokyo Fish and Poultry Company). Independent.
 Fourth District.—Mr. Soma Yei-in (Director of the Yokohama Specie Bank). Independent.

YAMAGUCHI PREFECTURE.

First District.—Mr. Yoshitomi Kanichi. *Fichi-to*.
 Second District.—Mr. Inouye Shoichi (Councillor of the Judicial Department). Independent.
 Third District.—Mr. Ooka Ikuo (barrister). *Fichi-to*.
 Fourth District.—Mr. Horiye Yoshisuke (a Senator). Conservative.
 Fifth District.—Mr. Kikkawa Tsutomu (agent of Baron Kikkawa, former chief of Iwakuni Clan).

KUMAMOTO PREFECTURE.

Second District.—Mr. Kinoshita Sukeyuki (farmer). Independent.

Fifth District.—Mr. Yamada Buho. *Kaishin-to*.
 Third District.—Mr. Furusho Kamon. *Kokken-to*.
 Fourth District.—Mr. Oka Jiroaro. *Kokken-to*.
 Sixth District.—Mr. Matsuyama Moriyoshi. *Kyushu Shimpō to*.

YAMAGATA PREFECTURE.

First District.—Mr. Miyagi Kozo (former councillor of Judicial Department). *Uyo-seigi-kwai*.
 Second District.—Mr. Igarashi Rikisuke (former President of Prefectural Assembly). Independent.
 Third District.—Mr. Toriumi Jun (Vice-president of Prefectural Assembly). *Daido Danketsu*.
 Fourth District.—Mr. Maruyama Taku (member of Prefectural Assembly). *Daido Party*.

AKITA PREFECTURE.

First District.—Mr. Okubo Tessaku (President of the Prefectural Assembly). Independent.
 Second District.—Mr. Narita Chokuyei. *Hoshu Chusei Party*.
 Third District.—Mr. Sato Toshiro. *Daido Party*.
 Fourth District.—Mr. Takeishi (member of Prefectural Assembly). *Daido Party*.

YAMANASHI PREFECTURE.

First District.—Mr. Yamaki Kuma (President of the Prefectural Assembly). Independent.
 Third District.—Mr. Furuya Senzo. *Daido party*.

NAGANO PREFECTURE.

First District.—Mr. Kozaka Zen-no-suke (banker). Radical.
 Second District.—Mr. Shimazu Tadasada (President of Prefectural Assembly). Radical.
 Third District.—Mr. Horinchi Kenro (member of Prefectural Assembly). *Daido Danketsu*.
 Fourth District.—Mr. Kozato Yoshinaka (Member of Local Assembly). *Daido Party*.
 Fifth District.—Mr. Minowa Kanaye (former Headman). Independent.
 Sixth District.—Mr. Nakamura Yaro (former dendrological official). Independent.
 Seventh District.—Mr. Ito Dailachi. *Daido Danketsu*.

FUKUI PREFECTURE.

First District.—Mr. Aoyama Shobeshi. *Aikoku-to*.
 Second District.—Mr. Sugita Teiichi (member of Prefectural Assembly). *Aikoku-to*.
 Third District.—Mr. Nagata Sadayemon (Vice-President of Prefectural Assembly). *Aikoku-to*.
 Fourth District.—Mr. Fujita Magobei. *Aikoku-to*.

KAGOSHIMA PREFECTURE.

First District.—Mr. Kabayama Sukeyoshi. *Doshikni-ha*.
 Second District.—Mr. Orita Kenchi (President of Prefectural Assembly). *Kyushu Shimpō to*.
 Third District.—Mr. Hasegawa Junko. Independent.
 Fourth District.—Mr. Utsunomiya Heiichi. *Kyushu Shimpō to*.
 Fifth District.—Mr. Kawashima Jun. *Kyushu Shimpō to*.
 Sixth District.—Mr. Gamo Sen. *Kyushu Shimpō to*.
 Seventh District.—Mr. Mizuma Yoshihane (farmer). *Doshikai*.

MIYAZAKI PREFECTURE.

First District.—Mr. Kawagoye Susumu. Independent.
 Second District.—Mr. Yasuda Yuitsu. Independent.
 Third District.—Mr. Miyake Masashige. Independent.

GIYU PREFECTURE.

Second District.—Mr. Shimizu Sanzo (farmer). Independent.
 Third District.—Mr. Yoshida Kohei (member of Prefectural Assembly). Independent.
 Fourth District.—Mr. Yano Saijiro (member of Prefectural Assembly). *Kaishin-to*.
 Fifth District.—Mr. Nagao Shiroyemon. Independent.
 Sixth District.—Mr. Hayashi Koichiro (farmer). *Aikoku-to*.
 Seventh District.—Mr. Nakamura Shinobu (President of a private school). Independent.

CHIBA PREFECTURE.

First District.—Mr. Chiba Teitaro. *Aikoku-to*.
 Second District.—Mr. Hamano Noboru. *Aikoku-to*.
 Third District.—Mr. Osuka Yonosuke (former chief of a rural district). Independent.
 Fourth District.—Mr. Iwasaki Shigejiro. *Kaishin-to*.
 Fifth District.—Mr. Itakura Chu (Attorney-at-Law). *Daido Party*.
 Sixth District.—Mr. Itakura Jushin. *Aikoku-to*.
 Seventh District.—Mr. Shigeki Tamotsu (former chief of a rural district). Independent.

Eighth District.—Mr. Yasuda Kun (farmer). *Kaishin-to*.

TOTTORI PREFECTURE.

First District.—Mr. Okazaki Heina. Radical.
Second District.—Mr. Yamase Yukito (Standing Committee of Prefectural Assembly). Independent.
Third District.—Mr. Matsunami Koga (Member of Tokyo City Assembly). Independent.

IWATE PREFECTURE.

First District.—Mr. Tanikawa Shochiu (Vice-President of Prefectural Assembly). *Aikoku-to*.
Second District.—Mr. Ito Keisuke (barrister). *Aikoku-to*.
Third District.—Mr. Sato Shozo (former Headman). Independent.
Fifth District.—Mr. Oye Taku. *Daido Danhatsu*.

KAGAWA PREFECTURE.

First District.—Mr. Nakano Buyei (merchant). *Kaishin-to*.
Second District.—Mr. Konishi Jin-no-suke (farmer). Radical.
Third District.—Mr. Ayai Bufu. *Daido party*.
Fourth District.—Mr. Misaki Kamenosuke (journalist). *Koin Club*.

CORRESPONDENCE.

THE RECENT FANCY FAIR.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—I desire to express the most cordial thanks of the Committee and my own to the Ladies' Working Party, and the many friends too numerous to mention by name, who so kindly contributed by gifts and work to the successful result of the recent Fancy Fair.

The share which fell to Christ Church was \$937.58, which with several donations specially given for the Church repairs made the sum available for the heavy expenditure incurred through the storms of last autumn nearly \$1,000.

I am, Sir, yours truly,

E. CHAMPNEYS IRWINE.

Yokohama, July 7th, 1890.

THE SILVER SITUATION.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—In discussing the silver situation the question is very pertinently pressed: what will be the immediate effect on the individual exporters of a return of silver to par with gold. Please permit a few lines on that point; for it certainly is an important point, and one that I hope may call out a wider and more thorough discussion through your columns. The dangers will lose half their force if properly appreciated and prepared for.

As I previously indicated, the final result cannot be permanently injurious to exports, for prices must necessarily adjust themselves to the new value of the silver dollar; and the result to the nation cannot be bad, for the price of imports must be cheapened as much as the price of exports. But if that means only that importers are to make fortunes while exporters are ruined, or if this adjustment of prices is an event of the very distant future, gradually accomplished, and in the mean time a whole generation of exporters are to be ruined or driven out of the country, the prospect is not so cheerful.

Two or three considerations may tend to relieve anxiety on this point. In the first place while it is true that a single individual because of his altered circumstances cannot therefore hire labourers or buy goods proportionately cheaper, yet when the same cause comes to affect the whole nation at once the effect will be very soon and noticeably felt. If one tea or silk producer alone found his products bringing less money he couldn't therefore hire his labourers any cheaper perhaps, for they could get employment elsewhere at the former rate. But if all the producers are in the same condition wages must go down immediately; and, as has often been observed, wages in other employments would also be affected to a greater or less extent. As a result the labourers have less money to buy goods with, and buying less the shopkeepers find themselves with a surplus on hand and trade dull, and the inevitable result is a decline in prices. Of course, it cannot be denied that there is hardship to be endured in such a case. It does not fall all on one class, however, but is divided up among many, and ceases entirely as soon as all classes and employments adjust themselves to the new state of things. All this will be true provided the rise of silver really lowers the price of exports as assumed. Of that I will speak farther on.

Again on the other side; if a quart of kerosene oil or a yard of cotton now exchanges for a given amount of beans or *daikon*, when the oil and cotton come to sell for twenty or thirty per cent. less, the beans and *daikon* also, though not to the same extent, will be affected in price more or less. In this case there is a gain shared by both merchant and customer, which will continue as before only till prices adjust themselves to the new basis, but at the same time, this will help to offset the hardship experienced in the former case. Now the annual volume of the export and import trade of Japan together amounts to something like one hundred and fifty million yen. It is safe to say that such a volume of business necessarily transacted on a new basis of value, and covering a large variety of goods used by all classes, cannot be long in producing its effect on prices in all other lines of business.

Another cause would tend to hasten the lowering of prices to correspond with the new value of our silver currency. If the result of a rise in silver is that imports are obtainable at 30 per cent. less cost, and exports do not bring by 30 per cent. their former value in our currency, the first result will be a great increase in the volume of imports and a corresponding decrease in exports. The result of that will simply be a

large amount of our currency sent abroad. A reduction of the amount of currency in the country of course must result in a decline in prices.

So much, then, for the theoretical view of the case; when we turn to a more practical and particular investigation we find several facts that are still more reassuring. Looking over the customs report for 1887 I see that out of \$52,000,000 exports \$8,000,000 was tea and \$22,000,000 was silk. The other items upwards of a million were: rice \$2,000,000, porcelain \$1,300,000, lacquer, &c., \$700,000, cattle-fish \$1,000,000, ships' coal \$2,000,000, matches (to China) \$1,000,000, silk handkerchiefs \$1,000,000, camphor \$1,000,000, copper \$2,000,000, a total of \$42,000,000, but of this, as you will see, all but three or four million are things chiefly or entirely produced by Japan and other silver using countries which would be affected precisely the same as Japan by the rise of silver. Now it must be borne in mind that the seller has something to do with fixing prices as well as the buyer. The tea producer or merchant of India, China, or Japan takes one hundred pounds of tea to the export market and gets fifteen gold dollars for it, which he turns into twenty silver dollars or its equivalent of his own currency, and has enough to pay all his expenses and a moderate profit remaining. But silver advances and next time he offers his hundred pounds of tea he is offered fifteen gold dollars as before, but he finds that he can only exchange those fifteen gold dollars for fifteen silver dollars which would not be enough to pay his expenses without any profit. What shall he do? Shall he go into bankruptcy and quit the business? If he understands the situation he will do nothing of the kind. He can't sell his tea for fifteen silver dollars, and there are no other tea producers anywhere that can afford to sell for that either. So the foreign market has to pay twenty silver dollars as before. That the twenty silver dollars represent twenty gold dollars instead of fifteen is their concern, instead of the Japanese tea producer's. Very probably there would be more or less of concession on the part of sellers and prices, perhaps but not at all in proportion to the rise in silver, and such as to cause any hardship, provided the Japan merchants fully and generally understand the state of the case. Looking over the tea and silk quotations in the old files of the *Mail*, from ten or fifteen years ago, when silver was nearly at par, down to the time when it was at its lowest, there does not appear anything like a corresponding rise in the prices of these exports. There are fluctuations from month to month naturally, but the average prices (silver) at the lowest rate of silver are as low if not lower than at the highest rate, showing that the prices of these staples are not determined by the gold using consumer but by the silver using producer.

So then we have seen:—

1st.—That whatever hardships there are would not fall on a few merchants alone, but would be divided up among a great many classes.

2nd.—There will be a compensating gain from imports, shared more or less by all classes.

3rd.—The large volume of export and import trade will not be long in producing its effect on prices of all kinds of goods.

4th.—This could be accelerated by a scarcity of money resulting from an excess of imports over exports.

5th.—As for Japan, the great bulk of her exports are articles whose price is governed by silver, not by gold, therefore there would be no great change in the price of our exports in silver dollars, however much those silver dollars change in value.

Yours respectfully, D. A. MURRAY.
Kyoto Commercial School.
Kyoto, July 3rd, 1890.

ELECTION ECHOES FROM IBARAKI.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—The election in this city passed off in a very quiet and orderly manner. The polling-place was in the second story (as yet unused) of the Jinjo Shogakko, about the centre of the upper town of Mito. I passed by the place about ten o'clock in the morning; and, except for the presence of two policemen, I should not have known that anything special was going on there. Early in the morning it rained; but cleared off before noon. On account, perhaps, of the fact that the number of electors was very small, there was no great excitement.

The country districts of this province have now about all reported. There seems to have been considerable interest manifested; but no violence or even slight disturbance has been reported. Ibaraki has stood the test admirably.

In this city, out of 112 voters on the corrected

poll list, only 10 failed to appear. In the rural localities of this district there were 2,570 registered electors, of whom only about 120 did not cast a vote. Or, to make the comparison clearer, in the city of Mito about 91 per cent. of the voters appeared; while in the rural parts of the district more than 95 per cent. presented themselves.

In the city of Mito only 7 voters out of the 102 requested a clerk to write their ballots for them. These, moreover, did so, not because they were unable to write themselves, but, because, being unaccustomed to voting, they feared they might make some technical error, which would render the ballot void. It may, therefore, be said, that there is no illiterate voter in Mito.

In the Second District Mr. Sho Nemoto failed to obtain election. It is, however, acknowledged on all sides that his canvass was strictly honest.

The following schedule gives the results in all the districts of Ibaraki ken:—

First District.	
Mr. Watanabe Osamu, editor	978
Mr. Matsunobe Gen, ex-official	919
Mr. Nogami Kyabei	577
Mr. Kato Shigenosuke	530
Mr. Sekido Kakuzo	478
Mr. Seki Shinnosuke	348

There was large number of scattering votes. Messrs. Watanabe and Matsunobe, who are elected, were independent candidates, although the former is thought to incline towards the *Fichi-to*. Both are *shizoku*.

Second District.	
Mr. Tachikawa Ko, merchant	1,031
Mr. Otsu Junichiro, ex-official	876
Mr. Nemoto Shu	877
Mr. Noguchi Shoichi	650

The remainder were scattering. Messrs. Tachikawa and Otsu are both *heimin*. The former is probably an adherent of the *Aikoku-to*; the latter is independent.

Third District.	
Mr. Iimura Jozaburo, banker	1,149
Mr. Hamana Shimpel	1,038
Mr. Semba Hyogo	545

In this district the contest was a peculiar one, as the two leading candidates were both members of the *Fiji-to*; Mr. Iimura is a *heimin*.

Fourth District.	
Mr. Mori Ryusuke	621
Mr. Akamatsu Shinemon	600
Mr. Kanno Yoshinosuke	508

Mr. Mori is a member of the *Fiji-to*, and a *heimin*.

Fifth District.	
Mr. Irokawa Saburobei, merchant	—

I have no figures, and no other names. Mr. Irokawa is a *heimin*, and inclines towards the *Kaishin-to*.

Sixth District.	
Mr. Sekiguchi Hachibei, merchant	771
Mr. Yoshida Kuranosuke	727
Mr. Saito Kai	589

There were many scattering votes. Mr. Sekiguchi is a *heimin*, and inclines towards the *Kaishin-to*.

Among all the candidates two, at least, are Christians; Mr. Nogami, of the First District, and Mr. Nemoto, of the Second District. Both were defeated, but probably not on account of their connection with "the despised faith." In this province the prejudice against Christianity is very strong, but does not, perhaps, extend into political affairs. It is to be hoped that religion may not become mixed with politics in Japan, except so far as individual and national righteousness will purify politics.

Mito, July 5th.

CLEM.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—In my note of the 5th inst., I was unable to give the figures for the Fifth District of this Ken. The full returns are now in, and show a very close triangular contest, as follows:—

Mr. Irokawa Saburobei	796
Mr. Okubo Kanzo	791
Mr. Kaneko Gembel	775

There were a large number of scattering votes. In my former note I was in error in calling Mr. Tachikawa, elected in the Second District, a *heimin*, as he is a *shizoku*. He is also now a member of the Ibaraki Assembly.

Accusations of bribery are flying about freely against almost all the successful candidates; but no legal action has yet been instituted against anyone.

Mito, July 7th.

CLEM.

THE TWO GREAT LIGHTS.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—It must have been an irony of fate rather than a pre-conceived thought on the part of Sir Edwin Arnold that he should have given birth to

his justly celebrated great Buddhist epic in a Christian land, and have conceived and matured his coming Christian epic—to which at present we are not warranted to apply the adjective great—in a Buddhist country, as Japan *par excellence* is the land of Buddhism. Which of Sir Edwin's two "lights" will be the greater from a literary standpoint, we shall know in the very near future. The truth is that all similar great mental productions will be judged hereafter by a literary standard and not a theological one. Humanity has outgrown—let us hope—its state of mental dotage, in which one person of some prominence could steer the masses according to his own pleasure.

It is more than five years now since I for the first, and in all probability for the last, time, read Sir Edwin Arnold's "Light of Asia," and I am sorry to say that I never met the dimmest ray of light through the whole book, except on its title-page.

Here is the climax of the whole poem:—

"Many a house of life
Hath held me—seeking ever him who wrought
These prisons of the Senses,
Sorrow-fraught,
Sore was my ceaseless strife!
But now,
Thou builder of this tabernacle—thou!
I know thee! Never shalt thou build again
These walls of pain.
Nor raise the roof-tree of deities, nor lay
Fresh rafters on the clay.
Broken thy home is, and the ridge-pole split!
Delusion fashioned it!
Safe pass I thence—Deliverance to obtain."

Who can detect the slightest "light" and hope in such pessimistic, melancholic stuff. Buddhism is the religion of darkness, of pessimism, and of dissatisfaction with life and the whole mundane existence. The sentiments in the above quotation amply characterize its mortal struggle, and such sentiments I would rather expect from the pen of Schopenhauer than from that of Sir Edwin. But the greatest error of Buddhism is its starting from some misunderstood metaphysical abstractions. It is a religion of laziness and mysticism, in which personalities are turned from realities into shadows, finally being absorbed into the unknown and unconscious Nirvana. Its self-abnegation in order to reach this much desired *sum-mum bonum* is very different from the Christian altruism and self-sacrifice. In Christianity we perceive everything in its normal state. We have a full grasp of the individualities with which we come in contact in its whole economy. "God so loved the world, that he gave his only begotten Son, that whosoever believeth in him should not perish, but have everlasting life." Here clearly we can see the motive of God, the mission of Christ, and the state of men. This great contrast is never more explicit than in compassing the earthly life of the two Masters. When Gautama saw the misery, wretchedness, and sin of mankind he left his palace and prospective throne and fled into the mountains; while Christ left his heavenly throne and plunged into the depth of human depravity to save our race from that state. I am not concerned here with the historical authenticity of both these episodes; that belongs to another province of criticism, but I am attempting to show that Christ is a grander ideal than Buddha for humanity to follow. In history there have been many personages who voluntarily underwent more intense grades of self-renunciation and mortification than Buddha, but none displays such an infinity of love, duty, and sympathy as Jesus.

Buddhism is not only abstractly a religion of darkness and despondency, but practically also its influence has never been beneficial to the countries which have adopted it. It was driven out of its own land of birth. I am aware that some European authors, carried away by the enthusiasm of their own imagination, have claimed that its spirit has permeated Hindoosm; to such statements, however, I refuse to give any credence. India always has been and still is governed by the religion of the Vedas, as perfected by the "Laws of Manu" and not by Buddhism.

In China, while universally it has been acknowledged, still its influence has been far inferior to Confucianism, which is the sole governing factor of Chinese social life. The Chinaman has too much practical common-sense to sacrifice his poik for Nirvana. In Japan, however, Buddhism can be fully and impartially judged. When the religion of Shaka was introduced into Japan the Japanese were far advanced in civilization and culture. Now let me ask, what has Buddhism done for Japan in these 20 centuries? Almost nothing. It has displaced man from his high rank, and almost placed him lower than the beast. It has never ameliorated the moral types of the race. It has almost paralyzed the intelligent faculties of a race whom God has endowed abundantly with every natural gift. In my extensive travels I have never met a religion which has such a tendency upon its votaries as Buddhism. It has destroyed the civilizations of the East, and its influence has

dominated. It has attempted to strike at the very root of human existence. The application of the name "Light of Asia" would be more appropriate if given to Manichæism, which next to Christianity has produced most good in its own sphere. Notwithstanding its being the most wretched counterfeit of Judaism and Christianity, still the impetus of self-development and progress which it has given to Oriental countries surpasses that of Buddhism. It infused new and higher ideals into the savage tribes of its natal land. It raised the Bedawin from his savage state to be the direct parent of Scholasticism. Even to-day it possesses more vitality and its votaries are more aggressive than those under the thralldom of the mystic of the Ganges. My idea here is not to praise or defend the religion of Islam, but to prove that Sir Edwin Arnold in calling Buddhism the "Light of Asia" has proved himself an incompetent judge of the science of comparative religions, and an untrustworthy student of history.

Let me not be misunderstood. I do not mean to say that there is nothing noble, pure, and high in Buddhism. Those who have read early Buddhist literature are well aware of the abundance of moral maxims which are unsurpassable anywhere, but what I want to convey to the reader is that the virtues inculcated in those maxims and precepts are not for the elevation and the improvement of the self, but for its final destruction. By the exercise of virtue it attempts to destroy humanity rather than exalt it, as is the aim of all other religions.

Since the nativity of Christianity many attempts have been made to graft some principle of the Oriental religions upon it, but in every case the attempt has proved a failure. Gnosticism started from similar *a priori* abstractions; and later on Manichæism attempted, with momentary success,* to blend the Indo-Iranian religions into Christianity; and I venture to predict that a nineteenth century Manichæism also would not be more successful than his third century prototype. In philosophy often—I should say always—a judicious eclecticism is allowable, and should be recommended and encouraged; but any kind of syncretism in religion cannot bring forth good fruits. Religion is like a living organism, the slightest attempt at amputation is liable to bleed the body to death.

In my opinion Buddhism will never be a great factor in the coming civilization. When its novelty in Europe is worn out, and the crazy reaction against Christianity has subsided and calmed down, it will pass away into the realm of the effete cults which have served the human race.

Notwithstanding all this, still we are far richer when such a classic piece of literature is the "Light of Asia," is added to the treasury of our knowledge. In this case also, as in all similar cases, we admire and almost worship the genius of the author, while we cast a pitiful smile upon his doctrines and formulas. Is not the same true of Dante's great "Comedy"—scholasticism run mad? But who will not bow his knee before the poet, though he cannot agree with him on the existence of a purgatory or a physical hell? Have not Shakespeare's fools always told us wiser truths than our 19th century philosophers and wise men? The same is true also of Sir Edwin Arnold's "Light of Asia;" forever it will stand as a gigantic monument of human ingenuity, to show how men can call and prove that darkness is light!

Truly yours, ISAAC DOOMAN,
Nara Eiwa-Gakko.

THE FOURTH OF JULY.

The Fourth of July was duly celebrated on Friday by citizens of the Republic resident in Japan. All American places of business, and most of those of other nationalities were closed, and the streets of the Settlement were gay with flags, the stars and stripes also waving above many a bluff residence. At noon a salute was fired by the men-of-war in port, which were dressed with bunting, and by the Kanagawa Fort.

At three p.m. commemoration exercises were held in Van Schaick's Hall, No. 178 Bluff, which were attended by a large audience, and proved most interesting. Mr. C. R. Greathouse, U.S. Consul-General, occupied the chair, and the proceedings were opened with prayer by Rev. Mr. Booth. The audience then joined in singing the song "Columbia the Gem of the Ocean," after which Mrs. Rice, with rare feeling and force, recited "Drake's Address to the American Flag." The Japanese National Anthem, sung by pupils of

Ferris' Seminary, was followed by a reading by Mr. J. K. Goodrich,—Longfellow's "Building of the Ship,"—after which the audience sang "The Star Spangled Banner" and Miss Trench recited the patriotic piece "My Country—America." A Japanese chorus set to the music of "Hail Columbia" was sung by the Ferris Seminary pupils; an address by Dr. Thwing came next, and the audience joined in the national hymn "America."

The CHAIRMAN announced that a display of fireworks would take place in the bay in the evening, and invited all to witness the spectacle.

Rev. Mr. BALLAGH, having obtained permission to address the meeting, spoke briefly, expressing the hope that in future the Fourth would be properly observed, for even though an orator could not be obtained there was enough musical and other talent to make its commemoration a success.

Dr. Thwing in the course of his oration remarked:—Standing under these midsummer skies of Japan, protected by Imperial power, the noble symbol of which, bound to our own loved flag, has our profound respect and cordial recognition—we, citizens of the American Republic, commemorate this 174th anniversary of its birth, joining in gratitude to God and in common congratulations with each other and these other representatives here present of many lands and languages. It is a day of jubilant memories and of bright anticipations. But there is a delusive optimism which shuts one's eyes to peril. Our country is large, rich and powerful. It has abounding wealth and increasing population, but these may only accelerate its moral decay and final overthrow if the sordid, selfish and unheroic elements of life dominate our legislation and social relations, at home and with foreign nations. We on these distant shores can form a juster estimate of these relations than those at home. We can better appreciate the need of a national policy at once firm, dignified and in keeping with our status among the nations and also considerate, conciliatory and generous to all. It is well for us to-day not to indulge in cheap and frothy declamation, in pride and self conceit, but look at some ethical and historic principles involved in the true heroic idea of national life. There is an increasing number of eager and ardent souls in this empire who are fired with enthusiasm to revive what they call "the old heroic ideas." Let us ask ourselves: what is a hero? What makes an age a heroic age? Perhaps our friends who are studying this problem of history may hear our answer. Heroes and hero worship have formed the romance of history in all ages. They have made our cities monumental and the calendar of the year rich in holidays and holidays. We assume the fact that national character is the aggregation of individual characters. The test of each, the standard of both, is the same. If personal living is grand, national life is heroic. The vital element of true heroism is the vicarious or sacrificial. As self-abnegation grows hearty and intelligent, the hero grows tall, colossal. The Master's words give the key: "Whosoever will be chief among you, let him be your servant, even as the Son of Man came not to be ministered unto, but to minister and to give his life a ransom for many." Prehistoric ages abound with legendary beings called heroes. Cunning and brutal hardihood entered into the conception of greatness. The age of military renown added nobler elements. Simonides wrote of Leonidas and his brave three hundred at Thermopylae and of those who fell at Plataea and Marathon; Pericles eulogised the dead of the Samian and Peloponnesian wars. From Homer and Virgil to Dante and Milton, by poetry and oratory, painting and festival the name and fame of the illustrious dead have been handed down in the reverent memory of man:—

"While sculpture in her turn gives bond to stone
And error during brass, to guard them
And immortalise her trust."

Phidias and Praxiteles made Grecian cities monumental. On the banks of the Nile and Tigris faces of sages and heroes older than Moses shone; that of Demosthenes in bronze for twenty centuries looked down on the blue waves of the Saronicus that washed the shores of his beloved Attica. The trophies of the Caramanics have made that port of Athens a *viâ sacra* to every thoughtful visitor in Greece. But paganism, said Dr. Thwing, could not furnish the highest type of hero. He then sketched the character of the New England Pilgrims, reviewed the features of later American history, and instanced Lincoln and Garfield as illustrious examples of lofty heroes and patriots. He then passed to the practical question: how may the heroic element be fostered? Memorial days are helpful. Attention is thus drawn to the epochs of history and the lives that adorn them. Art emblazons their names and features in monuments, medals, busts or paintings, unending eulogies, immortal preachers. The songs of a nation are as potent as her laws. Literature plays a part. The author, the editor, and teacher mould national life. Language is to be purified from those perilous euphemisms which conceal a sordid, venal and voluptuous age. Effeminate thought and torpor of conscience are to be rebuked. Domestic culture, above all, has to do with making true heroes. Children are not to be coddled, pampered and waited upon, but trained to self-reliance, to be obedient, abstinent, content, anxious more to know their duties than their rights. The school and college should continue this discipline, then the brutal outrages which have almost simultaneously disgraced institutions on both sides the Pacific will not be thought of, but stigmatized as relics of a barbarism that has no countenance among civilized races. Here is the value of historic studies. Mr. Konakamura of the Historical Society at the Imperial University, Tokyo, lamented "the universal indifference of modern students to Japan's past history as tending to undermine patriotism and endanger the country's independence." In closing, Dr. Thwing paid a tribute to the work done in Japan by Ferris Seminary and kindred institutions, for the youth of this land, and expressed the hope that the observance of this national festival all over the globe by the scattered sons of Columbia would tend to cement the bonds of international amity and of universal peace.

In the evening a capital display of fireworks was witnessed by large crowds, the Bund being indeed thronged from nine o'clock to midnight. Many of the set pieces were surpassingly beautiful, the representation of the Falls of Niagara being specially artistic. Rain threatened to fall in the early part of the evening, but fortunately kept off, though the atmosphere was thick and misty.

SAILING RACE.

The sailing race for 17 raters of the Sailing Club fleet which gave rise to some misunderstanding on a previous occasion, was re-sailed same day. The boats started at two o'clock, four crossing the line: *La Belle*, *Violet*, *Queenie*, and *Sayonara*. The wind was about northerly necessitating a beat to the Green Lightship, in which *La Belle*, having stood out to the eastward too far, lost some ground. *Sayonara* was first round this mark, *La Belle* next, *Queenie* and *Violet* following in that order. No change took place to the Kanagawa Mark mark, *La Belle*, however, getting ahead on the reach home and crossing first, but having to give the first place to *Sayonara* on time allowance, though only losing by about 30 secs. The other boats gave up. Professor West acted as officer of the day.

A CLERICAL VIEW OF PONTIUS PILATE.

Additional interest was imparted to the sermon delivered on Sunday morning at the Union Church by reason of the recent glimpse afforded the public of Yokohama and Tokyo of Sir Edwin Arnold's new poem, "The Light of the World." The vital question, "What shall I do then with Jesus who is called Christ?" which the Rev. Dr. Nevius chose for the title of his discourse, received treatment which it will be interesting to compare with the distinguished poet's handling of that portion of his subject relating to Pilate. We regret that space will not allow us to give more than an epitome of the discourse. Remark that in these words of the Roman Procurator there exist three distinct features: a conceded fact, Jesus; a contested claim, Jesus who is called Christ; and a question which cannot be evaded, pressing for immediate decision. Dr. Nevius referred to the common contention "that religion treating as it does of things unseen and spiritual," cannot be a system of positive truth and knowledge. "It is insisted that truth can only be ascertained by a careful study of phenomena cognizable by the senses, and capable of being proved beyond the possibility of a doubt. Christianity, which treats of the soul, a future state, and the relations between God and man, is relegated to the region of the unknown and the unknowable." But it must be remembered, Dr. Nevius urged, that the basis of Christianity is Jesus; and that Jesus is a fact of history. The great importance alike for the strengthening of the believer's faith and for the purpose of answering objectors, of insisting on the historical evidence of Christianity, was alluded to, and the relief expressed "that it was to emphasize these evidences rather than to put a stigma upon Pilate's character, that we have in the 'Apostles Creed,' 'suffered under Pontius Pilate.'" We leave untouched much relating to the claim Christ advanced to the Messiahship, though the clear setting of the word "Christos," with all that it meant to the Jews,—anointed, authorised, and appointed of God—and the implied hostility that calmly

* The Sect of the Manichæans is still extant in some parts of Persia, though in such a corrupt state that it has almost lost its original purity and ideal.

asserted claim evoked, certainly merit quotation, as does the passage wherein the salient features of Christ's life are advanced in attestation of the legality of the extraordinary right and prerogative he asserted. Dr. Nevius contended that "those who deny that Jesus was what he claimed to be, or in other words, who reject the scriptural theory of Christ's life, are bound to present to the world another consistent theory to account for what he was, what he did, and what his religion has done, and is still doing." As Dr. Nevius stated, such a theory has rarely been attempted, and it may certainly be said that no consistent theory exists. Observing that probably the intense individuality which marks the sacred narrative is intended in itself to be significant, Dr. Nevius passed on to speak of the trial before Pilate and of the perplexities and duplicity for which the Roman Procurator has been oft-times condemned but which are but the type of what mankind at large has evinced. "The trial of Jesus before Pilate was in a deeper and more awful sense, Pilate's trial before Jesus." "Pilate's decision of the case seems to have been unhesitating and unchanging." Nothing is said of his calling witnesses or comparing and weighing testimony. "From what he had probably heard before; from what he saw in the bearing and spirit of the accused and his accusers; and from the few answers Christ gave to his questions, he came at once to the conclusion, from which he never receded, 'I find no fault in this man.'" Dr. Nevius said, "Christ is the Light of the World; and when he and his truth are presented they carry with them their own evidence. It needs no lengthened process of reasoning to prove that light is light. He who created alike the sun and the human eye, is author of the mutual adaptations between the human eye and the sun-light. So between the human soul and Christ and his truth there are such mutual relations and adaptations that the soul to a greater or less degree, according as its moral state is normal and healthy, perceives at once that Jesus is the Way, the Truth, and the Life. Pilate wavered as to what he should do with Christ; never as to what he should think of Christ." Pilate's struggle was one—the world-old one "between duty and interest, conscience and a sinful nature." Teaching Christ's declaration that he came not to send peace on earth, but a sword, Dr. Nevius stated that "the effect of Christianity is not only to set men at war with one another, but each man at war with himself." Pilate's position was powerfully sketched; on the one hand lengthened tenure of high office and promotion, on the other sacrifice of cherished hopes and ambitions, charges of complicity with sedition and rebellion, and espousal of the cause of one who he saw was no mere Jewish fanatic but a character as Divine as humane. "Taking a stand for Christ meant then, as it must always mean, self-renunciation;" and Pilate fell. His struggles to evade the responsibility of adjudging, his attempts at a compromise, his desperate effort to clear himself of guilt portrayed by the public washing of his hands, and the avowal of his innocence "of the blood of this just person" were likened to our own endeavours to shift the burden and accountability upon the Church, or upon parents from whom peculiar religious bias has been inherited, or upon religious teachers and guides; to the efforts of those who would fain follow both Christ and the world; and to those whose constant refuge is their inability to contend against the force of habit or circumstance, or the exigencies of business. The question is to every one personally, Dr. Nevius urged; no less to men of to-day than to Pilate. The reverend gentleman drew attention to the danger of supposing that Pilate was the only one to whom the question came and who had to bear the responsibility of answering it; and his statement that "the manner in which it was met by different classes epitomized and foreshadowed the manner in which it has been met by different classes ever since," was only less striking and interesting than the subsequent passages in which the illustrations were given of which we give the following:— "The Jews who clamoured for Christ's death were the children of Abraham, the professed worshippers of Jehovah, but in fact his most bitter enemies. Christ has received his severest wounds in the house of his friends. History teaches us that it is very easy and not uncommon for men to think they are serving God, when they are most especially serving Satan, and the greatest crimes have been committed in the sacred name of religion. The Pharisees were the ritualists and formalists of their day, scrupulous in the observance of externals; teaching for doctrines the commandments of men; drawing nigh to God with their lips while their hearts were far from him. They were the bitterest enemies of Christ and the principal source of weakness and corruption in his Church. They

have had their successors in every age, and they are to be found in every branch of the Church at the present day. The Sadducees affected the current philosophy or culture of the day, which was Grecian. They preferred to walk by sight rather than by faith, however imperfect their sight might be, or rather to follow with unquestioning faith human teachers and adopt human hypotheses, rather than trust to Divine guidance. The would-be-scientific Sadducees were never more numerous than at present. These two sects represent the most dangerous tendencies of the human mind towards formalism on the one hand and infidelity on the other. The solemn warning of our Saviour is applicable in every age and especially in ours—'Beware of the leaven of the Pharisees and Sadducees.'" The discourse which was listened to throughout with deep attention, closed with a short reference to that other type, the type represented by the few who were neither ashamed nor afraid to be at the foot of the Cross; and to the supreme import of the question, the question of life. Dr. Nevius said, "Christ stands before you as he stood before Pilate, silent. He has nothing more to say. His claims and their evidences are before you and before the world. I beseech you reject them not."

IMPERIAL UNIVERSITY.

GRADUATION CEREMONY.

The graduation ceremony of the Imperial University took place on Thursday forenoon in the Central Court of the Engineering College at Hongo, Tokyo. Among those present on the occasion were the Minister of State for Education; Mr. Tsuji, Vice-Minister for Education; Mr. Marjima, Vice-Minister for Communications; the Chinese Minister; Mr. Hamano, Director of the Bureau of Special School Affairs in the Educational Department, and the Faculty of the University.

The proceedings began shortly after ten o'clock with the presentation of diplomas to the graduates, after which Mr. Kato, President of the University, delivered a short address, which will be published at a later date. One of the students read a reply to the remarks of the President, after which Mr. Yoshikawa addressed the students at some length in a speech which will also be published in a future issue. An address was to have been given by the Minister President, but Count Yamagata found it impossible to attend. After the ceremony the guests were entertained by the Faculty of the University.

The following is the graduation list:—

COLLEGE OF LAW.

FIRST LAW SECTION.

Hara Kanetaro, shizoku, Nagano prefecture.
Shibata Kamon, shizoku, Yamaguchi prefecture.
Owaka Kikujiro, heimin, Chiba prefecture.
Oyama On, heimin, Aichi prefecture.
Akiyama Ganosuke, heimin, Okayama prefecture.
Akiyama Sadanosuke, shizoku, Hiroshima prefecture.
Nakagawa Katsusuke, shizoku, Hiroshima prefecture.
Ishii Hikokichi, shizoku, Kagoshima prefecture.
Nakaya Kokichi, heimin, Kyoto.
Shimada Kotaro, shizoku, Fukui prefecture.
Takenouchi Kumaji, heimin, Tottori prefecture.
Yamada Shinichiro, heimin, Fukuoka prefecture.
Nakata Kinkichi, shizoku, Akita prefecture.
Rajita Torariki, shizoku, Tokyo.
Kisuge Kokichi, heimin, Hyogo prefecture.
Hotta Umazo, shizoku, Yamaguchi prefecture.
Seisawa Kotaro, shizoku, Yamagata prefecture.
Okasaki Masaya, heimin, Miye prefecture.
Otori Fujitaro, shizoku, Tokyo.
Okuma Yonetaro, shizoku, Tokyo.
Miyake Chosaku, heimin, Aichi prefecture.
Tomishima Chobu, heimin, Hiroshima prefecture.
Hirose Kichiro, shizoku, Aichi prefecture.
Urushibata Harukichi, heimin, Shizuoka prefecture.
Kano Tetsusaburo, shizoku, Oita prefecture.
Kawase Hikosuke, heimin, Gifu prefecture.
Nagai Tamaki, shizoku, Fukuoka prefecture.
Yoneda Toshinori, shizoku, Shizuoka prefecture.
Ushioda Hoze, shizoku, Shizuoka prefecture.
Tsunenatsu Eitichi, shizoku, Gifu prefecture.
Hayashi Masajiro, heimin, Miye prefecture.

SECOND LAW SECTION.

Ota Suketoki, heimin, Tokyo.
Miyashita Michisaburo, heimin, Tokyo.
Motohashi Kikichi, heimin, Tokyo.
Matsumoto Keijiro, shizoku, Yamagata prefecture.
Yasuda Kyusaburo, heimin, Tokyo.

THIRD LAW SECTION.

Yukawa Kankichi, shizoku, Wakayama prefecture.
Isobe Masaharu, shizoku, Yamaguchi prefecture.
Iino Kinichi, shizoku, Shizuoka prefecture.
Amano Kinoshige, shizoku, Tokyo.
Morita Mokichi, heimin, Hyogo prefecture.
Nagashima Washitaro, shizoku, Tokyo.
Otsu Rinhei, shizoku, Osaka.
Hattori Kinzo, shizoku, Aichi prefecture.
Hashitsune Kinsaburo, shizoku, Tokyo.
Hata Ryotaro, heimin, Nagano prefecture.
Oko Hatsuchiro, shizoku, Yamaguchi prefecture.
Yasumura Nagayoshi, shizoku, Kochi prefecture.
Otsuki Ryoji, shizoku, Miyagi prefecture.
Masuda Hyokichi, shizoku, Gifu prefecture.
Okane Hikoichi, shizoku, Fukuoka prefecture.
Mochida Kasaburo, shizoku, Ishikawa prefecture.
Ishikawa Kei, heimin, Kagawa prefecture.
Iwamura Shigeru, heimin, Miye prefecture.

POLITICAL SECTION.

Ishidzuka Eigo, shizoku, Fukuoka prefecture.
Tsukuda Katsuyo, shizoku, Ehime prefecture.
Yanagitani Usaburo, heimin, Nagasaki prefecture.
Inouye Tatsukuro, shizoku, Shizuoka prefecture.
Taniguchi Tomogoro, shizoku, Osaka.
Tokatsugi Takejio, shizoku, Kagoshima prefecture.
Yoshii Yukei, shizoku, Kagoshima prefecture.
Hashimoto Keisaburo, shizoku, Niigata prefecture.
Hirasawa Masahachiro, shizoku, Hiroshima prefecture.
Horiye Koichiro, shizoku, Tokyo.
Sakurai Tetsutaro, shizoku, Shizuoka prefecture.
Kimura Kusuyata, shizoku, Kochi prefecture.
Kubo Isamu, shizoku, Kagoshima prefecture.
Sawaki Aibun, shizoku, Tokyo.
Nomura Yasaburo, heimin, Tokyo.
Momoya Ryusuke, shizoku, Kyoto.
Banoo Otaya, shizoku, Shizuoka prefecture.
Fudo Kotaro, shizoku, Fukuoka prefecture.
Yamanouchi Katsuji, shizoku, Kagoshima prefecture.
Matsu Idetaro, heimin, Kyoto.
Soga Sukeyasu, shizoku, Fukuoka prefecture.
Shirai Takeshi, shizoku, Fukuoka prefecture.
Takatsuki Junnosuke, shizoku, Miye prefecture.
Yamasaki Ginosuke, shizoku, Shimane prefecture.
Sudzuoki Kurajiro, heimin, Aichi prefecture.
Suwa Mankichi, shizoku, Fukuoka prefecture.
Nishisawa Masataro, heimin, Nagano prefecture.
Takisawa Seiryō, heimin, Tokyo.

COLLEGE OF MEDICINE.

Ito Junzo, shizoku, Tottori prefecture.
Tsubei Hayami, heimin, Gifu prefecture.
Okada Waichiro, heimin, Ehime prefecture.
Takata Koan, heimin, Kyoto.
Wakasugi Kisaburo, heimin, Niigata prefecture.
Hirai Ryutaro, heimin, Miye prefecture.
Tsuboi Yaoki, shizoku, Miye prefecture.
Tsurada Teijiro, shizoku, Saga prefecture.
Taniguchi Nagao, shizoku, Ehime prefecture.
Sudzuoki Tamekichi, heimin, Tokyo.
Marushige Bunryo, heimin, Yamaguchi prefecture.
Mishima Tsuryo, heimin, Tokyo.
Shimohira Yosui, heimin, Miye prefecture.
Yoshimura Gentaro, heimin, Shizuoka prefecture.
Sekiba Fujihiko, shizoku, Aomori prefecture.
Toda Seimen, shizoku, Fukuoka prefecture.
Miyashina Manji, heimin, Kanagawa prefecture.
Ochiai Kenryo, shizoku, Yamaguchi prefecture.
Umino Shinzo, heimin, Osaka.
Watanabe Kyoze, heimin, Miyagi prefecture.
Funakura Einosuke, shizoku, Fukuoka prefecture.
Kitamura Seizo, shizoku, Tokyo.
Abe Chogoro, heimin, Okayama prefecture.
Watsuji Haruji, heimin, Hyogo prefecture.
Takashima Kichisaburo, heimin, Ishikawa prefecture.
Hayashi Karei, shizoku, Ehime prefecture.
Itsumi Bankuro, heimin, Toyama prefecture.
Adzuma Keiji, shizoku, Akita prefecture.
Omura Hidesaburo, heimin, Shiga prefecture.
Midzuno Gin, heimin, Shizuoka prefecture.
Nakanura Momojiro, heimin, Gifu prefecture.
Shirayae Kikusaburo, heimin, Nagasaki prefecture.
Kunitomo Hidesaburo, heimin, Tokyo.
Sawabe Yasuo, shizoku, Tokyo.

Yamamoto Shin, heimin, Miye prefecture.
Kondo Setsuzo, heimin, Tottori prefecture.
Inouye Tsutuzo, heimin, Hyogo prefecture.
Gyotoku Rin, shizoku, Fukuoka prefecture.
Yoshinaga Hid-zo, heimin, Fukuoka prefecture.
Yamaguchi Torataro, shizoku, Tokyo.
Higuchi Shigitaro, shizoku, Shiga prefecture.
Watanabe Tai, heimin, Niigata prefecture.
Tamura Teisaku, heimin, Miyagi prefecture.
Hirose Han, shizoku, Miye prefecture.
Murayama Chonosuke, shizoku, Tokyo.
Aikawa Ginjiro, shizoku, Hiroshima prefecture.
Furuya Tsunejiro, shizoku, Ishikawa prefecture.
Ikeguchi Keizo, heimin, Hyogo prefecture.
Hiirayama Matsuji, shizoku, Tokyo.

COLLEGE OF ENGINEERING.

SECTION OF ENGINEERING.

Kimura Masaichiro, heimin, Hyogo prefecture.
Okada Takegoro, shizoku, Hyogo prefecture.
Ichinose Kyojiro, shizoku, Hyogo prefecture.
Miyake Jiro, shizoku, Tokyo.
Takigawa Koji, shizoku, Ibaraki prefecture.
Mizokoshi Motokichiro, shizoku, Nagasaki prefecture.
Ishikawa Ishiyo, shizoku, Miye prefecture.
Okuyama Iwataro, shizoku, Okayama prefecture.
Aoyama Teinosuke, shizoku, Aichi prefecture.
Ishimaru Shigeyoshi, shizoku, Oita prefecture.
Ishiguro Seijiro, shizoku, Shiga prefecture.
Tadano Narishige, shizoku, Miyagi prefecture.
Miike Teichiro, shizoku, Fukuoka prefecture.
Arai Kusjiro, shizoku, Kochi prefecture.

SECTION OF MECHANICS.

Matsuhara Gyo, shizoku, Fukuoka prefecture.
Suzuki Ikuyata, shizoku, Yamagata prefecture.
Takimura Takeo, shizoku, Shizuoka prefecture.

SECTION OF NAVAL ARCHITECTURE.

Terano Seichi, shizoku, Tokyo.
Shirai Raikichi, heimin, Tokyo.
Yamada Saku, shizoku, Shizuoka prefecture.
Wadagaki Yasuzo, heimin, Hyogo prefecture.
Arisaka Shogo, heimin, Tokyo.

SECTION OF ELECTRICITY.

Ohori Tokane, shizoku, Tokyo.
Oiwa Kohci, shizoku, Tokyo.

SECTION OF ARCHITECTURE.

Yokogawa Tamsuke, heimin, Hyogo prefecture.
Kusunishi Maaji, shizoku, Iwate prefecture.
Mune Hyogo, shizoku, Fukuoka prefecture.
Motono Kikichiro, shizoku, Saga prefecture.

COLLEGE OF LITERATURE.

SECTION OF PHILOSOPHY.

Hattori Unokichi, shizoku, Tokyo.

SECTION OF JAPANESE LITERATURE.

Wada Monkichi, shizoku, Gifu prefecture.

SECTION OF HISTORY.

Isoda Ryo, shizoku, Tokyo.
Shiratori Kurakichi, heimin, Chiba prefecture.

SECTION OF LANGUAGES.

Hayashi Satokichi, shizoku, Fukui prefecture.

COLLEGE OF SCIENCE.

SECTION OF MATHEMATICS.

Sugiyama Iwasaburo, shizoku, Ehime prefecture.

SECTION OF NATURAL PHILOSOPHY.

Omori Fusakichi, shizoku, Tokyo.
Midzuno Hidenosuke, shizoku, Fukuoka prefecture.
Tsuruda Kenji, shizoku, Tokyo.

SECTION OF CHEMISTRY.

Hada Seihachi, heimin, Tokyo.
Ichioka Tajiro, heimin, Gifu prefecture.
Horiike Yataro, shizoku, Kyoto.

SECTION OF ZOOLOGY.

Goto Seitaro, shizoku, Osaka.

SECTION OF BOTANY.

Ikeno Seichiro, shizoku, Shizuoka prefecture.

SECTION OF GEOLOGY.

Asai Ikutaro, shizoku, Ishikawa prefecture.

FOR MENTAL PROSTRATION USE HORSFORD'S ACID PHOSPHATE.

Dr. A. WALKER, Auckland, N.Z., says:—"I have found it to act very well in severe mental prostration and nervous depression. I find it indispensable in my practice, having taken careful observations of its action for over twelve months."

VICTORIA PUBLIC SCHOOL.

The yearly distribution of prizes in connection with the Victoria Public School took place on Tuesday afternoon, in presence of a large company of parents and others interested in the school. At four o'clock the ladies and other visitors were entertained to tea and other refreshments by Mrs. Hinton, and at five the proceedings in connection with the distribution of prizes were begun. The large school room, in which the scholars and visitors assembled, was tastefully decorated with flags which included many national colours, the portrait of Her Majesty the Queen being surrounded by a border of evergreens interspersed with flowers, while frequent clusters of foliage and flower, arranged round the walls much enhanced its appearance. Among those present were Bishop Bickersteth, Mr. J. J. Ensle, H.B.M. Consul (in the Chair) Messrs. W. Bourne, W. T. Austen, M. Russell, Rev. E. S. Booth, Messrs. Publ. N. F. Smith, G. H. Alcock, P. E. F. Stone, Dr. Van der Heyden, Messrs. J. Mendelssohn, Merian, Kirkwood, &c.

Mr. ENSLE in opening the proceedings said he had on behalf of the Committee of the Victoria Public School to welcome the visitors there and to thank them for their kind response to the invitation to listen to the recitations and be present at the distribution of prizes which would be later on. Having said these few introductory words he would ask the Head-master to be good enough to at once proceed with what was before them.

Mr. HINTON said he would desire to make a few remarks before the boys came upon the platform and showed the company what they had prepared for the afternoon. He wanted to say that this term the teaching of music had been begun in the school work. It was the request of several parents that it should be tried, and at last Mrs. Hinton was persuaded to undertake it. She had been working for several months at her class, and she was not now to try to produce an oratorio or a glee: she had simply determined to try to show those present as far as possible the inside of the musical house she was trying to build. She would try to show them the methods that were used in this system of musical education, and she trusted that, all there being friends, if anything demanded their indulgence they would kindly grant it. She had ventured upon what she thought might be said to be a very dangerous path. She was treading perhaps on what she almost fancied might prove to be thin ice: she had asked a lady friend to kindly write down a set of musical intervals following one another, and these were meant to be sung according to hand signs as practised in the Tonic Solfa system, by which movements of the hands were associated with the different notes. The task consisted in the class following the movements of the teacher's hands, and uttering the notes that each movement indicated. He regretted that the lady in question had proved somewhat unkind, and gave a rather difficult set of notes, which might perhaps prove too much, but still the class must try them.

The various exercises, musical and otherwise, of the pupils followed:—

1. Recitation....."Written in March"—(Wordsworth) Junior School.
2. Ecloga III....."Meronis Virgili".....Herbert Poole.
3. "Inne lovely June"—Canon in three parts.....Robert Sale.
4. "Busy, curious, thirsty fly"—Round in six parts.....Class.
5. Recitation....."The Burial of Moses".....L. Anderson.
6. Chord Singing from the Coloured Modulator.....The Singing Class.
7. Elementary Sight Singing.....Class.
8. Prize Essay....."August," by Sir Edwin Arnold.....L. Anderson.
9. Recitation....."August," by Sir Edwin Arnold.....George Wheeler.
10. Duet....."Angels whisper low and sweet".....The Singing Class.
11. Round in three parts....."Who comes laughing".....Class.

Mr. ENSLE said the manner in which the visitors had responded to the invitation that they had received showed clearly the interest that was taken in the Victoria Public School. It was now three years since the school was established, and, as with all undertakings, an educational establishment of this kind had to work its way and obtain confidence from the public. That confidence he flattered himself had been obtained. The school was originally, as they would remember, started by the British residents of Japan in connection with an auspicious event of public importance. But the lines on which it was carried on were so cosmopolitan that they appealed to the public of Japan at large. He would paraphrase the words used by the Right Rev. Chairman at a recent meeting, and say that the importance of this establishment was being recognised more and more, and it was generally conceded that it was filling a want and a place. The happy conditions under which it was being conducted were conducive to the mental development of the youth of the foreign communities in this distant part of the globe; and in referring to that matter he wished to say that they all owed a debt of deep gratitude to

the indefatigable zeal of the preceptors connected with this establishment—(applause)—because it was mainly owing to their zeal that success had crowned the endeavours of the promoters. A satisfactory feature in connection with the school was that though at first its prospects as far as concerned the funds were not particularly bright, it was gratifying to know that recently it had become self-supporting—(applause)—and he considered that too as another proof that it was gaining ground, which was largely due to the energetic care of the indefatigable Secretary and of the Committee, by their careful management of the funds, and at the same time by the judicious but trifling increase of the fees, the appeal in connection with which had been gladly responded to. After the interesting exhibition they had all witnessed with such rapt attention he thought he need say no more as regarded the prosperity of this establishment and of the scholars confided to the care of their esteemed fellow-citizens who formed the teaching staff.—(Applause.)

Mr. HINTON, before reading the prize list, said he must express on behalf of the boys and himself, and he felt sure on behalf of all present, their warmest thanks to Mr. Ensle for having consented to preside.—(Applause.) Mr. Ensle had been there before, but this was the first occasion on which he had given them the sanction of his presidency. They knew that the Roman Consuls were great people, but there never was a Roman Consul who at so great a distance from his native land watched how the young citizens were being trained, and saw that they were ready to take their place in the ranks of the great nation that claimed their presence. Their thanks were also due to another presence. He was sorry to say that at previous summer meetings Bishop Bickersteth was not able to be present, but it filled them with gladness to see him there and must especially fill with joy one boy who was soon to leave them, who had been specially encouraged to equip himself for the battle of life and who he trusted would long bear the school in mind. To all those who were leaving them he would say that their faithfulness, firmness, and strength in life would not be lost sight of in this school, where they had been watched growing up to the beginning of manhood. It was one of the bright lights of a schoolmaster's existence to be allowed to see a little of the larger world, the distant climes and varied incidents that came to those who left the school: he was inclined to participate sometimes in the halo of glory reflected when any of the old scholars distinguished themselves, and it was always a source of happiness to them to think of honest and faithful work being done by old boys in other parts of the world. Passing on to speak of the work of the school, Mr. Hinton said they had had the advantage of inspecting the Engineering College at Tokyo under the guidance of Professor West. They had fought, in the peaceful battle of cricket, boys who did not belong to the school, and having gained laurels there they turned to fresh fields and challenged the team of the *Imperieuse*—but got thoroughly beaten.—(Laughter.) In the reports which came from home, and in the reports of the Japanese Educational Department which he commended to every lover of education, there was a great tendency noticeable towards making everything more palpable and substantial to the minds of scholars. He recalled the fact that when long ago he was studying geometry, his teacher, a Frenchman, discouraged him from making models to illustrate his studies, but now the tendency was all the other way—to make plain to the eye as far as possible that which was brought before the mind. At a school like this they could not of course do much in the way of teaching science, so much time being swallowed up by the rudiments of the English studies, and it was useless to attempt the more ambitious displays which made scientific teaching so interesting in the schools at home. But in what little way they could they tried to follow the path he had indicated. The principle of making things clear and apparent and visible was followed in reference to the marks gained by the boys, which here were counters representing so many bits of work at the end of a week, and having stamped on them the effigy of an English penny, shilling, or pound, familiarizing the boys with English money. Thus the pupils had at the end of each week a visible result of the week's work, and although they did not depend on these counters for their comfort or even their necessities, still the effect of this system of marks was that the boys were more regular in their work, and pressure had not been exercised in so many cases. Many boys who would perhaps be slightly irregular if the marks were imaginary and merely entered in a book, were stimulated to regularity by the possession of a mark which they could put in their pockets. Owing to the great kindness of Viscount Inouye,

he had been enabled to have erected outside a large frame-work which resembled the scaffolding of an unfinished house. It was indeed so, but the building did not exist in mud, or lath, or plaster, or brick, but in the kinds of the boys here. It was a building begun inside but finished outside the school. There were many uses to which he could apply this structure; the cubic contents of solids could be worked by it, drawings, projections, and elevations could be studied by it—but he did not intend to speak of those things. It had been specially interesting to him to study knots, to get the boys to go through bowlines and cross hitches, the knowledge of which would not easily slip away from them. In the endeavour also to make their arithmetic more intelligible to the scholars he had an arrangement of squares by which visible progression was made from one small square to a million of such, which he termed the drill ground. He had but little to say of the individual work of the school, their life there passed as quietly; but he had to express his thanks to the parents who had suggested to him the writing of essays. He had been exceedingly interested in the essay writing, and had found that taking it steadily twice a week the boys who at first could not write an essay with anything in it, afterwards produced some things that were very interesting. At first he had to give them information, but now they collected it from all quarters. He might say that the essay they had heard read was by a boy whom he had not taught to write. He taught the older boys in the school mathematics or Latin, and looked at their essays, but did not teach them to write. In this case the merit of the essay was simply the effect of the study of elocution, the attempt to bring out the points of the masterpieces in literature having improved the boy's own style, by the indelible impression it left behind it. There had been a good deal written in the papers about authorship, but he thought the study of elocution was the real way to produce a good style. Mr. Hinton then read out the examination order and the list of the prize winners as follows:—

EXAMINATION ORDER.

CLASSES I. AND II.—Clarke ma, and Loomis ma, (special work); Anderson, Schenten, Alcock mi, Sale ma, Robertson, Encouye, Poole ma, Braess ma, Noda, Pohl ma, Sargent, Wheeler ma, Van der Heyden ma, De Jongh ma.

CLASSES III. AND IV.—Wheeler mi, Bird, Alcock ma, Braess mi, Loomis mi, Mendelson, Clarke mi, Russell, Poole mi, Drummond, Deakin, Arizumi.

CLASSES V. AND VI.—Watt, Goddard, Sasaki, Van der Heyden mi, Smith mi, Donnenberg, Sale mi, Lindsley, Sakamoto, Pohl mi, De Jongh mi, Cheock Yong, Welsh, Smith ma, Turner, Kubu, De Jongh min (Kennedy).

PRIZE LIST.

I. CLASS—Examination Prize, Anderson; Examination Certificate and Term's Work Prize, Schenten; Algebra Prize and Term's Work Certificate, Van der Heyden ma.

II. CLASS—Examination Prize, Alcock mi; Term's Work Prize, Noda; Term's Work Certificate, Alcock mi; Examination Certificate, Sale ma.

III. CLASS—Examination Prize, Wheeler mi; Examination Certificate, Bird; Term's Work Prize, Alcock ma; Term's Work Certificate, Russell and Mendelson.

IV. CLASS—Examination Prize and Term's Work Prize, Watt; Term's Work Certificate and Examination Certificate, Goddard.

V. CLASS—Examination Prize, Sale mi; Examination Certificate, Pohl mi; Term's Work Prize, Sale mi; Term's Work Certificate, Pohl mi.

VI. CLASS—Term's Work Certificate, De Jongh mi; the Kirkwood Prize, Alcock mi.

After the distribution of the prizes,

Mr. HINTON said Clark had been a constant source of help in the school in all that was manly and good, and lately had been helping them with some of the junior classes. The Committee therefore wished to express their sense of his services by the presentation of a small gift to him.

Mr. ENSLIE, on behalf of the Committee, then presented to Clarke a number of volumes as a mark of their appreciation. Addressing the scholars, the Chairman then said—Boys, I have had the pleasure this afternoon of presenting you with numerous prizes. I congratulate you on behalf of all who take a lively interest in your welfare on the satisfactory termination of a very satisfactory year. It is pleasant to hear that the report with reference to the industry and diligence of you all is of a highly commendable character. The mere fact that so many prizes have been distributed this afternoon speaks for itself, but as you are aware all cannot be to the fore, and I am sure that you are all of too generous and kindly a disposition for those who have not received prizes on this occasion to envy those who have been more fortunate. The lesson you have learned on

this occasion is to persevere. Both your teachers and you are about to commence your holidays. The former have well deserved this respite from their arduous labours, and for you it will be a pleasant change. Enjoy it to your heart's content so that you may come back—if I may say so—refreshed like young giants to again devote that diligent attention which can alone lead to success in your school, and may hold out reasonable hopes of ulterior prosperity. Now I will detain you no longer, but will ask you to join me in three cheers for Mr. and Mrs. Hinton and Mr. Fardel.

The three cheers called for by Mr. Ensle were heartily given.

Bishop BICKERSTETH, who then addressed the meeting, said he had had the pleasure of presiding—though not he was sorry to say in the summer—at meetings here or in the Settlement in connection with the school, and on this occasion had felt free of the weight which ordinarily rested on a chairman, that of having to make a speech. He had been requested, however, to say a few words, and by way of showing the boys the example of obedience, he had consented. This was the first time that he was able to say the school was in a satisfactory position,—because as they knew that could not be said from a practical point of view till it was financially in a satisfactory position. For the first time then he was able to say to-day—as the result of a letter he had received from Mr. Stone the other day—that the school was in a satisfactory position from a financial point of view: it was paying its way. Now that was thoroughly satisfactory. He might just try to point out to them what were the different things that contributed to place the school in that position. First, it was due to the fund collected some two or three years ago. Schools, he reminded them, had to get over the first two or three years which were the most difficult in their life. In the case of this school they were able by means of that fund to tide over the difficult period and they were now paying their way. But he was only saying that in order that he might have an opportunity of impressing upon his listeners that if the school was to continue in that position they must make efforts. Five or six boys were leaving the school now, and while 48 or 49 boys (the number they had had recently) enabled it to pay its way, 42 or 43 would compel them to draw on the fund he had spoken of. It was therefore the duty of every one who took a real, substantial interest in the school to see that the places of those five or six boys who were leaving were filled up. Another reason for the satisfactory financial condition of the school was that they had a good head-master who was always finding some way of furthering its progress. Mr. Hinton had written a book dealing with that wonderful world where there are four dimensions; where—which must be very awkward for ladies—strings did not tie—(laughter)—and cannon-balls were turned inside out, and yet Mr. Hinton also accommodated himself to the world of three dimensions, and taught the boys with strings that did tie, and was always inventing something to keep the pupils in the full tide of school life. Another reason for the satisfactory condition of the school was its admirable position in the middle of the Settlement. He did not know whether a day school was the best form of education, but it was the only one they could have here and he thought it was an immense advantage that the boys were able to come to this most healthy part of a not unhealthily settlement for purposes of education. The Right Reverend gentleman then addressed the boys briefly, commending to them the importance of relying upon Divine guidance in all they undertook.

The proceedings closed with the singing of "God save the Queen."

LETTER FROM SAN FRANCISCO.

(FROM OUR SPECIAL CORRESPONDENT.)

San Francisco, June 14th.

The Senate Committee is said to have gone once through the tariff, and passed all the sections which provoked no controversy; it now purposes to go back and take up the provisions which are in dispute. The upshot no one can foresee, but the outspoken opposition of such prominent members of the administration party as Plumb and Allison indicates that there will be blood before an agreement is reached. A theory has been circulated this week to the effect that a number of different tariffs will be reported, each adapted to a different locality, and that when the campaign opens the Republican speakers in each section can

show their constituents that they did their best for their own section. It is hard to see how this will avail the party against the broad charge that the Republicans were placed in power to reform the tariff on protectionist lines, and that they did nothing at all.

In the meantime, the administration party proposes to get rid of the surplus in a more effectual way than by reducing duties. The revenue for the current year is estimated at \$385,000,000, which, on the basis of last year's expenditures, would leave a surplus of some \$13,000,000. But, by increasing the payments for pensions and the improvements of rivers and harbours, the dominant party seems likely to convert this surplus into a deficit of \$25,000,000. The river and harbour appropriation, which is a job all through, is now set down at \$20,000,000; it may be increased before the bill passes. The regular pension appropriation bill calls for \$98,465,000; to this must be added an extra pension bill, which, at the present time, calls for \$40,000,000 more, in all \$138,465,000—considerably more than twice the whole expenditure of the nation in the year before the war. What was that old proverb about putting a beggar on horseback? The argument by which decent people try to justify this enormous pension list is that it will stimulate citizens to serve in the army in the event of future wars. It seems much more likely to deter the country from going to war under any provocation, not for fear of the enemy, but for fear of the pensioners.

The census takers are busily at work, and are having some dull experiences. It is difficult to convince uneducated people that they should open the door of the closet where they keep their skeleton in order to gratify Uncle Sam's curiosity. A number of arrests have been made under the law requiring people to answer under penalty of imprisonment. An exchange publishes the following colloquy between a census-taker and a lady:—

Census Taker—Are you a maid or wife, widow, orphan, single or married?

The Questioned Party—I am a widow.

C.—Did your husband die by the rope, electricity, in delirium, or from some natural cause?

The Q. P.—He died this time ten years ago. He was a census taker, and although his body bore unmistakable evidence of having been jumped on, poisoned, shot, and stabbed, the Coroner's jury said his death resulted from natural causes.

The progress of the work in this State indicates that the results of the census will be a disappointment to those who have believed that California was progressing as rapidly as some of the Central States of the continent. It will probably turn out that our population is increasing very slowly. This is largely due to the efforts of the labour unions to prevent skilled labour from coming here and competing in the labour market.

The new army bill introduces a reform which has been long contemplated. The post trader is to go the way of all flesh, and in his stead the troops at each post are to run a canteen on co-operative principles. When the bill was up before the Senate, Blair of New Hampshire and Hale of Maine set up a shriek because beer and light wines were to be sold at the co-operative canteens. Blair, who never saw a shot fired in anger, declared, from the teaching of his experience, that soldiers fought best on a teetotal régime. This brought up some old soldiers, who gave it as their experience that beer and wine in moderation were absolute necessities on a campaign. History certainly does seem to show that where beer and wine drinkers met teetotalers in the field, the latter took water in more senses than one. Mr. Blair's own State was settled by men who felled the forests and the Indians too, after they had been primed with sound Jamaica rum.

The Navy Department continues to call for bids for new ships of war. There is a rumour that the Union Iron Works and this city are to get contracts for two new cruisers, having underbid the Cramps of Philadelphia. There is something in all this which nobody can understand. Every pound of steel used in the new ships will have to come to San Francisco either from Pennsylvania or from England, in which last case it will have to pay the 50 per cent. duty. In either case the freight round the Cape will amount to nearly as much as the original cost of the steel; labour, too, is from 33 to 50 per cent higher here. How, under these circumstances, we can compete with Pennsylvania is a conundrum. Those who are behind the scenes tell me that the Union Iron Works, which to earn interest on their capital, should have made \$200,000 by building the *Charleston*, actually lost \$100,000 on that vessel. Now, the works are trying for other ships. In the palmy days of John Roach, of boudle memory, the puzzle was easily solved. John took contracts to build ships for less than they cost him. Of course, they broke down, and had to be laid up for repairs within a year. There was no congressional limit on the amount which the Department would pay for

repairing vessels. John got his ships back and charged enough for the repairs to make up for his loss on the original contract, and to enable him to contribute liberally to the campaign fund. All which, to the contrary notwithstanding, he died a pauper, in debt to the Government, which has never dared to prosecute his estate.

The schemes for the absorption of American industries by British capitalists ran against a snag this week at Chicago. It seems that a syndicate, mainly consisting of Englishmen, bought the Chicago stockyards for \$20,000,000; one of the stockholders now sues out an injunction against the transfer. The stockholder's object is probably to get bought off. But the Court may decide that there is something in the point that it is contrary to the public interest to allow leading industries to pass into the hands of foreigners whose persons and property are not under the jurisdiction of our authorities. No writ could be served on an Englishman against his will. In line with the movement of the stock-yard stockholder, the House Committee on the Judiciary has reported a bill forbidding the transfer of real estate to aliens. To hold real property, under that bill, it is necessary to be a citizen. This is going back to the days when, under the common law of England, which was the law in this country, the estate of an alien escheated to the crown at his death, and when the *Droit d'aubaine* prevailed in France. But the feeling against alien land holding, which threatens to involve, at some future period, the landlord system prevailing in England, is quite widespread; there is so much to be said in favour of it that it would not be surprising if some legislation ensued. It is observed that in those localities in South and Central America where the English have acquired large properties for the purpose of mining or conducting other industries, they have made themselves masters of the localities and are a law unto themselves.

The Reverend Dr. Newman, of the Methodist Episcopal Church, sails to-day in the *City of Peking*, for Yokohama, to preside at a general conference of the ministers of his church which is to be held at Tokyo next August. A reception was given to the Bishop last evening, and he made a speech which was well received. He said that the Japanese "have an imagination and are seeking a God; whereas the Chinese have only a memory, and it will be a hard matter to win them from the influence of the teachings of Confucius." Sceptics who heard him, and whose levity on such grave matters cannot be too severely reprehended, observed that the eminent divine was perfectly right except on two small points: the Japanese are no more seeking for a God than they are in search of a father; and as to Confucius, whom the Bishop calls Confucius, there are few publications of the church to which Dr. Newman belongs which can compare in wisdom, truth, or charity with the sayings which have been preserved by the devotion of his disciples.

Prize fighting has received a couple of blows, which in the language of the ring, might be called "staggerers." The leading athletic club of the East has refused to admit John L. Sullivan to its rooms on the ground that he is a blackguard; and a pugilist who killed his antagonist in a match at the Golden Gate Club in this city has been indicted for murder. "Sporting" circles are in low spirits, and no wonder. There are lots of respectable men who see no harm in the manly art, indeed who regard the cultivation of boxing as a preservative against the reckless use of the pistol or the knife. But it seems impossible to sever pugilism from brutality, debauchery, and all sorts of villainies, and so long as this is the case, its merits will not suffice to offset its drawbacks. For all this, if a prize fight and an opera are given on the same evening, it is odds there will be as many leaders of society at the former as at the latter.

THE TREATY NEGOTIATIONS IN JAPAN.

The following letter from the Tokyo correspondent of *The Times* appeared in that journal on May 30th:—

Tokio, April 27th.

An event of great importance has just occurred in Japan. On Monday, April 22, the new Code of Civil Procedure and the first portion of the Civil Code were promulgated. They will be speedily followed by the remainder of the Civil Code and by the Commercial Code. These documents represent the outcome of 15 years' labour by foreign and Japanese legal experts. They embody the best principles of Western jurisprudence, modified only so far as to suit Japanese condi-

tions. Already the new Criminal Code, which went into force in 1881, has received the approval of eminent European jurists, and there can be no doubt that the Civil Codes just promulgated will also be found satisfactory. Now, therefore, Japan possesses a body of civil and criminal laws which will bear comparison with those of any country in the world. Moreover, just two months ago there was promulgated another ordinance, scarcely less important, entitled the "Law of the Constitution of the Courts of Justice." This law, the carrying out of which involves a heavy expenditure, completely reorganizes the Courts of Justice throughout the Empire, and may be said to have secured the endorsement of Western Powers, for the prospect of its imminent enactment was one of the practical guarantees regarded with satisfaction by the foreign negotiators in the treaty revision conferences. With laws fully up to the standard of Western requirements, with Courts organized on an efficient basis, with police of proved competence, and with a prison system which has been favourably described by competent observers, it must be conceded that no substantial barrier stands any longer between Japan and the recovery of her judicial autonomy; or, in other words, between her present semi-isolation and the complete freedom of foreign intercourse which she desires to substitute for it.

Readers of *The Times* will remember that two principal guarantees were embodied in the diplomatic notes accompanying the treaties proposed by Japan last year. Of those conditions the first—namely, that the new Civil Codes should be promulgated and translated into English two years before the date fixed for the abolition of consular jurisdiction—has now been satisfied, for the Codes are promulgated and their English translations published. But the second—namely, the appointment of a certain number of foreign legal experts to sit on the Bench of the Supreme Court, and, in conjunction with Japanese Judges, to adjudicate cases affecting foreigners—remains unfulfilled, and will never be fulfilled. The Japanese nation has revolted against it utterly. Probably the British public do not yet fully understand the story of that revolt. If they did, they would certainly sympathize with it. When the Constitution was promulgated last spring, it was found to contain a clause declaring the equal eligibility of all Japanese subjects for civil and military appointments. This clause might be read in a purely enabling sense. It might be read to mean that the privilege of appointment to office in Japan, though extended to all natives of the country, was not necessarily limited to natives. Thus interpreted, the Constitution would not have conflicted with the scheme of appointing aliens to Japanese Judgeships. But another reading also was possible—namely, that the clause conferred on Japanese subjects an exclusive right of property in civil and military offices in their own country, and that to appoint foreigners to such offices would be to alienate a portion of that property from its rightful owners. The former interpretation had been accepted by the framers of the treaty programme; the latter was chosen by the great bulk of the people and also by a large section of influential officials. The drafters of the treaty might, perhaps, have insisted on their own interpretation had they not been sensible of the inexpediency of defying popular sentiment on such a subject. The grant of a Constitution, for years impatiently awaited by the nation and received at last with proportionate rejoicing, had produced a most salutary effect on the relations between rulers and ruled. Naturally the Government hesitated to weaken that effect by thus early adopting a course which the people regarded as a violation of their newly-acquired rights; and not less naturally the people, finding themselves challenged for the first time to assert those rights, accepted the challenge with enthusiasm. Even had the case stood thus, and thus only, we may reasonably doubt whether the framers of the treaty would have maintained their ground; whether, in a word, the Cabinet would have consented to be arraigned by the first Diet on a charge of violating the Constitution. But there were other and not less cogent considerations to be taken into account. Chief among them ranked the fact that the object of treaty revision was to remove all the trade restrictions imposed by the old covenants, and to place the intercourse of foreigners and Japanese on a perfectly free basis. What could be more shortsighted than an attempt to compass that object by introducing a system emphatically distasteful to the bulk of the Japanese nation? Such a plan would simply mean that the material barriers set up by the original treaties were to be replaced by moral barriers much more potent and difficult to remove. For, in addition to the jurists, politicians, journalists, and officials who opposed the new treaty on the ground of its alleged uncon-

stitutionality, another section of public opinion condemned it not less vehemently from a national point of view. The representatives of this latter section asserted that no self-respecting people could tamely brook the notion of having their laws administered in their Sovereign's name by aliens who had not even sworn allegiance to that Sovereign. They further asserted that whatever interpretation might be put upon the actual language of the Constitution, its spirit would be manifestly violated by a treaty making alienage a necessary condition of appointment to judicial office. It was conceivable, they said, that, in exceptional circumstances, a legal expert, despite his foreign origin, might obtain a seat on the Japanese Bench, but so soon as foreign origin was declared essential to eligibility for such an office, the intention of the Constitution ceased to be fulfilled. To deny the justice of either of these protests was difficult; to concede it was to admit the certain unpopularity of the proposed system, and the consequent inexpediency of introducing it. But why, it may be asked, did not the Japanese Government, appreciating all this, withdraw or modify its proposals at once? The answer is that not until a late stage was the condition of public opinion clearly shown. The views summarized here needed an interval for their growth, and might perhaps have failed to mature had they not been rapidly developed by party politics. The new treaty had been actually concluded with America and almost concluded with Germany before its terms became publicly known in Japan. Its principal negotiator, Count Okuma, while out of office had organized and led a political party of great influence. Opposed to this party was another, scarcely less powerful, which, shortly before Count Okuma's return to the Cabinet, had developed a new access of vigour under another name. When the announcement was made that America had accepted Japan's proposals, Count Okuma's former party took no pains to conceal their exultation at their leader's success, and, as a matter of course, their opponents sought to depreciate his achievement. Thus very soon the whole question was dragged into the arena of party politics, and Englishmen do not require to be reminded what that signifies for any question. The solid and sober elements of dissatisfaction described above, fanned and fomented by partisan journalists and vehement agitators, grew weekly and daily more formidable. Folks who would otherwise have paid no heed to the discussion were led to think about it, and the great majority of them, embracing the patriotic view, raised their voices in the defence of the Japan-for-the-Japanese reading of the Constitution, and against the administration of Japanese laws by aliens.

Before this widespread dissatisfaction the Government could not choose but bow. It was finally recognized that the project of placing Judges of foreign origin on the Bench of the Japanese Supreme Court must be abandoned. The question then arose, how far did this determined revolt of public opinion affect the possibility of treaty revision from a foreign point of view?

In the first place it is to be observed that, speaking practically, the judicial guarantee was almost worthless. To be able to count on finding a majority of foreign legal experts on the Bench in every case where foreign interests were concerned seemed at first sight a valuable security against injustice. But when we remember that these Judges were only to adjudicate upon questions carried by appeal to the Supreme Court, and that such appeals could only be taken on questions of law, not on questions of fact, the very slender nature of the guarantee becomes apparent. Moreover, there is strong reason to doubt whether foreign suitors would have attached any value to the presence of Judges who, in the nature of things, were likely to be men either without experience or with unsatisfactory experience in their own countries, and who might always be suspected of thinking that their tenure of office depended on a display of pro-Japanese tendencies. Further, these Judges might be of any Western nationality, and it is evident that an Englishman would not be greatly reassured by the prospect of submitting his case to Judges not only just as alien, from his point of view, as are the Japanese, but also administering codes of law entirely strange to them before their arrival in Japan. Another consideration was that to invite the investment of foreign capital in Japan under a special system of limited duration would be a procedure of doubtful efficacy. The chief field for foreign enterprise in Japan is manufacturing industry; in that direction there is plenty of room for capital and experience. But if the employment of Judges of foreign origin constituted any real or necessary guarantee for the security of property, surely the temporary nature of the guarantee would have served to deter rather than to encourage investments of Western capital.

Original from

UNIVERSITY OF ILLINOIS AT
URBANA-CHAMPAIGN

Better let Europeans and Americans trust Japanese institutions from the outset, if they could persuade themselves to do so, than bid them place reliance on guarantees at once slender and temporary. Finally, during the term allotted for the continued existence of the foreign settlements, the presence or absence of Western experts on the Bench of the Japanese Supreme Court could make no difference to foreign residents, since the latter would only become amenable to Japanese jurisdiction by voluntarily passing into the interior, while within treaty limits things would remain *in statu quo*. Thus, under every practical aspect this engagement to add three or four foreigners to the Bench of the Supreme Court possessed no value, whereas such a pledge assumed in Japanese eyes a character hurtful to national self-respect and opposed to the spirit, if not to the letter, of the Constitution.

The Japanese Cabinet, its confidence in its own programme greatly shaken and its unanimity disturbed by this storm of popular agitation, could scarcely have persisted in defying public opinion. But it found itself confronted by another and even grave difficulty; events had forced it into the position of negotiating a treaty which, in order to be carried into effect, would require the co-operation of an Administration totally distinct from the Administration by which it had been concluded. This is a curious and interesting point. Had the original programme of revision been accomplished within the period contemplated—that is to say, during 1889—the virtually autocratic bureaucracy of that time might, on its own responsibility, have taken all the steps necessary to the carrying out of the new treaty's provisions. Judges of foreign origin might have been appointed, whether such a measure conflicted or agreed with the Constitution, and a law might have been enacted conferring judicial competence on the section of the Supreme Court specially constituted by the treaty—namely, the section in which Judges of foreign origin were to sit in a majority. But the programme, as originally mapped out, could not be accomplished. Even if England's unexpected tardiness had not blocked the way, affairs moved so slowly that to conclude all the treaties and exchange ratifications before the end of 1890 became almost hopeless. Now the Constitution provides that every law must have the consent of the Diet, and that, although when the Diet is not sitting, the Emperor may, in urgent cases, "to maintain public safety and to avert public calamities," issue ordinances in the place of law, such ordinances must be laid before the Diet at its next session, and must not then be approved by that body must cease to have binding force. These provisions of the Constitution do not actually come into operation until the first Diet assembles, and inasmuch as that event does not take place until November, the Government, by straining a point, might possibly have issued the necessary laws under the old system. But it might also, and would probably, have failed to do so, in which event it would have found itself in the predicament of having concluded a treaty the terms of which could not be carried out. For it was abundantly manifest from the temper of the nation that the Diet would refuse to endorse or enact a law conferring judicial competence on a tribunal specially constituted for the convenience of foreign suitors, and presided over by Judges of foreign origin in a majority. The Government dared not accept such a responsibility or run such a risk. Neither ought Western Powers to require it to do so. Civilized States are everywhere bound to take due notice of each other's administrative conditions in concluding mutual treaties or conventions. The Japanese Administration could not pledge itself to anything requiring the sanction and co-operation of the Constitutional Administration then on the eve of being organized, and the time had passed when such sanction or co-operation might have been dispensed with. Therefore, the revised treaty must contain no stipulations other than such as would be capable of fulfilment by exercise of the Imperial prerogative or of the Government's constitutional powers, independently of Parliament. This consideration, becoming more and more imperative as months after months saw the negotiations still unfinished, finally induced the Government to change its ground. The necessity was not accepted without great reluctance and much friction. It led to the resignation of the whole Cabinet in a body, an event without parallel since the Restoration in 1867. Neither was it immediately announced: for Count Okuma, returning from the Council at which the resolve had been taken, was severely wounded by a would-be assassin, and the negotiations had to be suspended till his recovery. Meanwhile, the Emperor directed the Cabinet Ministers to retain their portfolios provisionally, with the exception of the Minister President, who was replaced by Prince Sanjo. The closing days of December found Count Okuma able to resume his functions. He immediately tendered his re-

signation, and the Cabinet was permanently reorganized under the presidency of Count Yamagata; Viscount Aoki replacing Count Okuma.

The Government's position was then plain enough. On the one hand, a treaty had been concluded, but not ratified, with America, Germany, and Russia; on the other, public opinion had declared itself so emphatically against some of the terms of the covenant that its ratification could no longer be contemplated. Under these circumstances the easiest course for Japan to pursue would apparently have been that adopted by England in 1870, when a treaty concluded by her Majesty's representative in Peking with Prince Kung and other Chinese Plenipotentiaries, being opposed by the Chambers in Great Britain, was laid aside and further discussion of its contents indefinitely postponed. It was open to Japan to avow frankly that, the voice of the country having been raised against the projected treaty and public opinion being greatly excited on the question, the ratification of the treaties already concluded, and the negotiation of similar compacts with other States, must be postponed to a more convenient season. But there were two powerful arguments against this plan. The first was that Japan's resolve to accomplish treaty revision had grown stronger every year, and that she shrank from doing anything which might weaken public faith in the earnestness of her determination. Already the agitation described above had been misconstrued by some critics into an evidence, not of opposition to the proposed terms of revision, but of opposition to revision on any terms—evidence, in short, of a desire to keep foreigners out of the interior, to restrict their intercourse with Japanese, and to limit their commercial opportunities in Japan as much as possible. The country could not afford to lay itself open to a charge of reverting to the anti-foreign spirit of early times, and, for the rest, the accusation had no truth. The second argument related to the Government's attitude towards its own subjects. Among the Japanese trading with foreign communities at the treaty ports there is a party which finds its opportunity in the present state of restricted commercial intercourse, and is consequently opposed to every change in a liberal direction. By this party advantage had been taken of the general agitation to push its own selfish views in the sense of a protest against permitting foreigners to own real property in the interior of Japan, and against exposing Japanese tradesmen and manufacturers to direct contact with the abundant resources, wide experience, and masterful methods of Western capitalists. The cry awoke some echoes of old time resentment, and was more or less in tune with the impatience and indignation which had gradually been excited by the difficulty of vindicating the Empire's sovereign rights, and by the nature of the terms which Japan had been obliged to offer in exchange for the recovery of her independence. To postpone the negotiations *sine die* would have left the field open to the growth of this evil phase of the agitation, and would have encouraged the agitators to imagine, or pretend, that their views had obtained some measure of official endorsement.

Accordingly, it was resolved that a new basis of negotiation should be sought. One of the proposed guarantees was then on the point of fulfilment and has now, as stated above, been actually fulfilled; the other had been denounced by the voice of the Japanese nation, and was, moreover, of no real value from the foreign point of view. Shorn of these conditions, the programme assumed a simple form. It stood thus:—The further existence of consular jurisdiction would be limited to a fixed term of years, reckoned from the date of the ratification of the treaty, during which term foreigners would be allowed to trade, travel, and reside freely in the interior of Japan, on condition of submitting to any Japanese laws governing foreign intercourse within Japanese territory, just as Japanese in Western countries are required to submit to the corresponding laws in force there. Further, until the termination of that period—i.e., until the complete abolition of consular jurisdiction—ownership of real property by foreigners outside the settlements would not be permitted. In this greatly simplified form the scheme is understood to have been once more and finally submitted to the foreign Powers, and strong hopes are entertained that the weary problem is at length within sight of solution. What has to be is that the conditions existing to-day are radically different from those existing in the early stage of the negotiations. Since this interminable question first passed into the field of practical politics, since the time when Japan became entitled to ask for a revision of her treaties, a new generation has attained maturity. Seventeen years suffice to change the channels of public thought in any country, but in Japan, where during the past two

decades the heaven of an entirely new civilization has been gradually permeating the national character, 17 years have left the mark of half a century. Lads who had barely learned to read and write when the nation first began to wonder at the engagements it had contracted with foreign countries, are now grown men. Youths who were then on the threshold of a career, are now leading members of their various professions. Politicians, journalists, and public speakers who in those days earned a title to originality by first applying the principles of western international laws to eastern cases, have now been distanced by the movement they inaugurated. The nation sees with new eyes and thinks with new thoughts. Foreign observers, watching these changes, sometimes curiously but for the most part apathetically, are surprised and startled by a result that should have been foreseen. Accustomed to regard public opinion in Japan as docilely waiting to be moulded by official direction, they are astonished to see it assert itself independently, and still more astonished to find that officialdom no longer ventures to oppose it. This is the great fact demonstrated by the events of the past two years. From the columns of numerous and widely read newspapers; from the speeches of politicians and economists; above all, from the teachings of Occidental civilization, the Japanese have learned the functions and capabilities of that potent agent, public opinion. The negotiations have now to be conducted with a nation jealous of its honour and bitterly impatient of the restraints put upon its independence, not with a few calm and liberal statesmen, removed from the range of popular prejudices and capable of regarding international problems with impartial eyes.

For Englishmen, the most interesting incident of the story is that their country once more finds herself mistress of the situation. Twice before, owing to the influence necessarily attaching to her commercial preponderance and to the prestige of her resolute policy in the past, it rested with Great Britain to rescue Japan from her difficulties or to condemn her to a further term of probation. Both of these opportunities were neglected, and after the loss of the second, America, Germany, and Russia, stepping in, earned Japan's gratitude by liberal generosity. It seemed then that England had been hopelessly relegated to a back place. But time befriended her. Changes of personnel in Downing-street and at the Legation in Tokio, supplemented by the wonted deliberation of her procedure in all international matters, involved so much delay that, whereas her speedy agreement with the terms accepted by America, Germany, and Russia would have virtually solved the problem, the apparent impossibility of securing her assent discredited the Japanese negotiators and afforded time for the growth of the strong agitation described above. The result, briefly stated, is that the Japanese Government and people are now fully sensible of the paramount necessity of concluding a treaty with England. They see that, whatever may be the goodwill of other Powers, the key of the situation lies ultimately in Great Britain's hand as surely as it lay there 20 years ago. In the negotiations now resumed Japan's whole energy will be directed to securing British acquiescence, and it is not too much to predict that if she succeeds England's influence and prestige in Japan will recover all their lost ground, and stand higher than they ever stood before. The question for Lord Salisbury to consider is whether guarantees, of which one never had any real value and the other is already fulfilled, should be suffered to stand between England and Japan's friendship, and between the present commercial restrictions imposed on British subjects in Japan and the complete freedom offered by the new treaty. No sensible Englishman cares two straws whether the guarantee about foreign judges remains or disappears, while to Japan its absence means national rejoicing, its presence national umbrage and discontent. One can scarcely exaggerate the effect that will be produced if, in the sequel of all this agitation and perplexity, England comes forward and proves that, so far from ignoring or opposing Japan's claims, she and she alone is prepared and competent to secure their universal recognition. It does not often happen that so large a reward awaits such an easy exercise of statesmanship.

The following article appeared in the leading columns of the same issue of *The Times*:—

BRITISH ASCENDENCY IN JAPAN.

Our Correspondent at Tokyo narrates, in the letter which we publish to-day, a hitherto untold part of an interesting history. Every year our trade with Japan grows. We have active, enterprising commercial rivals in the United States and Germany, but a great future lies before British

trade and capital in that country, and it is of supreme moment for us to learn, as our Correspondent states, that we shall soon, in all probability, see the present treaty limits abolished, and Japan entirely thrown open to commercial intercourse. It rests in the main with England to say whether and when this shall be. The preponderating foreign influence in Japanese politics has not of late been British. The counsels of Germany, Russia, and America have been listened to more attentively than ours. But a turn in affairs now gives us a favourable opportunity for recovering our influence, and it will be our fault if we miss it. Hitherto, Western States have declined to recognize Japan as entitled to all the privileges of a mature, civilized nation. In the majority of disputes to which foreigners are parties the native Courts have no jurisdiction. The Englishman or German concerned is entitled to have his case dealt with in what may be called Consular Courts. Japan is treated much as we treat Turkey, Egypt, and other countries with laws and customs radically at variance with our own. This disability has long become galling to a people who justly pride themselves upon the rapid advances which they have made in civilization; and in 1882 the Mikado's Government proposed to the numerous Treaty Powers that the opening up of the country to foreign trade and residents should go hand in hand with the abolition of the Consular jurisdiction. What obstacles have hitherto prevented the attainment of this object, what modifications have from time to time been made at the instance of the Powers in the programme of reforms, what policy each of the interested States, jealous of each other, has pursued, what Ministerial crises have been the result of this controversy, would be tedious to tell. It is enough to remember that, as our Correspondent points out, the part which England has played in the long negotiations has not earned her the gratitude of the Japanese, and that English influence has suffered temporarily an eclipse.

Now, however, the situation has changed. The claim of Japan to be released from her disability has been strengthened by a series of remarkable reforms, to which there is no parallel in history. Since 1881 a new Criminal Code, based upon European models, has been in force. On the 21st of last month the new Code of Procedure and the first part of the new Civil Code, also in part the work of Western jurists, were promulgated, and they will be soon followed by the remainder of the Civil Code and the Commercial Code. About three months ago appeared an ordinance, reorganizing at great expense upon European plans the Courts of Justice throughout the Empire. The request to be permitted to discard the sign of tutelage is made with new force when Japan has acquired a judicial and legal system fully on a level with those of some Western States, an effective police, and prisons, if not perfect, at all events greatly improved. What more could her rulers do to make good her right to enter the fellowship of nations, an equal among equals? Last year the Japanese Government, in accordance with a suggestion made by several of the Powers, proposed to do something more. They suggested that the abolition of the Consular jurisdiction should be accompanied by two safeguards, sufficient to inspire confidence in the new order of things. Not only were the Civil Codes to be promulgated and translated into English two years before the Consular jurisdiction was abolished, but a certain number of European lawyers were to be appointed members of the Supreme Court, and to adjudicate, along with native Judges, upon cases affecting foreigners. The first condition has been fulfilled; the second is not, cannot be, and, as our Correspondent argues, ought not to be, carried out. The Japanese Government mistook the temper of their countrymen when they promised to nominate foreign Judges. They forgot that along with other changes had been formed a public opinion, which must not be ignored, and which openly revolts against this humiliating concession. It has been declared to be contrary to the terms of the new Constitution; it has been condemned with more confidence as unpatriotic; and the Government has been obliged to yield to the cry of "Japan for the Japanese." They would imperil their existence if they tried to resist the storm of universal disapprobation. What ought to be the effect of the withdrawal of one of the promised guarantees? Our Correspondent argues that the loss is more apparent than real, and that there is no reason why England, notwithstanding previous official declarations on the subject, should delay, on account of an illusory injury, obtaining the very substantial benefits sure to come in the train of the general opening up of the country. What, in the majority of cases, would be the value of the presence of foreign experts if they sat only in the Supreme Court, to which come merely questions of law? What

comfort would it be to English suitors that a French jurist would, in the last resort, have a share in the determination of their causes? The condition proves to be exceeding offensive to the Japanese, and its value to those for whose benefit the stipulation was made is more questionable. Besides, the matter is no longer entirely in the hands of the Government. The Constitution provides that every law must have the consent of the Diet, and though they might technically have taken advantage of the plea that this condition does not take effect until November next, and might in the meantime pass the laws necessary for the appointment of foreign Judges, the tempest that would await them would be destructive of any Administration.

In these circumstances what is the duty of Great Britain? What is her clear course in view of the solid advantages to be gained by establishing freedom of intercourse? It would be both gracious and politic, answers our Correspondent, to waive all question about one of the promised guarantees, and to be satisfied with the other. "In the negotiations now resumed Japan's whole energy will be directed to securing British acquiescence, and it is not too much to predict that, if she succeeds, England's influence and prestige in Japan will recover all their lost ground and stand higher than they ever stood before." The promised reward is great, and the sacrifice to be made is small. It is common ground that the Consular jurisdiction, the badge of infancy, must go. We could not expect that a nation which assimilates so rapidly and so successfully the best parts of our civilization, which exhibits an unprecedented aptitude for progress, and which has enlightened rulers, would long submit to an odious mark of inferiority. The true friends of England are those who resent most keenly the continuance of the system which stamps them as barbarians. Between the maintenance of the jurisdiction of the various forms of Consular Courts and that permitting the unrestrained action of the native Courts there appears to be no tenable middle course. It must be remembered that the proffered guarantee of the presence of foreign Judges in the Court of Appeal would be of little avail if ever there did come about, in a case affecting Europeans, a serious collision between Western ideas and Japanese. Our Correspondent counsels our Government to meet in a generous spirit the Japanese Government, and he fortifies his advice with arguments which we trust will not be lost sight of. In the past we have made mistakes, which have put England at a disadvantage as compared with America, Germany, and Russia. We are told, by one well acquainted with the situation, "that the Japanese Government and people are fully sensible of the paramount necessity of concluding a treaty with England," and that "they see that whatever may be the goodwill of other Powers, the key of the situation lies ultimately in Great Britain's hands, as surely as it lay there twenty years ago." Who will be to blame if this mood is suffered to pass without our meeting it graciously and sagaciously?

LATEST TELEGRAMS.

[REUTER "SPECIAL" TO "JAPAN MAIL."]

London, July 6th.

The Spanish Ministry has resigned, and Señor Canovas has formed a new Cabinet.

A memorial is being signed by many members of the House of Commons against the African agreement. It regrets the proposed extension of French powers in Madagascar.

Major-General Sir R. H. Buller, K.C.B., K.C.M.G., V.C., Quarter-Master General, succeeds General G. J. Viscount Wolseley, K.P., G.C.B., G.C.M.G., as Adjutant-General.

London, July 8th.

The London police go on a general strike to-night.

London, July 9th.

The Conference Committee of the Houses has adopted a substitute for the original Silver Bill. The new Bill provides for the purchase of 4½ million ounces of silver monthly and the issue of silver certificates which are to be full legal tender. The clause providing for the redemption of the certificates with silver bullion is expunged, and they are made redeemable with gold coin.

The Police strike has failed.

London, July 9th.

Dr. Peters has reached the coast on his return from the interior of Africa.

A strike of the London Postmen is imminent.

A fierce conflict has taken place between the Police and a mob in Bow-street.

TIME TABLES AND STEAMERS.

TOKYO-YOKOHAMA RAILWAY.

DOWN TRAINS LEAVE SHIMBASHI Station at 6.05,* 6.40, 8.45, 9.30,* 10.25, and 11.45 a.m., and 1.25, 2.30, 3.55, 4.45, 5.50, 6.50, 8.30, 9.55, and 11.15 p.m.

UP TRAINS LEAVE YOKOHAMA Station at 6.30, 7.20, 8.10, 9.15, 10.22, and 11.30 a.m., and 12.45, 2.3, 4.25, 5.30, 6.35, 7.50, 9.10, 10.05, and 11.05 p.m.

FARES—First-class, *sen* 60; second-class, *sen* 40; and third-class, *sen* 20.

Trains marked (*) run through without stopping at Omori, Kawasaki, Tsurumi, and Kanagawa Stations. Those marked (†) run through without stopping at Omori, Kawasaki, and Tsurumi Stations.

TOKAIDO RAILWAY.

TRAINS LEAVE YOKOHAMA (down) at 6.50, 9.10, 10.20, 11.25 a.m., and 12.40, 3.25, 4.55, 5.35, and 7.45 p.m.; and KOSU (up) at 6.35, 8.40, 9.40, and 11.07 a.m., and 1.17, 2.45, 4.58, 7.25, and 9.46 p.m.

FARES—To Hodegaya, first-class *sen* 6, second-class *sen* 4, third-class *sen* 2; to Totsuka, *sen* 18, *sen* 12, *sen* 6; to Ofuna *sen* 36, *sen* 24, *sen* 12; to Fujisawa, *sen* 42, *sen* 28, *sen* 14; to Hiratsuka, *sen* 66, *sen* 44, *sen* 22; to Oino, *sen* 75, *sen* 50, *sen* 25; and to Kozu, *sen* 93, *sen* 62, *sen* 31.

Down trains at 6.50 a.m. run no further than Kyoto arriving there at 11.30 p.m.; at 10.20 a.m. no further than Nagoya, arriving at 10.10 p.m.; at 12.40 p.m. no further than Shizuoka, arriving there at 6.50 p.m.; at 3.25 p.m. no further than Shizuoka, arriving at 8.45 p.m.; and the train at 5.35 p.m. runs to Kobe, arriving at 12.45 p.m. next day.

A tramway runs between Kozu and YUJOTO (distance 4 ri). Hirakisha may be hired between YUJOTO and MINAKOSHITA (distance 1 ri).

OFUNA-YOKOSUKA RAILWAY.

TRAINS LEAVE OFUNA (down) at 7.30 and 9.40 a.m., and 12.05, 1.30, 4.03, 6.14, and 8.30 p.m.; KAMAKURA (down) at 7.41 and 9.51 a.m., and 12.16, 1.41, 4.14, 6.25, and 8.41 p.m.; and ZUSHIMURA (down) at 7.50 and 10 a.m., and 12.25, 1.50, 4.23, 6.34, and 8.50 p.m.; YOKOSUKA (up) at 6.45, 8.55, and 11.20 a.m., and 12.50, 3, 5.10, and 7.45 p.m.; ZUSHIMURA (up) at 7.01, 9.12, and 11.36 a.m., and 1.06, 3.16, 5.26, and 8.01 p.m.; and KAMAKURA (up) at 7.11, 9.22, and 11.46 a.m., and 1.15, 3.26, 5.36 and 8.10 p.m.

FARES—To Kamakura, first-class *sen* 9, second-class *sen* 6, third-class *sen* 3; to Zushimura *sen* 15, *sen* 10, *sen* 5; and to Yokosuka *sen* 30, *sen* 20, *sen* 10.

TOKYO-MAEBASHI RAILWAY.

TRAINS LEAVE TOKYO (Ueno) (down) at 6.50, 8.50, and 11.40 a.m., and 2.40 and 5.40 p.m.; and MAEBASHI (up) at 6.55, and 11.50 a.m., and 2.50 and 5.50 p.m.

SHINJIKU-HACHIOJI RAILWAY.

TRAINS LEAVE SHINJIKU, TOKYO, (down) at 6.55 and 9.55 a.m. and 12.50, 4, and 7 p.m.; and HACHIOJI (up) at 5.25, 8.25, and 11.25 a.m. and 2.20 and 5.30 p.m.

FARES—First-class *sen* 90; second-class *sen* 60; third-class *sen* 30.

TAKASAKI-YOKOKAWA RAILWAY.

TRAINS LEAVE TAKASAKI (down) at 6.30 and 9.25 a.m., and 12.20 and 3.15 p.m.; and YOKOKAWA (up) at 8 and 11 a.m., and 1.50 and 4.55 p.m.

FARES—First-class, *sen* 75; second-class, *sen* 45; third-class, *sen* 25.

UTSUNOMIYA-IMAICHI RAILWAY.

TRAINS LEAVE UTSUNOMIYA (down) at 5.25 and 10.05 a.m., and 12.25* and 3.05 p.m.; and IMAICHI (up) at 7.38 a.m., and 12.13, 2.43, and 5.13* p.m.

FARES—First-class, *sen* 63; second-class, *sen* 42; third-class, *sen* 21.

* Through Trains to and from Utsuno.

NAGOYA-TAKETOYO RAILWAY.

TRAINS LEAVE NAGOYA at 9.05 a.m., and 5.05 p.m., and TAKETOYO at 7.50 a.m., and 3.50 p.m.

FARES—Second-class, *sen* 74; Third-class, *sen* 37.

TAKETOYO-OFU RAILWAY.

TRAINS LEAVE TAKETOYO (up) at 5.40 and 10.40 a.m., and OFU (down) at 3.53 and 8.55 p.m.

FARES—Second-class, 26 *sen*; third-class, 13 *sen*.

YOKOSUKA STEAMERS.

STEAMERS LEAVE the Nippon Hatoba daily at 7.55 and 10.30 a.m., and 1.45 and 4.00 p.m.; and LEAVE YOKOSUKA at 7.10 and 10.30 a.m., and 1.30, and 4.00 p.m.—*Fare, sen* 20.

PASSENGERS.

ARRIVED.

Per American steamer *City of Peking*, from San Francisco:—Mr. H. T. Finck, Mr. K. Kabuto, Bishop Newman, Mr. and Mrs. D. L. Hillis, Mrs. E. Reese, Messrs. K. Sagara, Y. Ito, F. W. Macdonald, Max Slevogt, M. Willett, and Rev. V. Honda and child in cabin. For Hongkong: Mrs. Blocklinger, Mr. Peter Welner, Mrs. C. C. Maish, Mr. C. Mow Keung in cabin.
 Per British steamer *Parthia*, from Vancouver, B.C.:—Messrs. G. Goward, N. N. McLaren, A. L. Rhodes, G. E. Krauschitz, G. J. Dunlop, A. L. Hardy, T. Hardy, A. J. Wilkin, W. B. Young, and Le Conte de Tinsau in cabin; 4 Japanese

and 33 Chinese in steerage. For Hongkong: Mrs. J. Widmer Rolph in cabin. For Shanghai: Mr. and Mrs. Cosmo J. Burton in cabin. For Singapore: Mr. A. H. Bengough in cabin.

Per British steamer *Ancona*, from Hongkong via Nagasaki and Kobe:—Dr. Will, Colonel Chauncey, Mr. and Mrs. Kretzelmas, Captain Butler, Mr. C. Gregory, Mr. Ho Hon Shun, Miss Allen, Miss Simons, Miss Imbrof, Mr. J. R. Scott, and Mrs. Addyes Scott in cabin; 6 Chinese in steerage.

Per French steamer *Melbourne*, from Hongkong via ports:—Mr. Gablo Suler, Mr. Ed. Lehmann, Mrs. Sara Gidelman, Mrs. Heine, Messrs. Gounard, Muzelier, Satcher, A. T. Adams, K. M. Shroff, Mr. and Mrs. Scott, Mr. Syad Mohamed Shad, Mr. Hecht, Mrs. Wagner, family, and servant, and Mr. Yu Tin Kee in cabin; 2 passengers in steerage.

DEPARTED.

Per British steamer *Batavia*, for Vancouver, B.C.:—Mr. W. A. Backhouse, Mr. and Mrs. Parr and child, Mr. J. Johnstone, Mr. Joseph Hardmeet, Rev. H. W. Fraser and family, Dr. Faries, Mr. R. B. Rigby, R.N., Mr. and Mrs. Eustace, Messrs. M. E. Hosking, Frank Stengeon, and R. Martin in cabin; 4 passengers in steerage. From Hongkong: Messrs. J. S. Bailey, H. H. Bailey, J. R. Rich, and Isaac Hughes in second class, and 125 Chinese in steerage. From Shanghai: Mrs. T. W. Kingsmill, Mr. T. W. Kingsmill, Mr. T. F. Pettus, and Mrs. M. Pettus in cabin. From Kobe: Mr. M. Seligmann in second class.

Per British steamer *China*, for San Francisco:—Mr. F. E. Theodor, Mr. B. J. Franklin, Mrs. Franklin, Rev. J. N. Hayes, Mrs. Hayes, three children and infant, Rev. C. T. Reid, three children and infant, Mr. C. Beurman, Mr. J. F. Rodewald, Mrs. Lee, Misses Alice and Annie Hoar, Professor Fenollosa, Mrs. Fenollosa, Miss Fenollosa and maid, Mr. W. J. Hill, Mrs. Hill, Dr. Hausknecht, Captain H. Gosch, Mr. P. Schramm, Mr. J. B. Sargent, Mrs. Sargent, Capt. E. Thatchler, Mr. Douglas Sladen, Miss Sladen and child, Miss Lorimer, Rev. T. W. Pigott, Mrs. Pigott and child, Mr. J. F. Morris, Miss Morris, Miss Kellner, Mrs. H. A. Howe and child, Mrs. Sandford, Master F. B. Strange, Mr. J. Hoangsberger, Dr. J. Dudgeon, Mrs. Dudgeon and three daughters, Miss Waters, Mr. C. S. Meeks, Dr. Rigby, Rev. F. S. B. Grainger, Rev. A. C. B. Pereira, Messrs. G. Perille, R. Binnie, G. Beckett, R. Beckett, F. H. Nalder, D. Munn, Miss Harris, Miss Loomis, Master Loomis, Mrs. Thwing, Rev. A. P. Thwing, Miss M. J. Goodwin, Mr. J. H. B. Warner, Mrs. Warner and European servant, Messrs. E. Butler, G. E. Martin, Neville, Lomax, R. Miyabara, Rolfe, Berg, Holley, Rev. Mr. Seckaforse, Mr. R. E. Withers, Mr. A. A. Mello, Mrs. S. E. Laine, Miss Lewis, and Miss Niles, M.D., in cabin.

Per French steamer *Oxus*, for Shanghai via Kobe:—Mr. E. Kellmann, Mr. Chan Sam, Mr. Max Slegt, Mr. Th. H. Thomann, Mr. James Knox, Mr. W. Pease, Mr. Juan de Otaquiere, Mr. Guillermo Catigbac, Mr. Marciano Arguelles, Mr. and Mrs. de Sonnaville, infant and amah, Dr. Bell, Mr. Gardiol, Mr. Octave, Captain Browne, Mr. H. Keitel, Mr. Jordan, Mr. and Mrs. Robert Tannahill, Mr. H. G. Barker, and Miss Marie Destrez in cabin.

Per Japanese steamer *Saikio Maru*, for Shanghai and ports:—Mr. and Mrs. Pott, Mr. and Mrs. Kennedy and child, Mrs. Yoshisuge and child, Bishop Nicolai, Viscount Saisho, Mrs. Yamawaki and child, Mrs. Bremner, Dr. Wagner, Messrs. Narikawa, Sondheim, Sale, Watanabe, Nakamura, Takagi, Evans, and Togo in cabin; Mr. and Mrs. Miyoshi, Mrs. Murata, Mrs. Oyagi, Messrs. Ota, Lee Chee Sing, Lee Chee Hen, Ogawa, Makuda, Aeshi, Kusai, Mrs. Yamawaki's two children, Miss Miyoshi, and Miss Shinagawa in second class, and 145 passengers in steerage.

REPORTS.

The American steamer *City of Peking*, Captain Cavarly, reports:—Left San Francisco the 14th June at 3:37 p.m.; first 24 hours fresh gale from W.N.W. with heavy sea and swell; thence to Honolulu smooth sea and light E. winds. Arrived at Honolulu the 22nd at 5:21 a.m. and left at 2:45 p.m. carried N.E. trades to 28° N. and 160° E. thence fresh southerly to S.W. winds, moderate sea, rainy overcast weather. Arrived at Yokohama the 5th July at 4 p.m., detained off Cape King 9 hours by dense fog.

The British steamer *Parthia*, Captain Pantou, reports:—Left Victoria the 21st June at 9:20 p.m.; had moderate to fresh variable winds with dull rainy weather to 23rd; from 24th to 27th inclusive strong westerly wind and heavy head sea; 28th and 29th moderate S.W. to N.W. winds, overcast and hazy, crossed meridian the 29th, lat. 49.16 N.; July 1st and 2nd strong W. wind and very heavy head sea; 3rd to 5th inclusive, light variable winds, overcast and hazy; 6th strong head wind and sea, foggy; 7th detained for 4 hours by fog, 9 a.m. made the land.

The French steamer *Melbourne*, Captain Vimont, reports:—Left Marseilles the 1st June at 5 p.m., called at Alexandria the 6th and same day at Port Said; passed Suez Canal the 7th, experienced in the southern portion of the Red Sea foggy weather, and reached Aden the 12th; passed Guardafui Cape the 13th at noon, experienced a strong monsoon with very heavy sea, which broke the rails and some stanchions on the starboard side aft; called at Colombo the 19th; thence light breeze. Arrived at Singapore the 24th inst. Arrived at Saigon the 26th and left the 28th at 10:30 a.m., from there to Paracels kept S.W. winds with smooth sea; thence calm easterly breeze with easterly swell. Arrived at Hongkong the 1st July at 5:30 a.m. and left at 7:30 p.m., thence to the Lanoeks, calm and smooth water, from there light westerly breeze, which became strong after Turnabout to Tai Chow; thence N.W. winds; passed Steep Island the 4th at noon, and anchored at Woosung the 4th at 9 a.m.; left the 5th at 2 p.m.; experienced foggy weather to Quelpaert; thence to Straits strong head wind with rough sea; passed Shimouzeki the 7th at 9 a.m. and anchored near Kobe Point the 8th at 3:30 a.m., came alongside the pier at 6 a.m.; left Kobe the 9th at 5:30 a.m.; had fine weather and smooth sea; passed Rock Island the 10th at 3:30 a.m.; thence foggy and rainy weather and strong current. Arrived at Yokohama at 10 a.m.

LATEST COMMERCIAL.

IMPORTS.

The Market has continued fairly active for English Yarns at former quotations. Bombays have been in request at an advance of \$1 to \$1.50 from the lowest point, in sympathy with the advance in native spinnings. Shirtings have also met with a moderate enquiry, but the market is somewhat quiet at the close. Sales for the week amount to about: English Spinmings 1,500 bales, Bombays 800 bales, and Shirtings 27,500 pieces.

COTTON PIECE GOODS.

	NEW YORK.	PRICE.
Grey Shirtings—8 1/2 yds. 39 inches	\$1.55	to 2.00

METALS.

No change to report in this market. The aspect and prospect are both gloomy. Japanese seem to content themselves with enquiring for things which are not in stock, while holders are unable to move the various lots which they have in godown. Quotations all nominal.

Flat Bars, 4 inch	\$2.90 to 3.00
Flat Bars, 6 inch	3.00 to 3.10
Round and square up to 3 inch	2.90 to 3.10
Nailrod, assorted	Nom.
Nailrod, small size	Nom.
Iron Plates, assorted	3.20 to 3.30
Sheet Iron	3.60 to 3.90
Galvanized iron sheets	6.50 to 6.75
Wire Nails, assorted	4.00 to 4.75
Tin Plates, per box	4.80 to 5.10
Pig Iron, No. 3	1.40 to 1.50

KEROSENE.

Nothing fresh here. Market dull and buyers holding off, hoping for some reduction in price. Deliveries continue fair. Country demand reported good, and the Tokyo market is rumoured to be a little firmer.

QUOTATIONS.

Chester	Nom. \$7.775 to 1.80
Comet	Nom. 1.75 to 1.775
Devoe	Nom. 1.725 to 1.75
Russian	Nom. 1.70 to 1.725

SUGAR.

Holders grip firm on Takao Sugar, and hence there has been nothing done in this description. One batch of White Refined has been moved off at \$8.20 per picul for 500 piculs, and another at \$7.40 per picul for 851 piculs. During the week receipts of Canton Whites have been large, and the market is weak for all White sorts.

White Refined	\$5.90 to 8.50
Manila	3.70 to 4.50
Taiwanfoo	— to —
Pentana	2.85 to 2.90
Namida	2.80 to 2.85
Cake	— to 3.70
Brown Takao	4.20 to 4.25

EXPORTS.

RAW SILK.

Our last issue was of the 3rd instant, and gave statistics up to the close of the old season. Since the 1st of this month, settlements in this market reach 288 piculs, divided thus:—*Filatures* 205, *Re-reels* 72, *Hamatsuki* 11. Direct export has been 35 bales, making the total business of the ten days equal to 325 piculs.

When last writing prices were fairly strong on the basis of some reduction on top rates. These have held pretty steady through the week, but buying has been confined to one or two firms who seem able to pay more than their neighbours. From all we can learn as to the state of the crop in Europe, and having regard to the poor news received from consumers, we cannot see that present prices are warranted.

Holders are fairly strong at present quotations. Encouraged by the buying which goes on from day to day they are loth to believe that prices can and must recede before any really large business will be done. Usual reports about bad weather interfering with the balance of the crop, inferiority of cocoons this season, great demand for native manufacture &c., are put round to bolster up the market. But with silver increasing in value from day to day we think holders will have great difficulty in preventing prices from receding at an early date.

There have been three shipping opportunities this

month so far: American, Canadian, and French mails of the 6th instant all carrying some silk: the *China* 278 bales, *Batavia* 10 bales, *Oxus* 104 bales, thus making the export for present season to date 458 piculs, against 521 last year and 1,546 on 11th July, 1888.

Hanks.—No business has been done this month. Dealers ask high prices, talking of \$600 for good to best *Joshu* and \$550 for *Hachioji*. At these figures no buyers appear.

Filatures.—The chief trade has been in this class, and full rates have been paid: *Gakosha* \$745, *Kaimeisha*, *Hakuzuru* and equal \$730, *Kairoscha*, *Shichi-yo-sei*, *Kanayama* and similar, \$720. In *Kosha* sorts a nice parcel of *Kusanagisha* was done at \$712½. First arrivals of the *Susaka Filatures Tokosha* and *Shimeisha* are coming in; price asked by the owners is \$730, but probably a slight reduction might be accepted. These are said to be reeled from true *Shinsu Cocoons*. For Europe very little has of late been done—a few boxes Old silk *Usen* fetching \$690.

Re-reels.—Small business in these; holders are firm and want low figures. Last prices paid were *Tortoise* \$695, *Kife chop* \$685, *Kodama* \$670. *Fire Girl* chop is now arriving. Holders ask \$700, but would doubtless take \$690, although at the moment no one makes the offer.

Kakeda.—Silk from this district is appearing on the scene, but at present no business has been done in it. There are only a few piculs as yet on the market, and the dealers are asking about \$680 for silk equal to *Hana-musume* and *Red Shishi*. No shipper seems anxious to operate at these figures.

Oshu.—Some few bales *Hamatsuki* have been taken into godown for Europe, but the price has not yet been fixed.

WASTE SILK.

Since the 1st inst. settlements reach 135 piculs, divided thus:—*Noshi* 38 piculs, *Kibiso* 80 piculs, *Mawata* 3 piculs, *Neri* 14 piculs.

All the purchases made have been in Old fibre; so far the arrivals of New stock are not large, and sellers do not seem in any hurry to push their wares. On the other hand, shippers are content to await developments and in consequence nothing is done.

The French mail steamer *Oxus* of the 6th inst. carried 123 bales *Noshi* and *Kibiso* for Marseilles: the export figures to date are consequently 508 piculs, against 85 last year, and 829 on the 10th July, 1888.

Pierced Cocoons.—Nothing has yet arrived. The people up-country do not appear eager to send their produce down, until there is a settled outlook for values here.

Noshi.—In old fibre some little trade has been

done a parcel *Tomioka filature* bringing \$140, and some low-common *Joshu* \$25 to \$40.

Kibiso.—The business has all been in ultra-common qualities at the low figure of \$11 first cost. Considerable parcels of this class were shipped to Marseilles by last French steamer *Oxus* on the 6th instant.

Mawata.—Nothing done beyond the sample of which we spoke last week. This may lead to further business in the future, but at present no fresh sales have been made.

Neri.—Some bales of refuse done at \$3 for the rough stock in its uncleaned state.

We still withdraw all quotations until some business is done in New fibre.

TEA.

There has been a steady demand during the week, averaging 1,077 piculs per day, with slightly easier prices; receipts, too, have been about equal to the daily purchases. The grades of second crop of Common and Good Common show some improvement over those of the first crop, but the remaining grades, more especially Fine and upwards, are exceedingly dark in cup. The American ship *Francis* takes a full cargo for all distributing points of the Eastern States and Canada. The next mail will bring us full details of the *Belic* and *Abyssinia* sales. Latest wire information is not cheering, and sales are slow. We leave quotation unaltered.

	PER PICUL.
Common	\$11 & under
Good Common	12 to 13
Medium	14 to 15
Good Medium	16 to 17
Fine	18 to 20
Finest	21 to 23
Choice	24 to 27
Choicest	28 to 30
Extra Choicest	31 & up'd's.

CONTRACTORS TO THE ADMIRALTY, LEADING STEAMSHIP COMPANIES, AND YACHT OWNERS.

STEAM LAUNCHES & YACHTS,

Fitted with KINGDON'S PATENT MACHINERY (of which we are sole makers) are far superior to any others. The chief advantages are:—

1. Wonderful Economy of Fuel.
2. First-class Workmanship.
3. Moderate Price.
4. Greatest obtainable power for weight and space occupied.
5. Quickness in raising steam.
6. High rates of speed guaranteed.
7. Absence of noise and vibration.

We build Steam Launches of every description, from the smallest also suitable for carrying on yachts of 10 tons and upwards. We also build small light Draft Paddle Boats, Tugs, Stern Wheel Paddle Steamers, and Boats in Frames, &c., &c. We supply sets of Machinery separately. Illustrated Catalogue in English, French or Spanish. Send for Copy to

SIMPSON, STRICKLAND & CO.

WORKS:
DARTMOUTH, SOUTH DEVON (ENGLAND).

LONDON OFFICE:
181, QUEEN VICTORIA STREET, E.C.

MACHINERY.—Mr. ARTHUR WADHAM, proprietor of *The Machinery Market and Exporter* (illustrated)—the greatest machinery business journal published—(subscription 12s. 6d. per annum post free); London Agent of Messrs. Simpson, Strickland & Co., steam-launch builders, is also a large exporter of Machinery and Engineering Materials. Mr. Wadham is open to act as sole Buying Agent in England for one or two good firms in Japan desiring to deal with a reliable house. Mr. Wadham's intimate knowledge of the English Machinery and Engineering Trades enables him to save large sums to foreign customers placing their orders in his hands. Firms dealing with Mr. Wadham may rely upon being served in a prompt and straightforward manner. Address:—Mr. Arthur Wadham, Engineering Offices:—181, Queen Victoria St., London. Registered address for telegrams:—"Wadham, London." June 28, 1890.

THE GREATEST WONDER OF MODERN TIMES. HOLLOWAY'S PILLS.

PERSONS suffering from weak or debilitated constitutions will discover that by the use of this wonderful medicine there is "Health for all." The blood is the fountain of life, and its purity can be maintained by the use of these Pills.

SEN SEWAL BAKER, in his work entitled "The Nile Tribunes in Abyssinia" says—"I ordered the druggist Mahomet to inform the Fakir that I was a doctor, and I had the best medicines at the service of the sick, with advice gratis. In a short time I had many applicants, to whom I served out a quantity of Holloway's Pills. These are most useful to an explorer, as, possessing unmistakable purgative properties, they create an undeniable effect upon the patient, which satisfies them of their value."

SIMPLE, SAFE, AND CERTAIN! HOLLOWAY'S OINTMENT

Is a certain remedy for bad legs, bad breasts, and ulcerations of all kinds. It acts miraculously in healing ulcerations, curing skin diseases, and in arresting and subduing all inflammations.

MR. J. T. CHURCH, in his account of his extraordinary travels in China, published in 1891, says—"I had with me a quantity of Holloway's Ointment. I gave some to the people, and nothing could exceed their gratitude; and, in consequence, milk, fowls, butter, and horse feed poured in upon us, until at last a teaspoonful of Ointment was worth a fowl and any quantity of peas, and the demand became so great that I was obliged to lock up the small remaining stock."

Sold by all Chemists and Medicine Vendors the throughout World. May 1st, 1890.

KEATING'S INSECT POWDER.

BUGS, BEES, MOTHS, BEETLES, and all other Insects, are destroyed by KEATING'S INSECT POWDER, which is quite harmless to Domestic Animals. In exterminating fleas the success of this Powder is extraordinary, and no one need be troubled by those pests. It is perfectly clean in application. Ask for and take no other than "KEATING'S POWDER," as imitations are numerous, and fail in giving satisfaction. Sold by all Chemists, in Tins and Bottles. May 3, 1890.

NOW READY,

WITH COLOURED PLAN,
A FULL REPORT on the ERUPTION of BANDAI-SAN, being a reprint from the "JAPAN MAIL" of copious translations from Tokyo Journals, a Description by "Our Reporter," and an "Editorial," written after a visit to the locality. Price 50 Cents.

To be obtained at the *Japan Mail* Office, or of KELLY & WALSH, Limited.

YARROW'S SMALL STEAMERS AND STEAM LAUNCHES.

SCREW STEAMERS WITH SPEEDS RANGING UP TO 30 MILES AN HOUR.

NOTICE TO CORRESPONDENTS.

No notice will be taken of anonymous correspondence. Whatever is intended for insertion in the "JAPAN WEEKLY MAIL" must be authenticated by the name and address of the writer; not for publication, but as a guarantee of good faith. It is particularly requested that all letters on business be addressed to the MANAGER, and Compoes be made payable to same; and that literary contributions be addressed to the EDITOR.

YOKOHAMA: SATURDAY, JULY 19, 1890.

BIRTH.

On the 16th instant, at No. 5, Water Street, the wife of A. HEVNE of a daughter.

SUMMARY OF NEWS.

H.I.H. PRINCE HARU visited the Emperor and Empress on the 14th instant, returning home at 5 p.m.

THE name of the Dogashima Detached Palace has been changed to the Hakone Detached Palace.

HIS IMPERIAL HIGHNESS PRINCE FUSHIMI proceeded to Narashino, Chiba Prefecture, on the 14th instant.

VISCOUNT ENOMOTO, Privy Councillor, will start from Tokyo about the beginning of August for Hokkaido.

H.I.H. PRINCE KACHO, who had been staying at Atami for some time, returned to the capital on the 10th inst.

PRINCE TOKUGAWA, who had been staying at Atami for some time, proceeded to Kamakura on the 11th inst.

THE line of the Sanjo Railway Company between Utsu and Tatsuno was opened on the 10th instant for traffic.

COUNT ITAGAKI will publish a newspaper, to be named the *Yifu Shinbun*, in Tokyo, commencing on the 1st August.

H.I.H. PRINCE HARU will leave Tokyo on the 27th instant for Okitsu, Shizuoka Prefecture,

where His Highness will stay for three weeks, afterwards proceeding to the Hakone Detached Palace.

ON the 4th instant three persons were killed by lightning at Takatacho, Nishikunito, Oita Prefecture, four others being injured.

THE line of the Osaka Railway Company between Kashiwabara and Nara, which is now in course of construction, will be completed in August.

ANOTHER sale of 3,000 bags of foreign rice has been notified by the Finance Department to take place on the 18th instant at the Osaka Granaries.

CHOLERA returns from Nagasaki show a diminution in the virulence of the epidemic, but cases of sporadic character are reported from many other places.

A MEETING of the Marine Products Society was held at the Shiba Detached Palace on the 10th instant, at which H.I.H. Prince Komatsu presided.

MR. MIYOSHI, Judge of the Court of Cassation, who is now in Berlin, has been ordered to return home. It is stated that he will be nominated by the Emperor a member of the House of Peers.

MARQUIS HACHISUKA, Governor of Tokyo, had a long interview with Viscount Tanaka, Chief of the Metropolitan Police, on the 15th instant regarding methods of preventing the spread of cholera.

THEIR Imperial Highnesses Princes Arisugawa, Komatsu, Fushimi, Kitashirakawa, Kacho, and Nashimoto have collectively subscribed yen 1,000 towards the Tokyo City Government fund for the relief of the distress in the capital.

THE ceremony of presenting certificates to the graduates of the Tokyo Middle School took place on the 15th instant, at which Marquis Hachisuka, and Mr. Watanabe, a secretary of the Tokyo City Government, were present.

THE various police and other officials of the Kanagawa Prefectural Government held a meeting on the 11th instant at the Kencho to discuss the question of the inspection and disinfection of passengers by railway to prevent the spread of cholera.

ANOTHER sale of 10,000 bags of imported rice has been notified by the Finance Department to take place at the Asakusa Granaries on the 21st instant. The same day 3,000 bags of foreign rice will be sold at the Hyogo Granaries by public auction.

THE ceremony of conferring certificates on graduates of the Tokyo Industrial School took place on the 14th instant. Addresses were delivered by Mr. Yoshikawa, Minister of State for Education, and Mr. Teshima, Director of the school.

MR. YOSHIDOME KYOSKI and other gentlemen of Tokyo have been permitted by the Tokyo City Government to organize a company under the name of the Japan Union Life Insurance Company with a capital of yen 50,000, the office being situated at No. 28, Morimotocho, Nichome, Shiba.

A FAREWELL entertainment was given at the Seiyoken on the 13th instant by Mr. Watanabe, Japanese Minister to Austria, who will leave Japan shortly for his post, to Viscount Tanaka, a Privy Councillor, Messrs. Kanda, and Tanaka, Senators, Saito, Director of the Commercial and

Industrial Bureau in the Agricultural and Commercial Department, Komatsuhara, Prefect of Saitama, and some sixty members of the Meiji Fine Art Society.

THE number of visitors to the Exhibition during the period from the 1st April up to the 13th instant was 891,704, consisting of 6,631 distinguished, 36,471 special, and 822,433 ordinary visitors, 25,983 being students and 189 foreigners holding special invitations. The daily average was 8,574.

ACCORDING to investigations made by the Customs Bureau in the Finance Department, the quantity of rice imported from abroad during the week ended the 12th instant was 181,186 piculs, of which 109,444 piculs were imported into Yokohama, 19,113 piculs into Kobe, 33,625 piculs into Osaka, and 19,004 piculs into Nagasaki.

ACCORDING to investigations made by the Customs Bureau in the Finance Department the exports from Japan during June last amounted to yen 4,673,045.530 and the imports to yen 7,124,532.890, the imports exceeding the exports by yen 2,451,487.360. During the same period bullion amounting to yen 690,080.800 was exported, yen 94,674.940 being imported.

HIS MAJESTY THE EMPEROR, accompanied by Marquis Tokudaiji, Grand Chamberlain, Count Yoshii, Vice-Minister for the Imperial Household, Viscount Higashizono, Colonels Okada and Vonedo, Chamberlains, and several officials of the Imperial Household Department, paid a visit to the Imperial University on the 12th inst, returning to the Palace at 12.30 p.m.

MR. MITSUKURI, Vice-Minister for Justice, Mr. Kurisuka, a private secretary of the Minister of State for Justice, Mr. Fukuhara, Director of the Accountants' Bureau, and several higher officials of the Judicial Department, held a private meeting on the 15th instant for the purpose of discussing the Law as to the re-organization of Law Courts.

A HALF-YEARLY meeting of shareholders of the Kanasawa Rice Exchange was held on the 11th instant. The receipts during the past half-year were yen 13,212.055, of which, after placing a sum to the reserve fund and setting apart the usual amounts as rewards to officers and business tax, yen 6,600 was appropriated as a dividend, at the rate of 44 per cent. per share per annum.

THE Manchester trade has improved, and the increased activity of a week ago has developed into quite a large business in English Yarns, though Bombyls remain unaltered. Fair enquiry has been made for Piece-goods, and moderate quantities of Shirtings, Velvets, and Italians have been taken. The Metal market is quiet, buyers holding off for lower prices, which must come in view of the recent movement in exchange, holders of large stocks here being now at a great disadvantage. No sales of Koresene are reported, buyers demanding a concession on present rates before again operating. Arrivals are heavy, no less than three ships from New York coming into port in one day. Very little has been done in Sugar. Only a moderate amount of Silk has been settled, exchange operating as a deterrent to buyers in view of the attitude of holders. Waste Silk arrives slowly, and little has yet been done. The Tea trade is fairly steady, stocks are ample, and prices are generally unaltered, though Common to Medium grades have slightly declined in value. Exchange rose steadily—and almost daily—during the week, but yesterday there was a slight relapse.

Original from

EDITORIAL NOTES.

CEREMONY OF CONFERRING PRIZES AT THE EXHIBITION.

THE ceremony of conferring prizes (*Hoshō Juyo-shiki*) on successful exhibitors at the Industrial Exhibition took place on Friday morning in presence of His Majesty the Emperor. The place was the large pavilion standing directly in front of the Permanent Museum—the same pavilion in which the opening ceremony was performed by His Majesty at the close of March. A spacious double Dais covered with purple cloth and bearing the imperial arms in white and gold, had been erected at the end of the pavilion opposite the entrance. It was reached by four flights of steps, two on the rear flanks and two at points in the sides directly opposite the Imperial seat, a richly lacquered chair standing beside a table covered with gold brocade. On the right and left of the more elevated part of the Dais where His Majesty's seat was placed, spaces were reserved for Princes and Princesses of the Blood, behind the former being grouped the Minister of the Household, Chamberlains, and other officials, and behind the latter, the Ladies in Waiting, the Chief of the Board of Ceremonies, and other officers of the Household. In front of the Dais two tables, draped with brocade, one close to the Dais, the other farther removed, indicated the places whence H.I.H. Prince Arisugawa, President of the Exhibition, and Mr. Kuki, President of the Board of Judges, respectively should report to His Majesty the results of their labours. Several days previous to the ceremony an elaborate schedule of regulations had been issued, showing exactly where each class of visitors should place themselves, and indicating precisely the procedure to be observed on arrival and departure. The consequence was that everything passed off perfectly, and that the crowd of distinguished personages who had the honour to be invited or who were present *ex officio* found their places without embarrassment. On the right of the Dais stood the Minister of State for Foreign Affairs, the Foreign Corps Diplomatique, and the members of the Board of Judges, the space behind them being occupied by the Japanese and foreign guests, the Secretaries of the Board of Judges, and the experts attached to the Board. Still farther to the right were grouped the President of the Board of Judges, the Chief Secretary of the Board and officials from Prefectures and Cities. On the left of the Dais stood the Cabinet Ministers, the President of the Privy Council, the President of the Senate, the Chief of Police, the Governor of Tokyo, &c., &c., and a little more advanced, on their left, where the President and Vice-President of the Exhibition and the chiefs of the various sections. Yet another group of officials of *shinin* and *chokunin* rank, with the principal exhibitors, occupied the space behind the Cabinet Ministers. The time for the assemblage of these various personages was fixed for 8.30 a.m. and precisely at that hour His Majesty drove out of the Palace Gates, reaching the Exhibition before nine, and taking his seat on the Dais at that hour. We need scarcely speak of the brilliancy of the scene or of the regularity with which everything moved. So soon as the last strains of the National Anthem had died away, H.I.H. Prince Arisugawa moved to the place appointed for the President of the Exhibition, and briefly reported the conclusion of the Judges' labours. The Vice-President, Mr. Hanabusa, then handed to the President a scroll containing the names of the prize-winners, and the President, in his turn, laid it before the Emperor. Then Mr. Kuki, President of the Board of Judges, advancing to the place appointed for that purpose, read a short statement of the opinions arrived at by the Judges, and at its conclusion the President, once more coming before the Dais, stood with bowed head while the Emperor spoke a few words expressing the Imperial pleasure at the progress indicated by the Exhibition, and satisfaction with the methods of management. This done, the actual business of presenting the

prizes commenced, the names of the successful exhibitors being read out by the Vice-President and the medals, certificates, &c., delivered to each person by the President. This part of the affair was necessarily long and tedious, its chief feature of interest for foreign observers being the genuinely Japanese display of self-possession and good manners made by the prize-winners, one and all. The lists not being yet published, we refrain from any necessarily partial attempt to indicate the chief successes earned, a detail which will doubtless be looked for with curiosity by those who have visited the Exhibition. We may say, however, that Prizes of Honour (*Meiyo-sho*) were obtained by seven persons; Prizes for Progress (*Shimpo-sho*) by 177; Prizes for Excellence (*Myogi-sho*) by 211; Prizes for Skill (*Fuko-sho*) by 3,966; Prizes for Competition by 15, and Certificates of Merit by 11,767. Thus the total number of prize-winners was 16,143. These distinctions, numerous as they seem, become really distinguished when we remember that the total number of classes of articles in the Exhibition is 168,711; the total number of articles 441,458, and the total number of exhibitors 80,147. The last item on the programme was an address of congratulation by the chief representative of Local Officials, after which the assembly broke up.

MR. LARGE'S ASSASSIN.

It was stated by the *Fiji Shimpō* in its issue of Thursday that the police had arrested two men suspected of being those who murdered the Rev. Mr. Large. We have been unable to obtain any further particulars, the police observing their usual praiseworthy reticence. The facts, as stated by our contemporary, however, are that the residence of Mr. Tsuna Mihachi, a milk-merchant, in Fujimicho, Azabu District—the same district as that of Mr. Large's residence—was entered by two burglars whose descriptions tallied with the accounts given by Mrs. Large and others of the assassins of April 4th. The two men were arrested on the 8th instant and are now undergoing a rigorous examination. One of them is a *shizoku* residing in Morimoto-cho, Azabu; the other's social position is not mentioned, but he is stated to have been living in the house of one Nakamori Kinoshita, at No. 19, Shinsakurada-cho, Shiba. The names of the men are said to be Kurosawa Komakichi and Imai Umekichi. The public will not be surprised if it learns that this, too, is a false alarm, though the fact that one of the burglars lives in Azabu, and that they were plying their nefarious trade in that district seem to indicate their identity with the murderers of Mr. Large. We had grown somewhat weary of hoping that the villains would be brought to justice, and we cannot pretend to be sanguine now. Still this last arrest has features. The remarkable skill with which Mr. Large's assailants wielded their swords, always seemed to us one of the most noteworthy features of the affair. No common man delivered such expert cuts and thrusts. They were the work of a *shizoku*, and holding this conviction, the news that a *shizoku* has been arrested for burglary in the Azabu District, seems to us decidedly suggestive.

ALLIANCE OF PROGRESSIVE PARTIES.

As already noticed in these columns, there is a movement on foot for the formation of an alliance between all the parties professing progressive principles. The movement originated with the *Kyushu Dōshi-kai*, but the idea is not new. When the public excitement on the question of treaty revision subsided last year, Mr. Yano Fumio, in a memorable article in the *Hochi Shimbun*, told his followers not to entertain any prejudice against other parties, their late uncompromising enemies, because a time would certainly come when it might be necessary to move with them hand in hand. The same sentiment has been repeatedly expressed by the two other *Kaishin-to* papers, the *Mainichi Shimbun* and the *Chōya Shimbun*, especially the latter. The organs of the various sections of the Liberal party were not slow to respond to the wish unequivocally expressed by the *Kai-*

shin-to journals, and the ground had thus been prepared, when the members of the *Kyushu Dōshi-kai* took upon themselves the task of mediation between the *Kaishin-to* and the Radical parties. So far, the *Dōshi-kai*'s delegates have simply obtained favourable bearing from the principal members of these parties, but nothing definite has been arranged for the attainment of the desired end, though it is reported that a meeting will be held some time in August, when the representatives of the parties concerned will deliberately consider the whole question. Meanwhile, it may not be without interest to reproduce what one of the leading magazines on the capital has to say on the subject. The *Kokumin-no-Tomo*, in its issue of the 3rd instant, makes some suggestions as to how the proposed alliance should be effected. The first thing to be done is that each of the parties contemplating alliance should definitely decide on the terms of union. Next, representatives should be appointed by each party to consider the general question of alliance. These representatives should have full powers to settle the whole business, and should, as far as possible, be appointed from among those who possess seats in the Diet, because it is in the Diet that the alliance, if formed, will be carried into effect. As to the conditions of alliance, the *Tokyo* magazine does not think them difficult to arrange. The published platforms of the parties to be allied agree on all the more important political and financial issues, and are now understood to coincide in their main features with the wishes of the electors. What the representatives have to do is to construct a general platform on questions concerning which the parties are fully prepared to agree. After this, the allied parties should appoint a common committee of investigation, whose business it will be to enquire into questions to be brought before the Diet. Other measures recommended by our contemporary are the establishment of a common club for the allied parties; the publication of the platform of alliance, and the holding of a large lecture meeting in Tokyo. In conclusion, the *Kokumin* advises would-be members of the union to pay due attention to the so-called "Independent" members of the Diet, for among them there are undoubtedly many who entertain progressive principles though averse to enrolling themselves in the ranks of a party.

AFTER THE ELECTIONS.

WRITING of the elections, the *Hochi Shimbun* says:—In no class of contest is the fate of rival candidates more quickly decided than in the wrestling ring. When the two combatants appear, with their arms extended and their shoulders raised to meet the expected shock, the spectators greet them with applause, and await with abated breath the result of the fray. Honour is in store for the winner; disgrace and humiliation are the fate of the loser. With this knowledge present to his mind each wrestler exerts every effort and exhausts every artifice to overcome his opponent; perspiration is not infrequently mingled with blood, and the on-lookers must often feel that they are in the presence of no mimic warfare. But when the contest is over there still remains to be considered the conduct of the combatants. It may be that the defeated one has been guilty of a breach of etiquette by throwing sand over his antagonist; or it may be that the victor has suffered himself in the heat of success to be betrayed into some expression or gesture of arrogance. Men who occupy prominent places in their profession are not guilty of such conduct. They never become inordinately elated by victory, nor are they greatly chagrined by defeat. The victor may often be seen to brush from the prostrate body of his foe sand that may have been cast up in the struggle, and victor and vanquished frequently leave the arena together with a friendly demeanour. When they meet again no trace of resentment is permitted to appear; they leave the result of their struggle in the hands of Heaven. This absence of resentment and kindred passions is due entirely to the fact that such men do

not allow personal feeling to enter into their contests. The contest for election to the House of Representatives may well be compared to the rivalry of the wrestling ring. In the very nature of things one must be defeated; and if it is honourable to gain victory it is no less honourable to suffer defeat. Though Konishiki may be defeated by Onaruto, the skill and ability of the former, which have made him worthy to be pitted against the latter, remain unimpaired in the popular estimation. Similarly it is to be desired that those who have been successful in the contest for election to the House of Representatives should comport themselves with becoming dignity, and that those who are defeated should accept their fate without resentment, and, profiting by the lesson they have received, endeavour to acquit themselves better in the future. There have been disagreeable and unpleasant incidents in connection with the elections; we hope their memory will not be perpetuated by the public acts of the candidates now that the contest is over, and that efforts will be made by those who were rivals to reconcile the discordant feelings that may have been aroused. Above all things it is to be wished that the electors and candidates of to-day should set before future generations an example of orderly and conciliatory conduct, the spectacle of which will not be without an important effect on Parliamentary elections in the future.

CANDIDATES AND ELECTED.

PREMISING still that we are not in a position to speak with certainty as to the exact proportion in which the various parties are represented among the members recently returned for the Diet, we give some closely approximate figures which will be found interesting. For the 299 seats already decided there were no less than 649 candidates, distributed in the following manner:—

	NUMBER OF CANDIDATES.	NUMBER ELECTED.	PERCENTAGE OF SEATS.
Independent	268	107	40 (nearly)
<i>Daido Danketsu</i>	129	62	49 (nearly)
<i>Kaishin-to</i>	130	50	39 (nearly)
<i>Aikoku-to</i>	50	30	60 (nearly)
<i>Shin-to</i>	47	19	41 (nearly)
<i>Kiushu Shinpo</i>	23	8	35 (nearly)
<i>Shu-to</i>	14	9	64 (nearly)
<i>Hoshu-to</i>	8	4	50

*Totals

From this table it will be seen that the number of Independent candidates in the field was more than double the number sent out by any other party, and that the *Aikoku-to* was most successful in respect of the percentage of its candidates who obtained election. It will also be perceived that the figures for the successful candidates differ slightly from those previously given in these columns. We do not pretend to pin our faith to any of the returns, but these latest seem at least as trustworthy as their predecessors.

ELECTIONS TO THE HOUSE OF PEERS.

THE election of Counts, Viscounts, and Barons to the House of Peers took place at the Nobles' Club on the 10th instant. The results of the voting are as follow:—

COUNTS.

(The total number of Counts is 74, of whom 15 are elected according to law by their peers.)

	BALLOTS.
Higashikaze Michitomi, ex <i>Kuge</i> , age 56	55
Matsura Akira, ex <i>Daimyo</i>	54
Ito Hirobumi, new noble, age 48	53
Yamaguchi Sakimitsu, ex <i>Kuge</i> , age 40	52
Uyesugi Mochimaru, ex <i>Daimyo</i> , age 40	50
Ogasawara Tadamasa, ex <i>Daimyo</i> , age 28	44
Hirohashi Masamitsu, ex <i>Kuge</i> , age 35	43
Ohara Shigetomo, ex <i>Kuge</i> , age 42	43
Nakagawa Hisanori, ex <i>Daimyo</i> , age 40	40
Reizei Tanemoto, ex <i>Kuge</i> , age 36	37
Matsukata Masayoshi, new noble, age 55	33
Tachibana Tomoharu, ex <i>Daimyo</i> , age 32	33
Katsu Awa, new noble, age 67	30
Marinokoji Michitaka, ex <i>Kuge</i> , age 42	30
Ii Naonori, ex <i>Daimyo</i> , age 42	27

(The total number of Viscounts is 297, of whom 70 are elected by their peers.)

Kageyukoji Sukekuni, ex <i>Kuge</i>	277
Tachibana Tameyuki, ex <i>Daimyo</i>	275
Nabeshima Naohyoshi, ex <i>Daimyo</i>	273

Ogih Yuzuru, ex <i>Daimyo</i>	271
Kano Hisayoshi, ex <i>Daimyo</i>	268
Tani Tarkki, new noble	266
Okochi Masatada, ex <i>Daimyo</i>	264
Hotta Masayasu, ex <i>Daimyo</i>	262
Matsudaira Noritsugu, ex <i>Daimyo</i>	261
Kyogoku Takamasa, ex <i>Daimyo</i>	248
Soga Sakenori, new noble	242
Mibu Motoaki, ex <i>Kuge</i>	241
Yenomoto Takeaki, new noble	240
Yonezu Masatoshi, ex <i>Daimyo</i>	236
Fukuba Bisei, new noble	235
Yamao Yuzo, new noble	235
Okabe Chishoku, ex <i>Daimyo</i>	234
Ogasawara Nagamori, ex <i>Daimyo</i>	234
Kaiyeda Nobuyoshi, new noble	231
Fujinami Kotarada, ex <i>Kuge</i>	229
Sengoku Masakata, ex <i>Daimyo</i>	228
Shinagawa Yajiro, new noble	226
Yuri Kosei, new noble	224
Fukuda Kotei, new noble	224
Mimra Goro, new noble	224
Hayashi Tomoyuki, new noble	223
Torii Chubun, ex <i>Daimyo</i>	222
Iitsutsuji Yasunaka, ex <i>Kuge</i>	219
Itakura Katsumichi, ex <i>Daimyo</i>	218
Yamaguchi Toyoshige, ex <i>Daimyo</i>	217
Shinjo Naonobu, ex <i>Daimyo</i>	217
Shimada Tadaakira, ex <i>Daimyo</i>	214
Hisamatsu Sadashiro, ex <i>Daimyo</i>	212
Honda Masanori, ex <i>Daimyo</i>	202
Yoshida Kiyonari, new noble	200
Tanaka Fujimaro, new noble	199
Kawada Kogemono, new noble	197
Matsudaira Nobumasa, ex <i>Daimyo</i>	196
Kuse Michiharu, ex <i>Kuge</i>	196
Funabashi Naomata, ex <i>Kuge</i>	196
Sano Tameaki, new noble	194
Kagawa Keizo, new noble	193
Takenouchi Kurekida, ex <i>Kuge</i>	192
Matsudaira Tadamori, ex <i>Daimyo</i>	189
Oseko Sadakiyo, new noble	188
Nomura Yasushi, new noble	183
Takatsuki Osanaga, ex <i>Kuge</i>	170
Torio Koyada, new noble	173
Shishida Ki, new noble	170
Ishino Kaichiro, new noble	168
Anki Shuzo, new noble	168
Kiyooka Kocho, new noble	164
Omiya Mochitsune, ex <i>Kuge</i>	161
Hijikata Hisanori, new noble	157
Yamaguchi Mitsukuni, ex <i>Daimyo</i>	157
Sakai Tadaakira, ex <i>Daimyo</i>	156
Tanaka Koken, new noble	155
Kuki Takayoshi, ex <i>Daimyo</i>	154
Gojo Tameshige, ex <i>Kuge</i>	154
Sugi Magobichiro, new noble	152
Naito Masatomo, ex <i>Daimyo</i>	149
Kuroda Kiyotsuma, new noble	168
Sagara Yoshisugu, ex <i>Daimyo</i>	144
Itoya Masaru, new noble	142
Nishiyotsutsuji Kimmaru, ex <i>Kuge</i>	140
Matsudaira Naohiko, ex <i>Daimyo</i>	139
Aoyama Yukiyoshi, ex <i>Daimyo</i>	139
Sasaki Yoshinori, ex <i>Daimyo</i>	138
Yamaguchi Hirokuni, ex <i>Daimyo</i>	138
Seki Hironao, ex <i>Daimyo</i>	137

BARONS.

(The total number of Barons is 104, of whom 20 are chosen.)

Nagaoka Moriyoichi, new noble, age 47	76
Watanabe Kyoshi, new noble, age 55	76
Makimura Masanao, new noble, age 56	75
Sengu Takatomi, ex-priest of the Idzumo Shrine, age 45	74
Kamiyama Guren, new noble, age 61	74
Kojitani Motobiko, new noble, age 61	74
Kikuchi Takeomi, new noble, age 39	70
Takasaki Goroku, new noble, age 54	69
Takasaki Seifu, new noble, age 54	68
Awayama Tei, new noble, age 63	66
Kaneko Arisari, former priest of the Iwami Shrine, age 44	66
Nakagawa Okinaga, former priest of the Nara Temple, age 38	65
Honda Chikan, new noble, age 60	64
Nishi-itotsuji Ayanaka, former priest of the Nara Kokubiji Temple, age 31	62
Maki Nagayoshi, new noble, age 54	61
Date Munetsun, ex <i>Daimyo</i> , age 38	55
Tsurudono Tadayoshi, ex <i>Kuge</i> , age 37	54
Sakitanu Tekinaga, former priest of the Nara Kokubiji Temple, age 25	53
Tamawatsu Masaki, ex <i>Kuge</i> , age 31	49
Komatsu Yukimasa, former priest of the Fudoin of Nara Kokubiji Temple, age 28	45

THE DIRECT EXPORT OF SILK.

THE *Jiji Shimpō*, in its article on the direct export of silk, says:—"If the advantages that accrue indirectly to the Yokohama silk merchants from the direct export of raw silk be

taken into account, the abolition of that branch of business must prove a serious injury to the country at large, inasmuch as the resident foreign merchants will naturally strive to profit by the occasion." One would be led from this to infer that the Dōshin Kaisha did an extensive business. The truth is, however, that their transactions are comparatively small, and if the company were non-existent to-morrow its demise would not prove to be "a serious injury to the country," as the purchases made by it for export would be taken by other buyers, and the producer be equally well off. Though we have not at hand at the moment the export figures of the Dōshin Kaisha, we have those of the entire direct export, of which the Dōshin Kaisha can only claim a portion. These are as follow for the past eleven years:—

YEAR.	TOTAL DIRECT EXPORT.	TOTAL EXPORT.
	Bales.	Bales.
1879-80	1,156	17,875
1880-81	2,940	22,344
1881-82	5,089	21,774
1882-83	3,741	28,716
1883-84	6,348	29,997
1884-85	5,641	25,402
1885-86	3,933	25,891
1886-87	3,759	26,370
1887-88	3,680	38,958
1888-89	2,826	41,264
1889-90	2,495	35,505

These figures speak volumes in rebuttal of the statement that the "abolition of the business (of the Dōshin Kaisha) must prove a serious injury to the country." They also show that since the maximum direct export was reached in 1883-84, the figures have constantly declined till last season's direct trade amounted to but little more than one-third of 1883-84. This is not surprising, for it is perfectly well-known in Yokohama that, owing to causes which we refrain from discussing, the Dōshin Kaisha has burnt its fingers pretty severely every year without exception. Then the question follows:—Is the Government to be called upon to support the losses of a company unable, through its own incapacity, to conduct its business without incurring bad debts?

THE HOUSE OF LORDS.

THE unofficial statement published in our last issue to the effect that all nobles connected with the service of the Imperial Household would be interdicted from sitting as elective peers in Parliament, is now confirmed by an edict in the *Official Gazette*, declaring that the following are ineligible for seats in the House of Lords by elections:—Chamberlains; officials of the Board of Ceremonies; Masters of Services to the Empress, the Empress-Dowager, or the Prince Imperial; officials of the Imperial Mews Bureau; of the Imperial Hunting Bureau; of the Imperial Cookery Bureau; of the Bureau of Palace Superintendence; of the Bureau of Court Auditors; and Stewards to the Imperial Princes and Princesses. The result of this edict is to unseat sixteen of the noblemen already elected by their orders, namely, two Counts, twelve Viscounts, and two Barons. The Counts are Madenokoji and Reizen; the Viscounts, S. Soga, Yamao, Iitsuji, Ogasawara, Omiya, K. Kagawa, Takatsuji, Nishi-yotsuji, M. Sugi, Yonezu, Fujinami, T. Matsudaira; and the Barons, Takasaki and Maki. It is to be observed that peers who sit in Parliament by virtue of their titles—*ie.*, Marquises and Princes—are not touched by the above interdict. Evidently the object is to keep the Imperial Family and every one connected with it entirely apart from politics. It seems a pity, however, that this resolve was not made public before the elections for the House of Peers.

There is a rumour that peers who are members of the Privy Council will decline the honour of election conferred on them by their Orders. In that event Counts Higashi-Kuze and Katsu-Awa, and Viscounts Yenomoto, Takaoka, Yoshida, Sano, Nomura, and Hijikata will retire, and other peers will have to be chosen in their stead. The new elections necessitated by these resignations and by the edict referred to above, will be quite important, since four Counts,

nineteen Viscounts, and two Barons will have to be balloted for. The motive of the Privy Councilors' abstention is obvious, since it is understood that their body is to occupy a position between the Emperor and the Diet, and independent of the latter.

AN ELECTION DILEMMA IN NAGOYA.

THE voting in Nagoya for the election to the House of Representatives of a member for the first district of the city, has resulted in a somewhat awkward situation, which the Law Courts have been called on to deal with. It seems that there are in Nagoya two gentlemen bearing the name of Horibe Katsushiro—we are taking the story told by *Nippon*—one the President of the City Assembly, who resides in Funairicho, and the other residing in Inuyamacho; and both are qualified to sit in the Diet. For Horibe Katsushiro 235 votes were cast, and of these 32 bore the address of the Funairicho gentleman, while the remaining 202 contained no indication showing which Horibe they were in favour of. For Mr. Kunishima Hiroshi a rival candidate, 134 votes were given. The local Authorities in counting the votes, placed to the credit of the President of the Assembly not only the votes which bore his name and address, but also those that were destitute of any address, and, comparing the total thus obtained with the figures for Mr. Kunishima, declared Mr. Horibe the former duly elected. But here the Mr. Horibe of Inuyamacho stepped forward and, avowing his belief that the ballots which had no address were designed for him, claimed that he had been elected; while Mr. Kunishima, seeing an opportunity of gaining advantage from the rivalry of the two Richmonds, claimed that the votes which did not describe Mr. Horibe's place of residence were void, which view if upheld will, of course, place him at the top of the poll. Meanwhile, Mr. Horibe (the President of the Assembly) has been officially declared the successful candidate, and has contradicted in our columns statements published in the Tokyo papers as to legal action alleged to have been taken on various grounds. The other Mr. Horibe, however, according to the *Nippon*, has laid his claims before the local Courts.

MESSRS. DEAKIN BROTHERS AND COMPANY, LIMITED.

THE subscription list for shares in this new limited liability company opened on Monday and closed on Wednesday evening, the brief interval of three days being considered sufficient to obtain the sum required. The projectors will probably have found that their estimate of the public readiness to invest is not exaggerated, and that in a few hours the required capital was all forthcoming. For undoubtedly the scheme, as submitted in the prospectus, is very tempting. We do not propose, however, to make any financial statement: investors have doubtless done that for themselves pretty carefully already. Besides, in such a business, the arithmetical records of the past are not the most important consideration. The sale of objects of modern art is an employment to which anybody with a certain amount of taste and a small capital may devote himself, but success depends upon the possession of qualities very rarely found combined in one person. There have been in this Settlement several instances of men who imagined that to furnish a parlour with so called "art objects" and to sit down there awaiting customers was a sure road to fortune. In fact they placed this kind of business in pretty much the same category as wine selling, an occupation to which broken down gentlemen have been in the habit of turning their indigent hands from time immemorial. The results of such a mistaken estimate are notorious. Nearly every one making the essay sank deeper in the mire of impecuniosity from which he had sought to raise himself by so rash an effort. Curio dealing requires just as much general and special ability as any branch of commerce. Of course we do not speak of dealing in the products of past times. Anyone who contemplates that must make up his mind to a careful and

assiduous apprenticeship of several years and to the expenditure of a large sum of money. Capacity to distinguish the good from the bad, the genuine old from the spurious new, can only be acquired by the practical experience of buying largely and paying dearly for one's blunders. But though to cater successfully for the public fancy even in modern art manufactures requires less training, it certainly demands that a man shall have taste himself, shrewdness, and judgment to appreciate, and tact to guide, the taste of his customers, and above all enterprise to contrive that in his hands before all others connoisseurs can be sure of finding the very best and choicest articles in the market. We are by no means sure that this last is not the most essential condition of all. It is at any rate the condition which Messrs. Deakin and Co. have succeeded in fulfilling completely, for at no other store in Japan can the connoisseur see a similar profusion of the choicest and most beautiful goods. A tourist coming to Japan may spend months here and visit curio-sellers in all the great cities, yet in the end he may go away without discovering the *chefs d'œuvre* which modern Japan has to offer unless he has recourse to the Messrs. Deakin's store. To pay a handsome dividend to its shareholders, the new company must be careful before everything to preserve this monopoly of choice supply. It can do so doubtless as long as the business is guided by hands such as those which have hitherto managed it so successfully. As a company, too, the prospects of the enterprise ought to be greatly improved, for naturally every shareholder will assist to advertise its excellencies and advantages. We believe, therefore, that the investment is sound, and that the stock will go to a considerable premium.

PARTIES AND LEADERS.

IN an able article in its last number, the *Kokumin-no-Tomo* discusses the relations between political leaders, and their followers at present. The immediate occasion evoking this discussion is a probable alliance of all the parties of progressive tendency, and the consequent need of a leader capable of exercising authority over the whole group of allies. The Tokyo journal declares that not one of the political leaders who have hitherto presided over parties, as, for instance, Count Okuma, Count Goto, Count Itagaki, Mr. Oi, and so forth, possesses the influence necessary for occupying the difficult position of a captain-general. The truth is, says our contemporary, that radical changes are about to be accomplished in the relations between political leaders and their followers. The relation between a leader and his party has hitherto been, "like that existing between the chief and his followers in a fraternity of knights-errant." The men who form, so to speak, the back-bone of the Liberal Party (using this term as including all the factions that have grown out of the defunct *Jiyu-to*) are the old soldiers of the wars of the Restoration, who fought under the command of Count Itagaki. The majority of the rest of his followers have joined him more from admiration of his personality than from political conviction, and whatever radical views they may at present entertain have been imbibed by them from their leader since they joined his party. As to the *Kaishin-to*, the personal influence of its leader is of a more intimate kind. Most of the prominent members of that party formerly held office under the direct or indirect patronage of Count Okuma up to the time of their retirement in his company. Thus in Japan leaders have created parties, not parties leaders. But our contemporary observes that great changes are taking place in the relative positions of leaders and parties. The transition is illustrated by a reference to the political history of the country in the latter days of the feudal régime. Some time before the Restoration, when the Imperialist (*Son-nô*) and anti-foreign (*Jô-i*) movements first began to disturb the quiet of the political world, the chiefs of most of the clans were able, by force of long established usage and prestige, to control the actions of their vassals. But before long the

latter began, by imperceptible degrees, to acquire more and more independence of action until at last the *Daimyo* became mere puppets in the hands of their retainers. A similar course of events is now taking place in the political world. The ranks of every political party are being swollen by the influx of a new race of politicians, who have little or no personal connection with their nominal leaders. If they obey those leaders, they do so simply because the latter occupy the position of command. Formerly parties derived their importance from the personal influence of their leaders, but now the weight of a leader depends entirely upon the character and influence of his followers. The seat of power has shifted from leaders to led. The *Kokumin-no-Tomo* illustrates this point by the case of Count Goto. That the Count is safe in his official chair in a *Sat-cho* Ministry, is, in the opinion of our contemporary, owing to his connection with the *Daido* Club, without whose support at his back his position in the Cabinet would be very different from what it is at present. The *Daido* Club no longer leans on Count Goto, but, on the contrary, Count Goto leans on the *Daido* Club. While the natural course of events is thus decidedly unfavourable to the further maintenance of their position on the part of the present leaders of political parties, an event is about to take place which will decide the question once for all, namely, the opening of the Diet. Hereafter party battles must be fought mainly within the doors of the Diet, and no leader who is not a member of the House of Representatives will, in the opinion of the Tokyo journal, be able to discharge the duties attaching to his position. The present leaders of parties, however, Counts Goto, Okuma, and Itagaki, are ineligible for a seat in the House of Representatives on account of their titles of nobility, while their prospect of obtaining a seat in the House of Peers is by no means assured. It may be, therefore, that their tenure of leadership will terminate with the opening of the Diet, and the question arises, who will succeed them? The *Kokumin* states for the present nobody can answer this question with any show of authority. As the future leaders of parties are to be found among members of the Diet, it would be as absurd to look for leaders before the opening of Parliament as to expect the birth of a child before the union of its parents. Our contemporary, therefore, advises those interested in the proposed alliance of progressive parties not to seek immediately for a leader to preside over their coalition. Should they be over impatient to obtain a chief, things may fall out with them as with the frogs in the fable: they will get a mere log or a heron for their trouble.

MISSIONARY CONFERENCE AT AOYAMA.

MONDAY morning's session of the Conference at Aoyama, Tokyo, was devoted to the reports of Presiding Elders and continuation of the examination of preachers' characters. The Presiding Elders, of whom there are six in the Conference, are chairman of districts, and their reports cover the condition of the entire work of the Conference. The reports showed that the year had not been as favourable as many previous ones, but that the ground already gained had been held and some slight advance noted. A vote was submitted to the Conference looking toward the changing of the Constitution of the Church, so that the General Conference, the legislative body, should be composed of an equal number of lay and clerical delegates, the laymen having been greatly in the minority heretofore. A large majority of the Conference voted in favour of the change. Rev. Mr. Hardie, Rev. Mr. Hiraiwa, and Professor Whittington were present as visitors from the Conference of the Canadian Methodist Mission, each addressing the Conference in a few earnest words. Mrs. Allen of London, who has been doing so much for the education of the negroes in America, was also presented to the Conference, as was also the Rev. Mr. Takanô of the Evangelical Association. The Anniversary Exercises of the ladies took place in the afternoon. They consisted of a Bible reading and an address, all by the ladies in

Japanese. Mrs. Chappell's report was full and very interesting. The ladies' work is very extensive and effective for good.

Tuesday morning's session was largely devoted to routine work. The most important action of the morning was the appointment of a Board for Deaconesses according to a recent provision of the church. The deaconesses that may be appointed by this Board are to be voluntary workers, taking no vows, but promising obedience to a few simple rules while remaining in that position. There are already several suitable candidates. Several young men were admitted into the Conference on probation after careful examinations. The question of admitting women as lay delegates to the General Conference was brought up and referred to the various churches for their vote next November, at which time the entire Church is to vote on this much debated question. Rev. T. H. Colthour, of the Methodist Protestant Mission, was introduced to the Conference, and gave just a word of greeting. The conference adjourned to meet on Thursday morning in order to give the committees time to prepare their reports.

INAUGURATION OF THE LEPER HOSPITAL AT KOYAMA.

THE Inauguration of the Koyama Leper Hospital took place on Monday the 25th of June. Monseigneur Osof and many missionaries were present at the ceremony. There does not exist among the Japanese the same repugnance as in the West to coming into the vicinity of Lepers, and in consequence the population of the district surrounding the Hospital flocked in considerable numbers to take part in what may be called the fête of these most unfortunate of human beings. The weather was magnificent, and from an early hour in the morning the spacious enclosure of the Hospital presented the appearance of a public celebration. The Japanese, too, not being disposed to do anything in a hurry, it resulted that the last rays of the sun had disappeared behind Fujiyama before the holiday-keepers began to wend their way homewards. Without attempting to build a luxurious habitation, Father Testevuide and his coadjutors have spared no pains to render the dwelling of the afflicted patients as comfortable as possible, a kindly intention which the generosity of friends and benefactors has enabled them to carry out with considerable success. The infirmary, the pharmacy, the dormitories, the bathing-rooms, the lavatory and the kitchen are all admirably arranged. A machine, equally ingenious and simple, brings an ample supply of water from the neighbouring river. Many a tourist visiting Koyama would be surprised, we imagine, to find such a display of talent in an establishment for lepers. Already twenty sufferers have taken refuge in this favoured asylum, and it is hoped that public charity will soon render possible the admission of a much larger number. When we remember that only 75 yen suffice to support a leper at the Hospital for the space of a whole year, it becomes evident that no very serious effort is needed to bring the comforts of the Hospital within reach of a wider circle. Behind the main building is a little oratory, whither the lepers repair, each after his own fashion—for there are various forms of faith among them—to invoke blessings on the heads of those who, for the sake of Christian charity, or from simple motives of humanity, have contributed to this good work.

CHOLERA INSPECTION AND FOREIGN VESSELS.

We observe in the *Nippon* a statement quoted from the *Kobe Fushin Nippo* which reflects very seriously on the behaviour of foreign ship-masters. Referring to the notorious case of the *Hesperia*, the Kobe journal avers that the contumacious disregard of Japanese Sanitary Regulations shown by that vessel, furnished a precedent which has been followed by many other ships. Since the disinfecting station was

established at Wada-misaki our vernacular contemporary says that several foreign ships have paid no regard to the signals displayed at the station but have moved on into the harbour, refusing even to return when summoned to do so by boats from the station. These lawless proceedings are condemned by the Kobe journal, and would be equally condemned by every one if their truth were established. But are they credible? We have never heard of any instance—since the *Hesperia*—of a foreign vessel deliberately ignoring or declining to obey the Japanese Sanitary Regulations. Such action would not for a moment be condoned by the Foreign Representatives, nor can we believe that it would be permitted by the Japanese. The right of the latter to enforce the Regulations is beyond all question, and the means of doing so are at the disposal of the sanitary officials. We suspect, therefore, that the Kobe journal has been misinformed.

MR. ALFRED EAST.

THE art critic of the *Royal Academy* writes:—"I have left myself but little space to speak of the landscapes—the department which is supposed to give colour to this year's Academy. But I ought, perhaps, to explain that it is principally by numbers, and the preference of the hanging committee, rather than by quality that they impart the distinction. Yet some noble canvases challenge attention. Sir Everett Millais' first moonlight landscape, 'The moon is up and yet it is not night,' is remarkable for the poetic character of the atmosphere and the beauty of the drawing. Mr. Alfred East's 'October glow, near Yardley Woods,' is one of the brightest and most charming works in the collection, painted with consummate ability and with admirable taste, palpitating with atmosphere and excellent in composition." The same magazine, speaking of Mr. East's exhibition of paintings made in Japan, says that it was "successful from every point of view" and Mr. East himself writes of it:—"My exhibition of the landscapes of Japan closed last Saturday; and I am glad to say it was a great success in every way. Nearly the whole of the pictures were sold."

A POLICE CASE.

A CURIOUS case has just been tried in H.B.M.'s Consular Court at Kobe. The defendant was a seaman called Augustus Cassidy, on board the ship *Gutiana*, and the complainant a Japanese jirikisha coolie, Tanaka Hikosuke, the charge being assault and battery with a claim for damages and medical expenses to the amount of \$1.45. On the 29th of June, Cassidy, being on leave, appears to have amused himself as sailors generally do in the foreign settlements, that is to say, by drinking bad whisky and worse rum. By six o'clock in the evening he had become a conspicuous object in the streets. There is no evidence indeed to show how he had previously been conducting himself, but two foreigners deposed that they saw a Japanese challenge him to fight at that hour, and as such challenges do not come from Japanese except under circumstances of great provocation, we may fairly conclude that Cassidy had set himself to make things lively. Immediately after the challenge the Japanese "either fell or threw himself down," being impelled to assume a prostrate position by some mysterious influence which the witnesses did not explain, but which is easily understood from the sequel, namely, that Cassidy "lifted the coolie up by the hair of his head and kicked him three or four times." After this escapade, which was not made the subject of any complaint, Cassidy seems to have continued entertaining himself in an undisciplined manner until half-past seven or eight, when he again appears upon the scene of testimony. Unfortunately, however, it is most confusing testimony. What we gather from it is, however, that Cassidy having struck down a Japanese so as to render him insensible, a rumour went abroad that he had killed the man, and a crowd collecting endeavoured to seize and beat him. An account given at the time by an English local journal says that

Cassidy escaped into a saloon which the crowd would have stormed had not the European inmates made a sortie and dispersed the people. This part of the affair was not elicited in court. From the evidence given there we learn only that the police endeavoured to arrest Cassidy; that he struck at them and tried to get away; that he was seized and taken within the railings of the Higo Hotel, and that while there one Japanese beat him on the head with a wooden clog, others hit him with bamboos, and altogether the unfortunate man was terribly mauled. The grave part of the affair is that Cassidy was then in the hands of the police. According to their testimony they held him on the ground and tried to protect him; according to the testimony of three foreigners the constables not only made no adequate attempt to protect him, but actually pinioned him while the crowd beat him. This latter view is almost incredible, and as the matter is under investigation by the Japanese Authorities we refrain, of course, from commenting on it. With Cassidy we have no manner of sympathy. He was evidently behaving like a wild beast, and if he found the performance hurtful to himself, that was only natural. But the police ought to have been able to protect him against the mob, and if it is proved that they made no resolute effort to do so, we trust that they will be suitably punished. Needless to say that the affair has evoked some of the hysterical writing which a portion of the foreign local press always indulges whenever there is any suggestion of misconduct on the part of the Japanese. It is hopeless, perhaps, to expect sobriety where vulgar applause can always be won by intemperance and anti-Japanese declamation. The Japanese police have a very difficult rôle to play. Their attempts to arrest foreigners are resisted with extreme violence, and in a manner which the law-breakers would never adopt towards constables of their own nationality. If they exhibit impatience or want of self-restraint, let them be duly punished, but, on the other hand, let foreign writers refrain from abusive and contemptuous utterances which serve only to aggravate the situation.

FORCED JAPANESE STAMPS.

AN incident which came to our knowledge the other day should serve as a warning to collectors of Japanese stamps. A gentleman resident in this settlement whose experience in the collection of stamps of this country is of the widest, was waited on by a Japanese, who offered for his inspection a lot of assorted stamps. These ranged from very old to quite recent issues, from the rarest to the most common, and the price put on them collectively amounted to several hundred dollars. An ordinarily careful examination disclosed nothing of a suspicious nature, and the purchase of the lot was in a fair way of being concluded, when it occurred to the purchaser to inspect the stamps by the aid of a strong glass. All or nearly all were at once found to be forgeries. The imitation was sufficiently clever to pass even careful scrutiny, but the magnifying glass made apparent numerous discrepancies.

THE SUMMER SCHOOL AND BISHOP NEWMAN.

We read in a local English journal an account of what is described as "a somewhat unpleasant incident." The members of the Japanese Young Men's Christian Association had been holding sessions in Tokyo for some days, and on Monday evening they arranged to have their last meeting, on which occasion Bishop Newman consented to give an address. The Bishop does not appear to have ascertained the hour fixed for the opening of the meeting. At all events he arrived late, and found that the meeting, having waited until some time after its regular hour, was receiving an address from a Japanese. We quote the sequel of the story from the journal which reports it:—

After the Bishop arrived, the Japanese address went on and on, although the Bishop was on the platform. As he was very tired, having been in his conference all day, and the room was very hot and close, he got up and went

outside. Some of the foreigners who have been unremitting in their efforts to make the Summer School a success, leaned over and spoke to the committee, apparently desiring that the Bishop should be allowed to speak as soon as possible for he was weary, and, being a man of 63 years, he naturally desired to get to rest as soon as convenient. Although this consultation was in whispered tones and disturbed nobody, it brought forth a sharp hiss from the boys in the audience. At half-past eight the Japanese address was at an end, but the Bishop had taken his departure under the advice of his friends, as there seemed to be no assurance that he was to be allowed to speak at all. This treatment of so distinguished a visitor as Bishop Newman, is strangely at variance with the well-known courtesy of the Japanese people, and can only be accounted for on the basis of the prevalent anti-foreign feeling. It was extremely discourteous on the part of the Japanese speaker to continue after the Bishop's arrival, as he well knew that the evening was to be devoted to Bishop Newman's address. It was equally discourteous on the part of Mr. Oshikawa, the superintendent, not to have politely asked the speaker on the floor to conclude his address after Bishop Newman had finished. Mr. Oshikawa has only recently returned from America, where, we will venture to say, although he had no such post of honour as Bishop Newman, he was never treated in any manner bordering upon the discourtesy he permitted to be meted out to Bishop Newman.

It is not easy to endorse all this. Bishop Newman promises to address a meeting. He fails to ascertain at what hour the meeting opens, and, arriving late, finds a Japanese speaker delivering an address. Under such circumstances the Japanese should certainly have brought his speech to an end as quickly as possible, seeing that the Bishop was an invited guest and a man deserving of all respect. But if this act of politeness was not performed, assuredly the Bishop's friends should not have attempted to have the speaker interrupted. If they did that they made an error themselves. And they made a still grave error in allowing such a report as the above to be published. To openly accuse the members of the Young Men's Christian Association of displaying anti-foreign spirit because they signified their objection to have an address interrupted seems extravagant, and certainly is not politic.

NORWICH UNION FIRE INSURANCE SOCIETY.

The report for the year 1889 of the Norwich Union Fire Insurance Society, presented to the proprietors at the annual general meeting on the 3rd ult., showed that the net premium income for the year ending 31st December, 1888, amounted to £639,827; while the net premium income for 1889 amounted to £677,641, showing an increase on the previous year of £17,814. After setting aside one-third of the premiums (£225,880) as a reserve against liabilities on policies not run off, the balance at the credit of profit and loss account, including the unappropriated balance, £160,518, brought forward from the previous year, is £230,408, out of which an interim dividend of £2 per share was paid in January last, a further dividend of £2 per share has been declared by the Board, and will be payable on the 5th of June. Bearing in mind the large amount carried to reserve, and undivided last year, the Board have decided to again declare a bonus of 10s. per share. The Directors regret that the losses for the past year have been abnormally heavy, especially in the home business, though there have been none of great individual amount. The United States business has yielded a fair profit. The undivided balance carried over to next year's credit is £159,908, due provision being made for the increase of liabilities not expired, £20,000 being added to the reserve fund, which will now stand at £370,000. The percentage of losses on premiums is 63.03 as against 53.61 in 1888, and 60.15 in 1887. The working expenses are about the same as in the previous year. The Directors recall to the shareholders their remark of last year, that a too confident belief in the permanency of their comparative freedom from loss should not be indulged in, and they, therefore, this year feel justified in saying that though the losses have been heavy, the business in its different branches is in a very sound condition, and that the results of fire insurance operations should always be averaged in order to obtain a true test of success.

KOREAN AFFAIRS.

Owing to some unaccountable delay on the part of the post office somewhere, correspondence

from Korea, which should have reached us nearly a month ago, is only just to hand. We publish it, however, for though the principal event to which it alludes is out of date, the general information and details given by the writer are full of interest. In a covering letter he adds:—"The Queen Dowager of Korea, who died June 4th, 1890, was the Queen of Ik Chong, who after a reign of but a few months died at the age of twenty. She has therefore been a widow, for ladies of any rank in Korea may not marry a second time, for 62 years. The successor to Ik Chong was his son, Hun Chong, who after a reign of about 15 years died without male issue. The Queen of Soun Chio, the predecessor of Ik Chong, was living at this time, and she designated Chul Chong, a young brother of Ik Chong, as king. It is said he was unmarried and engaged in selling pumpkins at the time he was called to the throne. He, however, answered the call of his country, had his 'hair put up,' just outside the great south gate, entered the city, was married and crowned king. He reigned seventeen years. He died without male issue. He had a daughter who was married to Prince Pak Yong Ho, of the *emule* of 1884 fame. She died a few months after the marriage. On the death of Chul Chong, the Queen Dowager, whose death is now mourned, she being the oldest person in the Palace, designated the second son of the Tai Won Kun as his successor. She adopted him as her son, and for 27 years has supported him on the throne. The Queen of Hun Chong is still living in the Palace, past three-score. Report has it this morning (June 16th) that she too is dead, but this is not confirmed and is given merely as a rumour."

"KIKITAI."

A CORRESPONDENT, signing himself "Kikitai," propounds questions which, as he evidently understands, could only be answered fully in a long article. We are obliged to him for the suggestion that such information is needed, and will take an early opportunity of explaining, as clearly as possible, the points to which he refers. Meanwhile we may briefly answer two or three of his queries. There is neither Grand Jury nor Common Jury in Japan: the jury system is not adopted at all. A prisoner is, in the first place, examined magisterially, and if it appears that a case exists against him, the charge and evidence are submitted for the purpose of the accused's trial by a Court of law. He then goes before a bench of Judges, who unite the functions of weighing the evidence and interpreting the law. If he is unwilling or unable to engage counsel to plead for him, the Court supplies the deficiency at the public expense, and the barristers for the prosecution and defence make set speeches, and examine and cross-examine witnesses precisely after the manner of an American or English Court. Witnesses are not sworn; they merely make a solemn declaration. As for the police, they are employed by the Central Government only, and they make arrests under warrant just as police do in the West.

SHANGHAI.

A RECENT issue of the *N.-C. Daily News*, referring to the heat in the Model Settlement, says that people there toss and tumble on their beds without obtaining the much needed rest. Here in Japan, however, fires by day and blankets at night are still a necessity, and we are getting into the middle of July. "Erik Andersen, an ex-American man-of-war's man, was found by the Police yesterday afternoon (1st inst.) on the Garden bridge in an unconscious state. He was taken to the Hongkew Station, but although remedies were applied, he died. The deceased was apparently a person who would be predisposed to apoplexy. Owing to the intense heat, a Mrs. Lapham, while in the Garden yesterday afternoon, was seized with a fit and had to be taken in a carriage to the Hospital, but she was dead on arrival." Distress in China seems to be almost chronic. At present people in the Wenchow district are suffering from the dearth and scarcity of rice, at other places they are pray-

ing for rain, and in the North fears are entertained that the crops will be a partial failure. The morning paper says:—"We learn from Wenchow that the people there are having a hard struggle for existence, as rice is exceedingly scarce, and consequently very dear. To relieve the distress, the officials opened the public granaries last Friday, and thousands rushed to them before daylight. Unfortunately two people were killed in the crush, while several were injured. If the people can manage to get over the next fortnight, all will be well again. Such has been the distress that the pawnbrokers refuse to take any more pledges, as they have no room left to store the articles. So far, the people are quiet, while the officials are in a manner helpless."

THE DUTCH IN ACHEEN.

THE Dutch appear to be following up their recent success against the Achinese. The *Strait Independent* says that "since the battle fought on the 11th May the Dutch troops have continued their onward march and carried everything before them. On Saturday they crossed the Edie river to give battle to the Achinese in what has until now been considered their own territory, but the latter declined the engagement and fled. On Sunday they went as far as Ediejoet, about fifteen miles from Edie, and slept at the place. On their way there the troops killed every one who resisted their advance and burned everything that was in their way. H. N. M. gunboat *Prins Hendrik der Nederlanden* followed the troops along the coast and shelled every position where resistance was likely to be offered. On Monday the Achinese tried to capture a *beting* on the hill opposite Edie, but although the little fort was only garrisoned by about 60 troops the enemy were repulsed with great loss, over 300 of their men remaining dead on the field. When our informant left Edie the Dutch were marching on Bagoh, with a view of capturing the Rajah of the place.

SAILING RACES.

THE Committee of the Sailing Club issue the following notices:—

On Saturday, the 19th July, 1890, there will be a race for all boats over 17 rating, start at 2 p.m.; club course, twice round; time limit, 4½ hours; prizes, under measurement handicap, one in each class; officer of the day, Mr. W. W. Campbell.

On Saturday, the 26th July, 1890, there will be a race for all boats over 17 rating; start at 1 p.m.; course, from an imaginary line between the Spit Buoy and a Flagboat moored inshore of same, around the Lightship (leaving same on port hand), the *Salvage Buoy*, the Lightship (leaving same on port hand) and finish across the starting line. Distance 17 knots. Time limit, none; prizes, under arbitrary handicap, first (presented), second, and third; officer of the day, Mr. E. Beart.

There will also be a race for 17 ratings only; start at 1.30 p.m.; course, the 17 rating course; once round; time limit, 4½ hours; prizes, under measurement handicap; first (presented) and second; officer of the day, Mr. E. Beart.

On Saturday, the 2nd August, 1890, there will be a race for all boats over 17 rating, start at 1 p.m.; course, from an imaginary line between the Flagstaff at British Naval Depot and a Flagboat anchored off the Grand Hotel, around a flagboat anchored off Yomioka, and the Club's North Mark off Tsurumi (leaving both same on port hand in rounding), and finishing across an imaginary line between the Bathing Barge and Flagboat. The Lightship and Honmoku Black and White Buoy to be left on starboard hand in going to Yomioka, and on Port hand in returning. A Flagboat will be placed at the North Mark which will display two white lights, one above the other, after dark if necessary. Time limit, none. Prizes, under arbitrary handicap, first, the *Roma Cup* (presented), second and third. Officer of the day, Mr. W. W. Campbell.

On Saturday, the 9th August, 1890, there will be a race for 17 ratings only, start at 1.30 p.m.; course, from an imaginary line between the Bathing Barge and Flagboat around a triangular course of two miles indicated by flagboats, four times round=8 miles. All flagboats to be left on starboard hand. Time limit, 6 hours; prizes, under measurement handicap, first the *Violet Cup* (presented), second, presented; officer of the day, Mr. Alan Owen.

On Saturday, the 16th August, 1890, there will be a race for 17 ratings only; start at 2 p.m.; course, the 17 rating course. Once round; time limit, 4½ hours; prizes, under measurement handicap, first and second; officer of the day, Mr. C. D. West.

THE ELECTIONS.

THE *Singapore Free Press*, referring to the elections in Japan, describes the regulations as to treating, bribery, rioting, and so on, as "very strict," and remarks—"What a happy time Japan will have while the elections are on."

Our southern contemporary will doubtless be interested to learn that the elections throughout the country have been conducted in the most peaceable manner; that the regulations for the conduct of the polling and the guidance of candidates and voters have worked admirably; and that the general results have far exceeded the most sanguine expectations of those who anticipated that the Japanese would carry themselves with dignity and sobriety on so momentous an occasion as the inauguration of their first Parliament.

CHOLERA.

The *Official Gazette* states that the outbreak of cholera at Kuchinotsu is due to germs brought from Shanghai by the *Foritomo Maru*. The grounds of this assertion are not given, but it cannot be denied that the neighbourhood of a country like China is a constant source of peril. Probably no summer passes without something like an epidemic of cholera at Shanghai or some other of the crowded, insanitary Chinese cities with which Japan is in virtual contact. Little if anything is known, however, of these visitations. The Chinese Authorities give themselves no trouble about them; no efficient steps are taken to check or control them, and there is nothing to prevent their becoming centres from which the pest spreads to any place within range of mischief. The propinquity of an empire so ill regulated in respect of hygienic matters is not happy for Japan.

Other places from which cases of cholera are reported are:—One case in the harbour of Wakatsu, Fukuoka Prefecture, in a vessel which came from Nagasaki; one case, a woman, at Akama-ga-seki, in a vessel from Nagasaki—a case of a man in the same ship had been previously reported; a case in Sawata, Gumma Prefecture—a man attacked on June 30th died on July 2nd; a case on the 7th instant in Kudzu-machi, Tochigi Prefecture; a case, on June 28th, in Mizubiki, Kagoshima Prefecture.

The disinfecting stations and hospitals at Nagaura and Wadamisaki are now fully equipped and provided with a staff of doctors and officials. At both places the Inspection Regulations began to be enforced from the 8th instant. The Nippon Yusen Kaisha steamer *Nagoya Maru* has been chartered by the Government to act as a watch-ship for the former station. The well known and popular official Mr. N. Mitsuhashi has apparently been again placed in charge of the Nagaura station, and Mr. Okoshi Teisuke of that at Wadamisaki. We read also, in the *Official Gazette*, that a thorough system of medical inspection and disinfection has been inaugurated at Shimonoseki and at Fusan in Korea.

The returns from Nagasaki since the 11th instant are as follows:—

July 12th	New cases 30
	Deaths 27
July 13th	New cases 30
	Deaths 25
July 14th	New cases 13
	Deaths 11
July 15th	New cases 26
	Deaths 6
July 16th	New cases 33
	Deaths 23
July 17th	New cases 40
	Deaths 7
July 18th	New cases 29
	Deaths 18

These figures bring the total number of cases since the commencement of the epidemic to 409 and the deaths to 232. Other cases reported are:—In Inouye-mura, Nagano Prefecture, one man attacked on the 6th, died on the 7th; in Maruko-mura, the same Prefecture, one woman attacked; in Horikawa-cho, Hiroshima Prefecture, a man fell ill on the 6th instant and died the same day; in Arai, Ehime Prefecture, a man was attacked on the 18th instant; at Wakatsu, in Fukuoka Prefecture, the case reported in a ship which had entered the harbour from Nagasaki, was followed on the 10th instant by two cases in the same ship; in Inai-mura, Miyagi Prefecture, and in Takagi-mura of the same Prefecture, two men were taken ill on the 6th instant, the case in Inai-mura terminating

fatally the same day. It appears evident from these returns that conditions favourable to the development of cholera, whatever such conditions may be, exist at many places throughout the empire, and that the danger of the disease, assuming an epidemic form has to be constantly kept in view.

It should be noted that although we record the Nagasaki cases in one group, they are distinguished in the official returns as cases in the town of Nagasaki and cases in its suburbs. We are not yet justified, perhaps, in forming any confident conclusion, but it certainly does seem as though the epidemic at Nagasaki had begun to lose its virulence. The number of new cases has fallen from 47 on the 11th instant to 14 on the 14th, a very remarkable diminution. Against this hope, however, is to be set the fact that the plague has not, on this occasion, reached anything like the dimensions it attained in 1885. Breaking out on August 20th in the latter year, the total number of cases up to the 31st of the same month was 303, and the total number of deaths 173. Then suddenly it developed great activity, and from September 1st to September 6th (inclusive) the number of new cases was 662, and the number of deaths 257. The maximum was reached on September 4th, when 221 persons were attacked and 64 died. There has been nothing at all so bad this year. From June 27th to July 14th the total number of cases was 303 and the total number of deaths 179, the maximum being reached on July 11th, when 47 persons were seized and fifteen died. And now the fresh cases have fallen to 14 *per diem*, a diminution which, unless the records of all previous epidemics be untrustworthy as precedents, may be regarded as the beginning of the end.

Other cases reported in the *Official Gazette* of the 15th instant are:—In Tokyo two cases of choleraic character, one in the Shinjuku suburb, the other in Asakusa, and one fatal case of true cholera on the 13th, in Matsukura-cho, Honjo; in Kurashiki-shima, Hiroshima Prefecture, a man who had returned from a visit to Nagasaki was attacked on the 11th instant and died on the 14th; in Futatsu-mura, Kumamoto Prefecture, four men were seized with cholera on a date not mentioned, and in Tamachi-mura, Yamaguchi Prefecture, one man fell ill on the 5th instant and died almost immediately; and at Namai-mura, in Ehime Prefecture, a case of choleraic character occurred on the 8th instant.

Other cases reported are:—One case each in Tameshige, Itogi and Yamashiro, Prefecture of Saga; one case each in Futate and Tomioka, Kumamoto Prefecture; one fatal case (a woman) in Onoye-cho, Yokohama; one case in Tanaka, Chiba Prefecture; one case (a woman) in Kosugimachi, Toyama Prefecture; one case in Kamisugi, Hiroshima Prefecture; and one case in Nakahagi, Yehime Prefecture. It would seem that the disease has taken some hold at Kuchinotsu, for there have been 18 cases and 12 deaths there since the commencement.

The disease evidently gains little head at Nagasaki but, unfortunately, the number of cases reported from other parts of the empire increases steadily. The following list is given in the *Official Gazette* of the 17th instant:—

At Shiki in Kumamoto Prefecture; one fatal case on the 14th instant.
In Morishita-cho, Asakusa, Tokyo; one case on the 14th instant.
In Gharano-ura, Kyoto; one case on the 14th instant.
In Akasube and Kuzukawa-mura, Nagano Prefecture, one case each on the 9th and 14th instant respectively, the latter fatal.
In Ju-mura, Kitago-mura and Totemachi-mura, Fuku Prefecture, one fatal case each, the first a man on the 14th instant, the second a man on the 13th instant, and the third a woman.
In Minami-mura, Iida Prefecture, one case on the 7th instant.
In Hirokawa-mura, Kagoshima Prefecture, one case on the 4th instant.

The three cases reported from Saga Prefecture in our last issue have all been traced directly to intercourse with Nagasaki.

The lists given in the *Official Gazette* of the 17th and 18th instant contains the following information as to the progress of the disease

in other parts of the empire:—At Hamamatsu-cho, Shiba, Tokyo; one case, a boy, on the 16th instant. At Okachimachi, Shitaya, Tokyo; one case, a girl, on the 16th instant. At Mishitamura, Shima-shimo-gori, Osaka; one case, a man, on the 16th instant. At Uchidacho, Yokohama; one case, a man on the 16th instant. At Izumicho, Kofu, Yamaguchi Prefecture, one case, a woman on the 13th, resulted fatally on the 14th. At Shimonoseki; one fatal case on the 18th instant. At Futayemura, Shimakomura, and Tomiokacho, Amakusa, Kumamoto Prefecture; one case each on the 17th instant. At Inadzusamura, Kamo, Shizuoka Prefecture; one case on the 13th inst. At Omioncho, Imidzu, Toyama Prefecture; one fatal case on the 15th instant. At Nakaicho, Nishikikita, Yamagata Prefecture; one fatal case on the 15th instant.

THE "NORTH CAROLINA INTELLIGENCER."

The first copy of a new journal, the *North Carolina Intelligencer*, has just reached us. It is a fine broad, clearly printed sheet, and we do not doubt that it will satisfy the requirements which have called it into existence, though upon this point we are naturally unable to pronounce any judgment. It presents, however, a point of some interest to foreign residents in Japan, since two of its columns are occupied by an account of the Japanese Court, by Miss (or Mrs.) E. R. Seidmore. The account is pleasantly written, but the ideas of its authoress are seriously mixed in some respects. She makes the Prince Imperial only three years old, though he was born in August, 1879, and yet she speaks of the Tokyo dancing class holding its weekly meetings at the Nobles' Club, whereas the Rokumeikan, where the meetings used to take place, has only become the Nobles' Club in prospect. Thus in one respect she is eight years behind the time; in another, several months before it. As for her description of the Emperor and his doings, we leave our readers to form their own estimate, observing only that we find them as far from the truth as the height of 60 inches assigned by her to the Emperor is below his real stature.

THE IMPERIAL NOMINATIONS TO THE HOUSE OF PEERS.

The *Nichi Nichi Shimbun*, writing of the elections to the House of Peers, says:—The elections by the constituencies and by the various orders of the nobility to the House of Peers have taken place, and now there only remains the nomination by the Emperor of fifty members, the result of which is awaited with much interest, as the persons thus sent to the Peers' House will, from their merits as well as by reason of the circumstances under which they are selected, form an important section of the House. A rumour has obtained currency to the effect that it is intended to limit the selection of the Imperial nominees to the orders of the peerage. We cannot believe such a rumour to be correct, for, in the first place, it is a view not countenanced by the Law of the House of Peers, and if it were carried out the whole beauty of the constitution of the House would vanish. The object of the Imperial nomination is undoubtedly to gather together the ablest men available, and though of course there are people of capacity among the nobles, still these do not embrace all whose presence in the House would be desirable. It is explained in connection with the rumour that the intention of the Government is to procure the admission to the Peers' House of those Ministers of State who may not have been successful in the recent election of Counts. But this is a meaningless explanation at best, for there is no reason why such Ministers should not be nominated to the House, and consequently there can be no cause for restricting the sphere of the Imperial nominations to that end.

THE FOREIGN TRADE OF THE CURRENT YEAR.

The *Tokyo Economist* (the *Keisai Zasshi*) of the 5th instant has an article under the above heading, in which it takes an unfavourable view of the present year's foreign trade. The return

for the first five months are the basis of its analysis. The following table shows the exports and imports of merchandise from January to May, inclusive, during the last three years, 1888-1890:—

Year.	Exports. Yen.	Imports. Yen.	Balance.
1888	23,765,000	26,942,000	Imports over Exports, yen 3,177,000.
1889	25,568,000	25,564,000	Exports over Imports, yen 4,000.
1890	21,703,000	33,473,000	Imports over Exports, yen 11,769,000.

Returns of bullion are as follows:—

Year.	Exports. Yen.	Imports. Yen.	Balance.
1888	3,023,000	3,925,000	Imports over Exports, yen 902,000.
1889	1,303,000	5,577,000	Imports over Exports, yen 4,274,000.
1890	4,815,000	760,000	Exports over Imports, yen 4,055,000.

It is seen from these tables that during the first months of the present year, the imports of merchandise exceeded the exports by more than 10 million yen; while as to bullion, the exports exceeded the imports by more than 4 million yen. Compared with the two preceding years, the imports of merchandise have increased this year in an extraordinary manner, while the exports have considerably fallen off. The increase of imports is attributed by our contemporary to the circumstance that most of the industrial enterprises which have lately sprung up throughout the country have commenced active operations, with the result that the importation of plant, fixtures, and materials is now being effected on a large scale. On the other hand, rice, which was exported last year to the value of no less than 7 million yen, has stopped going out of the country, and foreign rice is being imported in considerable quantities, the total value of the staple imported during the first five months of the year amounting in value to about 2,300,000 yen. It is true that the export trade of the country is mostly carried on during the latter half of the year; but still the *Keizai Zasshi* cannot persuade itself to believe that the excess of exports in the current six months will be large enough to cover the excess of imports in the past six. The tea trade offers no promising prospect at present, and as for silk, although the price is higher than it was last year, despite the recent appreciation of silver, it must not be forgotten that the produce of silk all over the world has been bad. To this latter circumstance, coupled with the desire of foreign merchants to ship samples of the new silk as soon as possible, the *Tokyo Economist* attributes the enhanced price of the staple. Reports from the interior lead our contemporary to believe that, with the single exception of the province of Iwashiro, the produce of the spring silk fell short of the usual quantity by 20 or 30 per cent. on account of the excessive rains in the early part of the year. Therefore, though the price is thus far pretty high, the quantity of silk exportable this year will be less than usual. Some people say that though the average rate of production is less than usual, the absolute quantity of produce throughout the country will not fall much short of the usual quantity, inasmuch as sericulture has of late been considerably extended in every locality, and has increased especially in the south-western provinces. But the *Economist* is sceptical as to the soundness of this view, and maintains that there is nothing to warrant the belief that sericulture is more general this year than it was last year. Our contemporary consequently concludes that there is little hope of the balance of trade being reversed by the exportation of silk and other articles during the present half year. Under these circumstances, should the rice-crop be a failure, a general and disastrous panic can scarcely be averted. Up to the present, however, the *Tokyo* journal notes with pleasure that the prospect of this year's harvest is not gloomy, and hopes that no natural calamity will happen to make worse what is already bad enough. We confess that, for our own part, we cannot en-

dorse the inferences drawn by the *Keizai Zasshi* from the trade of this year. Our contemporary seems to regard it as a calamity that imports should exceed exports, but no such theory commands respect among political economists nowadays. If a country happens to buy more than it sells in any particular year, the only conclusion to be formed is that purchases suit its convenience better than sales. Of course the obligatory import of bread stuffs owing to a failure of the home crops is a misfortune, but that is a question quite apart from the "balance-of-trade" problem.

THE JIZENKAI.

Good work continues to be done in Yokohama by this society. Five persons are constantly engaged several hours daily in making house to house visitations, and instructing the poor people in the danger attending the consumption of green fruit, stale fish, and other unwholesome food, in addition to supplying their wants in some degree. Other persons also devote a portion of their time as sanitary messengers, and there can be no doubt whatever that some of the districts visited would have become centres of pestilence had not these warnings been given. The drains are, of course, beyond the reach of the society's immediate operations, but even these sources of infection are not neglected, as wherever they are discovered in an insanitary condition they are reported, and pressure put upon the owners of property or the Authorities to remedy their unsatisfactory state. There is no end to the good that can be accomplished by a society such as the Jizenkai, especially in times of famine and pestilence, but of course the work is bound to be restricted by want of funds; and though this latter condition has not yet actually come to pass, so heavy has been the drain upon the resources of the society, that further assistance will be necessary if it is to continue its operations among the poor.

GOLD AND SILVER RATIOS.

The *Official Gazette* gives the following table of comparative values of gold and silver coins and of the pound sterling for the week ended the 12th inst., as derived from the returns of the Bank of Japan and the Yokohama Specie Bank:—

Days	Gold Coin. (Per yen 100) Silver Yen.	Pound Sterling. (Per £1) Silver Yen.
7th	119.632	A.M. 5.8715 P.M. 5.8715
8th	119.270	A.M. 5.8715 P.M. 5.8715
9th	119.270	A.M. 5.8715 P.M. 5.8358
10th	118.554	A.M. 5.8358 P.M. 5.8358
11th	118.554	A.M. 5.8358 P.M. 5.8181
12th	118.199	A.M. 5.8181 P.M. 5.8181
Averages	118.913	5.8448

The above averages show for gold coin a decrease in value of yen 1.327, and for the pound sterling a decrease in value of yen 0.0750 as compared with the previous week.

DEATH OF MR. ALFRED LISTER.

We regret to record the death of Mr. Alfred Lister, of Hongkong, on board the steamer *Belgie*, just as that vessel was entering port on Monday. Mr. Lister, who had filled various posts in the service of the Crown Colony for a period extending over twenty years, had not long returned from leave in England, but it had been mentioned in the Hongkong papers that he was compelled to go on sick leave, and it appears he was coming to Japan in the hope of being restored to health. Bright's disease is said to be the cause of death.

TAX ON IMPORTED RICE IN FRANCE.

The *Official Gazette* publishes telegraphic intelligence from the Japanese Consul at Lyons to the effect that the import tax upon rice, recently announced as having been decided upon by the Government, is to be imposed without doubt. France is not a large consumer of Japanese rice. Last year she only took 283,780 yen worth, out of a total export of 7,434,653 yen. The imposition of this tax will not, there-

fore, greatly matter to Japan. But as a point of fiscal policy on the part of France, the measure surprises us. The object of the Government in Paris should be to encourage and assist French merchants in Cochinchina, instead of hampering their trade with the mother country by levying a tax on their principal staple of export.

THE BANK OF JAPAN.

The amounts of convertible notes and reserves in the Bank of Japan for the week ended the 12th inst. were as follows:—

Convertible Notes.	Reserves and Securities.
Yen.	Yen.
Notes issued	Gold coin and bullion, 24,395,247
72,484,811	Silver coin and bullion, 26,030,211
	Public Loan Bonds, 13,479,450
	Treasury Bills, —
	Government Bonds, —
	Other securities, 4,731,192
	Commercial Bills, 3,950,721
72,484,811	72,484,811

Of the above total issue of notes, the sum of yen 3,512,412 is in the treasury of the Bank, and yen 68,972,399 in actual circulation, the latter showing an increase of yen 42,201 as compared with yen 68,930,198 at the end of the previous week.

CURIOUSLY FREIGHTED BREAD.

The *Yiji Shimo* says that a certain merchant recently forwarded some loaves of bread from Shimbashi by rail to a destination which is not mentioned. They went by luggage train and were consequently left in the van all night. The next morning when the porters came to remove the parcel for delivery, they found that rats had seized the opportunity of making a good meal, and that only the crusts remained. They found something else, too; namely, the corner of a piece of paper projecting from one of the holes gnawed by the rats. The paper proved to be a bank note, one of thirty which the economical sender of the loaves had adopted this curious method of forwarding, so as to save the cost of a post-office order or bill of exchange.

THE RIDE ACROSS ASIA.

The journey across Asia by a Cossack officer and his Mongolian pony, the particulars of which we recently reproduced from a Russian journal, has been successfully completed. The following appears in papers just to hand:— "Captain Pyeshkoff, the traveller, who has just traversed Siberia and Russia on horseback, arrived at St. Petersburg at twelve o'clock on the 31st ult. He was the object of a most enthusiastic reception, and surprise is everywhere expressed that such a feat could have been performed on the small and rather bony white horse which the traveller rides. Many cavalry officers met him at his entry into the city, and cheered him heartily. M. Pyeshkoff is to be presented to the Czar at the Military parade."

SPHERES OF PARTY INFLUENCE.

An interesting analysis of the spheres within which the various political parties exercised most influence at the recent elections is given by the *Kokumin-no-tomo*. According to our contemporary, the *Doito* party obtained a maximum of support in the Prefectures of Niigata, Yamagata and Aomori; the *Kaishin* party in Toyama Prefecture; the *Aikoku* party in the Prefectures of Hyogo, Fukui, and Kochi; the *Yichi* party, in Kyoto city and the Prefectures of Yamaguchi and Wakayama; the *Kishu Shimo* party in the Prefectures of Saga and Kagoshima; the Conservative party in the Prefecture of Kumamoto, and the Independents in the Prefectures of Aichi, Shiga and Gifu.

DEGRON AND GABARETTA.

A motion for appeal in the Degron and Gabaretta case was heard on Monday morning in H.B.M.'s Court. After some discussion, however, the parties agreed to abandon the appeal and to accept the judgment which had been given for Degron for the amount of \$5,574.24, reduced to \$1,979.24 and costs, including Court costs, \$410. There were no costs for this motion.

A QUESTION OF POLITICAL MORALTY.

AMONG the many things that STANLEY related to his London audiences none excited more curiosity than the account he gave of the Pigmies of the Aruwhimi forest. For three thousand years at least a race of light-brown men and women, scarcely four feet high, have wandered over a country half as large as France, which is covered with huge trees. These trees are estimated by the traveller at ten thousand millions. They stand so thick that it is always twilight below their interwoven branches. The inhabitants of this forest-world know of no outside, not even by tradition. They live principally on bananas. The banana tree reaches maturity in 12 months in Aruwhimi, and its cultivation involves little trouble or labour. Are the Pigmies to be left in possession of these millions of trees, notwithstanding the fact that the supply of timber in Europe is running short? Judged by the law of progress this race of Pigmies have no right to the territory they hold. Throughout the whole history of man they have not advanced one step; they sow no corn and keep no stock; they do not even grow the bananas they eat. England would be justified in taking their territory from them. So argue some of the home papers. "The Aruwhimi are the lawful owners of the forest and no nation has a right to take it from them," so argue others.

The case of the Pigmies is certainly well adapted to test the right of one nation to seize another's territory. To say that the preaching and the practice of politicians never agree in the matter of acquiring territory is to utter a trite remark. The ordinary modern doctrine, paraded on political platforms in grandiloquent language, is that the original inhabitants of a country are its lawful owners; that no foreign Power has a right to seize territory on the plea of the backward state of those who own and govern it. But what takes place in the world is in direct contradiction to this law. Countries are seized again and again on the pretence of establishing a superior rule to that previously existing. The whole of India came into our possession in this way, and large portions of Africa are being added to our dominions week by week on the same plea. The views of those who in modern days are responsible for our English policy are succinctly stated by the *Spectator*, speaking of the Pigmy territory:—"Ought these little folk, probably not a quarter of a million in number, who do not advance, or show the slightest promise of advancing, to be allowed to shut out the progressive races from a magnificent country, which its possessors do not use, and which yields a product almost essential to man." This plea for aggression is by no means new. Though it cannot be reconciled

with any high law of morality, there is no denying that as a law of conquest in one or other of its many forms it is as old as the human race and, for all we can see, likely to be the law acted on to the end of time. The moral basis on which it is supposed to rest is that conquest, despite its many ugly features, is the only remedy for certain acknowledged evils; that, though the means it adopts set at defiance the moral code of our everyday life, its ultimate results are beneficial to the human race.

The view maintained by the *Spectator* in connection with our policy in Africa is that "when conquest raises the conquered or palpably benefits the world, conquest is a permitted weapon." But this method of settling the question is very unsatisfactory from a strictly moral point of view. It leads one to ask: has one nation the right to decide on the mode of life which another nation shall adopt? Men have different notions of what confers benefit on the world, and who is to determine which view is correct? Even granting that our standard is ideally perfect, what right have we to force our neighbours to live up to it? No; as a purely moral question, conquest is indefensible. The fact is that no politicians that have ever existed have found it possible to be guided by purely moral considerations. Politics consist of a series of twistings between expediency and rectitude. What is preached is almost universally the law of right: it makes such a nice text for a sermon. But what is practised where other nations are concerned is not absolute right, but right modified by the general situation of political affairs. So in East Africa. While no other European nation seizes territory, England can preach the doctrine of Pigmyland for the Pigmies, but with Germany in the field, the situation becomes altered. And so it comes about that the doctrine which Commodore PERRY preached to the Japanese in 1853, but which has been so frequently condemned in measured terms since, is dragged forth to the light again, in order to give the not-to-be-outdone policy on which the great Powers have acted for so long, an air of moral rectitude in the eyes of the unthinking masses that compose our English society.

Those who pull the wires of state are giving us stronger and stronger proof that they have reached the conviction that one condition of a successful political career consists in habitually ignoring, if not openly denying, the existence of questions of abstract right. All is relative in the sphere of international politics. A nation's rights are those which other nations allow it to exercise, its possessions those which its neighbours are kind enough not to take away. This state of affairs may be the best attainable, with human nature constituted as it is. The only thing we object to is to have it represented as a highly

moral state, and to see Englishmen standing before the world as champions of the law of right apart from interest. Why not be honest, and say at once that our rule is to acquire territory whenever we can, on the ground that if we do not take it, it will become the property of our powerful rivals? To out-do our European neighbours in colonising, this has been our ambition and our practice ever since the days of DRAKE. Call it jealousy, rivalry, covetousness, or what you will, it has been the making of us as a nation. The pretence that our pioneers are actuated by any regard for the benefit British rule is to confer on the world, is absurd. Personal gain and love of adventure have impelled us, and we have been by no means scrupulous as to our methods of clearing away the obstacles blocking our path. The air of rectitude which the acts of our pioneers are made to wear when retailed by members of Parliament for the benefit of the home folks is no part of their original character. The acts themselves were purely commercial; money was their ultimate end. When we have once acquired territory our rule undoubtedly has been beneficial, and in every case better than the one we have overturned. But benevolent intentions have never impelled us to commence our work of extension. It is the spirit of competition that sets us moving: we cannot afford to see ourselves outstripped. Neither can the retention of territory acquired be said to be more dependent on our supposed high morality than its acquisition. The permanence of our ownership depends rather on our capacity for developing all the appliances which make Government easy and successful, on the number and discipline of our armies, on the business inducements we can offer to settlers, on the untiring energy of the race to which we belong.

It may be well that we should remind ourselves of these facts at the present time. To bring forward the beneficence of British rule as a plea for seizing land in Africa can only deceive those who have never thought out the moral aspects of the land-seizing fever. The world is not governed by exclusively moral considerations, and never will be. How much better it were that this fact should be openly recognised, and that the illogical subterfuges advanced by a certain class of writers should be relegated to the limbo of Phariseism and hypocrisy.

THE HOUSE OF PEERS.

THE fact that only two Cabinet Ministers, Count MATSUKATA and Viscount AOKI, were elected by the nobles to seats in the Upper House is variously commented on. The strangest of all the inferences drawn is that it indicates the prevalence of radical tendencies among

the peers. We should have supposed, however, that if such a spirit really influenced the voting, it would have resulted, not in the exclusion of Cabinet Ministers, but in the election of nobles who are the acknowledged leaders of the radical party, as Counts ITAGAKI and GOTO. Had these politicians been returned and the Cabinet Ministers left without support, some grounds might have existed for attributing a radical bias to the nobles. But Counts GOTO and ITAGAKI obtained only thirteen votes each, whereas the last noble on the list of successful Counts obtained twenty-seven. Obviously, therefore, there was very little leaning towards radicalism among the Counts, since out of the sixty-seven who actually balloted, only thirteen cast their votes for the leaders of the *Jiyu-to* and the *Daido Danketsu*. Count OKUMA's case is also noteworthy. He is the head of a party which, though of progressive tendencies, cannot be called radical, and which is preëminent among all the political associations in the empire for the number of substantial and distinguished men included in its ranks. Yet it is a party virtually in opposition, and had the Counts been animated by hostile feelings towards the present Cabinet, they might have exhibited them to some extent by electing Count OKUMA and excluding Counts YAMAGATA and YAMADA. Considering the matter from every point of view, it seems to us that the influences directing the election were essentially conservative. The peers consist of two classes: those who represent the old feudal nobility, and these who owe their titles to meritorious services performed during the present reign. If the exclusion of the latter from Parliament were involved in their non-election by their order, the peers might fairly have been expected to show their appreciation of the Sovereign's creations by returning them for the Upper House. But, according to the Constitution, the EMPEROR has the right to fill by nomination as many seats in the House of Peers as those occupied by nobles sitting in virtue of their titles or of election by their Orders. Excluding members of the Imperial Family, the Upper House contains ten Princes and twenty-one Marquises, sitting by virtue of their titles; fifteen Counts, seventy Viscounts, and twenty Barons elected by their Orders; or one hundred and thirty-six nobles in all. It follows, therefore, that one hundred and thirty-six members may be nominated by the Sovereign. Of these nominees, however, forty-six are previously elected by the Prefectures and Cities—one for each from among the fifteen inhabitants paying the highest amount of direct national taxes, the Sovereign's nomination in their case being simply in the nature of approval. Thus the EMPEROR's direct nominees are reduced to ninety, as against one hundred and five Counts, Viscounts, and Barons

elected by their Orders. Knowing, then, that the Sovereign can always bestow seats in the Upper House on statesmen whom HIS MAJESTY has already honoured with titles of nobility for distinguished services, the peers probably decided to cast their votes for the representatives of old families whose chances of entering Parliament were otherwise small. The nobility, especially a nobility so aristocratic and exclusive as that of Japan, is never disposed to look with favour on modern additions to its ranks, and we cannot be surprised to find that out of their fifteen members the Counts elected only three new creations, namely, Counts ITO, MATSUKATA, and KATSU AWA. If may be taken for granted, however, that men like Counts INOUE, OKUMA, and ITAGAKI will not remain without seats in Parliament. Thus the result of the exclusive tendency shown by the Counts is that their Order will find itself much more largely represented in the House than would have been the case had the elective members included several of the new creations, for many of the latter will assuredly be nominated by the EMPEROR, whereas equal reasons do not exist for conferring such a distinction on representatives of the old nobility. We cannot doubt that this phase of the question was taken into consideration.

It might have been expected that the inferior orders of the nobility would show themselves less exclusive, and such has been the case, the Viscounts electing twenty-six new creations among their seventy members, and the Barons ten among their twenty. Many of the names thus chosen are significant. We need only quote those of Viscounts TORIO, KAYEDA, TANI, MIURA, and YOSHIDA (KYONARI), to show that the political bias of the Viscounts is decidedly conservative.

With regard to the contention advanced by some that the result of the elections for the Upper House amounts to a defeat of the Government, it cannot be denied that from one point of view there is a measure of justice in this inference, seeing that had the Cabinet Ministers been returned, the fact would have been taken as evidence of the nobles' endorsement of the Government's policy. But our own belief is that the nobles did not elect the Cabinet Ministers simply because they understood that the latter's seats in the House were already secured. Surely it is extravagant to contend, on the one hand, that the Government has been defeated in the elections for the Lower House since the Radicals have secured a majority of seats in the latter, and, on the other, that the Government has been equally defeated in the elections for the Upper House although the Radicals have not secured any seats there at all? That section of the Japanese House of Lords which owes its presence there to the titles and votes of the peers themselves, will, we imagine, be

found just as conservative as its counterpart in England. So far as may be foreseen, the Government's difficulty will be, not a union of the two Houses for radical ends, but their reluctance to unite in passing liberal measures.

DIRECT EXPORT OF SILK.

WE translate elsewhere an interesting article from the *Fiji Shimpō*. It surprises us and will also surprise our readers, for neither they nor we were prepared to find the *Fiji* advocating official interference with the course of trade. If the writer of the article had explained fully the considerations which, in his opinion, necessitate the continuance of direct export by Japanese silk merchants, we should be in a better position to appreciate his arguments. But he offers no such explanations, contenting himself with alluding vaguely to the "indirect advantages that accrue to the Yokohama silk-merchants from the direct export" of the staple, and to "the serious injury which the country at large must suffer by the abolition of that branch of business." What are those advantages, and what is this injury? We are too familiar with the generally able writing of the *Fiji Shimpō* to suppose that so singular a hiatus would have disfigured its reasoning if it had seen its way to lay before its readers clear and cogent arguments calculated to establish a sound case for the Japanese exporters. It leaves us, however, to form our own conjectures, and the task is difficult under the circumstances. For truly, with every disposition to view the Japanese side of the contention without prejudice, we are at a loss to discover how the country would suffer by the discontinuance of the so-called "direct export," or how the Yokohama merchants benefit by its continuance. One and only one practically useful function is suggested for the direct export company, namely, that its agents beyond the water would keep their countrymen in Japan well informed as to the state of the foreign market, and would indicate, by testing the taste of foreign consumers, what class of goods might be exported most profitably. We do not deny that there is some truth in this view. It is well that Japanese merchants should have direct access to the foreign markets, so as to familiarize themselves as closely as possible with all the conditions of the commerce in which they are engaged. But to contend that trade would suffer or that its development would be checked were that access cut off, is to assert, in so many words, that the foreigners now carrying on the business are so incompetent or perfunctory as to require Japanese coöperators. We beg pardon for saying that such a notion can only provoke a smile. Underlying it we detect, not calm reasoning, but the promptings of jealousy. The foreigners who now act as Japan's agents for the sale of her silk

abroad are shrewd, keen men, skilled in every detail of their business, and just as eager for its development as any Japanese could be. Every possible device for increasing the trade is practised by them; every phase of European and American taste is carefully watched and catered for; every suggestion of enterprise is considered and, if at all reasonable, essayed. We grant freely that to transfer to the hands of her own people the share which these foreigners enjoy in her trade, is a legitimate and praiseworthy aim on Japan's part. But that is a matter of sentiment, and the practical aspects of the case are our present concern. The truth is that with the business distributed as it is now, the larger part of the risk is borne by the foreigner. Japanese producers cannot, of course, be guaranteed against a failure of crop at home or against the effects of a languid market abroad. But between them and disastrous fluctuations of price in Europe and America stands the foreign merchant. Purchasing at this end and paying as he buys, he provides for Japanese producers a market at their very door, and shifts to his own shoulders all the delicate and hazardous operations of the trade. Enormous as has been the development of this country's silk trade during the past twenty years, we doubt whether even an infinitesimal fraction of that development can fairly be placed to the credit of direct Japanese exporters. Incentives to foreign consumption are not to be found by constituting the Japanese their own salesmen in New York or Lyons, but by improving the quality of the silk at home, and by abolishing disingenuous practices which necessitate elaborate operations at the hands of foreign inspectors and thus impose a heavy tax on the staple. All this has been written often enough before, but the *Fiji Shimpō* does not appear to have appreciated it. From a common-sense point of view our contemporary might have been expected to demonstrate, in the first place, the necessity of direct export by Japanese, and afterwards to discuss the means of carrying it out. But it assumes the former and advocates official aid for the latter. Official initiative or assistance in matters of commerce and industry is held to be admissible when the object is to start or encourage useful enterprises which would otherwise remain un essayed or undeveloped. But an essential condition is that such interference should not be permanent. In the abstract, an enterprise which, when fairly started, remains incapable of supporting itself without official aid, does not deserve to be supported at all. We learn from the *Fiji Shimpō* that the *Doshin Kaisha* has been enjoying Governmental protection for fourteen years. How much longer must it be furnished with official crutches before developing ability to walk alone? If its operations involved the exploiting of some novel and difficult route, there might pos-

sibly be a plea for renewing its term of infancy. But its sole purpose has been to try and do independently at Japanese public expense a business which is already done by foreign coöperation thoroughly, effectively, and with a maximum of profit and a minimum of risk for Japan. We are told that dearthness of money in Japan incapacitates a Japanese company from competing with foreigners in the export trade. But if this argument have any value, it must apply equally to every branch of that trade. The tea-men, the curio-merchants, and every other class of dealers in goods for Western markets would have an equal right to official support, all being similarly circumstanced as to costly capital. If it be really essential that Japanese agents should be stationed in the United States and France in order to keep their countrymen posted as to the condition of the foreign markets and the tendency of Western taste, the necessary funds should be supplied by a small contribution from each Japanese sericulturist and silk merchant. The Government has no proper concern with such matters; or, at all events, no concern beyond, perhaps, the attaching of a commercial agent to its Consulates in New York and Lyons. We should have expected very different writing from the *Fiji Shimpō*.

THE FUTURE CHRISTIANITY OF JAPAN.

UNDER this heading, Mr. J. T. YOKOI, a distinguished graduate of the *Dōshi-sha* School, contributes an interesting article to the June number of the *Rikugō Zasshi*. After observing that during the past three decades Christianity has steadily obtained a firmer and more extensive foothold in Japan, that from Sapporo in the north to Kagoshima in the south there is not a town or a village of any size that does not now contain more or less believers; that, though recently a conservative reactionary movement convulsed the land and efforts were made to resuscitate Buddhism and keep out the new religion, the nation has come to recognize more than ever the necessity of the vivifying influence of Christianity in elevating the morals of the people; and that he has therefore no manner of doubt that Christianity will ultimately be received by the people at large and that it will become the most important element of the new civilization Japan is developing—after making these statements, the writer proceeds to remark that Christianity, as it now exists in Japan, is in most cases nothing but an exact counterpart of Christianity as it exists in England or America, and that as yet there is nothing which can be called Japanese Christianity. This, he remarks, could not be helped in the early inexperience of Japanese converts. But times have changed. "Our Church has made great progress, and we are now experienced enough

to select from European and American seeds those which are good and suitable. The day has come when we can take steps for the development of Japanese Christianity. . . . In certain essential points, neither time nor space can make any difference in the religion of CHRIST. But in other respects, in matters of everyday life and thought, the Christianity of Japan cannot but differ more or less from that of England or America. There will not only be some difference between the two, but Christianity may possibly make a new growth here and develop some fine qualities not discernible in the older stock. I once spoke to some friends in Europe and America thus: 'In sending out missionaries to the East, you are not conferring a benefit on Orientals alone; you are conferring a great benefit on your own churches also. If you wish to see Christianity triumphant in the West, you will have to seek reinforcements from the East.' Christianity has attained its present stage of development in the Occident on the basis laid by Grecian literature and Roman jurisprudence. The Christianity which is about to spring up in the East must stand on the pedestal formed out of the religion of Buddha and the Confucian philosophy. Our Christianity must appropriate to itself, in the course of its development, whatever truth and whatever good qualities may be found in the religion of India and the philosophy of China. . . . It is therefore our wish to develop a system of divinity which in its essential characteristics shall be purely Japanese, and to originate religious rites and ceremonies which shall also be Japanese in character." In these attempts to create Japanese Christianity, Mr. YOKOI observes, however, that he and his fellow workers will not be prejudiced against seeking help from the hoarded experience of the West; they will not hesitate to adopt European and American ideas and customs, so long as these fit in with the Japanese character, history and polity. He then proceeds to recount some of the circumstances which have conspired to make the Church of CHRIST in Japan what it is now. He tells how, thirty years ago, European and American missionaries first introduced the new religion into this country; how the Japanese, in their childlike simplicity of heart, believed whatever these missionaries told them; how the converted Japanese preached the new religion exactly as they had learned it from their foreign teachers; how these being at the outset only a small number of believers, the converts were compelled to rely on foreign funds; how this last circumstance helped to encourage the pernicious custom of transplanting, as it were, Western principles and sentiments connected with Christianity without any modification; how Japanese pastors, co-working with foreign missionaries and using the money supplied by the

latter's churches at home, naturally refrained from giving expression to their occasional sense of dissatisfaction with some of the ideas propounded by the missionaries, and devoted themselves rather to their one absorbing hope of disseminating a knowledge of the new religion among their fellow countrymen; and how Japanese converts, even though they had been left to themselves, would not have possessed sufficient knowledge and experience to choose what was good and suitable. Among foreign missionaries, the writer further remarks, there were no doubt some men sensible enough to perceive the importance of considering Japanese character and customs in preaching Christianity; but after all, being foreigners, it was but natural that they should have been obliged to preach Western Christianity without any modification. "At first sight," Mr. YOKOI says, "the Church in Japan may seem to rest on a firm basis; but the plain truth is that our churches are virtually so many foreign colonies. . . . The thoughts and customs prevailing there indicate a wholesale introduction of foreign thoughts and customs. It is a fine thing to select whatever is good and beautiful from foreign countries; but nothing deserves to be more severely condemned than to blindly follow in everything the recommendations of foreign denominations and their representatives. As a result of such a practice, various abuses and evils have sprung up within the Church, and there is danger of our letting a golden opportunity like the present pass without courageously hoisting our own banners and fighting for victory on our own lines. Unless Christianity divests itself of foreign clothes and puts on a Japanese dress, it will never accomplish its object in this country." Farther on the writer says: "As the result of thirty years' training and experience, there have risen in our Churches a numerous race of capable men equal to any work of responsibility. There are even some among the foreign missionaries who, seeing this, have made up their mind to yield the principal positions to Japanese, remaining themselves as mere advisers and helpers to the latter. . . . The time has now come for Japanese propagandists to form their own estimate of CHRIST, and to make it known to their fellow countrymen. We must henceforth think independently and construct without assistance, so as to build a Church of Japan." With regard to the method of building such a church, Mr. YOKOI explains that the desired end is to be accomplished, not by holding monster meetings for discussion, nor yet by uniting the different denominations now represented in the country, but by the slow process of natural growth, just as plants develop from seeds. "We have only to believe in CHRIST as Japanese," he says; "only to study divinity as Japanese; only to preach as Japanese." All great religious reformers,

in addition to being devoted servants of CHRIST, have been enthusiastic lovers of their country. "What is now required to secure the complete success of evangelization in Japan is that there should rise up teachers like WESLEY, BEECHER, KNOX, LUTHER, and PAUL. The time is ripe. Where are the men to take up this responsible task?"

It may be taken for granted that this essay represents the feeling among leading Japanese Christians. There is something a little startling in the notion of modifying Christianity to suit Japanese requirements, and in the self-sufficiency which takes it for granted that the creed of the Occident will undergo some purifying and revivifying process in its passage through Japanese minds. Two or three years ago we were gravely informed by a Japanese of position that the ladies of his country, in adopting Western costume, would improve it and adapt it to their own fancies in some more elegant form. This phase of progress remains still in the future, nor do we discover any evidence whatever that our optimistic informant's predictions are on the way to verification. As to Christianity, however, one can understand without difficulty that the subtle controversies and exegetical intricacies which surround it in the West, stirring up bitter controversies and creating sectarian divisions, have little concern for the Japanese Christian at first. He is in a position to accept the unalloyed rudiments of the faith, and even to divest it of many of the supernatural elements which had their origin in the necessity of appealing to semi-civilized humanity's superstitious sentiments, and are now a fatal stumbling block to intelligent belief. Thus far, perhaps, the Japanese may improve upon the Christianity offered to them, and we can only hope that their remarkable self-reliance, as evidenced in Mr. YOKOI'S utterances, may not be impaired by failure. But with regard to the chances of really successful propagandism in foreign hands, all careful observers must be at one with Mr. YOKOI. No foreigner has ever yet succeeded in acquiring the Japanese language so thoroughly as to be able to preach or lecture in it without making himself more or less ridiculous. The most perfect system of morality will not endure lame exposition. If there is to be a really successful apostle of Christianity in Japan, he must be a Japanese. This the foreign missionaries themselves have always recognised. Running through the public utterances of the most enlightened among them there has been observable for many years a frank avowal that their functions as propagandists are only temporary, and that their cause will progress fastest when the Japanese themselves are able to push it without foreign aid. Yet it is distinctly a sign of the times that men like Mr. YOKOI should take up this cry. Among the imported ar-

ticles which, in their adoption by this country, are to be altered so as to acquire a Japanese character and to be re-adapted to Japanese manners and customs, we certainly should not have been disposed to place Christianity. But the world moves.

CHINESE DIPLOMATIC REPRESENTATION.

A CORRESPONDENT of *The Times* takes occasion of the recent change in the Chinese Legation in London to criticise very unfavourably the general system of Chinese Diplomatic Representation in Western countries. The authorities of Printing House Square must have thought the subject one of some importance, seeing that they give up two columns to its discussion in the Parliamentary season when space, and especially such a great space, is at a very high premium. To foreign residents in the East at any rate the subject is one of considerable interest, and to our own readers it will not be entirely new. Some time ago a correspondent described in these columns the internal condition of some Chinese Legations in a way which was anything but flattering. The writer in *The Times* only makes a passing allusion to this view of the matter. He refers in some detail to the position and character of the men who represent China abroad. He tells us that Chinese diplomatic representation in the West is about fifteen years old, and that a dozen or fifteen envoys have represented China during that time in various foreign capitals. It is therefore possible, he says, for those who are acquainted with the subject to observe certain general features and certain tendencies of Chinese diplomatic representation. He is careful to distinguish diplomacy, by which he means policy, from diplomatic representation; the one is the aim or result, the other the machinery. It is of the latter only that he speaks. Now what are the charges which he makes against the system? He declares that Chinese Envoys sent abroad are of lower relative rank than those of other countries, and this seems in fact to be the sum and substance of his complaint, for the other matters on which he comments flow naturally from that one circumstance. Being subordinate officials and subordinate Chinese officials, the Ministers are afraid to report unpleasant things or to obtrude their own opinions on their superiors in Peking, who are thus left to their own foolish devices, and seldom or never obtain that accurate information respecting foreign affairs which Governments always expect from their envoys. More than this, they are sometimes not above corruption, and where either the disposition or opportunity for this is wanting, they economise as only a Chinaman can, to the detriment of their own dignity and that of their country. As for corruption, three instances are

referred to in which Chinese Ministers abroad were degraded and punished for their offences. Two at least of these are well known to most residents in the East, for the official decree in each case was published in the *Peking Gazette*, and was widely discussed at the time. Without professing to know any more of these matters than the rest of the world, we should say that these statements of the correspondent are highly probable, judging merely from what we know generally of Chinese officialdom. The only class of officials who speak with a certain air of fearlessness are the censors, and this is expected of them; they are the chartered libertines of official life; they represent what in parliamentary countries is called the opposition; their business is to oppose, criticize, condemn. As for the average Chinese official, his extreme dread of initiating anything, his anxiety to be an administration without a history, his subordination to his superiors, are all well-known characteristics. His belief in the power and glory and superior civilisation of China is only equalled by his profound contempt for the West. As for his corruption, no writer in an eastern journal need labour that point. The consequence of all this applied to diplomatic representation is that the primary objects of such representation are defeated. The Government, already sufficiently proud and ill-informed, receives from its agents reports which only foster its arrogance and ignorance. Being itself without the information and the experience to form accurate conclusions on questions of foreign policy, it is served by agents who are either incapable of initiating a policy in regard to any particular country, or dread to press a policy on their superiors, and the sum and substance of the whole matter seems to be that if China desires to be adequately represented abroad she must select her best men. No doubt all this is true, but it appears to us that the correspondent of *The Times* has not by any means exhausted the subject; he has not told us for example how much of the wretched diplomacy of China abroad is due to the Chinese Government itself, apart from its representatives. No doubt he would answer that his particular business was to discuss the latter, and not to describe the shortcomings of the central Government, but we think that the latter properly find a place in a discussion on the subject. What, for example, can the strongest representative do when he does not know the minds of his masters, for the simple reason that they do not know them themselves? How many instances have we had in the last few years of treaties and conventions and agreements negotiated not only abroad but in China itself by Chinese representatives, which have either been refused ratification altogether, or the ratifications of which have been delayed for a long time? These were not cases of

representatives abroad forced to negotiate in the dark, while their Government was kept in ignorance of what was going on until it saw the finished instrument. In these days of the telegraph that is never done. The details of all important negotiations are regularly made known by telegraph to the Governments concerned, every line, every word, of treaties is telegraphed day by day, and the authorities in Peking have been made as well aware of what is going on in London or St. Petersburg or Washington or Chefoo as if they were on the spot and negotiating themselves. No minister, and above all no Chinese minister, now-a-days ever puts his hand to an important international document without having received the full approval of his Government to every line and word in it. So much is this the case now that ratification has become merely a formal ceremony. Yet how often has it happened in China that agreements are in the end refused ratification altogether, or that ratification has been delayed for months and even for years? Take as a small instance the Telegraph Convention, which was settled at Chefoo in the autumn of 1888. SHENG, the official who represented the Chinese telegraphic administration, was known to have telegraphed to his superiors everything he did, and finally, before signing it, to have despatched the whole document, yet this agreement has not been ratified we believe to this day. It may be a good or bad arrangement; upon that we pass no opinion now; what is quite certain is that it was negotiated and signed with the utmost deliberation and with the full knowledge of Chinese Government, and yet when the latter is asked to express its formal consent to it, it hesitates, finds fault, and finally refuses. The shores of Chinese diplomacy are strewn with the wrecks of treaties, conventions, and international agreements, not because Chinese representatives are deficient, but because the Chinese Government does not seem to know what dignity and good faith in a Government are. For these reasons we fear that the reform of Chinese diplomatic representation must begin in Peking and not in the Western capitals.

The correspondent of *The Times* refers very incidentally to the character of some of the Chinese taken abroad in the Ministers' *suites*, and specially refers to scapegraces of high birth who are sometimes sent. We cannot profess to know whether the writer had any particular individuals in his mind, but there can be no doubt in the minds of those acquainted with the facts that his criticism is abundantly justified. It is not long since one of the Chinese Legations in the West had an attaché who had for months been a fugitive from justice. He was a swindler of a peculiarly audacious and ingenious character, who had robbed both friends and enemies, who had induced his

dupes to break the law by a promise of bribes, and when his dirty work was done had refused to pay the wages. This scamp, who had broken almost every law, human and divine, continued his career in the country to which he was sent in some degree as a representative of China, and it was only by a hasty departure from it that he saved himself from unpleasant consequences. This is only an example of the carelessness with which Chinese are selected to go abroad; it would be possible to adduce many more, but it is undesirable at all times to complicate a question of this nature with personal considerations. In this matter of diplomatic representation Japan, happily, can furnish her neighbour with a pattern, which, however, it is hopeless to expect will be followed.

AMENDED ORGANIZATION OF THE DEPARTMENT OF COMMUNICATIONS.

IMPERIAL ORDINANCE No. 112.

We hereby give our sanction to the present Amendment of the Organization of the Department of Communications, and order the same to be duly promulgated.

(His Imperial Majesty's Sign-manual.)
(Great Seal.)

Dated June 30th, 1890.

(Countersigned)

COUNT YAMAGATA ARITOMO,
Minister President of State.
COUNT GOTO SHOSIRO,
Minister of State for Communications.

Article 1.—The Minister of State for Communications shall superintend all affairs relating to posts, telegraphs, guides to navigation, and the crews of vessels.

Article 2.—There shall not be established in the Department of Communications any Board for the Administration of General Affairs.

Article 3.—The Secretariat of the Minister of State for Communications shall deal with the following affairs, in addition to the matters allotted to the Secretariat and the Board for the Administration of General Affairs, mentioned in the General Rules:—

- (1.) The expenditure of the Department.
- (2.) The preliminary examination of finances.
- (3.) The construction of buildings of the Department.
- (4.) The purchase and sale of Departmental property.
- (5.) Superintendence of the manufacture of material for telegraphs and guides to navigation.

Article 4.—The following bureaux shall be established in the Department of Communications:—

Bureau of Posts.
Telegraphic Bureau.
Marine Bureau.
Lighthouse Bureau.
Accountants' Bureau.

Article 5.—The Bureau of Posts shall deal with postal affairs.

Article 6.—The Telegraphic Bureau shall deal with affairs relating to telegraphs.

Article 7.—The Marine Bureau shall deal with affairs relating to shipping and seamen.

Article 8.—The Lighthouse Bureau shall dispose of matters connected with guides to navigation.

Article 9.—The Accountants' Bureau shall manage affairs connected with expenditures, receipts, and the control of money and materials.

Article 10.—The Chiefs of the Postal and Telegraphic Bureaux shall be of 2nd *chakunin* rank or above 2nd *sonin* rank. The Chiefs of the Marine, Lighthouse and Accountants' Bureaux shall be of 1st *sonin* rank or above 3rd *sonin* rank.

Article 11.—The fixed number of councillors special to the Department of Communications shall be 2, and of secretaries 6.

Article 12.—Assistant chiefs shall be attached to the Posts and Telegraphic Bureaux.

Original from

Article 13.—Eight engineers shall be attached to the Department of Communications, to transact affairs connected with posts, telegraphs or accounts, or to conduct the business of offices (*kwa*) by holding additional posts as chiefs of offices in the Postal and Telegraphic Bureaux. Such engineers shall be below 5th *sonin* rank.

Article 14.—Ten examiners (*shiken-kwan*) and eleven assistant examiners shall be attached to the Department of Communications. The former shall conduct the examination and trial of seamen and pilots, the inspection and survey of vessels and the superintendence of new ships, under the control of the Marine Bureau, and the latter shall assist them in such duties.

The examiners shall be of *sonin*, and the assistant examiners of *hannin* rank.

Article 15.—Twelve engineers and two hundred and fifty-six *gishu* shall be attached to the Department of Communications.

Article 16.—Three probationers shall be attached to the Department.

Article 17.—There shall be employed in the Department 390 *soku*.

THE ORGANIZATION OF CABINET OFFICIALS.

IMPERIAL ORDINANCE No. 114.

We hereby give our sanction to the present Regulations relating to the Organization of Officials attached to the Cabinet.

[His Imperial Majesty's Sign-manual.]
[Great Seal.]

Dated June 30th, 1890.

(Countersigned.)

COUNT YAMAGATA ARITOMO,
Minister President of State.

Article 1.—The following officials shall be attached to the Cabinet:—
A Chief Secretary.

A President of the Bureau of Pensions.

A President of the Bureau of Archives.

A President of the Bureau of Statistics.

A President of the Bureau of the *Official Gazette*.

A President of the Bureau of Accounts.

Secretaries.

Confidential secretaries of the Minister President of State.

Examiners of the Pensions Bureau.

Probationers.

Zoku.

Gishu.

Article 2.—The Chief Secretary shall be of *chokunin* rank, and the chief of each bureau shall be of rank not higher than first class *sonin* and not lower than third class *sonin*, while the secretaries, confidential secretaries, and examiners shall be of *sonin* rank.

Article 3.—The Chief Secretary shall have charge of secret and important documents, shall superintend the miscellaneous affairs of the Cabinet in accordance with the orders of the Minister President of State, and conduct the appointment and removal of *soku* and lower officials.

Article 4.—The Chief of each Bureau shall manage affairs of his bureau; and control subordinate officials in accordance with the directions of the Minister President of State or the Chief Secretary.

Article 5.—The following affairs shall be dealt with in the Pensions Bureau:—

1. The examination and decision of claims for pensions and allowances (*fuforyo*).

2. The disbursement of pensions and allowances.

Article 6.—The Bureau of Archives shall deal with the following affairs:—

1. The preservation of originals of the Constitution, Laws, and Imperial Ordinances of the Empire of Japan, as well as the compilation and preservation of the records of the Cabinet.

2. The classification, purchase, preservation, and safe custody of maps and books under the control of the Cabinet, as well as the compilation of a list of the same.

3. The publication of maps and books belonging to the Cabinet.

Article 7.—The following affairs shall be managed by the Bureau of Statistics:—

1. The compilation of statistical tables of all kinds.

2. The arrangement of materials for statistical tables.

3. The collection of materials for statistical tables.

4. The calling of meetings of officials chiefly concerned with statistics in each Office and Department.

Article 8.—The following affairs shall be dealt with by the Bureau of the *Official Gazette*:—

(1.) The compilation, printing, sale, and distribution of the *Official Gazette*.

(2.) The translation of foreign documents to be published in the *Official Gazette*.

(3.) The compilation and sale of the *Horei Zensho* (Digest of Laws and Ordinances).

(4.) All receipts and outlays of the *Official Gazette* and *Horei Zensho*.

Article 9.—The following affairs shall be dealt with by the Bureau of Accounts:—

(1.) The financial estimates and settled accounts of expenditures and receipts, as well as the general finances of the Cabinet.

(2.) The control of lands and buildings used by the Cabinet.

Article 10.—Secretaries shall deal with affairs relating to the custody of secret and important documents, and with the inspection, drafting, receiving and delivery of public documents. The fixed number of secretaries shall be four.

Article 11.—The confidential secretaries of the Minister President of State shall conduct the affairs of the Minister's Secretariat, the fixed number of such confidential secretaries being two.

Article 12.—The examiners of the Bureau of Pensions shall deal with the affairs of the Bureau of Pensions, the fixed number of such examiners being two.

Article 13.—The fixed number of probationers shall be two.

Article 14.—The settled number of *soku* shall be one hundred and fifty.

Article 15.—The settled number of *gishu* shall be five.

Article 16.—Higher officials (*kokutan*) attached to the Cabinet may hold offices in the Bureaux of the Cabinet in addition to their other duties.

ADMINISTRATIVE BOARD OF THE HOUSE OF PEERS.

IMPERIAL ORDINANCE No. 121.

We hereby give our sanction to the present organization of the Administrative Board of the House of Peers, and order the same to be duly promulgated.

[His Imperial Majesty's Sign-manual.]
[Great Seal.]

Dated July 10th, 1890.

COUNT YAMAGATA ARITOMO,
Minister President of State.

Article 1.—The Officials of the Administrative Board of the House of Peers shall be as follows:—

A Chief Secretary.

Secretaries 10

Probationers 2

Zoku 20

Article 2.—The Chief Secretary shall control all affairs of the Board in accordance with the commands of the President of the House.

The division into offices of the Board, and the distribution of officials, shall be decided by the Chief Secretary.

Article 3.—Secretaries shall be under the superintendence of the Chief Secretary, and shall manage affairs relating to debates, records, reporting, printing, finance and miscellaneous business.

Article 4.—Should the Chief Secretary be incapacitated, a secretary of first rank shall represent him in his office.

Article 5.—*Zoku* shall be of *hannin* rank, and shall deal with affairs in accordance with the orders of the Chief Secretary.

ADMINISTRATIVE BOARD OF THE HOUSE OF REPRESENTATIVES.

IMPERIAL ORDINANCE No. 122.

We hereby give our sanction to the present organization of the Administration Board of the House of Representatives, and order the same to be duly promulgated.

[His Imperial Majesty's Sign-manual.]
[Great Seal.]

Dated July 10th, 1890.

COUNT YAMAGATA ARITOMO,
Minister President of State.

Article 1.—The Officials of the Administrative Board of the House of Representatives shall be as follows:—

A Chief Secretary.

Secretaries 10

Probationers 2

Zoku 20

Article 2.—The Chief Secretary shall control all affairs of the Board, in accordance with the commands of the President of the House.

The division into offices of the Board, and the distribution of officials, shall be decided by the Chief Secretary.

Article 3.—Secretaries shall be under the superintendence of the Chief Secretary, and shall manage affairs relating to debates, records, reporting, printing, finance, and miscellaneous business.

Article 4.—Should the Chief Secretary be incapacitated, a secretary of first rank shall represent him in his office.

Article 5.—*Zoku* shall be of *hannin* rank, and shall deal with affairs in accordance with the orders of the Chief Secretary.

CORRESPONDENCE.

BAD DRAINS.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—May I avail myself of your columns to draw the attention of the Authorities to a small matter which may, unless seen to, easily lead to serious results. Almost a week since I spoke to the police regarding the state of the drain at the corner of Yoshihamacho near Kame-no-hashii; and, although the officer expressed his thanks, nothing has yet been done. Possibly I failed to make myself quite clear. The drain has been choked for fully a fortnight, and with the hot weather and the danger of an outbreak of cholera, prompt attention certainly seems called for. The case only requires to be brought to the knowledge of the Authorities to be speedily remedied.

I am, Sir, yours faithfully, PEDESTRIAN.

Yokohama, July 11th, 1890.

THE PORTUGUESE IN HONGKONG.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—My attention having been accidentally drawn to an extract made by the *Japan Gazette* on the 11th instant from the notorious Hongkong paper, the *Telegraph*, I beg to ask a bit of space in your next issue for a few lines to contradict the chief substance of it.

The *Hongkong Telegraph* has, since its origin, established itself an arduous censor of the Portuguese community of Hongkong by continually, and regardless of truth, filling its columns with vile and contemptuous articles concerning the Portuguese.

The last slander cast on them by that paper, as far as I know, is the article reproduced by the *Gazette* on 11th instant referring to a case of forgery committed lately in Manila by a man named Jorge, a Spanish subject and of Spanish descendants.

As a coincidence, however, a fault of embezzlement was committed in Hongkong by a Portuguese youth bearing also the name of Jorge. This fact seemed to the editor of the *Telegraph* a propitious opportunity for blackguarding the Portuguese, so with utter disregard for truth and other principles, he ridiculously asserted the nationality of the Manila culprit to be Portuguese!

In obedience to every dictate of justice, the *Telegraph* should have first investigated the matter before inserting articles that only lead to contradiction.

Of the various communities in Hongkong, excepting of course the Chinese, the Portuguese ranks first in number, and can comparatively be said to be the most admired. The recent cases of embezzlement were, no doubt, due more especially to share gambling which is so strongly and detrimentally prevalent there; but such cases were not solely confined to the Portuguese; other communities were simultaneously and similarly stained, but by the unfair partiality which characterizes the *Hongkong Telegraph*, those of the latter were passed over with little or no comment!

In general, it cannot be denied that the Portuguese people, or rather the Macaoese are reliable, steady, and efficient workers.

Thanking you for the insertion of the above, I am, &c.,

FIAT JUSTITIA.

Yokohama, July 12th, 1890.

CONSTITUTION OF THE COURTS OF JUSTICE IN JAPAN.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—In the letter from the Tokyo correspondent of *The Times*, reprinted in your issue of to-day, appears the remark that lately a law has been

promulgated which "reorganizes the Courts of Justice throughout the Empire."

Now could you kindly enlighten at least one of your readers on this subject? Possibly everybody, excepting me, is fully informed; but to me a most interesting "leader" would be one setting forth the organization of the Japanese Law Courts, before and since this late change. In place of a jury I have heard they have a bunch of judges to decide the case, then another set at hand to see that the law is properly interpreted, &c. But I am not certain of the trustworthiness of my information.

How are witnesses sworn? Do the lawyers plead the cases in set speeches as at home? What is in place of the Grand Jury? Do the police act in place of sheriff? Are police employed by City authorities, the *Ken*, or the Central government?

You see the yawning gulf of my ignorance; please make an effort to fill it up. Perhaps a few other readers will thank you, too.

Yours truly, KIKITAI.
July 12th, 1890.

SANITATION AGAINST CHOLERA.

TO THE EDITOR OF THE "JAPAN MAIL."

Sir,—Since there is a possibility that the cholera, now epidemic at Nagasaki, will extend to other parts of the empire, I take the liberty of asking you to publish "Circular No. 8," issued by the United States National Board of Health. This circular is the simplest, clearest, most effective, and most economical register of directions for its specific purpose, I have seen. Its object is to enable persons of ordinary intelligence to destroy the poison of infectious disease in their immediate surroundings. The circular assumes the actual presence of an epidemic, but disinfection is of the highest value against the access of disease as well as against its spread.

Allow me also in this connection to call attention to a few pertinent commonplaces of medical science. It is generally supposed that cholera is the result of the activity in the body, particularly in the digestive tract, of some minute morbid plant or animal-like organism. This is taken in chiefly, if not wholly, with food and drink. It is of prime importance, therefore, in cholera times, that food and drink should be carefully looked after. Pure or boiled water, milk, well cooked vegetables and meats, and perfectly sound, ripe, and cleansed fruits, only, should be used.

Next to the matter of food and drink, maintenance of personal vigour is of the highest importance. Persons under chronic debility, and especially persons temporarily debilitated through excesses of any kind, are most easily affected by such a poison as that of cholera. A vigorous vitality goes a long way towards a successful defence against the disease. Over fatigue, over-eating, immoderate use of alcohol, in fact, anything that depresses vital energy, is just so much a breaking down of an effective natural resistance to the poison. Those who are for any reason "run down" are always among the first to succumb. Many who maintain a full physical vigour, by that means alone successfully resist the energy of the disease "germ."

Concerning the treatment of a cholera patient I do not presume to say anything. The capable physician must attend to that. But the "ounce of prevention" is always worth "the pound of cure," and I am quite confident that if the two suggestions above made are heeded, and the preventive directions in "Circular No. 8," given below especially concerning "Premises," are followed, one has taken the best known precautions against the pestilence; that is, if he must remain where there is danger of its presence.

CLAY MACCAULEY.

The committee which prepared the circular consisted of C. F. Chandler, M.D., College of Physicians and Surgeons, Health Department, New York; George F. Baker, M.D., University of Pennsylvania; Henry Draper, M.D., University of the City of New York; Edward G. Janeway, M.D., Bellevue Medical College and Health Department, New York; Ira Remsen, M.D., Johns Hopkins University, Baltimore, Md.; S. O. Vander Poel, M.D., Health Officer, New York. In transmitting the report the chairman, Professor C. F. Chandler, Ph. D., remarked:—

It has been the aim of the committee to prepare concise directions for disinfection, so simple and clear that they may be easily followed by any person of intelligence.

In the selection of disinfecting agents the aim has been, 1st, to secure agents which can be relied upon to accomplish the work; 2d, which can be procured in a state of comparative purity in every village; 3d, so cheap that they can be used in adequate quantities.

It is extremely important that the people should be instructed with regard to disinfection. They must be taught that no reliance can be placed on disinfectants simply because they smell of chlorine or carbolic acid, or possess the colour of permanganate, and that, in general, proprietary disinfectants with high-sounding names are practically worthless, as they either have no value whatever, or if of value, cost many times as much as they are worth, and cannot be used in sufficient quantity.

EXPLANATION.

Disinfection is the destruction of the poisons of infectious and contagious diseases.

Deodorizers, or substances which destroy smells, are not necessarily disinfectants, and disinfectants do not necessarily have an odour.

Disinfection cannot compensate for want of cleanliness or of ventilation.

I.—DISINFECTANTS TO BE EMPLOYED.

1. Roll sulphur (brimstone) for fumigation.
2. Sulphate of iron (copperas) dissolved in water in the proportion of one and a half pounds to the gallon; for soil, sewers, &c.

3. Sulphate of zinc and common salt, dissolved together in water in the proportions of four ounces sulphate and two ounces salt to the gallon; for clothing, bed-linen, &c.

NOTE.—Carbolic acid is not included in the above list for the following reasons: It is very difficult to determine the quality of the commercial article, and the purchaser can never be certain of securing it of proper strength; it is expensive, when of good quality, and experience has shown that it must be employed in comparatively large quantities to be of any use; it is liable by its strong odour to give a false sense of security.

II.—HOW TO USE DISINFECTANTS.

1. *In the sick-room.*—The most available agents are fresh air and cleanliness. The clothing, towels, bed-linen &c., should at once, on removal from the patient, be placed in a pail or tub of the zinc solution, boiling hot if possible, before removal from the room.

All discharges should either be received in vessels containing copperas solution, or, when this is impracticable, should be immediately covered with copperas solution. All vessels used about the patient should be cleaned with the same solution.

Unnecessary furniture—especially that which is stuffed—carpets and hangings, when possible, should be removed from the room at the outset; otherwise, they should remain for subsequent fumigation and treatment.

2. *Fumigation with sulphur* is the only practicable method for disinfecting the house. For this purpose the rooms to be disinfected must be vacated. Heavy clothing, blankets, bedding, and other articles which cannot be treated with zinc solution, should be opened and exposed during fumigation, as directed below. Close the rooms as tightly as possible, place the sulphur in iron pans supported upon bricks, set it on fire by hot coals or with the aid of a spoonful of alcohol, and allow the room to remain closed for twenty-four hours. For a room about ten feet square, at least two pounds of sulphur should be used; for larger rooms, proportionally increased quantities.

3. *Premises.*—Cellars, yards, stables, gutters, privies, cess-pools, water-closets, drains, sewers, &c., should be frequently and liberally treated with copperas solution. The copperas solution is easily prepared by hanging a basket containing about sixty pounds of copperas in a barrel of water.

4. *Body and bed clothing, &c.*—It is best to burn all articles which have been in contact with persons sick with contagious or infectious diseases. Articles too valuable to be destroyed should be treated as follows:—

a. Cotton, linen, flannels, blankets, &c., should be treated with the boiling hot zinc solution, introducing piece by piece, securing thorough wetting, and boiling for at least half an hour.

b. Heavy woollen clothing, silks, furs, stuffed bed-covers, beds, and other articles which cannot be treated with the zinc solution, should be hung in the room during fumigation, pockets being turned inside out and the whole garment thoroughly exposed. Afterward they should be hung in the open air, beaten, and shaken. Pillows, beds, stuffed mattresses, upholstered furniture, &c., should be cut open, the contents spread out and thoroughly fumigated. Carpets are best fumigated on the floor, but should afterward be removed to the open air and thoroughly beaten.

5. The bodies of persons who have died from infectious disease should be thoroughly washed with a zinc solution of double strength, then wrapped in a sheet wet with the zinc solution, and buried at once. Metallic, metal-lined, or air-tight coffins should be used when possible, certainly when the body is to be transported for any considerable distance.

KOREA.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—Events of some importance are transpiring in Korea at the present time, events which may or may not have significance just according as matters turn out.

The aged Queen-dowager died not unexpectedly a few days ago and the fact was made known by the blowing of the great trumpets at the palace gates, and the lighting of a great fire on the summit of the mountain, back of the palace enclosure. This queen has played a somewhat prominent part in the history of Korea for the last thirty years or so. It was she who upon the death of the last king obtained possession of the seals of office, became the virtual sovereign and nominated the present king, then a young child, a remote member of the Royal family. In view of the fact that she was once the virtual ruler of the country it is necessary that she should be buried with royal honours. It is said that she has laid up a large sum of money to defray the expenses of the burial ceremony. If so it was very thoughtful, for in a country like Korea a costly

funeral ceremony must be a heavy drain on the revenue. According to custom the interment cannot take place for five months. In the meantime much of the public business will be delayed. Five days after the death it is officially announced, and the great bell in the centre of the city is rung. After that time no Korean can appear on the street except he wear entirely white clothing. Hats, shoes, coat, trousers, everything must be white. For three years this will be observed, after which the black hats and parti-coloured garments may again be assumed. This sudden demand for white hats and shoes is greater than the supply, for it is deemed an insult to anticipate the death of a royal personage. It is for this reason partly that there is an interval of five days between the death and the official announcement. If enough are not made within the five days, those who cannot buy are obliged to stay in doors until they are supplied. Of course, the upper class or *yangban* have to be supplied first.

There is a rumour that some evil minded men have tried to stir up trouble in the country and induce country people to come up to Seoul and drive out the foreigners. Just now is the most propitious time for them, because the servants of the upper class are coming into the capital soon to purchase white hats and shoes for their masters, and might turn the occasion to account by killing two birds with one stone. But any such danger has been well guarded against, for a considerable company of Marines from the U.S.S. *Swatara* and their officers have come up to Seoul and are quartered at the U.S. Legation. It is said that this was done at the suggestion of His Majesty, and whether it was necessary or not it shows the goodwill of the U.S. Authorities in responding so promptly to the suggestion. And then again it must be remembered that, especially in these eastern countries, the unexpected is likeliest to happen.

It is said that the two mints where money has been coined in such large quantities lately will be closed for some months, but this information has not been authenticated yet.

There are many interesting customs connected with the death and funeral of a royal personage in Korea. Five days after the death, all the higher members of the nobility assemble before the palace gate, and kneel on their mats and wail together as a sign of their sorrow over the loss of one of the members of the Royal family. This ceremony was performed to-day and was an extremely interesting one, but difficult to describe: all these men sitting or kneeling in lines, all in white hats of the peculiar Korean shape, or else what we call palace hats shaped like a round skull cap but with broad wings on either side, all this company swaying back and forth uttering the most lamentable sounds—it is a sight seldom seen, but once seen not soon forgotten.

A couple of weeks ago it was feared that the Royal Lady was about to die, but by a copious use of wild ginseng her life was prolonged. In view of her temporary recovery the palace physicians were rewarded by promotion. But now in view of her death the head physician is said to have been banished.

The body is swathed in many yards of silk and placed in a coffin which is deposited in a house on the mountain immediately behind the palace, where it will remain five months, the customary period which must elapse between the death and the interment.

The selection of the site for the tomb is a most important matter. The diviners are called into requisition, and they have to decide by their art what place will be most propitious for the Royal grave. Fabulous sums are sometimes spent in this work which is deemed so important.

It is customary, whenever a Royal person dies, to call out all the soldiery and place them as a guard all around the palace. This probably arises from the fact that at the death of a King there is more or less danger that a pretender or malcontent may try to enter the palace and possess himself of the Royal seals, the very holding of which invests a person with Royal prerogatives. This is the first death that has occurred in the Royal family since the opening of the country to foreigners, and when the funeral proper takes place I shall take pleasure in describing it more particularly to your readers.

Your very truly,

Seul, Korea, June 9th.

X.

HORSFORD'S ACID PHOSPHATE.
Seasickness Often Prevented and Relieved.

THE EXHIBITION.

PRIZE LIST.

PRIZES OF HONOUR.

Mr. Fujino Shirōbei, Nemuro Province, Hokkaido—Manure produced by extracting oil from the herring.

The Sakuragumi, Tsukiji, Kyobashi, Tokyo—Shoes and Hides.

Mr. Namikawa Sosuke, Shinyemouchō, Nihonbashi, Tokyo—Screen of *Shippo-yaki* (enamel).

Mr. Furukawa Ichibei, Setomonochō, Nihonbashi, Tokyo—Mining exhibits.

Mr. Ito Kozabemon, Shigo-mura, Miye-gun, Miye—Raw silk, machine-reeled.

Mr. Maruno Bonoku, Ikeshinden-mura, Kitogun, Shidzuoka—Tea.

Mr. Yoshii Genta, Ino-mura, Adsunagawa-gun, Kochi—Miscellaneous papers.

PRIZES OF THE FIRST CLASS.—FIRST DIVISION (INDUSTRY).

FIRST CLASS PRIZES FOR PROGRESS.

The Tokyo Rope Manufactory, Honmura-machi, Azabu, Tokyo—*Shiranchi* and other ropes.

Mr. Kutsuya Takijiro, Ikenohata-Nakacho, Shitaya, Tokyo—Ornamental and decorative articles.

Mr. Otsuka Iwajiro, Rogetsucho, Shiba, Tokyo—Shoes.

Mr. Takahashi Seiji, Takekawacho, Kyobashi, Tokyo—Shoes.

Mr. Nakamura Naajiro, Tori-Itchome, Nihonbashi, Tokyo—Paper for covering *fusuma* (sliding screens) and miscellaneous papers.

The Japan Brick Manufactory, Oyo-e-mura, Hanzawa-gun, Saitama—Bricks.

Mr. Mikoshi Tokuyemon, Shinmachi, Midorino-gun, Gumma—Silk thread for weaving.

Mr. Sato Tokutaro, Kiumachi, Yamada-gun, Gumma—White *habutai*.

Mr. Kato Zenzō, Seto-mura, Higashi Kasugai-ori, Aichi—Teapot, and sliding doors of porcelain decorated with blue under the glaze.

Mr. Midzuno Kanbei, Tsumaki-mura, Toki-gun, Gifu—Plates of white porcelain.

The Mihoshi Weaving Factory, Takayama-machi, Ono-gun, Gifu—White *chirimen* of extra breadth (*hiro haba*).

The Ino Paper Mill, Akawa-gun, Kochi—Paper.

FIRST CLASS PRIZES FOR SKILL.

Mr. Takagi Gorōbei, Tori Hatagocho, Nihonbashi, Tokyo—*Fude* (brushes).

Mr. Nakakita Shokichi, Owari-cho, Kyobashi, Tokyo—Pie-grates.

Mr. Nakamura Naajiro, Tori-Itchome, Nihonbashi, Tokyo—Fans.

The Oji Paper Mills, Oji-mura, Kita Toshinagun, Tokyo—Material for producing wood paper (木紙) used in printing.

The Yedogawa Paper Mill, Nishi Gokencho, Ushigome, Tokyo—Improved *usayo* and *mino-gami*.

Mr. Yamada Jirobei, Kojima-cho, Asakusa, Tokyo—Wall paper, imitation leather (*kawari*).

Mr. Ogawa Itshin, Idamachi, Kojimachi, Tokyo—Photographs.

Mr. Kumagai Hisazo, Kami-kyo, Kyoto—*Sumi* (ink).

Mr. Kumagai Hisazo, Kami-kyo, Kyoto—Incense sticks.

Mr. Seifu Yohei, Shimada-kyo, Kyoto—Ewer of white porcelain, and red pot.

Mr. Sasaki Seihichi, Kami-kyo, Kyoto—*Shuchin* cloth for ladies' obi.

Mr. Komiya Matsunosuke, Kami-kyo, Kyoto—*Shuchin* cloth for ladies' obi.

The Yamaguchi Weaving Co., Yanagibaba-dori, Kami-kyo, Kyoto—Cloth for collars (*yeriji*), of black *shusu*, made of silk and cotton.

The Sulphates Manufactory, Kawanami-mura, Nishinari-gun, Osaka—Sulphates.

The Osaka Match Manufactory, Tenuji-mura, Tosei-gun, Osaka—Matches.

Mr. Tsukushi Sanjio, Higashi, Osaka—Refined wax.

Mr. Fujimoto Shotaro, Higashinomachi, Sakai Municipality, Osaka—*Dantsu* (a kind of carpet).

Mr. Sanya Iwazo, Motomachi, Higashi, Osaka—*Dantsu*.

Mr. Ogawa Tokitaro, Hachiojimachi, Minami Tamagun, Kanagawa—*Aya ito-ori* (a variety of cloth).

Mr. Tanajima Jinsaburo, Shinmachi, Kiryu, Yamada-gun, Gumma—Black *shusu* made of silk and cotton.

Mr. Matsui Genjun, Naramachi, Soyekami-gun, Nara—Jedion ink.

Mr. Kondo Kisoku, Minami Koma-gun, Yamashiro—*Edgeworthia papyrifera* (*mitsumata*), material for making paper.

Mr. Suda Manyemon—Paper.

The Shinyosha, Inadate-gun, Fukui—Paper.
Mr. Tsuruta Wasaburo, Umemotomachi, Kanazawa Municipality, Ishikawa—Cooking utensils (*Kawaseki-gu*).

The Kanazawa Silk Thread Co., Nagamachi, Kanazawa Municipality, Ishikawa—Silk thread.

Mr. Kito Otusuchi, Osumachi, Kita-gun, Yehime—Raw and refined wax.

Mr. Kawachi Sukesaburo, Niya-mura, Kitagun, Yehime—Raw and refined wax.

Mr. Kojima Gihoro, Kaneko-bashi, Kochi Municipality, Kochi—Paper.

The Koransha, Arutamura, Nishi-matsuura-gun, Saga—Miscellaneous Porcelain articles.

SECOND DIVISION (FINE ARTS).

FIRST CLASS PRIZES FOR EXCELLENCE.

Mr. Hashimoto Gaho, Unemecho, Kyobashi, Tokyo—Picture of *sansui* (autumn scenery).

Mr. Hayashi Kubei, Miromachi Nihonbashi, Tokyo—Bronze alcove ornament.

Mr. Umino Shomin, Higashi-Katamachi, Koma-gome, Hongo, Tokyo—For manufacture of the above alcove ornament.

The Seikosha, Gokencho, Kanda, Tokyo—Flower vase ornamented with silver storks.

Mr. Kano Natsuo, Kachimachi, Shitaya, Tokyo—For manufacture of the above vase.

Mr. Shihata Junzo, Kaniheiyemouchō, Asakusa, Tokyo—Seascape, gold lacquered.

Mr. Ogawa Itshin, Idamachi, Kojimachi, Tokyo—Phototype.

Mr. Nishimura Soyemon, Mikura-mura, Shimokyo, Kyoto—Picture, wild ducks in snow.

Screens bearing pictures of wild ducks in snow and scenery of Hotsugawa.

Mr. Namikawa Yasuyuki, Horikecho, Shimokyo, Kyoto—Flower vase of enamel (*shippo*).

Mr. Kato Roroku, Tawarayamachi, Hamakyo, Kyoto—Bronze flower vase.

Mr. Seifu Tomohide, Shimokyo, Kyoto—Vase with picture of fish.

Mr. Date Yasuke, Kamikyo, Kyoto—*Kantō-dankishi*, decorative material for ladies' obi.

Mr. Fujii Sakichiro, Hiosawamura, Yamada-gun, Gumma—Tablecloth.

FIRST CLASS PRIZE FOR COMPETITION.

Mr. Kishi Kokei, Hichikencho, Ikenohata, Shitaya, Tokyo—Gold lacquered utensils.

THIRD DIVISION.

FIRST CLASS PRIZES FOR SKILL.

The Kanagafuchi Spinning Co., Sumidamura, Minami-Katsushika-gun, Tokyo—Cotton thread.

Mr. Tsukiyama Jinbei, Fushimicho, Kii-gun, Kyoto—*Sencha* (Tea).

Mr. Uyezaki Seizayemon, Ujimura, Uji-gun, Kyoto—Dust *Gyokuro* (fine tea).

The Osaka Spinning Co., Sangenya-mura, Nishinari-gun, Osaka—Cotton thread.

Mr. Kumura Chujiro, Osumi-gun, Kanagawa—Cigarettes.

Mr. Naka Seizo, Naruo-mura, Bako-gun, Hyogo—Cotton.

Mr. Inouye Nobusaburo, Nanami-gun, Hyogo—Japanese ox(?)

Mr. Yamaguchi Shuzo, Sonoki-mura, Higashi-sonoki-gun, Nagasaki—Oregon wheat.

Mr. Kimura Kyuzo, Awoyagi-mura, Kodama-gun, Saitama—Silkworm cocoons and eggs.

Mr. Machida Kikujiro, Mikuri-mura, Midorino-gun, Gumma—Silkworm cocoons and eggs.

The Seishikoku-sha, Mayebashi-machi, Nishigumma-ori, Gumma—Raw silk, machine produced.

Mr. Kogo Nihei, Katori-gun, Chiba—*Uruchi* (non-glutinous rice).

The Sakura Dokyo-sha, Hachigai-mura, Imbagan, Chiba—*Sencha* (Tea).

Mr. Santa Tomosaburo, Kuni-ori, Ibaraki—*Hatabako* (leaf tobacco).

Mr. Hirozawa Sohachi, Mito, Ibaraki—*Kizami tabako* (cut tobacco).

Mr. Matsumoto Takichi, Tsuga-gun, Tochigi—*Uruchi* (non-glutinous rice).

Mr. Uyesawa Tosaburo, Kami-tsuga-gun, Tochigi—Hemp.

Mr. Hijikura Shosaburo, Yashino-gun, Nara—Timber 15 kinds, and two rafts.

Mr. Doi Kanpu, Kita-muro-gun, Miye—Timber, 33 kinds.

Mr. Kubota Shun, Shidzuoka—Bark (*kawa*) of *Edgeworthia papyrifera* (*mitsumata*).

Mr. Ikeya Sahei, Omiyamachi, Fuji-gun, Shidzuoka—Bark of *Edgeworthia papyrifera*.

Mr. Taki Seiko, Ibaragan, Shidzuoka—Bark of *Edgeworthia papyrifera*.

Mr. Umino Taiichi, Abe gun, Shidzuoka—*Sencha* (Tea).

Mr. Tanaka Muneshige, Nakakoma-gun, Yamashiro—Cotton.

Mr. Tanaka Komataro, Nakakoma-gun, Yamashiro—Cocoons.

Mr. Fujimoto Zenyemon, Chisagata-gun, Nagano—Silkworm eggs.

Mr. Yamazaki Wasaku, Sarashina-gun, Nagano—Cocoons.

The Taiyosha, Kami-Inagan, Nagasaki—Raw silk, machine-reeled.

The Gwakosha, Suwa-gun, Nagasaki—Raw silk, machine-produced.

The Miyagi Cattle and Horse Company, Sendai-shi, Miyagi—Horses.

The Koyeisha, Igu-gun, Miyagi—Raw silk, machine-produced.

Mr. Ohashi Isaburo, Date-gun, Fukushima—Silkworm eggs.

Mr. Ohashi Sai, Date-gun, Fukushima—Cocoons.

Mr. Nakamura Zenzo, Mitogun, Aomori—Horses.

Mr. Tanaka Hyoji, Mitogun, Aomori—Horses.

Mr. Fukuda Yukau, Hachindie-mura, Mitogun, Aomori—Horses.

Mr. Nomura Shinpachiro, Kimikita-gun, Aomori—Horses.

The Yamagata Industrial Co., Yamagata Municipality, Yamagata—Cocoons.

The Yonezawa Thread Manufactory, Yonezawa Municipality, Yamagata—Raw silk, machine-produced.

The Katsuyama Thread Manufactory, Onogun, Fukui—Raw silk, machine-produced.

Mr. Makishima Tokutsu, Aimi-gun, Tottori—Cotton.

Mr. Uchida Kaneichiro, Shimane-gun, Shimane—*Uruchi* (non-glutinous rice).

Mr. Omori Kumataro, Tsutaka-gun, Okayama—Vines.

Mr. Takahashi Goroyemon, Hiroshima—*Uruchi*.

Mr. Matsushita Iwakichi, Kuka-gun, Yamaguchi—*Uruchi*.

Mr. Hayashi Shinpei, Akamagasaki Municipality, Yamaguchi—Cigarettes.

Mr. Shima Juzo, Narishigun, Tokushima—Indigo.

Mr. Doi Matsutaro, Takaoka-gun, Kochi—*Bronsonetia papyrifera*.

Mr. Urashi Katsutichi, Fukuoka—*Uruchi*.

Mr. Tsuru, Shunbichi, Yamaka-gun, Kumamoto—*Uruchi*.

Mr. Nishikawa Bunjiro, Tamana-gun, Kumamoto—Wheat.

Mr. Kumeta Shotaro, Miyasaki—*Shirosato* (sugar).

Mr. Kawada Zensayemon, Minami-Osumi-gun, Kagoshima—Tobacco (leaf).

The Samsi Kasu-jo, Kagoshima Municipality, Kagoshima—Cocoons.

Mr. Momohara Jutarō, Okinawa—Brown Sugar.

FIRST CLASS PRIZES FOR COMPETITION.

Mr. Hatta Tatsuya, Higashi Yashigun, Yamashiro—Silkworm exhibits.

FOURTH DIVISION (AQUATIC PRODUCTS).

FIRST CLASS PRIZES FOR PROGRESS.

Mr. Kanabara Daichi, Aomori—Sea-cucumber.

The Aquatic Products Co., Shimane—Dried cuttle-fish.

FIRST PRIZES FOR SKILL.

Mr. Yokoyama Shoyemon, Shinamaki-gun, Hokkaido—Pulverised sea ear.

Mr. Yanakita Tokichi, Nemuro-gun, Hokkaido—Long cut *Laminaria japonica*.

Mr. Iwase Sakuyemon, Isumi-gun, Chiba—Sea-ear.

Mr. Mori Risaemon, Naka-gun, Shidzuoka—Dried bonito (*Katsuo-bushi*).

The North Sea Aquatic Products factory, Otsu-gun, Yamaguchi—Dried cuttlefish.

FIFTH DIVISION (EDUCATION AND ARTS).

FIRST CLASS PRIZES FOR SKILL.

Miss Asakura Sayo, Yotsuya, Tokyo—Lens, spectacles, and other objects.

The Japan Educational Society, Hitotsulashidori, Kanda, Tokyo—Statistical tables, and accounts of the Educational Society.

Mr. Moriya Sadakichi, Toyamacho, Kanda Tokyo—Weighing scales (*hakari*) and weights (*fundori*).

Mr. Maki Kubei, Hongo Tokyo—Accoucher's instruments (*sankwa hikwai*).

Mr. Horiguchi Yakichi, Hayashicho, Honjo, Tokyo—Dentists' instruments.

Mr. Nawa Sei, Mototsu-gun, Gifu—Samples of insects.

Mr. Tanno Kotaro, Yamaguchi—Meteorological tables.

SIXTH DIVISION (METALLURGY).

FIRST CLASS PRIZE FOR PROGRESS.

Mr. Kanai Jinhachi, Yamaguchi—Portland cement.

FIRST CLASS PRIZES FOR SKILL.

Mr. Asano Soichiro, Fukagawa, Tokyo—Portland cement.

Mr. Sumitomo Kichisayemon, Minami Osaka—Copper.

FIRST CLASS PRIZE FOR COMPETITION.

Mr. Sugimoto Seitoku, Idsumicho, Kanda, Tokyo—Model (*hinagata*) of the Hosokura Mine.

SEVENTH DIVISION (MECHANICS).

FIRST CLASS PRIZE FOR PROGRESS.

Mr. Nakano Yozo, Gofukuchō, Nihonbashi, Tokyo—Machine for weaving gold and silver braid.

FIRST CLASS PRIZES FOR SKILL.

The Tokyo Electric Light Co., Shinsakana-machi, Kyobashi, Tokyo—Electric lighting apparatus, &c.

The Ishikawajima Shipbuilding Yard, Tsukudajima, Kyobashi, Tokyo—Marine engine.

The Kawasaki Shipbuilding Yard, Kawasaki-machi, Kobe municipality, Hyogo—Model of a barge for the transport of heavy guns.

"THE MARCH OF CHRISTIAN CIVILIZATION"

Rev. Dr. Newman, of the M.E. Church, delivered his popular lecture "The March of Christian Civilization," on Friday evening in the Van Schaick Hall, the proceeds of the sale of tickets being devoted to the fund for repairing the M.E. Church damaged in the recent storms. There was a good attendance.

Mr. C. R. Greathouse, U.S. Consul-General, presided, and in opening the proceedings said he did not think it necessary that he should introduce any one so well known as the reverend lecturer. Dr. Newman was not altogether a stranger to Japan, having come to this country some years ago on an official mission from the State Department at Washington. The subject of the lecture was "The March of Christian Civilization," and he was satisfied that all on leaving the hall would feel that they had listened to a most eloquent, eminent, and distinguished lecturer, on a great and grand subject, and that they had also by their presence contributed to a most worthy object.

Dr. Newman then proceeded with his lecture. Some master mind, he said, had yet to give the world a simple and comprehensive definition of the term civilization. That definition could not be found in the lexicons or cyclopedias. Some things were difficult of definition. No astronomer to-day would presume to risk his reputation in defining light. We know that it is, but what it is we know nothing. No biologist would presume to define life. We speak of the attributes, the manifestations of life, but the secret of the mystery of nature still eludes man. No statesman would presume to define civilization. Indeed, the very terms most familiar to us, in every day use, are the terms most difficult of definition. Two masters of thought have essayed the task, a Frenchman and an Englishman. Guizot has defined civilization to be the personal and the social improvement of mankind; and his definition is the more desirable in that it begins with the individual; while Buckle, the Englishman, has attempted to define civilization to be the intellectual and moral improvement of society. They would see further on the defect in that definition: that it gives prominence to the intellect and makes the moral the sequence to the former. What shall be the standard of civilization? Shall it be organized nationality? Then China must take the preëminence; for China has witnessed the funeral procession of the mightiest nations in the history of the world—of Assyria, Babylonia, Greece, Rome, and even of Egypt. The pyramids remain as the tombstones of Egypt, but China still lives, her constitution the admiration of English and of American statesmen. What shall be the standard? The majesty of the supremacy of law. Then Rome must bear the palm, for what we call the Pandects of Justinian are the discoveries of a great Roman jurist, and Justinian simply gathered up and formulated what a mightier man had discovered. Wherever the Roman eagle screamed there swayed the Roman sceptre; wherever her legions marched there was the majesty of law. What shall be the standard? Shall we say culture? This was an institution of learning, these learned professors around him taught their students to sit at the feet of the men of Attica, whose poetry, and oratory, and philosophy have never been excelled. Our poet laureates are only too happy to approach near the fountain whence drank the blind bard of Grecia: our great orators are only happy if they can stand upon the spot where Pericles spoke with matchless eloquence. What shall be the standard? Art? Why the very birds of Attica came and pecked at the fruit painted by Apelles, and yet Greece has passed from the vision of the world. What shall be the standard? Commerce? On the shores of Africa

was a republic of one state, in whose harbour floated the flags of all nations, whose merchantmen doubled the Cape of Good Hope two thousand years before it was discovered by di Gama. For Carthage must bear the palm of these commercial discoveries and transactions. In Carthage were banks of wealth, schools of learning, halls of justice, and Carthage caused Rome to tremble when Rome's vast empire swept from the Western Ocean to the River Euphrates and from the Wall of Antioch to the Mountains of the Moon. Shall the standard be democracy? Wherein every citizen has the right to vote, and every citizen is eligible for office? A thousand years before Jesus came into the world there was a democracy; the Jewish democracy was essentially a democracy on earth, theocratic in Heaven. All were eligible for office and yet to the question: What is the destiny of Republics? the Jewish democracy answers "empire." There was no exception in the history of the world. There had been republics long before that of the United States, and there are now many growing republics as there are monarchies. It is a fallacy to suppose that the elements of perpetuity are inherent in a republic. There is nothing perpetual in a republic any more than in a monarchy: the destiny of republics is empire. It is for the Republic of the United States of America to demonstrate to the world that she has discovered the secret of perpetuity, for the world has never lacked advance, and the problem of the ages and of the statesmen has been how to give permanence to progress. What shall be the standard? Shall it be a state religion with a majestic symbolism, a beautiful ritual? The Jews had these, and such a ritual as was inspired from on high, and yet Jerusalem is a heap of ruins bespeaking its former grandeur and pristine glory, while the Jew is a wanderer and a by word and a hissing. What shall be the standard? All these elements combined? Well, let his listeners combine them; put organized nationality, the majesty of law, intellect, culture, wealth of commerce, democracy, a state religion—blend them with the same harmony that you would the colours of the rainbow. What then? There had been nations having all these attributes, and yet they had gone to the charnel house of decay. Is it possible then to approach a definition? May we say it is individual purity, culture, happiness, social morality, thrift, national justice, honesty? Combine these under three heads, and we may catch a glimpse. It has been the dream of the sage and the aspiration of the poet. All civilizations have been abnormal; some characteristic has dominated the others in them like a master. A true civilization must be that in which each element stimulates the others and all move together in harmonious proportion and action. But no civilization on the face of the globe so combined the various elements. Take the United States of America; take the last general election. What was the dominant thought on the rostrum, in the journal? Was it education, which the fathers of the republic declared to be essential to the perpetuity of free institutions? Nothing of the kind. Was it the home life of the republic, the sanctity of marriage? Nothing of the kind. Was it the recognition of the individuality of woman, and her elevation to equality before the law? No. Was it temperance—which gives bliss to the home, happiness to society, and stability to justice, its opposite, intemperance, working the ruin of the individual and the community? No. What was it? It was tariff; and tariff means commerce, and commerce means money. He blushed for his age, and for the civilization of his country. All civilizations, in America, in England, or in France, are abnormal, and it is for us to produce such a civil condition wherein the normal shall supersede the abnormal. It is a mistake to suppose that the dream of a better future, of an ultimate humanity, when justice shall take the place of wrong, when modesty shall supersede insolence, when happiness shall become co-extensive with the business of mankind—it is a mistake to suppose that this is merely the dream of the Prophet of Nazareth when the Son of Mary wandered as a peasant amid the green hills of the north or the crowded cities of the south. Only those ignorant of history, especially of the great thinkers of the age, would ascribe the dream of a millennium to Jesus. For it was that great Englishman—greatest among Englishmen—Francis Bacon, who anticipated the time when man should rise to such supremacy as to be master of the material forces of the universe. Then came Leibnitz, who declared the time would come when war should cease, and that mankind was capable of perfectibility; and Pascal, tender and eloquent, who went before Leibnitz and said that men never died and humanity was ever living and ever growing—a blessed thought this of corporate humanity—that the thoughts of our mind, the principles we have uttered,

and our deeds of charity to man and devotion to God, are reproduced in this corporate humanity and humanity never dies. Then there was Thomas Jefferson, who uttered the sublime saying that "all men are created free." And then there came Christ Jesus, who from a religious standpoint and out of the bosom of the infinite future, declared an ultimate humanity at the head of which He is to stand, when all men shall be brothers. Is it possible? Is it a fancy? Is the pessimist true when he says the world is growing worse? Is the optimist extravagant? Or should the truth be searched for between these two extremes? There were surer guarantees; there were the endowments of capacity. Take for instance the descendants of Shem, the religious thinker of mankind, the high priest of humanity, for all the religions of the world have come from Shem. The West had given many things, but the West was too poor to give a religion. And yet they were the religious thinkers of the world; we sing their psalms, recite their proverbs, and follow their laws. Then take the descendants of Japhet; the Anglo-Saxon, who controls the commerce of the world, has given proof of capacity. The other branch, the descendants of Ham, going westward founded Jerusalem, Tyre and Sidon, and gave the world letters and commerce, for Cadmus proceeded from Sidon and the Tyrian mariners navigated the Mediterranean, passed through the Pillars of Hercules, went as far as the English Channel, founded Carthage, the pride of the race, passed into Egypt, reared the Pyramids, sculptured the Sphinx, and some passed farther south where the sun blackened their faces and kinked their hair. Were he as a student of history to choose between the glory of Ham and the glory of Japhet he would be inclined to choose the glory of Ham. And the question was whether Ham might not yet come to the front and be a black diamond of resplendent glory in the crown of our Lord. He had stood in the valley of separation and seen these three races passing each on its mission, and he had a dream that these three sons of Noah after wandering through the centuries had met on American soil, under the American skies and the American flag, Ham in the person of the negro, Shem as the Chinese, and Japhet as the Anglo-Saxon—these three brothers, a trinity of humanity looking up to a trine God.—(Applause.) Here they had capacity. Infidelity had never given anything to the world; infidelity was iconoclastic; infidelity was a torch to burn but not a hammer to build. They might talk about the mistakes of Moses, but Moses still sits serenely upon the Mount of God and his Ten Commandments are obeyed by mankind. The mistakes of Moses! In America there was an infidel, whose name he never condescended to mention in public, who lectured on the mistakes of Moses. One of the speaker's countrymen, Josh Billings, said—"I would give \$50 to hear that infidel on the mistakes of Moses, but I would give \$100 to hear Moses on the mistakes of that infidel!"—(Laughter and applause.) Whenever men sighed for liberty they had erected an altar to God and when they did not know him it was to the unknown God. The coming of Jesus Christ into the world was a pledge of ultimate humanity, and wherever He was received the gyve fell from the slave, the mind was quickened, and woman was elevated,—all that was worthy in humanity must be ascribed to Jesus Christ. The lecturer spoke not as a minister, but as a student of the philosophy of history; he entered the arena as a student and threw down the gauntlet. He asserted that whatever is true and beautiful and lovely in our humanity must be ascribed to Jesus Christ our Lord. Look at the facts, the fundamental laws by which society advances to a better future. Guizot rather than Buckle was right; for he began with the individual, and the collective man of any age never rises above the individual. Advance was a three-fold movement; there is he who like John the Baptist stands on the mountain top to catch the first rays of the coming dawn; whose psalm of life is "Excelsior;" who is a hundred years in advance of his time, who was called insane,—though the insane of to-day are the sane of to-morrow, and the martyrs of this hour the prophets of the next; then there is the pessimist, the conservative, whose eyes should be in the back of his head for he is always looking to the past; and then comes the middle man who extends one hand to him in advance and the other to him in the rear. And humanity thus marches forward in threes, amid the music of the centuries. There is a man in the United States Senate who never rises to speak without exciting a smile of ridicule on the faces of his colleagues; but when those who smile at him are dead and forgotten then will come the posthumous glory of that man, who stands for prohibition, for woman's elevation, and for universal education. So time is the essential element in advancement

and in God's government. Instantaneous perfection would be instantaneous destruction. A thousand years of time are as yesterday when past, and as a tale that has been told. It required four hundred years for the Hebrews to be called to march to the promised land; it required five centuries to bring in the era of Solomon's glory, and it required a thousand years thereafter to bring Jesus into the world. Jesus could not have come sooner: his coming could not have been delayed. So the birth of the Great Republic came in the nick of time under the operation of this great law. The speaker was not impatient at what seemed to be delay, for what appeared delay, to man was progress to God, and what was progression to man was delay to God. So revolution was an ordination of Heaven, for it seems to be true that the present exhausts the resources of the past and by enlarged development needs new resources; and consequently there comes revolution, and the social fabric is broken into a thousand pieces. At such times men lose their wits and cry out, "Where is God?" but when the smoke of battle has cleared they recognise his presence. It is a great fact that in these revolutions nothing is lost. All the great thoughts of philosophy, of religion, of charity are reproduced in numberless forms in future generations. He did not believe in lost arts, or sciences. That which is external to them may disappear, but, as Comte says, there is more mind on earth to-day than ever in the past; there is physical development greater than in the past, greater brain power and greater mentality, and it is due to the fact that nothing is lost in the realm of thought. He was therefore not disturbed by revolution, for that was an ordination of heaven growing out of the exigencies of the limitations of mankind and human nature; and the progress must be step by step till the heights are attained. The advance of the better future is like the incoming of the tide: the undertow for a moment leaves bare the shore but each incoming wave mounts a little higher. So the revolutions that have occurred in the annals of history are so many seas marking the advance of the race. And it is also a fact worthy of consideration that this advance is by toil and suffering. John Stuart Mill has written a most terrible indictment against the evils of nature, and yet he should have remembered that this was the order and constitution of nature, and that when he was writing against religion under cover of nature he was calling into question that constitution of which he was a part. This fact stands out conspicuously to cheer us in our great work of philanthropy. Take war. It is a monster that marches to the music of the widow's sigh, and the orphan's cry. And yet it is an ordination of Heaven—he would not say in all forms; but he would say that Providence over-ruled war for the largest benefit of the race. War springs from jealousy, from ambition for domination, but then war must cease. There is nothing more poetic in history than to watch the reversion of the verdicts of history. In their childhood they had read with interest and delight the story of Bonaparte, and now that they had reached manhood they turned away with a loathsome feeling from the Man of Corsica and the Prisoner of St. Helena. So the time will come when the warriors of the past, who fought for glory and empire, will be esteemed as the geologist esteems some geological monster representing an extinct savagism. Who are the great warriors in the minds of mankind? In a plain tomb in St. Paul's in London lies the dust of the Iron Duke who drew his sword for the constitutional liberty of England; and on the banks of the Potomac, in a plain republican tomb, without a monument sleeps the warrior who drew his sword for human rights; and when the canvass has faded, while sun, moon and stars shall shine, the name of Washington shall for ever be held in memory, because he drew his sword for justice and for right.—(Applause.) He, the lecturer, would not be surprised by a street fight, but he would be surprised that men created in the image of God should be in such a moral condition as to make a fight possible, and so if he learned to-morrow that all Europe was in arms he would not be surprised; his surprise would be that the great statesmen of Europe should be in such a moral condition as to render such a war possible. He was not a fatalist, but he believed that the advance would be made to a better future just as a column marched over the bodies of those who fell, never halting till the flag was planted on the highest citadel of the enemy. Every age had its martyrs. There was much solemnity in that word "must;" Luther must go to the Diet of Worms; Latimer, Cranmer, and Ridley must go to the stake; Stephen must be stoned; Jesus Christ must suffer death on the cross; and yet out of these conditions issued, from Luther Protestant

liberty; from Cranmer, Latimer, and Ridley English liberty, and from Jesus Christ that Divine religion which is a benediction to man and a doxology to God. Here then was a great fact: that what is essential to the advancement of the race is the recognition of those fundamental principles of Christianity which always supplement nature. For there is nothing so natural in the whole realm of personal thought as the religion of Jesus; it is the religion of nature, the supplement of nature; and no religious teacher referred to the constitution of nature so frequently as He, and always with accuracy. A great English writer had taken exception to this proposition, and had said that all the great upward movements of the race were preceded by an intellectual revival. No better master of English rhetoric than Buckle; and yet had the lecturer a boy to educate he would not put a copy of Buckle in his hands unless it were expurgated. He dealt with half truths and false facts, for a fact may be a fact and yet false when used out of its historical sequence. The rev. speaker then proceeded to deal with various statements of Buckle, and going on to speak of intellect, said the greatest monsters that had afflicted humanity had been men of powerful intellects and splendid scholarship. If he were compelled to choose between a black heart with culture and a white heart allied to ignorance of intellect, he would take the latter. Having referred to the career of a once famous American lawyer who now lies in a drunkard's grave, and shown that intellect and scholarship are not enough, Dr. Newman went on to say that he had lived to see some of the marvels of ultimate humanity; especially in the recognition of individuality. He did not care what the form of Government is so long as this great principle is incorporated in the Constitution and in the statutory enactments of mankind. It is not possible to judge of its great realizations in a lustum, or a decade, or a cycle; they must sweep through the majesty of a hundred years. In this view the speaker then proceeded to contrast the condition of the various countries of Europe a century ago with their state now, recalling *en passant* that when he was a student in Rome so careful were they of his soul that they erased from newspapers sent to him articles that were thought dangerous. But Rome has had a resurrection, the Romans are now free, and an American missionary stands on the steps of St. Peter's with a copy of King James' Bible in his hand to present to the Sovereign Pontiff whenever he shall dare to come out. To be sure Rome never changes. She is infallible and immutable. There is in Washington a Cardinal who avows himself in favour of liberty; but the Cardinal could not deceive him. He reminded the lecturer of a Professor of cadaverous appearance who was the possessor of a skeleton, which he had so fixed in a cupboard that on the opening of the door the skeleton walked out. A boy coming in to sell oranges one day opened by mistake the door of the cupboard, and, being confronted by the skeleton, fled out into the street. Thence he saw, at the window of the room he had just left, the Professor, who, stretching out one bony hand and exhibiting his lantern jaws and row of grinning teeth, called to him to return and get his oranges. "No," responded the boy, "no you don't, if you have got your clothes on."—(Laughter.) So he, Dr. Newman, always said to his beloved Cardinal at Washington "No you don't, if you have got your clothes on."—(Laughter.) England, he went on to say, is recognising the great fact of the individuality of man. The other day an English statesman died. He was refused burial in Westminster Abbey, but while the men that refused him are dead and forgotten the name of John Bright will live for ever.—(Applause.) But he was the friend of Cobden, worked with him to abolish the Corn Laws, and was of the people, with the people, and for the people, and when the old toadies and Tories of the present generation are forgotten, John Bright's name will live. Here in Japan soon a parliament is to meet representing the suffrages of the people of Japan.—(Applause.) Japan has moved forward touching on the summits of the centuries. He was here 17 years ago and stayed in Japan, and went through the empire; he returned now to new Japan where there were these mighty changes and this recognition of individuality. And annual conference in which there were so many come from that Japanese Parliament that would he heard all around the globe. His audience would cheer that some of these days. His audience would the close of his remarks, the rev. lecturer said he had a dream that some of those days there shall be a confederation of the nations, and a Parliament of the world. That great soldier who slept on the

banks of the Hudson, whose pastor he was—these hands baptised him in the hour of his sickness, and these lips pronounced his funeral oration—told him once of a dream he had of arbitration by a Supreme Court of the World. He said—Just as the citizens of our States appear before the Supreme Court of the United States so there will come a time when there will be a Supreme Court of the World. The citizens of America, of England, and of Japan shall appear before that Supreme Court, but who shall be the judge? And so the great soldier dreamed that war would be adjusted by peaceful arbitration. It was a beautiful dream. In the same way the speaker anticipated a Parliament of the world, when representatives shall come from all the nations: from the banks of the Niger and the Congo, from the Jordan and the Nile, from the Euphrates and the Tigris, from the Jumna and the Ganges, the Bosphorus and the Golden Horn, the Rhine and the Danube, the Severn and the Thames, the Mississippi, and the Hudson; and wherever they are gathered—whether in St. Paul's in London, or St. Peter's in Rome, or St. Sophia's in Constantinople, or the Mosque of Omar in Jerusalem—they shall declare that war shall be no more; all men are brothers; Jesus Christ is the only great efficient reformer known to mankind, and He is the essential element in Christian civilization, and high over it shall be the cross, the symbol of universal liberty, and there shall be two flags, the flag of England and the flag of America, the symbols of universal peace.—(Loud applause.)

Mr. Greathouse, in proposing a vote of thanks to the rev. lecturer for his eloquent address, invited subscriptions towards the object for which the proceeds of the lecture were designed.

This brought the proceedings to a close.

THE DIRECT EXPORT OF RAW SILK.

(Translated from the *Fiji Shimpō*.)

The Dōshin Kaisha is now, by the withdrawal of Government assistance in the form of the exchange business which it has enjoyed since 1876, brought face to face with the question of suspending the direct export to the United States of that staple. The company has in consequence petitioned the Government either to continue the exchange business referred to or to grant a subsidy towards its aid. But the Government has found it difficult from the nature of its financial system to grant any such privilege, although it certainly is not inclined to ignore the decline and extinction of a business which it has encouraged so long. With a view, therefore, to the continuance of the direct export business, the Minister of State for Finance consulted the other day with Messrs. Hara, Mogi, and other silk merchants of Yokohama. It seems probable that as the result of this action Count Matsukata entertains the hope of inducing the Yokohama silk merchants to lend pecuniary assistance to the Dōshin Kaisha in order to maintain that firm in the field of direct export. What the company is chiefly apprehensive of is not the smallness of the funds that it may be able to borrow, but the low rate of interest that it can return on such funds. Raw silk is an article of high value, and to handle it requires a large amount of capital.

The trouble then lies in this: that there are at present in Japan a scarcity of money and a very high rate of interest, so that capital may not be profitably employed in mercantile undertakings unless a return of at least ten per cent. can be depended on. The case is different with foreign countries. There interest is generally low, and the common return on capital varies from 3 to 5 per cent.

The attempt of our merchants therefore to enter into competition with countries in which such a low rate of interest prevails, by the export of the raw silk that they purchase in Japan with capital on which a high rate of interest must be paid, is not at all likely to bear good fruit. The fact that the Government has given to direct exporters of raw silk direct subsidies, or has allowed them the advantage of Government exchange business, is the outcome of a desire to place at their disposal money at low interest, and thus enable them to carry on their business in the foreign raw silk markets. Will the Government now absolutely withdraw its support from the Dōshin Kaisha consequent on the change in its financial system, and allow the Yokohama silk merchants to extend the aid it cannot now continue? Although the silk merchants are bound to place in the hands of the company low interest capital, yet both they and the company are equally merchants of a country in which high interest prevails, and they must endeavour to earn 10 per cent. upon their working capital. The advantages that accrue indirectly

to the Yokohama silk merchants from the direct export of raw silk be taken into account, the abolition of that branch of business must prove a serious injury to the country at large, inasmuch as the resident foreign merchants will naturally strive to profit by the occasion. Moreover, the production of raw silk shows a yearly increase which requires a further extension of its markets. But it is now confronted in the American market by European silk on the one hand and by Chinese silk on the other, and under such circumstances, the exhibition of our disability will it is feared encourage encroachments on the field we have hitherto occupied. In such an event if those who have been long engaged in the raw silk business decide to sacrifice their own personal interests for the benefit of the country, and encourage direct export by lending their capital at from 4 to 5 per cent. interest in place of over 10 per cent., which they claim now, it may be easy to obtain the necessary funds.

But have the Yokohama silk merchants such zeal, and can they look beyond their own immediate business interests?

It is plain that the business of direct export will not be developed or improved if ordinary business men simply utilize their capital for its purpose, and then divide among themselves the profits that may be realised by it. The difficulty of obtaining capital at a low rate of interest being then the main point, the only course open to the Dōshin Kaisha, in the event of individual merchants refusing to let it have funds on favourable terms, is to seek the aid of the Government, either in the form of exchange business or of a direct subsidy. The question is really a national one, for on the dimensions of the raw silk trade depend the welfare of the silk industry and manufacture, as well as of the whole body of silk merchants.

Let us take the export of raw silk at thirty million yen per annum. If by irregularities or imperfections in the methods of conducting this trade loss should be sustained, amounting we shall say to 5 per cent., then the nation is the poorer by about yen 1,500,000. In this view it may easily be conceded that the functions of the Government include investigation and enquiry as to the best methods of protecting, encouraging, and regulating a trade of such paramount importance to the country at large. Besides it is not, in the light of past experience, an unusual or unlikely contingency that the Government will ignore the claims of the silk trade, and we take it that if the Administration desires not to concern itself in the matter it cannot be said to be lacking in reasonable excuses for doing so. If the authorities decide to completely withdraw their countenance from the Dōshin Kaisha and leave it to work out its own destiny, what course are direct exporters of raw silk likely to adopt? Will they abandon all further efforts in the line of direct export, and, as it were, commit commercial suicide by giving up their business? It is evident that if the undertaking falls into the hands of inexperienced persons, profit or advantage will be out of the question. The Government may therefore be able to see its way to encourage the organization of a company of enterprising business men, with plenty of capital to support them, who will specially devote themselves to the provision of such facilities of communication as will keep silk people here perfectly acquainted with the state of the foreign markets, and for the purposes of whose business it would probably be thought advisable to open an office in New York. The company should make it its aim to try the foreign taste by means of samples, and then having ascertained the popular tendency abroad, to engage in the direct export of the goods sought for. The expense of carrying on such a business could be kept within due limits, each individual member of the corporation bearing his proportion. We have heard it said that when Holland had all but succumbed to the blows of the First Napoleon, the national flag still floated above the factory at Doshima, and that from this spot the national life again received an access of impulse and quickening. We cannot speak with certainty of the Government's intentions, but it may well be that if the Dōshin Kaisha is to collapse, the principle of direct export may still be preserved for future activity by the presence in New York of the office of a Japanese direct export company.

POETRY.

THE CYCLE OF CHANGE.

TO A MOUNTAIN STREAM.

From an illegible inscription, supposed to be by a Buddhist, deciphered by Dr. MARTIN of Peking).

Little river! little river!

Why forsake your mountain home,

Like an arrow from a quiver

Flashing by in froth and foam?

Downward dashing, plunging leaping,

Is it rest that you pursue?

Is it in you lake that, sleeping,

Calmly seems to wait for you?

In that lake you may not tarry—

Brief the pause allowed you there;

Soon you'll leave with all you carry,

Rushing on your mad career.

A larger lakelet next receives you;

Longer respite it bestows;

Its seeming calm again deceives you—

Respite only, not repose.

Will you seek it in the Ocean,

Mingling with its boundless blue?

Speedily dismiss the notion—

That the sea has rest for you.

With its restless billows blending,

Tempest-tossed and turned to rain,

On some mountain top descending,

You'll begin your course again.

While the sun continues burning,

I, like you, my race must run—

The wheel of change for ever turning—

Nowhere rest beneath the sun!

Yumoto, July 5th, 1890.

BASEBALL.

The Baseball match between the Y. C. and A. C. team and nine from the Omaha came off on the 11th inst. with a result that must have astonished the "blue-jackets" after all that has been said and written of the local nine. The Tokyo players may tremble now for the safety of their laurels, and if the Yokohama nine can give another such exhibition as they did yesterday when they next meet the players from the capital the game will be a most interesting one. Following are the scores:—

"OMAHA."

FRENCH NATIONAL HOLIDAY.

The French Community on Monday celebrated their National Holiday, and though many firms of other nationalities continued business, the settlement presented quite a gay appearance in consequence of the numbers of flags displayed. The men-of-war in harbour dressed ship and fired a salute at noon; numerous lanterns decked the French Consulate, the Grand Hotel, and other buildings in the evening, and altogether the day was celebrated by our Gallic friends with much spirit. At night a capital display of fireworks took place on barges moored off the Grand Hotel, and the band of the Hotel played for several hours. A set piece of the most beautiful colours, in which the letters R.F. appeared amid heraldic accessories, finished up the pyrotechnical display, and was received by loud cheers, the large assemblage in the grounds of the Hotel enthusiastically singing the "Marseillaise" to the music of the band. During the evening the French Consulate was beautifully illuminated, as also were the premises of Messrs. Bing & Co., and other places of business.

In honour of the day a sailing race was promoted by the Committee of the Sailing Club.

SAILING RACES.

The sailing race same day was marked by very favourable weather for a long race, and the boats finished in good time. The race was also distinguished by one or two casualties, which served to heighten the interest very greatly. The course was across a line between a flagboat off the P. and O. office and the red buoy, to a flagboat moored off the Kisaradzu coast under Miyoken San (Daddy's Bluff), then across the bay to the Kita-Nakane buoy, round that mark and home round the Lightship, finishing across a line between the Boat-club Hatoba and the bathing barge. A capital start was made at 9.5 a.m., most of the boats getting away together on the starboard tack, *Molly* from an outside berth cutting in on the port tack, but incurring disqualification by putting *Mosquito* about. The big cutters, *Lesbielle* and *Maid Marion*, stood out in the direction of the Lightship, but the others preferred to work along inshore and thus were able to avoid the flood tide. All, steering by compass, were fairly successful in hitting off the Kisaradzu mark, the *Maid* getting round first. *Princess Maud* was so unfortunate as to lose her topmast immediately after rounding the mark, but by smart work was able to use her top-sail and make a very creditable show. Across to the Kita-Nakane buoy was an easy reach, but all failed to make sufficient allowance for the flood tide and thus fetched short of the buoy, *Maid Marion* alone laying correctly for the mark and thus avoiding the short board which the others were compelled to make. The *Maid* had now disentangled herself from the body of the yachts and with a long lead came away booming under spinnaker and looking well for the first place despite the heavy allowances that she had to give. Rounding the Lightship she handed spinnaker. Halfway in, the strain of topsail and jib topsail which had kept the topmast bent like a whip handle proved too much, and the stick gave way, the jib topsail collapsing under the bows, while the gaff topsail, ripped across, hung down to leeward. Apart from this accident, however, *Daimyo* was too closeup, and drawing ahead of *Lesbielle* came in an easy winner without reckoning allowance.

Scow finished too late to be timed, coming home about eight o'clock with very little wind. Mr. Beart acted as officer of the day. The following are the times:—

	Above 26 Raters.	Kisara- dzu.	Kita Nakane.	Light- ship.	Finish.
	h.m.s.	h.m.s.	h.m.s.	h.m.s.	h.m.s.
<i>Maid Marion</i>	39	11:57:35	1:21:30	5:12:30	3:09:35
<i>Lesbielle</i>	38	11:57:34	1:21:30	5:12:30	3:09:35
<i>Daimyo</i>	32	11:53:49	1:21:30	5:12:30	3:09:35
	26 Raters.				
<i>Lady Louise</i>	26	11:53:55	1:21:30	5:12:30	3:09:35
<i>Molly Barton</i>	25	11:54:10	1:21:30	5:12:30	3:09:35
<i>Mosquito</i>	25	12:12:41	1:21:30	5:12:30	3:09:35
<i>Princess Maud</i>	24	12:15:12	1:21:30	5:12:30	3:09:35
Scow	23	1:10:00			

A match was sailed on Saturday between the following 17 Raters, *Fessie* (16), *Dot* (16), *La Belle* (16), *Queenie* (13½), and *Sayonara* (13½) rating. Captain Owston gave the starting gun at 2 p.m., in the absence of Mr. West, officer of the day. There was a nice breeze from the south-west which enabled the boats to run to the Green Lightship and reach round the rest of the course, which they did at a very good pace, as will be seen from the times given below. *Fessie* and *Sayonara* carried whole sail, the others each had a reef in.

Fessie was first across the line and at once set her spinnaker; the others soon followed and winged their way down to the Green Lightship at their top speed. At the Lightship *Queenie* got into trouble, and took so much water on board that her crew were glad to be taken in tow by *Daimyo*. *Fessie* maintained her lead to the flag-boat at Kanagawa, and *Dot* drew away from *La Belle* and *Sayonara*, the latter sailing remarkably well and pertinaciously sticking to the heels of her larger opponents. On going about at Kanagawa for the reach home *La Belle* missed stays and lost some time. On the homeward journey *Fessie* continued to increase her lead, and finished first. *Dot* was next and took second prize. *Fessie* therefore obtains two record points and *Dot* one.

The following are the recorded times:—

	Light- ship.	Kana- gawa.	Finish.	Allow.	Cor- rected.
	h.m.s.	h.m.s.	h.m.s.	min.	h.m.s.
<i>La Belle</i>	2:10:00	2:29:45	2:55:40	—	2:55:40
<i>Dot</i>	2:09:45	2:29:15	2:55:30	—	2:55:30
<i>Fessie</i>	2:08:00	2:26:30	2:47:30	—	2:47:30
<i>Queenie</i>	2:09:45	2:26:30	2:47:30	—	2:47:30
<i>Sayonara</i>	2:09:00	2:30:00	2:54:00	3:07	2:54:53

LETTER FROM SAN FRANCISCO.

(FROM OUR SPECIAL CORRESPONDENT.)

San Francisco, June 24th.

The most important event in the pending congressional controversy over the tariff has been a speech delivered by Secretary Blaine before the Senate Committee on Appropriations on Saturday. Your readers will remember that in the campaign of 1888, as in that of 1884, Mr. Blaine led the protectionist folks, and that the election was won on his war-cry that, but for protection in this country, wages would fall to the level of European pauper labour. The readers of the *Mail* will also readily understand that the protectionist policy which Mr. Harrison was elected to carry out involved placing sugar on the free list, because, if duties continued to be paid on sugar, a reduction of duties on manufactures would have become necessary in order to prevent the accumulation of an inconvenient surplus in the treasury. In fulfillment of this policy, the McKinley bill proposed to put sugar on the free list. Against this, Mr. Blaine took the occasion of his appearance before the committee to protest. His argument, as condensed by his friend and confidant Mr. W. E. Curtis, was as follows:—

He recalled the result of placing coffee on the free list some years ago. It was done for the same reason that is proposed to place sugar on the free list at this time, to meet a supposed political exigency, but instead of affording "a free breakfast for the working man," which was the shibboleth in those days, the Empire of Brazil placed an export duty on coffee and the price of the article remained the same. Brazil would have removed her duty from our fl and other breadstuffs at that time had we asked it, but the elections were approaching and Congress could not wait to trade.

Mr. Blaine demonstrated to the committee too that the removal of the duty on sugar was not going to relieve the farmer from the depression in prices. The farmer does not use raw sugar but refined sugar, and the duty on the latter is increased by the McKinley bill. He would be even more at the mercy of the sugar trust, or any other monopoly that might be established, for the domestic manufacturer of sugar would be in a position to increase the price of the refined article any time he chose, although he would set his raw material a great deal cheaper.

The public expectation of the benefit of the legislation to sugar manufacturers is shown by the increase in the value of sugar trust certificates, which were quoted at \$20 on the 1st of January before the House committee took up the question of free sugar, and at \$25 on May 21st, when the bill was reported to the Senate, but there has been no increase in the value of corn or wheat or potatoes or anything the farmers hold.

Mr. Blaine endeavoured to convince the committee that if they wanted to do something to benefit the farmer they could do it best by providing him with a profitable market for his surplus products. This was much more important than to cheapen the price of his sugar one cent a pound. A farmer's family uses a hundred pounds of sugar a year, perhaps, on which the reduction would amount to \$1. He could afford to sacrifice that if the wheat, corn, and other agricultural products could be advanced even one cent a bushel.

Mr. Blaine likewise protested against increasing the duty on wool and hides, which would tend to defeat the objects lately sought by the Pan American Conference. Warning with his subject, he said that the McKinley tariff was the most inexcusable price of folly that the Republicans were ever guilty of; that the leaders of the party in Congress would realise it before many months are over; and that if he were in the Senate he would fight it to the best of his ability. He said that he would give two years of his life for two hours on the floor of the Senate when the tariff was under discussion.

This speech proved a bombshell in the ranks of the administration party in Congress. It spread dismay on every side, and McKinley and his staff have not yet recovered their composure. Among keen observers, it has always been suspected that Mr. Blaine, whose intelligence is beyond question, was at heart a disbeliever in the absurdities of protection; and their opinion of his moral fibre has enabled them to reconcile this supposed disbelief with his protectionist harangues on the stump. These persons have always expected him, at some convenient moment, to follow the example set by Sir Robert Peel when he "caught the whigs bathing and stole their clothes." The question is—does he deem the present moment the right time for his flop?

The census is being taken, and the country is agitated over its results. Towns which have been claiming a larger population than they hold are furious over what they call the negligence of the enumerators; and people all over the country are exasperated at the impertinence of the census takers in attempting to gather vital statistics. Commissioner Porter—little English Bob, as they call him—is a person of no tact or discretion. In the hope of gathering figures respecting disease and crime, he has directed his enumerators to ask every one whether they have any lunatics, or ex-convicts, or imbeciles in the family; and of course, where the official happens to be as devoid of judgment as his chief, the questions are put in an offensive manner, and breaches of the peace result. No official statement of the figures compiled has been given to the public; enough is known to show that the two cities which have increased the most in population during the past decade are New York and Chicago. In the former city, the

increase during the past ten years will probably be not less than 60 per cent., in Boston 25 per cent., in Philadelphia 10 per cent., and in San Francisco about 7 per cent. The increase in all cases is chiefly due to immigration. It is doubtful whether the natural increase amounts to anything. Our death rate trends closely on the heels of our birth rate.

The pugilist La Pine, who killed McBride in a prize fight at the Golden Gate Athletic Club, has been arraigned for murder, and his seconds and the officers of the club were held as his accomplices. An impression prevails that their trial will prove a farce. Prize fighting is a popular sport in this city, even in the best regulated circles. And after the usual amount of vituperative indignation, a pliant justice and a complaisant District Attorney will probably conspire with a packed jury to secure the acquittal of the defendants.

The judgment of the New York Court against the Sugar Trust has been confirmed on appeal, and the Trust is in bad case. The Court of Appeals declared:—

The defendant corporation has violated its charter and failed in the performance of its corporate duties, and that in a respect so material and important as to justify a judgment of dissolution. We hold besides that in this State there can be no partnerships of separate and independent corporations, whether directly or indirectly through the medium of trusts, and no substantial consolidations which avoid and disregard statutory provisions and restraints, but that manufacturing corporations must be and remain several as they were created, or one under the statute. The judgment appealed from is affirmed, with costs.

Trust certificates are nevertheless firmly held. The public evidently believes that the Trust will prove stranger than the Courts.

A romantic story of shipwreck was revealed when the U.S. ship *Adams* arrived last week from Samoa. She brought two negroes who had been sailors on a schooner, the *Challenger*, and had been set adrift in an open boat by a brutal captain. Their story, which was as follows, reads like a chapter from Robinson Crusoe:—

We left Apia on January 5th, when the breeze sprang up, and soon got out of sight of land. We had a good breeze all that night. Next morning when we turned to the mate, Dallas, told us to rig staves and place them over the side to clip the rust off the dead-eyes. We did so. A nasty sea was on, and the vessel rolled cross-grain, and we got wet. I came on deck and told the mate that we did not care to get wet and stand the risk of getting washed off the stage, and he told the captain.

The captain then ordered the boat over the side and told us to scrape and paint from that. We did so, being on the lee-side, and he told us to hold the bow of the boat, and a bridle to hold her in at the stern under the counter. There was quite a sea, but scarcely any wind, and the vessel just had headway.

A heavy squall of wind and rain came up and the schooner went along lively. She was light, and as she rose on the sea and fell again the counter came down on the boat and threatened to swamp her. I cut the bridle and hollered out "on deck there." Our boat was full of water. The man in the wheel heard me holler, and looked over the taffrail.

He made a run and cut the painter, and there we were adrift. We thought the schooner would come back for us, but a heavy rain-squall came up and we saw her no more. The boat was full of water. We had one bucket, an oar and a gunny-sack in it. We tried to bail the boat out, but it filled as rapidly as we bailed out.

We tried a number of schemes. We both got on the stern and then jumped into the water quickly, and some water flew out at the bow, but it quickly filled again. Finally we both got on the lee-side, and by good bailing got her clear of water.

We were very glad when we were out of the way of the schooner. We did not know where we were or which way to steer. We had nothing to eat. We broke off one of the thwart and rigged it as a jury mast, with the gunny sack for a sail. We took turns at steering with the oar, not knowing where we were going. A heavy gale sprang up and for five days and nights we ran before it, drenched through all the time.

On the fifth day, we despaired—we were played out. I said to Ennis, "We ought to pray." He did pray, and asked the Lord to give us a show, and you bet he did so. Shortly after, Ennis said, "I see the loom of the land." I said, "No you don't; it's top of the sea, we saw the cloud getting plainer, and I was the land, sure enough."

We got off a cluster of three islands at 10 o'clock that night, and the natives came off to us in canoes, and gave us breadfruit, taro, and fish to eat, and piloted us ashore. We landed on the island of Manna. There were two white traders there and missionary or Kanakas. The natives were kind to us, as was a

When we had been there four weeks a small trading boat commanded by Captain Fisher, who runs one of Young's stores at Pago Pago, came to Manna. He would not take us off, but he took word to Apia, and two weeks after the *Adams* came for us, and took us from the island. We have been aboard her ever since.

Yesterday afternoon, by a vote of 152 to 735, the House of Representatives refused to concur in the Senate amendment of the Silver Bill providing for free coinage. This extinguishes the last hope of the extreme silver men, who proposed to coin more silver than the mines produce, in the hope of raising the market price of the metal. The bill now goes back to the Senate, and will be referred to a committee of conference which will probably report in favour of a provision requiring the Mint to coin at least \$4,000,000 a month of silver dollars. As the product of the mines is less than \$45,000,000, the effect of this enactment would not essentially diminish administration will in any event fail to command the support of its own party, and it is noted, as the new pocket borough senators from the Dakotas and Washington voted against the Government which got their constituents into the union.

The event of the day in sporting circles is the defeat of the great New York racer Zerry by the California colt *Salvator*, at Sheephead, Long Island yesterday. The race was a mile and a quarter, and the time of the winner was 2.05, which is

1½ seconds better than the record. *Salvator* won by a neck. The race was for \$5,000 a side, to which the Club added \$10,000, but it is said there was at least half a million dollars in the hands of the bookmakers on the result of the race. *Salvator* is four years old, and won \$70,000 for his owner, Mr. Haggin, last year. When a horse can win, he generally proves good property for his owner.

ENQUIRY AS TO DEATH AT SEA.

An enquiry into the circumstances attending the death of Ebenzer Crooks, chief mate of the steamer *Algoma*, was held in H.B.M.'s Consulate on Wednesday before Mr. Enslie, H.B.M.'s Consul.

John George, master of the *Algoma*, deposed that the cause of the death of deceased was dysentery. He fell ill on June 29th, the day after leaving Singapore, but witness thought that he had been ill for some days before that, but had not reported it. He complained of looseness and pains in the head when he reported himself ill. He took to his bed the day after. Witness attended him and gave him medicine daily, and had him in the cabin, sometimes in bed and sometimes in an easy chair. He did not complain much of any particular pains, but there was great looseness of the bowels. At times he had pains in the stomach, and witness applied linseed poultices to the left side. He continued in that state, getting worse and very weak, until the day of his death. He was conscious all the time and at his death. He was well attended to. He had kidney complaint about three years ago, and left the last ship he was in on account of illness, joining witness again this voyage. He was with witness when he suffered from the kidney complaint in another ship. Witness could not attribute his death to any other cause but severe diarrhoea. The log book, being read by Mr. Enslie, confirmed the captain's statement.

Thomas George, second officer, confirmed the captain's evidence, and said further that there never was a man better treated and attended to than the deceased. The steward and one of the quarter-masters were continually with him. Witness could not attribute his death to anything else than diarrhoea. He caught cold after leaving Rangoon as did all of them, but, having diarrhoea, it might have been worse for him than for the rest.

William Jones, the steward, deposed that he did not know any other cause for the death of deceased but diarrhoea. He was supplied with medicine by the captain and witness constantly. He did not complain of pain except on the first day. It was simply looseness. He did not lay much on the bed it being very hot there, but mostly on a chair and cushions. A quarter-master was with him day and night, and they were changed every two hours.

John Samball, quarter-master, deposed that the previous evidence was correct. The only cause of death he could think of was looseness. Witness attended him whenever he was not at the wheel. Every one had done their best for deceased. Witness had noticed no illness besides diarrhoea, except that deceased coughed a little, but not very badly.

His Honour said he found that deceased died at sea from what appeared to be very severe diarrhoea, and that every possible care was taken of him during his illness.

IN H.B.M. COURT FOR JAPAN.

Before J. J. ENSLIE, Esq., Acting-Assistant Judge
FRIDAY, June 18th, 1890.

ALLEGED BREACH OF CONTRACT BY AN ENGINEER.

An action was heard to-day which was brought by the Nippon Yusen Kaisha against Robert Atkins for the sum of \$1,000 alleged to be due to the Company through the non-fulfilment of a contract on the part of the defendant. Mr. Wallard was for the prosecution; the defendant did not appear.

William Nicol Wright deposed that the petition in the case was served on Robert Atkins by him. The signature was that of witness. It was served on May 28th, and no answer had been put in.

By Mr. Wallard—It was served on board the steamer *Parthia*. Witness heard that the defendant was third engineer on that ship. He also served the notice of the hearing of the case on July 8th on him on board the *Parthia*.

Mr. Wallard said that the action was brought up on an agreement made in Glasgow in September, 1888, under which the company engaged the defendant for three years as an engineer in their service. At that time Atkins had served as an engineer, but had no capacity as a marine en-

gineer; the company had been at much expense in training him as an engineer, and this expense they looked forward to recoup themselves by his three years' service. Atkins had come out on the *Kobe Maru*, which happened to be leaving England at the time. He arrived on October 30th and received a certificate of competency in January, 1889. He did not commence his duties till March, 1889, but Counsel would with his Honour's permission amend that part of his petition and state that from the time of receiving his certificate of competency defendant was under service to the company, and really commenced his duties on January 25th, 1889, and served the company till March 17th, 1890. Then he deserted the company and shipped on board the *Parthia*, where he was still. The company had a year and a half of his service which failed to requite them for their outlay. They had been obliged to send to England for a man to replace him and were at great inconvenience. Counsel, though not knowing the exact sum, could give his Honour some idea of the damage the company had sustained. The defendant was brought out on one of the company's ships, the fare of which was £60. What he cost them for messing was half-a-crown a day, and amounted to £7. Then since his arrival in Japan from October 30th to January 25th, 1889, he received a mess allowance of \$1 per day and that came to £13. From the time of his engagement, September 3rd, 1888, to January 25th, 1889, he received payments which came to £42. The expense was £62 without taking into account his passage from England; £62 was spent on him, and £60 might have been spent on him for passage. The company had to send to Great Britain for another man who would have to go through the same training as Atkins and would cost another £62, and would also cost £60 for passage out. The company would have to get him a passage by an outside line which would cost from £45 to £50, so that with £62 already spent and £62 more to be spent on another man and £50 for the passage, the total was £174. Then there was some consideration to be taken of the great inconvenience the company were put to by the loss of one of their engineers, and the time lost in getting another to fill his place. The only way they could get another was from Great Britain on a three years' agreement. The company particularly wanted the men who were under this agreement to understand that if they desert the service they do so at their own cost, under penalty of damages.

Alexander McMillan deposed that he was the foreign director of the Nippon Yusen Kaisha. He received the agreement with Atkins from their agents in Glasgow. It was forwarded to him by Captain Brown who was then their agent for ships, etc., in Glasgow. The almost invariable custom was to recruit their staff of engineers by bringing out men from Great Britain who had not been to sea before but had had a good practical training in workshops, which made them good workmen, but as a rule they had no marine experience. When they came out they were almost invariably put on board ships as supernumerary engineers until they were able to keep a watch at sea. They were of no practical use on board as there was a competent number of engineers without them; therefore they were an additional expense to the company. They would have a second class passage coming out, the approximate cost of which would be £35. The present cost by the P. & O. boats was 43 guineas. They were almost invariably engaged for three years; the term was important, as a short period would fail to recoup the company for the expense and outlay. The experience of the company was that it was impossible to get good men here; it had been tried but would not work. The defendant came out in the *Kobe Maru*, which left early in September, 1888, and arrived on October 30th. There were four other engineers who came out on the same ship, at the same time as Atkins did, and on the same terms. He came out as a passenger, there being five men in the engine-room. He would doubtless be called upon to go into the engine-room, but only as a matter of form, as there would be no work for him to do there. There was only one passenger rate on that voyage—the ship not having been advertised as carrying passengers, and taking only a few, and that was £60. The average rate of the mess allowance on the ship was half a crown a day per head. It was reported to witness in March that the defendant was on the sick list. He heard that he had deserted and gone on board the *Parthia*, but was at first misinformed being told it was the *Abyssinia*. Defendant was last in the service of the company on the *Yokohama Maru*, and was on that ship when he applied for sick leave for which he produced a doctor's certificate and had been allowed it. He then got half-pay and mess allowance which he received regularly. He got every-

thing which was due to him under the agreement. In the portage bill for the *Yokohama Maru* is his receipt for wages up to March 14th, 1890. His expenses were from October 30th, 1888, to January 25th and his mess cost \$1 per day or \$30 per month. He was paid at the rate of £9 per month from September, 1888, to January 25th, 1889. The result of his desertion was that they would have to engage another man in Great Britain to come out and fill the vacancy, the cost of which would be: his passage out 45 guineas, and his railway expenses to the port he shipped at, which would bring it up to £50. It would be a fair allowance to allow two months to qualify him when out here, and would cost at the rate of £9 per month for wages, and he \$30 per month for messing. The company would not be able to provide a passage for him in one of their own boats, there being no immediate departures from England.

William Barrie deposed that he was the superintending engineer of the Nippon Yusen Kaisha; had charge of the engineers, and appointed them to their ships. They came out from England on a three years' agreement and are under witness's superintendence. They always require some training; the time is from one to four months, but it depends greatly upon the men. The defendant came out by the *Kobe Maru*. He left in the early part of September, 1888, witness thought on the 3rd, and arrived on October 30th. Witness was acquainted with Atkins writing and signature, and recognized his signature on the portage bill. He was not appointed as a junior engineer but was put on the reserve list as a supernumerary engineer, and was taken on board one of the larger ships, but his services were of no value at that time. His services to the company were from March, 1889. Witness did not remember the exact date. Witness remembered appointing him fourth engineer, it was three or four months after his arrival. As fourth engineer he was in various ships, the last of which was the *Yokohama Maru*. There is no other engineer of the same name in that ship or in the service. He left the *Yokohama Maru* on March 14th on account of sickness, for which he produced a doctor's certificate. He went on shore and was put on half-pay and full mess allowance. Witness not hearing from him for a week or ten days, made enquiries and found that he had shipped on the *Parthia* as fourth engineer. He was a good engineer, and a man likely to get promotion, and was the next on the list for promotion as third engineer. The engineers generally became of more value as they rise to become third and second and sometimes first. The company derived most value from them when they became second engineer. It was necessary to send for another man in order to keep up the staff of engineers.

George Hodges deposed that he was in charge of the shipping department at the Consulate. He had the entry of Robert Atkins in his books. In the register of men shipped and men discharged No. 67, of 1890, there was an entry—"R. H. Atkins entered on March 19th, aged 25, engaged on the *Parthia* as fourth engineer at \$70 per month." He stated that he had been discharged from the *Yokohama Maru*.

Mr. Walford said that was his case, and the damages, as he had already stated were £60 passage on the *Kobe Maru*, £7 for mess, which if the passage claim was allowed would of course be included in that. There was \$1 per day for his mess allowance from October 4th to January 25th, and his pay from the commencement to January 25th, £42. For the new man to come out the cost would be about the same. By defendant's agreement he was to get £9 per month, but his salary had been raised as he got more useful, and his Honour would see on the portage bill that his salary at the time of his desertion was \$65 per month, which was a considerable rise.

His Honour reserved judgment.

PASSENGERS.

ARRIVED.

Per Japanese steamer *Niigata Maru*, from Hakodate:—Mr. F. Buchner in cabin; 16 passengers in steerage.

Per Japanese steamer *Kobe Maru*, from Shanghai and ports:—Mrs. Martin, Mrs. Macdonough, Miss Kirkpatrick, Mrs. Delaney, Mrs. Ashton, Mrs. McCann, Mrs. Boyne, Miss E. Williamson, Mrs. Platt, Mrs. Allen, Mrs. Chisaka, Messrs. Endo, Murai, C. A. Taylor, Posch, M. A. Robertson, Matsuo, H. Reimseloff, Ito, Rosenfeld, Yokato, and Pedetin in cabin; Captain Cleveland, Messrs. McJames, Chims, Yamada, Sugiyama, and Yamaoka in second class, and 86 passengers in steerage.

Per British steamer *Oceanic*, from San Francisco:—Hon. J. Helms Ferguson, Mr. and Mrs. F. W. Campion and servant, Mr. John Francis Fessenden, Mr. Wm. H. Fessenden, Rev. and Mrs. C. Bishop and infant, Master Carr Bishop, Master Milled Bishop, Miss Faith Bishop, Rev. and Mrs. T. C. Williams, Mr. and Mrs. M. E. Mortimer, Master Harry Mortimer, Mr. Edward Gilger, Miss G. Bancroft, Mr. W. H. Macomber, Lieutenant Baba, Mr. B. Singi, Mr. and Mrs. S. Yasuda, and Mr. Takasaki in cabin. For Chiefloo: Miss M. J. Thornton in cabin. For Hongkong: Mr. James Slauson and Dr. J. S. Owens in cabin.

Per British steamer *Belgie*, from Hongkong:—Hon. A. Lister and servant and Mr. Low Wing Chong in cabin.

Per Japanese steamer *Omi Maru*, from Kobe:—Countess Itagaki and infant, Miss Itagaki, Mrs. Tuomi, Dr. and Mrs. Green and 2 children, Miss Green, Mr. and Mrs. Aoki, Mrs. Noyes, Miss Gill, Miss Holbrook, Messrs. Curtis, Buckley, Madely, McInnes, Hidin, Naruse, and Suyematsu in cabin; Messrs. Waggon, Cooke, Takada, Asai, and Tachibana in second class, and 63 passengers in steerage.

Per Japanese steamer *Tokio Maru*, from Kobe:—Dr. C. S. Fischer, Miss Bikenheal, Miss Doughaday, Miss C. Gudson, Messrs. Horatsn, Yoshikane, Fukushima, and Takagi in cabin; Miss Owaki, Messrs. M. Tomiyoshi, K. Ouba, G. Ikuta, S. Takasu, H. Hakuno, and Y. Tawano in second class, and 72 passengers in steerage.

DEPARTED.

Per British steamer *Ancona*, for Hongkong via ports:—Mr. Flint and servant, Mr. and Mrs. Kennedy and servant, Mrs. Brunner and amah, Mrs. Seligmann and 2 children, Rev. W. Ashmore, Messrs. Gillespie, Goodwin, and Mong Ling in cabin; 3 Chinese and 1 European in steerage.

Per Japanese steamer *Kobe Maru*, for Shanghai and ports:—Mr. and Mrs. Kunne and child, Miss M. J. Thornton, Messrs. C. Gibbons, C. J. Clerk, Conrad Harvey, J. Shiba, A. Niwa, Noma, N. Nakano, E. H. Kishan, Nakayama, and Horiguchi in cabin; Mrs. Takemura, Mrs. T. Terao, Mrs. A. Terao, Messrs. Terao, R. Ferguson, Kamamoto, T. Tamaike, Igarashi, Takahashi, J. C. Donenberg, Ah Foke, and A. Tachibana in second class, and 286 passengers in steerage.

Per British steamer *Belgie*, for San Francisco:—Hon. W. M. Goodman, Mr. and Mrs. Andrew Johnston, Mr. Boyd Bredon, Captain A. H. Morse, Mr. J. McQuaig, Mr. and Mrs. McFarlane, Miss Oehr, Mr. P. Francois, Mr. P. S. Morse, Rev. Dr. and Mrs. Cochran and two daughters, Mr. and Mrs. Jas. Pott, Miss Pott, Miss Watt, Mr. E. Clark, Mr. and Mrs. J. Romero, Miss Romero, Lieutenant-Commander and Mrs. H. Vail, U.S.N., and infant, Rev. A.

R. Morris, Rev. and Mrs. C. W. Green and three children, Rev. N. M. Frantz, Miss E. Earl, Capt. B. D. Cleveland, Rev. Dr. and Mrs. W. A. P. Martin, Mr. E. H. Tuska, Mr. R. W. Gorrell, Mrs. E. Reese, Mr. and Mrs. J. L. Scott, Mr. C. A. Taylor, Mr. S. Rosenfeld, Rev. E. E. Aiken, Rev. D. P. Jinkin, Rev. and Mrs. C. S. Long and four children, and Miss L. B. Smith in cabin.

CARGOES.

Per British steamer *Ancona*, for Hongkong via ports:—Silk for France, 70 bales.

Per British steamer *Belgie*, for San Francisco:—

REPORTS.

The Japanese steamer *Kobe Maru*, Captain Haswell, reports:—Left Shanghai the 5th July at 1 p.m.; had light to moderate N.E. winds and cloudy weather. Arrived at Nagasaki the 7th at 7.30 a.m. and left at 5 p.m.; had fresh northerly winds and heavy sea. Arrived at Shimonoseki the 8th at 7 a.m. and left at 8 a.m.; had light to moderate N.E. winds and fine weather. Arrived at Kobe the 9th at 11 a.m. and left the 10th at noon; had light S.E. airs and light southerly swell to Ooshima; thence to port fine and smooth with light winds. Arrived at Yokohama the 11th July at 5 p.m.

The British steamer *Oceanic*, Captain Smith, reports:—Left San Francisco the 26th June at 4.14 p.m.; had strong head winds with heavy head seas to the meridian; thence moderate and variable winds and smooth sea; weather cloudy, misty and very cold the entire passage; made Imlboy-saki at 11 p.m. July 12th, from midnight till 9 a.m. on 13th had dense fog. Arrived at Yokohama at 10.45 a.m. Time of passage, 16 days, 1 hour.

The British steamer *Belgie*, Captain Walker, reports:—Left Hongkong the 8th July at 1.30 p.m. Arrived at Kobe the 13th at 5.22 a.m. Time 4 days, 14 hours, 1 minute, and left the 14th at 4.14 a.m. Arrived at Yokohama the 15th July at 7.50 a.m. Time from Hongkong 6 days, 16 hours, 11 minutes. Encountered fine weather with light southerly winds to port.

The Japanese steamer *Omi Maru*, Captain Christensen, reports:—Left Kobe the 14th July at noon; had light variable airs with clear, pleasant weather throughout the passage. Arrived at Yokohama the 15th July at 4.30 p.m.

The Japanese steamer *Tokio Maru*, Captain Drummond, reports:—Left Kobe the 16th July at noon; had fine weather and light variable breeze; passed Tomagashima at 2.17 p.m. with light westerly breeze; met steamer *Meiji Maru* at 2.40 p.m.; abeam Hino misaki at 4.25 p.m., weather still the same; rounded Ooshima at 8.32 p.m., moderate E.N.E. breeze which continued throughout the night; the 17th at 8.36 a.m. Omai-saki bore N. N.W. dist. 12 miles; passed Rock Island at 11.20 p.m., moderate E.N.E. winds with fine clear weather; abreast of Sagami at 3 p.m.; Kannon-saki at 4.7 p.m., calms and light variable airs. Arrived at Yokohama at 5.20 p.m.

LATEST COMMERCIAL.

IMPORTS.

The Yarn market has continued active, resulting in a large business in English Yarns, but at the close the demand has subsided. The position of Bombay Yarns is unchanged. Shirtings remain the same, without inquiry. An inclination to do business in piece goods has prevailed, and some transactions have been reported in Velvets and Italians. Sales for the week amount to 2,275 bales English, 300 bales Bombays, 15,000 pieces Shirtings, 2,700 pieces Velvets, and 1,000 pieces Italians.

COTTON PIECE GOODS.

METALS.

There has been some little enquiry at very low prices, and buyers now hold off for lower prices still, as the advance in Sterling exchange makes the lay down cost of future arrivals less. The reported sales include some few parcels Bars and Wire Nails.

Flat Bars, 1 inch	\$2.90 to 3.00
Flat Bars, 1 inch	3.00 to 3.10
Round and square up to 2 inch	2.90 to 3.10
Nailrod, assorted	Nom.
Nailrod, small size	Nom.
Iron Plates, assorted	3.20 to 3.30
Sheet iron	3.50 to 3.90
Galvanized iron sheets	6.50 to 6.75
Wire Nails, assorted	4.00 to 4.75
Tin Plates, per box	4.80 to 5.10
Pig iron, No. 3	1.40 to 1.50

KEROSENE.

Arrivals since the *Argyll* on 5th instant have been three cargoes, all from New York, the *Hamburg*, *Anahua*, and *John Gill*. No sales to date, although the market is perhaps a little firmer than it was a week ago. All quotations quite nominal, and Japanese intimate that they will look for some reduction now that exchange is rapidly advancing.

QUOTATIONS.

Chester	Nom. 15.75 to 8.30
Comet	Nom. 1.70 to 1.72½
Devon	Nom. 1.67½ to 1.70
Russian	Nom. 1.65 to 1.67½

SUGAR.

A hand to mouth trade has been done during the week, with but few sales. Takao has sold slowly; 5,000 piculs were taken at \$4.50 per picul, superior grade; and 2,075 piculs Manila fetched \$4.40 to \$4.50, according to quality, besides 500 piculs of Common cake at \$3.70. The market for White Refined is weak, and these Sugars are slow of sale.

White Refined	\$5.75 to 8.30
Manila	3.70 to 4.50
Taiwanfoo	— to —
Pentam	2.85 to 2.90
Manilla	2.80 to 2.85
Cake	— to 3.70
Brown Takao	4.20 to 4.25

EXPORTS.

RAW SILK.

Our last issue was of the 11th instant, since which date Settlements in this market are entered as 301 piculs, divided thus:—*Filatures* 135, *Reels* 151, *Kakeda* 15. Additional to these figures Direct shipments are 91 bales, thus making the export trade of the week equal to about 400 piculs.

As will be seen from the above paragraph considerable business has been done, and prices have been well maintained. Yesterday, however, after the departure of the *Belgic* things came to a stand. The higher price of silver (50½ pence) called from London and the consequent rise in exchange here put the break on. Buyers want a reduction before they buy further, while sellers profess to stand, against the prospect, and say that they cannot reduce prices without incurring a serious loss which they do not like to face.

Meanwhile, lower prices are wired from Italy,

and it seems that consumers can buy cheaper there than here. The natural result of the rise in silver will be that gold-using countries will be placed in a better position for competing in the raising of produce, with those lands which have a silver standard. Countries like Japan, China, and India will therefore have to face the music, and lower their prices if they want to keep up in the commercial race. It will doubtless take some time for things to find their level in this respect.

There have been two shipping opportunities during the interval, Canadian and American mails of the 16th and 17th instant. The former (*Straits of Belle Isle*) had 70 bales, and the latter (*Belgic*) 357 bales all for the U.S. trade. These departures bring the present shipments up to 974 piculs, against 1,010 piculs last year and 1,911 piculs at same date in 1888.

Hanks.—No business at all during the week, and prices are all nominal. For a long time sellers held out for extreme rates, and have not yet made up their minds to sell at reasonable figures. Prices at the moment quite nominal.

Filatures.—Several parcels both *Shinshu* and *Koshi* have been bought for the American trade at the following high prices:—*Kaimoisha* \$730, *Hiranosha*, *Higashi-Gatoshu*, *Toei-sha*, *Shunmei-sha* and equal thereto at \$720; *Shichi-yo-sai* brought the same figure; and just before the *Belgic* sailed the owner of *Kaimoisha* accepted \$715 for about 20 piculs, but this reduction did not equal the rise in exchange. While writing, a consignment of 118 boxes Old *Filatures* is being arranged through a foreign house, and a parcel of Old *Ise* *Filatures* (*Muoyama*) is reported to have been settled for Europe at \$730.

Re-reels.—Considerable business in good *Joshu* at the following prices:—*Five-Girl* \$685, *Tortoise* \$682½, *Kanrakusha* \$682½, *Kirihana* \$670, No. 2 *Tortoise* \$660, No. 2 *Kirihana* \$650. Prices are working slowly down as exchange rises, but owners refused \$650 yesterday for *Shorusha* first sorting.

Kakeda.—Supplies are coming in, and a few sample lots have found buyers, at from \$650 to \$590 according to grade. None of best quality have been seen as yet.

WASTE SILK.

Since the 11th instant settlements have been only 86 piculs old fibre, divided thus:—*Noshi* 25, *Kibiso* 61 piculs. No direct export at present.

The supplies of new waste do not come in very rapidly, and although sellers are now getting more willing to do business yet buyers are still out of the market. The rapid advance in foreign exchange must have the effect of ultimately depressing silver values of produce here.

The English mail steamer *Ancona* (12th inst.) took 9 bales *Noshi* for Marseilles, thus bringing the present export figures up to 535 piculs against

97 last year, and 870 piculs on the 18th July, 1888.

Pierced Cocoons.—Some few bales have arrived and seem to be of good white colour, fair quality, but considerably stained. No price made as yet, although sellers maintain that they cost the equivalent of \$120 up country.

Noshi.—Nothing done beyond a few more piculs of old *Filature* at last quotations, with a parcel *Oshu* at \$145.

Kibiso.—Some few purchasers in old fibre, comprising *Filature* at \$105 and *Sandanshu* at \$21. A little *Kusuto* also noted at \$80.

Nothing done in *Mawata* or *Sundries*.

TEA.

Settlements total 6,245 piculs for seven days ending to-day, and consist principally of low grades. There are now some 12,300 piculs in stock, 8,000 piculs of which consist of Medium and downwards. Prices for Common to Medium grades are now fifty cents per picul cheaper than they were a week ago; higher grades, however, show no quotable change. The total shipments of Tea from Japan are 6,225,059 lbs. for New York, 9,224,601 lbs. for Chicago, 4,109,303 lbs. for Canada, and 802,104 lbs. for the Pacific Coast trade; total 20,361,067 lbs. against 18,256,880 lbs. for the same period last year.

CONTRACTORS TO THE ADMIRALTY, LEADING STEAMSHIP COMPANIES, AND YACHT OWNERS.

STEAM LAUNCHES & YACHTS,

Fitted with KINGDON'S PATENT MACHINERY (of which we are sole makers) are far superior to any others. The chief advantages are:—

1. Wonderful Economy of Fuel.
2. First-class Workmanship.
3. Moderate Prices.
4. Greatest obtainable power for weight and space occupied.
5. Quickness in raising steam.
6. High rates of speed guaranteed.
7. Absence of noise and vibration.

We build Steam Launches of every description, from the smallest size suitable for carrying on yachts of 12 tons and upwards. We also build small light Draft Paddle Boats, Tugs, Stern Wheel Paddle Steamers, and Boats in Frames, &c., &c. We supply sets of Machinery separately. Illustrated Catalogue in English, French or Spanish. Send for Copy to

SIMPSON, STRICKLAND & CO.

WORKS:
DARTMOUTH, SOUTH DEVON (ENGLAND).

LONDON OFFICE:
181, QUEEN VICTORIA STREET, E.O.

MACHINERY.—Mr. ARTHUR WADHAM, proprietor of *The Machinery Market and Exporter* (illustrated)—the greatest machinery business journal published—(subscription 12s. 6d. per annum post free); London Agent of Messrs. Simpson, Strickland & Co., steam-launch builders, is also a large exporter of Machinery and Engineering Materials. Mr. Wadham is open to act as sole Buying Agent in England for one or two good firms in Japan desiring to deal with a reliable house. Mr. Wadham's intimate knowledge of the English Machinery and Engineering Trades enables him to save large sums to foreign customers placing their orders in his hands. Firms dealing with Mr. Wadham may rely upon being served in a prompt and straightforward manner. Address:—Mr. Arthur Wadham, Engineering Offices:—181, Queen Victoria St., London. Registered address for telegrams:—“Wadham, London.” June 28, 1890.

THE GREATEST WONDER OF MODERN TIMES. HOLLOWAY'S PILLS.

PERSONS suffering from weak or debilitated constitutions will discover that by the use of this wonderful medicine there is “Health for all.” The blood is the fountain of life, and its purity can be maintained by the use of these Pills.

Sir SAMUEL BAKER, in his work entitled “The Nile Tributaries in Abyssinia,” says:—“I ordered the druggist Mahomet to inform the Fakir that I was a Doctor, and I had the best medicines at the service of the sick, with advice gratis. In a short time I had many applicants, to whom I served out a quantity of Holloway's Pills. These are most useful in an explorer, as, possessing unmistakable purgative properties, they create an undeniable effect upon the patient, which satisfies them of their value.”

SIMPLE, SAFE, AND CERTAIN! HOLLOWAY'S OINTMENT

Is a certain remedy for bad legs, bad breasts, and ulcerations of all kinds. It acts miraculously in healing ulcerations, curing skin diseases, and in arresting and subduing all inflammations. Mr. J. T. COOPER, in his account of his extraordinary travels in China, published in 1871, says:—“I had with me a quantity of Holloway's Ointment. I gave some to the people, and nothing could exceed their gratitude; not only in consequence, milk, fowl, butter, and horse feed poured in upon us, but at last a tea-spoonful of Ointment was worth a fowl and any quantity of peas, and the demand became so great that I was obliged to lock up the small remaining stock.” Sold by all Chemists and Medicine Vendors throughout the World. May 1st, 1889.

KEATING'S INSECT POWDER.

BUGS, BEES, MOTHS, BEETLES, and all other Insects are destroyed by KEATING'S Insect Powder, which is quite harmless to domestic Animals. In exterminating fleas the success of this Powder is extraordinary, and no one need be troubled by those pests. It is perfectly clean in application. Ask for and take no other than “KEATING'S Powder,” as imitations are numerous, and fail in giving satisfaction. Sold by all Chemists, in tins and bottles. May, 3, 1889.

NOW READY,

WITH COLOURED PLAN.

A FULL REPORT on the ERUPTION of BANDAI-SAN, being a reprint from the “JAPAN MAIL” of copious translations from Tokyo Journals, a Description by “Our Reporter,” and an “Editorial,” written after a visit to the locality. Price 50 Cents.

To be obtained at the Japan Mail Office, or of KELLY & WALSH, Limited.

Digitized by Google May 17th, 1890.

YARROW'S SMALL STEAMERS AND STEAM LAUNCHES.

SCREW STEAMERS WITH SPEEDS RANGING UP TO 30 MILES AN HOUR.

PADDLE STEAMERS WITH DRAFT RANGING DOWN TO 6 INCHES OF WATER.

Stern Wheel Steamers with very shallow draft especially suitable for river navigation.

MACHINERY CONSTRUCTED FOR BOATS BUILT ABROAD.

YARROW & CO., POPLAR, LONDON, E.

YOKOHAMA: SATURDAY, JULY 26, 1890.

DEATH.

By telegram, dated London, 18th July, EDGAR ARBOTT, of Yokohama, aged 42 years.

SUMMARY OF NEWS.

COUNT INOUE will leave the capital in a few days for Yamaguchi Prefecture.

HER MAJESTY THE EMPRESS will pay a visit to the Nobles' (Girls) School on the morning of the 22nd instant.

HIS MAJESTY THE EMPEROR will pay a visit to the Military College on the 26th instant, leaving the Palace at 8.30 a.m.

H.I.H. PRINCE KACHO will leave Japan in August for Germany, where His Highness will spend ten years in study.

MARCHIONESS HACHISUKA proceeded to the Imperial Palace on the 21st instant to pay her respects to the Empress.

THE *Tsukuba Kan*, with a number of graduates of the Naval College, sailed for Chefoo on the 7th instant from Shanghai.

MR. INOUE, President of the Legislative Bureau, received the additional appointment of Privy Councillor on the 19th instant.

HIS MAJESTY THE EMPEROR was present at a meeting of the Privy Council held on the 17th instant, returning to the Palace at noon.

PRINCE SANJO left Tokyo on the 20th instant for Fujisawa, and Count Yamagata proceeded to Oiso on the same day from Yokohama.

It is stated that revised Public Meetings Regulations, having been passed by the Privy Council, will be promulgated in two or three days.

THE Exhibition was visited by 918,369 persons during the period from the 1st April to the 18th inst., of whom 6,883 were distinguished, 38,097 special, and 847,067 ordinary visitors.

26,111 being students, and 211 foreigners holding special invitations. The daily average was 8,425.

H.I.H. PRINCE KITASHIRAKAWA, who had been staying at the villa of Mr. Hara Rokuro at Noge, Yokohama, for some time, returned to Tokyo on the 20th instant.

THE ceremony of conferring certificates on graduates of the Tokyo Senmon School, established by Count Okuma, took place on the 20th instant.

H.R.H. PRINCE BHASAKARAWONGSE paid a visit to the Exhibition on the 22nd instant, under the guidance of Mr. Hanabusa, Chief of the Exhibition Bureau.

THE line of the Kyushu Railway Company between Hakata and Satosaki, which is now in course of construction, will be opened in September for traffic.

ONE hundred and eighty-eight inhabitants of Toisugawa, Nara Prefecture, who suffered by the floods last year, will leave their native villages on the 28th instant for Hokkaido.

THE chiefs of various districts of Tokyo held a meeting on the 19th instant at the Tokyo City Government Office for the purpose of discussing methods of preventing the spread of cholera.

THE ceremony of presenting diplomas to graduates of the Nobles' (Girls) School took place on the 22nd instant in presence of Her Majesty the Empress and H.I.H. Princess Kitashirakawa.

NINETEEN rice-brokers, members of the Osaka Rice Exchange, were sentenced in the Osaka Correctional Court on the 19th instant to pay fines ranging from yen 500 down to yen 30 for having infringed the Exchange Regulations.

THE number of visitors to the Exhibition on the 21st instant was 4,274, consisting of 34 distinguished, 143 special, and 4,095 ordinary visitors, two being foreigners holding special invitations. The sum of yen 286.65 was realized by the sale of ordinary tickets.

A SHOCK of earthquake was experienced in Tokyo on the 19th instant at 4h. 18. 50s. p.m. The duration was 50 seconds, the maximum horizontal motion being 0.2 millimetre in 0.4 second. A slight shock was felt in the capital on the following day at 9h. 15m. 45s. p.m.

MR. SHIRANE, Vice-Minister for Home Affairs, Mr. Kiyoura, Chief Commissioner of the Police Bureau, and the Directors of various bureaux of the Home Department held a meeting on the 22nd instant, to discuss methods of preventing the spread of cholera, and also to deliberate on important changes which are to be effected shortly in the Department.

H.R.H. PRINCE BHASAKARAWONGSE arrived in Tokyo on the 20th instant from Hongkong. His Highness was received at Shimbashi Station by H.I.H. Prince Komatsu, Count Oyama, and other high officials of the Imperial Household Department. The Prince, accompanied by Viscount Aoki, paid a visit to the Nakamura Theatre on the evening of the 20th instant. His Highness will proceed to Nikko in a few days.

THE half-yearly meeting of shareholders of the 1st National Bank was held on the 20th instant at the Bankers' Club at Sakamotocho. The net profits for the past half-year were yen 257,930.733, of which yen 50,000 was set apart as a reserve fund, and yen 180,000 was appropriated as a dividend at the rate of 16 per cent.

per share per annum, the remaining yen 27,930.733 being carried forward to the next account.

A FARWELL entertainment was given at the Seiyoken on the 22nd instant to Mr. Watanabe, Japanese Minister to Austria, who is about to leave Japan for his post, by members of the Tokyo Statistical Society, of which Mr. Watanabe has long acted as President.

A MEETING of shareholders of the Omi Rice Exchange was held the other day. During the past half-year 2,548,520 *koku* (one *koku*=2½ piculs) of rice changed hands in the Exchange. The net profits during the period were yen 15,364.68, of which yen 6,549.156 was set apart towards business tax, yen 1,000 as a reserve fund, and yen 5,550 was appropriated as a dividend at the rate of 37 per cent. per share per annum, the remainder being carried forward to the next account.

THE half-yearly meeting of shareholders of the Tokyo Railway Company was held on the 18th instant. The net profits for the past half-year were yen 44,892.243, to which yen 137.856 brought over from the last account was added, making a total of yen 45,030.099. Of this amount, yen 897.360 was set apart towards business tax, yen 4,000 as rewards to officers, and yen 642.599 was carried forward to the next account, the remainder being appropriated as a dividend at the rate of 16 per cent. per share per annum.

THE half-yearly meeting of shareholders of the Yokohama 2nd National Bank was held the other day. The net profits for the last half-year were yen 71,517.262, to which yen 16,140.445, brought over from the last account, was added, making a total of yen 87,657.707. Of this amount yen 1,400 was set apart towards business tax, yen 17,000 as a reserve fund, yen 6,800 as rewards to officers, and yen 45,000 was appropriated as a dividend at the rate of 18 per cent. per share per annum, the remainder being carried forward to the next account.

THE half-yearly meeting of shareholders of the 15th National Bank was held the other day. The net profits for the past half-year were yen 1,970,616.166, to which yen 89,650.010 brought over from the last account was added, making a total of yen 2,060,266.176. Of this amount yen 229,371.824 was set apart towards miscellaneous expenses, yen 49,913.080 as business tax, yen 16,038.481 as rewards to officers, and yen 630,000 as a reserve fund, yen 1,069,566 being appropriated as a dividend at the rate of yen 6 per share per annum, and the remainder carried forward to the next account.

THE Import trade is again dull, the demand last week for Manchester goods having almost entirely subsided, and Yarns, Shirtings, and T.-Cloths are again neglected. Italians have been enquired for, and Velvets have received some attention, a fair amount having been bought for future delivery. Heavy stocks of Metals have seen no reduction, and large arrivals of Kerosene continue with no business; consequently in both these trades prices are nominal. Sugar has been sparingly taken, but no change in values has occurred. The condition of exchange continues to restrain the Silk trade, and buyers generally will not look at anything at present rates. The Tea trade is steady, though not extensive, grades Good Common and down being mostly in request. Exchange has not fluctuated much, though the general tendency is still upward.

EDITORIAL NOTES.

THE CRISIS AVERTED.

It is impossible, as we have often before been compelled to admit—it is impossible for foreign observers to forecast the issue of any combination of causes in Japan. The principles by which judgment is correctly guided in the West, are found to be here inapplicable in practice. Why such should be the case we cannot pretend to say with assurance, but we sometimes think that the difficulty of drawing foreign conclusions from Japanese premises is due to the comparative weakness of individualism in Japan. Under given circumstances ■ Japanese does not act as a European or an American acts: he adapts himself more readily to general expediency, and insists less upon the strict rights of the individual. It is, perhaps, because of the pliability resulting from this disposition that crises are tided over or prevented, as has once more been the case on the present occasion. Three months ago everything pointed to very serious eventualities in the money market, but by skilful management the feeling of uneasiness has been dissipated. Public securities and the shares of companies are recovering from the depreciation that overtook them in the early part of the year, and confidence is said to be again restored. Add to this that the price of rice maintains the downward tendency noted in these columns some time ago, and it will not appear extravagant to say that times have mended. An idea of the state of the share-market may be gathered from the following figures:—

	Price ruling on 27th June.	Price ruling on 16th of July.	Face value of share.
First National Bank	102.00	105.00	100
Japan Railway Company	109.50	110.00	100
Marine Insurance Company	130.00	131.00	100
Japan Mail S.S. Company	72.50	73.70	50
Tokyo Tramway Company	91.00	90.00	50
Kanagata Spinning Company	39.50	35.50	50
Domestic Carrying Company	47.50	49.00	50
Mye Spinning Company	41.00	44.00	50
Kinshu Railway Company	33.50	31.50	50
Japan Beer Company	15.00	34.50	50
Japan Sausage Company	13.00	26.00	50
Mito Railway Company	38.00	40.00	50
Tokyo Gas Company	39.00	43.00	50
Tokyo Woolen Manufacturing Company	40.00	33.00	45

Among those fourteen securities no less than twelve show a marked appreciation. It may therefore be fairly inferred that the share market has recovered its tone. Turning now to the rice market, we find the following:—

UNCURED RICE, TIME BARGAINS.			
Quotations on 27th June	For delivery in July	For delivery in August	
8.85 yen per koku	8.75 yen per koku	8.75 yen per koku	
Quotations on 16th July	For delivery in July	For delivery in August	
8.07 yen per koku	7.75 yen per koku	7.75 yen per koku	
	For delivery in September	7.53 yen per koku	

CLEAN RICE.					
First class.	Second class.	Third class.	Fourth class.	Fifth class.	
Yen.	Yen.	Yen.	Yen.	Yen.	Yen.
June 27th	15.40	15.07	14.50	13.90	13.51
July 16th	15.15	14.70	13.90	13.33	12.84

This drop in price, though not large, is regarded as significant, and good judges assert that it is likely to become more marked ere long, for, as is often the case, persons who held up their rice carefully so long as the market was rising, are now hastening to realize, the result being that considerable stocks are offered for sale.

THE HOUSE OF PEERS.

THERE is still some uncertainty as to the composition of the House of Peers. We have explained that an edict declared the ineligibility of all noblemen connected with the service of the Imperial Household, and that sixteen peers who had been duly elected, were consequently unseated. Rumour at the same time said that members of the Privy Council would probably be recommended not to accept seats in the House, inasmuch as the intention was to reserve to the Privy Council the position of an advisory body standing between the Throne and Parliament, and entirely independent of the latter. This rumour was subsequently confirmed by the resignation of eight Privy Councillors who had been elected by their Orders. Thus the number of vacancies to be filled reached twenty-four, and the Government adopted the course of declaring that these seats should be filled by the peers who had received the greatest number of votes after those previously elected.

Count Yamada, Minister of State for Justice, is among those who enter the House of Peers by this arrangement. The complete list of substituted names is as follows:—

COUNTS.

Kiyosu Iyenori, votes 26, new creation.
Yamada Akiyoshi, votes 25, *shizoku* of Yamaguchi Prefecture, Minister of State for Justice.
Ogimachi Sanemasa, votes 25, former Court Noble, now an official of the Bureau of Imperial Physicians.

VISCOUNTS.

Karashi Atimasa, votes 125, former Court Noble, now a local official of Ibaraki Prefecture.
Saisho Atsushi, votes 123, former *shizoku* of Kagoshima, now a Court Councillor.

Kawahire Sanefumi, votes 121, former Court Noble, Senator.

Hitotsuyanagi Suyenori, votes 119, former *shizoku* of Harima.

Omura Sumio, votes 119, ex-Daimyo of Omura.

Nabeshima Naotora, votes 119, ex-Daimyo of Kojiro, Hizen.

Hiramatsu Tokitsun, votes 119, former Court Noble, Senator.

Hosokawa Okitsura, votes 113, ex-Daimyo of Hitachi.

Hinonishi Mitsuyoshi, votes 115, former Court Noble, now Priest of Toyokuni shrine.

Ito Sukeharo, votes 109, former *shizoku* of Kagoshima, now a Senator.

Akita Akiyue, votes 106, ex-Daimyo of Miharu, Iwaki.

Hijikata Katsuyuki, votes 98, ex-Daimyo of Hiro, Ise.

Nagatani Nobutatsu, votes 96, former Court Noble.

Matsudaira Yasutami, votes 82, ex-Daimyo of Tanyama, Mimasaka.

Kyogoku Takanori, votes 80, ex-Daimyo of Maru, game, Sanuki.

Kurushima Michihito, votes 71, ex-Daimyo of Mori, Bungo.

Tsugami Tsugumitsu, votes 79, ex-Daimyo of Kuroishi, Mutsu.

Honjo Hisanao, votes 79, ex-Daimyo of Takatomi, Mino.

Sakurai Tadaaki, votes 78, ex-Daimyo of Amagasaki, Settsu.

BARONS.

Honda Sukemoto, votes 41, ex-Daimyo of Fukui, now local official of Fukui Prefecture.

Fujiyeda Masayuki, votes 31, former Shinto Priest, now an official of the Household Department.

MR. TAGUCHI UKICHI.

THE *Keizai Zasshi* (*Economist*) publishes the first letter received from its editor, Mr. Taguchi, who, as noticed in these columns at the time, left Shinagawa in May last on a voyage to the South-sea Islands, in the steamship *Tenryu Maru*. The letter is dated June 17th, at Apra (アプラ), Guam (グアム) Island, Mariana Group. He states that he left Ogasawara-jima on May 29th and arrived at the above mentioned island on June 11th. The voyage between the two places was as tranquil and smooth as though the Sumida River, not the open sea, were the route of the ship. Arrived at the port of Apra, his party had to undergo much annoyance and inconvenience on account of their ship having brought no certificate of health from the Spanish Consul at Yokohama. The consequence was that, after being compelled to remain on board several days, the party was only suffered to land on payment of a fine of 50 dollars. The Governor of the island, however, was very kind, and subsequently remitted the fine. At Agaña, the capital town of the island, whither they had gone to pay the fine and make commercial researches, they were very well received by the inhabitants, Spanish and native, especially the latter. The natives, Mr. Taguchi mentions, maintain that they are descendants of the Japanese, and in fact their physical appearance is said to be extremely like that of the people of this country. But from a linguistic standpoint Mr. Taguchi is sceptical of the truth of the alleged connection between the two races. The natives live and dress much like Spaniards, and there exists no ill feeling between the ruling and the subject races. There is a native gentleman, says Mr. Taguchi, named Joseph, who regularly makes three voyages to Yokohama every year, so that Japanese articles are found in every house. It was through the kindness of this merchant that Mr. Taguchi's letter was forwarded to Tokyo. Mr. Taguchi found more or less demand for the merchandise he had on

board his ship, though his main object in visiting this island was to get water and make researches. He states that nobody believed him when he explained that the object of his voyage was purely commercial. The temperature was about 87° F. in the day and 84°-85° at night. He tells us that the island produces a certain kind of wood which is extremely durable and of fine appearance. He thinks it will pay to export it. The party, he states in conclusion, will shortly start for the Pelew, Caroline, and Marshall Islands, and their return home will not be before October.

THE PRESIDENT OF THE HOUSE OF REPRESENTATIVES.

Who will be elected President of the House of Representatives? is a question now eagerly asked by the public. The general opinion some time ago was that Mr. Mutsu would be chosen, but the fact of his holding a Ministerial position is now regarded as an obstacle in the path, for it is very doubtful whether a post of such peculiar responsibility as that of President of the House of Representatives could be conveniently combined with Cabinet duties. At all events rumour says that the progressive parties are resolved to exclude him from the position, so long as he retains his portfolio of Agriculture and Commerce. There remain two statesmen conspicuous enough to attract public notice as probable candidates for the Presidency. They are Senator Kusumoto and Mr. Nakashima Nobuyuki, formerly Vice-President of the old *Jiyu-to*. The various sections of the Liberal party (*Daido-ha*, resuscitated *Jiyu-to* and *Aikokukoto*) will support Mr. Nakashima. Mr. Kusumoto's chances are thus very slender, unless he can obtain the support of the *Kaishin-to* and the so-called "Independents." But those who know best are inclined to believe that the *Kaishin-to*, being very anxious to combine with the Liberal party, will prefer rather to support a candidate set up by the latter than to nominate a rival of its own choosing. At the same time, it cannot be doubted that the *Kaishin-to* would like to see one of its members Vice-President of the House of Representatives, and if Mr. Kusumoto could induce himself to join that party, he would probably succeed in obtaining the latter post. The duties of the first President of the Lower House will be of a very arduous character, and it is evident that to whomsoever they are entrusted, he must make up his mind to abandon party politics altogether, and occupy a perfectly neutral position. It is difficult to imagine that such a course is seriously contemplated by either Mr. Mutsu or Mr. Nakashima.

THE ROYAL LITERARY FUND.

THE celebration of the Centenary of the Royal Literary Fund in May last was the occasion for the delivery of several speeches of unusual interest. The Prince of Wales, who took the chair, in the course of his address mentioned several facts bearing on the pecuniary circumstances of literary men that are not generally known. It seems that, despite the taste for literature which is so marked a characteristic of our times, the calling of an author in England is an extremely precarious one. The administrators of the Royal Literary Fund have actually been obliged to relieve the widow and children of Mr. Proctor, the great astronomer, and the family of even such an eminent writer as the Rev. J. G. Wood, the naturalist. These facts were divulged by the recipients of bounty themselves. Otherwise the public would not know of them, as one of the rules of the Literary Fund Committee is to preserve in strict secrecy the names of the persons assisted. The Prince of Wales dwelt on some of the causes that make the career of a literary man so liable to heavy reverses. Many of the best books are not a commercial success, at least in the lifetime of their authors. A writer has to apply himself to his work year after year with great assiduity if he is to keep his head above water. A long illness is often sufficient to cause him serious pecuniary embarrassments. "He is the first," remarks the Prince of Wales, "to

feel the depression of trade, for when a family is about to economise it begins by buying no more books." His Royal Highness went on to observe that though the sphere of the author has been enlarged in modern times, his earnings are as uncertain as ever, that length of service, so far from improving his position, often deprives him of his sole means of support, for there is a fashion in literature, as in other things, and books in demand to-day are superseded to-morrow. One pleasing feature in the celebration of the Centenary was the cordiality with which men of opposite schools of thought supported the cause. Mr. Morley's speech followed that of the Bishop of Ripon. As is remarked in the leading columns of *The Times*: "It is quite certain that a century ago no official representative of the Anglican Church would have ventured to interchange compliments even upon the neutral ground of literature with a writer who, like Mr. Morley, had bitterly attacked the most cherished ideals of orthodoxy. Nor would Mr. Morley's predecessors have been capable of the geniality and the tolerance he showed in his reply." The speeches of the two men alluded to were equally brilliant. The Bishop of Ripon's theme was the rich additions that have been made to our literature during the past hundred years; Mr. Morley's was the number of disappointed writers that at the present time are to be met with in the literary world. "I often wonder," says Mr. Morley, "whether there are 50, or even 20, men and women who are earning a competence by the authorship of books, putting school books out of the question." Mr. Morley draws attention to the fact that journalism offers the most inviting field for the gifted writer in modern days. Unlike the historian of the Council of Trent, who said that it was enough for him if he got a dozen readers in an age, the journalist writes to entertain and instruct "two hundred thousand readers for two minutes after breakfast." The chair was taken at the first meeting of the society by the Duke of Kent, in 1842 by the Prince Consort, who then declared that "the fund stands unrivalled" in any country. The Prince of Wales took the chair 26 years ago, this being the first occasion on which His Royal Highness had figured as a chairman at a public meeting. The largest sum ever subscribed at an anniversary of the society was forthcoming this year, being no less than £4,000.

PROPOSED PRESENTATION TO MR. GEO. WHITEFIELD.

A MOVEMENT, started some time ago, by members of the Yokohama Sailing Club, to present to Mr. Geo. Whitefield with a souvenir of his connection with and interest in the affairs of the Club, has all but arrived at accomplishment. The gift which the Committee have agreed on will be an album, the covers of which are to be of highly ornate and artistic character, bearing a *takara-bune* (vessel of good luck) in gold lacquer and ivory, somewhat similar in design to the Jubilee trophy, and the volume will contain the photographs of as many members as can supply those articles. Each photograph will be mounted amid beautifully painted Japanese work, and the whole will doubtless prove to Mr. Whitefield an interesting memento of his relations with the members, relations which were enhanced as much by high appreciation on the part of the latter of his sterling personal qualities, as by the sincere respect which his experience and yachting knowledge won from all. Even the experts who, from the Boat Club verandah, are wont to comment lucidly on the tactics of the various skippers, have never dared to suggest that *Maid Marion*, with her builder at the tiller, failed to "turn round" quickly enough.

THE DIET AND TREATY REVISION.

WITH reference to the course which the Diet may be expected to pursue in respect of Treaty Revision, a remarkable series of articles appeared lately in the *Daido Shimbun*. They were remarkable in two senses; first, because of the wide erudition displayed by the writer, and, secondly, because of the fact that the *Daido*

Shimbun is now supposed to represent the views of the Great Liberal Party whose combined sections seem likely to outweigh all opposition in Parliament. The articles filled many columns of our Tokyo contemporary, and offered an exceptional example of close reasoning and careful research: indeed, so conspicuous were they in these respects, that their readers could not choose but attribute them to some of the most prominent men in the Liberal camp. Briefly summarized, their object was to establish two principal propositions. The first of these was that, though the treaty-making power belongs to the Imperial prerogative, the Sovereign is bound to consult Parliament in all cases where the exercise of that power affects the duties of the people. In support of this contention, the writer quoted articles from the constitutions of Germany, Prussia, Austria, Belgium, Portugal, Italy, and Spain, establishing his position very fully. Indeed, from a practical point of view, the question need scarcely have been raised; for since a revised treaty between Japan and Western States would surely involve, in order to its carrying out, the enactment of new laws, and since such laws could not be passed without the consent of Parliament, it is plain that the ultimate fate of the treaty must rest with the latter. The writer's second proposition was that, even in respect of treaties the operation of which has no assigned limit of time, either of the high contracting parties is always entitled to withdraw from the covenant should its domestic circumstances have ceased to be suited to the conditions involved, or should its policy have undergone any change inconsistent with the observance of the compact. In support of this proposition also numerous quotations were given from the highest authorities on international law, but educated foreigners require no such evidence, being already prepared to grant the proposition as a matter of plain expediency and even necessity. Thus much premised, the *Daido Shimbun* proceeded to show that Japan has undergone changes amply sufficient to bring her within the scope of the second proposition; a fact which will scarcely be denied by anyone. Then followed the conclusion that, since the ablest statesmen of the empire had failed to effect a satisfactory arrangement with Foreign Powers, and since no reasonable prospect offered of such an arrangement being reached by the medium of negotiation, the plain duty of the Diet would be to repudiate the treaties—a course involving no real difficulty or danger, in the writer's opinion, if only the nation be resolute and unanimous. We take this to be a very significant utterance.

THE NIKKO RAILWAY.

THE railway from Utsunomiya to Imaichi now carries travellers to within five miles of Nikko, thus materially facilitating access to the prince of Japanese mausolea. Some tolerably heavy gradients have to be negotiated in the latter half of the journey, but the train makes fairly good time, traversing the fifteen miles in 75 minutes. Thus far, however, the baggage arrangements seem to be quite unorganised. It is said, indeed, that the railway authorities refuse to take goods until the line is finished right through to Nikko. Whether or no this be the case, it is certain that people who expect to have their traps transported more quickly in consequence of apparently improved facilities, are doomed to disappointment. As far as Utsunomiya the railway is available, but for the rest of the journey carts must be employed, as was the case before the opening of the line to Imaichi. It is necessary, therefore, to allow four days for the transport of goods from Tokyo to Nikko, a state of affairs that speaks ill for the organising capacities of the carrying companies. We are promised, however, that the last section of the line will be opened on the 1st of August, and there is no apparent reason why the promise should not be fulfilled, for the road is completed to within a very short distance of the terminus. It passes, throughout the greater part of its length, on the west of the celebrated pine avenue, now and then approaching the latter so close that the embankment on which the cryp-

tomeria stand almost forms a base for that carrying the rails. At only one place, however, are the trees disturbed, and that is where the line crosses the avenue on a bridge. There some twenty of the beautiful pines have been sacrificed. It is sad to see their noble trunks lying prostrate beside the iron track, and still sadder to find the matchless vista blocked by a stone bridge of the solidest and least graceful description, but after all what need be said of the loss of a few trees in comparison with the huge vandalism of pushing a railway into the sacred solitudes of the renowned mausolea. Nature has happily interfered to prevent the consummation of the sacrilege. Engineering difficulties forbid the construction of the line beyond the southern end of the village of Nikko, so that the locomotive whistle will be barely audible at the tomb of Ireyasu. Meanwhile the railway does not bring any promise of prosperity to Nikko. It has immensely multiplied the number of persons visiting the mausolea, but, on the other hand, it has made coming and going so easy that whereas formerly anyone accomplishing the arduous journey felt himself entitled to a rest of three or four days at the village inns, a stay of one night is now the limit of the most leisurely worshipper's delay. Thus, while the priests and guides are rejoicing, the hotel-keepers declare themselves grievously disappointed.

WITHOUT BENEFIT OF CLERGY.

WE reproduce in this issue, from the *Singapore Free Press*, a short story with the above title from the pen of Rudyard Kipling, the star who recently flashed upon the literary firmament of London and is now the talk of the town. Referring to the new author, "Litch-Key," one of the London correspondents of *Hoges' Sporting News*, says:—"Have you read Rudyard Kipling?" is the question which people are asking each other now-a-days. The question was put to me a dozen times, and I was bound to confess that I had imagined 'Rudyard Kipling' to be a new sauce. He is a new sauce; and a very pungent one, too. Everybody is talking about him. In clubs, in literary and artistic salons—even, I verily believe, in Fleet-street pubs,—the one question of the day is, 'Have you read Rudyard Kipling?' I bought two of his little books the other day for a shilling a-piece, and I sent the whole of the glorious, leafy, sunshiny day reading them. They are wonderful—fascinating and wonderful. . . . What Bret Harte did in realistically depicting the wild life of the Californian miners, Mr. Kipling does in showing us the lives of our soldiers in India. But he is far in advance of Bret Harte as a realist. Bret Harte, despite his wholly admirable "Outcasts of Poker Flat," took care to infuse a sentimental interest in his sketches of rough miners—a picturesque and effective, but false, interest, as one is inclined to think. But this Rudyard Kipling is uncompromising. He tells barrack stories of Indian garrison life, and—well, he just knows all about it, and that fills the ticket. He takes for his "machinery" the idea of "The three Musketeers" of Dumas. His three soldiers—all devoted to each other, but differing widely in disposition—are Private Mulvaney, an Irishman; "Jock" Learoyd, a Yorkshireman; and Others, a Cockney. . . . Private Mulvaney is simply a marvel. The three figures stand out boldly. They are three live men, with faults and weaknesses frankly disclosed, and all three are capable of heroism which has nothing theatrical in it."

VILLAS BUILT BY FOREIGNERS.

SPEAKING of villas in our leading columns, we should not fail to notice that foreign example has probably contributed to develop Japanese taste in this direction. Several foreign residents have advanced money for the building of villas at chosen spots, under conditions as to lease which, though sufficiently adapted to the convenience of the tenant, are at the same time exceedingly favourable to the ultimate interests of the landlord. Among sea-side edifices of this nature, one of the most happily situated and handsomely construct-

ed is that of the Italian Minister at Horinei, near Dzushi. Built on a series of terraces—a method common in Italy, but hitherto little practised in Japan—the house may be said to dip its feet in the sea while, at the same time, standing at such an elevation that a cool breeze from the water circulates constantly about it. The shore at its base slopes gently seaward under slowly-growing depths of perfectly pellucid water that overlies firm, shingleless sand, and is protected against the tumbling waves of the outer ocean by a picturesque reef, stretching its jagged arms across the bay. Right opposite, Fujiyama rises majestically, and richly wooded hills slope away from the very verandahs of the villa behind. The charms of the place are further enhanced by beautifully laid-out grounds which surround it, their shrubs and turf stretching down almost to the water's edge. Nature, indeed, when she encircled with magnificent scenery this amphitheatre of placid sea, seems to have designated it as an ideal resort, whence one can look from the beauties in the immediate neighbourhood to such celebrated spots as Kamakura, Yeno-shima, Oyama, Fujisan, the Idzu mountains down to the Amaki Cape, the volcanic Oshima, and the gently-curving promontory which forms the northerly arm of the bay, a historical spot where Yoritomo had his summer palace in the 12th century, and where the State now jealously asserts its right of property.

The Italian method of terracing is not the only foreign feature recently introduced at Horinei. The sturdy fishermen have also been initiated into the mysteries of water tournaments after the Italian fashion, and very skilfully do they bear their part in the sport. The tournament is fought with lance and buckler, the latter of iron, the former of bamboo, sometimes twelve feet long, having the haft heavily loaded and the point protected by a gutta-percha ball which effectually destroys every element of danger. The combatants, instead of being on horseback, are mounted on platforms projecting from the sides of boats propelled at full speed by six heavy Japanese oars. After the boats have taken up their stations at fixed points marked by buoys carrying the distinguishing flags of the combatants, a signal is given, whereupon the crafts dash forward at their utmost velocity, the champion of each boat standing on his platform with lance in rest and buckler on arm. The points of the spears are received on the bucklers, and the shock generally carries the weaker spearsman—frequently indeed it precipitates them both—off the platform and leaves him struggling in the water. By and by bucklers are laid aside and the men offer their bare bosoms to the softened points of the lances, evidently deriving as much pleasure as the spectators from the fine manly sport. Many of the sea-side folks are endowed with splendid muscles and perfect proportions. Seeing these stalwart combatants, with lances in rest, charging each other at the highest speed that a crew of excited oarsmen can impart to a swift Japanese boat, and seeing them receive the shock of impact with the spears so firmly braced that though their stout bamboo lances curve like bows the men yield not an inch to the blow, fancy carries us back to Italy of ancient times and to some Roman gladiators' show on the shores of Baia or Pompei, where scarcely less exquisite scenery smiled upon the arena of many such combats in former days.

DEATH OF MR. EDGAR ABBOTT.

A VERY wide circle of residents in the Far East will learn with deep regret of the death in London of Mr. E. Abbott, which is announced by telegraph. To nearly all who had been brought into close contact with the deceased gentleman, and had been privileged to enjoy his friendship, it will be difficult to realize the stroke which has thus removed from their midst one of the brightest and most charming presences that ever graced an alien community in any land. While in the full enjoyment of vigour and strength—even, indeed, after failing health had begun to show itself only too plainly—Mr. Abbott was the very life and soul of the

Settlement, and few events of importance to Yokohama within recent years can be referred to without mentioning his name as that of a leading actor. His friends had noted for some time with anxious solicitude the gradual sapping of his strength, and when, only a few months ago, on recovering from a lengthened spell of illness caused by an injury to one of his eyes, he decided to leave for home, it was earnestly hoped that the change would benefit him. The seeds of disease, however, had been too deeply sown. It was feared at the time that during a visit which he made to Bandai-san in 1888, shortly after the volcanic outburst of the mountain, he had over-exerted himself by making the circuit of the devastated regions under circumstances of great difficulty. But, although the walk was of no ordinary character, we believe that it was only one of many similar incidents, all combining to undermine Mr. Abbott's constitution. His, in truth, was one of those not infrequent cases where a man is betrayed into athletic excesses by the splendid physical gifts with which nature has endowed him. Long after the age when most persons are satisfied with the memory of their successes in the Gymnasium, Mr. Abbott continued to take part in matches with unabated enthusiasm, and there can be little doubt that by thus over-taxing his strength he gradually impaired the action of his heart, and invited the disease to which he has now succumbed. The latest news of his condition, previous to the announcement of the catastrophe, was that a six-month's course of the most absolute rest in a recumbent posture had been prescribed for him. He was to lie perpetually on his back, and not even to turn in bed without assistance. It was hoped but with little real sanguineness, that this extreme measure might strengthen the walls of the aorta, and thus postpone the end for a few years longer. Apparently the experiment had hardly been commenced when death interrupted it. We can scarcely realize the loss, under such circumstances, of one who always seemed the personification of manly vigour, and surely we can never sufficiently mourn the premature removal of a dear friend whose winning and gracious character, not less than his enthusiasm in all that tended to the welfare of the community, will long be a memory of mixed pleasure and sadness.

THE "HOCHI SHIMBUN."

THE public was recently surprised by an announcement in the *Hochi Shimbun* that it would henceforth maintain no connection with any political party, but preserve a strictly neutral and independent position in politics. This statement was as incomprehensible as unexpected. The editorial department is said to be under the charge of Messrs. Minoura Masato and Kato Masanosuke, while Messrs. Yano Fumio and Fujita Mokichi lend their occasional assistance in the direction of the general affairs of the journal. Men naturally ask themselves how these persons, who are not only avowed but principal members of the *Kaishin-to*, are to conduct their paper on a strictly independent basis. The *Nippon* offers an explanation for the solution of the enigma. We do not guarantee the truth of that paper's story, but it looks probable enough. Mr. Yano, on declining the proposal to stand for his native province, is represented to have stated, as the reason of his unwillingness to sit in the first Diet, that his connection with the *Kaishin-to* having been very close in the past, he should be compelled, if he entered the Diet, to devote his whole energies towards promoting the interests of his party, but that, under the existing state of things, his party being apparently incapable of obtaining the majority in the Diet, he could not hope to effect any substantial good, but might, on the contrary, contribute to weaken the power of his old friends and associates. Mr. Yano, the *Nippon* tells us, is enthusiastically desirous of effecting a combination among the various progressive parties, and for the attainment of this object he thinks it necessary that he should at present hold aloof from party politics and maintain a neutral attitude. It is this

circumstance, says the *Nippon*, that has necessitated the above-mentioned change in the character of Mr. Yano's paper. The *Nippon* goes so far as to state that the distinguished leader of the *Kaishin-to* has in contemplation the probable return to office, under the support of the combined progressive parties, of Count Okuma and himself, and their resumption of the negotiations for the revision of the treaties. It is, at all events, very significant that a politician of Mr. Yano's calibre should virtually confess, in public, the inability of his party to accomplish anything single-handed, and should pledge himself to abandon its leadership and maintain a neutral attitude. The incident is, in our opinion, one of the most important that has occurred for a long time in the field of Japanese politics.

THE METHODIST EPISCOPAL CHURCH.

THE seventh annual session of the Japan Conference of the Methodist Episcopal Church was held in Goucher Hall, Aoyama, Tokyo, from the 10th to the 18th instant. This is one of the smaller of one hundred and eleven annual conferences that were represented at the Quadrennial General Conference of this Church. It is composed of 43 members and 11 probationers, of whom 20 are Americans and the balance Japanese. The presiding officer present this year was the well known Bishop J. P. Newman, whose kind but efficient administration added greatly to the success of the meetings held. In connection with the Conference the members of the mission force (Americans) have separate sessions at a time so as not to conflict with the main—and according to the law of the church—the only legal body. The ladies of the Methodist Episcopal Church have a separate missionary organization, and their workers in this field, together with the wives of the missionaries of the main Board, form a Woman's Conference which was also held at Aoyama during the same week. Legislation is not the function of an Annual Conference, as that pertains to the General Conference, but as an executive body its work is by no means small. Each preacher's character must be passed upon, literary examinations are held, and during the first four years of a preacher's connection with the body he must annually pass satisfactorily or fail to be advanced in his standing. The Conference is divided into districts and each is reported by its chairman—technically known as the Presiding Elder. Numerous committees are appointed to consider the various phases of the work and report to the Conference for action. The most notable actions of the body were: first, the appointment of a committee of six Japanese preachers and two laymen to sit with the members of the mission when the estimates for the evangelistic and educational work are under consideration. This is a new departure, but it is hoped that it will prove to be of great value in uniting more closely the foreign and native elements in the work. The second point was the appointment of a "Board of Deaconesses," which shall take steps for the organization of a force of Deaconesses among the Japanese women in the church. Their services will be purely voluntary; no vow will be required, so that they may retire at any time. It is hoped that the usefulness of this institution as demonstrated in America and other countries may be realized here also. Two members of the conference were transferred to other fields of labour, and two returned home on leave of absence. Two were received by transfer to effective relations, after having been lay preachers for some time. Six young men were admitted on trial. The reports of the work presented by each pastor showed that this had not been a year of great prosperity; and the membership shows a slightly decreased total from that of last year, though the contributions are larger. The statistics have been taken with greater exactitude than previously, which may account for the diminution mentioned. In addition to the regular sessions of the Conference, there were several anniversary exercises and many interesting addresses. The Sabbath services were of special interest. The Bishop's sermons were

greatly enjoyed by all. At the close of the morning sermon one deacon and three elders were ordained. The evening was devoted to a mass meeting in the Koseikan, the speakers being all Japanese. The Conference will meet next year at the same time and place.

RELIEF OF THE POOR.

Writing on this subject, the *Tokyo Economist* (*Keisai Zasshi*) observes that the giving of money to the helpless poor, though not in the abstract blameworthy, is by no means the most wholesome method of helping the indigent. Our contemporary asks philanthropists to pay more attention to the problem how to enable the destitute to help themselves. There are in the opinion of the *Economist* three ways of doing this. In the first place, the poorer classes should be encouraged to save their earnings. There are savings banks throughout the country, but the facilities afforded by them can by no means be considered satisfactory, and our contemporary sees many things requiring improvement in the system now followed by the savings banks, both Governmental and private. Poor people get two advantages from depositing their savings in secure places; first they have the direct advantage of at any time using the money saved, and secondly, the money deposited by them can be employed in some productive enterprise, thus adding to their opportunities to earn a livelihood, this last consideration being of more importance than the first. Had the custom of saving been more prevalent among the labouring classes, the *Tokyo* journal thinks that the present trade depression would not have been so severe, for then the large sums of money that have been paid out by the numerous new companies would have been available, to some extent at least, for trade purposes. Secondly, our contemporary remarks that the labouring classes should be taught and encouraged to form co-operative companies, as is so advantageously done by their *confrères* in England and Germany. To emphasise its opinion, the *Economist* gives a brief sketch of the origin and success of a famous corporation of the kind at Rochdale in England. Thirdly and lastly, the *Tokyo* journal calls the attention of its readers to the importance of encouraging emigration to foreign countries. Most unfortunately, some events have lately occurred which are not calculated to stimulate the growing spirit of enterprise. Our contemporary advises the Government to give special facilities to persons emigrating to foreign countries.

SILVER.

THE *World*, of the 11th ult. has the following on silver:—"The multiplying signs around us that the world is recovering its senses again on the question of silver, and that the gold craze is decidedly on the wane, induce us without fear to chatter a little on the subject, seeing that the great stimulus which the exciting silver movement in the New World is imparting to Europe is already being keenly felt. The sale of the Roumanian silver a few weeks ago is likely to remain the last of the series, and to be the crowning folly of the "gold-bug" party: the wind of opinion seems now to be veering round. Servia is going to increase her silver coinage, and is advertising for tenders to supply it; but the most important movement is in Austria-Hungary. The object-lesson which that country furnishes is so clear that it is worth while to dwell upon it for awhile. Austria-Hungary originally possessed a silver standard; the silver florin was, and is still, full legal tender. But in years gone by, when the price of silver stood at 60d. an ounce, Austria issued inconvertible paper, which fell to a discount. Then came the demonetisation of silver by Germany and the consequent fall in price, and one day silver and paper again stood at the same price in Austria; not because the price of the paper had risen, but because the price of silver had fallen. This was Austria's opportunity to obtain the necessary silver and resume specie payments on the old system. But Austria was afraid, and instead suspended the free coinage of silver for account of private holders. Thus it came to pass that for some years

the paper currency in Austria was more valuable than silver, upon which it had been originally based. During the past year the banking party in Austria considered that the time had fully arrived to strike a final blow at silver by going to a gold standard on the actual parity of paper, which, they thought, would cause no inconvenience or disturbance. But in the mean time, in expectation of this gold standard, the currency rose, and there can be but little doubt that eventually it would have risen to nearly two shillings per florin—that is, as if the ratio of silver to gold stood at 15 to 1. In this case the adoption of the gold standard would, for Austria, have meant a benefit to the creditor classes of from 20 to 30 per cent on their claims. Against this monstrous scheme, however, Hungary, as a portion of the empire, has revolted. Now Hungary is in the Austrian Empire what the West is in the American Union. If it were as well educated as to its interests as the Western States, this proposed spoliation would at once have been knocked on the head; but it is learning its lesson fast, and we shall probably hear but little more of the Austrian gold standard. Let America go on fearlessly in her good work, and the liberating silver gospel proclaimed in Washington will soon be preached, practised, and understood in all the agricultural portions of Europe."

FRANCE IN AFRICA.

"ALL the States between the Kingdom of Samory and the Gulf of Guinea," says the *Temps* of Paris, "are now, thanks to Captain Binger's treaties, our exclusive property; our stations in the French Soudan are now connected with those on the Gold Coast; and one may henceforth travel from Cape Blanco to Grand Bassam without once leaving territory subject to France." With a perhaps pardonable, but certainly harmless grandiloquence, the French paper adds that "the enclosed English colonies along the Gambia River and the Sierra Leone Coast, as also the Liberian Republic and the Portuguese Guinea, are like islands swimming about in this vast ocean of land." The Captain Binger in question was a protégé of the late General Faidherbe, "the Restorer of the Senegal," and owes his present fame to the timely recommendations of the valiant leader of the former Army of the North. Sent to advance from the French Soudan to the Gulf of Guinea, Captain Binger started from Bammakoo on the upper Niger, turned southward to avoid the hostile country of Sego, and gradually approached the Kingdom of Samory, who has risen from the rank of a common trader to that of sovereign of the Wassoulou, and Almamy, a half priestly, half secular dignity, of the Upper Niger districts, and who, since 1882, has been considered an ally of France. As Samory was then at war with the city of Sikasso, permission to enter his kingdom could not speedily be obtained, and Binger was thus forced by the hostile attitude of the natives to fall back upon Bammakoo. Permission being finally received, the expedition entered the country. When they reached the Ula Ba, or Red River, Samory requested by letter the present of a cannon in order to take the strong Sikasso. Though unable to comply with this request, Binger marched to Samory's camp. On the way, he saw in the war-stricken districts the destroyed villages and the bleaching bones of those that had fallen victims to the raids and the famine; in short, all the horrible accompaniments of African warfare. Samory, who was himself in great straits, and Binger, who had no artillery, could not be of any assistance to each other; yet it was only after great difficulties that the French captain and his small expedition were at length allowed to leave the camp of their friend and ally. So wretched was the condition of the country near Sikasso that Binger and his men lived on rice exclusively, a quarter of a pound being their daily ration. Prevented from entering Tengrela, the expedition traversed the unexplored lands of the Senoofou tribe, and finally reached the town of Niéle. One chief there, though otherwise kind and hospitable, refused to see Binger, lest the

aspect of a white man should prove instantly fatal to himself. Thence the famous Kong country was entered, and the western head stream of the Okba, or Comoé River, that enters the large lagoon at Grand Bassam, was discovered, thus proving that the river in question has a course of 500 miles, and not one of only 120, as had been supposed, and that a water shed of very little elevation, and much farther to the north than hitherto believed, separates the Niger from the streams of the Ivory and Gold coasts. The Kong Mountains, the existence of which had long been doubted, thus disappear finally from our maps. The inland emporium of Kong, never before visited by white men, was soon reached, and the traveller was received there with great curiosity, but without feelings either of comity or friendship. The king of the country and the chief of the city, each seated under a large tree on the market place, took the expedition under their protection, and a dwelling belonging to the king was assigned to the captain. The inhabitants of the city, about 15,000 in number, are Moslems and quite intelligent; few of them are unable either to read the Koran or to write with the Arabian letters. Rifles and ammunition, the curse of Africa and the chief props of the slave trade, were in much demand at the time, and were secured from the coast. Gold dust and cowries imported from the Maldiv Islands and Zanzibar are in use as money, while credit is given, but only for five days. After this Binger entered the country of More (or Mossi), in the capital of which, Wogodoghe, he was kindly received. The protection of the country, however, by France was firmly declined by the king, whose suspicions and fears had been aroused by the rumoured advance of a German expedition under Lieutenant François from the Togo Coast. Returning to Banema, the heir to the throne and brother of the King of More, offered the captain three African beauties as wives; but, declining the gift for himself, he selected husbands for them among the servants supplied him; and, when leaving the hospitable city, he was informed by the women that they would call their first born boys after him. Hence the captain warns future explorers not to be unduly surprised should they meet somewhere "little black citizens of the name of Binger." After much trouble Salaga, or Selga, the great emporium and well known slave mart, was reached next, and thence, westward along the Volta, the town of Kintampo, in northern Ashantee. Treich-Lapène, who had been sent to find Binger, and who had in the meantime placed Bondookoo under French protection, met Binger at Kong, and both made a treaty with the king there, by which only French merchants and missionaries are allowed to settle in his dominions. After concluding similar treaties elsewhere, the two travellers took canoes down the Akba River, and entered Grand Bassam as the first Europeans that had reached the Ivory Coast from the north. It will be seen, therefore, that French explorers have done extensive and enterprising work in the Dark Continent. But as Englishmen we do not find ourselves much disturbed by the implied predictions of the *Temps*. The history of British and French colonization leads us to think that where a few islands of British occupation lie swimming in an ocean of French colonies, the fate of the former is not by any means to be swallowed up in the latter.

JAPANESE TROOPS IN SŌUL.

WE observe with surprise that the *Chinese Times* and other journals persist in speaking of the withdrawal of a body of Japanese troops recently reported to have been sent to SŌul. At the time when this rumour was first put into circulation we denied it emphatically, having ascertained its untruth. Indeed the story was from the first open to the gravest doubt, for it is well-known that in the present state of the treaty relations between China and Japan, neither Power would be in the least likely to send an armed force to the Korean capital without previous consultation with the other. The *Chinese Times* is thoroughly posted in these questions, and in giving credence to the rumour

our Tientsin contemporary does not display its wonted judgment. That a force of blue-jackets from the U.S. steamer *Suvarata* proceeded to Seoul in accordance with the U.S. Minister's requisition is beyond dispute. But there are no grounds for asserting that any similar measure was adopted by Japan. We cannot but take this opportunity of protesting against the strangely persistent tendency to mischief-making shown by some writers who discuss Korean affairs or describe the course of events in the little Kingdom. Thus a correspondent of the *Chinese Times* signing himself "Viator" and dating his letter from Nagasaki, asks the public to believe that the despatch of a detachment from the S.S. *Suvarata* to Seoul was connected with the failure of the Korean Government to pay arrears of salary said to be due to Mr. Denny. Such a statement is quite incredible, and its circulation cannot serve any good purpose. Elements of trouble already exist in sufficient quantity in Korea, without these efforts on the part of foreigners to multiply and aggravate them.

FAREWELL DINNER TO MR. WATANABE.

MR. H. WATANABE, who for several years filled the important position of President of the Imperial University, and who is now about to leave Japan for the purpose of representing his country at the Court of Austria-Hungary, was entertained at a farewell dinner by the members of the Tokyo Club, last Friday. Mr. Watanabe had acted for a long time as one of the Vice-Presidents of the Club, and in that capacity had spared no pains to further the interests of the institution and to promote the good fellowship which it was founded to bring about between Japanese and foreigners. About fifty members attended the dinner, and a much larger number would certainly have been present had not the summer holidays already induced many to leave the capital. Mr. H. W. Denison, who had been Mr. Watanabe's colleague in the Vice-Presidency, occupied the chair, and there were also present Marquis Nabeshima, Viscount Aoki, the Representatives of Holland and Hawaii, the First Secretaries of the American and Austro-Hungarian Legations, Captain Ingles, R.N., Mr. T. B. Clarke-Thornhill, &c. Mr. Denison proposed the health of the guest of the evening in the following terms:—

YOUR EXCELLENCIES AND GENTLEMEN,—Your presence here this evening to do honour to our retiring Vice-President is by far a more eloquent tribute to his good qualities of head and heart than anything I can hope to say. The purpose for which the Tokyo Club was organized, was, so our General Rules declare, "to promote social ties and to bring Japanese and foreigners into closer intercourse." In the endeavour to fulfill that purpose Mr. Watanabe has, both as a member and an officer of the Club, borne a conspicuous part. That his efforts have been crowned with success and are appreciated, this large gathering to-night bears ample testimony. The exigencies of the public service, tempered as such exigencies should be, by the provident desire of the Imperial Government to be well and ably represented abroad compel our guest to leave us for a season. He carries with him our cordial goodwill and he has our best wishes for his success. Your Excellencies and Gentlemen, I propose the health and happiness of our guest, Mr. Watanabe.

Mr. Watanabe replied as follows:—

GENTLEMEN,—I thank you very heartily for having assembled here in such numbers this evening, despite the great heat of the weather, with the kind intention of giving me a farewell entertainment. I cannot pretend to be in any way entitled to such consideration; it is quite out of proportion to the trifling services I have been able to render as one of the promoters and afterwards as Vice-President of the Tokyo Club. At the same time, Gentlemen, I can most sincerely assure you that, however valueless my efforts, they were always inspired by the warmest desire to assist in strengthening the Club and in promoting harmony among its members of all nationalities. The Tokyo Club has for its object, on the one hand, the cultivation of friendship between gentlemen of the Occident and those of Japan, and on the other to contribute to the wider aim of bringing all peoples into a common bond of harmony and preventing misunderstandings opposed to the spirit of international hospitality. The Club owes its existence originally to Count Inouye, but his successors at

the Foreign Office, Counts Ito and Okuma, and the present Minister of Foreign Affairs, Viscount Aoki, are to be regarded as its supporters and patrons. The incentive given by these statesmen has stimulated the President, Vice-Presidents, the Honorary Secretary and the Committee to labour in the cause of the institution with a degree of earnestness the happy results of which are before you to-day. In the course of the Club's seven or eight years' existence, social and political changes in this country have sometimes threatened to cool the warmth of friendly feeling that unites the numerous nationalities from which its members are drawn. But happily that feeling has survived all such influences, and I think we may confidently assert that the Club has played its part not only in cementing union between its own members, but also in contributing to the maintenance of international friendship. Let us hope, Gentlemen, that our institution may continue to discharge the honourable and useful function of encouraging friendship between Occidental and Oriental peoples, and that, day by day and year by year, it may help to bring about that universal brotherhood which is the true aim of modern civilization. I cannot tell you how much pleasure I feel in hearing of and witnessing the success achieved by the Club, through the exertions of its President, its Vice-President, Mr. Denison, the Honorary Secretary, and the members generally. During my stay in Europe, whither duty calls me, I will be present with you in spirit, and if I can help to further your interests, I shall not fail to do so, knowing as I do how much the credit I bring to the discharge of my new functions will be augmented by the fact that I had the honour of being your Vice-President. Permit me once more to thank you most heartily for your kind farewell, and to join with you in wishing perennial prosperity to an institution where we have spent so many happy hours.

Viscount Aoki said that as Mr. Watanabe had kindly mentioned his name, he begged permission to say a word. Eminently successful as Mr. Watanabe had been in the discharge of his duties as Vice-President, there was unfortunately one shortcoming which had to be laid to his charge: he had not learned to play billiards. It was to be hoped that in the honourable and important position which he was now about to fill, he would not fail to correct this hiatus in his accomplishments, so that on his return to Japan his sphere of useful effort as a Vice-President might be widened. The Hawaiian Representative, Mr. R. Irwin, then briefly proposed Viscount Aoki's health, and Baron Nagaoka proposed that of Mr. H. W. Denison.

CORALS.

In a series of articles on Natural History, now appearing in *Hayes' Sporting News*, we find the following on "Corals," a certain kind of which, *sango-ju* (*Corallium rubrum*), are in great repute in Japan as ornaments:—

What is a Coral? Very few persons unless they be naturalists can answer the question. Popularly they are supposed to be formed by insects, though in reality corals are as far removed zoologically from insects as any two groups of the animal kingdom. Until quite recently a perfectly erroneous opinion was held with regard to the living portions of corals called polypæ, and the relations they bear to the skeletons everyone knows by the name of corals. People thought that the polypæ answered to bees amongst insects, and the skeletons to the honeycomb, and that the coral was of the nature of a hive or nest into which the coral "insects" could take refuge. We must make any comparison at all with other orders, we might say that the coral skeleton answers to the shell of a shell-fish; but with this difference, that whereas every shell-fish, such as an oyster, has its own separate and independent shell, the coral shell is very often a colonial one, being formed by and giving shelter to a multitude of polypæ, each of which, though housed in its own compartment, is in a degree connected with its neighbours. The hard parts of the coral, it must be understood, are formed outside the body of the polypæ like a molluscan shell, not inside like a vertebrate skeleton, and this is why it might perhaps be more consistent to call them coral "shells." Instead of coral "skeletons," as is more generally done. Further misunderstanding may, however, arise, as although the calcareous shell of the coral is truly formed outside the coral polypæ, it very frequently has the appearance of being inside and enclosed by them. This is entirely due to the overlapping of the soft parts over the complex process of budding, so as time goes on more and more of the calcareous skeleton is formed, and layer upon layer, and the new over the old, and new branches growing out and down, and on. Endless are the varieties of form assumed by pure carbonate of lime in a salt which is present in solution in the coral polypæ, and secreted again by them as the solid cover the skeleton. The soft or fleshy parts of the coral completely if we could imagine the soft parts drawn or pulled off face of the skeleton on their underside. Of the true corals the most important and largely exported family is that of the *Madrepores*. They may be readily distinguished by the fact that they possess distinct cups for the polypæ, and that these cups all directions by numerous pores and are thoroughly perforated in another. Many *Madrepores* have extremely graceful and beautiful forms, being sometimes fan-shaped, sometimes considerably branched like a small bush or shrub, sometimes like a number of blunt fingers standing upon a swollen wrist. Besides the which form solid calcareous skeletons, the first of these is the blue coral, which forms thick folds and plates of spongy lime-stone of a pale blue colour; and the organ-pipe coral, which builds

up huge red clumps of small pipes traversing layer upon layer of transverse plates. The precious coral of commerce (known in science as *Corallium rubrum*) belongs to this order. It is, however, never found in warm tropical waters. Can it be stated with certainty what corals feed upon? It has been usually assumed that their food consists almost exclusively of small free swimming sea animals which they catch with the tentacles as the tides flow over them. There can be no doubt that, broadly speaking, this assumption is true. The batteries of stinging cells found upon their tentacles must be for the purpose of paralyzing or killing small organisms which come in contact with them, and from the analogy of sea-anemones, we are justified in assuming that organisms thus killed are conveyed to the mouth by the tentacles and swallowed. On the other hand, sections of reef polypæ of various kinds have been carefully examined, but no remnants of animal food in the body-cavity or throat of any of them has been discovered. It seems probable, therefore, that their means of actual food, of a size large enough to be distinguished with the microscope, are few and far between, so that we are hardly justified in assuming that the corals are dependent entirely upon the small crustacea and the like which are brought to them by the tides. The currents of water which are constantly kept up in and around the throat of the polypæ by the action of thousands of minute cilia or hairs with which they are furnished must bring with them numerous extremely minute organisms upon which the corals may feed. But food, which is brought to the polypæ by this means, must be of a very heterogeneous description, and mixed with particles of sediment floating in the water. Particles of vegetable matter caused by the decomposition and disintegration of fruits, leaves and wood from the adjacent shore which, in the neighbourhood of coral reefs, is almost always mangrove swamp, have frequently been found in the stomachs of the polypæ. There is then some reason for believing that many of the corals may be partially at least vegetable feeders. Corals, though generally looked upon as mere curiosities, are of some considerable importance to man, particularly so in tropical countries. Large tracts of land are by degrees and through countless ages made through their agency, and in the shape of barrier reefs and atolls, the corals often perform a useful part in keeping off the heavy swell and surf of the tide from the shores, so that it is often possible to proceed in boats for miles in smooth water between the shore and the coral reef. The precious coral of commerce has been alluded to. An immense trade is done in it, the greater portion of the commoner small kinds finding its way to India, where it is made up into necklaces and worn by Hindus of all ranks. The most valuable coral of all is of a beautiful pale pink colour, which is never obtained in large quantities or of any great size, and may often be seen mounted in jewellery. The question of the origin of barrier reefs and atolls is still a vexed one, and has exercised the minds of our most naturalists, from Charles Darwin to Dr. Sidney J. Hickson, who has quite recently spent some time on Northern Celebes investigating the question, which even now is by no means settled. If this article has served to remove from the minds of some of its readers the notion that corals are "insects," or will cause them to take more interest in the skeletons or shells of corals than they may have, it will have served its purpose. To those who wish to see corals "at home," we would recommend a sea trip to the Andamans or to Singapore, where they abound, and can be examined at leisure and in all their living glories of exquisite colours and forms.

THE CONVENT OF THE FRENCH SISTERS OF ST. PAUL.

At 4 o'clock in the afternoon of the 16th instant, the ceremony of distributing prizes took place at the Convent of the Sisters of Saint Paul, in Kanda, Tokyo. Among those present were Bishop Osouf, who presided, the Portuguese Representative, H.E. Mr. Tsuji, Vice-Minister of Education, Viscountess Aoki, Madame Sienkiewicz, and a number of Japanese and foreign ladies and gentlemen. The programme of the ceremony was most interesting, and the students performed the various items excellently. It was really astonishing to hear French and English spoken so correctly by young Japanese, who had studied only two or three years at most. With regard to the latter language, however, it is to be remarked that the recitations, though verbally faultless, were delivered with a strong French accent, from which we infer that the presence of an English sister would add greatly to the usefulness of the institution. The principal piece, "La Treille du Roi," into which songs were introduced, was performed with great precision and spirit; so much so indeed that the costume of the little actresses alone distinguished them from ladies of honour of a mediæval Court. After languages, which are the principal subject of instruction, the place of honour is given to music, and it was a real pleasure to hear the children performing vocal and instrumental pieces in a manner so satisfactory. Special note should be taken of the Overture to the "Barbier de Séville," for piano and organ, and the "Andante de Symphonie en Sol," pour piano à six mains. The execution of both these pieces showed the little performers to be possessed of more than mechanical skill, just as "La Treille du Roi" proved that memory was not the only faculty exercised by them. Their evident appreciation of the various parts and their intelligent rendering, spoke much for the ability of pupils and teachers alike. A visit to the exhibition of work proved also that European and Japanese dress-making, embroidery, and tapestry properly constitute important items of instruction. Japanese education, too, is plainly not neglected, for a little French girl, Miss Marie Modeste, whose father is in the Japanese service, gave a recitation in Japanese and spoke it like a native. Mr. Tsuji, the Vice-Minister of Education, made a long and laudatory speech.

His Excellency is evidently much interested in all foreign schools and spares no pains to give them every encouragement and support. We cannot but congratulate mistresses and scholars on the success to which the ceremony of the 16th bore witness, and we wish all prosperity to a school destined to work more and more good the better it is known and appreciated.

DISTRICT GOVERNMENT.

THE *Hochi Shimbun* is strongly of opinion that all arrangements for the carrying out of the Regulations with regard to the Organization of Rural Districts ought to precede and, as it were, prepare the way for, the Regulations as to the Organization of Cities and Prefectures. Further our contemporary points out that to properly arrange the economy of rural districts and to regulate their expenditures it is absolutely necessary that clear and explicit provisions as to roads and rivers should exist. Such information will be found in the Roads and Rivers Regulations, which are still under the consideration of the Authorities. It is plain that any attempt to carry into effect the Rural Districts Regulations without regard to the standards which will thus be enforced as to the administration of roads and rivers, must be a comparative failure, and it is therefore to be regretted that, according to present appearances, the Senate will be unable to finish, before the date on which it must be abolished, the consideration of the Roads and Rivers measure. Moreover, if the regulations come before the House of Representatives further delay will be certain to ensue, so that as regards the carrying into practice of regulations for the local government of cities, prefectures and rural districts the outlook is not at all promising.

OFFICIAL APPOINTMENTS.

THE *Official Gazette* of on Thursday announces the appointment of several gentlemen to the post of Parliamentary Secretary. Mr. Nishiyama Shunpei, at present Secretary of the Senate; and Mr. Yashiro Kisaho, at present Secretary of the Temporary Parliamentary Bureau, are named Secretaries of the House of Lords, and the following are gazetted to the same post in the Lower House:—Mr. Kawada Kin, Private Secretary, originally an official of the Temporary Construction Bureau; Mr. Ota Minesaburo, Probationary Councillor of the Legislative Bureau; Mr. Kiuchi Jushiro, Probationary Councillor of the Legislative Bureau; Mr. Ariga Nagabumi, Probationary Councillor of the Temporary Parliamentary Bureau; Mr. Nakahashi Tokugoro, Councillor of the Legislative Bureau; Mr. Kojima Ryotaro, Secretary of the Temporary Parliamentary Bureau; Mr. Hayashida Kametaro, Secretary of the Temporary Parliamentary Bureau; Mr. Saito Kokin, Probationary Councillor of the Legislative Bureau; Mr. Nakai Kumaji, Probationary Councillor of the Temporary Parliamentary Bureau; Mr. Yoshiwara Saburo, Probationary Councillor of the Temporary Parliamentary Bureau, and Mr. Koike Seichi, Secretary of the Temporary Parliamentary Bureau. Finally, Mr. Mizuno Jun is gazetted a Secretary of the Diet in addition to his present office of Councillor of the Legislative Bureau. According to the Constitution, the staff of each House is to include a Chief Secretary and several Secretaries, the former of *chokunin* and the latter of *sonin* rank. Their emoluments are not fixed as yet.

CHINESE WOMEN.

MR. A. H. SMITH read a most interesting paper at the recently held Missionary Conference in Shanghai. Here are one or two extracts from it:

The intellectual Torpor of the Chinese Woman forms the fifth great hindrance to her Christian training like the Lady of Shalott, a spell seems thrown around her. She cannot reason. Her power of attention has never been developed. Her mind seems like the chaos that rested over the world at its creation. She cannot keep two ideas separate; they run together like the pictures in a composite photograph. Let us take a concrete example. Here are three ignorant but docile women. We will make a lesson so simple that infancy in arms could not stumble over it. "Our Father which art in Heaven," that means

three things; remember, *three*. First, a Father, who loves you. Second, our Father, yours, mine, everybody's. If one Father, we are all brothers and sisters in this world. Third, "Which art in Heaven" Heaven, our Father's home, ours, the old ancestral home, which is ready and waiting for the good children who mind the Father. These He will one day call home. The next day you venture a fresh lesson. "Thy will be done." If you really want God's will done, you must help. How can you help to make people do it? In three ways: First, pray for people that they may be willing to hear what God's will is. Second, preach to them, that they may have something to hear. Third, set them a good example, so that your practice may not undo your preaching. After careful and painstaking drill, you examine them on this lesson. "How can you help people to do God's will?" Number One beams with a new-found intelligence, and says promptly, "Father in Heaven." You shake your head. Number Two? Number Two knows better, and answers triumphantly, "Ancestral home." "No! no! Now Number Three, be careful, think first." Number Three deliberates. She brightens up with a sudden illumination. She has it. How queer the others could not think of it when it was so plain! "Pray to your brothers and sisters."

Mental Torpor is, however, not so grave a hindrance as the sixth embarrassment met, which is: *Spiritual Lethargy*.—The evidences of this lethargy are not far to seek. A Chinese woman has no clear idea of an undying spirit, but vaguely confuses it with animal life. What shall he said of the spiritual perception of a being who believes, not that there is one immortal soul within her, her real self, that which shall one day give account of its deeds; but that three souls and seven animal spirits frisk around within her mortal tenement, like spring lambs in a meadow! Instead of that sweet and solemn thing which life is to the Christian, what a hideous nightmare of masquerading must it seem to those who believe in the transmigration of souls!

Again, although the Chinese sacrifice to the dead, and report the departure of their deceased relatives to the local god and through him to the City god, as if they expected them to do something about it, it is far from certain that they have any clear idea of a future life or immortality. We have questioned many a group about the far-off shadowy land, which had swallowed up their departed. There is but one answer to such questions, "Who knows?" "When the sacred books have been read, the priest's stomach is full. When paper money is burnt, the wind blows it away. When one has burned incense, there is left only a pile of ashes. When one has sacrificed to the gods, he then devours his own sacrifice." In spite of this, their own melancholy and pathetic commentary on their own highest form of devotion, force of habit, still urges them on. The spiritual torpor is further shown by the fact that they have no dawning idea who their gods originally were. Nor do they especially care. It does not seem to worry them to learn that some of the gods are mere myths, and never really existed at all. Women who have worshipped Buddha for fifty years have received, with a shock of sorrow, the news that he, when alive, was only a poor, tired, hungry, dying mortal, like the rest of us, and not even their own countryman. So easy-going is idolatry that the gods need not be decently moral, nor even have any personality whatever. The *Yen Wangs*, or Chinese Plutos, who are supposed to receive the souls of the dead, were only vicious princes of ancient times. The universal popular worship of "Heaven and Earth" does not imply any personality on the part of these objects of worship, and it is frequently impossible to interest the Chinese in the question whether "heaven and earth" can or cannot hear and answer the prayers made to them, but at the same time the posture in which those prayers are offered seems to the worshippers a matter of supreme importance. A new comer at our Pang Chuang chapel said that he approved of us, because we had such good customs. The last prayer after the Sunday morning sermon coming about twelve o'clock, we all rose and knelt at our benches, thus facing the South, and this he took for our regular noon worship of the sun!

JUMPING EXTRAORDINARY.

WE gave an account some time ago of the wonderful performances of a horse at Chicago named Ontario, over hurdles. The jumping at Chicago was well authenticated, otherwise it seemed almost incredible. Ontario has now topped his previous best effort by more than an inch. The following is an account of the affair:—Ontario, the property of Mr. S. S. Howland, of Mount Morris, N.Y., at the recent Boston horse show was entered to jump seven feet for a five hundred dollar cup. The night he tried to accomplish the feat the Society for the Prevention of Cruelty to Animals interfered and stopped his efforts. Mr. Howland, anxious to prove that his horse could accomplish the task, this afternoon invited about one hundred and fifty friends to the Washington Riding Academy to see the effort made. Ontario was ridden by the usual rider, James Freyling, weighing, with saddle and bridle, 159 pounds. Freyling rode

him in Chicago, where he leaped six feet ten and three-quarter inches, and at Boston. The jumping commenced at four feet six, and the bar was raised four inches at a time until seven feet was reached. Ontario up to this height never made a mistake, clearing the respective heights without difficulty on the first effort. When the bar was raised to seven feet a committee, consisting of Judge John Davis, of the Court of Claims; Colonel Carpenter, U.S.A., commander at Fort Myers; Count Sala, of the French Legation; Sevelon Brown, chief clerk of the State Department, and Neilson Brown, of Philadelphia, were called in to measure the jump, and pronounced it full seven feet. At the first effort Ontario got over, but pulled off the top bar. At the second, with a superb jump, he cleared the whole, and landed safely on the other side. The excitement was intense, for a jump had been made never equalled by any horse in the world.

CHINA.

WE find the following items in the *Chinese Times* of the 12th inst.—H.M. gunboat *Firebrand* left her moorings on the 7th, and anchored half way down the Tientsin Reach, where she remained till near noon on the 8th. Then taking advantage of the extraordinary tide caused by the easterly gale in the Gulf, which gave 11ft. 6in. in the Tientsin Reach, she made her way gradually to Tongku. She had very dirty weather for her passage down, and experienced more than ordinary difficulties in keeping clear of junks which were lying across the river. The Municipality sent the Band to the Bund, and as the little vessel swung round the Band played "Home, sweet home." . . . Professor John A. Church, whose term of service under the Viceroy Li Hung-chang has expired, has left the Silver Mine at Jeho and gone with his family to Japan. From there Mr. Church will proceed to Hongkong under arrangement with the Directors of the Tien Wa Mining Company there, who have recently opened two promising silver mines, one in the Heangshan district about 40 miles from Canton, and the other a few miles from Hongkong. Mr. Church will advise the Directors as to the best means of smelting the ore, and after a few months return to the United States. . . . Shop-lifting is a very common form of pleasantry with Chinese when they visit a foreign store, their wide sleeves and loose garments favouring the disposition of soft goods, etc., without in the slightest degree interfering with their elegance of form. On more than one occasion thieves have been caught, but owing to the difficulties placed in the way of the outraged storekeeper, the delinquents have invariably got off scot-free. An instance once occurred in which a Consul refused to prosecute even though stolen property was taken from a native thief in his presence, and to the consternation of the foreigner the thief was liberated. Since then, of course, punishment for offences of this kind has been administered under the authority of another judge, who is well-known in some of the Western States. Things have now, however, changed for the better, and civilization resumes its sway. On the 7th inst., a richly dressed Chinaman entered the New Store, and thinking no one was looking quietly "sleeved" half-a-dozen pairs of socks and hid a trower stretcher of all things under his silk gown; but an eye was upon him, and a gentle hand near to guide him to the Municipal Secretary, who handed him to H.B.M. Consul, who regardless of evil precedents, saw the case in its proper light, and handed the light-fingered one over to the Yamen authorities, by whom it is said he has since received twenty blows with the big bamboo. . . . Messrs. Kinder and Cox, and Wu Nankow, who started a little more than two months ago with a party of Chinese officials to examine the route for proposed railways in Manchuria, have returned to Tientsin via Vladivostok. They travelled from Newchwang to Kirin via Moukden, and thence eastwards to the Russian frontier taking steamer at Vladivostok. The survey was of course of

the most preliminary character, undertaken with the simple view of determining in what direction detailed surveys should be hereafter conducted. The party returned by sea because the rains set in early, and the roads would have been impassable. The Survey party has no doubt brought back a considerable amount of useful information. The maps of the country traversed were found, as might be expected very inaccurate; and many published descriptions, even in Crown 8vo., exceedingly misleading. The navigability of the Songari, for example, has been much exaggerated. The Russian Authorities at Vladivostok received the party with the greatest civility and kindness; and the freest intercourse is permitted across the frontier. As to the railway project itself there is, we believe, no idea of extending it beyond Kirin, as the country to the eastward is quite uncultivated, nor are colonists from other provinces permitted to settle there.

THE CHOLERA.

As might almost have been expected, the case of cholera on board the Turkish man-of-war *Ertugroul* has been followed by others, no less than five fresh cases having been reported to the police authorities on Sunday. We learn that several days ago a man died on board the vessel, but in reporting the death the ship's surgeon, who accompanied one of the officers on shore for that purpose, stated that in his opinion the disease was scurvy. Satisfied with this declaration, the police took no steps in the matter, and the body was conveyed ten miles out to sea and sunk. On the following day a case of cholera occurred, resulting fatally, and in this instance also the corpse, with the permission of the Kencho authorities, was buried in the bay. A police surgeon was at once sent on board, accompanied by a Kencho official, to carry out proper disinfection and fumigation, but, despite the precautions taken, five new cases were reported on Sunday. It is not pleasant to think of a plague-stricken vessel riding at anchor within a few hundred yards of where both foreigners and Japanese bathe in large numbers, but it is satisfactory to know that her removal was accomplished with the least possible delay. As to the interment of the body of the man who died from cholera, we are informed that, no precedent existing which forbade burial in the sea, the authorities did not find themselves justified in prohibiting the course which the Turkish commander had announced his intention of taking.

An impression prevails that the bodies of the Turkish seamen were buried off Hommoku. This is incorrect. The tenets of the Mussulman faith forbid interment in foreign soil, and therefore burial in the sea was the only course open to the commanding officer of the *Ertugroul*. On being applied to for concurrence in this view, the Kencho authorities saw no reason for objection, medical opinion being to the effect that if the body were interred outside the bay and after being disinfected, no danger could exist—the effect of the sea water indeed being a furtherance of safety. The corpses were therefore removed under the supervision of officials of the Kencho outside Kannousaki, and there, in the open sea and ten miles from land, securely wrapped up and weighted, they were interred.

Seven new cases occurred on the man-of-war on Monday, so that the total number is now 13, five cases, of which one resulted fatally the same evening, having been reported on Sunday. Doubts are entertained as to the disease being real Asiatic cholera, but a careful analysis is being made to-day in order to determine this point. Meantime the *Ertugroul* is in strict quarantine at Nagaura; should no fresh cases arise her period of detention will be five days, but of course if new cases crop up her release will be postponed, the five days counting from the occurrence of the last case.

Writing of the outbreak of cholera, the *Yiji Shimo* says:—In spite of the precautions of the

Government, the cholera has spread from Nagasaki to Saga, Hiroshima, Fukui, Ehime, and other places. The weather during the present year has been anything but regular, and there has already been a good deal of sickness. The much dreaded influenza has not yet left us, and the poorer classes are in a condition little fitted to withstand the attacks of disease. In these circumstances the descent of cholera in our midst is a contingency sufficiently calamitous to call for all possible efforts of repression. It is evident that if measures of prevention are to be efficacious they must not merely be decreed by the Authorities; the people themselves must give assistance in carrying them out. We learn with pleasure, therefore, that the Metropolitan Police Office has issued a series of instructions which enjoin all the police as well as the public to pay the strictest deference and accord the most implicit obedience to the orders and wishes of medical men, while at the same time the people are assured that they may look for none but the most sympathetic treatment from the constables, who are warned in the very strongest terms to be careful and considerate in their conduct in such trying times.

The latest returns of cholera from Nagasaki are:—

July 19th	New cases 26
	Deaths 25
July 20th	New cases 23
	Deaths 20
July 21st	New cases 33
	Deaths 13
July 22nd	New cases 42
	Deaths 30
July 23rd	New cases 51
	Deaths 27
July 24th	New cases 62
	Deaths 40
Total number of cases since commencement of epidemic..... 644.	
Total number of deaths since commencement of epidemic..... 377.	

The *Official Gazette* says that the epidemic has been most virulent in Tomachi-mura, Nishisonoki District, where 51 persons have been attacked since the beginning of the epidemic, and the places next in order of suffering are Urakamibuchi-mura (22 cases), and Iwojima (19 cases). Other cases reported are as follow:—

In Hirokawa-mura, Fukuoka Prefecture, one man, who had been on a visit to Nagasaki.

In Nagase-mura, Nagano Prefecture, one case on the 12th instant. In Hicano-mura, same Prefecture, one case (a woman). In Nagatoka-mura, same Prefecture, one case. The two last cases ended fatally the day (13th instant) after the attack.

In the harbour of Okiyama, Yamaguchi Prefecture, two cases on board a passenger ship which had come from Shimonoseki the preceding evening (19th instant), and one case at Shimonoseki in the *Ebisu-maru*.

In Yamashiro, Saga Prefecture, one case on the 15th instant, and in Saga-ichi, same Prefecture one case on the 16th instant, both ending fatally the day after seizure.

In Oike-mura, Kumamoto Prefecture, fifteen cases occurred in the course of several days, but were not reported till the 19th instant.

In Sonezaki-mura, Osaka, one case on the 15th instant, which terminated fatally the same day. The sufferer had been to Nagasaki and was attacked diarrhoea on board ship on his return voyage.

In Furukawa-machi and Fukushima-mura, Osaka city, one case each occurred on the 19th instant. Both of the men had been to Nagasaki. One case ended fatally at once.

In Machida-mura and in Chojamachi (Yokohama), Kanagawa Prefecture, one case each of choleraic character on the 21st instant.

In Kanno-mura, Niigata Prefecture, one case on the 15th instant which ended fatally the next day.

In Sobaishi-mura, Yamaguchi Prefecture, one case on the 17th instant, terminated fatally on the 18th.

In Yamai-mura and Itohi-mura, Fukui Prefecture, one case each on the 17th and 18th inst. respectively, the latter ending fatally on the day of seizure.

In Kokubu-mura, Hiroshima Prefecture and in Miyoshimachi of the same Prefecture, one case each on the 13th and 14th instant respectively. Both were women, and both ended fatally at once.

In Suki-mura, Yamaguchi Prefecture, one case on the 13th instant.

In Ikada-mura, Wakayama Prefecture, one case on the 15th instant, ending fatally the next day.

The following are also reported:—

Place.	Prefecture or City.	Date.	Remarks.
Okiya-mura	Yamaguchi	19th	Of two men, already reported as having been attacked on board ship while returning from Nagasaki, one has died, the other is not seriously ill. Another case is reported from the same place, the man having also returned from Nagasaki.

Nakate-misu.	Kagoshima Prefecture	One man attacked on the 17th; infection passed to his mother on the 18th, to another man on the 19th, and to three other persons of both sexes on the 20th.
Veirakuchi.	Yokohama	One man attacked on the 21st instant.
Anakukawa.	Wakayama Prefecture	One man attacked on the 17th instant.
Inabuzawa.	Shizuoka Prefecture	One man on the 19th instant.

It is plain from these figures that our recently expressed hopes as to the diminution of the epidemic were ill-founded. But, on the other hand, we have the consolation of reflecting that, thus far, the maximum number of daily cases is only a fraction—little more than one-fifth—of the maximum number during the epidemic of 1886. The suburb of Nishi-Sonoki continues to be the most unhappy district: the cases there amounted to 27 on the 23rd instant, against 9 in the town of Nagasaki. The remainder of the official return for the 24th instant is as follows:—

Place.	City or Prefecture.	Remarks.
Ashiya-mura	Fukuoka	Two cases occurred on the 17th inst., and immediately afterwards the disease developed great virulence, the number of persons attacked by the 20th inst. being 22.
Omuda and Shikawa.	Fukuoka	Eight persons were simultaneously attacked in one family, and in the neighbouring village of Shikawa, 2 persons.
Iriyemachi	Yamaguchi	One woman attacked on the 22nd inst., died same day.
Miyamata	Kumamoto	One man, attacked on the 21st inst.
Futaye	Kumamoto	Three cases.
(Amakusa).		
Sakitsu	Kumamoto	Two cases.
Tsururo	Kumamoto	One case.
Yokohama	Kanagawa	One man, attacked on the 21st, died the following day.
Nagaura	Kanagawa	Two cases on the 22nd inst. in the Turkish man-of-war. One of these and one of the former cases terminated fatally.
Sambongi	Kyoto	Twenty-one cases on the 19th instant.
Shuki-mura	Tottori	One case.

Judging from these returns, Kinshu seems destined to a general epidemic, both Fukuoka Prefecture and Kumamoto Prefecture being now fairly invaded. Very disquieting, too, is the news from Kyoto. Twenty-one cases appear to have occurred there in one day, a state of affairs which forbids us to hope that the city can be kept outside the pale of infection. It is singular, however, that fuller details are not published with regard to an incident so significant. We are strongly disposed to think that, by some error, a case occurring on the 21st inst. has been reported as 21 cases. Kyoto has always escaped comparatively lightly, its excellent water guaranteeing it against serious trouble.

It is certainly very singular that the Turkish frigate *Ertugroul* should have been invaded by cholera. The disease has not yet fastened upon Yokohama, for though a sporadic case has occurred here and there in Kanagawa Prefecture, such visitations are the regular annual routine and would scarcely be noticed did not the epidemic in Nagasaki impart to them vicarious significance. Whence, then, came the sudden outbreak in the Turkish vessel? The first case was that of a man who had been on leave. He was seized almost immediately after returning to his ship, and death ensued in a few hours. Thenceforth the disease spread rapidly and the vessel, as she now lies at Nagaura, is threatened with the loss of many of her men. Considerable excitement seems to have been caused by a false report that the body of the first victim had been thrown overboard at a distance of only three miles from the shore. Subsequently, however, it was officially stated that the burial had taken place at a point some 10 miles distant from land and outside the Bay of Tokyo. We read, nevertheless, in the *Tokyo Shimo*, that considerable injury was suffered by the fishermen of Awa and Kadzusa owing to the false rumour. The question is, however, whence did the epidemic in the *Ertugroul* originate? Is there some peculiarity about this cholera which has the effect of confining it to people of Oriental race? There has been no instance that we can recall of the epidemic

taking hold of the crew of a European or American ship in Japanese waters, even when the disease was rife among the native population of the port; yet here is a Turkish vessel invaded by the plague although the Japanese on shore are still unattacked. Is it conceivable that the bacillus developed under the conditions indigenous in an Oriental country finds a favourable nidus in the stomachs of people of Oriental origin only? Such is not the case in India at all events. Here in Japan, however, the immunity usually enjoyed by Europeans and Americans, and the peculiar susceptibility displayed by the Turks are very singular facts. As for the unfortunate *Erlougraul*, we are surprised that her commander does not take her to sea at once. That course has always been recognised as the wisest under such circumstances, and seldom fails to be efficacious. Lying at Nagaura within sight of a cholera hospital and disinfecting station is certainly not the plan that would commend itself to the commander of a British man-of-war.

Other cases reported by the *Official Gazette* are as follow:—

Place.	Prefecture or City.	Remarks.
Takiya-mura	Yamaguchi	A woman engaged in nursing cholera patients was attacked by the disease on the 23rd instant.
Aizawa-machi, Koji-machi	Shimonoseki (Yamaguchi)	One man attacked on the 23rd instant.
Ashikita-mizumata	Kuma	Five seizures and two deaths (motos) on the 22nd instant.
Kobikicho	Tokyo	One case (non-Asiatic) on the 23rd instant, terminating fatally the next day.
Omachi, Nishifuta-machi	Sakai (Osaka)	One case (a female) in each of these places on the 20th instant.
Nagatani-mura	Osaka	Instant.
Aioicho	Yokohama	One case on the 24th.
Kasacho	Saitama	One woman attacked on the 19th by non Asiatic cholera, died the next day.
Nagaoka-mura	Nagano	One case (a woman) on the 20th instant, ended fatally the same day.
Haruye-mura	Fukui	One case (a woman) in each of these places on the 20th instant (non-Asiatic).
Katsuyama-machi		Instant.
Hasuye-mura	Ishikawa	One case (a woman) on the 19th instant, ended fatally the same day.
Kanro-mura	Tokushima	One case on the 19th instant.

TERRIBLE ENCOUNTER WITH A TIGER.

MR. H. W. GIBSON, Deputy Commissioner of Bahraich, tells the story of a fight with a tiger in the *Pioneer*. He says, referring to the woman who told it:—"I repeat her story as she related it to me, free from embellishment and exaggeration. Her narrative has been corroborated in every particular:—

We were encamped in the Kuchila jungle. Two Ahirs informed us at noon that a tiger lay asleep in the Bandih Ali Khan nullah, three miles from our camp. As our elephants were away I tried to dissuade the sahib from going, but in vain. We had never been after tigers on foot. The sahib insisted, and we started in the following order: the Ahirs first, showing the way, then myself on foot with a double barrel muzzle-loading rifle; next the sahib mounted on a camel with a double barrel breech-loading rifle, followed by a Pahari with a double barrel breech-loader, and Madar, a butcher who supplied the camp with meat. When 50 yards from the spot the sahib at the suggestion of the Ahirs dismounted, and leaving the camel we proceeded to the nullah, when one of the Ahirs pointed out a tiger asleep 30 paces from us. The sahib told me to keep cool and reserve my fire till he had had a shot. He fired, and then he and I fired simultaneously. We fired again as the tiger broke. Seeing as he charged, and we took refuge behind a tree. Here the rest of the party who had fled rejoined us. The tiger remained in the nullah. We thought he was prevented from following us by the precipitous bank. The sahib said he would go back to the tiger. I implored him to avoid the danger, but he abused me, and said his face would be blackened if he retreated and left the tiger there. He said he would be killed and not I. I exchanged rifles with the Pahari and foot to foot the Sahib and I returned to the nullah. Directly we reached crossing the tiger charged us from a distance of 20 paces. We fired, the sahib hitting him in the chest and I in the neck; but he still came on and, knocking the sahib down, seized him by the shirt. I broke my rifle over the tiger's head and he turned on me, knocking me down and standing over me. The sahib seized him in order to get him away from me and the animal attacked him again. They struggled and fell together down the nullah. The sahib was more or less conscious, but the tiger was almost insensible. The sahib called out to me to shoot the tiger or he himself would be killed. I ran off and getting the Pahari's rifle I jumped down the nullah and found the sahib's hand in the tiger's mouth. He told me to shoot by the ear. I fired and the tiger released the sahib. We then hurried away. The sahib had been bitten through a hand and leg and was also scratched. I was only clawed on the head and shoulders. After dressing our wounds the sahib went back and found the tiger dead. By this time villagers had come from Bonategowri and helped us

to put the tiger on the camel. A cot was sent for on which the sahib was carried to our camp. I accompanied him on foot. He died.

The woman who exhibited this faithful courage is a Kariman, originally an Ahirin, now a Mahomedan. The sahib she intrepidly risked her life to save was Edward William Maclean of Amba, Bahraich, aged 56, timber merchant, fatally wounded by a tiger on the 30th April, died at Segowli, Bahraich, on the 17th May, 1890.

THE ELECTIONS.

It will be remembered that owing to some error in the electoral arrangements, the voting for a member of the Diet to represent the Fourth Division of Iwate Prefecture did not come off at the same time as the voting in the other districts throughout the Empire. The election was, however, held on the 18th instant, and resulted in the return of Mr. Shimoizaka Gozaburo, member of the Prefectural Assembly and an adherent of the *Fiyu-to*. We still remain uncertain as to the exact composition of the Lower House, but the most trustworthy returns as yet published give the following results:—

Independent	107
Daigo Danketsu	62
Kaishin to	50
Aikoku to	30
Fiyu-to	20
Kinshu Shimo	8
Fichu to	9
Hoshu to	4
Total	290

It is, of course, highly creditable to the Authorities that, on the first occasion of an election in Japan, they succeeded in organising everything so thoroughly that only one district out of nearly three hundred was the scene of any confusion. This, supplemented by the fact that no rioting took place anywhere, constitutes a record of which Japan may justly be proud.

GOLD AND SILVER RATIOS.

The *Official Gazette* gives the following table of comparative values of gold and silver coins and of the pound sterling for the week ended the 19th inst., as derived from the returns of the Bank of Japan and the Yokohama Specie Bank:—

Days	Gold Coin. (Per yen 100) Silver Yen.	Pound Sterling. (Per £1) Silver Yen.
14th	117.846	A.M. 5.8006 P.M. 5.8006
15th	117.46	A.M. 5.8046 P.M. 5.7142
16th	116.113	A.M. 5.7142 P.M. 5.6140
17th	113.600	A.M. 5.6140 P.M. 5.5491
18th	111.700	A.M. 5.5491 P.M. 5.5813
19th	112.300	A.M. 5.6140 P.M. 5.6638
Averages	114.901	5.6638

The above averages show for gold coin a decrease in value of yen 4.012, and for the pound sterling a decrease in value of yen 0.1810 as compared with the previous week.

THE BANK OF JAPAN.

The amounts of convertible notes and reserves in the Bank of Japan for the week ended the 19th inst. were as follows:—

CONVERTIBLE NOTES.	RESERVE AND SECURITIES.
YEN.	YEN.
Notes issued..... 72,051,136	Gold coin and bullion. 24,295,247
	Silver coin and bullion. 25,595,536
	Public Loan Bonds..... 19,479,450
	Treasury Bills..... —
	Government Bills..... 4,733,182
	Other securities..... 3,059,721
	Commercial Bills..... —
	72,051,136

Of the above total issue of notes, the sum of yen 3,744,050 is in the treasury of the Bank, and yen 68,307,086 in actual circulation, the latter showing a decrease of yen 665,313 as compared with yen 68,972,399 at the end of the previous week.

MR. COLBORN BABER.

"THE British Consular Service," says the *Chinese Times*, "has sustained another severe loss in the death of Mr. Colborn Baber at his post in Burmah. Mr. Baber had been long in poor health, and the climate of Burmah is not salubrious, so that the sad event can scarcely have

surprised Mr. Baber's friends. No man of the present generation has left his mark more distinctly on the service he adorned, or more widened its scope than Mr. Baber has done. His geographical paper bore the unmistakable impress of genius, and much as he accomplished outside the routine work of the government service, it will be a matter of regret that time, health, and opportunity did not more happily combine to enable him to do justice to his great talents."

PARTY ON THE SUMIDA RIVER.

MR. MORIOKA, President of the Nippon Yusen Kaisha, and Mr. Yoshikawa, Vice-President, entertained a number of their friends, Japanese and foreign, at a water party on the 20th instant. The whole of the celebrated tea-house Ueyeha, at Mukojima, was engaged by the hospitable hosts. The party assembled there early in the afternoon, and after partaking of slight refreshments, embarked in boats at 4 o'clock and floated down the river, watching a beautiful display of day and night fire-works, and discussing a sumptuous repast with the most charming *danteuses* of the capital officiating as waitresses.

INDIA AND JAPAN.

A LECTURE on the trade of India with Japan was delivered on Monday evening in the Chamber of Commerce, Tokyo, by Mr. K. M. Shroff, who had been invited by the Committee of the Chamber to give an address on that subject. Mr. Shroff, who is proprietor and editor of a newspaper in Bombay, the *Jame-Jamshid*, is on a visit to Japan to enquire into commercial conditions in this country, and with that object in view proposes to make a lengthened stay. The Committee of the Tokyo Chamber of Commerce recently entertained Mr. Shroff at the Seiyoken Hotel.

OFFICIAL CHANGES.

THE post of Vice-Minister of the Department of Agriculture and Commerce has at length been filled by the appointment of Mr. Ishida Eikichi, hitherto Prefect of Chiba. It had been expected that the position would be given to Mr. Saito Shuichiro, one of the ablest among the younger officials of the present day. But this forecast has not been fulfilled, the only change in Mr. Saito's position being that, in addition to the chiefship of the Bureau of Commerce and Industry, he becomes chief of the Bureau of Agriculture.

ATTEMPTED MURDER AND SUICIDE.

A SERIOUS assault was committed on Wednesday evening about eight o'clock by a man named Iwasaki Kojiro, 23 years of age, who attacked his wife with a kitchen knife in a house at Tokiwacho, Gochome, Yokohama. After inflicting some fifteen wounds, chiefly on the neck, arms and shoulders of the woman, Iwasaki thrust the knife into his own throat, and died almost immediately. The woman is not expected to live. The police are unable to discover any cause for the crime.

THE JAPANESE REPORTER AGAIN.

THE *Fiji Shimo* states that on the 19th inst. while the British Minister was travelling between Yokohama and Ofuna, in the train which left the former place at 10 a.m., a decoration conferred on Mr. Fraser by Her Majesty the Queen was stolen from him, but as Mr. Fraser does not possess an English decoration, and did not happen to be travelling on the line in question, we cannot see how any such incident could have occurred.

THE GRENADIER GUARDS.

THE 2nd Battalion Grenadier Guards, ordered abroad somewhat mysteriously, according to this morning's telegram, is under the command of Lieutenant-Colonel David Makgill-Crichton-Maitland. The last foreign service of the 2nd Bat. Grenadiers was in Egypt, whence they returned in 1882.

THE British ship *Lizzie C. Troop*, Captain Fownes, from Philadelphia for Hyogo with a cargo of oil, passed Anjer on the 30th ult.

VILLAS.

THERE have been many unaccountable fashions in Japan during the past twenty years, and happily it may be said of the great majority of them that nothing survives save their memory. Recently, however, when, judging by past experience, men began to look for the recurrence of some costly and frivolous fancy, it appeared that a wholesome tendency had developed itself, and that instead of spending great sums upon rabbits, roses, pigs, or rare plants, the wealthy classes were inspired by a desire to acquire country villas. Long ago we predicted that this wish would grow into active existence, and we looked for its earliest symptoms in a quarter little considered at the time. It seemed to us that with his vastly improved social status, the Japanese merchant must experience a longing to improve his manner of living. During feudal times his domestic arrangements were precisely analogous to those of a petty tradesman in London to-day. He lived in the same compound with his shop; not indeed necessarily under the same roof, since his refined disposition always led him to spend a considerable part of his profits on the construction of separate apartments and a pretty garden; but still within earshot of the voices of his customers and the rattle of his *banto's* abacus. The idea of absolute escape in leisure moments from the range of his business; the conception of utterly banishing the surroundings of trade during a portion of the twenty-four hours, did not occur to him, or if it occurred, must have appeared impossible of realization. The difficulty of locomotion alone would have proved deterrent, for where men had to choose between the degrading resource of walking and the slow, cramping alternative of the *kago*, they naturally preferred to have their homes side by side with their warehouses. Yet, while obeying this dictate of expediency, the prosperous merchant managed to surround himself with so many adjuncts of aristocratic life, and to separate his dwelling from his shop by such an elysium of mossy rockeries, miniature lakes, and toy waterfalls, that one could easily foresee the steps he was likely to take when carriages, railways, and tramcars should make the city's suburbs as accessible as his fire-proof godown, and when public opinion, looking up to him as the nation's wealth-winner, should recognise his right to live as his means permitted rather than as his birth dictated. When then, after the grand old suburban parks and palaces of the feudal nobility had been sacrificed at the shrine of an iconoclastic mania, men began to observe that many and many a decade of constructive effort would be needed to restore even a part of the beauties which a moment's madness had effaced—when this happy reaction set it, we looked to see the mercantile classes among its chief

leaders. The great tradesman of a city like Tokyo, having been suffered to take his place on the same social platform with the possessor of a title or the holder of a ministerial portfolio, could not choose but provide himself with a residence worthy of his altered circumstances and removed beyond the atmosphere of his counting-house. Such, indeed, proved to be the case. It would be easy to name a dozen big merchants of Tokyo who possess, beyond the limits of the city proper, villas where a man might dream his life away, wholly unconscious that humanity survives only by the sordid process of money-making, or that mortals are born for any purpose other than to feast their eyes upon the loveliness of nature. Thus far, then, the course of events has justified anticipation. But now the craving for beauty and seclusion has taken a wider range, and the object of almost everyone's ambition is a villa among the hills or by the sea-side. One must confess that Providence seems to have designed Japan with the special object of tempting men to this extravagance. Everywhere among the mountains are to be found dells of ideal loveliness, bright in spring-time with wild azaleas, camellias, and cherry-bloom; glowing in summer with the lily and its numerous contemporaries; rich in the autumn with a profusion of glorious tints, and resonant at all times with the voice of the cascade or the babble of the healing hot-spring. In many of these much favoured spots one finds rustic hamlets where travellers come for a season to bathe in medicinal waters or breathe light air, and in the immediate neighbourhood innumerable sites offer where, at trifling cost, summer villas idealistically charming might be built by anyone desiring to recuperate his body and rejuvenate his mind. The sea-shores, too, are not less wealthily gifted. Such softly curving stretches of sand and shingle, such picturesque reaches of bay and foreland, such endlessly varying views, from placid cove and wave-worn reef to richly wooded knoll and towering mountain, would elsewhere have attracted thousands of holiday-makers and health-seekers. But by some singular discrepancy between instinct and action, the Japanese, than whom no more truly nature-loving nation exists, have hitherto abandoned their sea-shores to the sailor and their hills to the hunter. Only where a thermal spring carries to the surface some products of nature's laboratory, do they think it worth while to build inns and make provision for brief respite from the heat of the dog-days. It must be confessed that these old-time inns possessed all the charms of a country villa without any of the drawbacks of a hostelry. The easy simplicity of a Japanese dwelling, however, exalted its masters; the perfect politeness and mutual consideration of the Japanese people, however humble their rank; the wide prevalence of the canons of good

taste, and the well-ordered habits of all classes—these things made it possible to be as thoroughly at home in the apartments of an inn as in one's own house. Perhaps something of the charm has been lost since the invasion of Japan by foreigners. The thought is unwelcome, but we cannot altogether dismiss it when we compare our memory of what a Japanese inn was twenty years ago with our experience of what it is at present. Be this as it may, however, there has always been difficulty in understanding why the Japanese remained, until quite lately, indifferent to the capabilities their country possesses for country villas and sea side retreats. Until some analyst more astute than we undertakes to elucidate the mystery, we must be content simply to congratulate them on their improved appreciation of the gifts their land offers. It is pleasant to see villas spring up here and there in lovely spots among the hills or on the coast, and to know that if the pellucid air which once bathed even the cities of Japan in opalescent tints is beginning to be defiled by the smuts of manufacture and the smoke of Western civilization, the people are learning to turn for comfort to the incomparable gifts provided for them by the gods beyond the sites of the mart and the factory. Wealth-earning, as Occidentals practise it, is a grimy, unambrosial sort of business, but if its pursuit has summoned Japan from artistic dreamland to the realm of harsh reality, she will find some consolation in applying her earnings to the construction of these delightful villas now happily springing up to lighten the lives of her people and utilize her hitherto neglected loveliness.

MUTILATED ENGLISH.

A JAPANESE correspondent of this journal having remonstrated with some warmth against the constant publication by a local contemporary of English letters attributed to Japanese writers and betraying such a confused and rudimentary knowledge of the English language as to be supremely ridiculous, has been roughly handled by the newspaper against which he inveighs. He is laughed at for sensitive vanity and reminded that if his countrymen invite criticism by writing extraordinary English, they must consent to be criticised. To a certain extent we are disposed to endorse this rejoinder. True, it is disfigured by the usual blemish of low suspicion. Not to impute dishonesty, in some form or other, to everyone differing from them in opinion, seems quite impossible to a certain class of critics in this Settlement. Thus our correspondent, having used the signature "SUMIYOSHI," and having declared himself, almost in so many words, to be a Japanese, the journal he complains of does not hesitate to express itself "exceedingly doubtful whether his

letter emanated from a Japanese pen at all." Apart, however, from this characteristic imputation of crooked conduct, we are constrained to admit that the recklessness of the Japanese in respect of English composition has often surprised us greatly. Numerous signboards in the capital and chief cities bear witness to the fact that anyone who has studied English at an elementary school thinks himself competent to compose sentences in that language without aid. Even in official catalogues, on the labels of museums, and in the pages of books we find evidence of the same strange confidence, involving the same laughable results. It is beyond question that this mass of ever present testimony must bring incomparably more ridicule on Japanese students of English than the occasional publication of a curiously worded letter in the columns of a local newspaper. The writers of such letters are, in almost every instance, youths whose straightened circumstances impel them to subserve the question of scholarship to the necessity of finding employment. What to them are dislocated syntax or disordered phraseology compared with the hope of finding some means of livelihood or ladder to promotion? Their halting efforts to pen intelligible appeals ought to move sympathily rather than to excite derision, and everyone will agree that their publication in the columns of a newspaper for the sake of making mirth is at least questionable taste. But, on the other hand, such compositions are estimated at their true value by foreigners, and to charge their publisher with bringing ridicule on Japanese linguistic competence is truly to strain at a gnat. The real sources of ridicule are the sign-boards, the labels, the catalogues, and the books which, by their utterly deformed English, depreciate the attainments of Japanese students. Some critics assert that these parodies of decent prose accuse their authors of over-weening conceit as well as of immature scholarship. No Englishman, it is averred, would venture to publish so much as a single Japanese sentence of his own composition without having previously submitted it to Japanese revision. We ourselves doubt, however, whether the fault does not lie in ignorance rather than in assurance. Comparatively strange to the study of foreign languages, the Japanese have not yet learned to appreciate the fact that among ten thousand students of a strange tongue, there is not more than one, on the average, who can succeed in writing it correctly. To disseminate the knowledge of this fact; to persuade Japanese learning English that so surely as they undertake to write it without English assistance, so surely will they make themselves ridiculous, would be a worthy task for our correspondent "SUMIYOSHII" and for the many well educated Japanese who, like him, are keenly anxious to vindicate their country's

scholarship. The circumstance that has evoked this discussion is trivial, but the point at issue is decidedly important. Failure to comprehend the difficulties of the task they essay repeatedly betrays the Japanese into publishing English compositions which, to English eyes, convict their authors either of reckless slovenliness or overweening self-conceit. In this tendency, not in the occasional reproduction of an indigent youth's ill-worded appeals for employment, lies a real danger to the reputation of Japanese scholarship. Of course we do not speak thus because we claim immaculateness for English students of Japanese. There is no Englishman in Japan who can speak Japanese without error; still less is there an Englishman who can write it correctly. But Englishmen know their weakness and generally refrain from exposing it, being greatly assisted in concealment by the exquisite courtesy of the Japanese, who never smile at a foreigner speaking their tongue faultily or deride one writing it wrongly. The Japanese, on the contrary, exercise no such caution, and are protected by no such consideration. Therefore it were well if "SUMIYOSHII" and his friends applied themselves to correct the source of the trouble instead of railing against the ridicule its exhibition evokes. Having no ground to hope for gentle treatment at the hands of foreign local critics, their best plan is to deprive criticism of material by teaching their countryman that to write, without English aid, English which shall not be laughable, is only given to one among ten thousand Japanese scholars, just as to write, without Japanese aid, Japanese which shall not faulty, has never been given to any English student.

THE SIAM BOUNDARY QUESTION.

THE latest news from India shows that matters on the Siam-Burmah frontier are far from satisfactory. The British Commissioners for delimitation met with the passive resistance and veiled hostility of the Siamese, and unless the complexion of affairs alters greatly the Indian Government is not unlikely to have some difficulty in defining the boundaries between the Siamese Shan States and those now under British rule. Under the most favourable circumstances the settlement of boundaries in these regions is a complicated and difficult task, owing to the vast area of debateable land. The history of the rival claims is given by Mr. HOLT HALLETT in his valuable work "A Thousand Miles on an Elephant in the Shan States." It appears that up to 1774 the Shan States, now under Siam, together with the present Siamese province of Rabeng, were incorporated in the Burmese dominions. In that year the Zimmé Shans, who occupied the country to the south of the valley of the Meh Khoke, a

river which enters the Cambodia River near Kiang Hsen, rebelled against the Burmese, and asked for and accepted the protection of Siam. The Shans of the valley of the Meh Khoke and of the States to the north of it remained tributary to Burmah, and intermittent warfare, consisting of predatory raids, has since been waged between them and their neighbours till the present time. For a hundred miles to the south of the Meh Khoke, and for fifty miles to the north of that river, the country for many years was rendered so unsafe by this border warfare that it was thrown out of cultivation and deserted. Zimmé, the capital of a large Shan State of the same name, was not re-occupied till 1796, and Lapoon, the capital of another State, remained vacant until 1820. Of late years the Siamese Shans have gradually encroached upon the debateable land, causing retaliatory raids on the part of the Burmese Shans. In 1842 the Siamese Shans advanced into the valley of the Meh Khoke and occupied Kiang Hai, and in 1881 crossed the river and settled in Kiang Hsen, which is claimed by the Burmese Shan Chief of Kiang Tung as his territory, and is still, therefore, a bone of contention. Even since we annexed Upper Burmah and declared our protection over the Burmese Shan States, the Siamese have encroached for a distance of 22 miles, and been so bold as to build a fort in the British territory. This has given rise to frequent attacks on the recently erected Siamese Shan villages in the disputed territory, and the country is likely to remain in a turmoil until the rival claims of the Siamese and Burmese Shans are settled. The serious rebellion in the Shan State of Zimmé that borders the new British possessions, which was due to the imposition of burdensome and vexatious taxation by the Siamese, and the fact that M. PAVIE, the French Consul at Luang Prabang, is inciting the Shans to throw off their allegiance to Siam and to accept the protection of France, constitute a state of affairs which is of serious importance to Great Britain. If these States are allowed to fall into French hands the path of the Burmah-Siam-China Railway will be blocked, and a great disappointment will be in store for British commercial and industrial classes, who for many years have set their hearts upon pushing their trade by means of this projected railway into Central Indo-China and the western land-locked half of the great Empire of China. The importance of the project, formulated by Messrs. HALLETT and COLQUHOUN, to British commerce has for years been recognized by statesmen of all shades of opinion. It is the only known route by which Burmah can be connected by rail with China. Lord DUFFERIN, in his recent address to the London Chamber of Commerce, laid great stress upon the importance of this connection to our future trade. He said:—"Before no very

distant date, I prophesy that our chief means of communication with China will be either through the north or east of Burmah." The competition for the trade of China is every year becoming more fierce. Foreign lines of steamers now run direct from the continent of Europe to Chinese ports, and foreign merchants are doing their utmost to push their goods into the country. China is hemmed in on every side, excepting the sea-board, by foreign Powers. Russia borders it on the north; the French in Tonquin on the south-east; and the British, in Burmah and the Shan States, on the west and the south-west. Each of these Powers has therefore special advantages for pushing its trade in the provinces of China which neighbour its territory. Each is bent upon connecting its seaboard by rail with certain points on the Chinese frontier in order to decrease the cost of carriage for its goods, and to induce the Chinese to develop systems of railways from those points into various parts of their Empire. The foreign trade of China and Hongkong, which of late years has been rapidly increasing, in 1888 was valued at fifty-four millions sterling, and of this the share of Great Britain amounted to thirty-seven millions, having advanced in value from twenty-three millions in 1881. With the French competing with us from their vantage ground in Tonquin for the trade of the Shan States and Southern and Central China; with the Russians making a railway neighbouring the northern provinces of China, and devising branches to tap the trade of those provinces at certain points of the frontier; and with the increasing competition we have to meet at the Chinese seaports, it behoves us to look sharply after British interests, and to do all we can to avail ourselves of our advantageous position in Burmah to open out the neighbouring markets in China and the Shan States to our trade by connecting them with our Burmese seaboard by means of the projected railway. The commercial policy of France and Russia is one of protection. Wherever the French or Russian flag flies in the East, their barriers of prohibitive tariffs are raised against the entrance of the goods of other nations. Our trade in Central Asia, since that region came under Russian rule, may be said to have become extinct, and Russian goods are now competing with ours in Northern and Western China as well as in Persia, Afghanistan, and neighbouring countries. The French, finding that their *tariff general* was insufficient to prevent British manufactures from competing with them in their Eastern possessions, lately increased their duties by sixty per cent., with the avowed intention of keeping English goods from entering the country and passing thence into the Shan States and the neighbouring Chinese provinces. If we allow Siam and its Shan States to fall to the French we shall, therefore, not

only have our road to China blocked, and thus lose all chance of increasing our trade with the western half of that great and populous empire, but we shall inevitably lose our present markets in Siam and the Shan States. Our commercial interests in Siam as compared with those of the rest of the world, according to our Minister at Bangkok, are "in fixed capital, as 2 to 1; in steamers as 8 to 1; in exports, as 9 to 2; in imports, as 2 to 1." In his despatch to Lord GRANVILLE in 1885, he stated that "it is further to be noted that the import duties are only three per cent. *ad valorem*. If Siam proper were to pass into the hands of any European Power with protectionist tendencies, it cannot be doubted that the tariff would be greatly increased." It was pointed out by the Commissioners on Trade Depression, in their Final Report, that owing to the restrictive tariff on the continent and elsewhere the demand for our commodities had fallen off in quarters where formerly our goods found a certain and remunerative market; and the Commissioners expressed their opinion that in order to further extend our trade it is obvious that we must display greater activity in the search for new markets. This is not a time, therefore, when we can afford to lose any of our Eastern markets, or to neglect to take the necessary precautions to prevent our only known practicable railway approach to China from being blocked by the threatened aggression of our French protectionist rivals. The present condition of Siam, according to Mr. HALLETT's description, can only be paralleled by that of the Malay States before we took them under our protection. Even in the capital a man or woman can seldom be found outside the Chinese, who is not the slave of the wealthy or the noble. The Government appears to be vicious in the extreme. It encourages the vices of the people by granting monopolies for gambling, opium, and spirits. It places the people under unscrupulous and tyrannical masters—merciless, heartless, and exorbitant leeches—who, unless heavily bribed, force the peasantry to do their three months' *corvée* labour at times and seasons that necessarily break up all habits of industry and ruin all plans to engage in successful business. It imposes taxes upon everything grown in the country, and upon every industry. The mesh of the Government net is so small that even charcoal and bamboos are taxed to the extent of 1 in 10, and firewood 1 in 5, in kind. This burdensome taxation is levied in the most vexatious manner that can be conceived; for the taxes are let out to unscrupulous Chinamen, who are thus able to squeeze, cheat, and rob the people mercilessly. It is no use appealing from the tax-gatherer to the officials. Money wins its way, and justice is unknown in Siam. Everyone who has not a friend at Court is preyed upon by the governors

and their rapacious underlings. If a man is believed to be in possession of money, false charges are brought against him, directly or indirectly, by the officials, in order to wring his money out of him. Everyone that Mr. HALLETT questioned in Bangkok was of opinion that the state of the people could not be much worse than it is. So unsafe are they from false charges and lawsuits, that they willingly become the slaves of the powerful in order to gain their protection. Siam is socially and politically rotten to the core. There is no visible leaven in it that can lead to reform. Its Laos provinces in the Valley of the Meh Kong, or Cambodia River, will doubtless before long be annexed by the French, whose officials have urged the policy upon their Government ever since they first put foot in the country, and have lately been taking steps in this direction. In the valleys of the Meh Nam and its branches, which comprise Siam proper and its Shan States, the French have up till now acknowledged that the interests of Great Britain are supreme. It rests with us to carefully watch events and determine the boundary where the projected French annexations must cease. The impudent encroachment of Siam upon the territories of our vassals, and the absurd claims which it makes to territory rightly appertaining to our Burmese Shan States, necessitate sharp correction on our part, and will doubtless be intelligently dealt with by Mr. NEV ELIAS, the very able political officer who is at the head of the Commission for defining the frontier.

THE COAL SUPPLY OF THE WORLD.

A SEMI-OFFICIAL statement respecting the coal supply of the world, so far as it is at present known, has been published in England. Its effect is reassuring, for it shows that whatever the world may have to fear, anything like the exhaustion of the coal supplies available, even at a greatly increased rate of consumption, is not likely to happen within a measurable distance of time. Geological examinations carried on in recent years have had the effect of showing that coal, like petroleum, is one of the most widely distributed substances in nature, and that workable coalfields exist in nearly every country on the earth, while in some places the mineral is heaped up in quantities that appear incredibly large. For instance, the comparatively small island of Formosa contains within its limited area no less than 10,000 square miles of coal deposits, and the coal veins there reach the enormous thickness in parts of 96ft. When it is remembered that 9ft. and 10ft. is considered a good thick vein, the value of the Formosa supplies will be more readily understood. The deposits of that island alone would suffice to keep the world going for centuries, and yet only a

few years ago the fact that the mineral existed there was quite unknown to Europeans. Leaving out of consideration England, Europe possesses an area of coal deposits far larger than is generally supposed, and the German *Handel's Museum* has recently given its readers a few figures relating to them of considerable interest. The Low Countries, Belgium, and Holland, Switzerland, Denmark, Germany, and Bohemia, possess an available coal area of nearly 60,000 square miles. Then Austria, Spain, Portugal, Italy, and Greece contain coal deposits estimated to cover an extent of between 30,000 and 40,000 square miles. And it must not be forgotten that a fractional proportion of these has yet been only touched. Russia has already surveyed coal-fields extending over 22,000 square miles. But the mineral is widely distributed throughout the Russian Empire, in Poland, and in Siberia, in the basin of the Donetz, the Ural region, and the Caucasus. Only a month or two ago the discovery of a rich deposit of anthracite coal in the Ekaterinoslaw Government was announced, and there is no doubt that more careful surveys of the country will lead to fresh finds of the mineral there. The Russian deposits are being turned to good account, moreover, and properly worked. The production of the Central Russian collieries has been attracting a good deal of attention lately by reason of their growing output. In 1888 the collieries of the Kursk-Karkow, Sea of Azov, and Donetz districts produced about 1,500,000 tons of coal all told. In 1889 they had raised the output to nearly 2,225,000 tons, an increase of almost 50 per cent. Coming to Asia, there are rich stores of coal in the northern half of Asia Minor. The extent of the Turkish coal deposits can only be guessed at, for a geological survey of even the rudest kind has never yet been attempted in this part of the SULTAN'S dominions. But the area within which the mineral occurs must be very large, judging from the nature and lay of the country. The neighbouring State, Persia, is believed to possess some 9,000 square miles of coal-fields. Afghanistan is known to contain coal, and in Turkestan and Central Asia the Russian Government has been officially notified of the discovery of coal deposits. India possesses deposits extending over an area of no less than 35,000 square miles, and there is little doubt that similar seams of the mineral will be traced in Burmah. The Japanese official statistics respecting coal production in these islands are then quoted. But, surpassing in extent and value all other deposits in Asia, there are the coalfields of the Chinese Empire to take into reckoning. They are estimated to cover upwards of 400,000 square miles, an area greater than that of all the remaining coal deposits of the Old World taken together. The vast store of fuel heaped up in these seams has

not even been touched as yet. It is still a virgin treasure, for the extent to which coal is worked by the Chinese is too insignificant to be worth taking into account. With the stores of China alone to draw upon, the world would for ages have little reason to fear a coal famine, and when the other unworked areas of Europe and Asia are added to the 400,000 square miles available in the Middle Kingdom, it is abundantly clear that the period within which the supplies of the Old World will be exhausted must be very remote indeed. The extent of the United States coalfields is tolerably well-known; but they are far from being the richest and most valuable in the New World. It is not all unlikely that the deposits of the Dominion of Canada will prove quite as extensive and important as those of the Republic. British Columbia is one mass of coal, and Nova Scotia is developing its collieries at a rate that bids fair to make it the great coal country of the north of America. The Cape Breton pits are turning out now about 1,000,000 tons a year, employing about 5,000 men. The coal shipments of this little colony are handled by about 2,550 vessels, with an aggregate of 250,000 tons, and crews numbering 24,000. This is not a bad mining record for a State like Nova Scotia. British Columbia is handicapped by the heavy protective duties of the United States, but the output of Vancouver Island, where there are about 10,000 square miles of coalfields, was fully 500,000 tons in 1889. The Dominion of Canada raised in 1888, according to the Report of the Geological Survey, between 5,000,000 and 6,000,000 tons of coal—a very respectable total. But the mineral deposits of the northern half of the American Continent will not compare with those of the central and southern portions of the New World. Mexico has not less than 10,000 to 12,000 square miles of coalfields. Brazil has extensive fields, in which the veins run from 17 feet to 25 feet in thickness. The State of Columbia, the whole of Patagonia, and the Republic of Peru have enormous stores of the mineral which have never yet been drawn upon to the extent of a single pound. The Falkland Islands are similarly endowed. But the most extraordinary deposits in the whole world are undoubtedly those of Chili, the "nitrate land." Nothing like them is known to exist, for the whole of the southern half of Chili is simply one vast single deposit of coal. The country, in fact, is raised upon a foundation of coal. But even should the stores of the New World be exhausted in process of time, there will be a reserve to fall back upon in Australia, New Zealand, Tasmania, New Caledonia, and Natal. The mineral resources of all these countries are scarcely yet known. Only portions have been geologically "surveyed." But already deposits reaching over 100,000 square miles in extent

have been found to exist in Tasmania, New Caledonia, and Natal; and there is yet the whole of the vast interior of Africa to be explored. The enormous stretches of inner Australia have still to be examined by surveyors, and geologists have yet to tell us what are the mineral resources of Borneo and the islands—all rich in deposits of metals, fuel, and petroleum—of the Eastern Archipelago. We know from indications apparent that coal deposits will be found to exist in all these parts, and most likely on a very large scale, to add to the available supplies of the world in due time. At all events, the figures above given relating to the unworked area of coal in existence, will serve to show that there is no cause for immediate anxiety on the score of the world's coal supply. The British collieries are estimated to have raised in 1889 over 173,000,000 tons of the mineral, the largest output ever recorded in the United Kingdom, and the produce may be increased in perfect assurance that when, at some yet remote period, the British fields are exhausted, there are plenty of other deposits to which recourse can be had.

THE OLD PROBLEM.

I.

THE writing evoked by recent correspondence and a leading article in *The Times* on the subject of Treaty Revision, is typical of the whole course of the weary negotiations. At this eleventh hour we might at least expect that the question would be soberly discussed on its merits without exhibitions of gross prejudice. Vain expectation. Two out of the three writers who devote their pens to representing what they are pleased to call the foreign side of the problem, have practically nothing to set forth except a silly and characteristic tirade against the great London journal, which, they assert, has allowed itself to be hoodwinked into espousing the Japanese cause pure and simple, with gullibility as fatuous and almost as criminal as that which marked its attitude towards the PIGGOTT forgeries. The Japanese cause forsooth! What is the Japanese cause and what the foreign? Half a dozen years ago, a feeble agitation having been raised in Yokohama for the purpose of recovering control of the Settlement's municipal affairs, the land-renters met and discussed the question with more spirit than sense. In the course of the debate a certain orator rose and warned the meeting to be wary, lest, by overfrankness of controversy, they should "show their hand to the Japanese." The caution was warmly applauded, few perceiving apparently that the sentiment of hostility it embodied must be fatal to anything like a satisfactory arrangement. The same unreasoning spirit of opposition prevails to-day, though happily, we be-

lieve, within a greatly narrowed circle, and every fresh display of it places a fresh obstacle in the path to an amicable settlement. The Japanese cause and the foreign cause are identical in this matter. Whatever really conduces to the interest of the one, conduces equally to the interest of the other. As for *The Times*, to speak of it as being "hoodwinked into Japanese service" is very childish. The columns of the leading journal are open to all correspondence respectably written by respectable persons. The authorities at Printing House Square have access to the best possible sources of information, and do not fail to exhaust them before committing their newspaper to any definite line of policy. Yet for years they have themselves steadily advocated in their leading columns, and have suffered correspondents to advocate in their correspondence columns, the expediency of solving the Treaty Revision problem in a liberal and generous spirit. How does it happen that, during all this time, no one has succeeded in uncovering the eyes of the "hoodwinked" newspaper? The persons who call it a victim of deception and who, according to their own showing, have a deep interest in disseminating the truth—are they so impotent, or do they command so little respect, that they cannot rescue the leading journal from its humiliating position? It is not as though they had made no effort. One of them, a gentleman who for years had been a warm advocate of the views consistently endorsed by *The Times*, recently made a startling *volte face*, and submitted to the Office in Printing House Square a statement of "the other side" of the problem. A subtle and skilful advocate, he did not allow accuracy to impede the marshalling of his arguments, or justice to weaken the colours of his ungrateful picture. *The Times* published his communication, but was it thereby turned even so much as a hair's breadth from its previous course? Surely some evil fate must have been suffered to assume the mischievous direction of this affair. Into the service of one side are pressed victims of prejudice, slaves to self-interest, and creatures of chicanery; yet somehow the leading English journals and all the authors of note who have visited the East, espouse the views of these recreants and allow themselves to be blinded by their spurious sentimentality; whereas the pure-souled, impartial, disinterested and manly exponents of "the other side" cry vainly in waste places and no man hearkens unto them. Truth has seldom fallen upon such evil times.

As for the particular subject of renewed discussion, it seems to us very simple. The correspondent of *The Times* denies the practical utility of the guarantee by which foreign suitors were promised that, in the event of reaching the Supreme Court by appeal, their cases should be adjudicated by a mixed bench of Japanese

and foreign experts, the latter in the majority. He says that, inasmuch as the Supreme Court could be reached in respect of errors of law alone, the foreign suitor would be unprotected in respect of the far more important question of errors of fact. "The other side," on the contrary, maintains that this guarantee is vital; that it constituted "the real heart" of Japan's proposals, and that it cannot possibly be dispensed with. Now it so happens that a tribunal whose verdict these objectors will scarcely be disposed to doubt, has pronounced definitely as to the value of a few judges of foreign origin in the Supreme Court. That tribunal is the British Government. The English-Foreign Office's chief objection to Count OKUMA's proposals, as the *London and China Express* truly explains, is understood to have been that the Judges Guarantee, in its reduced form, had become comparatively worthless. The negotiators in Downing Street did not claim, we believe, that the employment of foreigners in a judicial capacity by Japan must be considered an essential condition of Treaty Revision. But they did claim that if such a condition be internationally offered and accepted, it must possess practical utility, and that England could not, without loss of dignity, assume the position of attaching public importance to an engagement of such slender application as that proposed. We think that in this matter England's course was true to the eminently practical and sensible rules by which her international dealings have invariably been guided. At all events, if she was right, then the correspondent of *The Times* is also right; if she was wrong, then he too errs in her company. The ready though irrelevant answer will doubtless be that if the guarantee, in the shape advanced last year and accepted by America, Germany, Russia and France, possessed little practical value, then the only proper course was to restore it approximately to the dimensions it had in Count INOUE's programme. This contention, though from a logical point of view it deserves no notice, brings us to another phase of the question; a phase which, as we think, really occupies the leading place and deserves to be briefly discussed in a separate article.

II.

We have shown that the assertion of *The Times'* correspondent as to the practical inutility of the Judges Guarantee in its reduced form, accords with the view taken by HER MAJESTY'S Government during the negotiations. If, therefore, any guarantee as to the quality of the Japanese judiciary be required, it must be a guarantee of more extensive character than that embodied in Count OKUMA's proposals. Does any one imagine for a moment that the Japanese nation can be induced to give such a guarantee? The conditions to be dealt with have radically changed since the negotiations for revi-

sion entered the field of practical politics in 1881, and it would be the merest fatuity to close our eyes to the change. Japan has learned what an independent country is entitled to expect at the hands of other States. The mood of confiding docility which possessed her in the early days of her renewed intercourse with the West, has been replaced by a strong sense of offended dignity and illiberal treatment. That is the broad fact that must be kept in view before everything else. Some foreign critics may assert, for example, that the plea of unconstitutionality urged last year by the opponents of the Judges Guarantee, cannot be sustained. The Japanese simply reply that it is for them alone to interpret their own Constitution, and that in common, for the matter of that, with other competent foreign critics, they consider the proposed guarantee opposed indirectly to the letter and directly to the spirit of the Constitution. Will any Occidental Government undertake the unwarrantable and hopeless task of proving to them that they are in error? Such conclusions are among the verdicts which every free nation has a right to pronounce absolutely, and an equal right to exclude from the sphere of foreign discussion. So, too, it may be urged that but for political agitation and the friction of parties, Japanese public opinion would never have shown itself so exacting as it did last year. What is the value of such a contention? Party politics and the agitation they engender are among the factors which have to be reckoned with in modern Japan. To deny the efficiency of public opinion because it is moulded by such agencies, is as though an autocratically governed State should decline to accept as representative the opinions expressed by parliament in a constitutional country. We must take Japan as she is, instead of futilely imagining that she remains what she was when we first made her acquaintance. No longer controlled by the hands of a few virtually irresponsible statesmen, the nation has assumed the direction of many of its own affairs, notably of the Treaty Revision problem. It is true that the terms which the country rejected last year would have been gladly accepted by it three years previously. It is true that the guarantee which chiefly excited opposition was intrinsically a trifling concession, whatever magnitude it possessed from a sentimental point of view. It is true that the proposals from which Japan ultimately receded were of her own statesmen's choosing, and that, in accepting them, foreign Powers behaved with liberality and consideration. But to cite all this is merely to adduce illustrations of the fact that, for purposes of international negotiation, Japan has undergone a radical change. She now knows exactly what as a free State she is entitled to claim, and she will be content with nothing less. It would have been a happy thing could

she and all the great Powers have been induced to accept the compromise proposed by Count OKUMA last year, and we, among others, spared no pains to bring about that result, just as, three years previously, we had endeavoured to secure assent to Count INOUE's terms—terms far exceeding anything that foreigners can hope for again. Each of those successive failures added to the difficulty of a situation already sufficiently difficult, and if the error of mistaking facts is to be repeated for the third time, the result will be most deplorable. It is not as though the problem might be quietly left to work out its own solution. It is not as though foreigners might placidly fold their hands and wait until their scepticism about the trustworthiness of Japanese Judges had been dispelled by some undefined and indefinable process. Japan will not wait. She understands just as well as we do that until her Judges are afforded an opportunity of proving their competence, they cannot establish a title to trust. Many years have elapsed since she began to equip colleges for the legal training of her people, and to send chosen students of law to America and Europe to complete their education. Does she find that all this earnest effort has brought her perceptibly nearer her goal? Let *The Times'* exponent of "the other side" reply, who does not hesitate to assert that she has made no attempt whatever to provide a competent judiciary and that the Western conception of administering justice is wholly strange to her. Fifteen years' service have not qualified her even for the hand of LEAH; will another fifteen years, under similar conditions, secure for her the gift of RACHEL? She will not wait, we repeat. The temper of her people to-day shows plainly that their patience is well nigh exhausted. Thoughtless persons may describe that temper as a recrudescence of the old-time anti-foreign spirit. What is the old-time anti-foreign spirit? Is it the spirit that induced the Japanese in the sixteenth and seventeenth centuries to welcome with open arms the Spaniards, the Portuguese and the Dutch, and to grant the English free trade access to every part of the empire? Or is it the spirit of distrust and disgust that grew out of the religious intolerance, the treacherous intrigues, the mutual recriminations, and the greed of those early propagandists and settlers? There never was any anti-foreign spirit in Japan until foreigners themselves educated it, and if history is now repeating itself, we can clearly decipher the steps of the process. The present feeling of umbrage and soreness—for undoubtedly such a feeling exists—is simply an outcome of the treatment which the Japanese have suffered at foreign hands, and is inevitably destined to grow deeper and stronger so long as that treatment remains unaltered. The existence of such a feeling must at any time have proved highly uncomfortable

and inconvenient for foreign residents; its development at the present time when the people are on the eve of acquiring power to make their voice heard in the councils of State, is ominous. Our wise folks shrink from the danger of miscarriages of justice under Japanese jurisdiction, but fail to appreciate the far greater peril incurred by persisting in such obstinate timidity. It is true, indeed, that the Constitution reserves the conduct of the country's foreign relations to the EMPEROR. But it is equally true that the support of the Diet will be withheld from any Cabinet which fails to adopt and assert the nation's present estimate of its dignity and rights. We, in our capacity of English journalists, are not disposed to forecast accurately the steps which Parliament may take to accomplish its purpose. But that it will take some steps, and that their results will greatly aggravate the situation for foreigners, cannot reasonably be doubted. The problem is fast outgrowing the control of those who would have been content to patiently work out its amicable solution.

THE ADMINISTRATIVE COURT.

LAW No. 48.

We hereby give our sanction to the present Regulations relating to the Law of the Administrative Court, and order the same to be duly promulgated.

[His Imperial Majesty's Sign-manual.]
[Great Seal.]

Dated June 28th, 1890.

(Countersigned)

COUNT YAMAGATA ARITOMO,
Minister President of State.

COUNT SAIGO TSUKUMICHI,
Minister of State for Home Affairs.

COUNT YAMADA AKIYOSHI,
Minister of State for Justice.

COUNT MATSUKATA MASAYOSHI,
Minister of State for Finance.

COUNT OYAMA IWAO,
Minister of State for War.

COUNT GOTO SHOJIRO,
Minister of State for Communications.

VISCOUNT AOKI SHUZO,
Minister of State for Foreign Affairs.

VISCOUNT KABAYAMA SUKENORI,
Minister of State for the Navy.

YOSHIKAWA AKIMASA,
Minister of State for Education.

MUTSU MUNEMITSU,
Minister of State for Agriculture and Commerce.

CHAPTER I.—ORGANIZATION OF THE ADMINISTRATIVE COURT.

Article 1.—The Administrative Court shall be established in Tokyo.

Article 2.—In the Administrative Court there shall be one President and various Councillors, the number of whom shall be fixed by Imperial Ordinance. Clerks also shall be attached to the Administrative Court, whose number and office shall be fixed by Imperial Ordinance.

Article 3.—The President shall be of *chokunin* rank; the Councillors shall be of *chokunin* or *sonin* rank. The President and Councillors shall be appointed on the nomination of the Minister President of State from among officials whose ages are above 30 years, and who have held office as higher administrative officials or as judges during a period of more than 5 years.

Clerks shall be appointed by the President.

Article 4.—The President as well as the Councillors are prohibited from doing the following things during their term of office:—

1. Concerning themselves publicly with politics.
2. Becoming partisans of any political party, members of any political association, members of the House of Representatives, or of city, prefectural, rural, district, municipal,

town, or village assemblies, or of any meeting of Councillors.

3. Holding a public office to which a salary is attached, or holding public office with the intention of gaining monetary advantage, except in the case of their being appointed to additional office (*Kenkwan*).

4. Engaging in any commercial occupation, or any occupation which is incompatible with administrative order.

Article 5.—The President and Councillors may not be ordered to retire, or be removed from their office, or placed on the *hishoku* list against their wish (unless by judgment under the Penal Code or by correctional punishment, except in the case of Article 6).

The last paragraph shall also apply to those officials who may hold the office of President or Councillor of the Administrative Court as additional offices.

The law of correctional punishment shall be decided separately by Imperial Ordinance.

Article 6.—Should the President or Councillors become incapable of discharging their duties owing to bodily or mental ailment, the Minister President of State may advise their retirement in accordance with the decision of a general meeting of the Administrative Court.

Article 7.—The President shall preside over the affairs of the Administrative Court.

Should the President be prevented from discharging his duties, the Councillor of highest rank shall represent him; should there be Councillors of equal rank, that one who was appointed first shall represent the President.

Article 8.—The President may himself become Chief Judge, or appoint any councillor Chief Judge.

Should it be necessary to divide the work of the Court such division and distribution of business shall be decided by Imperial Ordinance.

Article 9.—The judgments of the Administrative Court shall be subjected to the consideration of a bench of more than five Judges, including the Chief Judge and Councillors. The number of Judges must, however, be an odd number. Should the number, by the non-attendance of any, be an even one, Councillors of lowest rank or of most recent appointment, should their rank be the same, shall be exempted from voting.

Judgment shall be given according to the vote of the majority (*kahansu*).

Article 10.—Neither the President nor any Councillor is permitted to take part in the decision or discussion of the Court in the following cases:—

1. When the matters to be decided are related to himself or his parents, brothers or sisters, wife or children.
2. When the matter to be decided has been treated by him in the position of a manager (*rijisha*), agent, or in some other capacity outside the Court, or when he has already expressed a private opinion in regard to the matters to be decided.
3. When he has had connection with the treatment, or decision of the case to be decided, in the capacity of an administrative official.

Article 11.—The plaintiff as well as the defendant may challenge the presence of the President or of any Councillor by means of written or oral statements, giving his reasons in the case of the last article.

The Administrative Court shall decide as to the exclusion of any official under this article.

Article 12.—When the President or any Councillor states facts relating to circumstances which are the cause of challenge or exclusion; or when the President or any Councillor seems doubtful of his capability to take part in any discussion or decision, the Administrative Court shall decide as to the exclusion of such official.

Article 13.—Regulations to deal with the affairs of the Administrative Court shall be decided in accordance with Imperial Ordinance.

Article 14.—Advocates (*bengoshi*) licensed by the Administrative Court can only plead in administrative suits.

CHAPTER 2.—AUTHORITY OF THE ADMINISTRATIVE COURT.

Article 15.—The Administrative Court shall conduct trial and give judgments in all cases which come within its province under Laws and Imperial Ordinances.

Article 16.—The Administrative Court shall not try or decide any suit for damages.

Article 17.—No administrative suit may be raised until after it has come before the highest local administrative office, and the decision of the same has been obtained, except those which are specially provided for in Laws or Imperial Ordinances.

Administrative suits may be raised directly against the action of any Minister of State for any

Department, or of any office under the direct control of the Cabinet, or of any higher local administrative office.

An administrative suit may not be raised when a petition relative thereto has been presented to any Department or to the Cabinet.

Article 18.—The decisions of the Administrative Court shall bind all administrative offices which are related to the cases so decided.

Article 19.—A new trial may not be sanctioned against the judgment of the Administrative Court.

Article 20.—The Administrative Court shall decide the authorities or jurisdiction (*kengen*) which govern it.

The Court of Authority (*Kengen Saibansho*) shall decide disputes relating to jurisdiction between the Administrative Court and any ordinary or special court.

Article 21.—The execution of judgments of the Administrative Court may be entrusted to any ordinary court.

CHAPTER 3.—PROCEDURE IN ADMINISTRATIVE SUITS.

Article 22.—An administrative suit must be raised within 60 days after the document of treatment or decision complained against has been delivered or intimated to the Administrative Office; after which time no administrative suit can be raised. Cases which are specially provided for by Laws and Ordinances shall, however, be excepted.

The Regulations of the Law of Civil Procedure shall be applied in fixing the period within which a suit has to be filed, or the period of delay which may be allowed in case of misfortune or accident.

Article 23.—The raising of an administrative suit shall not suspend the execution of the action or decision of an administrative office, except in the cases specially provided for in Laws and Imperial Ordinances. The Administrative Court or Administrative Offices may suspend execution of action or decision, either *ex officio* or in accordance with the petition of the plaintiff, if such a course is deemed necessary.

Article 24.—Administrative suits shall be raised in the Administrative Court by means of documents. Legal practitioners deemed to be so in accordance with Laws, may raise administrative suits.

Article 25.—A statement of claims shall be signed and sealed by the plaintiff, describing the following matters:—

1. The personal status (*mibun*), occupation, residence and age of the plaintiff.
2. The Administrative Office which is in the position of defendant or co-defendant.
3. The subject of claim and the reasons therefor.
4. Evidence.
5. Date.

Petitions and decisions, as well as evidence relied on by the plaintiff, shall be filed in addition to the statement of claim.

Article 26.—Copies of the necessary documents shall be filed with the statement of claim for communication to the defendant.

Article 27.—The Administrative Court shall examine the plaintiff's statement of claim, and shall cause it to be withdrawn if it be not in accordance with legal procedure, or if it does not show good grounds for the raising of a suit.

Suits in which the statement of claim is informal shall be sent back for amendment within a certain period.

Article 28.—When a statement of claim is presented to the Administrative Court, a copy of the same shall be sent to the defendant, who shall be ordered to file his defence within a reasonable time.

Copies of the necessary documents shall also be filed for transmission to the plaintiff.

Article 29.—The Administrative Court shall order the plaintiff and defendant respectively to file statements of reply (*benpakusho*) and statements of rejoinder within a period to be appointed, should it consider the same to be necessary.

Article 30.—The Administrative Court may require both the plaintiff and the defendant to inspect copies of documents attached to the statements of claim and of defence, instead of sending such documents to the plaintiff and defendant respectively.

Article 31.—The Administrative Court may permit a third party interested in the suit to plead in it in accordance with the petition of one of the parties.

Article 32.—Any Administrative Office may be represented in any suit by an official or a committee appointed by the responsible Minister of State. Any person who thus represents an office shall prove his capacity as agent by means of a power of attorney.

Article 33.—The Administrative Court shall summon the plaintiff, defendant, and other persons concerned, open the trial and conduct the same orally, on a day appointed beforehand.

The Administrative Court may give judgment solely on written proof, if the plaintiff, defendant, and the third party aver that they do not wish an oral trial.

Article 34.—The explanations of the plaintiff, defendant, and third party shall be heard in Court. Persons who obtain permission from the Chief Judge may address the Court.

Plaintiffs, defendants, and third parties may supply omissions in documents, remedy mistakes, and file new proofs or documents, as to points of fact as well as of law.

Article 35.—A Minister of State may depute a delegate to attend the Court in order to watch the public interest in cases of necessity.

The Administrative Court shall require such delegate to express his opinion before it shall give judgment.

Article 36.—All trials and judgments of the Administrative Court shall take place in public.

The Administrative Court may decide not to make a trial public if there are grounds for supposing the public peace, good order, or established custom may be interfered with, or if a request is made by an Administrative Office to that effect.

Article 37.—The decision to suspend an open trial shall be pronounced before the public are excluded.

Article 38.—The Administrative Court shall order the attendance of the plaintiff, defendant and third party, and may collect evidence and summon witnesses and experts whose evidence and opinion are required and are necessary.

With regard to the duty of giving evidence and opinions, or attending trial as witnesses or expert, the regulations of Civil Procedure shall be applied, and the Administrative Court shall of itself decide the penalty which will be inflicted on those who do not discharge their duty.

The Administrative Court may take evidence at an oral trial, or may request the same to be taken by Councillors or by an Administrative Office.

Article 39.—When a civil suit is raised in regard to a case pending in the Administrative Court and it appears advisable to await judgment in such civil suit, the trial in the Administrative Court may be suspended.

Article 40.—The Administrative Court shall decide of itself motions (*koshu no moshitate*) relating to the procedure of the trial.

Article 41.—The Administrative Court shall not necessarily suspend a trial though the plaintiff or the defendant or the third person may not attend at the date mentioned in the summons.

The Administrative Court may give judgment directly without conducting any trial should the plaintiff, defendant and third party fail to attend.

Article 42.—The Chief Judge, Judges, and clerk shall append their names and seals to the judgment, adding proper reasons for the same, and a copy of each shall be given to the plaintiff, the defendant, and the third party, under the seal of the Administrative Court.

Stamps for civil procedure need not be attached to the documents of an administrative suit.

Article 43.—Regulations relating to civil procedure may be applied to the procedure of an administrative suit for which no provisions exist in this law, in accordance with the order of the Administrative Court.

CHAPTER 4.—SUPPLEMENTARY RULES.

Article 44.—This law shall come in force on and after the 1st day of the 10th month of the 23rd year of Meiji.

Article 45.—Questions relating to authority or jurisdiction (*kengen*) mentioned in Article 20, paragraph 2, shall be decided by the Privy Council until the Court of Authority (*Kengen Saibansho*) shall be established.

The form of such decision shall be settled by Imperial Ordinance.

Article 46.—All previous laws and ordinances which conflict with this law shall be abolished on and after the day on which this law shall come in force.

Article 47.—Suits pending, which have been received already as administrative suits before the carrying out of this law, shall be dealt with in accordance with former regulations.

IMPERIAL ORDINANCE No. III.

We hereby give our sanction to the present Regulations relating to the number of Judges and the number and duties of Clerks of the Admini-

strative Court, and order the same to be duly promulgated.

(His Imperial Majesty's Sign-manual.)
(Great Seal.)

Dated, June 28th, 1890.
(Countersigned.)

COUNT YAMAGATA ARITOMO,
Minister President of State.

Article 1.—There shall be eleven Judges of the Administrative Court.

The number of clerks of the Administrative Court shall be 15.

Article 2.—Clerks of the Administrative Court shall deal with affairs specially settled by the Law of the Administrative Court and by other Laws and Ordinances.

Article 3.—Clerks of the Administrative Court shall conduct correspondence, and keep accounts, records, and other affairs.

Article 4.—Clerks of the Administrative Court shall be under the orders of the President of the Administrative Court.

The orders of the Chief Judge shall be paramount as to trials and judgments.

LAW No. 47.

We hereby give our sanction to the present Amendment of the Regulations of New Trials in cases of Misdemeanour (*Keizai*), promulgated by Notification No. 2, January, the 18th year of Meiji, and order the same to be duly promulgated. This law shall come in force on and after November 1st the 23rd year of Meiji.

(His Imperial Majesty's Sign-manual.)
(Great Seal.)

Dated, June 28th, 1890.
(Countersigned.)

COUNT YAMAGATA ARITOMO,
Minister President of State.

COUNT YAMADA AKIYOSHI,
Minister of State for Justice.

The clause "against sentence in public suits" (*Koso*) in Article 3, Notification 2, of January, the 18th year of Meiji, shall be amended to read "with respect to public suits." Articles 1, 2, and 5 shall be deleted.

CONSULAR FEES ON JAPANESE SHIPPING.

IMPERIAL ORDINANCE No. 34.

We hereby give our sanction to the present Amendment of the Regulations for Consuls of the Japanese Empire, and order the same to be duly promulgated.

(His Imperial Majesty's Sign-manual.)
(Great Seal.)

Dated July 21st, 1890.
(Countersigned)

VISCOUNT AOKI SHUZO,
Minister of State for Foreign Affairs.

Paragraph 9 in the list of fees and costs of attendance of Consuls at places other than their Consulates, laid down in the Regulations for Consuls of the Japanese Empire, shall be amended as follows:—

9. The clearance and entrance of vessels as well as the custody of documents relating to vessels.
- | | |
|---|---------|
| Over 15 and below 60 registered tons; | |
| above 150 <i>koku</i> and below 500 <i>koku</i> | yen 30. |
| Over 50 and below 100 registered tons; | |
| above 500 <i>koku</i> and below 1,000 <i>koku</i> | yen 50. |
| Over 100 and below 200 registered tons; | |
| above 1,000 <i>koku</i> | yen 1. |
| Over 200 and below 500 registered tons | yen 3. |
| Over 500 tons | yen 5. |
- No fees shall, however, be levied on fishing vessels.

CORRESPONDENCE.

A GRIEVANCE.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—Will you kindly allow me to trespass upon your space to say a few words regarding the letters that are published in the *Japan Gazette* from time to time and said to be written by Japanese—a specimen of which appeared in its issue of 14th inst. The *Japan Gazette* appears to think it a smart thing to laugh at other people and their writings. I notice that it delights in publish-

ing "English as she is write," by Japanese especially. I am at a loss to know the cause of this. If it is to show that we, Japanese, cannot write English, the *Japan Gazette* is quite mistaken. There are many of us who can take up any correspondence in English perfectly well, and better than some Englishmen too. I don't profess to be an excellent writer, and I dare not include myself in the number of those efficient writers just mentioned.

My countrymen generally feel hurt at such paragraphs as published in the *Japan Gazette*, a foreign newspaper, and one that is published in our own country. If one Japanese has written a letter in absurd English, it does not signify that all Japanese write the same. Does the *Japan Gazette* contain such wonderfully written articles that they should despise the less fortunate? Should, however, what I conjecture be wrong, should the only motive of the *Japan Gazette* in publishing such letters be to induce the writers to improve and be careful so as to avoid seeing their letters in print, the *Japan Gazette* should act otherwise than expose the unfortunate writers to public ridicule, and make them the laughing stock of the whole community.

I would like to point out to the *Japan Gazette*, and those who side with it, that it is a great mistake to think that, being Japanese, we can be treated anyhow. It must be remembered that we are in our own country and foreigners are trading with us. I consider that we are as good as anybody; and an honest man, and one who behaves as he should, is second to none in this world, no matter what position he holds, whether he be tall or short, rich or poor, high or low in rank, &c.

Hoping you will be good enough to insert this letter in your next issue, and apologizing for the trouble, I remain, yours respectfully,

SUMIYOSHI.

Yokohama, 17th July, 1890.

SANITATION IN YOKOHAMA.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—Several times in years past I have, through your columns, drawn the attention of the Japanese Authorities to the filthy state of the Market in Yokohama; but neither they, nor the medical fraternity here, appear to take any interest in the matter. Now that the cholera-morbus is nearing us, it is no more possible for the Authorities to ignore the existing state of affairs.

The state of the Creek also demands some attention. The refuse of the houses along it is thrown into it (not to speak of dead dogs, cats, &c.), and a pestilential smell comes from it at low water even in the winter, but now when the sun is strong the stench is enough to knock one down when the tide is out.

It is scarcely possible that the medical men of Yokohama, constantly driving about the town as they do, are not aware of the insanitary condition of many parts of it, and one would imagine that some of them possessed sufficient influence with the Authorities—of they cared to open their mouths—to have attention paid to their suggestions.

I do not ask that any expense be incurred by the Authorities, because the Police on duty could walk through the market daily, and as to the condition of the Creek it is only a question of preventing filth from being thrown into it. It is only near the banks that the ground is exposed to the rays of the sun, and if these heaps of muck were not increased by constant additions they would soon disappear, with the frequent scour the Creek is subject to—at all events the condition of the Creek would be vastly improved. This is not the weather perhaps to disturb the mass of putrefaction on the banks of the Creek, but at a small expense at the proper time the ditch that surrounds this Settlement might be made wholesome.

I enclose my card, and sign, **SANTAS.**
Yokohama, July 23rd, 1890.

SAILING RACE.

Saturday's sailing race for the large boats proved a capital race for the 26 raters; *Maid Marion*, however, had no competition in her class, *Lesbiote* not starting. *Daimyo*, being on a scientific cruise, did not start either. The wind was at S.E., a good whole sail breeze and the start was a capital one. *Molly* got first across the line, 17 seconds after the starting gun, *Lady Louise* 34 seconds, *Scow*, *Maid Marion*, and *Princess Maud* 45 seconds, and *Tortoise* over a minute after. The reach to the North Mark was a fast one. *Maid Marion* after some trouble with her jib-topsail, which would not break out from the

stops, got away smartly from the ruck. *Princess Maud*, with her balloon pulling her along fast, overhauled *Lady Louise*, *Mosquito* also getting away somewhat inexplicably from *Molly* which lagged greatly, her head sheets looking as if too much pinned in. The *Maid* was of course first at the North Mark, and after a minute and a half's work on the starboard tack went round and held in towards the shipping. The others kept on, *Lady Louise* being the first to follow the *Maid's* example, while *Princess Maud*, hoping the wind would free as she got out, stuck to the starboard tack in spite of the flood tide, but had eventually to give up and follow the others. *Maid Marion* stood well in—so far indeed that when she went round for the Lightship the trip was an easy one. *Lady Louise* and *Molly* did not go far, and when they tacked for the Lightship they had the small cutter well under their lee. The blue yacht fetched close astern of the Lightship, *Molly* hit it off with comparative ease; but the *Princess*, pinched too much latterly, had to hold well out to clear the mark. *Mosquito* coming up later on went about at 3h. 3m. 30 sec. but misjudging the distance failed to weather, and had to try again. Meanwhile *Maid Marion* rounded the Home Mark and set spinnaker to starboard, the wind having shifted to the southward, *Lady Louise* and *Molly*—the latter especially—being terribly bothered by a large junk. *Lady Louise* after jibing twice elected to run out under plain sail only; *Molly* setting spinnaker improved her position relative to the blue cutter, *Princess Maud* also drawing up noticeably by the aid of her big canvas. *Molly* was round first, but as soon as sheets were pinned in for the Lightship *Lady Louise* began to eat out to windward, of *Louise* and was soon hanging well up on the Doctor's weather quarter. *Princess Maud* still carried jib topsail which she had set after rounding the Lightship, and was perceptibly sagging down to leeward. Nearing the Lightship the wind hardened a trifle and *Molly* handed her jib topsail, thenceforward maintaining if not improving her condition with regard to Captain Owston. But as both yachts on the starboard tack came in view to windward of the Lightship, the blue cutter's advantage became most markedly apparent, for *Molly* had not room to tack. With her allowance of 34 seconds the race was now, humanly speaking, a sure thing for *Molly Bawn*. For on the first round (though to be sure Lightship times can never be taken with perfect accuracy when that mark has to be tacked round), the had reached in in less time than *Lady Louise*, and in any case by waiting till the latter went round she could have been in stays half a dozen seconds later, and would certainly have held her opponent in. This was what it seemed to outsiders *Molly* might have done to escape from a dilemma in which she now found herself by no fault of her own but simply by the superior weatherly qualities of the other. *Molly*, however, tacked and, Captain Owston continuing to stand on—having now the right of way, found herself compelled to luff to avoid a foul, thence by an easy transition got in irons and gathering stem-way was soon under the lee of the Lightship—a position from which she disentangled herself after much waste of time. The race thus fell easily to *Lady Louise*, *Molly* taking second place. *Mosquito*, sailed very well throughout, failed to score on her allowance, and *Scow* was completely out of it. *Maid Marion* thus gets two record points, *Lady Louise* two, and *Molly* one. As a matter of interest it may be noted that had *Lady Louise* been racing with the big cutter on measurement allowance (to m. 26 sec.) she would have beat the *Maid* by four minutes and a half, while *Molly Bawn* on her allowance by measurement (11 min.) would have been one minute to the good. Mr. W. W. Campbell was officer of the day, being accommodated in a launch kindly lent by Capt. Weston. The following are the official times:—

	North Mark.	Light-ship.	Home Mark.	North Mark.
	39 RATERS.			
	h. m. s.	h. m. s.	h. m. s.	h. m. s.
<i>Maid Marion</i>	2.20.00	2.52.30	3.11.35	3.36.20

IN H.B.M.'S COURT FOR JAPAN.

Before J. J. ENSLIE Esq., Acting Assistant Judge.—TUESDAY, July 22nd, 1890.

BREACH OF CONTRACT BY AN ENGINEER.

Judgment was given to-day in the action raised by the Nippon Yusen Kaisha against Robert Atkins, concluding for \$1,000 damages.

His Honour said—When a defendant in an action brought on a contract can be regarded as a wrongdoer, great latitude is allowed to a jury in assessing damages. In the matter of the breach of contract, the cause of this action, the defendant has constituted himself a wilful wrongdoer. He has deliberately broken the conditions of his former engagement to make others in a new one, to his personal advantage, and greatly to the detriment of the other parties to the contract under consideration. There will be judgment for the plaintiffs in the full amount claimed, with costs.

Mr. Walford (who appeared for the plaintiffs) —Will your Honour fix the costs?

His Honour—I cannot do that off-hand now.

Mr. Walford—They will come, I think, to \$100, but I am quite willing to take \$75 including Court fees. It is quite immaterial of course, but it would save a great deal of trouble in taxing if the defendant is not here. They will come to a great deal more than \$100 if they are taxed.

The Judge—Very well; I fix them at \$75 including Court fees.

Mr. Walford—Will your Honour also give permission now for us to uplift the sum of \$100 paid into Court as security for costs.

His Honour—Certainly.

DEATH AT SEA.

An inquiry into the death of Charles McDonald, first mate of the bark *Hamburg*, who was washed overboard on May 8th, was held on Tuesday morning in H.B.M.'s Court before Mr. Ensle.

Carl Andrew Caldwell, master of the bark, deposed that the man was washed overboard on May 8th in latitude 39 South and longitude 84 East on the voyage from New York to Yokohama. There were strong gales and heavy hailstorms at the time. It was impossible to do anything at all to save him. Witness was below asleep at the time and did not see him go overboard.

His Honour read the entry in the log-book dated May 8th:—"Charles McDonald washed overboard in a heavy sea. Nothing could be done to save him. It was blowing a heavy gale at the time."

Witness said the entry was correct.

Hans Hansen, an able seaman, deposed that he saw the deceased when he was at the wheel. They shipped a heavy sea. Witness did not see the mate go overboard. He saw him in the water, but did not know who it was. They could not save him because of the heavy sea. He sank in three minutes.

Christian Strohte, steward, deposed that he had just come out of the galley when he heard the mate giving some orders to the sailors about lashing spars. Witness went to the midship house and was only there a moment, when he heard a heavy sea come over. Then he heard the two men at the wheel shouting "man overboard." Witness ran aft to the poop, but saw nothing. It was impossible to do anything for the man overboard because the sea was so heavy and the weather was very bad.

By the Court—Deceased was on the main deck, by the spars when he gave the order to lash them.

His Honour said he found that the man who was washed overboard, was the mate, and that he came by his death through being washed overboard on May 8th, and that it was impossible to do anything to assist him.

FOR NERVOUS DYSPESIA USE HORSFORD'S ACID PHOSPHATE.

Dr. A. G. RAWSON HARRIS, L.R.C.P., and M. R.C.S., Pembroke, Eng., says: "I am sure that it is destined to be more than a merely fashionable remedy of the hour. I used it in a case of nervous dyspepsia, of long standing, where for years there had been a great wear and tear of the nervous system. This objectionable symptom was speedily relieved in a way that no other remedy has ever effected."

WITHOUT BENEFIT OF CLERGY.

BY RUDYARD KIPLING.

Author of "Departmental Ditties," "Plain Tales from the Hills," &c., &c.

"But if it be a girl?"

"Lord of my life, it cannot be. I have prayed for so many nights, and sent gifts to Sheikh Badl's shrine so often, that I know God will give us a son—a man-child that shall grow into a man. Think of this and be glad. My mother shall be his mother till I can take him again and the mulah of the Pattan mosque shall cast his nativity—God send he be born in an auspicious hour!—and then, and then thou wilt never weary of me, thy slave."

"Since when hast thou been a slave, my queen?"

"Since the beginning—till this mercy came to me. How could I be sure of thy love when I knew that I had been bought with silver?"

"Nay, that was the dowry. I paid it to thy mother."

"And she has buried it, and sits upon it all day long like a hen. What talk is yours of dower! I was bought as though I had been a Lucknow dancing-girl instead of a child."

"Art thou sorry for the sale?"

"I have sorrowed; but to-day I am glad. Thou wilt never cease to love me now?—answer, my king."

"Never—never. No."

"Not even though the *mem-log*—the white women of thy own blood—love thee? And remember, I have watched them driving in the evening; they are very fair."

"I have seen fire-balloons by the hundred. I have seen the moon, and—then I saw no more fire-balloons."

Ameera clapped her hands and laughed. "Very good talk," she said. Then with an assumption of great stateliness: "It is enough. Thou hast my permission to depart,—if thou wilt."

The man did not move. He was sitting on a low red-lacquered couch in a room furnished only with a blue and white floor-cloth, some rugs, and a very complete collection of native cushions. At his feet sat a woman of sixteen, and she was all but all the world in his eyes. By every rule and law she should have been otherwise, for he was an Englishman, and she a Mussulman's daughter bought two years before from her mother, who, being left without money, would have sold Ameera shrieking to the Prince of Darkness if the price had been sufficient.

It was a contract entered into with a light heart; but even before the girl had reached her bloom she came to fill the greater portion of John Holden's life. For her, and the withered hag her mother, he had taken a little house overlooking the great red-walled city, and found,—when the marigolds had sprung up by the well in the courtyard, and Ameera had established herself according to her own ideas of comfort, and her mother had ceased grumbling at the inadequacy of the cooking-places, the distance from the daily market, and at matters of house-keeping in general,—that the house was to him his home. Any one could enter his bachelor's bungalow by day or night, and the life that he led there was an unlovely one. In the house in the city his feet only could pass beyond the outer court-yard to the women's rooms; and when the big wooden gate was bolted behind him he was king in his own territory, with Ameera for queen. And there was going to be added to this kingdom a third person whose arrival Holden felt inclined to resent. It interfered with his perfect happiness. It disarranged the orderly peace of the house that was his own. But Ameera was wild with delight at the thought of it, and her mother not less so. The love of a man, and particularly a white man, was at the best an inconstant affair, but it might, both women argued, be held fast by the baby's hands. "And then," Ameera would always say, "then he will never care for the *mem-log*. I hate them all—I hate them all."

"He will go back to his own people in time," said the mother; "but by the blessing of God that time is yet afar off."

Holden sat silent on the couch thinking of the future, and his thoughts were not pleasant. The drawbacks of a double life are manifold. The Government, with singular care, had ordered him out of the station for a fortnight on special duty in the place of a man who was watching by the bedside of a sick wife. The verbal notification of the transfer had been edged by a cheerful remark that Holden ought to think himself lucky in being a bachelor and a free man. He came to break the news to Ameera.

"It is not good," she said slowly, "but it is not

all bad. There is my mother here; and no harm will come to me—unless indeed I die of pure joy. Go thou to thy work and think no troublesome thoughts. When the days are done I believe . . . nay, I am sure. And—then I shall lay him in thy arms, and thou wilt love me for ever. The train goes to-night, at midnight is it not? Go now, and do not let thy heart be heavy by cause of me. But thou wilt not delay in returning? Thou wilt not stay on the road to talk to the bold *mem-log*. Come back to me swiftly, my life."

As he left the court-yard to reach his horse that was tethered to the gate-post, Holden spoke to the white-haired old watchman who guarded the house, and bade him under certain contingencies despatch the filled-up telegraph-form that Holden gave him. It was all that could be done, and with the sensations of a man who has attended his own funeral Holden went away by the night-mail to his exile. Every hour of the day he dreaded the arrival of the telegram, and every hour of the night he pictured to himself the death of Ameera. In consequence his work for the State was not of first-rate quality, nor was his temper towards his colleagues of the most amiable. The fortnight ended without a sign from his home, and, torn to pieces by his anxieties, Holden returned to be swallowed up for two precious hours by a dinner at the club, wherein he heard, as a man hears in a swoon, voices telling him how execrably he had performed the other man's duties, and how he had endeared himself to all his associates. Then he fled on horseback through the night with his heart in his mouth. There was no answer at first to his blows on the gate, and he had just wheeled his horse round to kick it in when Pir Khan appeared with a lantern and held his stirrup.

"Has aught occurred?" said Holden.

"The news does not come from my mouth, Protector of the Poor, but ——" He held out his shaking hand as befitted the bearer of good news who is entitled to a reward.

Holden hurried through the court-yard. A light burned in the upper room. His horse neighed in the gate-way, and he heard a shrill little wail that sent all the blood into the apple of his throat. It was a new voice, but it did not prove that Ameera was alive.

"Who is there?" he called up the narrow brick staircase.

There was a cry of delight from Ameera, and then the voice of the mother, tremulous with old age and pride—"We be two women and—the—man—thy—son."

On the threshold of the room Holden stepped on a naked dagger, that was laid there to avert ill-luck, and it broke at the hilt under his impatient heel.

"God is great!" cooed Ameera in the hall-light.

"Thou hast taken his misfortunes on thy head."

"Ay, but how is it with thee, life of my life? Old woman, how is it with her?"

"She has forgotten her sufferings for joy that the child is born. There is no harm; but speak softly," said the mother.

"It only needed thy presence to make me all well," said Ameera. "My king, thou hast been very long away. What gifts hast for me? Ah, ah! It is I that bring gifts this time. Look, my life, look. Was there ever such a babe? Nay, I am too weak even to clear my arm from him."

"Rest then, and do not talk. I am here, *bachari* (little woman)."

"Well said, for there is a bond and a heel-rope (*peecharee*) between us now that nothing can break. Look—canst thou see in this light? He is without spot or blemish. Never was such a man-child. *Ya iltah!* he shall be a pundit—no, a trooper of the Queen. And, my life, dost thou love me as well as ever, though I am faint and sick and worn? Answer truly."

"Vea. I love as I have loved, with all my soul. Lie still, and rest."

"Then do not go. Sit by my side here—so. Mother, the lord of this house needs a cushion. Bring it." There was an almost imperceptible movement on the part of the new life that lay in the hollow of Ameera's arm. "Aho!" she said, her voice breaking with love. "The babe is a champion from his birth. He is kicking me in the side with mighty kicks. Was there ever such a babe! And he is ours to us—thine and mine. Put thy hand on his head, but carefully, for he is very young, and men are unskilled in such matters."

Very cautiously Holden touched with the tips of his fingers the downy head.

"He is of the Faith," said Ameera; "for lying here in the night-watches I whispered the call to prayer and profession of faith into his ears. And it is most marvellous that he was born upon a Friday, as I was born. Be careful of him, my life, but he can almost grip with his hands."

Holden found one helpless little hand that closed feebly on his finger. And the clutch ran through

his limbs till it settled about his heart. Till then his sole thought had been for Ameera. He began to realize that there was some one else in the world, but he could not feel that it was a veritable son with a soul. He sat down to think, and Ameera dozed lightly.

"Get hence, *sahib*," said her mother under her breath. "It is not good that she should find you here on waking. She must be still."

"I go," said Holden submissively. "Here be rupees. See that my *baba* gets fat and find all that he needs."

The clink of the silver roused Ameera. "I am his mother, and no hireling," she said, weakly. "Shall I look to him more or less for sake of money? Mother, give it back. I have born my lord a son."

The deep sleep of weakness came upon her almost before the sentence was completed. Holden went down to the court-yard very softly with his heart at ease. Pir Khan, the old watchman, was chuckling with delight. "This house is now complete," he said, and without further comment thrust into Holden's hands the hilt of a sabre worn many years ago when he, Pir Khan, served the Queen in the police. The bleat of a tethered goat came from the well-kerb.

"There be two," said Pir Khan, "two goats of the best. I bought them, and they cost much money; and since there is no birth-party assembled their flesh will be all mine. Strike craftily, *sahib!* 'Tis an ill-balanced sabre at the best. Wait till they raise their heads from cropping the marigolds."

"And why?" said Holden, bewildered.

"For the birth-sacrifice. What else? Otherwise the child, being unguarded from fate, may die. The Protector of the Poor knows the fitting words to be said."

Holden had learned them once with little thought that he would ever speak them in earnest. The touch of the cold sabre-hilt in his palm turned suddenly to the clinging grip of the child up stairs—the child that was his own son—and a dread of loss filled him.

"Strike!" said Pir Khan. "Never life came into the world but life was paid for it. See, the goats have raised their heads. Now! With a drawing cut!"

Hardly knowing what he did, Holden cut twice as he muttered the Mohammedan prayer that runs:—"Almighty! In place of this my son I offer life for life, blood for blood, head for head, bone for bone, hair for hair, skin for skin." The waiting horse snorted and bounded in his pickets at the smell of the raw blood that spirted over Holden's riding-boots.

"Well smitten!" said Pir Khan, wiping the sabre. "A swordsmen was lost in thee. Go with a light heart, heaven-born. I am thy servant, and the servant of thy son. May the Presence live a thousand years, and . . . the flesh of the goats is all mine?" Pir Khan drew back richer by a mouth's pay. Holden swung himself into the saddle and rode off through the low-hanging wood-smoke of the evening. He was full of riotous exultation, alternating with a vast vague tenderness directed towards no particular object, that made him choke as he bent over the neck of his uneasy horse. "I never felt like this in my life," he thought. "I'll go to the club and pull myself together."

A game of pool was beginning, and the room was full of men. Holden entered, eager to get to the light and the company of his fellows, singing at the top of his voice.

In Baltimore a-walking, a lady I did meet!

"Did you?" said the club secretary from his corner. "Did she happen to tell you that your boots were wringing wet? Great Goodness, man, it's blood!"

"Bosh!" said Holden, picking his cue from the rack. "May I cut in! It's dew. I've been riding through high crops. My faith! my boots are in a mess though!"

And if it be a girl she shall wear a wedding ring,
And if it be a boy he shall grip with his king,
With his dirk, and his cap, and his little jacket blue,
He shall walk the quarter-deck!"

"Yellow on blue—green next player," said the marker monotonously.

"He shall walk the quarter-deck,—am I green, marker? He shall walk the quarter-deck,—eh! that's a bad shot—as his daddy used to do!"

"I don't see that you have anything to crow about," said a zealous junior civilian acidly. "The Government is not exactly pleased with your work when you relieved Sanders."

"Does that mean a wiggling from head-quarters?" said Holden with an abstracted smile. "I think I can stand it."

The talk beat up round the ever-fresh subject of each man's work, and steadied Holden till it was time to go to his dark empty bungalow, where his butler received him as one who knew all his affairs.

Holden remained awake for the greater part of the night, and his dreams were pleasant ones.

"How old is he now?"

"*Ya illah!* What a man's question! He is all but six weeks old; and on this night I go up to the house-top with thee, my life, to count the stars. For that is auspicious. And he was born on a Friday under the sign of the sun, and it has been told to me that he will outlive us both and get wealth. Can we wish for aught better, beloved?"

"There is nothing better. Let us go up to the roof, and thou shalt count the stars—but a few only, for the sky is heavy with cloud."

"The winter rains are late, and may be they come out of season. Come, before all the stars are hid, I have put on my richest jewels."

"Thou hast forgotten the best of all."

"*Al! Ours.* He comes also. He has never yet seen the skies."

Ameera climbed the narrow staircase that led to the flat roof. The child, placid and unwinking, lay in the hollow of her right arm, gorgeous in silver fringed muslin with a small skull-cap on his head. Ameera wore all that she valued most. The diamond nose-stud that takes the place of the Western patch in drawing attention to the curve of the nostril, the gold ornament in the centre of the forehead studded with tallow-drop emeralds and flawed rubies, the heavy cincture of beaten gold that was fastened round her neck by the softness of the pure metal, and the chinking curb-patterned silver anklets hanging low over the rosy ankle-bone. She was dressed in jade-green muslin as befitted a daughter of the Faith, and from shoulder to elbow and elbow to wrist ran bracelets of silver tied with floss silk, frail glass bangles slipped over the wrist in proof of the slenderness of the hand, and certain heavy gold bracelets that had no part in her country's ornaments but, since they were Holden's gift and fastened with a cunning European snap, delighted her immensely.

They sat down by the low white parapet of the roof, overlooking the city and its lights.

"They are happy down there," said Ameera.

"But I do not think that they are as happy as we. Nor do I think the white *mem-log* are as happy. And thou?"

"I know they are not."

"How dost thou know?"

"They give their children over to the nurses."

"I have never seen that," said Ameera with a sigh, "nor do I wish to see. *Al! P!*—she dropped her head on Holden's shoulder,—"I have counted forty stars, and I am tired. Look at the child, love of life, he is counting too."

The baby was staring with round eyes at the ark of the heavens. Ameera had placed him in Holden's arms, and he lay there without a cry.

What shall we call him among ourselves?"

id. "Look! Art thou ever tired of looking!"

ies thy very eyes. But the mouth—"

ne, most dear. Who should know better

as such a feeble mouth. Oh, so small! And

it holds my heart between its lips. Give him to me now. He has been too long away."

"Nay, let him lie; he has not yet begun to cry."

"When he cries thou wilt give him back—eh! What a man of mankind thou art. If he cried he were only the dearer to me. But, my life, what little name shall we give him?"

The small body lay close to Holden's heart. It was utterly helpless and very soft. He scarcely dared to breathe for fear of crushing it. The caged green parrot that is regarded as a sort of guardian spirit in most native households moved on its perch and fluttered a drowsy wing.

"There is the answer," said Holden. "Mian Mittu has spoken. He shall be thy Parrot. When he is ready he will talk mightily and run about. Mian Mittu is the parrot in thy—in the Mussulman tongue, is it not?"

"Why put me so far off?" said Ameera, fretfully. "Let it be like unto some English name—but not wholly. For he is mine."

"Then call him Tota, for that is likeliest English."

"Ay, Tota, and that is still the parrot. Forgive me, my lord, for a minute ago, but in truth he is too little to wear all the weight of Mian Mittu for name. He shall be Tota—our Tota to us. Hearest thou, oh, small one? Littlest, thou art Tota."

She touched the child's cheek, and he, waking, wailed, and it was necessary to return him to his mother, who soothed him with the wonderful rhyme of *Aré koto, Fa ré koto!* which says:—

Oh, crow! Go crow! Baby's sleeping sound,

And the wild plums grow in the jungle, only a penny a pound,

Only a penny a pound, *baba*. Only a penny a pound.

Reassured many times as to the price of those plums, Tota cuddled himself down to sleep. The two sleek, white well-bullocks in the court-yard were steadily chewing the cud of their evening meal; old Pir Khan squatted at the head of Holden's horse, his police sabre across his knees, pulling drowsily at a big water-pipe that croaked

like a bull-frog in a pond. Ameera's mother sat spinning in the lower verandah, and the wooden gate was shut and barred. The music of a marriage procession came to the roof above the gentle hum of the city, and a string of flying-foxes crossed the face of the low moon.

"I have prayed," said Ameera after a long pause, "I have prayed for two things. First, that I may die in thy stead if thy death is demanded, and in the second that I may die in the place of the child. I have prayed to the Prophet and to Beebe Miriam [the Virgin Mary]. Thinkest thou either will hear?"

"From thy lips who would not hear the lightest word?"

"I asked for straight talk, and thou hast given me sweet talk. Will my prayers be heard?"

"How can I say? God is very good."

"Of that I am not sure. Listen now. When I die, or the child dies, what is thy fate? Living thou wilt return to the bold white *mem-log*, for kind calls to kind."

"Not always."

"With a woman, no; with a man it is otherwise. Thou wilt in this life, later on, go back to thine own folk. That I could almost endure, for I should be dead. But in thy very death thou wilt be taken away to a strange place and a paradise that I do not know."

"Will it be paradise?"

"Surely, for who would harm thee? But we two—I and the child—shall be elsewhere, and we cannot come to thee, nor canst thou come to us. In the old days before the child was born, I did not think of these things; but now I think of them always. It is very hard talk."

"It will fall as it will fall. To-morrow we do not know, but to-day and love we know well. Surely we are happy now."

"So happy that it were well to make our happiness assured. And thy Beebe Miriam should listen to me; for she is also a woman. But then she would envy me! It is not seemly for men to worship a woman!"

Holden laughed aloud at Ameera's little spasm of jealousy.

"It is not seemly? Why didst thou not turn me from worship of thee, then?"

"Thou a worshipper! And of me! My king, for all thy sweet words, well I know that I am thy servant and thy slave, and the dust under thy feet. And I would not have it otherwise. See!"

Before Holden could prevent her she stooped forward and touched his feet; recovering herself with a little laugh she hugged Tota closer to her bosom. Then, almost savagely—

"Is it true that the bold white *mem-log* live for three times the length of my life? Is it true that they make their marriages not before they are old women?"

"They marry as do others—when they are women."

"That I know, but they wed when they are twenty-five. Is that true?"

"That is true."

"*Ya illah!* At twenty-five! Who would of his own will take a wife even of eighteen? She is a woman—aging every hour. Twenty-five! I shall be an old woman at that age, and—those *mem-log* remain young for ever. How I hate them!"

"What have they to do with us?"

"I cannot tell. I know only that there may now be alive on this earth a woman ten years older than I who may come to thee and take thy love ten years after I am an old woman, grey-headed, and the nurse of Tota's son. That is unjust and evil. They should die too."

"Now, for all thy years thou art a child, and should be picked up and carried down the staircase."

"Tota! Have a care of Tota, my lord! Thou at least art as foolish as any babe!" Ameera tucked Tota out of harm's way in the hollow of her neck, and was carried down stairs laughing in Holden's arms, while Tota opened his eyes and smiled after the manner of the lesser angels.

He was a silent infant, and, almost before Holden could realise that he was in the world, developed into a small gold-coloured little god and unquestioned despot of the house overlooking the city. Those were months of absolute happiness to Holden and Ameera—happiness withdrawn from the world, shut in behind the wooden gate that Pir Khan guarded. By day Holden did his work with an immense pity for such as were not so fortunate as himself, and a sympathy for small children that amazed and amused many mothers at the little station gatherings. At nightfall he returned to Ameera—Ameera full of the wondrous doings of Tota, how he had been seen to clap his hands together and move his fingers with intention and purpose—which was manifestly a miracle—how later, he had of his own initiative crawled out of

his low bedstead on to the floor and swayed on both feet for the space of three breaths.

"And they were long breaths, for my heart stood still with delight," said Ameera.

Then he took the beasts into his councils—the well-bullocks, the little grey squirrels, the mongoose that lived in a hole near the well, and especially Mian Mittu, the parrot, whose tail he grievously pulled, and Mian Mittu screamed till Ameera and Holden arrived.

"Oh, villain! Child of strength! This to thy brother on the house-top! *Tobah, tobah!* Fie! Fie! But I know a charm to make him wise as Suleiman and Aflatoun [Solomon and Plato]. Now look," said Ameera. She drew from an embroidered bag a handful of almonds. "See! we count seven. In the name of God!"

She placed Mian Mittu, very angry and ruffled, on the top of his cage, and seating herself between the babe and the bird she cracked and peeled an almond less white than her teeth.

"This is a true charm, my life, and do not laugh. See! I give the parrot one half and Tota the other." Mian Mittu with careful beak took his share from between Ameera's lips, and she kissed the other half into the mouth of the child, who ate it slowly with wondering eyes. "This I will do each day of seven, and without doubt he who is ours will be a bold speaker and wise. Eh, Tota, what wilt thou be when thou art a man and I am grey-headed?" Tota tucked his fat legs into adorable creases. He could crawl, but he was not going to waste the spring of his youth in idle speech. He wanted Mian Mittu's tail to tweak.

When he was advanced to the dignity of a silver belt—which, with a magic-square engraved on silver and hung round his neck made up the greater part of his clothing—he staggered on a perilous journey down the garden to Pir Khan and proffered him all his jewels in exchange for one little ride on Holden's horse, having seen his mother's mother chaffering with pedlars in the verandah. Pir Khan wept and set the untired feet on his own grey head in sign of fealty, and brought the bold adventurer to the mother's arms, vowing that Tota would be a leader of men ere his beard was grown.

One hot evening while he sat on the roof between his father and mother watching the never-ending warfare of the kites that the city boys flew, he demanded a kite of his own with Pir Khan to fly it, because he had fear of dealing with anything larger than himself, and when Holden called him a "spark," he rose to his feet and answered slowly in defence of his new-found individuality: "*Hum-park nahin hai. Hom admi hai.* (I am no spark, but a man.)"

The protest made Holden choke and devote himself very seriously to a consideration of Tota's future. He need hardly have taken the trouble. The delight of that life was too perfect to endure. Therefore it was taken away as many things are taken away in India—suddenly and without warning.

The little lord of the house, as Pir Khan called him, grew sorrowful and complained of pains, he who had never known the meaning of pain. Ameera, wild with terror, watched him through the night, and in the dawning of the second day the life was shaken out of him by fever—the seasonal autumn fever. It seemed altogether impossible that he could die, and neither Ameera or Holden at first believed the evidence of the little body on the bedstead. Then Ameera beat her head against the wall, and would have flung herself down the well in the garden had Holden not restrained her by main force.

One mercy only was granted to Holden. He rode to his office in broad daylight and found waiting him an unusually heavy mail that demanded concentrated attention and hard work. He was not, however, alive to this kindness of the gods.

The first shock of the bullet is no more than a brisk pinch. The wrecked body does not send in its protest to the soul till ten or fifteen seconds later. Holden realized his pain slowly, exactly as he had realized his happiness, and with the same impetuous necessity for hiding all trace of it. In the beginning he only felt that there had been a loss, and that Ameera needed comforting, where she sat with her head on her knees shivering as Mian Mittu from the house-top called *Tota! Tota! Tota!* Later all his world and the daily life of it rose up to hurt him. It was an outrage that any one of the children at the bandstand in the evening should be alive and clamorous, when his own child lay dead. It was more than mere pain, when one of them touched him, and stories told by over-fond fathers of their children's latest performances cut him to the quick. He could not declare his pain. He had neither help, comfort, nor sympathy; and Ameera at the end of each weary day would lead him through the hell of self-questioning reproach which is reserved for those who have lost a child, and believe that with a little—just a little more

care—it might have been saved. "Perhaps," Ameera would say, "I did not take sufficient heed. Did I, or did I not? The sun on the roof that day when he played so long alone and I was—*ah!*! braiding my hair—it may be that the sun then bred the fever. If I had warned him from the sun he might have lived. But, oh my life, say that I am guiltless! Thou knowest that I loved him as I love thee. Say that there is no blame on me, or I shall die—I shall die!"

"There is no blame,—before God, none. It was written and how could we do aught to save? What has been, has been. Let it go, beloved."

"He was all my heart to me. How can I let the thought go, when my arm tells me every night that he is not here? *Ah! Ah!* Oh, Tota, come back to me—come back again, and let us be all together as it was before!"

"Peace, peace! For thine own sake, and for mine also, if thou lovest me—rest."

"By this I know thou dost not care; and how shouldst thou? The white men have hearts of stone and souls of iron. Oh that I had married a man of mine own people—though he beat me, and had never eaten the bread of an alien!"

"Am I an alien—mother of my son!"

"What else—*sahib*? . . . Oh forgive me—forgive! The death has driven me mad. Thou art the life of my heart, and the light of my eyes, and the breath of my life, and—and I have put thee from me, though it was but for a moment. If thou goest away to whom shall I look for help? Do not be angry. Indeed, it was the pain that spoke and not thy slave."

"I know, I know. We be two who were three. The greater need therefore that we should be one."

They were sitting on the roof as of custom. The night was a warm one in early spring, and sheet-lightning was dancing on the horizon to a broken tune played by far-off thunder. Ameera settled herself in Holden's arms.

"The dry earth is lowing like a cow for the rain, and I—I am afraid. It was not like this when we counted the stars. But thou lovest me as much as before, though a bond is taken away? Answer!"

"I love more because a new bond has come out of the sorrow that we have eaten together, and that thou knowest."

"Yes, I know," said Ameera in a very small whisper. "But it is good to hear thee say so, my life, who art so strong to help. I will be a child no more, but a woman and an aid to thee. Listen! Give me my *sitar* and I will sing bravely."

She took the light silver-studded *sitar* and began a song of the great hero Rajal Rasalu. The hand failed on the strings, the tune halted, checked, and at a low note turned off to the poor little nurse-rhyme about the wicked crow:—

And the wild plums grow in the jungle,
only a penny a pound,
Only a penny a pound, *baba*—only . . .

Then came the tears, and the piteous rebellion against fate till she slept, moaning a little in her sleep with the right arm thrown clear of the body as though it protected something that was not there. It was after this night that life became a little easier for Holden. The ever-present pain of loss drove him into his work, and the work repaid him by filling up his mind for eight or nine hours a day. Ameera sat alone in the house and brooded but grew happier when she understood that Holden was more at ease, according to the custom of women. They touched happiness again, but this time with caution.

"It was because we loved Tota that he died. The jealousy of God was upon us," said Ameera. "I have hung up a large black jar before our window to turn the evil eye from us, and we must make no protestations of delight but go softly underneath the stars, lest God find us out. Is that not good talk, worthless one?"

She had shifted the accent on the word that means "beloved," in proof of the sincerity of her purpose. But the kiss that followed the new christening was a thing that any deity might have envied. They went about henceforward saying, "It is naught, it is naught;" and hoping that all the Powers heard.

The Powers were busy on other things. They had allowed thirty million people four years of plenty wherein men fed well and the crops were certain and the birthrate rose year by year: the districts reported a purely agricultural population varying from nine hundred to two thousand to the square mile of the overburdened earth; and the Member for Lower Tooting, wandering about India in top-hat and frock coat, talked largely of the benefits of British rule, and suggested as the one thing needful the establishment of a duly qualified electoral system and a general bestowal of the franchise. His long-suffering hosts smiled and made him welcome, and when he paused to admire, with pretty picked words, the blossom of the blood-red *dhak* tree that had flowered untimely

for a sign of what was coming, they smiled more than ever.

It was the Deputy Commissioner of Kot-Kumharsen, staying at the club for a day, who lightly told a tale that made Holden's blood run cold as he overheard the end.

"He won't bother any one any more. Never saw a man so astonished in 'life. By Jove, I thought he meant to ask a question in the House about it. Fellow-passenger in this ship—dined next him—bowed over by cholera and died in eighteen hours. You needn't laugh, you fellows. The Member for Lower Tooting is awfully angry about it; but he's more scared. I think he's going to take his enlightened self out of India."

"I'd give a good deal if he were knocked over. It might keep a few vestry-men of his kidney to their own parish. But what's this about cholera? It's full early for anything of that kind," said a warden of an unprofitable salt-lick.

"Don't know," said the Deputy Commissioner reflectively. "We've got locusts with us. There's sporadic cholera all along the north—at least we're calling it sporadic for decency's sake. The spring crops are short in five districts, and nobody seems to know where the rains are. It's nearly March now. I don't want to scare anybody, but it seems to me that Nature's going to audit her accounts with a big red pencil this summer."

"Just when I wanted to take leave, too!" said a voice across the room.

"There won't be much leave this year, but there ought to be a great deal of promotion. I've come in to persuade the Government to put my pet canal on the list of famine relief-works. Its an ill-wind that blows no one good. I shall get that canal finished at last."

"It is the old programme then," said Holden; "famine, fever, and cholera?"

"Oh, no. Only local scarcity and unusual sickness. You'll find it all in the reports if you five till next year. You're a lucky chap. You haven't got a wife to put out of harm's way. The hill stations ought to be full of women this year."

"I think you're inclined to exaggerate the talk in the *bazaars*," said a young civilian in the Secretariat. "Now I have observed—"

"I dare say you have," said the Deputy Commissioner, "but you've a great deal more to observe, my son. In the meantime, I wish to observe to you—" and he drew him aside to discuss the construction of the canal that was so dear to his heart. Holden went to his bungalow and began to understand that he was not alone in the world, and also that he was afraid for the sake of another,—which is the most soul-satisfying fear known to man.

Two months later, as the Deputy had foretold, Nature began to audit her accounts with a red pencil. On the heels of the spring reapings came a cry for bread, and the Government, which had decreed that no man should die of want, sent wheat. Then came the cholera from all four quarters of the compass. It struck a pilgrim-gathering of half a million at a sacred shrine. Many died at the feet of their god; the others broke and ran over the face of the land carrying the pestilence with them. It smote a walled city and killed two hundred a day. The people crowded the trains, hanging on to the footboards and squatting on the roofs of the carriages, and the cholera followed them, for at each station they dragged out the dead and the dying. They died by the roadside, and the horses of the Englishmen shied at the corpses in the grass. The rains did not come, and the earth turned to iron lest man should escape death by hiding in her. The English sent their wives away to the hills and went about their work, coming forward as they were bidden to fill the gaps in the fighting line. Holden, sick with fear of losing his chiefest treasure on earth, had done his best to persuade Ameera to go away with her mother to the Himalayas.

"Why should I go?" said she, one evening on the roof.

"There is sickness, and people are dying, and all the white *mem-log* have gone."

"All of them?"

"All—unless perhaps there remain some old scald-head who vexes her husband's heart by running risk of death."

"Nay; who stays is my sister, and thou must not abuse her, for I will be a scald-head too. I am glad all the bold *mem-log* are gone."

"Do I speak to a woman or a babe? Go to the hills and I will see to it that thou goes like a queen's daughter. Think, child. In a red-lacquered bullock cart, veiled and curtained, with brass peacocks upon the pole and red cloth hangings. I will send two orderlies for guard and—"

"Peace! Thou art the babe in speaking thus. What use are those toys to me? He would have patted the bullocks and played with the housings. For his sake, perhaps,—thou hast made me very

English.—I might have gone. Now, I will not. Let the *mem-log* run."

"Their husbands are sending them, beloved."

"Very good talk. Since when hast thou been my husband to tell me what to do? I have but born thee a son. Thou art only all the desire of my soul to me. How shall I depart when I know that if evil befall thee by the breadth of so much as my littlest finger nail—is that not small?—I should be aware of it though I were in paradise. And here, this summer thou mayst die—*ai, jannee*, die! and in dying they might call to tend thee a white woman, and she would rob me in the last of thy love!"

"But love is not born in a moment or a death-bed!"

"What dost thou know of love, stone-heart? She would take thy thanks at least and, by God and the Prophet and Beebe Miriam the mother of thy Prophet, that I will never endure. My lord and my love, let there be no more foolish talk of going away. Where thou art, I am. It is enough." She put an arm round his neck and a hand on his mouth.

There are not many happinesses so complete as those that are snatched under the shadow of the sword. They sat together and laughed, calling each other openly by every pet name that could move the wrath of the gods. The city below them was locked up in its own tortments. Sulphur fires blazed the streets; the conches in the Hindu temples screamed and belled, for the gods were inattentive in these days. There was a service in the great Mahomedan shrine, and the call to prayer from the minarets was almost unceasing. They heard the wailing in the houses of the dead, and once the shrieks of a mother who had lost a child and was calling for its return. In the grey dawn they saw the dead borne out through the city gates, each litter with its own little knot of mourners. Wherefore they kissed each other and shivered.

It was a red and heavy audit, for the land was very sick and needed a little breathing-space ere the torrent of cheap life should flood it anew. The children of immature fathers and undeveloped mothers made no resistance. They were cowed and sat still, waiting till the sword should be sheathed in November, if it were so willed. There were gaps among the English, but the gaps were filled. The work of superintending famine-relief, cholera-sheds, medicine-distribution, and what little sanitation was possible went forward because it was so ordered.

Holden had been told to keep himself in readiness to move to replace the next man who should fall. There were twelve hours in each day when he could not see Ameera, and she might die in three. He was considering what his pain would be if he could not see her for three months, or if she died out of his sight. He was absolutely certain that her death would be demanded—so certain that when he looked up from the telegram and saw Pir Khan breathless in the doorway, he laughed aloud. "And?" said he—

"When there is a cry in the night and the spirit flutters into the throat, who has a charm that will restore? Come swiftly,—heaven-born. It is the black cholera."

Holden galloped to his home. The sky was heavy with clouds, for the long deferred rains were near and the heat was stifling. Ameera's mother met him in the court-yard, whimpering. "She is dying. She is nursing herself into death. She is all but dead. What shall I do, *sahib*?"

Ameera was lying in the room in which Tota had been born. She made no sign when Holden entered, because the human soul is a very lonely thing and, when it is getting ready to go away, hides itself in a misty border-land where the living may not follow. The black cholera does its work quietly and without explanation. Ameera was being thrust out of life as though the Angel of Death had himself put his hand upon her. The quick breathing seemed to show that she was neither afraid nor in pain, but neither eyes nor mouth gave any answer to Holden's kisses. There was nothing to be said or done. Holden could only wait and suffer. The first drops of the rain began to fall on the roof, and he could hear shouts of joy in the parched city.

The soul came back a little and the lips moved. Holden bent down to listen. "Keep nothing of mine," said Ameera. "Take no hair from my head. She would make thee burn it later on. That flame I should feel. Lower! Stoop lower! Remember only that I was thine and bore thee a son. Though thou wed a white woman to-morrow, the pleasure of receiving in thy arms thy first son is taken from thee for ever. Remember me when thy son is born—the one that shall carry thy name before all men. His misfortunes be on my head. I bear witness—I bear witness"—the lips were

forming the words on his ear—"that there is no God but—there, beloved!"

Then she died. Holden sat still, and all thought was taken from him,—till he heard Ameera's mother lift the curtain.

"Is she dead, *sahib*?"

"She is dead."

"Then I will mourn, and afterwards take an inventory of the furniture in this house. For that will be mine. The *sahib* does not mean to resume it? It is so little, so very little, *sahib*, and I am an old woman. I would like to lie softly."

"For the mercy of God be silent a while. Go out and mourn where I cannot hear."

"*Sahib*, she will be buried in four hours."

"I know the custom. I shall go ere she is taken away. That matter is in thy hands. Look to it, that the head on which—on which she lies—"

"Aha! That beautiful red lacquered bed. I have long desired—"

"That the bed is left here untouched for my disposal. All else in the house is thine. Hire a cart, take everything, go hence, and before sunrise let there be nothing in this house but that which I have ordered thee to respect."

"I am an old woman. I would stay at least for the days of mourning, and the rains have just broken. Whither shall I go?"

"What is that to me? My order is that there is a going. The house-gear is worth a thousand rupees and my orderly shall bring thee a hundred rupees to-night."

"That is very little. Think of the cart hire."

"It shall be nothing unless thou gnest, and with speed. O woman, get hence and leave me to my death."

The mother shuffled down the staircase, and in her anxiety to take stock of the house-fittings forgot to mourn. Holden stayed by Ameera's side, and the rain roared on the roof. He could not think connectedly by reason of the noise, though he made many attempts to do so. Then four sheeted ghosts glided dripping into the room and stared at him through their veils. They were the washers of the dead. Holden left the room and went out to his horse. He had come in a dead, stifling calm through ankle deep dust. He found the courtyard a rain-lashed pond alive with frogs; a torrent of yellow water ran under the gate, and a roaring wind drove the bolts of the rain like buck-shot against the mud walls. Pir Khan was shivering in his little hut by the gate, and the horse was stamping uneasily in the water.

"I have been told the *sahib's* order," said Pir Khan. "It is well. This house is now desolate. I go also, for my monkey-face would be a reminder of that which has been. Concerning the bed, I will bring that to thy house yonder in the morning; but remember, *sahib*, it will be to thee a knife turned in a green wound. I go upon a pilgrimage, and I will take no money. I have grown fat in the protection of the Presence whose sorrow is my sorrow. For the last time I hold his stirrup."

He touched Holden's foot with both hands and the horse sprang out into the road where the creaking bamboos were whipping the sky and all the frogs were clucking. Holden could not see for the rain in his face. He put his hands before his eyes and muttered:—

"Oh, you brute! You utter brute!"

The news of his trouble was already in his bungalow. He read the knowledge in his butler's eyes when Ahmed Khan brought in food, and for the first and last time in his life laid a hand upon his master's shoulder, saying "Eat, *sahib*, eat. Meat is good against sorrow. I also have known. Moreover the shadows come and go, *sahib*; the shadows come and go. Those be curried eggs."

Holden could neither eat nor sleep. The heavens sent down eight inches of rain in that night and washed the earth clean. The waters tore down walls, broke roads, and scoured open the shallow graves on the Mohammedan burying-ground. All next day it rained, and Holden sat in his house considering his sorrow. On the morning of the third day he received a telegram which said only: "Rickells, Myndonia. Dying. Holden relieve. Immediate." Then he thought that before he departed he would look at the house wherein he had been master and lord. There was a break in the weather, and the rank earth steamed with vapour.

He found that the rains had torn down the mud pillars of the gateway, and the heavy wooden gate that had guarded his life hung drunkenly from one hinge. There was grass three inches high in the courtyard; Pir Khan's lodge was empty, and the sudden thatch sagged between the beams. A gray squirrel was in possession of the verandah, as if the house had been untenanted for thirty years instead of three days. Ameera's mother had removed everything except some mildewed matting. The tick-tick of the little scorpions as they hurried across the floor was the only sound in the house.

Ameera's room and the other one where Tota had lived were heavy with mildew; and the narrow staircase leading to the roof was streaked and stained with rain-borne mud. Holden saw all these things, and came out again to meet in the road Durga Dass, his landlord,—portly, affable, clothed in white muslin, and driving a C-spring buggy. He was overlooking his property to see how the roofs stood the stress of the first rains.

"I have heard," said he, "you will not take this place any more, *sahib*?"

"What are you going to do with it?"

"Perhaps I shall let it again."

"Then I will keep it on while I am away."

Durga Dass was silent for some time. "You shall not take it on, *sahib*," he said. "When I was a young man I also—, but to-day I am a member of the Municipality. Ho! Ho! No. When the birds have gone what need to keep the nest? I will have it pulled down—the timber will sell for something always. It shall be pulled down, and the Municipality shall make a road across, as they desire, from the burning *ghaut* to the city wall, so that no man may say where this house stood."

LATEST TELEGRAMS.

[REUTER "SPECIAL" TO "JAPAN MAIL"]

London, July 18th.

The Behring Sea fishery dispute, which has been in an acute stage since May, has now culminated in the Marquis of Salisbury's informing America that if British subjects sealing in the Behring Sea are refused ordinary treatment according to the comity of nations, Britain herself will protect them. The Marquis of Salisbury adds that the Behring Sea is a common highway.

The Earl of Rosebery has resigned his position on the County Council.

London, July 20th.

The Imperial Government has resolved to increase the military contributions of both the Straits Settlements and Hongkong, and have under consideration the same course with regard to the Mauritius and Ceylon.

London, July 22nd.

Her Majesty's troopship *Tamar* embarks the 2nd Battalion of the Grenadier Guards to-day for two years' service abroad. All leave has been stopped. The destination of the Guards is unknown, but is believed to be the Cape, though rumour has it that they are proceeding to Bermuda.

[FROM THE "SINGAPORE FREE PRESS"]

London, July 2nd.

The Cabinet has abandoned the Tithes Bill.

London, July 3rd.

Mr. W. S. Caine, finding himself unable to support the Government as a Liberal Unionist, resigned his seat and sought re-election at Barrow as an Independent Liberal. He has, however, been supplanted by a Gladstonian.

The Gas Stokers of Leeds are on strike, and the city is in darkness. Serious disorder prevails, and the Gasworks are guarded by troops.

London, July 7th.

The London police have issued a notice warning shop-keepers and others to close early to-day, and to make their own arrangements to guard their premises, as the force go on strike to-night for certain.

Many constables were suspended yesterday for refusing duty.

London, July 5th.

The House of Lords has read a first time a bill for the cession of Heligoland.

The Leeds gas strike is settled.

London, July 8th.

The second battalion Grenadier Guards refused to answer the bugle-call for kit inspection, and locked themselves in their rooms. On the inspection being abandoned, the men fell in and hooted and hissed the remarks of the Colonel.

[FROM TONKIN PAPERS.]

Paris, July 5th.

The Senate has voted the duty on rice by a large majority. The law will be promulgated on Sunday.

NEW TIME-TABLES.

The following Time-Tables will come into operation on the 1st August, 1890, until further notice:—

NIKKO BRANCH LINE.—UTSUNOMIYA AND NIKKO.

Down Trains.	a.m.	a.m.	p.m.	p.m.
Utsunomiya	5.25	10.55	12.25	5.5
Togami	5.37	10.57	12.37	5.17
Kanuma	5.54	11.14	12.54	5.35
Fubasami	6.13	11.33	1.13	5.54
Imaichi	6.43	12.03	1.43	6.23
Nikko	7.00	12.40	2.00	6.40
Up Trains.	a.m.	a.m.	p.m.	p.m.
Nikko	7.20	11.55	2.25	6.55
Imaichi	7.38	12.13	2.43	7.13
Fubasami	8.05	12.41	3.11	7.41
Kanuma	8.25	1.01	3.31	8.01
Togami	8.42	1.18	3.48	8.18
Utsunomiya	8.53	1.30	4.00	8.28

N.B.—* Through Trains to and from Utsunomiya.

Through Tickets will be issued to the above stations from Tokyo (Utsunomiya and Oyama) by the trains leaving Utsunomiya at 6.40, 8.50, and 11.40 a.m., from Shinbashi, Shinagawa, and Shinjuku by the trains leaving at 8.10, 10.10, and 11 a.m.; and from Yokohama to Nikko by the trains leaving there at 7.20 and 10.22 a.m.

Through Tickets will also be issued from all stations on the Branch Line to Tokyo (Utsunomiya and Shinbashi) Shinagawa, Shinjuku, Oyama and Oyama; and from Nikko to Yokohama.

MITO LINE.—OYAMA AND MITO.

Down Trains.	a.m.	a.m.	p.m.	p.m.
Oyama	6.50	9.25	12.25	5.15
Yuki	7.40	9.39	1.34	5.20
Kawashima	7.12	9.59	1.57	5.37
Shimodate	7.24	9.59	2.04	5.49
Iwase	7.54	10.19	2.24	6.19
Fukuhara	8.09	10.44	2.39	6.34
Kasama	8.25	11.11	2.55	6.50
Shishido	8.39	11.11	3.09	7.11
Utsunomiya	8.50	11.25	3.18	7.15
Mito	9.13	11.48	3.40	7.38
Up Trains.	a.m.	a.m.	p.m.	p.m.
Utsunomiya	6.25	10.10	2.55	6.55
Shishido	6.49	10.34	3.29	7.19
Kasama	7.12	10.48	3.43	7.33
Fukuhara	7.26	11.15	3.54	7.44
Iwase	7.30	11.15	4.00	7.58
Shimodate	7.49	11.34	4.29	8.17
Kawashima	8.17	12.04	4.59	8.43
Yuki	8.30	12.14	5.00	8.55
Oyama	8.37	12.22	5.07	9.03

Through Tickets will be issued from Shinbashi and Shinagawa by the trains leaving Shinbashi at 11 a.m. and 1.50 p.m., leaving Utsunomiya at 6.40, 8.50 a.m. and 1.40 p.m., and from Utsunomiya by the train leaving there at 4.15 p.m.

Through Tickets will also be issued from all stations except Fukuhara and Utsunomiya on the Mito line to Utsunomiya, Shinagawa, Oyama, Kuki, Kuribashi, Koga, and Utsunomiya.

Until further notice, trains will not stop at Fukuhara Station.

TIME TABLES AND STEAMERS.

TOKYO-YOKOHAMA RAILWAY.

DOWN TRAINS LEAVE SHIMBASHI Station at 6.05,* 6.40, 8.35, 9.30,* 10.25, and 11.45 a.m., and 1.25, 2.30, 3.55, 4.45, 5.50, 6.50, 8.30, 9.55, and 11.15 p.m.

UP TRAINS LEAVE YOKOHAMA Station at 6.30, 7.20, 8.10, 9.15, 10.22, and 11.30 a.m., and 12.45, 2.30, 4.25, 5.30, 6.35, 7.50, 9.10, 10.05, and 11.05 p.m.

FARES—First-class, *sen* 60; second-class, *sen* 40 and third-class, *sen* 20.

Trains marked (*) run through without stopping at Omori, Kawasaki, and Kanagawa Stations. Those marked (†) run through without stopping at Omori, Kawasaki, and Tsu-rumi Stations.

TOKAIDO RAILWAY.

TRAINS LEAVE YOKOHAMA (down) at 6.50, 9.10, 10.20, 11.25 a.m., and 12.40, 3.25, 4.55, 5.35, and 7.45 p.m.; and Kozu (up) at 6.35, 8.40, 9.40, and 11.07 a.m., and 1.17, 2.45, 4.58, 7.25, and 9.46 p.m.

FARES—To Hologaya, first-class *sen* 6, second-class *sen* 4, third-class *sen* 2; to Tototsuka, *sen* 18, *sen* 12, *sen* 6; to Ofuna *sen* 36, *sen* 24, *sen* 12; to Fujisawa, *sen* 42, *sen* 24, *sen* 14; to Hiratsuka, *sen* 60, *sen* 44, *sen* 22; to Oiwa, *sen* 75, *sen* 50, *sen* 25; and to Kozu, *sen* 93, *sen* 62, *sen* 31.

Down trains at 6.50 a.m. run no further than Kyoto arriving there at 11.50 p.m.; at 10.20 a.m. no further than Nagoya, arriving at 10.10 p.m.; at 12.40 p.m. no further than Shizuoka, arriving there at 6.50 p.m.; at 3.25 p.m. no further than Shizuoka, arriving at 8.48 p.m.; and the train at 5.35 p.m. runs to Kobe, arriving at 12.45 p.m. next day.

A tramway runs between Kozu and Yumoto (distance 4 ri. Jinriksha may be hired between Yumoto and MIYANOSHITA distance 12 ri).

SHINJIKU-HACHIOJI RAILWAY.

TRAINS LEAVE SHINJIKU, TOKYO, (down) at 6.55 and 9.55 a.m. and 12.52, 4, and 7 p.m.; and HACHIOJI (up) at 5.25, 8.25, and 11.25 a.m. and 2.20 and 5.30 p.m.

FARES—First-class *sen* 90; second-class *sen* 60; third-class *sen* 30.

TOKYO-MAEBASHI RAILWAY.

TRAINS LEAVE TOKYO (Ueno) (down) at 6.40, 8.50, and 11.40 a.m., and 2.40 and 5.40 p.m.; and MAEBASHI (up) at 6.55, and 11.50 a.m., and 2.50 and 5.50 p.m.

YOKOSUKA STEAMERS.

STEAMERS LEAVE THE NIPPON HATABA daily at 7.55 and 10.30 a.m., and 1.45 and 4.00 p.m.; and LEAVE YOKOSUKA at 7.10 and 10.30 a.m., and 1.30, and 4.00 p.m.—Fare, *sen* 20.

MAIL STEAMERS.

THE NEXT MAIL IS DUE

From Shanghai, Nagasaki, & Kobe	per N. Y. K.	Friday, Aug. 1st.
From Hongkong	per P. M. Co.	Saturday, July 26th.
From America	per U. & O. Co.	Thursday Aug. 7th.

A City of Peking left Kobe on July 25th. A Galic left San Francisco on July 19th. The English mail is on board the steamer Parthia.

THE NEXT MAIL LEAVES

For Canada, &c.	per C. P. M. Co.	Sunday, July 17th.
For America	per P. M. Co.	Tuesday, July 19th.
For Shanghai, Kobe, and Nagasaki	per N. Y. K.	Tuesday, July 29th.
For Europe, via Shanghai	per M. M. Co.	Sunday, Aug. 3rd.
For America	per U. & O. Co.	Saturday, Aug. 9th.
For Europe, via Hongkong	per N. D. Lloyd.	Sunday, Aug. 17th.

Marquet, Frank Favre, Y. S. Matsudaira, Frank McCarthy, T. Kawaguchi, and John Powers in cabin. For Hongkong: Mr. and Mrs. R. Wildman and Mr. Chas. L. Smith in cabin.
 Per British steamer **Abyssinia**, from Hongkong via ports:—Mr. and Mrs. Warren and 2 children, Captain and Mrs. Lambeth, Miss Cushman, Miss Oakland, Messrs. A. J. How, C. A. Pullan, F. A. Burchard, Carle Gattil, and Geo. Taylor, in cabin; Captain and Mrs. Tiddy and 2 children, and 5 Chinese in second class, and 110 Chinese in steerage.
 DEPARTED.
 Per French steamer **Melbourne**, for Shanghai via Kobe:—Messrs. V. M. Koreylin, T. A. Singleton, A. H. Bradley, Harry O. Phillips, M. H. Robertson, Jas. Raymond, G. W. Cottan, K. Naka, H. Golstein, Mrs. C. W. Dassing, Messrs. J. Darbier, M. Legendre, and Major H. P. Knight in cabin.
 Per German steamer **General Werder**, for Hongkong via Kobe:—Mr. and Mrs. Munch, Mr. Fugar Orth, Mr. E. Voigt, Masters Braess (3), Mr. Carl Schmitz, Master van der Heyde, Mr. Joh. Christiansen, and Mr. Ah Tung in cabin; 10 Chinese in steerage.
 Per Japanese steamer **Yokohama Maru**, for

Shanghai and ports:—Mrs. A. Thomsen, Mrs. R. Raymond, The Misses Palmer (2), Miss Steadman, Mr. and Mrs. Burton, Major-General Palmer, R.E., Messrs. Yamashita, Okuyama, Matsuo, and W. Smith in cabin; Miss Palmer's maid, Messrs. Sawa and Yokota in second class, and 107 passengers in steerage.

Per British steamer **Verona**, for Hongkong via ports:—Mrs. Scott, Rev. Rainer, Rev. A. Chapell and Mrs. Chapell, Rev. A. Magnolis, Lieutenant R. C. Fees, Messrs. J. R. Scott, S. Williams, Wo Show Yen, and Wo Cheong Show in cabin; 6 Chinese in steerage.

CARGOES.

Per French steamer **Melbourne**, for Shanghai via Kobe:—Silk for France 17 bales. Waste Silk for France 19 bales.

Per British steamer **Verona**, for Hongkong via ports:—Silk for France 48 bales.

REPORTS.

The Japanese steamer **Yokohama Maru**, Captain Swain, reports:—Left Shanghai the 12th July at 7 a.m.; had fine pleasant weather. Arrived at Nagasaki the 14th at 1 a.m. and left at 7-45 p.m. Arrived at Shimonoseki the 15th at 9 a.m. and left at 10 a.m. Arrived at Kobe the 16th at 11 a.m. and left the 17th at 0.30 p.m.; had fine weather throughout the voyage. Arrived at Yokohama the 18th July at 7.20 p.m.

The German steamer **General Werder**, Captain Eichel, reports:—Left Hongkong the 13th July at 5.15 p.m.; had the first 2 days light southerly winds with smooth sea; thence to the Japanese coast strong S.E. and easterly winds with rough sea; the last days fine weather and smooth sea. Arrived at Yokohama the 19th July at 8.50 a.m.

The Japanese steamer **Yamashiro Maru**, Captain Young, reports:—Left Kobe the 21st July at noon; had moderate to light W.S.W. winds and fine weather throughout to Vries Island at 1 p.m. on the 22nd whence light southerly breeze to Kannon-saki at 4 p.m.; thence to port calm and variable airs. Arrived at Yokohama at 5 p.m., passed American ship J T G S off Kannon-saki.

The Japanese steamer **Omi Maru**, Captain Christensen, reports:—Left Hakodate the 21st July at 5.15 a.m.; had moderate to fresh southerly and S.W. winds with unsettled weather and low barometer to Kinkasan; thence light westerly winds and fine clear weather to port; a high southerly swell from Yamada head to Inuboye. Arrived at Yokohama the 23rd July at 5.15 a.m.

The Japanese steamer **Nagato Maru**, Captain Ekstrand, reports:—Left Kobe the 23rd July at noon; had light breeze and fine weather, south of Cape Itsye passed an American ship in ballast beating up. On the 24th at 9.30 a.m. passed American ship **Burgess** and **Snow** off Omai-saki beating up to Yokohama; had fine weather with smooth sea during passage. Arrived at Yokohama at 5 p.m.

The Japanese steamer **Saikio Maru**, Captain Conner, reports:—Left Shanghai the 19th July at 0.30 p.m.; had fine weather throughout the passage. Arrived at Nagasaki the 21st at 5 a.m. and left at 5 p.m.; had fine weather throughout the passage. Arrived at Shimonoseki the 22nd at 6.15 a.m. and left at 7.10 a.m. Arrived at Kobe the 23rd at 5 a.m. and left the 24th at noon; had light variable winds and fine weather to Rock Island; thence moderate N.E. winds and rain to port. Arrived at Yokohama the 25th July at 9.15 p.m. Quarantined 4 hours at Naga-ura; saw 2 sailing ships outside bound in.

The American steamer **City of Rio de Janeiro**, Captain Austin, reports:—Left San Francisco the 8th July at 4.20 p.m.; had fine weather with light westerly winds most of the passage. Arrived at Yokohama the 26th July at 1.09 a.m. Passage, 16 days, 15 hours, and 21 minutes.

The British steamer **Abyssinia**, Captain Lee, reports:—Left Hongkong the 16th July, Shanghai the 31st, Kobe via Inland Sea the 25th. Arrived at Yokohama the 26th 7 a.m.; detained 1 hour at Quarantine Station. Time from Kobe 26 hours. From Kobe to Oosima variable winds and fine weather, thence to port moderate E.N.E. winds and cloudy weather, smooth sea throughout the passage.

LATEST COMMERCIAL.

IMPORTS.

The demand for Yarn has entirely ceased during the week; the business done in English Spinnings has been very small, and in Bomblays not a sale has been reported. Shirts and T. Cloths are equally neglected. Velvets have had considerable attention, but are weaker at the close. Italians have also been inquired for, but no business has been reported, although there is every reason to

CONTRACTORS TO THE ADMIRALTY, LEADING STEAMSHIP COMPANIES, AND YACHT OWNERS.

STEAM LAUNCHES & YACHTS,

Fitted with KINGDON'S PATENT MACHINERY (of which we are sole makers) are for superior to any others. The chief advantages are:—

1. Wonderful Economy of Fuel.
2. First-class Workmanship.
3. Moderate Prices.
4. Greatest obtainable power for weight and space occupied.
5. Quickness in raising steam.
6. High rates of speed guaranteed.
7. Absence of noise and vibration.

We build Steam Launches of every description, from the smallest size suitable for carrying on yachts of 10 tons and upwards. We also build small light Draft Paddle Boats, Tugs, Stern Wheel Paddle Steamers, and Boats in Frames, &c., &c. We supply sets of Machinery separately. Illustrated Catalogue in English, French or Spanish. Send for Copy to

SIMPSON, STRICKLAND & CO.

WORKS:
BARTMOUTH, SOUTH DEVON (ENGLAND).

LONDON OFFICE:
181, QUEEN VICTORIA STREET, E.C.

MACHINERY.—Mr. ARTHUR WADHAM, proprietor of *The Machinery Market and Exporter* (illustrated)—the greatest machinery business journal published—(subscription 12s. 6d. per annum post free); London Agent of Messrs. Simpson, Strickland & Co., steam-launch builders, is also a large exporter of Machinery and Engineering Materials. Mr. Wadham is open to act as sole Buying Agent in England for one or two good firms in Japan desiring to deal with a reliable house. Mr. Wadham's intimate knowledge of the English Machinery and Engineering Trades enables him to save large sums to foreign customers placing their orders in his hands. Firms dealing with Mr. Wadham may rely upon being served in a prompt and straightforward manner. Address:—Mr. Arthur Wadham, Engineering Offices:—181, Queen Victoria St., London. Registered address for telegrams—"Wadham, London." June 28, 1890.

THE GREATEST WONDER OF MODERN TIMES. HOLLOWAY'S PILLS.

PERSONS suffering from weak or debilitated constitutions will discover that by the use of this wonderful medicine there is "Health for all." The blood is the fountain of life, and its purity can be maintained by the use of these Pills.

SIR SAMUEL BAKER, in his work entitled "The Nile Tributaries in Abyssinia," says—"I ordered the druggist Mahomet to inform the Fakir that I was a Doctor, and I had the best medicines at the service of the sick, with advice gratis. In a short time I had many applicants, to whom I served out a quantity of Holloway's Pills. These are most useful to an explorer, as possessing unmistakable purgative properties, they create an undecidable effect upon the patient, which satisfies them of their value."

SIMPLE, SAFE, AND CERTAIN! HOLLOWAY'S OINTMENT

Is a certain remedy for bad legs, bad breasts, and ulceration of all kinds. It acts miraculously in healing all inflammations, curing skin diseases, and in arresting and subduing all inflammations.

Mr. J. T. Cooper, in his account of his extraordinary travels in China, published in 1875, says—"I had with me a quantity of Holloway's Ointment. I gave some to the people, and nothing could exceed their gratitude; and, in consequence, milk, food, butter, and horse feed poured in upon us, until at last a bag-spoonful of Ointment was worth a fowl and any quantity of peas, and the demand became so great that I was obliged to lock up the small remaining stock."

Sold by all Chemists and Medicine Vendors throughout the World. May 1st, 1889

KEATINGE'S INSECT POWDER.

BUGS, FLIES, MOTHS, BEETLES, and all other Insects are destroyed by KEATINGE'S Insect Powder, which is quite harmless to Domestic Animals. It exterminates beetles, the success of this Powder is extraordinary, and no one need be troubled by those pests. It is perfectly clean in application. Ask for and take no other than "KEATINGE'S POWDER," as imitations are numerous, and fail in giving satisfaction. Sold by all Chemists, in Tins and Bottles. May, 3, 1888.

NOW READY,

YOKOHAMA: SATURDAY, AUGUST 2, 1890.

SUMMARY OF NEWS.

A SHOCK of earthquake was experienced in the capital on the 25th ult., at 2h. 57m. 25s. p.m.

H.R.H. PRINCE BHASAKARAWONGSE and suite paid a visit to the Government Printing Bureau on the 26th ult.

H.R.H. PRINCE BHANURANGSI was decorated with the First Class Order of the Rising Sun on the 26th ult.

THE *Chiyoda Kan*, ordered by the Naval Department from England, will be brought out to Japan about the end of September.

It is stated that the revised Newspapers Regulations, which are now under discussion in the Senate, will be promulgated at an early date.

At the half-yearly meeting of the Matsushiro 63th National Bank, held the other day, a dividend was declared at the rate of yen 3 per annum.

MR. YOKOSE FUMHIKO, a councillor of the Finance Department, was appointed a manager of the Osaka Mint on the 28th ult., being raised to third class of *sonin* rank.

MR. MIYABARA, judge of the Tokyo Court of First Instance, was raised to seventh class, first grade from seventh class, second grade on the 28th ult., by special order of the Emperor.

THE revised Mining Regulations were promulgated on the 29th ult. over the signatures of Count Yamagata and Mr. Mutsu, Minister of State for Agriculture and Commerce.

An outbreak of fire took place on the night of the 19th ultimo in the branch office of the Mitsui Products Company at Otaru, Hokkaido, and before the flames could be got under con-

trol, the building in which they originated, the Hokkai Ginko, the Mitsui Ginko, and other thirty houses were entirely destroyed.

A MEETING of the Privy Council was held on the 28th ult. at which Counts Oki, Higashikuze, Katsu and Soejima, Viscounts Sano, Enomoto, and Fukuoka, and Mr. Kono were present.

It is stated that the Seven Islands of Idzu, which are now under the control of the Tokyo City Government, will be transferred to the jurisdiction of the Kanagawa Prefectural Government.

THEIR MAJESTIES THE EMPEROR AND EMPRESS have granted yen 1,000 and yen 500 respectively to the Japan Sanitary Association, which gives medical assistance gratuitously to persons attacked by cholera.

An outbreak of fire took place on the night of the 19th ult. in a house at Tsunotatecho, Senhoku, Akita Prefecture, and fourteen houses and one godown were entirely burned before the flames could be subdued.

THE usual meeting of the Cabinet was held on the 28th ult., at which Counts Yamagata, Saigo, Yamada, and Matsukata, and Viscount Aoki and Mr. Mutsu were present, the proceedings lasting till a late hour.

THE graduation ceremony of the Naval Medical School took place on the 28th ult. in presence of Viscount Kabayama, Minister of State for the Navy, Rear-Admiral Ito, Vice-Minister for the Navy, and about fifty naval officers.

An outbreak of fire took place on the night of the 13th ult. in a house of Takakuramura, Susu, Ishikawa Prefecture and thirty dwellings and three godowns were entirely destroyed before the flames could be extinguished.

THE receipts of the Sanyo Railway Company during the month of June last were yen 12,915,965, the daily average being yen 430,532, and 12,207 passengers were carried during the same period, showing an average of 2,407 daily.

FIRE occurred early in the morning of the 19th ultimo in a house at Yagicho, Takaichi, Nara Prefecture, and twelve houses were entirely destroyed, four dwellings being partially burned before the flames could be subdued. On the 24th ultimo fifteen dwellings and one elementary school were burned to the ground at Suishucho, Hiroshima.

ACCORDING to investigations made by the Department of Communications during the latter half of last year the various post offices in the Empire dealt with 27,693,194 letters, 33,562,138 postal cards, 11,033,140 newspapers and magazines, 898,188 books, 36,177 samples, 8,509 letters containing money, 3,777,020 free letters, and 1,650, 903 registered letters.

FIRE occurred on the night of the 22nd ultimo in a house at Inahosakicho, Iwauchi, Shiribeshi, Hokkaido, and forty houses were entirely destroyed before the flames could be extinguished. On the 21st ult. twenty-one houses, one hospital, one elementary school, and two godowns were burned to the ground at Kusakura, Higashikanbara, Niigata Prefecture.

THE half-yearly meeting of shareholders of the Tokyo Cotton Spinning Company was held on the 25th ult. The net profits for the past half-year were yen 5,541,262, of which yen 900 was set apart towards a reserve fund, and yen

4,500 was appropriated as a dividend at the rate of 3 per cent. per annum, the remaining yen 141,262 being carried forward to the next account.

THE half-yearly meeting of shareholders of the Tokyo Gas Company was held the other day. The receipts during the past half-year were yen 45,564,435, of which yen 25,731,435 was set apart towards miscellaneous expenses, yen 4,383.30 as a reserve fund, yen 2,578.29 as rewards to officers, and yen 14,175 was appropriated as a dividend at the rate of 9 per cent. per annum, the remainder being carried forward to the next account.

H.R.H. PRINCE BHASAKARAWONGSE was received in audience by the Emperor and Empress on the evening of the 26th ult., and afterwards His Royal Highness and Their Imperial Highness Princes Fushimi, Komatsu, Marquises Tokudaiji and Kito, Count Oyama, Viscounts Aoki and Kagawa, and several other officials of the Imperial Household Department, had the honour of dining with the Emperor.

It is stated that the following gentlemen will be nominated by the Emperor as members of the House of Peers:—Messrs. Shibusawa Eichii, President of the 1st National Bank; Tomita Tetsunosuke, late President of the Bank of Japan; Shimamoto Nakamichi, Oi Kentaro, of the *Jiyu-to* party, Iwasaki Yanosuke, Fuku-zawa Yukichi, Yano Fumio (*Hochi Shimbun*), and Fukuchi Genichiro, late chief editor of the *Nichi Nichi Shimbun*.

THE half-yearly meeting of shareholders of the Mito 104th National Bank was held the other day. The net profits for the past half-year were yen 25,067,481, of which yen 4,698,641 was set apart towards miscellaneous expenses, yen 336, towards the payment of business tax, yen 1,450 as a reserve fund, and yen 1,204,645 as rewards to officers, yen 7,200 being provided as dividend, to be declared at the rate of 12 per cent. per annum, and the remainder carried forward to the next account.

THE ordinary half-yearly meeting of shareholders of the 17th National Bank (Fukuoka) was held the other day. The net profits for the past half year were yen 73,531,226, of which yen 17,691,712 was set apart towards miscellaneous expenses, yen 560 towards payment of business tax, yen 2,400 as a reserve fund, yen 2,200 as rewards to officers and yen 17,500 was appropriated as a dividend at the rate of 15 per cent. per annum, the remainder being carried forward to the next account.

IMPORTS generally are only in small demand, and Manchester goods are dull, Yarns being very quiet, and Piece-goods slow of sale. Metals are in no better request, even at lower rates, and Kerosine is inactive, with very heavy stocks in hand. There have been moderate sales of Sugar, mostly Takao, at late figures. The wide gulf between holders and buyers of Silk continues, the breach being accentuated by continuously rising rates of exchange which sellers attempt to ignore, but which buyers take full account of. The stock is now well assorted and ample, but, if the present condition of consuming markets continues, large concessions on the rates for which Silk is now held must be made before transactions of any magnitude can be effected. There has not been a single transaction in Waste Silk, which is entirely due to the high prices for which the commodity is held. Arrivals come in freely and the stock accumulates. The Tea trade remains steady, and prices are unaltered. Exchange continues to mount upward, and present rates are apparently quite firm.

EDITORIAL NOTES.

COUNT GOTO'S POSITION.

CONTRARY to all expectation, the *Daido Danketsu*, whose final disappearance from the political arena had been at one time thought a mere question of time, has apparently recovered its old energy during the last few months. At all events it has come out of the recent elections nearly at the head of all the political parties in the country. People are therefore asking curiously what course of policy Count Goto, its leader, may be expected to adopt. Writing on this subject, the *Keizai Zasshi* of the 19th ult. discusses the peculiar nature of the situation in which Count Goto now finds himself. "Is he going," asks our contemporary, "to remain faithful to the present Cabinet and induce his party to support it, or is he going to accomplish the original object of demolishing class government by suffering his party to swell the ranks of the Opposition?" At first sight it may appear impossible for the Count to adopt the latter course, considering that some promises which he is understood to have made to the Yamagata Cabinet lie directly in his path. But, however, inconvenient and inconsistent it might be for him to break his engagements and attack clan government, our contemporary is sceptical as to whether he will be able to resist the force of the general tide and stick to his plighted words. It was the *Daido Danketsu* that enabled him to enter the Cabinet, and it is the same party that enables him to retain his position there with any show of dignity and power. Thus far that party has presented the appearance of being a mere instrument in the hands of its leader, but the *Keizai Zasshi* is certain that its members will not long remain content with such a situation; they must insist on the accomplishment of their original object, the destruction of clan government. It is true that Count Goto may be able to bring over to the Government's side a few of his confidential followers, but it is inconceivable, says the Tokyo journal, that the bulk of the party will be blind enough to follow him so far. Without the support of his party, Count Goto would have no power; therefore our contemporary is sure that he will not be foolish enough to estrange his followers. What, then, is he going to do? The time has arrived for him to take a decided step one way or the other. It is no longer possible for him to remain indifferent. "An alliance" says the *Keizai Zasshi*, "is about to be effected among the progressive parties. Should the alliance become a fact, the combined parties will proceed to fix a certain number of questions to be brought forward in the Diet. Among such questions, that of clan government will certainly be included, and when it really comes before the Diet, what attitude will Count Goto take? Will he endeavour to weaken the forces of the Opposition and support the Government, or will he act as he acted in the era of Keio, when he advised the Tokugawa Government to restore the control of affairs to the Imperial Court?" We do not ourselves think that this question has strong practical interest. If Government by clan were a fact recognised and approved by those in power, its fate might become a point for immediate discussion. But, on the contrary, it is avowedly condemned by the statesmen in office, and those who are counted supporters of the present Cabinet, as strongly as by the leaders of the *Daido Danketsu*. How, then, is it to become a great practical issue in Parliament?

CENSUS IN SHANGHAI.

THE census of the Foreign and Chinese population of Shanghai has just been completed. A census is taken every five years. The result, as published in the *North China Daily News*, reveals many interesting points. First it may be noticed that the number of Japanese residents has strikingly declined, there being at the present time but 386 adults and children as compared with 595 in 1885. Besides the Japa-

nese, the Spanish, Austrian, Italian, Belgian, Greek, and natives of India, Malay, &c., show a more or less marked decrease. This is in the English and American concessions. In the French concession, which as our readers know is under totally distinct municipal control, we are unable to judge, a comparative table not having been drawn up. There were only 17 Japanese in the French concession, however. Unlike their sister concessions, the French, English, American, and German head the list. The leading nationalities in numbers at least in the concessions south of the Yang King Pang are the British, Portuguese, Japanese, American, and German. Portugal as well as Japan, we observe, shows a considerable falling off in the number of its citizens in the Model Settlement. The total number of British subjects is 1,574, as compared with 1,453 in 1885, 1,057 in 1880, 892 in 1876, and 894 in 1870. The total comprises 769 adult males, 377 females, and 428 children. In the English and American settlements there are now 3,821 foreigners (2,790 being adults), representing an increase of a little under 150 for the five years. The French settlement numbers 454, 296 over 15 years of age, 148 younger than fifteen. Of Chinese, the returns give a gross number of 168,129 for the Anglo-Saxon concessions (39,850 of this total are children, however) as compared with 34,722 in the French concession. Of the hundred and sixty odd thousand in the English and American concessions, over thirty-nine thousand are children. Still there are no less than 128,279 adults, an increase of close upon 26,000 in the five years. This is an incomparably larger increase than has ever been known before. Of the thirty-five thousand in the French concession, young people under 15 years of age number a little short of ten thousand. There are no less than 6,342 (4,583 males, 614 females, and 1,145 children) living "in shipping and boats" in the immediate vicinity of the English and American settlements. The figures here given represent in the aggregate 207,116, which may therefore be regarded as the official estimate of the foreign and native population of the English and American and French Settlements of Shanghai. Of this total, over two hundred and two thousand are Chinese.

THE TREATY REVISION PROGRAMME.

Most of the Tokyo newspapers contain references to the Treaty revision programme indicated in a recent letter to *The Times* from its Tokyo correspondent. One journal contradicts a rumour which it says had obtained currency that *The Times* correspondent is a secretary of the British or United States Legations. Another equally sapient seer corrects the impression that the information had been procured by a foreigner at much cost, and declares that the Japanese Government were willing parties to the divulging of the programme.

General Tani's opinion has been asked with regard to the new project of Treaty Revision, and in reply he is reported to have said that he objected to last year's programme on the score of loyalty and patriotism. To Viscount Aoki's new scheme, as communicated to him by a friend he had no objection, but he regarded the information given in *The Times* as vague, and not worthy of criticism.

The *Hochi Shimbun*, while admitting that the new programme is a good one, doubts whether it can be carried through.

The *Daido Shimbun* does not feel called on either to applaud or condemn the scheme, till it is laid before the public in greater detail. Our contemporary, however, cannot approve of the proposal to open the country without permitting foreigners to own real estate, which it thinks will not be agreed to.

The *Choya Shimbun*, finding that the new programme goes far beyond Count Okuma's cillor of the Temporary Parliamentary Bureau;

Mr. Yoshiwara Saburo, Probationary Councillor of the Temporary Parliamentary Bureau, and Mr. Koike Seichichi, Secretary of the Temporary Parliamentary Bureau. Finally, Mr. Mizuno Jun is gazetted a Secretary of the Diet in addition to his present office of Councillor of the Legislative Bureau. According to the Constitution, the staff of each House is to include a Chief Secretary and several Secretaries, the former of *chokunin* and the latter of *sonin* rank. Their emoluments are not fixed as yet.

CHINESE OFFICIALS.

THE Chinese are eminently practical folks. If a man embezzles money, they think chiefly of recovering the coin and attach quite a secondary importance to the punishment of the offender. Indeed, if the latter happens to be an official, there seems to be no insuperable objection to replacing him in a position where he can resume his speculative practices, provided only that he disgorges a fair portion of his previous takings. A case in point is that of the Superintendent of the Canton Arsenal. This official, according to the *Peking Gazette* as translated by the *Chinese Times*, "together with two subordinates had been suspected of some shady transactions, and the Viceroy had been ordered to hold an investigation. The result was that Wen Tze-shao (the Superintendent) was degraded, and ordered to pay Tls. 200,000, supposed to have been squeezed by him while in office; also to complete some buildings at the Arsenal at his own expense. His two subordinates were similarly treated. On condition, however, of the money being paid up, their rank was to be restored." The money was promptly paid, and the neat incident of the affair was a memorial recommending the officials for re-instatement, which document was submitted to the Board of Civil Offices "for examination and report."

THE "KOKU-HON."

A NEW journal of high standing has just made its appearance in Tokyo, under the editorship of Mr. Kikuchi Kumataro, formerly editor of the now defunct *Bun*. It is called the *Koku-hon* (*National Resource*) and is to be published thrice a month. The type, judging from the first number, is clear and the paper good. It professes to maintain a strictly independent attitude, making reason and justice its sole standard of guidance, and it engages never to prostitute itself for party purposes. In discussing important topics of the day, it promises to avoid the tendency to obstruction and theory so common in Japanese journalism, and to seek rather for as much information as possible from men of special eminence and experience. The tone of the first number is calm and sober, as might indeed have been expected from the past writings of its editor.

An article entitled "Japanese Politics," tells us that Mr. Kikuchi is not one of those sanguine reformers who think that, on the establishment of parliamentary institutions, the country will be ready to put into practice the principles of party government. He does not, of course, consider that the present system of clan government can be maintained for ever or that it is the best form of government. The relations between the Sovereign and his subjects in Japan are of unique character. Nothing analogous is to be seen in any other country. Mr. Kikuchi seems to think, therefore, that the national polity is in some fundamental respects incompatible with the principles of party government as practised in the democratic countries of the West. He advises Japanese statesmen to be deliberate in introducing new practices into political spheres. He further recommends the members of the coming Diet to avoid all problems of principle and doctrine which have little connection with practical affairs, and to confine their attention to such questions as possess an immediate bearing on the interests and welfare of the people. By way of example he adduces the question of education, which, he says, awaits intelligent solution, and inasmuch as many years have elapsed since the

new system of education was introduced, there should be a sufficiency of practical experience for forming a sound judgment. The same is also true of military, naval, financial, and industrial questions, and so forth. The members of the first diet will do well to devote their attention to these questions, and not to travel beyond them.

In an open letter to Count Ito, our contemporary advises that statesman to assume again the chief direction of affairs as soon as possible. The public does not regard the Count as the greatest man of the age, but still he enjoys unbounded popularity, and high expectations are entertained about him. "What is it that makes Your Excellency so popular? In our humble opinion, you do not possess either the indefatigable zeal of Count Itagaki, the intrepid boldness of Count Kuroda, the matchless cleverness of Count Inouye, the large-heartedness of Count Okuma, the strenuous perseverance of Count Matsukata, the military glory of Count Yamagata, or the spotless purity of Viscount Tani. That among these statesmen Your Excellency enjoys the largest measure of the nation's confidence, is owing, among other things, to your justice in the conduct of affairs and your freedom from prejudice in your dealings with other men. Judging from your past career, you are to the late Marquis Okubo what the late Marquis Tseng was to Li Hung-Chang. You enjoyed the confidence of the greatest statesman of modern Japan, and you seem to have looked to him as a standard on which to mould your conduct. You endeavour to walk in the road of right and justice, without straying into by-paths. Moreover, you are naturally sagacious, and your knowledge makes you conspicuous in any Ministry of the present day. As to your achievements in the sphere of civil affairs, you may well be proud of not a few works of lasting importance. Not without reason, therefore, does the public entertain high expectations about your Excellency." Our contemporary then goes on to observe that, though some men call Count Ito rash and fickle, and describe him as a politician little concerned to promote the interests of practical business and industry, every thoughtful person admits that, of all the statesmen who have ever accomplished great things in Japan, he has the smallest number of political enemies. Further, he enjoys the confidence of the Emperor in such a large measure that not a Ministerial crisis occurs but the Sovereign turns to him. Our contemporary also begs to bring to the notice of the Count that in certain quarters men regret his connection with statesmen who are considered selfish, and lament his inability to withstand the attacks of some jealous men of Choshu. Yet while even the late Marquis Kido was unable to divest himself of his character of a mere Choshu statesman, the *Koku-hon* avers that men generally acknowledge Count Ito to be a statesman of Japan and not of Choshu. Such being the position of the illustrious politician, our contemporary calls upon him to respond to the appeal of his country, and once more to take in his hand the helm of state.

Mr. Miyake Yujiro, formerly editor of the *Koko Shimbun*, contributes an article on the subject of "Discontent among Noblemen." The article does not contain much that is novel, but it possesses a certain amount of interest just now in connection with the recent extraordinary elections among the nobles. The writer reproduces a paper said to have been brought before the *Dohō-kwai* (Nobles' Club) by Viscount Funahashi, formerly a court noble of Kyoto. In this paper the Viscount observes that there is a vast difference between nobles of different classes from a pecuniary point of view. While there are *Kwasoku* worth more than a million yen, there are others who support themselves on property scarcely amounting to a thousand yen in value. The Viscount remarks that his fellow noblemen of the *kuge* class mostly occupy the lowest position in the list. In contrast to them, the noblemen of new creation have all received suitable sums according to their respective orders, the Counts

receiving 30,000 yen, the Viscounts 20,000 yen, and the Barons 10,000 yen. The discontented essayist further maintains that there is no reason why noblemen should meekly obey the Government, that they ought to maintain their independence, and further that, whenever they consider the Government to be pursuing a pernicious policy, they are entitled to stand in direct opposition to those in power. Mr. Miyake does not tell us when the paper was laid before the *Dohō Kwai*, and what induced Viscount Funahashi to address his peers in such terms. But there is no doubt that the essay had its origin in the excitement about the elections. Viewed in that light it has some significance, as it explains, to a certain extent, the causes of the unexpected results of the election among the three lower orders of nobility. Mr. Miyake thinks that the paper is like the first drops of rain presaging a storm, but we are unable to follow him to such a length. There are several other articles of high merit on current topics, but space does not allow us to epitomise them.

CUSTOMS RETURNS.

The following is a summary of the Customs Returns for June, showing the foreign trade of Japan for the month:—

	1889.		1890.

THE TYPHOON AT SHANGHAI.

The *North China Daily News* of the 19th inst., writes as follows of the typhoon which visited Shanghai on the preceding day:—

The weather was very boisterous yesterday and at noon the indications at one time were that a typhoon was coming direct to Shanghai. According to the signals at the Semaphore Station, and telegrams, a typhoon had entered the Formosa Channel and gone to the mainland near Foochow. Another typhoon apparently was travelling from the south northwards, and it was this typhoon that seemed to threaten Shanghai, but at 3 p.m. No. 63 was hoisted at the Signal Station, in-

dicating that the typhoon had changed its direction somewhat to pass to the west of Shanghai with the wind S.E., S., and S.W. The wind blew fiercely in the river, causing white crested waves such as had not been seen here for many years and all traffic was stopped on the river. The damage done was, fortunately, inconsiderable. A part of the reclaimed Garden slope was washed away, but it was not seriously damaged, and some house boats were blown ashore. A P. & O. cargo-boat was blown ashore inside the Nanking Road jetty, fouling and damaging the pontoon, and when the *Gutzlaff* was trying to haul her away from the jetty, she let go her anchor, and on recovering picked up the mooring anchor of the *Yuenfah's* floating kitchen, the result being that the kitchen drifted on the *Yuenfah* and did some little damage, but nothing of any consequence. The trees on the Bund and in Hongkew suffered a good deal; the streets were strewn with leaves and small branches, and several telephone lines were broken. At the back of the Settlement some damage was done. A native constable saw a high wall at the corner of Foochow and Hupei Roads tottering, and he had just time to call out to the people to warn them of their danger, when some thirty feet of the wall fell outwards, completely covering the road. At the Pakhoi Road a theatre a portion of the roof of one of the outhouses caved in, slightly injuring a Chinaman, and the front walls of two unoccupied houses, also in Pakhoi Road, fell down. The *Ying* dragged her moorings, and had to get up steam and find fresh anchorage, and a ship's boat broke away and drifted up the Soochow Creek. All the sampans and cargo-boats, with a few exceptions, went up the creeks for shelter, and those that neglected this precaution had rather a rough time of it. The yacht *Undine* was towed over to Pootung early in the morning by one of the tugs, most of the other yachts having sought shelter previously, though two mosquito yachts drifted ashore, both being eventually taken out of danger. At Wocsung, the tide rose to 24 feet 10 inches, and the wind blew with force of 8 and 9, and at Gutzlaff, 8. The *Chungking*, which left here on Thursday afternoon to assist the *Wenchow*, only succeeded in getting as far as the Little Beacon at 4 a.m. yesterday, and the *Hacan*, which left yesterday morning for Tientsin, anchored below Fanchan's Lower Dock till the weather moderated. The *Iehang* experienced a S.E. gale and easterly winds. The *Yiksang*, which arrived on Thursday night from Swatow, experienced light variable airs and calm clear weather from Hongkong to Swatow, then to Steep Island strong N.E. winds, cloudy weather and very heavy N.E. swell; to port, light N.E. winds and fine weather. The following is the Siciawei weather report, 18th July, 8 a.m.—The typhoon already reported as having entered the Formosa Channel by the south, has gone overland near Foochow and is now moving northward, to a.m.—Yesterday the barometer fell quickly at Amoy and Foochow. The wind, north-east at both these stations, in the morning, shifted in the afternoon to S.W. at Amoy, remaining strong from N.E. at Foochow. The barometer at Shanghai has continued falling. The typhoon appears to be coming direct to Shanghai.

MR. SUGIURA JUKO AND THE PRESIDENT OF THE HOUSE OF REPRESENTATIVES.

On the 25th ultimo all the leading journals in the capital continued in the contributors' column an article from the pen of Mr. Sugiura Juko, in which that gentleman takes pains to show that candidates for the Presidency of the House of Representatives should be limited to men who have never held any official post. As is well known, Mr. Sugiura is one of the leading spirits of the new conservative party, and has more lately been recognized as the head of the movement by which about fifty of the independent members of the Diet are expected to form a close parliamentary alliance. His opinion, therefore, carries with it considerable weight, and may perhaps be taken as representing the views held by his party in regard to this topic of political discussion and prediction. It is an eminently democratic doctrine that any previous connection with official life should disqualify a man for the important post of President of the Lower House. In the face of the undeniable fact that in this country officialism has always attracted to its service a far greater proportion of the ability and experience of the nation than is the case in most other States, people will at first find difficulty in accepting the principle that the choice of a President for the House of Representatives should be made outside that circle. Weighed in Mr. Sugiura's balance, all the gentlemen whose names have hitherto been associated with the coveted post, are found wanting. Let us, however, state his argument. The most essential point, he premises, is that the dignity of the House of Representatives should be fully maintained *vis-à-vis* the Cabinet. Everything which has the least tendency to magnify the

Executive at the expense of the Legislative should be studiously avoided. To secure this end much depends upon the personality of the man chosen to preside over the House. Now as the whole list of members elected to the House contains not one who can be compared to present or past Cabinet Ministers in respect of official reputation, the elevation of any of these members to the presidency would necessarily result in lowering the dignity of the House in the estimation of the public, who would naturally be inclined to take the President's official career as a criterion of comparison between him and the Cabinet Ministers. If, on the other hand, some person who has never served in official ranks be chosen, the effect will be entirely different. In that case, there would be no danger of the President's being sentenced to an inferior place in public estimation by the common though prejudiced habit of measuring everything by an official standard. If he has no record to demonstrate his superiority to the Cabinet Ministers, neither will he have any that may be quoted to his disadvantage. Everything will then be *in posse*, and not *in esse*. He may be equal, nay far superior, to any of the Cabinet Ministers in his mental capacities. The public will invest him with the intrinsic dignity of the august body, over which he presides. Instead of being judged by a past which condemns him, he will be allowed to write his own record on the *tabula rasa* of public estimation. Mr. Sugiura's second argument is that the course he recommends would produce a salutary effect by discountenancing the pernicious tendency to glorify every thing official and belittle everything civil. Though much weakened by the spread of the doctrine of popular rights, this baneful mental habit is not yet wholly eradicated in Japan. It crops out very frequently in the field of practical politics. Mr. Sugiura deems it significant that the persons hitherto proposed for the presidency of the House are all men who have had official careers, and concludes that the plain duty of thoughtful politicians is to exhaust every means of correcting this worship of officialdom. In conclusion, he exhorts his fellow-members—for he is himself a member elect—to lay aside all party prejudice and selfish considerations, and to act in this important matter with eyes single to the duty of making their first work in the first Diet an example to posterity.

THIEVES.

CURIOUS evidence of the extreme difficulty experienced by Japanese thieves in making away with stolen articles has lately been furnished. On Saturday the 19th ultimo as the Honble. Mrs. Napier was entering the Kodzu train at Yokohama, accompanied by her English maid, a thief succeeded in possessing himself of a hand-bag carried by the latter, containing several articles of jewelry, a decoration presented by the Duchess of Connaught to Mrs. Napier, and a purse with a sum of money, fortunately not large. The theft was not discovered immediately, for Mrs. Napier and her maid being alone and finding themselves jostled by some rough-looking Japanese, had their attention distracted for a moment. The train had scarcely started, however, when the bag was missed, and steps were quickly taken to telegraph to the H.B.M.'s Consulate in Tokyo and to all the stations from Yokohama southwards. By and by the bag was discovered lying in the waiting-room at Yokohama, where Mrs. Napier had not been. The thief had opened it and doubtless examined its contents carefully, coming ultimately to the conclusion that the only thing he might safely remove was the purse. So persuaded was he of the difficulty of eluding the police that he replaced Mrs. Napier's complimentary ticket for the Ueno Exhibition which had been in the purse, probably thinking that the possession, for however brief a period, of a document bearing her name might expose him to danger. The recovery of the jewelry and other contents of the bag was very fortunate, but travellers by train will do well to watch their belongings with attention while passing along the railway platforms. The employés of the

railway are themselves above all suspicion. It is indeed quite remarkable with what certainty a passenger can count on recovering articles forgotten in a carriage or waiting-room. We have known innumerable cases of travellers who, on reaching their destination, found that they had lost something for which, judging by experience in other countries, search seemed quite hopeless, yet on application at Shimbashi or Yokohama the article was discovered in the safe-keeping of the railway officials. Such unvarying honesty deserves high praise.

* * *

Another case of discriminating speculation is that of a Tokyo resident whose house was entered by thieves a few nights ago. The burglar, evidently well informed of the family's absence, made his way into the study; opened every receptacle where money might have been kept; passed up stairs; examined chests of drawers and boxes containing numerous articles of valuable Japanese wearing apparel, and ended by taking nothing except the clock on the study mantel-piece, which he doubtless intends to keep for his own use. Unless a wholesome fear of the police's methods had been before this man's eyes, he would assuredly have carried away clothing, knickknacks, and other articles easily convertible into cash under ordinary circumstances. But thieves have not altogether a free hand in a city where every dealer in second-hand goods is compelled by law to keep accurate records of each article passing through his hands, and to submit his books at any moment for police inspection. In a settlement like Yokohama no such system is applicable, foreign—especially Chinese—receivers of stolen goods being beyond the pale of Japanese police supervision.

THE NEW ORIENTAL BANK CORPORATION, LTD.
THE Sixth Annual Report of the Board of Directors presented to the shareholders at the ordinary general meeting, held in London, on Thursday, 3rd July, says:—In submitting to the shareholders the sixth annual balance-sheet, and statement of profit and loss for the year ended 31st March, 1890, the Directors have pleasure in being again able to show a satisfactory result of the bank's operations. After payment of working expenses, interest, income-tax, rebate, exchange on foreign assets, and making full provision for bad and doubtful debts, the net profit (including £22,511 12s. 11d. brought forward) amounts to £62,440 16s. 4d. An interim dividend of 6s. per share, being at the rate of 6 per cent. per annum, for the half-year ended 30th September, 1889, was paid, free of income tax, in January last, and the board now recommend a further dividend of six shillings per share, being at the rate of 6 per cent. per annum, also free of income tax, for the half-year ended 31st March last, the same to be paid on the 16th July. They also recommend that all dividends payable at all branches be paid free of local income tax.

THE PRESIDENT AND VICE-PRESIDENT OF THE HOUSE OF REPRESENTATIVES.

THE *Kokumin Shimbun* mentions as names that have lately been much referred to in connection with the office of President of the Lower House, Messrs. Mutsu Munemitsu, Nakajima Nobuyuki, Kusumoto Masataka, Yoshino Seikei, Hayashi Yuzo, and Kataoka Kenkichi, while with the Vice-Presidency there have been associated the names of Messrs. Kono Hironaka, Oye Taku, Kawashima Jun, Matsuda Masahisa, Shimada Saburo, and Sugiura Jugo. Who are to be chosen for office? asks our contemporary. Mr. Mutsu is impossible because though a most able man he is a Minister of State; Mr. Nakajima is wise and honest, though lacking in zeal and brilliance; Mr. Kusumoto is official; though Mr. Yoshino makes a good appearance in the City Assembly we do not know whether he could preside over the Lower House successfully; Mr. Hayashi is active and enterprising but we cannot think that he would be much of an authority on the laws and customs of the Diet; Mr. Kataoka would make a model mem-

ber, but would not be so successful as President; the sobriety and sedateness of Mr. Kono, the methodical care of Mr. Oye, the activity and elasticity of Mr. Kawashima, the unconventionality of Mr. Matsuda, the prudence of Mr. Shimada, and the daring and activity of Mr. Sugiura are qualities which sufficiently distinguish those gentlemen from the ordinary mob, but as candidates for the Presidency or Vice-Presidency of the Senate there is in each case a weak point. Yet the President and Vice-President must, so far as at present appears, be chosen from among the persons we have mentioned.

* * *

The name of Mr. Matsuda Masahisa is probably not as familiar to our readers as the others. Mr. Matsuda is, however, a gentleman of much learning and ability. Sent to France by the War Office for purposes of study, he devoted his attention to politics and law instead of military tactics, and on his return home published, in conjunction with Marquis Saionji and Mr. Nakaye Tokusuke, the now well known *Toyo Jiyu Shimbun*. He was recently elected President of Nagasaki Prefectural Assembly, and is a member of the *Kiushu Shimpō-to*. He is a native of Saga Prefecture.

* * *

The *Hochi Shimbun* published the other day a letter from Mr. Sugiura in which that gentleman expressed the hope that the President of the House of Representatives will be chosen from among those who have never been in office. If a man who has once been an official be selected then as his office must probably have been lower than that of Minister of State, people will fall into the habit of regarding the House as below the Cabinet instead of equal to that body as is the case. The *Hochi* endorses this opinion as a very reasonable one.

THE SWITCH-BACK.

THE switch-back railway at Ueno is one of the great attractions to persons visiting the park at present. The line is raised on a rough but strongly constructed platform under the trees behind the big bronze Buddha. The length traversed in each direction is about fifty yards, but the car does not perform the whole circuit without stopping: passengers are obliged to alight at either end so that the vehicle may be drawn by hand from the point at which it comes to rest to the point whence it resumes its journey, a distance of a few feet. There are three ascents and as many descents, the last being by far the steepest. Indeed, by the time one reaches the bottom of the third valley for the first time, one feels that a soberer method of transport would be a thing to be thankful for. The feat of merely sitting on one of the little benches, with a tight grasp of the guard-iron on either side, is sufficiently satisfying to the novice's sense of daring. But a few transits educate the familiarity that breeds contempt, and passengers begin to place themselves with their backs to the horses and even to stand throughout the journey. Timid individuals who object to being bobbed about like a pea on a drum while rattling down a steep hill at the rate of thirty miles an hour, may be pleased to learn that a minimum of motion is experienced in the third seat from the front, and that the seats at the ends of the car are incomparably the roughest. A small sensation was created lately by a young and beautiful English lady who had sufficient courage and command of muscle to stand in the front seat during the whole transit, a performance which must be seen to be appreciated. We have not yet heard of any one standing with his back towards the direction of motion, so that something still remains to be accomplished by aspirants for fame. The enterprise is said to be paying well, and so indeed it ought if the fashion set by foreign visitors were followed, for these, when they go "switch-backing," are by no means content with half a dozen rides. The Japanese take their fun in smaller doses, but as one transit costs three *sen* and several hundreds of people enter the cars daily, while the original outlay

for construction cannot have exceeded three or four thousand yen, the affair is about as rosy as any of our joint-stock-company promoters could wish.

THE DOSHIN KAISHA.

The ninth ordinary meeting of the shareholders of the Yokohama Doshin Kaisha was held on the 23rd ultimo, at half-past one in the afternoon, the place of assembly being the City Hall, Yokohama. Mr. Kawase, the President, gave a full account of the financial difficulties in which the company was involved in consequence of the discontinuance of Government exchange business, and spoke about an arrangement subsequently made with the Yokohama Specie Bank for assisting the company by means of official protection. The financial report was then made for the year commencing in March, 1889, and ending in February, 1890, by which a dividend of seven per cent. was declared. All the officers were re-elected with the single exception of Mr. Kawamura who declined to accept reappointment as Vice-President, and was consequently succeeded by Mr. Kazuma.

THE CHOLERA AT NAGASAKI.

We are all familiar with those exceedingly astute wisecracks who know exactly how everything ought to be done, and who are prepared to furnish an infallible panacea at a moment's notice for any and every conceivable difficulty or trouble. Generally the assurance of these persons is in the inverse ratio of their capacity; the less title they have to be regarded as omniscient physicians, the more clamorously do they prescribe their remedies. A prominent type, well known "in these parts," is the editor of a petty local newspaper, a man with scant education and scantier brains, who poses as a teacher of the whole art of statecraft, the complete science of political economy, and the exact principles of administration. Most edifying is it to hear this individual descant, in imposing periods, on the disgraceful failure of the Authorities to do so and so, or on the perfect ease with which some big national problem could be solved if only the methods recommended by him were adopted. Surely the *North China Daily News* must have made the acquaintance of this type of individual, and knowing him should have refrained from penning the following silly paragraph on the strength of diatribes in the *Nagasaki Rising Sun*:—"It appears that this outbreak of cholera at Nagasaki has been dreaded for some time by foreign medical men, who advised the native officials of the threatened danger, but of course no heed was paid to this warning. When cholera did declare itself everything seems to have been left to the mismanagement of the police officials, who know about as much of sanitary organization as a mud turtle does of the Chinese classics. Improved methods of sanitation under the direction of experienced medical men would doubtless soon rid the town and surrounding country of the disease." "Improved methods of sanitation under the direction of experienced medical men!" When were these methods invented, and where have they ever been employed successfully? Newspapers with such fathomless stores of knowledge at their command ought to be less chary of sharing it with their fellow-creatures. As for the Japanese Government, if it fails to engage the editors of the *North China Daily News* and the *Nagasaki Rising Sun* as sanitary experts, and to entrust to them the duty of eradicating cholera, it will have a large share of bloodguiltiness at its door.

MISS FAWCETT.

Apropos Miss Fawcett's success at Cambridge, the *Pail Mail Budget* writes:—"Miss Fawcett's triumph in the Mathematical Tripos puts the crown on a long series of successes by lady students at Cambridge. There have now been lady "Seniors" in all the important Triposes (except Law). Here is the list:—*Moral Sciences Tripos*: In 1880, Miss Jones was bracketed Senior. In 1881 Miss Moberly was Senior, and so in 1884 was Miss Hughes. *Historical Tripos*: In 1886, Miss Rolleston

(daughter of the late Oxford Professor of Zoology) was bracketed Senior, and in 1887 Miss Blanche Paull was similarly placed. *Medieval and Modern Languages Tripos*: Here there have been four lady Seniors. In 1886, two ladies and no men were placed in the first class. The ladies, who were placed in alphabetical order, were Miss Chamberlin and Miss Skeat (daughter of Professor Skeat). In 1887, Miss Hervey was Senior; and in 1888, Miss Tuke (whose father is well known in connection with schemes of Irish emigration). Finally, there are the success of Miss Ramsay in the *Classical Tripos* (1887), and of Miss Fawcett in the *Mathematical* (1890). Of these eleven lady Seniors, two came from Girton (Miss Jones and Miss Ramsay), the rest from Newnham. It is often asked what becomes of lady students when they leave college. A few particulars about some of these lady Seniors may therefore be added. Miss Ramsay is now Mrs. Montague Butler, the wife of the Master of Trinity. Miss Moberly is Head-mistress of the Tonbridge Wells High School for Girls. Miss Hughes is Head of a training college at Cambridge. Miss Chamberlin is instructor in German at Bryn Mawr College, Philadelphia; and Miss Jones is Moral Science lecturer at Girton.

TREATY REVISION.

THE unexpected appearance of the new proposals for treaty revision in the columns of *The Times* has elicited many comments and reports. Among others a rumour was circulated to the effect that Viscount Tani was again in the van of the opposition. But, judging from what the Viscount is reported to have replied to an interviewer, the rumour appears to be wholly groundless. These are his own words:—"There is no truth whatever in the rumour that I am opposed to the new proposals for treaty revision. The truth is that I have not yet formed any definite opinion either pro. or con. in regard to this question. It is true I did all in my power to resist the former proposals, which, I was fully convinced, would be most detrimental to the best interests of this country, but as I am informed by trustworthy persons that the new proposals contain nothing injurious to our national honour, I believe they will not be so obnoxious as their predecessors. As to the proposals which appeared in *The Times*, I think they are entirely too vague and indefinite to warrant any hard and fast opinion."

THE MEETINGS REGULATIONS.

THE *Hochi Shimbun* learns from a good source that the Revised Meetings Regulations have been duly sanctioned and approved, and will be promulgated in a few days under the title of *Ketsusha-ho* (Law as to Associations). Under the new law public meetings may be held twenty-four hours after the intention to hold them has been communicated to the Authorities—official permission not being required; and official action in reference to objectionable language shall be limited to suspension of the particular speaker who has offended. A new article, however, has been introduced which will doubtless create a good deal of surprise, for it provides that no political speeches shall, during the session of the Diet, be delivered within a radius of three miles of the Imperial Palace. In point of fact the revised Regulations were promulgated in our extra issue of the *Official Gazette* on the 25th ultimo. We shall publish a translation at an early date.

EASTERN GOSSIP FROM LONDON.

THE Colonial Service has seen the last of Sir John Pope Hennessy for the present. He has retired on a pension, which is said to be £1,500 a year, and has been definitely accepted by Mr. Parnell as a member of the Irish party, and he is to have a seat at a very early opportunity as a follower of the "uncrowned king." It is rumoured that he is in a "tight place" in one respect. He is a member of the Carlton, having been elected a few years ago by some special rule, and through the help of friends, as a former member of the Conservative party. When in town he is to be seen daily at the club. Of

course his nationalist tendencies were well known, for he never concealed them; but the question will be different when he enters Parliament as a follower of Mr. Parnell, i.e. of Mr. Gladstone, and an anti-Conservative on the chief question dividing the two parties. Presumably he will be expected to vote Gladstonian on all party questions; yet he is a Conservative! And if he leaves the Carlton, he cannot join the Reform or the Devonshire, because he is not a Liberal but a Conservative! Was ever politician in such a fix? It is said that Sir John proposes to meet the question by quietly absenting himself from the Carlton for the present; like Brer' Rabbit he will lay low; he will wait until the clouds roll by, and then act according to circumstances. Meanwhile, he will trust to his friends to prevent any action being taken at the Carlton, and he is now looking out for a suitable club without a political character. It will be really interesting to see how this wily old bird flies during the next few years. Some time ago there was a very strong prejudice in the Irish party against him; *United Ireland* abused him in a couple of columns, and accused him of flitting in 1882 with the Irish party. We don't remember what the particular complaint against him was, but there is a general prejudice in Irish political circles against all politicians of the pre-Parnellite days. Sir Charles Gavan Duffey has been anathematized because he used some strong expressions about the policy of obstruction when in its infancy. Sir John Hennessy has been more prudent, and so he has been able to make his peace with the Irish party. Mr. Parnell is probably glad to obtain such a distinguished recruit. Men say that the whole matter has been arranged by the vice-leader of the party, Mr. Justin McCarthy, who was a school-fellow, and has ever been a friend, of the ex-governor. At a recent date the latter was busy arranging about his new Irish mansion and estate. He has sold the latter to the tenants under Lord Ashburne's Act, retaining the "castle" and demesne around it. It is on the shores of Cork Harbour, and rumour avers that he has a contract with one of the Transatlantic mail companies to supply their vessels with grapes, vegetables, &c., for the saloon passengers from his gardens, while a Liverpool dealer takes thousands of rabbits per annum from a warren on the property. Thus it will be perceived that his ex-Excellency has his hands full, what with politics and society, gardening and rabbit rearing, and financing.

Mr. Archibald Little was to leave London towards the end of June for China. Travelling by the Canadian Pacific route, he intended to arrive in Vancouver in time to join an excursion from there to Alsaka. On arriving in China he purposed to go up, without needless delay, to Chungking in order to see what the prospects of business there are. It is understood that a good deal may turn upon this journey, for Mr. Little has succeeded in obtaining from capitalists in England definite promises of support, provided he finds, on reaching Chungking, that there are fair opportunities for enterprise. He has lately been lecturing in Glasgow and elsewhere on Western China, and in the middle of June he had an interview with a section of the Committee of the London Chamber of Commerce in reference to Chungking. His aim is to impress on those concerned or interested in the subject the great importance of having a Foreign Concession in Chungking, so that foreigners may live as in Shanghai, Tientsin, and most other ports, and not here and there about the native town, as in Ichang for example. The great importance of this subject for the comfort and health of foreigners requires no emphasizing to anyone who has been in China, but it has to be made clear in England. He has also completed an article on "Western China, its Products and Trade," for the July number of the *Quarterly Review*. The article is nominally a review of certain blue books and others, but is, in fact, an original contribution upon the subject with which it deals. In a note there is a delightful sketch of an interview between a foreign Mini-

ster and the Ministers of the Yamên in Peking. Towards the conclusion, Mr. Little sums up his views about China generally and especially about her future, and apparently he favours the idea that China will, for a time at any rate, be a second Turkey. Another literary labour which Mr. Little has just completed is an introduction to a volume which is about to appear from the pen of Mr. Alexander Hosie, of H.M. Consular Service, entitled "Three Years in Western China." Mr. Hosie, as many of our readers will remember, resided for some time as Consular Agent at Chungking, and from that point made journeys in various directions for the purpose of studying commercial matters. He travelled, if we remember rightly, about 5,000 miles on his three principal journeys. The blue books of the time contain the ordinary official records of these journeys, but as no one reads these publications Mr. Hosie seems to have done wisely in publishing his travels in a form in which they are likely to be reached and read by the general public. The book will contain a good deal of information about the aboriginal tribes of Yunnan and Kweichow, and will also give an account of the journey which he made in the interests of the Royal Gardens at Kew for the purpose of collecting information respecting Chinese insect wax. Mr. Little in his introduction says:—"The result of these extensive explorations is an elaborate monograph on the province of Szechuen, such as has not yet been written of any other of the eighteen provinces into which China proper is divided. It provides a mine of information to the traveller and to the merchant, and appears at a most opportune moment, now that, by the establishment of Chungking as a treaty port, this rich and interesting land is at last thrown open to Western enterprise." This will serve to give your readers a general idea of the contents of the volume, which is to be published before the end of June. The introduction, which occupies about twenty pages, describes the circumstances under which Chungking comes to be open to foreign trade, and gives details of the present imports of foreign manufactures into Szechuen.

There has been a change of late in the Japan Fine Art Association of New Bond Street. It was started in 1881, with Mr. Larkin, formerly of the Japanese Telegraph Service, as Director. He was always, we believe, chief proprietor, his co-proprietors being old residents of Kobe, where he lived for some years. Some put in money, others put in money and their collections. The Association hung out, its flag from a pretty gallery in Grafton Street, which runs between Bond Street and Albermarle Street. We believe its early years were not free from the troubles that always beset infancy. Its Japanese members were the first to leave, and in course of time all the foreign members, save two, went also. Mr. Larkin all the time remaining the "Managing Director." Two years ago it moved into New Bond Street, in the midst of all the galleries, picture, and bric-a-brac shops. Last year the only European, besides Mr. Larkin, was bought out, and the Managing Director became sole proprietor. A few months ago Mr. Larkin returned from a visit to China and Japan, and he is now advertising that he is the association, so that in future we are to have Mr. Larkin's galleries as we have Mr. Wertheimer's, Mr. Dowdeswell's, Mr. Agnew's, and so on. Persons who have lately visited them say that they exhibit every sign of prosperity. A couple of years ago they were confined to the ground floor, where they were extremely prettily upholstered and arranged; now they fill the whole house. The first three floors are public galleries, while the three upper are used for offices and storage. A whole house in Bond Street, as our readers will readily understand, is no trifle. The rent alone must be £500 a year, and it requires a good business to support this with the proportionate rates and taxes. Mr. Larkin, being a man of enterprise, and seeing how pictures of Japan done by English artists have taken the public fancy, has decided to despatch an artist of his own to Japan. For this purpose he has selected Mr. John Varley, of

the Grove End Studios, a well-known water colour artist, to spend a year in Japan, and make a series of drawings during all four seasons. Mr. Varley's work has been principally in the East since 1871. Year after year he has gone to Egypt and sent home drawings of scenery along the Nile up to the second cataract, which have been collected into successive small exhibitions. Mr. Varley comes of an artistic family, being the grandson of one of two brothers who were both prominent founders of the Old Water Colour Society in 1804, and both were exhibitors in that year. During the present season Mr. Varley has two drawings at the Royal Academy and two at the Grosvenor Gallery, all four being Nile subjects. One who knows his work says he has thoroughly mastered the difficulty which besets the path of the average home-staying British artist in treating Oriental subjects, namely Oriental atmospheric effects. It is intended to hold an exhibition of his Japanese drawings at Mr. Larkin's gallery so soon as they are completed.

We learn with sorrow that *The Asiatic Quarterly Review* will not appear again. It was established four or five years ago by Sir Lepel Griffin, and has been for sale for some months back to any one who chose to take it over. At the time it was established Sir Lepel was Resident at Hyderabad, and Mr. Demetrius Boulger, the well-known writer on Eastern subjects, was appointed its editor. Indeed in the first instance we are not sure whether he was not also part proprietor: in some quarters an impression prevailed that he was sole proprietor. However this may be, during the latter portion of the magazine's career Sir Lepel was sole proprietor with Mr. Boulger as editor. It was one of the best printed periodicals in London, comparing very favourably in this respect with the larger half-crown magazines. Its literary contents, too, were all that could be desired; the ablest men in their respective subjects being contributors to its pages. The well-known article of the Marquis Tseng on what he called "the Awakening of China" appeared in it; so did Lady Dufferin's manifesto about her scheme for the appointment of nurses for Indian women. Indeed Mr. Boulger was the English Secretary of this latter movement. The late Sir Henry Yule wrote some of his most charming papers in the *Asiatic Quarterly*, and Sir Lepel Griffin's own articles, which were very numerous, were not only excellent in form but very striking in substance. The subscription was only a pound a year, and the periodical appeared to be well supplied with advertisements. In spite of all these advantages it has failed, probably because readers in the East, and especially in India, never took a fancy to it. It had to compete with what is perhaps the best magazine in the British Empire outside the British Islands, namely, the *Calcutta Review*, which was established by Sir John Kaye about forty years ago, and which he has himself declared to be the greatest work he ever did for India. It is extremely difficult to say at any time what are the conditions of success in a periodical published in London. For our own part we think the chief condition is that it should belong to a leading publisher, i.e. be his property. In such a case it is perfectly certain to have shoals of advertisements from other publishers, who, in their turn, receive advertisements for their magazines from the publisher in question. It is a case of "scratch my back and I'll scratch yours." In the vast majority of cases the advertisements belong to the publishers, so that unless the publisher be also proprietor, the latter goes to the wall. In speaking of the Marquis Tseng's famous article, there can be no harm in mentioning now that he never saw the article until he received a copy of the magazine containing it in Peking. He was asked to write it and consented after some hesitation; he then discussed the contents fully with the gentleman who actually clothed it in English, but neither in manuscript nor in print did he see it afterwards. The whole matter was arranged at a single interview, but the writer was intimately acquainted with the Marquis's

views, and many of the expressions used in the article which subsequently struck the public by reason of their vigour, originality, and appositeness were really expressions used by the Marquis himself on previous occasions, though not in view of the article. *The Times'* review of the article extended to three columns, and was in fact longer than the original itself. The three columns were, we believe, written under great pressure; the race was against time, and it is said that the critique was concluded in a little over three hours, or at the rate of about a column an hour. It should be mentioned that the article, though written under these circumstances, did not contain ten lines of quotations from the original. This feat was beaten, however, by *The Times'* obituary of Darwin, which extended to seven columns, and which was all written after six o'clock in the evening by a writer who, then for the first time, had learned that the illustrious man of science was dead. He began, it is said, by obtaining from the publisher a complete list of Darwin's works and a complete set of the volumes of *Nature* with their indices. But the mere mechanical copying of such an article, would, one might have thought, have occupied more than the time given to compose it, for the very latest hour for inserting matter in *The Times* is 2.15 a.m. The paper has then to be printed and got ready for despatch by the newspaper trains, which as a rule leave all the important London stations at five o'clock.

Japan is not often mentioned in the House of Commons, which perhaps is no great loss to Japan. However, last week Sir George Campbell, on the Diplomatic and Consular vote, in the course of a speech in which he referred to Mr. Clifford Lloyd, Erzeroum, Armenia, the New Hebrides, the Orange River, East Africa, Zanzibar, Mr. Stanley, &c., &c., happened in his roving to light on Japan, with the following result, as reported in *The Times*:—"Having next complained of the setting up of a Consular Court in Japan, he asked the Government to explain the position of affairs in the New Hebrides." Sir James Fergusson, the Under Secretary for Foreign Affairs, had of course to refer to all these and many other parts of the world in his reply. The following is his reference to Japan, and we must say, making every allowance for possible abbreviations in reporting, it requires some explanation. However here it is for what it is worth:—"With regard to the treaty with Japan, the fact was that the Japanese Government had carried on negotiations up to an advanced point and had then broken them off, so that they had to be commenced again from the beginning. It was not the case that other nations had concluded treaties from which we shrank. The United States of America did conclude a treaty with Japan, but afterwards themselves withdrew from it. Her Majesty's Government were acting in concert with other Powers in endeavouring to obtain full recognition of the rights of foreigners in the Japanese Courts on terms which would be honourable to the Japanese, and at the same time acceptable and satisfactory to Europeans."

In the deaths' column of *The Times* in the middle of June there appeared the following announcement, which has already been copied by Yokohama journals:—

On the 6th May, at Oxford, MABEL DESBOROUGH, wife of EGERTON B. LAVETT-SCHREYER, Esq., and second daughter of Sir HARRY PARKES, K.C.B., late of China and Japan. Killed by the fall of her horse while riding.

This was more than a month after the frightful event which it recorded. We have now obtained the full report of the tragedy from a local journal, and append it in the belief that many of our readers will be anxious to know the details of the sad end of one whom, in the old days when Sir Harry Parkes reigned and ruled in Kojimachi, many of us remember as a bright and lively child, walking by the side of that universally beloved lady, her mother, or driving out with her in the well known Legation phaeton with its pair of spirited Manila ponies. One

can scarcely trust one's self to speak of such a sudden termination of a life so full of promise of happiness.

On Tuesday afternoon, at about half-past two o'clock, a shocking accident happened on the Botley-road, near Osney, which unhappily was attended with fatal consequences. It appears that Lieut. E. B. B. Levett-Scrivener, Bursar of Keble College, and his wife were riding on horseback, and when near the railway bridge which crosses the road the lady's horse was startled by the whistling and escape of steam of an engine, and becoming restive it started at a canter. When near the new bridge over the river it suddenly swerved to the left, and getting on the pavement it slipped and fell, throwing its rider violently off into the road way on to her head, and rolling on her. Mrs. Scrivener was removed, bleeding and insensible, into the house of Mr. Bell, where every attention was paid to her: the horse ambulance was sent for, and the injured lady was removed to the residence of Dr. Sankey in St. Giles's, and thence to her home, No. 10, Canterbury-road, but she never spoke after the accident, nor did she become conscious, and death took place at about four o'clock. She had sustained a fracture of the skull, and there was a large bruise over the left eye. The deceased was but 25 years of age, and has left a family of young children: she was accustomed to equestrian exercise, and it was after the noise made by the engine that a cabman startled the horse again by "smacking" his whip. It is somewhat singular that the G.W.R. Company have recently had a hoarding erected on each side of the bridge, but apparently with little or no beneficial result.

The Coroner's inquiry was held before E. L. Hussey, Esq., on Thursday at noon, Mr. Elliott being chosen Foreman of the Jury.

The Coroner having remarked that the case was a very distressing one, and briefly alluded to the circumstances under which the accident happened, said he was not aware that there was any blame to be attributed to anyone. It was a long time since anything of this kind had happened—as far as he knew, forty years ago—when a lady was thrown from her horse on Cumor Hill, and died from the injuries received. He thought that was very creditable to the training which saddle horses had under horse-keepers in Oxford. He thought it also spoke well of the skill of ladies who rode them, that so many years had passed since anything of the kind had happened.

The Jury having viewed the body, Lieut. E. B. B. Levett-Scrivener, R.N., Bursar of Keble College, stated that the deceased was his wife, and she was nearly 26 years of age. She used to ride a good deal before they were married six years ago, but had only ridden about three or four times lately. She had good control over her horse, and could manage it well. He knew the horse which she was riding on Tuesday, his wife having ridden it before. He also knew several other ladies who had ridden it. He did not blame Mr. Holford in the least, as it was a horse which witness had selected himself. On Tuesday afternoon about 2.30 witness and his wife started on horseback from their residence with the intention of going to Longworth. Before passing under the G.W.R. Company's bridge on Botley-road he saw an engine standing on it, and knowing this to be dangerous he stopped to let the train go over. The engine which was attached to a goods train was taking in water. He waited until the train had gone in the direction of London. Meanwhile the horse upon which Mrs. Scrivener was riding half-bolted. Whilst he was waiting he believed the engine blew off some steam, as far as he could recollect, and this startled his wife's horse, which turned and made off towards the town. His wife stopped the animal by the time it got to the L.N.W.R. Station. They turned, and just as they passed under the railway bridge a cabman "smacked" his whip. Mrs. Scrivener's horse went off in a canter until it got near the new Osney Bridge, near the corner of which it got on the pavement. His impression at the time was that the animal was going to "take" the bridge and "go" for it. It got on the pavement, slipped down, and not recovering, his wife fell off. The horse slipped down and plunged, and this was what he thought threw her. He followed behind on purpose to watch her. Mrs. Scrivener was rendered insensible by being thrown off, and was taken into the house of Mr. Bell near by. A horse ambulance was obtained, and the deceased conveyed home. Dr. Sankey was called upon on the way, and accompanied witness to his home. The deceased never spoke afterwards, and died in his presence about a quarter-past four o'clock.

The Foreman of the Jury observed that if there was any danger caused by engines standing on the bridge a representation should be made to the Great Western Railway Company, but it was pointed out that a hoarding forbidding locomotives to stand on that bridge had been put up a week or two ago.

A Juror remarked that he thought the accident was to be attributed to the smack of the cabman's whip.

Edward Reynolds, of 3, Henley-street, messenger at Mr. Emberton's, said that he had been delivering parcels at Osney on Tuesday afternoon. He was returning about 2.45 p.m., and just as he got on to the pavement leading under the bridge he saw a lady and gentleman on horseback. The lady was in front, and he noticed that when her horse got under the railway bridge it began prancing and then began to gallop. When it got to the gate-house it "cocked up its head, looked round, and away it went." It got on to the pavement

going at a "tidy" rate until it got within ten yards of Osney Bridge. He could see the deceased pulling the reins, and she must have given a sharp tug before she got to the bridge. The horse fell sideways, and the lady with it. As far as he could see she touched the ground. She was picked up insensible, and taken to a house close by.

By a Juror—Witness did not hear a cabman cracking his whip.

In answer to the Coroner, the witness said the foot pavement near the bridge was a little higher than the roadway.

Dr. J. O. Sankey, 35, St. Giles's, said Lieut. Scrivener came to his house about 3.40 on Tuesday afternoon, having his wife in a horse ambulance. At Mr. Scrivener's request witness accompanied them home. He found Mrs. Scrivener quite insensible. There was a bruise, and she was in so critical a condition that he did not have her moved off the stretcher, but had her brought into the house just as she was. He could not make a complete examination of her then; she died in about a quarter of an hour. He thought her skull was fractured by the injuries which her husband had described, and that was the cause of death. He subsequently examined the body, but could not find that any limbs or ribs were broken.

A verdict of "Accidental death" was recorded.

The body was taken on Thursday to the Great Western Railway Station, and was conveyed by the 1.40 train to Piddington, en route to Silton Abbey, Suffolk, for interment, which took place on Friday. The funeral arrangements were in the care of Messrs. Elliston and Cavell, of Oxford.

NEW GUIDE TO NIKKO.

MESSRS. MARIYA & Co., Tokyo, have just published a new pocket guide to Nikko and neighbourhood, by Mr. U. Ban. The little work contains a map of the roads, rivers, and mountains of the Nikko range, including the lakes at Chuzenji and Yumoto, also a map of the country lying between Tokyo and Imaichi in one direction, and Takasaki and Utsunomiya in the other, showing the railways in the district. There are also railway time-tables, fares, and distances. The present issue of this guide will doubtless soon be exhausted, as it is well printed and nicely bound in cloth, and only costs 30 sen. The publishers should then have the English revised, as the work now contains several blemishes of composition, and the author would do well to go over the ground again and correct some palpable errors. He refers to the bridges of fag-gots crossing the river in the gorge on the road to Chuzenji. These are now done away with, the new road cut on the north side of the stream rendering the old bridges unnecessary. Speaking of the lake at Chuzenji, he says:—"This is one of the principal points to which visitors will direct their steps," but farther on he remarks, "as there are no comfortable inns at the lake at Chuzenji it is best for visitors to go on to Yumoto," &c. This is a mistake. Foreigners who have stayed at the Komeya at Chuzenji have expressed their satisfaction with the cookery and accommodation afforded by that establishment, which view, considering that it is a Japanese inn pure and simple, we can endorse. Mr. Ban might measure the Kegon-no-taki—no difficult task—if he wishes to give the height of the fall, but it is not necessary to do so to determine that it is not 750 feet, though popular belief assigns that height to it.

THE COMMERCIAL CODE.

THE Tokyo Merchants' and Manufacturers' Association has joined the ranks of those who advocate the postponement of the date for putting the Commercial Code into force. A meeting of the members was held on the evening of the 21st inst. at which, after listening to an address by Mr. Shirofi, an Indian gentleman, the members discussed the Code at some length. Mr. T. Abe expressed the opinion that certain parts only of the Code need be postponed; Mr. Masuda supported this view, and suggested that the concurrence of all Chambers of Commerce throughout the empire should be obtained to a memorial to be presented to the Government. Mr. S. Umeura advocated the immediate presentation of a memorial. Mr. Yoshida was against the putting into force of certain parts of the Code, and thought all its provisions should be postponed, and Mr. Yamana expressed a similar opinion. Mr. Okura was in favour of a date being fixed as that to which the enforcement of the Code should

be postponed. It was eventually agreed that the Commercial Code ought to be postponed till the date on which the Civil Code will come into operation, and that meanwhile the opinions of other commercial bodies should be invited.

OCCIDENTAL CIVILIZATION AND JAPANESE SELF-CONFIDENCE.

THE *Kokumin-no-Tomo* of the 23rd ultimo has an interesting article on the self-confidence of the Japanese nation as affected by the advent of Occidental civilization. The gist of the article is as follows:—"At critical moments in a country's history, nothing can be more deplorable than that its people should possess little confidence in their own power. Comparing the present state of things in Japan with what existed a little more than twenty years ago, we are struck by a grievous decadence in the self-confidence of our countrymen. Where is now that youthful vigour and boundless assurance which pulled down the mighty edifice of feudalism and inaugurated a wholly new order of things? Now that we are arrived at a second Restoration, we cannot persuade ourselves that the nation looks as hopeful as it did two decades ago. The Japanese are not naturally wanting in self-confidence; in some instances the exact reverse is the case; occasionally our countrymen are conspicuous for their self-conceit and egotism. But the self-confidence of the nation seems to have been very much shaken since the opening of the ports for foreign intercourse. The map of the world has disappointed the Japanese by showing that the country of which they have hitherto been so proud is a mere dot, which a careless eye may fail to notice. They have been disappointed by the sight of Western races, beside whose fine physique their small and short bodies look hopelessly weak. Jurisprudence, medicine, science, religion, in fact everything brought here in the train of the new civilization, has been, in one sense, a source of disappointment and a cause of dejection. Those of our countrymen who have visited Europe and America have all brought home as their *miyage* (gift to friends and relatives) disappointment or its seeds. There is a body of men who are loud in condemning the modern tendency to denationalization. They profess the profoundest aversion for indiscriminate imitation, and have shown laudable zeal in checking Japan's pernicious proneness to self-effacement. But they are not on that account a whit less wanting in self-confidence than the rest of the nation; on the contrary, they are conspicuous for their timidity and faint-heartedness. Men of this school—popularly called *Kokusui-hozonronsha*—are opposed to the influx of foreigners into the interior of the country, because they have little faith in their own capacity to stand their ground successfully in a commercial and industrial contest with European races. The whole tone of their argument is so depressing and melancholy that we might almost imagine the country to be actually on the verge of ruin and extermination. Such is not the kind of argument usually expected from men possessing manly belief in themselves and their abilities. It would seem, then, that intercourse with foreign countries has made one section of the nation mere imitators, and the other section timid exclusionists; while both sections resemble each other in their want of self-confidence. Is there any reason why our country should not maintain its position as a first-rate Power in the East? No elaborate statistics are required to decide this question. The answer must come from the heart of every true born Japanese. Look at modern Italy. After having been for many centuries trodden under foot by other nations, the whole peninsula has again been united under one Sovereign, and is now successfully aspiring to take its place among the leading Powers of Europe. What is the cause of the greatness of modern Italy? Nothing but the confidence of her people in their own strength and destiny. What is the state of things in Japan? Most of the leaders of the nation, who in the past served their country in every critical moment, are busy amassing fortunes and amusing themselves. Such of them as have

some regard for the good of the State, seem resolved to entrench themselves behind laws and regulations; at any rate their sole occupation now seems to be the framing and issuing of law after law and regulation after regulation. We cannot but sympathise, to some extent, with their assiduity, but, on the other hand, we cannot but marvel at their narrow-mindedness. They rely on laws and ordinances because they have little confidence in themselves. But what are laws and ordinances if the statesmen who frame them have no ability to inspire the nation with trust and hope in its rulers? What are the men outside the Government doing? They give no more evidence of realizing the vast responsibility of the situation than do the narrow-minded statesmen in power. Politicians who have been returned for the coming Diet seem to think only of their good luck while the unsuccessful candidates have either abandoned themselves to dejection or are taking all possible pains to find means of blackening the character of their happier rivals. Thus both the Government and the people seem to be passing through the present important crisis in the history of the State without realizing the grave responsibility devolving on every true lover of his country. Goethe tells us that each man's place in the world is determined by his own aspirations. If we Japanese only have confidence in ourselves, and if, realizing the nature of our situation, we make our hearts as that of one man, then nothing can prevent us from winning for our country an honourable and dignified status among the nations of the world."

TREATY REVISION.

Thus far no political party has taken any definite attitude on the new proposals for treaty revision which appeared in *The Times*. But now report has it that a certain party entertain a somewhat hostile view in regard to this matter. Apart from the merits of the new programme they are reported to say, it is quite incomprehensible why the Government should be inclined to hasten revision, considering that the Diet is to be opened in the very near future. Granted that the function of concluding treaties with foreign Powers is among the prerogatives of the Emperor, it seems at the same time to be the proper course that the main features of the proposals should first obtain the endorsement of the Diet. In fact such endorsement is necessary in the case of the commercial treaties for putting them into operation. Why then have the Government made these proposals of their own initiative with the assembly of the Diet actually in sight? "In regard to this point," says the *Tokyo Shimpō*, from which we extract our news, "it may possibly be found necessary to take some active steps." But perhaps the *Tokyo Shimpō*, since it has set the example of discussing this subject, will pardon us for reminding it that in no country in the world is Parliament consulted about the preliminary stages of treaty-making. If such a course were pursued, the conclusion of international covenants would become wholly impossible. It is quite true that the Diet will have a final voice in respect of Treaty Revision, since it must be asked to legislate for the purpose of putting the new treaties into operation. But to enlist its aid and co-operation for the purpose of drafting proposals would be indeed a strange, unpractical, and unprecedented course. The representatives of the people must be content with the reflection that the ultimate fate of the treaty will be in their hands, but that their interference in the initiatory stages would be fatal to the conclusion of any treaty at all.

THE STENOGRAPH SHORTHAND MACHINE.

Messrs. KELLY and WALSH have now for sale a very ingenious little machine which is designed by its inventor to take the place of the shorthand reporter—indeed, we believe an impression exists that it may find a place in the official reporters' gallery of the Japanese Houses of Parliament. The alphabet of the machine consists of various arrangements, on a narrow paper ribbon, of short vertical strokes. These strokes may be printed in

five positions across the tape, a stroke on the edge of the ribbon nearer the operator representing "d" while "n" "r" "t" and "s" are placed in the other positions, the last named letters being shown by a stroke on the edge farther from the operator. The other letters of the alphabet are represented by various combinations of the radical strokes, to obtain which the corresponding keys are struck simultaneously. The keys of the instrument, ten in number, consist of a spacing key, the key for "d" which is to be struck by either thumb, and four other keys on each side, representing the four remaining positions on the ribbon, this provision of two keys for each character being designed of course to permit the use of the fingers of both hands. The little instrument is of the most simple nature and a breakdown would seem to be almost impossible. A high rate of speed is said to have been attained on it; certainly its operation calls for the merest trifle of exertion as compared with the labour of shorthand writing. Whether the principles of shortening words by lopping off terminations, reducing the spelling to a partially phonetic basis, or representing phrases by such letter combinations as "vhl" for "of the" are consistent with legibility, is a question which can only be answered after trial. Of one thing, however, the designer may be certain: before the machine can be utilized for reporting Japanese its alphabet must be entirely changed so as to adapt it to the requirements of that language. The single strokes are at present allocated to the most frequently recurring letters in English; in Japanese an entirely different set of consonants would call for representation by the simple strokes. The alphabet is essentially consonantal, which of course increases the tendency to illegibility when, as here, no means exist of indicating vowels by the position of the consonants.

AUCTIONS OF SHARES.

THE auction in Messrs. Eytan & Pratt's rooms on Tuesday forenoon of Grand Hotel shares drew such an assemblage of the capitalists of the Settlement as can rarely be witnessed. The shares advertised, 200 in number, were put up in lots of ten. The first lot went to Dr. Tripler for \$148 each; seven lots were purchased, in the order given in the following table for \$143. Paymaster McDonald bidding on behalf of the purchasers; Mr. Halphen then raised the figure a dollar per share and took in three lots; four "tens" were knocked down to Mr. McDonald acting for other purchasers at \$143, one lot at \$145, and the remaining four tens for \$143. Mr. McDonald now called on the auctioneer to put up 200 shares in one lot; for these the bidding, beginning at \$125, rose to \$137, at which figure Mr. Beyfus became the purchaser. The following is a list of the sales:—

	£	\$
Dr. Tripler	148	1,480
Mr. Reisinger	143	1,430
Mr. Murdoch	143	1,430
Mr. Cook	143	1,430
Mr. Diefenbach	143	1,430
Mr. Trott	143	1,430
Mr. Howell	143	1,430
Mr. Britton	143	1,430
Mr. Halphen	144	1,440
Mr. Lazard	143	1,430
Mr. Moffat	143	1,430
Mr. Wilde	143	1,430
Mr. Greir	143	1,430
Mr. Hines	145	1,450
Mr. Berry	143	1,430
Mr. Ackerman	143	1,430
Mr. Boyd	143	1,430
Mr. Heyvyn	143	1,430
Mr. Beyfus	300 at 137	27,400
Total		\$56,100

On Wednesday forenoon another lot of 250 Grand Hotel shares were offered for sale by public auction in Messrs. Eytan & Pratt's rooms. There was a very large attendance. The shares were put up in one lot and ran rapidly up to 130. Thence they rose by bids of a dollar till they stood at 135½, which figure was offered by Mr. Witkowski. Mr. Beyfus capped it with a bid of 136, at which the lot was knocked down to him. A lot of 250 shares in the Yokohama Engine Works were also put up, but were bought in at 124½.

LAUNCH OF A STEAMER.

On Saturday morning last, says the *Rising Sun*

of the 23rd ult., at 9.15 a.m. prompt, the *Kisogawa Maru*, the second of the three steel steamers being built by the Mitsu Bishi Dockyard and Engine Works, for the Osaka Shosen Kaisha, was most successfully launched from the Company's ship-yard at Tategami, the christening ceremony being performed by a young daughter of Mr. M. Yamawaki, local director of the Mitsu Bishi Co. The *Kisogawa* (the name of a river which runs through the province of Owari) is sister ship to the *Chikugogawa*, launched from the same yard about four months ago. She is a two-decked vessel, constructed according to Lloyd's Rules, and classed 100A; is fitted with water ballast tanks; her machinery is of the triple-compound surface-condensing type, with cylinders of 15 in., 23 in., and 59 in. dia., with a stroke of 30 in. Steam, at 150 lbs. pressure, will be supplied from a large steel boiler, having three furnaces, fitted with Fox's corrugated flues, the total heating surface being 1,570 square feet, and the weight of the boiler 33 tons. The engines, boiler, and fittings have all been constructed at the Mitsu Bishi Works.

THE CLOSING OF THE EXHIBITION.

On Thursday afternoon the ceremony of closing the Third Domestic Exhibition at Ueno took place, and this morning the operation of removing the exhibits begins. The grounds of the great show were crowded same on Thursday as the hour of closing drew near, and at five o'clock a large assemblage of high officials of various departments and of exhibitors collected in a structure erected in front of the temporary museum, similar to that in which the opening ceremony took place. This structure, which was canvas roofed, was hung round with flags and purple cloth bearing the chrysanthemum, and almost in the centre was a platform (approached by a gangway) on which the chief actors in the ceremony had their places. Outside the Guards' Band played at intervals, and at the conclusion of the function a performance was given on a small platform near the band stand. Soon after five o'clock H.I.H. Prince Fushimi, President of the Exhibition, took his place on the platform beside a small table near its centre, supported on the left by Mr. Mutsu, Minister of State for Agriculture and Commerce, while facing him at some little distance stood Mr. Hanabusa, Chairman of the Executive Committee of the Exhibition, and Mr. Kuki, Director-General of the Imperial Museum. Mr. Hanabusa stepped forward and read a brief address, after which the Prince in a short speech declared the exhibition closed. Marquis Hachisuka, on behalf of the various *chiji* of cities and prefectures, read another short address which closed the proceedings, the President then leaving the platform.

We learn from the *Official Gazette* that from 1st April up to the 30th ult. (Wednesday), the total number of persons who visited the exhibition was 1,017,857, of which 7,602 were distinguished, 42,005 special, and 941,300 ordinary visitors, 26,709 students, and 241 foreigners holding special invitations. This shows an average for each day opened of 8,412.

THE PRESIDENT OF THE UPPER HOUSE.

SOMETIME ago, we read in the *Nippon*, Viscount Watanabe addressed a circular to the recently elected members of the House of Peers, advising that the President of the House should be nominated privately, and his name submitted for the consideration of H.M. the Emperor. This suggestion met with strong opposition at the hands of Viscount Tani and others, who maintained that the contemplated action was entirely repugnant to the spirit of the Law of the Houses. Viscount Watanabe subsequently wrote a lengthy reply to his opponents, and also delivered an address in the Peers' Club explaining his views, but the great majority of the peers appear to be strongly opposed to his scheme, and the movement will prove abortive.

THE ABOLITION OF RICE EXCHANGES.

THE *Tokyo Koron* notes with some surprise that though Mr. Minami Teisuke, who with a

member of the Tokyo Rice Exchange, was sent abroad to make enquiries as to foreign bourses returned home some months ago, no report embodying the result of his investigations has yet been issued. The impression prevails largely among members of Rice Exchanges that this delay can only mean an intention on the part of the Government to continue the existence of the exchanges after the time (June next year) to which their charters were extended. Our contemporary, however, holds the opinion that the exchanges will be closed in June, and their place taken by bourses (*tori-hiki-sho*) for the purchase and sale of grain by sample (*mihan-bai*), such bourses, however, differing very materially from the establishments provided for in the Bourse Regulations promulgated in 1888.

CHOLERA.

The latest cholera returns for Nagasaki are:—

July 25th	New cases 76
Deaths	34
July 26th	New cases 49
Deaths	36
July 27th	New cases 74
Deaths	31
July 28th	New cases 53
Deaths	13
July 29th	New cases 60
Deaths	34
July 30th	New cases 32
Deaths	21
July 31st	New cases 82
Deaths	52

These figures bring the total number of seizures since the commencement of the epidemic to 1,067, and the total number of deaths to 598. The Nishi-Sonoki district of Nagasaki continues to be the most gravely affected, the number of new cases there on the 25th ultimo having been 48, and the number of deaths 23; the number of new cases there on the 29th ultimo were 20, and the number of deaths 17; and on the 30th new cases 17, and deaths 15. The disease seems to be widening its area of operations, for seven districts, including the city proper, are now shown as having been invaded. The remaining returns published by the *Official Gazette* are as follow:—

Places.	City or Prefecture.	Remarks.
Kuma-no-jogo	Kagoshima	Four cases on the 23rd and 24th.
Demizu-mura	Kagoshima	Four cases. All these eight cases terminated fatally.
Takemoto	Kagoshima	One case.
Ashiya	Fukuoka	Eleven cases on the 22nd and 23rd, and fourteen cases in other parts of the same district.
Omuda	Fukuoka	Two cases.
Mikawa	Fukuoka	Three cases.
Yoshimi-mura	Yamaguchi	One fatal case on the 24th.
Onike	Kumamoto	Two cases.
Goryo-mura	Kumamoto	One case each on the 24th.
Tokoro-mura	Kyoto	One case (non-Asiatic) on the 19th ultimo.
Kumura	Kyoto	One case (non-Asiatic) on the 19th ultimo.
Kitajoshin-mura	Osaka	One fatal case on the 21st.
Minami-dori Nichome	Osaka	One case (non-Asiatic).
Kokuho-mura	Hyogo	One case on the 16th ult.
Shikata-mura	Hyogo	One case (a woman) on the 20th.
Kojima-mura	Shizuoka	One case on the 21st, ended fatally next day.
Houchi-mura	Toyama	One case, immediately fatal, on the 21st ultimo.
Miyabara-mura	Hiroshima	One case on the 19th ult.
Yamadanoji-mura	Kochi	One case, immediately fatal, on the 19th ultimo.
Akamagasaki	Yamaguchi	One woman attacked on the 25th ultimo.
Udogori, Ashi- hitagori, Ama- kusagori and Ikinkuni	Kumamoto	Two men attacked on the 25th ultimo in each of these districts (gun and province).
Kagoshima Har- bour	Kagoshima	One man in the steamer <i>Raiden Maru</i> which came from Nagasaki on the 25th ultimo.
Demidzugori	Kagoshima	Three men attacked and two of them died on the 25th ultimo.
The Turkish man- of-war at Yoko- hama	Kanagawa	Eighteen cases and five deaths since the commencement on the 18th ultimo up to the 25th.
Ushigome, Kyobashi, and Kojimachi	Tokyo	One man attacked on the 25th in each of these districts.
Higashiku	Osaka	One man attacked on the 23rd.
Nagaura	Kanagawa	One Turk attacked on the 25th, and two Turks on the 26th.
Jinto-gori	Hyogo	One man attacked on the 26th.
Shikikami-gori	Nara	One man attacked on the 22nd.
Myoto-gori	Tokushima	One man attacked on the 19th and died on the 22nd.
Kumamoto	Kumamoto	46 men attacked and 19 men died during 40 days from 11th June to the 20th ult.

Akamagasaki, Toyama and Oshima-gori	Yamaguchi	3 cases in each place.
Akuta-gori and Amakusa-gori	Kumamoto	1 case in each place.
Ashikita-gori	Kumamoto	10 cases.
Demidzu-gori	Kagoshima	2 cases and 6 deaths on the 27th.
Satsuma-gori	Kagoshima	2 cases and 2 deaths on the 27th.
Asakusa and Shiba	Tokyo	1 case in each place.
Higashiku and Nishi- nai-gun	Osaka	1 case in each place.
Kitasaitama-gun	Saitama	1 case.
Moda-gun	Chiba	1 case on the 24th and 1 death on the 25th.
Miyagi-gun and Toda-gun	Miyagi	4 cases.
Sakai-gori and Nin-gun, Mutsu	Mutsu	4 cases and two deaths.
Hatto-gun	Tottori	1 case.
Nishi-Sajo-gun	Okayama	1 case.
Kochi-gun and Wake-gun	Yehime	1 case in each gun.
Nishi-Kokuto-gun	Oita	1 case.
Yamato Miike-gun	Fukuoka	One case in each district on the 27th ultimo.
Demidzu and Sa- tsuna-gun	Kagoshima	Five cases and three deaths in the former and three cases and one death in the latter district on the 28th ultimo.
Udo and Ama- kusa-gun	Kumamoto	One case in each district on the 27th ultimo.
Akuta-gun	Kumamoto	5 cases on the 17th ult.
Nagaura	Kanagawa	3 cases (Turks) on the 28th ultimo.
Kita-Kambara-gun	Niigata	1 case on the 22nd ult.
Hiraga-gori	Aicita	1 case.
Nishi-Sajo-gun	Okayama	1 person attacked and died immediately.
Iyo-gun	Yehime	1 case.
Kumamoto Muni- cipality	Kumamoto	One case on the 28th ult.
Akuta-gun	Kumamoto	Two cases on the 28th ult.
Udogori	Kumamoto	One case on the 28th ult.
Ashikita-gori	Kumamoto	Five cases on the 28th ult.
Amakusa-gori	Kumamoto	Three cases on the 28th ultimo.
Nagaura and Hirose-mura	Kagoshima	One death in each place on the 28th ultimo.
Nihonhashi and Koji- machi	Tokyo	One case in each place on the 28th ultimo.
Asakusa	Tokyo	One case on the 29th ult.
Tosei-gun	Osaka	One woman and one man attacked, and the woman died on the 25th ultimo.
Nagaura Disinfect- ion Office and Yokohama	Kanagawa	One man attacked in each place, the former being a <i>sendo</i> of the office, on the 29th ultimo.
Juto-gun	Hyogo	One man attacked and died on the 27th ultimo.
Minami-Tsuguru	Aomori	One woman attacked and died on the 24th ultimo.
Kamo-gori	Hiroshima	One woman on the 21st and 22nd ultimo.
Toga-gori	Fukuoka	Sixty cases on the 28th and 29th.
Miike-gori	Fukuoka	18 cases on the 28th and 29th.
Mitsuma-gori	Fukuoka	Nine cases on the 28th and 29th.
All the rural districts	Fukuoka	14th deaths on the 28th and 29th.
Kyobashi & Asakusa	Tokyo	One man attacked on the 29th and died on the 30th in the former place and a girl attacked and died on the 30th in the latter place.
Osaka	Osaka	One woman attacked on the 28th.
Yokohama	Kanagawa	A woman and a man attacked at Minatocho on the 31st ultimo, and one man attacked at Itocho on the same day.
Ono-gori	Fukui	One woman attacked on the 25th.
Sakai-gori	Fukui	One woman attacked on the 26th.
Niu-gori	Fukui	One man attacked and died on the 27th.
Niikawa-gori	Toyama	One man attacked and died on the 25th.

The latest returns for Yamaguchi Prefecture are:—

July 28th	New cases 14
Deaths	6
July 29th	New cases 6
Deaths	3
July 30th	New cases 13
Deaths	10

These figures bring the total number of seizures since the commencement of the epidemic to 81, and the total number of deaths to 53. This total shows some difference as compared with that previously given, owing to failures in reporting cases to the Authorities.

The latest returns for Kumamoto are:—

July 30th	New Cases	9
Deaths		

These figures bring the total number of seizures since the commencement of the epidemic to 135, and the total number of deaths to 57.

The latest returns for Kagoshima are:—

July 30th	New Cases	11
Deaths		6

These figures bring the total number of seizures since the commencement of the epidemic to 51, and the total number of deaths to 26.

The following story is told by the *Koron*:—Sudden and numerous seizures of cholera occurred in Nishisomaki district, Nagasaki Prefecture, on the 21st and 22nd ultimo. Their number is said to have been 82, and their cause the eating of sharks' flesh. The account given is that two sharks were caught in the sea near Amakusa by some fishermen of Tameishi-mura. The fish were taken ashore, and cut up and sold, portions being retained by the captors. All the persons attacked by cholera were of the number of those who had partaken of the sharks' flesh. Official experts have been dispatched to investigate the matter.

GOLD AND SILVER RATIOS.

The *Official Gazette* gives the following table of comparative values of gold and silver coins and of the pound sterling for the week ended the 26th ult., as derived from the returns of the Bank of Japan and the Yokohama Specie Bank:—

Days	Gold Coin, (Per yen 100)	Pound Sterling, (Per £1)
21st	114.000	A.M. 5.6149 P.M. 5.5813
22nd	113.400	A.M. 5.5813 P.M. 5.5813
23rd	113.400	A.M. 5.5813 P.M. 5.5813
24th	113.400	A.M. 5.5813 P.M. 5.6140
25th	113.600	A.M. 5.6140 P.M. 5.6140
26th	113.600	A.M. 5.6140 P.M. 5.6140
Averages	113.567	5.5977

The above averages show for gold coin a decrease in value of yen 1.334, and for the pound sterling a decrease in value of yen 0.0661 as compared with the previous week.

THE BANK OF JAPAN.

The amounts of convertible notes and reserves in the Bank of Japan for the week ended the 26th ult. were as follows:—

Convertible Notes.	YEN.	Reserves and Securities.	YEN.
Notes issued	71,819,695	Gold coin and bullion	24,295,247
		Silver coin and bullion	25,305,091
		Public Loan Bonds	13,470,450
		Treasury Bills	—
		Government Bills	—
		Other securities	4,732,183
		Commercial Bills	3,959,721
	71,819,695		71,819,695

Of the above total issue of notes, the sum of yen 4,572,434 is in the treasury of the Bank, and yen 67,247,261 in actual circulation, the latter showing a decrease of yen 1,059,825 as compared with yen 68,307,086 at the end of the previous week.

LOCAL OFFICIALS AND THE CITIES AND PREFECTURES REGULATIONS.

The arrival in Tokyo of many prefectural Governors and Secretaries is noted by the *Daido Shimpō*, which attributes their coming to a desire on the part of the Government to learn their views as to the Regulations for the Organization of Cities and Prefectures prior to the carrying out of those enactments. Meetings of the local officials will open about the beginning of August in the Home Office.

"THE LIBERAL."

In regard to the nature of the *Jiyu Shimbun* (*The Liberal*), various rumours have been circulated, but the *Nichi Nichi Shimbun* is informed by a trustworthy person that the newspaper is not intended to be the political organ of either Count Itagaki, or of the *Atokoku-ko*. Nor is it to serve as the exponent of the Koin Club. Its true object is to devote itself to the promotion of the interests of liberalism in general, without exclusive reference to any of that party's different sections.

THE DEFENCE OF HOKKAIDO.

We learn from the *Hochi Shimbun* that with a view to the more efficient defence of the island of Hokkaido, the War Office has decided to add annually one *daitai* (regiment) to the Colonial Militia, the yearly cost being put at yen 500,000.

REYNELL & CO. v. THE SIAM SHOKWAI.

THE charge of fraud recently preferred and established against certain Japanese tradesmen by Messrs. REYNELL & Co., of Yokohama and Kobe, seems to have excited some interest. One of our local English contemporaries, reviewing the case, has expressed views favourable to the acumen and expeditious procedure, of the Tokyo Appeal Court, accompanying them, however, by comments which do not commend themselves as either just or courteous. We are well aware that foreign suitors have had many and good reasons to complain of the difficulty of obtaining justice under the provisions of Japanese law, but even among the greatest sufferers there are few, we imagine, who would not condemn as thoughtless exaggeration the statement that now only, and as an inference from this one case, is there "just a chance of foreign rights being vindicated and Japanese fraud punished by the native courts." It is especially singular that such an assertion should appear in a journal which, half-a-dozen years ago, devoted one of its leading columns to panegyrics of the procedure of the Japanese law courts at Kanagawa and rejoicings over the justice which foreign suitors had uniformly obtained from those tribunals throughout the year which the journal happened to be reviewing. However, there is little use in discussing lightly penned phrases of hyperbole and contradiction. Laws and their administrators must everywhere and always remain the mark of hostile criticism, whether a DICKENS attacks them in "Bleak House" or a Yokohama editor inveighs against them in little read columns.

The case of Messrs. REYNELL & Co. v. the Siam Shokwai may be briefly stated. A Japanese named UYENO established an association with the avowed object of trading between Japan and Siam. Having no capital himself, he persuaded three friends, IWAMOTO, SAITO, and ISHII, to contribute a certain amount. At the outset UYENO tried to induce Messrs. REYNELL & Co. to undertake the importation of teak-wood for use at the Yokosuka Dockyard, with which he had established business relations. Messrs. REYNELL & Co. failed to come to terms, however. A few months later Messrs. JARDINE, MATHESON & Co. imported a cargo of teak. UYENO, hearing of this, reopened negotiations with Messrs. REYNELL & Co., and finally induced them to purchase the cargo from Messrs. JARDINE, MATHESON & Co., UYENO falsely representing that the Yokosuka folks had agreed to take over the whole of the wood, whereas in truth they had only promised to take over a part. In carrying out this arrangement, UYENO alone, so far as we can gather, was to transact business with the Yokosuka Dockyard, receiving payment for the teak and handing the

money to Messrs. REYNELL & Co., who were to make a certain calculated profit and to pay UYENO a fixed commission. UYENO received \$16,000 from the Dockyard Officials. Instead of transmitting the money to Messrs. REYNELL & Co., however, he appropriated it, giving a portion to his three partners. Proceedings were instituted against him, but before their conclusion and while undergoing examination in Court, he died of paralysis. IWAMOTO, one of the other partners of the Siam Shokwai, was then arrested, and with SAITO and ISHII arraigned on a charge of fraud. His defence was conducted by one of the ablest barristers in Japan, Mr. HATOVAMA, the counsel for Messrs. REYNELL & Co. being the well known Mr. R. MASUJIMA. The principal line taken by the defence was that no sufficient evidence of fraudulent intention existed against the defendants, their claim being that they had received the money from UYENO believing it to be profit earned by legitimate trade. This plea succeeded in the lower Court, but the Public Prosecutor carried the case to the Appeal Court, and there obtained a verdict condemning IWAMOTO to 18 months' imprisonment and SAITO and ISHII to a year each, and recognising all Messrs. REYNELL & Co.'s civil claims against the Siam Shokwai.

It will be perceived that the act of fraud established against the defendants by the Public Prosecutor under Articles 390 and 395 of the Criminal Code, began when UYENO, the chief partner of the defendant firm, attempted to conceal and abscond with money received by him from the Yokosuka Dockyard as proceeds of the sale of teak-wood bought and paid for by Messrs. REYNELL & Co. If, however, we trace the course of events farther back, it appears that the Siam Shokwai had virtually no capital except a few thousand yen contributed by UYENO's subordinate partners. The firm, therefore, was not possessed of means to purchase the whole cargo of teak imported by Messrs. JARDINE, MATHESON & Co., whereas the latter declined to sell a part. UYENO then resorted to the subterfuge of falsely informing Messrs. REYNELL & Co. that the Dockyard Authorities had agreed to take over the whole cargo at a price per cubic foot which would leave a handsome profit. Evidently fraudulent proceedings began then, and Mr. MASUJIMA, counsel for the plaintiffs, endeavoured to have the defendant's crime dated from that period. He failed, however, on the technical ground that, according to Japanese law, plaintiffs in the position of Messrs. REYNELL & Co. are precluded from becoming parties in a criminal process except in so far as the damages claimed by them can be shown to be connected with the criminal charge. The provisions of law under which the prosecution was instituted are sufficiently wide in terms, but it is not always easy to draw the line clearly between civil and criminal

acts. We do not, therefore, contend that the Public Prosecutor failed to utilize the law to its fullest extent, though we regret that he could not see his way to extend the scope of the charge. Much of the practical beauty of legal enactments must depend on the discretion and judgment with which they are applied. If foreigners have often been disappointed in obtaining due redress from Japanese tribunals, it does not, we think, necessarily follow that the Japanese view of moral obligations is theoretically less comprehensive than the European or American. The present case has been cited as a happy evidence of judicial progress, but it is by no means a solitary case. We are, persuaded that a more intimate acquaintance with Japanese courts would re-assure many as to the practical existence of that finer appreciation of modern conditions without which the spirit of the law cannot be fully carried into its practice. There is little cause to complain of the Japanese Criminal Codes, and every evidence of their sensible application inspires additional confidence in the benefits which the country will derive, both domestically and internationally, from the promulgation and enforcement of the new civil laws.

JAPAN AND SIAM.

OUR distinguished Siamese visitors have been devoting themselves to the Exhibition, of which they are loud in their praise, and in which they found a great deal that is of special interest to themselves. So far from having any political object, they come simply as holiday-makers. His Majesty the KING of Siam has just returned from a long tour round his dependencies in the Malay Peninsula, in the course of which he visited also Perak, Penang, Singapore, and Pahang, in the first and last of which he desired to see for himself the differences between British and Malay Administration. HIS MAJESTY is a man of great intelligence and acute observation, speaking and reading English with ease, and during the whole of his long journey, which encircled the entire Malay Peninsula from Burmese territory on the north-west coast right round to Siam proper on the north-east, he was at every point the most eager inquirer and the keenest critic. So far as British Malay possessions and protectorates are concerned, few things would be more interesting than to "see ourselves as others see us" through the medium of HIS MAJESTY'S private diary, if such a thing were possible. The Royal journey lasted over three months, and the KING took with him a fleet of a dozen ships and most of his Ministers of State, including Prince DEVAWONGSE, the well-known Minister for Foreign Affairs, through whose hands all the official intercourse between Siam and the rest of the world passes, and also no inconsiderable part of its domestic administration. All this time H.R.H.

Prince CHOW FA BHANURANGSI SWANGWONGSE held the reins of Government in Bangkok, and naturally enough, after HIS MAJESTY'S, return he started upon a well-earned holiday.

"Somdetch Krom Pra Ong Noi," to give Prince BHANURANGSI his proper Siamese title, is a very well-known figure in Bangkok. He is the younger of the KING's two own brothers, the elder, whose title is "Ong Yai," living in semi-retirement on account of ill-health, although nominally the administrative head of the national finances. The "Ong Noi," as our Royal visitor is familiarly called by foreigners in Siam, bears a remarkable resemblance to HIS MAJESTY in features, in voice, in manner, and in kindness and thoughtful consideration for all who are brought into contact with him. Among the latter, unfortunately, are very few foreigners, the relations between the foreign representatives and the Siamese officials not having been exactly cordial for some time past. It is not necessary here to discuss the grounds of international misunderstanding: experiences nearer home will lead us to conclude that neither side is wholly responsible. And so far as Great Britain and Siam are concerned, it is pleasing to know that on the arrival of Captain JONES, V.C., our new Minister to Siam, the most friendly advances were made by both parties, and a new era of good feeling seemed assured. In such an era Prince BHANURANGSI should play a prominent part. His rank, his official position as Commander-in-Chief, his magnificent palace at Bangkok, filled with collections of everything Siamese that is rare and beautiful, afford him unrivalled opportunities of exerting the most powerful social influence, and his hospitality even in the past, when occasions for it have been few, has been extended with the utmost charm and cordiality.

The truth is that Siam has reached an extremely interesting if not a critical period in her history, and a period, moreover, that should attract the attention and awaken the sympathies of everybody in Japan. What Japan did nearly a quarter of a century ago, Siam is doing to-day—she is just turning the leaf of the volume of her history which separates the old past from the new future. Siam is in many ways walking in the footsteps of Japan, and nowhere are Japanese events and undertakings watched more carefully than in the land of the White Elephant. Like Japan, Siam is reorganizing and endeavouring to develop and Europeanize her administration—army, navy, customs, police, law; like Japan, she feels keenly the evil of extra-territoriality; like Japan, her Constitution has been changed and is to be changed further; like Japan, she has the European Powers at her gates, in a sort of peaceful blockade. She has, however, greater difficulties than Japan ever had. She be-

gan further back and with a social system requiring greater and more vital alterations. She has vast extents of territory over which her sovereignty is exercised with difficulty; China is a sullen neighbour behind the Yunnan borders on the North; England is busily measuring and mapping her frontiers on the West; France is airily presenting claim after claim on the East. But fortunately, like Japan again, Siam has the men for her crisis—her KING himself; and second only to him, Prince DE-VAWONGSE, to whose tact and tireless energy Siam will owe in great part whatever of good her future brings; more than one of her other Ministers of State, and among the foremost, Japan's present distinguished guest.

THE CHARGES AGAINST THE "JAPAN MAIL."

GR^EAT pains have taken by a local contemporary to convict this journal of inconsistency in the matter of Treaty Revision, but even though recourse is had to the familiar device of mutilating our statements and putting in our mouth assertions which we never made, the result of the attempt is a complete failure. Of course it is not our intention to waste space in following our assailant through the intricacies of his very disingenuous argument. It will suffice to repeat in the briefest terms our real position. We hold, then, that the employment of foreign legal experts in the capacity of Japanese judges would have been a desirable measure for all parties, but especially for the Japanese. We hold that the nation has irrevocably made up its mind not to concede these judges, and that to try and turn it from its resolve would be the veriest folly. We hold that the letter of the Constitution cannot, in our view, be construed as prohibiting the employment of foreigners in a judicial capacity for a special international purpose, and so long as this question was in the balance, we spared no effort to enforce our contention. We hold, however, that by far the more influential section of the nation has determined to interpret the spirit of the Constitution in a sense opposed to the enrolment of foreigners in the Japanese judiciary, and that, since this is a point which Japan must decide absolutely for herself, it would be fruitless and vexatious on the part of foreign States to assail her decision. We hold that Western Governments are not at all likely to abandon unconditionally the position of vantage they occupy as actual possessors of certain privileges, and that Japan would be merely inviting failure and humiliation did she expect them so to abandon it. But we hold also that this contention is not as strong now as it was a twelvemonth ago; that it is very far from being as strong as it was four years ago, and that every

year which passes weakens it materially. For foreign States have been gradually coming face to face with a new *vis-à-vis* in Japan; the Japanese Government has been steadily losing the virtually uncontrolled power it possessed for purposes of negotiation; the Japanese nation has almost taken the matter into its own hands and will assume complete control of it ere long; and when a nation undertakes to assert its own independent rights, no treaties that interfere with their enjoyment are worth the paper on which they are written. We hold to everything we wrote last year about the favourable nature of the terms obtained by Japan from some of the Great Powers, and we deem it a matter of lasting regret for all sides that an agreement based on those terms could not be universally concluded. But we hold also, as we wrote at the time, that if in truth the effect of revision on such a basis would be to replace the physical barriers of the old treaties by moral barriers of umbrage and dissatisfaction; equally conducive to the growth of race prejudice and far more difficult to remove subsequently, then the introduction of the contemplated system would be a serious error. We hold that the attitude of the country emphatically indicates that such a result would have ensued, and that since the Japanese statesmen directly engaged in Treaty Revision failed to gauge public opinion correctly or to control it suitably, nothing remained but to change their ground. As to the consequences to Japan herself of such a change, we have expressed no new opinion whatsoever, nor do we propose to express any. Neither have we anywhere said, as our critic most untruly and ungrammatically asserts, that "such a programme as Viscount AOKI has submitted is a 'basis of recklessness.'" This is a pure invention, as it is also to pretend that in connection with Japan's retirement from her position of last year we have called her "a State maltreated, slighted, and scorned." Every one of these epithets properly applies to the treatment she has often received in the past at the hands of Western Powers, and if there be persons too blind to see this or too cowardly to say it, we have no desire to interfere with the free exercise of their self-deception and pusillanimity. But when they pretend that we have urged anything of the kind on Japan's behalf because her changed programme has not yet obtained European and American assent, they speak falsely. It ought to be the hearty wish of every thoughtful person to see the Treaty Revision problem satisfactorily solved, for the pernicious influence it exercises at present on the country's foreign relations and on the development of her resources admits of no controversy. Yet there are writers here who apparently make it their sole aim to accentuate the difficulties of the situation, to influence public opinion to

Japan's prejudice, and to create the false impression that nothing presses except the expediency of delay. No doubt the history of all perplexing and intricate questions has been disfigured by similarly mischievous interference, but that reflection does not mitigate the nuisance. Time and perseverance, however, will work their wonted results. One of these days western folks will look back upon all this frivolous opposition with as much amusement and wonder as that with which we now regard the ridiculous persons who claim that our expressions of sympathy with Japan's dilemma have stirred her to strong anger against foreigners, whereas their own perennial display of rude contempt for her aspirations, their exulting parade of her faults, and their supercilious ridicule of her national claims, have not roused any feeling of resentment in her breast. Perhaps they rightly gauge their own influence, but we are charitable enough to judge them by the mischief they aspire to work, rather than by the insignificance they succeed in achieving.

PRIZES AT THE EXHIBITION.

THE manner of distributing prizes at the Industrial Exhibition has not apparently given universal satisfaction, but neither could it have been expected to do so. As a rule Japanese artisans are very modest about the work of their hands. The last thing they seem to imagine is that they deserve to be conspicuously rewarded or distinguished for their productions. But we never can be quite sure how much of this retiring mood is a superficial evidence of training and tradition. Probably a Japanese manufacturer or producer feels defeat by his rivals as much as any other manufacturer or producer, and probably there are as many sore hearts among the unsuccessful exhibitors at Ueno as there would be under similar circumstances in London or Paris. Confining ourselves to exhibits which have chiefly attracted foreign attention, namely, objects of art, we must say that, for the most part, the rewards seem to have been bestowed with judgment and discrimination. In porcelain and pottery, lacquer, enamels, embroideries, ivories, and metal work, the Judges have selected exhibits which certainly deserve to be distinguished. But we cannot extend this endorsement to the case of wood-carvings and paintings. Standing conspicuous in the Art Gallery is a colossal wood-carving, supposed to represent the Emperor JIMMU, nominal founder of the present Imperial Dynasty. We have examined this figure again and again with profound astonishment, marveling that such a work should have been granted standing-room in the most honourable section of the Exhibition. To foreign eyes it has absolutely no point to recommend it, being at once clumsy, undignified,

heavy, crude in conception, and rough in execution. Within a glass case in the same building may be seen another wood carving, about one-tenth of the size of the JIMMU image. The subject is a carpenter adzing a plank of wood. It would be difficult to sculpture anything truer to life. Every muscle, every point of anatomy, is perfect. The work, in short, would command admiration in any exhibition of glyptic art anywhere. Yet this beautiful specimen of sculpture has only received a third prize, whereas the huge, ungainly figure of the Emperor JIMMU is honoured with a second prize for excellence. We do not profess to understand the principle of this singular distinction, but there is evidently something in the larger figure which commends it to Japanese admiration, for not only has it been thus rewarded by the Judges, but a full-page picture of it was published in a recent number of the *Kokkwa*, with a highly eulogistic notice. Scarcely less incomprehensible is the result of the judging in the pictorial section. Only one first prize has been awarded, and that is to a painting in Japanese style, the autumnal scene by HASHIMOTO GAHO, which has been already spoken of more than once in these columns. Now there can be no doubt that Mr. HASHIMOTO's picture shows much beauty of colouring; that the effect of falling water is excellently rendered, and that the work has the great, and in Japanese paintings almost unique, merit of showing us a complete scene. But its faults of technique are very glaring. The rocks have so little body and such strongly marked outlines that they resemble thin laminæ of cardboard pasted on the picture, and the white cloud or mist floating down the dell looks like a stain accidentally impressed on the silk, so little semblance of evanescence does it present and so sharply marked are its edges. We cannot but think that if Mr. HASHIMOTO's picture deserved the highest obtainable prize, some of the oil-paintings possessed claims to equal distinction. The Judges, however, came to a different conclusion, and still further emphasized their opinion of the inferiority of the oil-paintings by awarding a second prize to only one of them, while bestowing no less than sixteen second prizes on Japanese pictures. As for the oil painting thus placed at the head of its school, it undoubtedly possesses much merit, but we venture to say that no foreign expert would endorse the verdict of the Judges. The artist is Mr. TSUKAHARA RISSHI, and the subject chosen is the celebrated authoress and lady-in-waiting popularly known as SEI SHONAGON. The painter depicts this historical personage in one of the most graceful and dignified attitudes of the Japanese religious dance. The pose is excellently rendered, the drapery skilfully represented, and the red lacquer floor on which she stands is really a wonderful piece of successful technique. But

the picture is not without grave faults, and to place it above Mr. SAKUMA's powerfully depicted and strongly conceived painting of WAKI NO KIYOMARU, as he prays the gods to aid him in deposing DOKYO, the priestly favourite of the EMPRESS, seems to us an unaccountable judgment. Mr. SAKUMA, however, is rewarded with a third prize only. Five third prizes have been awarded to oil paintings against thirty-three given to Japanese pictures; the works bracketted with Mr. SAKUMA's "Waki no Kiyomaru" being Mr. ISHIWARA's "Street in wind and snow," Mr. ANDO's "Hanami" (flower viewing), Mr. HARADA's portrait of Prince MORI, and Mr. KAMEI's "Koto Player." It will be unanimously agreed by foreign critics that every one of these works deserved a prize, but the most diligent and indulgent searcher would have failed to discover more than one or two Japanese pictures worthy to stand on the same plane, whereas no less than thirty-three have been thus honoured. We are not surprised to learn, therefore, that the awards of the Judges have given much umbrage. The honours showered on the Japanese paintings become even more inexplicable when we remember that several of the best artists, dissatisfied with the awards at previous exhibitions, refrained from contributing on this occasion, whereas the students of oil paintings seem to have put forth their full strength. It is, however, very probable that one result of these decisions will be to stimulate both schools of artists to a renewed effort, and that we shall see an interesting and thoroughly representative exhibition of paintings organised independently in the autumn or early winter. The conviction impressed on the public by the Ueno Hakurankai is that a future full of promise lies before the Japanese painter in oils, and while we have every faith in the conscientious and painstaking efforts of the Judges to distinguish real merit, we must confess to a feeling of regret that their decisions have tended to discourage the students of the new art.

THE SENSE OF MOTION.

ON the Switchback Railway at Ueno, Tokyo, we have a good opportunity of experimenting on our sense of motion. It is only recently that scientific men have demonstrated the existence of this Sense as worthy in all respects to be ranked with the proverbial Five. Why its recognition should have been so long delayed is only to be explained, as most other similar discoveries are, in terms of man's conservative stupidity. And yet the feelings that have to do with this sense are in themselves curious enough, oftentimes delightful. Ask any child why swings and see-saws are so much to its fancy, or ask any American lady why she dotes so on her rocking chair. The answer is the same, "it feels so nice." In these cases,

the mind is of course prepared for what is to follow; on the Switchback, however, the victim is taken by surprise. For our sense of motion is not so much a sense of motion merely as a sense of change of motion. And if this change, whether in amount or in direction, takes place in an altogether unexpected or even unwonted manner, the sensation is correspondingly peculiar. In their simpler forms, these sensations of motion are familiar enough to all who have made rapid ascents and descents in a lift, or who have been rocked in helpless misery in the cradle of the deep. The sensation is the more complex on the Switchback because of the unusually rapid changes, both in speed and direction of motion, that take place simultaneously. The change in speed is perceived by what we may call one sense of translation; and the change in direction by one sense of rotation.

If we are sitting upright in a railway car which is rounding a curve, we are rotating about a vertical axis. As we speed along a bend of a Switchback, we are rotating about a horizontal axis, which may be from ear to ear, or from face to back of head, according to the position we chance to occupy. A very little consideration will show that there is a sensation of rotation quite independent of probable changes of pressure on different parts of the body, or of the indirect suggestions of vision. If there are sensations there must be organs corresponding. Where, then, are these organs? There seems little doubt now that they lie near the ear, being the so-called semicircular canals whose function long remained a mystery to physiologists. Each ear is provided with three of these canals, lying roughly in planes approximately perpendicular to one another, one being nearly horizontal and the others nearly vertical. Into the mechanism of their action we cannot here enter. Suffice it to say that because of the inertia of the fluids contained in these canals variations of pressure are produced in one, in two, or in all, when any rotation occurs; that these variations of pressure affect the ends of the appropriate nerves and so communicate the sensations to the brain. It is this sense of motion that gives us a feeling of the true vertical and of directions generally.

There is no difficulty in making experiments on one's self, so as to better appreciate the existence of these sensations. For instance, stand upright and turn briskly round some two or three times; then stop and suddenly drop your chin upon your breast. You will feel a tendency to topple over towards the right or left hand according to the direction in which you have just been spinning round. Or, if a very striking effect is wanted, try the familiar practical joke of getting some one to place his head on the top of an upright poker, walk several times round it in the constrained bent

position, then stand upright and stride forwards. The victim will almost certainly fall. His motion round the poker brings into existence a sensation of rotation about an axis running from his forehead to the back of his head. In his erect position, this sensation still continues, but the axis is now nearly horizontal. Hence he feels as if his feet were revolving round his head; and in his endeavour to resist this sensation of falling, he experiences a real fall in the opposite direction.

Some very instructive experiments have been made with the subject set blind-fold on a revolving table, or within a revolving chamber with translucent walls. By such methods, all possible extraneous effects on the senses are prevented, and the sense of motion is left to exercise itself freely. It has been found that the subject has a very clear idea of the angle through which he may be suddenly rotated; but that he soon loses all sensation of rotation if his spinning motion is kept steady for some time. This shows, in fact, what has been already mentioned, that it is a sense of change of motion rather than a sense of motion which we possess.

Man is not of course the only animal that is supplied with this sense. Birds, beasts, and fishes must all have it. In tumbler pigeons the organ corresponding to the sense of rotation has probably been pathologically developed by artificial selection; but we are not aware that anatomists have studied the organ from this point of view. The power cats have of always landing on their feet is probably associated with some specially sensitive development of the organs of the sense of motion. We should expect such animals to evince a human-like uneasiness on the Switchback; the experiment would be well worth trying by some one possessed of a specially intelligent dog.

COMMERCIAL REGISTRATION.

IMPERIAL ORDINANCE No. 133.

We hereby give our sanction to the present Regulations relating to Commercial and Shipping Registration and order the same to be promulgated.

[His Imperial Majesty's Sign-manual.]
[Great Seal.]

Dated July 16th, 1890.
(Countersigned.)

COUNT YAMADA AKIYOSHI,
Minister of State for Justice.
COUNT MATSUKATA MASAYOSHI,
Minister of State for Finance.

Article 1.—Fees for commercial registration shall be as follows:—

- (1.) *Sen* 30 for the registration of each tradal name (*shogo*), guardian, infant, contract of marriage, and agency, without respect to main or branch stores. In addition a similar fee shall be charged for each registry of change of or addition to the above.
- (2.) *Yen* 6 in the case of firms (*Gomei Kwaisha*), and to in the case of joint-stock companies or companies of shareholders (*Kabushiki Kwaisha*) for each registration without respect to main or branch offices; *sen* 30 for each registration of change of or addition to the above.
- (3.) *Sen* 10 for examination of the registry book.
- (4.) *Sen* 10 per page for extracts from the registry book. Each page shall consist of 20 lines, each line of 20 characters, reckoning 11 lines and above as one page, and 10 lines and below as a half page.

Article 2.—*Yen* 3 shall be charged for registration under Article 825 of the Commercial Code. *Sen* 15 shall be charged for additional registration of changes under Article 829 of the Commercial Code.

THE CODE OF CIVIL PROCEDURE.

LAW No. 50.

We hereby give our sanction to the present Regulations relating to the Law for the carrying into practice of the Code of Civil Procedure, and order the same to be duly promulgated. We also command that this law shall be in force on and after the 1st day of the 1st month of the 24th year of Meiji.

[His Imperial Majesty's Sign-manual.]
[Great Seal.]

Dated July 16th, 1890.
(Countersigned)

COUNT YAMAGATA ARITOMO,
Minister President of State.
COUNT YAMADA AKIYOSHI,
Minister of State for Justice.

Article 1.—Procedure in civil actions raised before the carrying into practice of the Code of Civil Procedure shall afterwards be conducted in accordance with the Code of Civil Procedure.

Article 2.—Complaints may be raised in accordance with the Code of Civil Procedure, as to judgments delivered without the attendance of a party or parties previous to the Code of Civil Procedure coming into force.

The period during which complaints have to be made shall be counted from the day on which the Code comes into force. Should the period so reckoned, however, be longer than that allowed for appeals or new trials, the latter period shall be taken.

Article 3.—The period for new trials against judgments delivered before the carrying into practice of the Code of Civil Procedure shall be reckoned from the date on which the Code shall come in force, in accordance with the term for new trials or appeals provided in the new Code. Should the new term, however, exceed the term for new trials or appeals under the old law, the latter term shall be observed.

Article 4.—Second trials (*saishin*) may be requested on judgments given before the carrying out of the Code of Civil Procedure, in accordance with the new Code. Should, however, the conditions under which a second trial is necessary occur before the carrying out of the Code of Civil Procedure, the term for the second trial shall be counted from the date on which such conditions occurred.

Article 5.—The compulsory execution of judgments delivered before the enforcement of the Code of Civil Procedure shall be carried out in accordance with the Code. In cases when intimation of bankruptcy has been posted, or a public sale has begun, the old laws shall be observed until such measures are concluded.

Article 6.—Persons who desire certificates in accordance with the regulations of Article 499 of the Code of Civil Procedure, in cases where an order for the execution of a judgment delivered before the carrying out of the Code of Civil Procedure cannot be obtained, may require the same from the Court where the records of the case are kept.

Article 7.—Cases in which petitions for arbitration (*Kwanhai*) were filed before the carrying out of the Code of Civil Procedure, but in which arbitration has not been concluded, may be taken up and concluded by a local court in accordance with Article 381 of the Code of Civil Procedure.

Article 8.—Affairs which come within the province of a headman of a municipality, town, or village in accordance with the regulations of the Code of Civil Procedure, shall be dealt with by officials who discharge the duties of headmen at places where headmen are not situated.

Article 9.—Relations, so called, in the Code of Civil Procedure, shall for the present be the relations regulated in the Penal Code.

Article 10.—In cases where there are special customs involved in actions relating to marriage, divorce, adoption, &c., such customs shall for the present be observed.

Article 11.—Notification No. 6 of the 8th year of Meiji shall for the present continue in force. Article 12.—The phrase "Court of Cassation," in Article 16 of the Regulations, relating to procedure in Appeals and New Trials, Notification No. 19 of the 10th year of Meiji, shall be amended to "Court of Appeal" (*Tokoku-saibanchu*), and the same article shall for the present continue in force.

HORSFORD'S ACID PHOSPHATE

Relieves the Feeling of Lassitude so common in mid-summer, and imparts vitality.

THE SERVICE OF LEGAL DOCUMENTS.

LAW 51.

We hereby give our sanction to the present Regulations relating to the Rules of Process-servers (*Shitsutatsuri*), and order the same to be duly promulgated. These Rules shall come into force on and after November 1st, 1890.

[His Imperial Majesty's Sign-manual,
[Great Seal.]

Dated July 24th, 1890.

(Countersigned.)

COUNT YAMAGATA ARITOMO,
Minister President of State.

COUNT YAMADA AKIYOSHI,
Minister of State for Justice.

Article 1.—Process-servers shall belong to local courts (*Ku-saiban-sho*), and shall serve documents pertaining to suits and execute judgments in accordance with laws.

Article 2.—Process-servers may by request of parties deal with the following affairs:—

- (1.) Serving of notices and bills (*Saikoku*.)
- (2.) The auction of movables and immovables.
- (3.) Drawing documents of protest (*Kobami shoshu*.)

Article 3.—Process-servers are responsible for the transaction of business proper to their office, especially the following matters, in accordance with the orders of courts and public procurators' offices, in addition to the duties mentioned in laws and rules:—

- (1.) The service of documents, &c.
- (2.) The collection of fines, penalties, &c., as well as the sequestration or sale of confiscated goods.
- (3.) The execution of processes.

Article 4.—Process-servers shall be under the superintendence of one of the judges or of the chief judge of the local court to which they belong. Should other judges or public procurators, *ex officio*, issue orders to any process-server, such process-server shall for the time being be under the control of such judge or public procurator.

Article 5.—Process-servers shall reside in the locality of the local court to which they are attached. They may, however, live anywhere within the jurisdiction of the local court, provided they have obtained the permission of the chief judge of such court.

Article 6.—Process-servers shall have their offices in the place where the local court to which they belong is situated.

Article 7.—Should there be more than one process-server in a local court, the duties entrusted to them by the judges or procurators, or by the clerks of the court shall be distributed among them. Such distribution shall as far as possible be in accordance with the topographical divisions of the district.

Such distribution of duties shall be decided beforehand by a judge or by the chief judge of the local court at the end of each judicial year.

All acts performed by a process-server must be regular and effective though they may not be included in his duties under the distribution of work above noted.

Article 8.—Process-servers shall be prohibited from the discharge of their duties in the following cases:—

- (1.) When they or their wives are parties or injured persons, or have relations, as possessors of rights or dischargers of duties in joint account or having responsibility as security, with one or both of the parties or injured persons.
- (2.) When they or their wives are related to one or both of the parties or injured persons. This provision shall not apply when marriages have been dissolved.
- (3.) When they have to be examined as witnesses or experts in the same case, or may be, or have been agents in the same in accordance with law.

Article 9.—Process-servers may attend courts as agents or give assistance in suits on behalf of their wives, or their own or their wives' relations. This regulation shall not apply when the relations of marriage are dissolved.

Article 10.—Process-servers are not permitted without proper reason to refuse to obey commands or requests for the discharge of their duties.

Article 11.—Process-servers may, taking the responsibility on themselves, entrust the discharge of their duties temporarily to the following persons, except in cases where special orders or requests have been given:—

- (1.) Persons who have successfully passed examination for process-servers.

(2.) Persons who have been attached to the office of a process-server for over three months, as apprentices to such office.

(3.) Persons who have successfully passed examination for court clerks.

(4.) Persons who are deemed by a judge or the chief judge of a local court to be able to discharge the duties of process-servers.

Article 12.—When process-servers cannot, for some reasonable cause, discharge their duties or entrust the same to others, the matter should be communicated directly to the court or public procurators' office whence the order was issued, or to the person who requested their services.

When it is impossible to communicate such matter to the person who requested their services, or when it is necessary to act with promptitude, such fact shall be made known to a judge or to the Chief Judge of the local court.

Article 13.—In the above case, as well as in other cases where process-servers are obstructed, a judge or the chief judge of the local court may order any of the persons mentioned in Article 11, either by request or *ex officio*, to undertake the duties of process-servers.

Article 14.—Process-servers shall wear uniform clothing.

Persons who are entrusted with the temporary discharge of process-serving duties shall have a ticket delivered to them by the local court.

Article 15.—Process-servers shall receive settled fees, and shall be repaid all moneys disbursed by them in the discharge of their duties whether the same be done directly or by the orders of court clerks.

Process-servers are not permitted to increase or reduce the settled fees, nor can they obtain any compensation beyond fees or moneys paid by them.

Article 16.—Process-servers may not receive fees except for duties as provided for in Article 3.

Article 17.—When process-servers delegate the carrying out of their duties temporarily to others in the cases mentioned in Article 11, they shall pay to such delegates not less than three-tenths ($\frac{3}{10}$) of the usual fee.

Article 18.—Persons who discharge the duties of process-servers temporarily in the cases mentioned in Article 13, shall receive settled fees and reimbursement of moneys paid by them.

Article 19.—Should the fees received by a process-server during one year amount to less than yen 180, the deficit shall be paid from the Treasury.

Article 20.—Should a process-server die or be suspended or dismissed from his office, or be imprisoned, a judge or the chief judge of the local court shall

- (1.) Cause the production to the local court, of his official seal, records and other documents.
- (2.) Use necessary means for the safety of goods and documents in the custody of such process-server.

Article 21.—Process-servers shall receive pensions in accordance with the Law of Official Pensions, and the yearly amount of pension shall be reckoned on the basis of the salary as mentioned in Article 19 of that Law.

Article 22.—Process-servers shall, in matters not provided for in these rules, be accorded the treatment of officials.

SUPPLEMENTARY RULES.

Article 23.—Clerks of local courts shall, in the absence of process-servers, conduct the duties of the latter. In such case the office may be delegated temporarily to persons mentioned in Article 11, or persons whom they deem to be qualified, taking the responsibility on themselves.

When a clerk of court delegates process-serving duties to another under the last paragraph, he shall give seven-tenths ($\frac{7}{10}$) of the settled fee to the person thus delegated.

CORRESPONDENCE.

CHRISTIAN CHARITY AND CHRISTIAN ACCURACY.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—I am afraid that while the retained defenders of Christianity use language such as that of Bishop Newman in his lecture on "The March of Christian Civilisation," the "better future" of which that gentleman dreams, "when modesty shall supersede insolence," will be a long time coming. If such words as, "In America there was an infidel, whose name he never condescended to mention in public," are to be the keynote of the language of sweetness and light in the onward march of humanity, and if the persecuting spirit of

Christianity is to be thus incorporated into the religion of the future, I fear that intolerance of conduct and intemperance of language will always exist. What has Ingersoll done that, though a world-renowned thinker like William Ewart Gladstone considers him a foeman worthy of his steel, yet his name must not not sully the lips of the Rev. J. P. Newman, D.D., LL.D., Bishop of the M. E. Church? Does the Bishop use language of this description simply because Ingersoll, in the search for Truth, has reached different conclusions to his own? Can the Bishop, beating in mind the fate of some clerical libellers in the States, say a word against the private life of Mr. Ingersoll; or are his words to be taken in a Pickwickian sense, and used simply as an easy trick to catch applause from a Christian audience?

This is the way a more unprejudiced writer, Mr. Joseph Hatton, in his book *To-day in America*, speaks of the man whose name must not sully the lips of this Methodist Bishop:—"Ingersoll lives his sermon of domestic tenderness. He preaches fraternal affection, love of home, duty to children, do unto others as you would they should do unto you, and his theory of life is that man makes his own heaven or his own hell; that it pays best to be a good fellow; that if you get worldly prosperity in a dishonourable way you are sure to be unhappy whether you believe in God or not; that in short, honesty is the best policy. 'You cannot help God in any way,' he said. 'He is beyond anything you can possibly do for him; but you can plant a flower daily in the path of your child from its earliest years, until the day comes when you die in that child's arms.' There were homely touches of this kind from the beginning to the end of his address, and there were tears in the eyes of many of his hearers as he contrasted with the uncertain bliss of heaven the certain happiness of kindly deeds and domestic duties well fulfilled on earth."

Here, then, we have a sketch of the teaching of Ingersoll, whom Henry Ward Beecher praised so highly, but whose name the Christian charity of the Bishop will not allow him to mention in public. The Rev. Dr. Newman professes to blush for his age and to blush for the civilisation of his country, but it seems to me that the sooner he and his like commence to blush for themselves, the nearer will be the approach of that millennium whose coming he so wordily hails.

"Infidelity has never given anything to the world," the Bishop cries. (The use of the word "infidelity" has, as Huxley points out, that advantage of "being somewhat offensive to the persons attacked, which is so dear to the less refined sort of controversialist." Never mind; let us use it.) I answer, "Infidelity" has quenched the fires of persecution lighted by Christians; "infidelity" has abolished the fiendish treatment of old women for the Bible-created offence of witchcraft ("Thou shalt not suffer a witch to live," Ex. XXII. 18); "infidelity" has fought for and won that privilege of thinking and writing freely which has given so great an impetus to progress in the present age. The Bishop professes to have read Buckle. Does he not remember that writer's sonorous summing up of what we owe to the spirit of doubt, or in other words scepticism, or in the language of Christian charity, "infidelity?" "To scepticism we owe that spirit of inquiry which, during the last two centuries, has gradually encroached on every possible subject, has reformed every department of practical and speculative knowledge, has weakened the authority of the privileged classes, and thus placed liberty on a surer foundation, has chastised the despotism of princes, has restrained the arrogance of the nobles, and has even diminished the prejudices of the clergy. In a word it is this which has remedied the three fundamental errors of the older time—errors which made people in politics too confiding, in science too credulous, in religion too intolerant."

Even if infidelity be destructive rather than constructive, it might well be argued that the world is frequently the better for the destruction of many things. When fever seizes upon a man he does not want to know what the doctor will put in its place; no, his wish is for the destruction of the fever and restoration to health. Humanity for many thousands of years has been afflicted with the fever of Gods and Devils, has been woefully concerned about what Carlyle calls its "miserable soul"; and instead of striving to make this world better, to cure the ever present evils of vice, disease, and ignorance, has been dreadfully distressed about the life men are going to live after their bodies are dead. "You take from us the blessed and comforting doctrine of hell; you will not allow us to believe in a God of love who could condemn his own son to a dreadful death in order to appease his own wrath; you

say it cannot be true God is going to send the great majority of mankind to endless perdition—what are you going to put in place of these consoling doctrines?" This is the bitter cry which is voiced by Bishop Newman, which is heard waiving through all Christian communities, and which shows about as much grasp of the questions at issue as Josh Billings' remark that he would give \$100 to hear Moses on the mistakes of "that infidel," meaning Ingersoll. The matter in dispute is this:—Ingersoll has put forward in a popular form the thousand and one discrepancies in and critical objections to much of the teaching of the Bible—a book which, it is claimed, is divinely inspired—and Bishop Newman thinks with Josh Billings that it is sufficient answer to such criticism to say that Moses might be able to point out mistakes in Ingersoll. The fatuous puerility of such an argument is seen when it is considered that to read any sense whatever into it, Ingersoll must be taken as laying claim on his side to inspiration also.

But what need is there for the Bishop to wait for Moses to point out the mistakes of Ingersoll? Why doesn't he do it himself? Why summon from his well earned repose the man who records his own death and burial when presumably the Bishop in his condescension could so easily put at rest for ever those knotty questions which have puzzled so many hundreds of learned critics and are to day shaking the Church of England to its foundations.

However, let us leave this somewhat glaring instance of "No case; abuse the plaintiff's attorney," and come to another portion of the Bishop's address. To say that where Christ was received "the gyve fell from the slave, the mind was quickened, and woman was elevated," is simply to say what is not the fact. With reference to the first clause of this sentence, can the Bishop point out a single text in the Bible, either in the Old or New Testament, in which slavery is condemned? Surely he cannot recently have examined some of the laws laid down by the Moses who "still sits serenely upon the Mount of God" (whatever that may mean), and I beg therefore space to refresh his memory. One of the laws given by Moses reads as follows:—"Both thy bondmen and thy bondmaids, which thou shalt have, shall be of the heathen that are round about you; of them shall ye buy bondmen and bondmaids. Moreover, of the children of the strangers that do sojourn among you, of them shall ye buy, and of their families that are with you, which they begat in your land; and they shall be your possession. And ye shall take them as an inheritance for your children after you, to inherit them for a possession; they shall be your bondmen for ever." (Lev. XXV. 44-46).

To talk of Christ striking the gyve from the slave when such laws are laid down "for ever" in a book which forms the very foundation of Christianity, seems to show curious ignorance of the teachings of that book. Does Bishop Newman not know that, so far from Christianity being considered to be on the side of the slave, Abolitionists in America were sneered at because of the numbers of "infidels" in their ranks? One of the English leaders in the battle against slavery, William Wilberforce, bitterly complained that the Anti-Slavery party were stigmatised as "infidels" and disciples of Tom Paine for their opposition to the curse of slavery. William Lloyd Garrison told Mr. Bradlaugh that he had been denounced in most of the pulpits for his efforts against slavery, that after an Abolition speech in Boston the elders of a Christian Church assisted in dragging him to a lamp-post to be hanged, and that in Boston, which prides itself upon its churches, he could not get a room, a hall, a school, or a church in which he might denounce the evils of slavery. The Rev. Elijah Lovejoy was shot in Missouri by the elders of a Christian Church, led by the clergy, because he refused to break up his Abolition paper. Elias Hicks, the Abolitionist, was denounced as an Atheist. The Christian Corporation of Liverpool only one hundred years ago conferred the formal thanks of the city and a purse of gold on a prominent clergyman of Liverpool for having preached the best sermon of the day in defence of slavery. Bishop Newman's brother bishop of the Church of England followed out the teaching of the Bible in favour of slavery by assisting, time after time, to reject the Bills brought in for the amendment of the laws relating to slavery in the West Indies.

But the *Japan Mail* could be filled with such instances, and I will therefore simply ask Bishop Newman to explain how it came to pass, if "wherever Christ was received, the gyve fell from the slave," that for more than eighteen hundred years Christian nations recognised and supported the institution of slavery, denounced as infidels those who opposed it, left it to "infidel" France to be the first nation to show the example of libera-

tion, and why, when humanity got too strong for Moses, the bitterest and most intense opposition came from the members of Christian Churches.

With regard to the second clause of the claim for Christianity made in the sentence quoted above, "that it quickened the mind," it is only necessary for a student of history to point to the darkness of ignorance which spread over Europe for hundreds of years after the acceptance of Christianity—a period which Christians themselves refer to as the "dark ages," to the treatment of Galileo and Bruno, and many others, by the ignorant priesthood of the Christian Church; and to the fact that any progress whatever was only made in the teeth of the bitterest opposition from the Church.

Such a claim for Christianity is as preposterous as false, and shows as much want of knowledge of history as the third clause of Bishop Newman's threefold claim for Christianity, that it elevated the position of women. Let us take the testimony of the Bible first. I should like the Bishop to refer to Deut. XXIX. 1, "When a man hath taken a wife and married her, and it come to pass that she find no favour in his eyes . . . then let him write her a bill of divorcement, and give it in her hand, and send her out of his house." Is it to the advantage of humanity that this particular commandment of Moses be obeyed, and is this one of the teachings which has resulted in the elevation of woman? Take a passage from the New Testament. Paul, in the epistle to Timothy, shows his appreciation of the position of women by saying, "Let the woman learn in silence with all subjection" (1 Tim. ii. 11)—a most "elevating," a generous injunction, truly.

Let us see what effect such "elevating" teaching had upon the early Church. In an article in the *Contemporary Review* for last September, Principal Donaldson, LL.D., gives an account of some investigations he has made into the "Position of Women among the early Christians." As a result he has been greatly disappointed. "It is a prevalent opinion," he says, "that woman owes her present high position to Christianity, and the influences of the Teutonic mind. I used to believe this opinion, but in the first three centuries I have not been able to see that Christianity had any favourable effect on the position of women, but, on the contrary, that it tended to lower their character and contract the range of their activity." He then points out the high position to which women in Rome had attained when Christianity dawned upon the world. "Tradition," he says, "was in favour of restriction, but by a concurrence of circumstances women had been liberated from the enslaving fetters of the old legal forms, and they enjoyed freedom of intercourse in society; they walked and drove in the public thoroughfares with veils that did not conceal their faces, they dined in the company of men, they studied literature and philosophy, they took part in political movements, they were allowed to defend their own law cases if they liked, and they helped their husbands in the government of provinces and the writing of books." He then points out, in a passage too long to quote, the honoured position held by Roman women in public worship. Among the orthodox Christians, however, the practice came to be very different. Women were shut out of every post of honour, and were permitted only to discharge the humblest duties. The early Fathers heaped degradation upon degradation on the sex. "This," the Professor says, "is the way in which Tertullian addresses women: 'Do you not know that each one of you is an Eve? The sentence of God on this sex of yours lives in this age. The guilt must of necessity live too. You are the devil's gateway; you are the unsealer of that forbidden tree; you are the first deserter of the Divine law; you are she who persuaded him whom the devil was not valiant enough to attack. You destroyed so easily God's image, man. On account of your desert, that is death, even the son of God had to die.' " And the gentle Clement of Alexandria hits her hard when he says:—"Nothing disgraceful is proper for man, who is endowed with reason, much less for woman, to whom it brings shame even to reflect of what nature she is." Even to-day, though the growth of humanitarian principles in recent years is resulting in the steady raising of women from the degradation due to Christian teaching, we are very far still from the concession of equal rights to our sisters. Without examining into the civil and religious disabilities which are still imposed upon women, it is sufficient to mention as example that, as the English law stands to-day, though a man can obtain divorce merely by proving adultery on the part of his wife, it is impossible for a woman to obtain divorce by pleading adultery on the part of her husband unless she can prove cruelty as well. Laws have been made by Christian men for Christian men, and the spirit of the teaching that the woman should

"learn in silence with all subjection" has assuredly not been lost sight of by Christian legislators.

Now, to bring these somewhat lengthy remarks to a close, Bishop Newman either knows these things or he does not. If he does not know them, he is incompetent to discuss those matters about which he expresses so confident an opinion; if he does know them, and conceals his knowledge, then I am afraid that I must characterise his attitude by a still stronger epithet.

And yet, after all, he may be wholly unconscious of unverity in these matters. The profession of Christianity seems to me to exercise a most unfortunate influence in dulling the conscience in many of its adherents, causing them to shut their eyes to plain facts, virtually obliterate certain portions of the Bible, twist texts, and forget history—and do it all thoroughly believing that they are supporting Truth and making for Righteousness. I am therefore loth to accuse any one, without actual knowledge of conscious unverity. All the same it is a serious charge against present day Christianity, but a charge which can be proved up to the hilt.

Christians, in truth, have outgrown in many respects the limits of their creed. They read into it a morality which is the result of the steady accumulation of experience, and the early enunciations of which, so far from being indebted to Christianity for assistance, have almost invariably found its teachings, its priests, and its adherents most violently opposed to them.

To-day the battle against slavery may be said to be won, knowledge is gradually being placed within the reach of all, and the position of women is being steadily raised. The advocates of Christianity, seeing that these things are good, now come in and claim the harvest as theirs, when in truth we have only to be thankful that the tares of Christianity have not utterly choked the good seed of Humanity.

Enclosing my card, I am, yours, &c.,

SECULARIAN.

Kobe, July 21st, 1890.

"SECULARIAN" AND BISHOP NEWMAN.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—It is not my intention to defend the utterances of the Bishop; I think myself that something could have been better said, or had been better unsaid. At the same time the attack of Secularian is so full of astounding statements which some of your readers may mistake for logic that I ask permission to point out one or more of the fallacies which vitiate the whole of his argument:—

1.—He confounds the details of Mosaism with Christianity, whereas Christ repudiated expressly the very thing that Secularian cites in condemnation of Christianity. (Mk. 10.5).

2.—It is a mistake to confound many of the teachings of Theologians with Christianity. Theology is Humanity attempting to systematize the truths enunciated by Christ—and often succeeds in displaying more of human error than of Christ. Much less is the caricature of Theology indulged in by Secularian Christian teaching.

3.—It is a mistake to confound ecclesiastical establishments with Christianity. The Church is Humanity trying to organize the principles of Christ into working shape. And very often Humanity comes very much to the fore and very little of Christ is seen.

4.—It is a fallacy to confound the mistaken acts of men professing Christianity with Christianity. These people are too often Humanity pleased with the theory of Christianity, but in whom human selfishness is too strong for the practical Christ—lip service and lying life.

5.—It is a mistake to attribute the excellencies in the teaching and practice of Ingersoll, the Abolitionists, etc., to their unbelief in Christianity. They are simply other specimens of Humanity who have rejected the theory and have adopted the practical side of Christ's teaching to that extent. Where else can such excellencies be found but in lands permeated more or less by Christian influence?

6.—It is a mistake to call the laws of any land under heaven the legislation of Christian men. They are the laws of selfish Humanity more or less moulded by the influence of the amount of Christianity prevailing. But we have a good piece to go yet before we get to Christian legislation, though things are moving in that direction.

But little as Christianity has mastered Humanity she has done very much directly and indirectly for the betterment of Humanity, which has been accomplished by no other force, and but for her never would have been possible. Let Secularian point

out a single spot on the face of the earth where thought is free and science has won her triumphs, where laws are mostly just and benevolent, where customs are for the most part sweet, where uplifted womanhood is honoured and protected, where organized charity for the benefit of the poor, the down-trodden, and the ignorant, moves the hearts of masses of men to noble gifts of time and money, and then prove that Christianity did not go before to prepare the way and stay to make these things possible. There has been and is to-day a good deal of Humanity and Secularism in this world untrammelled of Christianity in any form; let Secularism point out what they have done on these lines independently.

Yours, etc.,

VOX.

July 31st, 1890.

ELECTION RETURNS.

For convenience of reference we collect and republish the results of the elections for the House of Representatives, as our readers have hitherto had them in disconnected form only:—

TOKYO.

- First District.—Mr. Kusumoto Masataka, Vice-President of the Senate.
 Second District.—Mr. Tanimoto Michiyuki, President of Tokyo Tramway Company. *Kyushu Shimpō-to.*
 Third District.—Mr. Kazama Shinkichi, attorney-at-law. Independent.
 Fourth District.—Mr. Fujita Mokichi, editor, *Hochi Shimbun*. *Kaishin-to.*
 Fifth District.—Mr. Ota Minoru, former Chief of Honjo. Independent.
 Sixth District.—Mr. Takamashi Tetsushiro, barrister. Originally *Kaishin-to*, but subsequently *Fichi-to*.
 Seventh District.—Mr. Oyagi Bi-ichiro, barrister. Independent.
 Eighth District.—Mr. Tsuda Shindo, Senator.
 Ninth District.—Mr. Yoshino Seikei, former President of the Tokyo City Assembly. Independent.
 Tenth District.—Mr. Mori Tokinosuke, Bank President. Independent.
 Eleventh District.—Mr. Asaka Kokko, member of Tokyo City Assembly. Progressive.
 Twelfth District.—Mr. Takagi Masatoshi, member of Tokyo City Assembly. Progressive.

KYOTO.

- First District.—Mr. Hamaoka Kotetsu. Independent.
 Second District.—Mr. Nakamura Eisuke. Independent.
 Third District.—Mr. Matsuno Shinkuro (farmer). Independent.
 Fourth District.—Mr. Ito Kumao (President of the Yamashiro Tea Company and of the Fushimi Bank). *Fiyu-to.*
 Fifth District.—Mr. Tanaka Genjiro (President of City Assembly). *Fiyu-to.*
 Mr. Ishihara Hanzayemon (farmer). Independent.
 Sixth District.—Mr. Kamimuchi Tomotsune (Retired list. Formerly assistant chief of the Revenue Bureau of the Financial Department). Independent.

OSAKA CITY.

- First District.—Mr. Awaya Shinazo (member of City Assembly). Independent.
 Second District.—Mr. Toyoda Busaburo (member of City Assembly). *Daido Party.*
 Third District.—Mr. Ukita Keizo (former Headman). Independent.
 Fourth District.—Mr. Nakaye Tokusuke (journalist). *Aikoku-to.*
 Mr. Sasaki Masayuki (member of the City Assembly). Independent.
 Fifth District.—Mr. Kikuchi Kanji (barrister). *Daido Party.*
 Sixth District.—Mr. Matano Kageyama (former chief of a rural district). Independent.
 Seventh District.—Mr. Higashino Heitaro (Chairman of City Assembly). *Daido Party.*
 Eighth District.—Mr. Yokoyama Katsusaburo (member of City Assembly). Independent.
 Ninth District.—Mr. Sasaki Seiyu (banker). *Aikoku-to.*

KANAGAWA PREFECTURE.

- First District.—Mr. Shimada Saburo, editor *Mainichi Shimbun*. *Kaishin-to.*
 Second District.—Mr. Yamada Taizo (barrister). Radical.
 Third District.—Mr. Ishizaka Masataka (farmer). *Aikoku-to.*
 Mr. Setooka Tamechiro (Member of Prefectural Assembly). Liberal.

- Fourth District.—Mr. Yamada Toji. *Kaishin-to.*
 Fifth District.—Mr. Nakajima Nobuyuki. *Koin Club.*
 Sixth District.—Mr. Yamaguchi Sahichiro (farmer). Radical.

HYOGO PREFECTURE.

- First District.—Mr. Kashima Hidemaro. *Kaishin-to.*
 Second District.—Mr. Hori Zensho. Conservative Party.
 Third District.—Mr. Hoki Hatsu. *Aikoku-to.*
 Fourth District.—Mr. Ishida Kwannosuke (President of Prefectural Assembly). *Aikoku-to.*
 Fifth District.—Mr. Uozumi Itsuji. *Kaishin-to.*
 Sixth District.—Mr. Takase Tojiro (farmer). *Aikoku-to.*
 Seventh District.—Mr. Naito Rihachi (President of Assembly of Rural Districts). *Kaishin-to.*
 Eighth District.—Mr. Shibahara Masataro (farmer). *Aikoku-to.*
 Mr. Kaino Kozo (member of Prefectural Assembly). *Aikoku-to.*
 Ninth District.—Mr. Sato Bunpei (farmer). *Kaishin-to.*
 Mr. Aoki Kyo (journalist) *Kaishin-to.*
 Tenth District.—Mr. Sano Sumisaku. *Aikoku-to.*

NAGASAKI PREFECTURE.

- First District.—Mr. Iyenaga Yoshihiko (attorney-at-law). *Kyushu Shimpō-to.*
 Mr. Tominaga Hayata. *Kaishin-to.*
 Second District.—Mr. Asanaga Shiuo (Vice-President of Prefectural Assembly). *Kyushu Shimpō-to.*
 Third District.—Mr. Maki Bokushin (President of the So-bu Railway Company). Independent.
 Fourth District.—Mr. Tareishi Kwanshi (member of Prefectural Assembly). *Kyushu Shimpō-to.*
 Fifth District.—Mr. Miyasaki Yeiji (farmer). *Hoshu-to.*
 Sixth District.—Mr. Sagara Masaki (former Chief of a rural district). Independent.

NIIGATA PREFECTURE.

- First District.—Mr. Yamakiwa Hichishi (farmer). *Daido Party.*
 Second District.—Mr. Tango Naohie. *Daido Party.*
 Mr. Kato Katsuya (principal of a school). *Daido Party.*
 Third District.—Mr. Takaoka Chuhei. *Daido Party.*
 Fourth District.—Mr. Nishigata Tamezo (farmer). *Daido Party.*
 Fifth District.—Mr. Kobayashi Yuhichiro (Editor of the *Tohoku Nippo*). *Daido Party.*
 Mr. Hasegawa Tai (physician). *Daido Party.*
 Sixth District.—Mr. Matsumura Bunjiro (farmer). *Daido Party.*
 Seventh District.—Mr. Sekiyo Magozayemon. *Kaishin-to.*
 Mr. Motoyama Kenji (farmer). *Kaishin-to.*
 Eighth District.—Mr. Mura Kojiro. *Kaishin-to.*
 Mr. Suzuki Shoji (President of Prefectural Assembly). *Daido Party.*
 Ninth District.—Mr. Ukai Ikujiro (farmer). *Daido Party.*

SAITAMA PREFECTURE.

- First District.—Mr. Amano Saburo. Independent.
 Second District.—Mr. Takata Sanaye (journalist). *Kaishin-to.*
 Mr. Shimidzu Munenori (*Shizoku*). *Fiyu-to.*
 Third District.—Mr. Manaka Tadanao (*Shizoku*). *Kaishin-to.*
 Mr. Manaka Shinsui (headman of a rural district). Independent.
 Fourth District.—Mr. Horikoshi Kwansuke (farmer). *Aikoku-to.*
 Mr. Yumoto Yoshino (farmer). Independent.
 Fifth District.—Mr. Yamanaka Rm-no-suke (banker). *Kaishin-to.*

GUNMA PREFECTURE.

- First District.—Mr. Arai Go. *Fiyu-to.*
 Second District.—Mr. Takei Itei. Independent.
 Third District.—Mr. Nomura Toda (member of Prefectural Assembly). Independent.
 Fourth District.—Mr. Kokure Taketayu (merchant). Independent.
 Fifth District.—Mr. Yuasa Jiro. *Kaishin-to.*

CHIBA PREFECTURE.

- First District.—Mr. Chiba Teitaro. *Aikoku-to.*
 Second District.—Mr. Hamano Noboru. *Aikoku-to.*
 Mr. Narushima Kichiro. *Kaishin-to.*
 Third District.—Mr. Osuka Yonosuke (former chief of a rural district). Independent.
 Fourth District.—Mr. Iwasaki Shigejiro. *Kaishin-to.*
 Fifth District.—Mr. Itakura Chu (attorney-at-law). *Daido Party.*
 Sixth District.—Mr. Itakura Jushin. *Aikoku-to.*
 Seventh District.—Mr. Shigeki Tamotsu (former chief of a rural district). Independent.

- Eighth District.—Mr. Yasuda Kun (farmer). *Kaishin-to.*

IBARAKI PREFECTURE.

- First District.—Mr. Matsunobu Gen. Independent.
 Mr. Watanabe Osamu (journalist). *Fichi-to.*
 Second District.—Mr. Otsu Junichiro (an official of the Prefectural Office). Independent.
 Mr. Tachikawa Ko. *Kaishin-to.*
 Third District.—Mr. Iimura Josaburo. Independent.
 Fourth District.—Mr. Mori Ryusuke. *Fiyu-to.*
 Fifth District.—Mr. Shikikawa Saburobei. *Kaishin-to.*
 Sixth District.—Mr. Sekiguchi Haclibei. Independent.

TOCHIGI PREFECTURE.

- First District.—Mr. Yokobori Sanshi. Independent.
 Second District.—Mr. Arai Shogo (President of Prefectural Assembly). *Fiyu-to.*
 Mr. Iwasaki Manjico. *Fiyu-to.*
 Third District.—Mr. Tanaka Shirozo. *Kaishin-to.*
 Fourth District.—Mr. Shoda Okuzo (former Chairman of Prefectural Assembly). *Aikoku-to.*

NARA PREFECTURE.

- First District.—Mr. Imamura Kinzo. *Kaishin-to.*
 Second District.—Mr. Horiuchi Chushi. Independent.
 Mr. Homma Choku. *Fiyu-to.*
 Third District.—Mr. Sakurai Tokutaro. *Daido Party.*

MIYE PREFECTURE.

- First District.—Mr. Kuribara Ryoichi (journalist). *Aikoku-to.*
 Second District.—Mr. Ito Yuken. *Kaishin-to.*
 Third District.—Mr. Amaharu Bunyei. *Daido Party.*
 Fourth District.—Mr. Ito Kenkichi. *Daido Party.*
 Fifth District.—Mr. Ozaki Yukio (journalist). *Kaishin-to.*
 Mr. Kitagawa Kuichi. Independent.
 Sixth District.—Mr. Tachiiri Kiichi. *Kaishin-to.*

AICHI PREFECTURE.

- First District.—Mr. Horibe Katsushiro. Independent.
 Second District.—Mr. Nagai Matsuyemon (President of a Company). Independent.
 Third District.—Mr. Kajita Kizayemon (farmer). Independent.
 Fourth District.—Mr. Miyata Shinichiro (President of Prefectural Assembly). *Daido Party.*
 Fifth District.—Mr. Mori Toichiro (former Chairman of Prefectural Assembly). Independent.
 Sixth District.—Mr. Aoki Yeiji (former Headman). Independent.
 Seventh District.—Mr. Hayama Chuzayemon (former Chairman of Prefectural Assembly). Independent.
 Eighth District.—Mr. Hayakawa Ryusuke (Vice-President of Prefectural Assembly). Independent.
 Ninth District.—Mr. Imai Isoichiro. Independent.
 Tenth District.—Mr. Kato Rokuzo (member of Prefectural Assembly). Independent.
 Eleventh District.—Mr. Minobe Teiryō. *Koin Club.*

SHIZUOKA PREFECTURE.

- First District.—Mr. Inouye Hikozaemon (farmer). *Kaishin-to.*
 Second District.—Mr. Kageyama Hideki (farmer). *Daido Party.*
 Third District.—Mr. Okayama Kenkichi (attorney-at-law). *Kaishin-to.*
 Fourth District.—Mr. Okada Riyoichiro (farmer). *Fichi-to.*
 Fifth District.—Mr. Nishio Denzo. Independent.
 Sixth District.—Mr. Kondo Jumpei (former Headman of gun). Independent.
 Seventh District.—Mr. Yoda Sajihiei. Independent.
 Mr. Yehara Soroku (director of a school). *Daido Party.*

YAMANASHI PREFECTURE.

- First District.—Mr. Yamaki Kuma (President of the Prefectural Assembly). Independent.
 Second District.—Mr. Tanabe Yuyei (member of Prefectural Assembly). Independent.
 Third District.—Mr. Furuya Senzo. *Daido Party.*

SHIGA PREFECTURE.

- First District.—Mr. Sugiura Choko. *Kokumin-ha.*
 Second District.—Mr. Yamazaki Tomokichi. Independent.
 Third District.—Mr. Daito Gitetsu (President of the Tokyo Fish and Poultry Company). Independent.
 Mr. Iba Teizo (principal of a school). Independent.
 Fourth District.—Mr. Soma Yei-in (Director of the Yokohama Specie Bank). Independent.

GIFU PREFECTURE.

- First District.—Mr. Amano Jakuyen (former priest). Independent.
 Second District.—Mr. Shimizu Sanzo (farmer). Independent.
 Third District.—Mr. Yoshida Kohei (member of Prefectural Assembly). Independent.
 Fourth District.—Mr. Yano Saijiro (member of Prefectural Assembly). *Kaishin-to*.
 Fifth District.—Mr. Nagao Shiroeyemon. Independent.
 Sixth District.—Mr. Hayashi Koichiro (farmer). *Aikoku-to*.
 Seventh District.—Mr. Nakamura Shinobu (president of a private school). Independent.

NAGANO PREFECTURE.

- First District.—Mr. Kozaka Zen-no-suke (banker). Radical.
 Second District.—Mr. Shimazu Tadasada (president of Prefectural Assembly). Radical.
 Third District.—Mr. Horiochi Kenro (member of Prefectural Assembly). *Daido* Party.
 Fourth District.—Mr. Kozato Yoshinaka (member of Local Assembly). *Daido* Party.
 Mr. Yebashi Atsushii (attorney-at-law). *Daido* Party.
 Fifth District.—Mr. Minowa Kanaye (former Headman). Independent.
 Sixth District.—Mr. Nakamura Yaro (former dendrological official). Independent.
 Seventh District.—Mr. Ito Daihachi. *Daido* Party.

MIYAGI PREFECTURE.

- First District.—Mr. Masuda Shigeyuki. Independent.
 Second District.—Mr. Musha Denjiro (former Headman). Independent.

 Mr. Shito Kanji (*Shizoku*). Conservative.
 Fourth District.—Mr. Oka Jiroaro. *Kokken-to*.
 Fifth District.—Mr. Yamada Buho. *Kaishin-to*.
 Sixth District.—Mr. Matsuyama Moriyoshi. *Kyushu Shimpō*.

MIYAZAKI PREFECTURE.

- First District.—Mr. Kawagoye Susumu. Independent.
 Second District.—Mr. Yasuda Yuitsu. Independent.
 Third District.—Mr. Miyake Masashige. Independent.

KAGOSHIMA PREFECTURE.

- First District.—Mr. Kabayama Sukeoyoshi. *Doshikai-ha*.

Original from

Second District.—Mr. Orita Kenchi (President of Prefectural Assembly). *Kyushu Shimpō to.*
 Third District.—Mr. Hasegawa Junko. Independent.
 Fourth District.—Mr. Utsunomiya Heichi. *Kyushu Shimpō to.*
 Fifth District.—Mr. Kawashima Jun. *Kyushu Shimpō to.*
 Sixth District.—Mr. Gamo Sen. *Kyushu Shimpō to.*
 Seventh District.—Mr. Motoi Shunryo (farmer). *Shimpō to.*

OITA PREFECTURE.

Japanese law does not permit one member to represent more than one district, so that Mr. Motoda will have to resign one of his seats. This was the case with Mr. Suzuki of Yehime Prefecture. Mr. Nagaya Tadaaki was chosen in his place for the first district of that Prefecture.

THE EIGHT VIEWS OF MITO.

Almost all residents and tourists in Japan are aware of the practice in many localities of selecting from the adjacent country "eight views" (*hakkei*) as especially beautiful. This custom, which is said to be Chinese in its origin, was first applied in Japan to scenes around the Lake of Omi, or Lake Biwa; but it afterwards spread, till at last in each large daimiate *hakkei* can be found. I have long heard of the *Mito Hakkei*, which were selected by Prince Nariaki (Rekkō) during the first half of this century; and have had a desire to visit them. It is only too true, that, "in order to enjoy these beauties the places named must be visited at the proper hours and seasons." But, as such a proceeding would involve many trips and considerable trouble, I conceived the idea of visiting them, regardless of appropriateness, all in one trip in one day. I arranged, therefore, with a High School pupil who knew the way, to be my guide, and to act as interpreter, if my fluency in the vernacular failed to be duly respected by those with whom I might wish to communicate. (I ought, perhaps, to add, that he proved as needful in the one case as in the other; for, strange to say, my Japanese periods were not always appreciated by the natives!).

Our original plan was to leave Mito about four a.m., so as to get back, if possible, before dark; but "the best-laid schemes of mice and men," etc. (Burns never lived in Japan, and did not know, that the Japanese mice and rats seldom fail in their plans.) About three o'clock that morning it rained, and even at four o'clock looked dubious; but, about five o'clock, the prospect seemed so much better, that I sent one *jinrikisha* man ahead to arouse my guide, and soon followed myself. My companion, being taken unawares, was delayed some in getting ready; but we managed to get out of Mito a little before six o'clock.

Ordinarily, we should have taken the direct road to the sea-shore; but, as that was under repair and impassable, we had to make a circuit which cost us at least an extra half hour. But the beauty of the round-about way repaid us a little for the loss of time. It was up and down, over hill and dale, through woods and open fields. The grass, grain, vegetables, and flowers looked a bright green, and showed the beneficial effects of the rain of the two preceding days.

About eight o'clock, we had arrived at the Hirato-bashi, which crosses the Hinuma-gawa, about one mile from the sea-shore. Here, with the kind aid of a policeman, we succeeded in defeating the exorbitance of a boatman, and made a reasonable bargain for the trip up the river. All the way along, we came now and then upon fishing-craft, whose occupants were after the shell-fish, called *shijimi*, which is abundant in the bottom of the river, and is a staple article of diet in those parts. The occupants of the boats were usually two, male and female, probably man and wife; though sometimes one person managed the whole affair. The manner of fishing was new to me; but it may be common to many readers of the *Mail*. The boat was tied to a long bamboo pole, secured at some distance in the river. The woman managed a wheel, by which she gradually pulled the boat nearer the pole; while the man, with a basket, attached to another long bamboo pole, scooped up the shells, as the boat moved.

One trifling, but interesting, diversion of the long trip was to watch the antics of the fresh-water crabs about their holes in the sides of the river-banks. I wish that I could describe the lovely scenery of the river; but I am awkward with my pen, and have already wandered from the subject. In about two hours we had been paddled up to a large marsh, called Hinuma, part of which is named Hiroura. Here is the location of one of the *hakkei*, entitled *Hiroura [no] Aki [no] Tsuki*,

or "The Autumn Moon from Hiroura." Since Reiko, although one of the most practical among the Princes of Mito, was also quite poetical, one might naturally expect to find a tablet inscribed with a commemorative poem; but there is only a rude stone, containing simply the appellation of the view. This stone is set up at the point of a narrow cape, jutting out into the marsh. We have been told that this view is, indeed, magnificent; and it was not difficult to imagine that the full moon of a delightful autumn evening would shed a calm silvery lustre over the waters about, as they lie quietly in the lap of the surrounding hills. This scene is considered by many as the best of the eight.

In two more hours we were back at the bridge whence we had started up the river; but, as our *jinrikisha* men had been sent ahead to wait for us, we kept on down stream about a *ri* to the place where that river empties into the Naka-gawa. Landing here, we climbed the hill which stands in a corner at the junction of these two rivers, and at the verge we found another of the *hakkei*. From the name of the hill it is called *Iwafune [no] sekishō*, or "The Evening Glow of Iwafune." The outlook to the west-ward is over the low-lying fields to the Mito hills and the Tsukuba mountains, with a sight in very clear weather of Nikko; and it must present a fine view of the glorious Japanese sunsets which can so often be seen.

Walking a few rods to town, we joined our *jinrikisha* men; and, crossing the Naka-gawa by ferry, at 1 o'clock, entered the port called Nakaminato, at the mouth of that river. We had lunched on the way; but, as I had forgotten to give the coolies some change, they had not yet eaten their *kira-meshi*. So, while they were satisfying themselves in that respect, we walked out to the promontory near by, to the view called *Minato [no] Ki-han*, or "The Homeward-bound Sails of Minato." This promontory commands a fine view of the ocean, and would easily inspire a Byron to an "Apostrophe;" but neither my guide nor myself was even a machine poet. But I could easily imagine that the sight of the "deep blue sea" dotted with the white sails of the homeward-bound vessels would be exceedingly beautiful. This view, considered by some as the best, is ranked by many as second among the eight.

But now we were in a quandary: it was almost two o'clock, and there were twelve or thirteen *ri* yet to be travelled. It began to look rather dubious for the foreigner who had only a day passport, and could not spend the night anywhere except in his own home in Mito! The "impossible" of our kind policeman of the morning seemed likely to be verified. But we concluded at any rate to go on to the next place; and then, if it was too late, to return directly to Mito. We found the road, with the exception of two stretches of sand, very good; and, as our coolies hurried, we arrived somewhat earlier than we expected at Muramatsu. Climbing a literal sand-hill, we came to our fourth view, called *Muramatsu [no] Seiran*, or "The Clear Sky and Breeze of Muramatsu." The view of the ocean over the sand-hills is pleasant, and, under the appropriate circumstances is probably charming.

As it was then only four o'clock, we determined to keep our original purpose, even though we should be late in reaching home. From Muramatsu for a long way we had to walk through sand, and afterwards followed many "unbeaten tracks;" but at 6 o'clock we entered the town of Ota, and breathed easier, for we knew well the good, broad high way to Mito, and had no fear of darkness on such a road. Leaving our coolies to eat their supper, we walked across the rice-fields in fifteen minutes to a small hill, on which is set up the stone inscribed *Yamadera [no] Gunshō*, or "The Evening Bell of Yamadera (Hill Temple)." But there is no more opportunity of hearing the Buddhist "curfew;" for no temple stands there now with rich-topped bell to peal out into the stillness of the evening air. There is only a rude pavilion, with rough seats and table, and frequented by huge spiders.

Returning to town, my guide stopped at an inn to eat his supper, and I rode to the other end of the place to inspect another view, *Ota [no] Raku-gan*, or the "Decent of the Wild Geese at Ota." The wild geese were absent: but the prospect of a carpet of green fields stretching to the neighbouring hills was quite pretty.

Just as "the shades of night were falling fast," we started out on our home-stretch of five *ri* or more. We jogged along at a fair rate, and thoroughly enjoyed the cool night air. Toward the last the half-moon deigned to shine on us for a quarter of an hour; and then, probably satisfied that the foreigner without a passport could get home safely even without moon-shine, went behind the clouds, from which she peeped out only now and then. At ten o'clock we were at Aoyagi, a village on the Naka-gawa, just opposite Mito;

and here with lanterns we went in search of our seventh view, which we finally discovered. It is called *Aoyagi [no] yoru [no] Ame*, or "The Night Rain of Aoyagi;" and it impressed us all as being the most insignificant of the whole number.

Crossing the Naka-gawa by a bridge, and being almost thrown out by a huge log which probably, mischievous boys had laid across the bridge, we climbed the Mito hill. We found the city a little bright and noisy over a *matsuri*, in honour of Tennō Sama, or Susanō no Mikoto, brother of the sun-goddess. This particular Tennō Sama lives in the country, but comes to Mito once every year to make merry with his city cousins, and becomes extremely *yakamashi*.

We ought to have visited one more view, which is in Mito; but, as we had often been there, we omitted it, and by half-past ten o'clock were safe, each in his own home. The stone of this last view is set up just below Tokiwa Park, overlooking a marsh or swamp, which is politely denominated a lake. The stone is inscribed *Senko [no] Bosetsu*, or "The Evening Snow of Lake Semba."

Of all these views three (The Evening Bell, The Descent of the Wild Geese, and The Night Rain) are denominated "sad" (*Kanashi*); the others, therefore, are probably considered "pleasant." Moreover, with but one exception, all are in the night or evening; and, in the case of the exception (at Muramatsu), the calm breeze from the ocean would be likely to set in late in the afternoon.

In our trip we were away almost seventeen hours, of which we spent four and a half hours on the water (not including ferries), twelve and a half hours in *jinrikisha* or on foot, and the remainder in waiting. We travelled about twenty *ri*, of which fifteen *ri* were by *jinrikisha* or on foot, and the remainder by water. We had refreshing weather, with a little rain now and then in the afternoon, but only enough to keep the air cool. We had a pleasant time; and we saw a great variety of beautiful scenery, such as Nippon only can exhibit, both at and between the localities of the *Mito Hakkei*.

Mito, July 28th, 1890.

CLEM.

SAILING RACES.

The sailing races on Saturday were favoured with good weather, a light S.E. breeze prevailing at the start, freshening up during the progress of the races, but dropping at the close.

The small boats started half an hour after the larger craft, but of course finished much earlier. *Scamp* had the best of the start, but the bigger craft soon overhauled her on the reach to the Green Lightship, *Fessie* rounding first and *La Belle* next. The positions were not altered on the run down to the *Ronin* moored off the Kanagawa shore, except that *Violet* overhauled *Sayonara*, the latter having had considerable trouble with her steering gear. On turning to windward after rounding the Kanagawa mark *Fessie* at once began to walk away from the others. Off the English Hatoba her lead was a very long one, but in making a series of short boards thence to the finishing line she lost much time and the wind failing her left her 50 yards from the line almost unmanageable. She succeeded in crossing, however, well ahead of her opponents. The finish between *Sayonara* and *La Belle* was a close one, but the canoe squeezed through first. A similar tussle took place at the close between *Scamp* and *Violet*, the latter getting the best of it. On time allowance for prizes and points, therefore, *Fessie* scores a win and takes the cup, which by the way was offered by her owner, and *Sayonara* takes second prize and place.

		Green	Ronin
		Light ship.	h.m.s.
<i>La Belle</i>	16	1:43.40	2:10.25

<i>Fessie</i>	16	1:43.15	2:08.35
<i>Violet</i>	16	1:44.45	2:11.05
<i>Sayonara</i>	18	1:43.45	2:11.35
<i>Scamp</i>	10	1:44.39	2:13.30
		Allow-	Corrected.
		ance.	h.m.s.
<i>La Belle</i>	16	3:12.15	—
<i>Dol</i>	16	—	3:12.15
<i>Fessie</i>	16	3:00.30	—
<i>Violet</i>	16	3:33.00	—
<i>Sayonara</i>	18	3:17.10	3:07
<i>Scamp</i>	10	3:35.20	3:25.27

The large yachts got across the line at nine o'clock, the competing craft being *Daimyo*, *Lady Louise*, *Princess Maud*, and *Scow*. *Molly* was unable to start, being unprepared when the first gun went, and *Mosquito* which had to beat up to the line crossed twenty minutes after the starting gun. The wind was still light but promising a little more, when *Lady Louise* having had a little the best of the working to windward eased off outside the Lightship and laid her course for the Nakane buoy. *Princess Maud* was to windward of the blue cutter and *Daimyo* astern of both. *Princess Maud*

after edging up on Capt. Owston's weather beam at length drew ahead of him and rounded the buoy three minutes earlier, *Daimyo* being the same time astern of the second boat, while *Scow* and *Mosquito* were still far off the mark, the latter, however, having come up wonderfully. The small cutter did some good work on the run back to the Lightship with spinnaker, actually increasing her lead on *Daimyo*, and establishing a thumping advantage so far as concerned *Lady Louise*. Once round the Lightship, however, *Princess Maud* began to lose the wind; *Daimyo* brought it in to within a couple of hundred yards of her and there also lost it, and *Lady Louise*, after a good deal of squeezing to weather a junk, and thus avoid being set out like the others by the flow from the Creek, also found herself in the doldrums. Stray and uncertain airs still remained sufficient to bring the boats across the starting line. *Scow* had meanwhile hove in sight, and her big allowance of 57½ minutes from *Daimyo* and 47½ minutes from *Princess Maud* made her still a factor in the race, especially as she seemed to carry along with her a decent kind of breeze. Rounding the Lightship at 5h. 53m. she still had till 6h. 23m. 49sec. to win from *Princess Maud* and till 6h. 34m. 34sec. to win from *Daimyo*, and her prospects of even the first prize looked for a while very promising. It seemed to the spectators that she should hold on until close to the bathing barge and then if necessary make a short board to weather it. *Scow*, however, went about opposite the mouth of the Creek in the face of the current coming out and after a weary crawl in from the Lightship crossed the line at 6h. 28m. 45sec. thus taking the second prize, *Daimyo* being relegated to third place on the handicap. *Mosquito*, coming in very late, did not cross the line. For the record points under measurement handicap *Princess Maud* gets a first and *Daimyo* a second place. In the absence of Mr. Beatt, Mr. R. Haynacted as officer of the day. The following are the times:—

	Rating.	Nakane.	Light-ship.
<i>Daimyo</i>	38	3:50.00	5:15.00
<i>Lady Louise</i>	36	3:47.00	5:21.40

<i>Molly Barton</i>	—	—
<i>Tartan</i>	5:55	51½
<i>Princess Maud</i>	5:36.20	24
<i>Scow</i>	6:28.45	23

LETTER FROM SAN FRANCISCO.

(FROM OUR SPECIAL CORRESPONDENT.)

San Francisco, July 31st.

The sensation of the hour is a pronunciamento from the new Chinese Minister, Tsui, on the subject of the recent anti-Chinese legislation in this country. Its immediate occasion was the passage by the Board of Supervisors in this city of an Ordinance requiring Chinamen to evacuate Chinatown and to take up their abode in a remote suburb. Some months have passed since the enactment of the Ordinance, and lawyers are agreed that it is invalid. But the news of its passage seems only to have reached Peking at the time Tsui received his final instructions. He now takes it up in conjunction with the famous Scott Act of 1883 which was drawn and passed in the hope that it would secure the vote of California for the Democrats, and is the one damning blot on Mr. Cleveland's record. Minister Tsui states that ever since the Act was passed the Chinese Government has been labouring ineffectually to secure its repeal. He adds that unless that repeal is effected, the Government of Peking will treat Americans to a case of their own medicine, and citizens of the United States will be excluded from the Chinese Empire. He describes the feeling roused in China by the Scott Act as much more intense than had been suspected; a mob, he says, burned down the house of a Minister who concluded a treaty with the United States containing a provision for exclusion.

The San Francisco press lives in such terror of the hoodlum that it scorns the warnings, and challenges China to a rivalry in barbarous legislation. The *Bulletin* thinks that Mr. Harrison should send Minister Tsui his passport for hinting that a country so enlightened as this should treat the Chinese as it treats other human beings. Just so before the war, the Southern Editors were in favour of lynching abolitionists or any other persons who claimed that negroes had rights. The white trash of Alabama had no one to gaisay them at home; and our white trash are so far from China that they can venture to make faces at the Chinese Government,

and to swear like Bob Acres until Captain Absolute appears. But in the East there is some chance that the voice of humanity and common sense may be heard, and that at all events the intelligent class may conclude there has been enough trucking to the sand lot, and abasement before the hoodlum. Deference to the labour unions will cost high if it involves an embargo on trade with China, and the expulsion of American Missionaries. Even politicians are likely to be reckoning in these days that sacrifice of principle does not always pay. The Scott Act was drawn by a democratic Congressman, and passed under whip and spur to please a Democratic President, but three months afterward California went Republican by a smart majority.

The conflict between the Moulders' Union and the Foundries is in its last stage. A non-union workman was threatened with violence if he did not desert his employers. One of the latter, Mr. Kerr, an intrepid Scotchman, undertook to escort him back and forth from his work. The pair were set upon by strikers, and beaten; whereupon Mr. Kerr drew a pistol, and shot one of his assailants dead. He gave himself up to the police at once. A Coroner's inquest was held. The prisoner refused to produce witnesses, whereupon the jury brought in a verdict of manslaughter, instead of justifiable homicide. Kerr was admitted to bail in the sum of \$75,000. If the strikers succeed in getting a man or two on the jury which tries him he will not be acquitted.

Republican circles at Washington are still agast at Blaine's bolt. People don't seem to be able to discover whether he spoke for the Administration or for himself alone. There is an effort in circles friendly to the President to show that he concurs with his secretary; but the belief rests on no evidence, and the suspicion commonly entertained is that the President's personal views are reflected by Noble and Wannamaker, who are men of the same calibre as himself.

The House has passed the bill placing congressional elections under the control of Commissioners to be appointed by Federal judges; the Senate will doubtless concur. The object is to afford protection to southern negroes who are supposed to be desirous of voting the Republican ticket, but are prevented from doing so by bull-dozing and violence. As a matter of fact, the ex-slaves divide on politics like their masters; they are far from being unanimous in favour of the Republican side. The chief blow in the bill is that it constitutes a precedent for federal interference in State elections. The Tariff Bill is in *statu quo*; it has not recovered from Blaine's sachdologer. Last evening the Conference Committee on the Silver Bill agreed to a compromise by which the Treasury department is to buy 4,500,000 ounces of silver each month. For this silver, Treasury Notes are to be issued which shall be a legal tender and shall be redeemable in gold or silver coin at the option of the Secretary. They are to be receivable in payment of customs duties and all other dues to the Government. Thus the silver men have carried their point. An artificial market is created for silver, which will consume more than the annual output of the domestic mines, and will compel importations of silver from Mexico, South America, and possibly from Europe. The calculation is that this artificial demand for the metal will cause it to appreciate in gold value, until the old parity between the two metals is restored. Political economists are slow to believe that values can be permanently regulated by statutes. They are apprehension of serious results to flow from an inflation of the currency to the extent of four and a half millions of dollars a month. But after all, so long as the skies are serene, and the country keeps out of trouble, we may try lots of dangerous experiments without evil consequences.

The pension bill looks as if it would become a law in spite of the protests of reasonable people. Even the *New York Tribune*, which is the leading organ of the administration, has called a halt. But Ingalls and the extreme Republicans realise the value of the ex-soldier vote, and they are bent on securing it at any cost. It is reckoned that the amount that will have been paid to pensioners when the last one dies, will be equal to the whole cost of the war.

The situation in Behring's Sea is curious. A number of sealing steamers, armed and equipped for defence, have sailed from the ports of British Columbia; and simultaneously, two American revenue cutters have sailed for the same waters, with sealed orders. So far as is known, no British men-of-war have entered the sea. Newspapers on both sides of the line predict collisions and seizures which will strain the relations between the two countries. No apprehensions appear to be felt by the administration. Mr. Blaine has gone to Bar Harbor in search of cool breezes, and Sir Julian Pauncefote, the British Minister, has fol-

lowed him to that delightful retreat. When interrogated by reporters, Sir Julian contented himself with stating that negotiations were pending between him and the Secretary, and that he hoped for results which would be satisfactory to both nations. It is said that Russia offers to back up the United States in the contention that Behring's is a closed sea. *Non tali auxilio nec defensoribus istis, &c.*

There is more trouble in Central America. As the day approaches for the ratification of the agreement consolidating the states into a Union, politicians evince nervous apprehension. The other day, a ball was given to celebrate the anniversary of the inauguration of President Melendez of Salvador, the successor of Zaldimar. At the close of the German, Melendez was found to be dead, and the dancers, under the guidance of the leader of the German, proceeded to elect his successor. Whether he died a natural death, or was assassinated, nobody knows, and nobody cares. The régime of anarchy and disorder which is about to make way for a régime of quiet government and peaceful development in that part of the world, cannot be got rid of without some friction. We may expect further bloodshed before the 14th September—which is the day set for a vote for or against consolidation.

This is the gay season at the summer watering places, and the butterflies of fashion flutter their pretty wings more gaudily than ever. Some of the belles have histories. Your correspondent lately watched with interest the evolutions of a beautiful blonde, who was the centre of an admiring circle, and who shot deadly shafts from a pair of eyes as bright as ever shone. Six or seven years ago, she was a reigning belle, and was thought to have invested her beauty judiciously when she captured a middle aged millionaire, with many acres, and a long Spanish pedigree. Four years afterward, at a given signal, the door of her boudoir was suddenly burst open, and the husband, escorted by two detectives, burst in. What they saw, the Court subsequently refused to allow them to state until the Court room had been cleared. It was enough to secure for the husband a divorce, with custody of his child. The beautiful blonde was left penniless, and disgraced. But she was not crushed. By a series of dexterous manoeuvres, she succeeded in kidnapping her child, and baffled all the efforts of the father to recapture her. In the contest which ensued, she met her husband, and once more he fell at her feet, and besought her to forgive and forget. She stipulated that, as an evidence of his good faith, he should make a suitable settlement on her. He complied, and then she told him that while he would always be a welcome guest at her house, or under convenient circumstances, in her apartments, she proposed to lead the life which she chose. He is to be seen smoking strong cigars, and grinding his teeth on the balcony, while she dances in the drawing-room.

IN H.B.M. COURT FOR JAPAN.

Before J. J. ENSLIE, Esq., Acting-Assistant Judge.
TUESDAY, July 26th, 1890.

DEGRON V. GABARETTA.

The case of Degron v. Gabaretta came up again to-day on an application by the plaintiff for the examination of the defendant under General Rule 129 of the Court.

Mr. Litchfield appeared for the plaintiff, and Mr. Walford for the defendant.

Richard Gabaretta, sworn, deposed in answer to Mr. Litchfield:—I live at No. 138, Settlement. I am an engine-driver by occupation. I am engine-driver of the steam fire engines. I receive for that \$70 a month. I have no other business whatsoever.

What property have you got to meet the judgment in Degron v. Gabaretta?—The only property I have is lot No. 50a, Bluff.

Two years ago you had considerable property on the Bluff?—I had some, not considerable. I had lot 26c and 50a and 50b on the Bluff. I had 26a a long time ago, but I disposed of it. I sold 26c, but had only part payment for it. I sold 50b and received payment for it. It was sold in 1883. The purchase price of 50b was about \$900, reduced by expenses and repairs to about \$800.

You also owned 22a, Bluff, that you have not told us of?—I never possessed that lot.

Nor any part of it 2248?—Not a fraction.

Was it registered in your name?—No, Sir.

You say you still own 50a and upon that you say there is a mortgage for \$350?—Yes, Sir.

When was that mortgage made?—In January this year.

What have you done with that money?—Some

Original from

UNIVERSITY OF ILLINOIS AT
URBANA-CHAMPAIGN

I sent home to my family and some I spent on my own family out here.

How was the money paid to you by Mrs. Witt?—She paid \$100 in January and \$250 in the beginning of March. If I am not mistaken she paid me in cash—the last payment I now think was a cheque.

Do you keep any banking account?—No, I wish I could.

Where did you cash that cheque?—I am not positive whether she gave me cash or a cheque, but it was on the Hongkong and Shanghai Bank.

What do you mean? If it was not a cheque, what was it?—I think it was a cheque on the Hongkong and Shanghai Bank. I cashed the cheque of course. The first \$100 I got in January I sent home; the \$250 I spent on my family here. I sent part of the first payment to pay the expenses of my father's funeral.

Who is Margaret Gabaretta?—My wife.

Where did she get the money from to buy 224, Bluff, in February this year?—She bought it with her own money.

I am afraid I must ask you again where she got the money?—She had before our marriage five or six hundred dollars of her own money; she worked up that money until she has about \$1,200 now.

None of that \$800 you got for No. 50 went to make up that \$1,200?—None. My wife had \$500; we have been ten years married, and she has increased her capital to \$1,200. Not a cent of the \$800 I received for No. 50 went to make up that \$1,200! I was married about nine years ago before Mr. Martin Dohmen.

When did Mrs. Gabaretta first purchase No. 224?—Sometime in the beginning of this year.

From Mr. Kirkwood?—Yes, Sir.

How is it that there is an entry in the Consular books of a transfer from you to Mr. Kirkwood some years ago?—I do not know. It must be a mistake. I never possessed the lot. I never put my foot on it.

Have you the title-deeds of No. 224, Bluff?—No, Sir.

Was it you or Mrs. Witt that effected the registration of the mortgage on lot No. 50?—I did not do it.

Can you tell me why that mortgage was not registered till May this year?—I don't know.

How was it not registered till Mr. Degron came to Yokohama?—I don't know.

How was it that the transfer of your house was not registered till Mr. Degron came?—I don't know. I don't know in what month Mr. Degron came.

Don't you think it very curious that neither the transfer of No. 224 nor the mortgage of No. 50 were registered till Mr. Degron came to Yokohama this year and made application to you for a considerable sum of money?—Oh, no, not by any means.

On the motion of Mr. Litchfield, an adjournment was granted till 10.30 a.m. to-morrow in order that the plaintiff might subpoena Mrs. Gabaretta to produce the title-deeds of No. 224, Bluff.

WEDNESDAY, July 30th, 1890.

This case came up again to-day on proceedings taken on a judgment summons.

Margaret Gabaretta was called by Mr. Litchfield for the plaintiff.

Mr. Walford, for the judgment debtor, said if Mr. Litchfield only wished production of the title-deeds of No. 224, Bluff, Mr. Gabaretta would produce them now.

Mr. Litchfield said he had some questions to ask. Witness, who said her Japanese name was Chiyo, was examined through an interpreter, and deposed:—I am Mr. Gabaretta's wife. I now produce the title-deeds of lot No. 224, Bluff.

This conveyance is from Mr. M. Kirkwood to Margaret Gabaretta of No. 224 c. Bluff, dated 22nd February, 1890, registered in the Kencho 28th February, 1890, and registered at the British Consulate 6th May, 1890. Was the consideration money for that deed, \$1,050, paid at the time of the transfer?—The consideration money was paid all at one time.

When was it paid and how?—At the time of purchase \$500 was paid; afterwards \$200. I am not certain when the balance was paid, but I think it was in March.

How long have you been married to Mr. Gabaretta?—About nine years.

Have you been trading on your own account all this time?—I have not traded on my own account since my marriage, but I have lent money to friends.

Have you sold that land in the interior?—Yes.

When was it sold?—After I became a British subject.

Have you received any money from your husband since you were married?—No.

Who pays the household expenses?—Mr. Gabaretta. He sometimes pays the household bills himself and sometimes not.

Where did you get that \$350 you say you paid to Mr. Kirkwood in March?—It was my own money.

Who was it lent to?—It was lent to a friend of mine.

Hadn't the friend any name?—It was lent on my account by Gabaretta to Japanese. It was not all lent to one person.

You received this \$350 through the hands of your husband in March of this year?—No. I had money paid back to me in March.

From whom?—From Japanese—two persons. It was money that I had lent myself.

Who advised you to register the conveyance of No. 224 in the British Consulate—Mr. Gabaretta?—It was a friend of mine—I do not know the name—who advised me to register it.

What reason did he give for his advice?—I thought that because I had become a British subject I ought to register it.

Then you did it without advice from a friend?—Yes.

You thought it right to register it in the Consulate 4 months after it had been registered in the Kencho?—Yes. The title-deeds I received when the transfer was registered in the Kencho. Gabaretta took the title-deeds to the Kencho.

And I suppose Gabaretta paid the money to Mr. Kirkwood?—Yes.

Now was it not your husband who advised you to register the transfer in the Consulate?—No, it was my own idea.

Mr. Walford had no questions to ask.

Gabaretta's evidence was then read over to him. He corrected it by stating that he had a banking account, but none of the money belonged to him.

Nicholas Morgin deposed, in answer to Mr. Litchfield—I am an Austro-Hungarian subject, and am connected with the Fire Brigade department, No. 238, being superintendent of hand fire engines. Mr. Gabaretta lives on the same lot. I witnessed a mortgage I think in the present year, but what month I could not swear to. I have had conversation since with Mr. Gabaretta on the subject of that deed.

Did he give you any reason for making it?—He said, "You see what trouble I am in now just because I wanted to do another man good." He said, "Mr. Degron, I believe, is coming out here," but I do not know what he meant by it.

Did he say anything as to what the result would be to his property if Mr. Degron did come out?—No, he told me that he had bought No. 224, and asked me what I thought of it. I offered to buy it from him, but he would not sell it. He did not say anything to me about whether he had bought it in his own or his wife's name.

Mr. Walford had no questions.

Mr. Litchfield (to the Court)—Will you ask Mr. Gabaretta what proposals he has to make for the settlement of this claim.

Mr. Gabaretta—I have a list of my effects.

The Judge—Have you any suggestion to make as to the settlement or payment of this judgment? What do you produce doing in the matter?

Mr. Gabaretta—I propose to give up my furniture and whatever I have in the house. As for cash of course there is the lot of ground, and they can sell that for what it can realize; for the rest I have no other means.

Mr. Walford said Mr. Litchfield had a statement of the assets of Mr. Gabaretta, which showed that the total value of his property was only \$790. Of course Mr. Litchfield was at liberty to do what he wished with the assets as far as they would go.

Mr. Litchfield said he had a list of certain effects the debtor was supposed to possess, but there had been no suggestion as yet that any payment should be made out of them. Of course the kind of application counsel would have to make to the Court would depend on the debtor's action in the matter. There was a strongly suspicious circumstance in this case connected with the \$350 borrowed in the early part of this year. Mr. Gabaretta said part of it was applied to the support of his family at the time, but they had this peculiar circumstance that shortly afterwards a sum of exactly the same amount was paid as an instalment for the purchase of No. 224, Bluff—a purchase made in the name of the wife. Of course under the Married Women's Property Act a wife was allowed to hold property on her own account, but that Act excepted any gifts made by a husband in defrauding of his creditors. The money in this case could be followed, and there was a very strong presumption that the money raised upon No. 50-a was applied to the purchase of No. 224. Mr. Gabaretta said that when his wife was married she had five or six hundred dollars. Five hundred dollars was the

amount paid as the first instalment for the purchase of No. 224, and the other instalments paid subsequently were one of \$200 and one of \$350. He submitted that the latter of these sums was the amount borrowed on No. 50-a. Of course the story told by Mrs. Gabaretta of her dealings with the money was a very good one, and if it were true he should say she was lucky to be able to get her money back from Japanese when it was wanted. He thought the experience of most would go the other way, especially in the present year when Japanese were more ready to borrow than to pay. Under those very suspicious circumstances he must ask before making any application to the Court under the rules, for some suggestion as how the money was to be paid. If Mr. Gabaretta was willing to save the plaintiff any further trouble then possibly counsel would accept his proposition, otherwise he should ask the Court to deal with him.

Mr. Walford said of course there was not the slightest evidence that this \$350 was the money that had been borrowed, and it was a very reasonable suggestion that in nine years \$500 would, at the very high rate of interest which Japanese were willing to pay, be increased to \$1,200. There was no evidence that any of Mrs. Gabaretta's money had been spent on the household expenses of the family. There had been no cross-examination on the point, and Mr. Litchfield had not connected the two sums nor in any way given any foundation for the suspicion which he said attached to this transaction. Counsel thought the Court should not in any way regard that as a suspicious circumstance, especially in the face of the evidence given by Mr. and Mrs. Gabaretta. In the matter of a settlement the assets were so extremely small in comparison with the total of the judgment debt, that it was difficult for the debtor to suggest what should be done. The assets were only \$790, and practically the debtor was at the mercy of the other side, so that it seemed to counsel as if any suggestion should come from the other side.

Mr. Litchfield said in the circumstances he must ask the Court to make an order for the committal of the debtor. He asked whether the Court was not satisfied that the debtor had with intent to defraud his creditors or any of them "made or suffered any gift, delivery, or transfer of any property, or charged, removed or concealed any property." He also asked that execution might ensue for such property as the debtor had, and that order be made for the payment of the balance of the debt by instalments out of his salary.

Mr. Walford contended there was no evidence of any fraud on the creditor under section 131. Mr. Gabaretta thought he might be able to raise \$500 on the assets he had mentioned; more than that he could not possibly promise to do.

The Judge said he did not see his way to make the committal order. With regard to an arrangement, it struck him that it was a matter that might be taken into consideration, and he thought if both parties were to consider the question some sort of a more or less satisfactory arrangement might be arrived at. For that purpose and in view of any other order he might make in this matter, his Honour would adjourn the case till Wednesday the 6th at 10.30 a.m.

THE MATHEMATICAL TRIPOS.

For the first time in the history of the University of Cambridge a woman has been placed at the head of the Mathematical Tripos, and practically declared to be Senior Wrangler for the year. So remarkable a result of the movement which the present generation has witnessed in this country for the higher education of women is eminently worthy of special record and comment. It gives new dignity and encouragement to efforts which have not always secured the sympathy of everybody, and to institutions which have had to struggle in their time against much opposition, indifference, and disdain. But the award of the position of Senior Wrangler to a woman is not merely the triumph of a social movement and the academical consummation of a new departure in education. The lady who distanced all her competitors in the Tripos, and is declared to be placed above the nominally Senior Wrangler bears the honoured name of Fawcett. She is only daughter of a statesman whose strenuous life and consistent career have made that name known and respected throughout the length and breadth of the British Empire, while his untimely death and his heroic mastery of an infirmity which might well have quenched the energies of a man of ordinary fibre have invested his memory with a deep and widespread sentiment of personal sympathy. Many people who never knew Mr. Fawcett, or

knew him only as a public man, will accordingly rejoice in the academical triumph of his daughter with a feeling akin to personal and familiar congratulation. The placing of a woman for the first time at the head of the Tripos would, indeed, have been a memorable and significant event if the lady's only title to fame had been her attainment of the position. It is certainly more memorable and more significant in a personal sense, at least, when the lady is the daughter of the blind Postmaster-General whom all the world knew, sympathized with, and respected, and of Mrs. Fawcett, who is and has long been a leader among her sex in the work of educational, and social and political reform; and the niece of one of the first of those who overcame the prejudice against the study and practice of medicine by women.

Miss Fawcett, however, though the first Senior Wrangler of her sex on record, is not, of course, the first lady who has attained the place of honour in a Cambridge Tripos. Her triumph was anticipated a few years ago in regard to the Classical Tripos by Miss Ramsay, now Mrs. Butler, the wife of the Master of Trinity. But though the number of the celebrated female mathematicians has, perhaps, exceeded that of celebrated female classical scholars, and though it might be thought, on abstract grounds, that mathematical eminence is more easily attainable by women than classical, yet it can hardly be doubted that the achievement of Miss Fawcett is more likely to strike and impress the popular imagination than the previous achievement of Mrs. Butler. The Mathematical Tripos is to the popular mind the Cambridge examination *par excellence*. The Senior Wrangler of his or her year—as we must henceforth say—is pre-eminently the Cambridge hero or heroine of that year. It is no disparagement to classical scholarship as compared with high mathematical attainment that this should be the case. It is simply the result of a time-honoured system which has impressed the popular mind and has invested the Senior Wrangler with an unrivalled halo of academical distinction. It is true that both Triposes have been greatly modified of late years, so that the attainments both of Senior Wranglers and of Senior Classics—that is, of those who are respectively placed first in the First Part of their respective Triposes—are less advanced than those of their earlier predecessors in the old undivided Triposes. But the distinction, being at best comparative, is essentially as great as ever. Miss Fawcett has distanced all her competitors in an examination designed to test their comparative capacities in a specified range of mathematical study, and, the tests being searching and the range an extensive one, there is at least *prima facie* reason to suppose that the superiority she has now displayed would be maintained if her studies were extended into the wider field covered by the Second Part of the Tripos, and their results hereafter tested against the same competitors. Her success, indeed, was not wholly unexpected. The Cambridge system has not been so much altered but that those who have the training of the candidates can measure their respective chances and capacities and predict beforehand with tolerable accuracy what their place in the Tripos is likely to be. A word of sympathy is, perhaps, due to the gentleman who, but for Miss Fawcett's success in an examination where her name is not allowed to take the place which belongs to it, would have been and, we suppose, according to strict academical usage and phraseology, is, the Senior Wrangler of the year. Mr. Bennett's name will go down to academical posterity as that of the first Senior Wrangler who was beaten by a woman. If the names of men and women were printed indiscriminately according to order of merit in the same list, he would simply have been Second instead of Senior Wrangler; and though he might naturally have been disappointed at not having attained the first place, his native chivalry would, we are sure, have revolted at any suggestion that his defeat was rendered more disappointing by the fact that the first place was assigned to a woman rather than to a man. But his actual position is anomalous and, perhaps, needlessly vexatious. To be beaten by a woman is nothing in itself. To have nominally taken the first place and yet to have been beaten by a woman in an examination in which women, though allowed to compete, are not allowed to take their proper place in the formal declaration of results, is a position which, perhaps, unnecessarily emphasizes the distinction of sex to the disadvantage of the sex which, as some people will think, ought no longer to be called the stronger.

Now that one lady has attained the virtual position of Senior Classic, and another that of Senior Wrangler, and that several ladies have obtained high classes in Moderations at Oxford, it is manifest that the time is past for anything like a general discussion of the principles involved in

the question raised by the movement, which is so characteristic of our age and country, for the Higher Education of Women. The main question has practically solved itself by the best and most unanswerable of all methods of solution, that of the accomplished fact. There is no longer any occasion to ask ourselves whether it is desirable that women should be afforded the same opportunities of advanced education as have long been enjoyed by men, because in principle and in substance women, through the devoted aid and support of those who have made themselves the pioneers of the movement, have already secured these opportunities for themselves. A further and a more difficult question is already beginning to present itself, and that is, What use are women to make of the results of the opportunities they have secured? Are they to enter into direct competition with men for the prizes of human endeavour? Education, theoretically considered, is doubtless an end in itself. For purposes it is and must be regarded as a means also—an equipment, that is, for the general struggle for existence. How does the higher education of women operate in this direction? It would take us too far to attempt to answer or even to discuss this question, and we must content ourselves with observing that it is one which raises a host of wide and difficult issues. In the meantime, it may not be amiss to consider a subsidiary question connected with this subject, which was raised the other day by Mr. Gladstone in his evidence given before the Flintshire County Council. "I must own," said Mr. Gladstone, "that I resent extremely . . . the arrangement under which girls and young women are brought to the University and absolutely precluded from touching one farthing of the vast wealth of the Universities and Colleges, and I hope in what will be done under the Intermediate Education Act the ladies will have fair play." Surely there is here a somewhat mischievous confusion between two questions which are, and ought to be, kept perfectly distinct. In dealing with new educational endowments it is reasonable and just to make equal or at least equivalent provision for both sexes. But that is altogether a different thing from saying that women have an indefeasible claim to a share of endowments already allocated to purposes admittedly fulfilled. New purposes require new endowments, and in justice to the public spirit of this country it must be said that as soon as new purposes are acknowledged to be worthy the new endowments have generally been forthcoming: The history of Oxford and Cambridge is the history of new intellectual impulses finding their expression in new educational foundations. The very name of New College is a standing witness of the fact, and the intellectual history of England may be traced from the days of Walter de Merton to those of John Keble in the successive academical foundations from the thirteenth century to the nineteenth which have made Oxford and Cambridge what they are. The new colleges as they were successively founded did not go begging to the old for a share of what must have seemed their "vast wealth." They were content to begin, as the women's colleges in Oxford and Cambridge have begun in our times, with small beginnings and strenuous efforts, and a faith in the generosity of the wealthy and the public spirit of the benevolent, which was invariably justified in the end. We cannot doubt that the success of Miss Fawcett, following on that of Mrs. Butler, not to mention the similar though less individually famous successes of women at Oxford, will stimulate this faith in the case of the Higher Education of Women and once more justify it abundantly. There could be no more appropriate memorial to such a man as Mr. Fawcett was, so true to the cause of women, so faithful in his love of Cambridge, than one which made his daughter's attainment to the highest distinction which Cambridge can bestow on a student the occasion for renewed efforts on behalf of the Higher Education of Woman.—Times.

LATEST TELEGRAMS.

[REUTER "SPECIAL" TO "JAPAN MAIL."]

London, July 24th.

The 2nd Battalion Grenadier Guards has sailed for Bermuda. The Duke of Cambridge is so much ashamed of the disgrace to the uniform of the Guards that he has disowned his connection with the Regiment.

British delegates are going to Paris for the purpose of entering into negotiations to bring about an understanding for an extension of the zone of French influence in the Lake Chad re-

gion as a set-off against admitting the British protectorate of Zanzibar.

[A telegram in the Singapore papers, which did not reach Japan, solves the somewhat mysterious departure of the Grenadiers. It appears that the battalion refused to turn out for inspection, and subsequently when addressed by their Colonel-Commandant, the latter was hissed. The Duke of Cambridge has been Colonel of the Regiment since 1861.—Ed.]

London, July 26th.

In the Cricket Match, All England v. The Australian Team, the former won by seven wickets.

Sharp diplomatic correspondence between the English and United States Governments, in regard to the seal fishery dispute in Behring Sea, has been published.

London, July 29th.

A military revolt has occurred at Buenos Ayres. The President [Dr. Miguel Juarez Celman] has fled, and the rebel government has proclaimed its authority.

The negotiations are approaching a conclusion between England and France regarding the English position at Zanzibar and the French protectorate in Madagascar and the extension of French influence in the direction of Lake Chad.

London, July 30th.

The House of Commons has finally passed the bill for the cession of the Island of Heligoland to Germany.

Desperate fighting between the Government troops and the revolutionary party is reported from Buenos Ayres.

TIME TABLES AND STEAMERS.

TOKYO-YOKOHAMA RAILWAY.

DOWN TRAINS LEAVE SHIMIZU Station at 6.05,* 6.40, 8.35, 9.30,* 10.25, and 11.45 a.m., and 1.25, 2.30, 3.55, 4.45, 5.50, 6.50, 8.30, 9.55, and 11.15 p.m.
UP TRAINS LEAVE YOKOHAMA Station at 6.30, 7.20, 8.10, 9.15, 10.22, and 11.30 a.m., and 12.45, 2.3, 4.25, 5.30, 6.35, 7.50, 9.10, 10.05, and 11.05 p.m.
FARES—First-class, *sen* 60; second-class, *sen* 40 and third-class, *sen* 20.

Trains marked (*) run through without stopping at Omori, Kawasaki, Tenjimi, and Kanagawa Stations. Those marked (t) run through without stopping at Omori, Kawasaki, and Tsurumi Stations.

TOKAIDO RAILWAY.

TRAINS LEAVE YOKOHAMA (down) at 6.50, 9.10, 10.20, 11.25 a.m., and 12.40, 3.25, 4.55, 5.35, and 7.45 p.m.; and KOZU (up) at 6.35, 8.40, 9.40, and 11.07 a.m., and 1.17, 2.45, 4.58, 7.25, and 9.46 p.m.

FARES—To Hologaya, first-class *sen* 6, second-class *sen* 4, third-class *sen* 2; to Totsuka, *sen* 18, *sen* 12, *sen* 6; to Ofuna *sen* 36, *sen* 24, *sen* 12; to Fujisawa, *sen* 42, *sen* 28, *sen* 14; to Hiratsuka, *sen* 66, *sen* 44, *sen* 22; to Oiso, *sen* 75, *sen* 50, *sen* 25; and to Kozu, *sen* 93, *sen* 62, *sen* 31.

Down trains at 6.50 a.m. run no further than Kyoto arriving there at 11.30 p.m.; at 10.30 a.m. no further than Nagoya, arriving at 10.10 p.m.; at 12.40 p.m. no further than Shizuoka, arriving there at 6.50 p.m.; at 3.35 p.m. no further than Shizuoka, arriving at 8.16 p.m.; and the train at 5.35 p.m. runs to Kobe, arriving at 12.45 p.m. next day.

A tramway runs between Kozu and Yumoto (distance 4 vi. Jirikisha may be hired between Yumoto and Miyakosuta distance 14 vi.)

OFUNA-YOKOSUKA RAILWAY.

TRAINS LEAVE OFUNA (down) at 7.30 and 9.40 a.m., and 12.05, 1.30, 4.03, 6.14, and 8.30 p.m.; KAMAKURA (down) at 7.41 and 9.51 a.m., and 12.16, 1.41, 4.14, 6.25, and 8.41 p.m.; and ZUSHIMURA (down) at 7.50 and 10 a.m., and 12.25, 1.50, 4.23, 6.34, and 8.50 p.m.; YOKOSUKA (up) at 6.45, 8.55, and 11.20 a.m., and 12.50, 3, 5.10, and 7.45 p.m.; ZUSHIMURA (up) at 7.01, 9.12, and 11.36 a.m., and 1.06, 3.16, 5.26, and 8.01 p.m.; and KAMAKURA (up) at 7.11, 9.22, and 11.46 a.m., and 1.15, 3.26, 5.36 and 8.10 p.m.

REPORTS.

The American steamer *City of Peking*, Captain Cavarly, reports:—Left Hongkong the 19th July at 2.26 p.m. arrived at Kobe the 24th July at 6.00 a.m.; sailed again the 25th at 5.57 p.m. arriving at Yokohama the 26th July at 10.30 p.m.; had fine weather, smooth sea, and light winds the entire passage.

The Japanese steamer *Satsuma Maru*, Captain Brown, reports:—Left Kobe the 26th July at noon; passed Oosima at 9.40 p.m.; Rock Island the 27th at 00.32 p.m., from Kobe to Sagami had light easterly winds and gloomy weather with smooth sea; thence to port moderate W.S.W. winds and cloudy weather. Arrived at Yokohama the 27th July at 6.20 p.m.

The Japanese steamer *Wakanoura Maru*, Captain Hussey, reports:—Left Hakodate the 26th July at 4 a.m.; had light variable winds and fine weather throughout the passage. Arrived at Oginohama the 27th at 5 a.m. and left at 11.30 a.m.; had light southerly winds and cloudy weather; passed Inuboye the 28th at 2.45 a.m., with fresh winds from S.W. and cloudy weather; passed Noshima at 10.30 a.m., had light southerly winds and fine weather. Arrived at Yokohama at 2.30 p.m.

The Japanese steamer *Omi Maru*, Captain Christensen, reports:—Left Kobe the 28th July at noon; had moderate southerly winds with squally weather to Ooshima; thence light variable winds, overcast and cloudy weather to Rock Island with light S.E. swell; thence to port S.E. breeze and cloudy weather. Arrived at Yokohama the 29th July at 5 p.m.

The Japanese steamer *Yamashiro Maru*, Captain Young, reports:—Left Hakodate the 28th July at 5 a.m.; had dull misty weather and light variable air; rounded Shiriya-saki in a fog and had light S.E. to south-westerly breeze and smooth sea, dull overcast sky and more or less fog down to Inuboye the 29th at 5 p.m.; thence moderate W.S.W. breeze and dull cloudy weather to Noshima at midnight, when had continuous heavy rain and inky darkness with plenty of lightning till 3.30 a.m.; thence to port light variable winds and dull cloudy weather. Arrived at Yokohama the 30th July at 7 a.m.

The Japanese steamer *Tokio Maru*, Captain Drummond, reports:—Left Kobe the 30th July at noon; had fine weather and light variable breeze; rounded Tomanga-shima at 2.25 p.m., with light southerly breeze; abreast Hino-misaki at 4.45 p.m., breeze shifted to S.E.; passed Ooshima at 9.15 p.m., light breeze and occasional showers throughout the night; passed Rock Island the 31st at 11.50 a.m., moderate to light south-easterly breeze to port, which was reached at 5.45 p.m.

LATEST COMMERCIAL.

IMPORTS.

The Yarn market has continued very dull during the week, there being no demand for either 16/24's or 28/32's English Spinnings. Bombays are about a dollar lower, without much doing. Shirtings remain very quiet. A small business has been done in Italians. Sales for the week amount to:—English Yarns 175 bales, Bombays 70 bales, Shirtings 3,750 pieces, and Italians 1,000 pieces.

COTTON PIECE GOODS.

	YARDS.	PRICE.

METALS.

Quotations must be reduced this week, but even at these figures the courage of buyers has evaporated, and very small business has been done. Stocks are ample, and the trade does not seem to be at all profitable.

Flat Bars, 1 inch	\$2.80 to 2.90
Flat Bars, 1 inch	2.90 to 3.10
Round and square up to 1 inch	2.80 to 3.00
Nailrod, assorted	Nom.
Nailrod, small size	Nom.
Iron Plates, assorted	3.00 to 3.15
Sheet Iron	3.40 to 3.70
Galvanized iron sheets	6.30 to 6.70
Wire Nails, assorted	4.00 to 4.50
Tin Plates, per box	4.80 to 5.10
Pig Iron, No. 3	1.35 to 1.40

KEROSENE.

No fresh arrivals since the large cargoes noted last week. These are being landed, and the present stock must be fully 600,000 cases. Chester, Comet, and Devoe are all in good supply now, and the market, although called steady, is very dull and inactive at present. Quotations unchanged but well-nigh nominal, and some reduction would have to be made to induce large transactions.

QUOTATIONS.

Chester	Nom. \$1.75 to 1.77½
Comet	Nom. 1.70 to 1.72½
Devoe	Nom. 1.67½ to 1.70
Russian	Nom. 1.65 to 1.67½

SUGAR.

Transactions in Sugar have been fairly good, especially in Takao Brands, which have found buyers to the extent of 10,000 piculs, divided thus:—8,000 piculs at \$4.35 per picul (superior), and common 2,000 piculs at \$4.20 per picul. There have been small sales of White Refined, in all 3,586 piculs, at \$8.15 per picul for 650 piculs; \$7.75 per picul for 1,000 piculs; \$7.20 per picul for 1,036 piculs, and 900 piculs at \$6.35.

White Refined	\$5.75 to 8.30
Manila	3.70 to 4.50
Taiwanfoo	— to —
Pentana	2.85 to 2.90
Namida	2.80 to 2.85
Cake	— to 3.70
Brown Takao	4.15 to 4.20

EXPORTS.

RAW SILK.

Our last issue was of the 25th ultimo, since which date we have had a more active market, and settlements are noted as 237 piculs, divided thus:—Hanks 20, Filatures 145, Re-reels 113, Oshu 9. Direct shipments also account for a further 63 piculs, making the total business of the week for export equal to 350 piculs.

The demand is full, and at present quotations buying is confined to few hands: Considerable business was done for the States just before the departure of the Vancouver steamers: but since they left things have subsided a bit, and rumour has it that the New York market is tending downwards. It is a hard struggle day by day between holders and buyers, the former contending that every picul of silk they sell at present quotations leaves them a loss, while the latter argue that an

advancing exchange coupled with poor news from consumers must have the effect of eventually depressing prices here.

Supplies are now more ample, and a fair assortment of most kinds is on offer: this, however, seems to affect holders but little; they say they prefer to carry their stocks and pay the necessary interest rather than submit to the losses which present prices entail. The whole mischief seems to arise from the unwarranted rise of a month ago. Had we seen a steady market on the basis of values at which the campaign opened, we should have had a fair trade all along; remunerative to reeler, dealer, shipper, and consumer alike.

There have been three shipping opportunities during the interval, English, Canadian, and United States mail steamers all taking something. The *Verona* (26th July) had 48 bales for Lyons. The *Abyssinia* (27th) took 86 bales for New York, and the *City of Peking* left port on the 29th with 305 bales for the same destination. These departures bring the present export figures to 1,463 piculs against 1,748 last year, and 2,868 at same date in 1888.

Hanks.—The sale of *Hachoji* mentioned in our last has been followed by a parcel of *Maibashi* at \$545. The stock in this class is not large, and holders appear content to wait events.

Filatures.—Here supplies are ample, but owners are apparently able to hold till further notice. Some of them would like to be moving, but hesitate about reducing prices to such a point as would tempt buyers. Telegraphic advices from over the Pacific do not seem very rosy, and the consequence is that for the present very little business is being done. Dealers hope for another little spurt previous to the departure of next American mail, but unless at reduced prices there is no prospect of any considerable trade. The last prices made include *Hakuzuru* \$690, *Kairossha* \$685, and *Kanayama* at \$680. Nothing done in pure *Koshu* silks—holders are strong and ask long figures for their wares.

Re-reels.—Some few parcels were taken for last American mail, including *Torloise* \$675, *Shorusha* \$650, *Kirihana* \$650, with 2nd quality at \$635. A parcel of *Bushu Kodama* also done at \$635, with inferior grades at \$605. Holders fight strenuously against any reduction on these figures notwithstanding the rise in exchange.

Kakeda.—No business this week; several well-known brands are now on the market; but so far, little or no business has resulted.

Hanatsuki.—Two or three parcels "*Katsuhama*" taken up for Europe at \$547½.

Export Raw Silk Tables to 1st August, 1890:—

	SEASON 1890-91.	1889-90.	1888-89.
Europe	299	915	1,940
America	1,106	804	922
Total	1,405	1,749	2,862
	Piculs	1,463	2,868
Settlements and Direct	1,300	2,750	2,630
Export from 1st July	1,300	2,750	2,630
Stock, 1st August	5,300	1,750	3,700
Available supplies to date	6,600	4,500	6,330

WASTE SILK.

Not a single transaction this week either in old or new fibre. Statistics of settlements are there-

fore unchanged, although the Stock-figures are much higher than last week.

Holders and buyers maintain an attitude of observation; dealers do indeed begin to name a price for some of their wares, but they open their mouths so wide that no man responds.

The *City of Peking* took one bale *Mawata* for New York, and that solitary bale forms the export for the week. Shipments for the season to date are now 630 piculs, against 312 bales last year and 1,118 at 1st August, 1888.

Pierced Cocoons.—These are coming to hand pretty freely now. Owners want \$16 per bu, or say \$20 for 75 per cent. yield. This does not meet buyers' ideas at all, and there will be a struggle for lower prices before much business is done.

Noshi.—Stock of *Noshi* is piling up, but holders do not appear to be inclined for serious business. They ask \$85 for very poor assortment, while shippers' notion for the same quality is \$75.

QUOTATIONS.—(NEW WASTE.)

CONTRACTORS TO THE ADMIRALTY, LEADING STEAMSHIP COMPANIES, AND YACHT OWNERS.

STEAM LAUNCHES & YACHTS,

Fitted with KINGDON'S PATENT MACHINERY (of which we are sole makers) are far superior to any others. The chief advantages are:-

1. Wonderful Economy of Fuel.
2. First-class Workmanship.
3. Moderate Prices.
4. Greatest obtainable power for weight and space occupied.
5. Quickness in raising steam.
6. High rates of speed guaranteed.
7. Absence of noise and vibration.

We build Steam Launches of every description, from the smallest size suitable for carrying on rafts of 10 tons and upwards. We also build small light Draft Paddle Boats, Tugs, Stern Wheel Paddle Steamers, and Boats in Frames, &c., &c. We supply sets of Machinery separately. Illustrated Catalogue in English, French or Spanish. Send for Copy to

SIMPSON, STRICKLAND & CO.

WORKS:
BARTMOUTH, SOUTH DEVON (ENGLAND).

LONDON OFFICE:
161, QUEEN VICTORIA STREET, E.C.

MACHINERY.—Mr. ARTHUR WADHAM, proprietor of *The Machinery Market and Exporter* (illustrated)—the greatest machinery business journal published—(subscription 12s. 6d. per annum post free); London Agent of Messrs. Simpson, Strickland & Co., steam-launch builders, is also a large exporter of Machinery and Engineering Materials. Mr. Wadham is open to act as sole Buying Agent in England for one or two good firms in Japan desiring to deal with a reliable house. Mr. Wadham's intimate knowledge of the English Machinery and Engineering Trades enables him to save large sums to foreign customers placing their orders in his hands. Firms dealing with Mr. Wadham may rely upon being served in a prompt and straightforward manner. Address:—Mr. Arthur Wadham, Engineering Offices:—181, Queen Victoria St., London. Registered address for telegrams—"Wadham, London." June 28, 1890.

THE GREATEST WONDER OF MODERN TIMES. HOLLOWAY'S PILLS.

PERSONS suffering from weak or debilitated constitutions will discover that by the use of this wonderful medicine there is "Health for all." The blood is the fountain of life, and its purity can be maintained by the use of these Pills.

SIR SAMUEL BAKER, in his work entitled "The Nile Tributaries in Abyssinia," says—"I ordered the druggist Mahomet to inform the Fakir that I was a Doctor, and I had the best medicines at the service of the sick, with advice gratis. In a short time I had many applicants, to whom I served out a quantity of Holloway's Pills. These are most useful to an explorer, as, possessing unmistakable purgative properties, they create an undeniable effect upon the patient, which satisfies them of their value."

SIMPLE, SAFE, AND CERTAIN! HOLLOWAY'S OINTMENT

Is a certain remedy for bad legs, bad breasts, and ulcerations of all kinds. It acts miraculously in healing ulcerations, curing skin diseases, and in arresting and subduing all inflammations. Mr. J. T. COOPER, in his account of his extraordinary travels in China, published in 1871, says—"I had with me a quantity of Holloway's Ointment. I gave some to the people, and nothing could exceed their gratitude; and, in consequence, milk, fowls butter, and horse feed poured in upon us, until at last a tea-spoonful of Ointment was worth a fowl and any quantity of peas, and the demand became so great that I was obliged to lock up the small remaining 'stock.'"

Sold by all Chemists and Medicine Vendors the throughout World. May 1st, 1889.

KEATING'S INSECT POWDER.

BUGS, FLIES, MOTHS, BEETLES, and all other Insects, are destroyed by KEATING'S INSECT POWDER, which is quite harmless to Domestic Animals. In exterminating Beetles the success of this Powder is extraordinary. And no one need be troubled by those pests. It is perfectly clean in application. Ask for and take no other than "KEATING'S POWDER," as imitations are numerous, and fall in giving satisfaction. Sold by all Chemists, in Tins and Bottles. May 3, 1890.

NOW READY,

WITH COLOURED PLAN,
A FULL REPORT on the ERUPTION of BANDAI-SAN, being a reprint from the "JAPAN MAIL" of copious translations from Tokyo Journals, a Description by "Our Reporter," and an "Editorial," written after a visit to the locality. Price 50 Cents.

To be obtained at the *Japan Mail Office*, or of KELLY & WALSH, Limited.

YARROW'S SMALL STEAMERS AND STEAM LAUNCHES.

SCREW STEAMERS WITH SPEEDS RANGING UP TO 30 MILES AN HOUR.

PADDLE STEAMERS WITH DRAFT RANGING DOWN TO 6 INCHES OF WATER.

Stern Wheel Steamers with very shallow draft especially suitable for river navigation.

MACHINERY CONSTRUCTED FOR BOATS BUILT ABROAD.

YARROW & CO., POPLAR, LONDON, E.

Builders of the Stern Wheel Steamers used by the British Government for the Nile Expedition.

YOKOHAMA: SATURDAY, AUGUST 9, 1890.

SUMMARY OF NEWS.

H.I.H. PRINCE ARISUGAWA TAKEHITO started from Shinagawa on the 4th instant for Ogino-hama.

It is stated that the Law for carrying out the Commercial Code will be promulgated in a few days.

THE number of foreign residents in Tokyo on the 30th June last was 783, consisting of 496 males and 287 females.

It is stated that Mr. Kuki, Director of the Imperial Library, will be appointed Japanese Minister to the United States shortly.

On the 25th ultimo a violent whirlwind visited Hasuikemura, Kansaki, Saga Prefecture, destroying seven houses and one godown.

On the afternoon of the 30th ult. six houses were entirely destroyed by lightning at Tomamura, Shishikui, Hyogo Prefecture, but no lives were lost.

LIEUT. COLONEL HARAGUCHI, Assistant Director of the Military College, has been ordered by the Minister of State for War to proceed to Germany.

DURING the month of July last the number of visitors to the Zoological Garden was 21,788, of whom 19,582 were adults, 1,925 children and 281 students.

AT the ordinary half-yearly meeting of the Hamamatsu 138th National Bank, held the other day, a dividend was declared at the rate of 10 per cent. per annum.

THE ordinary half-yearly meeting of shareholders of the Kochi 7th National Bank was held the other day. The receipts for the first half of the present year were yen 29,700.250, of which yen 8,353.290 was set apart as miscellaneous expenses, yen 392 as business tax,

yen 1,400 as a reserve, yen 11,000 as a special reserve, and the remainder was carried forward to the next account, no dividend being declared.

It is stated that Mr. Mutsu, Minister of State for Agriculture and Commerce, and Mr. Yoshikawa, Minister of State for Education, will be ennobled shortly.

THE number of persons attacked by cholera throughout the Empire from the commencement of the epidemic up to the 1st instant was 1,839, of whom 857 died.

H.I.H. PRINCE BHANURANGSI, who was accompanied by H.I.H. Prince Komatsu and several military officers to Shimbashi Station, left Tokyo on the 4th instant for Nagoya.

THE receipts of the Tokyo Tramway Company during the month of July last were yen 18,080.53, showing an increase of yen 9,113.89 as compared with the same month of last year.

In an extra of the *Official Gazette* on the 4th instant Supplementary Rules of the Law of Finance were promulgated by way of commentary on the 67th article of the Constitution, over the signatures of all the Ministers of State.

DURING the month of May last 5,365 steamers entered at Osaka and 5,320 steamers sailed from the port. During the same period the number of foreign built vessels which entered and cleared from the port was 838 and 861 respectively.

MR. NAKAMURA DOTA and six other merchants of Tokyo have been permitted by the Tokyo City Government to establish a company under the name of the Susaki Electric Light Company, with a capital of yen 150,000, the temporary office being situated at Hiraishinden, Fukagawa.

A SHOCK of earthquake was felt in the capital on the 2nd instant at 11h. 6m. 35s. p.m. The duration was 68 seconds, the maximum horizontal motion being 0.25m. in 1.2s. The shock was a sharp one. A slight shock was experienced in Tokyo on the 4th instant at 9h. 38m. 14s. a.m.

COMMANDER URI, Lieutenants Miwa, Hitaka, Amagasa, and other officers of the *Naniwa Kan*, which recently returned to Japan from Korea and Vladivostok, were received in audience by the Emperor on the morning of the 5th instant, and afterwards paid visits to the Imperial Sanctuary.

THE amended Regulations as to the organization of Prisons and Temporary Prisons were promulgated on the 2nd inst. over the signatures of Counts Yamagata and Saigo. On the same day the revised Regulations as to the organization of the Central Sanitary Association were promulgated.

THE half-yearly meeting of shareholders of the Yawata 47th National Bank was held the other day. The receipts during the past half-year were yen 8,330.802, of which yen 266 were set apart towards the payment of business tax, yen 1,050 as a reserve fund, yen 1,550 as miscellaneous expenses, yen 130 as rewards to officers, and yen 5,130 was appropriated as a dividend at the rate of yen 5.40 per cent. per annum, the remainder being carried forward to the next account.

THE ordinary half-yearly meeting of shareholders of the Hokkaido Coal Mining Railway Company was held on the 5th instant at the Koseikan. The receipts for the past half-year were yen 130,674.687, of which yen 19,601 was set apart towards a reserve fund and rewards to officers, and yen 11,273.687 was car-

ried forward to the next account, the remaining yen 99,800 being appropriated as a dividend at the rate of 10 per cent. per annum.

ACCORDING to a report by the Okinawa Prefectural Government the number of persons bitten by poisonous snakes in Okinawa Prefecture during the first half of the present year was 46, of whom 18 died.

THE ordinary half-yearly meeting of shareholders of the Tokyo Marine Insurance Company was held recently. The net profits for the first half of the present year were yen 73,323.961, of which yen 6,007.235 was set apart as rewards to officers, yen 27,332.795 as a reserve, yen 2,723.280 as a special reserve, and yen 33,000 as a dividend to be declared at the rate of 11 per cent. per annum, the remainder being carried to the next account.

THE half-yearly meeting of shareholders of the Iwakuni 103rd National Bank was held recently. The net profits for the past half-year were yen 8,417.973, of which yen 140 was set apart towards the payment of business tax, yen 500 as a reserve fund, yen 3,550 as miscellaneous expenses, yen 393 as rewards to officers, and yen 3,600 was appropriated as a dividend at the rate of 9 per cent. per annum, the remainder being carried forward to the next account.

THE ordinary half-yearly meeting of shareholders of the 87th National Bank (Kokura) was held the other day. The net profits for the past half-year were yen 31,849.051, of which yen 14,404.233 was set apart towards miscellaneous expenses, yen 140 for the payment of business tax, yen 1,300 as a reserve fund, yen 996 as rewards to officers, and yen 12,500 was appropriated as a dividend at the rate of yen 5 per cent. per annum, the remainder being carried forward to the next account.

THE ordinary half-yearly meeting of shareholders of the Kyoto 111th National Bank was held the other day. The net profits for the first half of the present year were yen 24,729.072, of which yen 420 was set apart towards payment of business tax, yen 1,500 as a reserve fund, yen 7,000 as miscellaneous expenses, yen 420 as remuneration to officers, yen 200 as a special reserve fund, and yen 15,000 was appropriated as a dividend at the rate of yen 5 per share of yen 100 per annum, the remainder being carried forward to the next account.

VERY little change is noticeable in the Import trade, Yarns, Shirtings, and Piece-goods being reported dull and slow of sale. There are large stocks of Metals and few sales, Iron Bars having moved off to a small extent, but at lower prices. Of Kerosene there are over 600,000 cases in stock, and the only sales reported are a few small parcels of Devoo, but the figure has not transpired, and rates may still be called nominal. But little Formosa Sugar has yet to arrive, and the stock in hand is held for more money, the 13,000 piculs sold during the week having fetched considerably higher prices; Whites are about the same as last week. The Silk trade is of only moderate dimensions, holders failing to make due allowance for the condition of exchange, but they appear with few exceptions to be strong enough to hold out for the rates asked, hence the paucity of transactions. Nothing new in Tea; sales and prices about the same as for the last few weeks, though fully five and a half million pounds more have been shipped this season than last year at same date. Exchange has fluctuated slightly, but the latest movement is again upward and rates close firm.

EDITORIAL NOTES.

COUNT ITO.

THE *Koku-hon* of July 25th again addresses an open letter to Count Ito. The gist of the letter is as follows:—In our last issue, we endeavoured to tell Your Excellency how impatient the public is to see you once more assume the supreme direction of affairs. We hope that you will not take an unfavourable view of our humble recommendations. We should not have been so bold as to offer advice to a statesman of your position, had there not been some questions of vital importance which make the present political situation extremely complicated. In the first place, there is the question of Treaty Revision. Statesmen like Counts Inouye and Okuma having successively failed to bring the negotiations to a successful issue, it is very doubtful whether the present Minister of Foreign Affairs, who has the unfortunate record of having had a share in the failures of his two predecessors, will be any more happy than they. Further, the opening of the Diet is drawing nigh. The coming session will witness animated debates on many exciting questions, such, for instance, as the reduction of public expenditures, the interpretation of the Constitution, the decrease of the land tax, and so forth. Will the present Government be able to remain in harmony with the Diet, when these questions come before the latter? Yet another thing demanding skilful management is the temper of the noble members of the Diet. At the time of their elections, they invited contemptuous criticisms on the part of the public by unbecoming intrigues and unworthy devices to which they resorted for the purpose of getting themselves elected. As a consequence, you know that only yourself and Counts Matsukata and Katsu have been elected, out of the whole number of Counts of recent creation. It is thus evident that a House which is to be constituted of such Members requires extremely dexterous management on the part of the Cabinet. Will the present Ministers be capable of accomplishing this? The consideration of these circumstances has induced us to approach your Excellency at the present juncture. We know that men of Satsuma extraction may regard you as wanting in dogged intrepidity, while those of Choshu origin may blame you as being somewhat indifferent to the interests of your birthplace. On the other hand, the men of Tosa may consider you as a despot, while you may be disliked by the devotees of the *Shinto* cult as a champion of freedom. Each of these coteries only look at your Excellency through the spectacles of prejudice; their occasional complaints can by no means detract from the great services you have rendered to the State. Among all the statesmen of the present day, there is not one who wields a strong influence over so large a number of talented men as your Excellency does. Among financiers, the section led by Count Matsukata is understood to place their confidence in you; while that under the immediate influence of Count Inouye is also desirous of obtaining your help. Among diplomatists you have the support of such men as Viscounts Kawase, Enomoto, Tanaka and Yoshida, and Messrs. Mutsu, Kuki, Watanabe, and Hanabusa. Your Excellency also enjoys the confidence of a number of men known for their devotion to the Imperial House, such, for instance, as Counts Katsu, Soeshima, and Yoshii, Viscount Kaieda, Baron Takasaki, and Messrs. Motoda, Hayashi, Saisho, and Maruyama. Among men credited with legislative ability, you exercise influence over Counts Yamada and Yanagiwara, Senators Murata, Ozaki, and Hosokawa, Messrs. Mitsuaki, Nakashima, Inouye (Ki), Kôno, Kaneko, Ito, Suematsu, and a number of talented persons out of office. You are also on good terms with such military and Naval officers as Generals Saigô, Yamakawa, Takashima, Oyama, and Kawakami, and Admiral Kabayama, and their followers. Moreover, educationalists like Messrs. Nakamura, Kato, Fukuzawa, Hamano, Tsuji, and others also place their confidence in you. Among men of business, you have the support of Messrs. Narabara, Tamura, Morioka,

Hamaoka, Tanaka, Mayeda, Hirokawa, and so forth. Besides these already mentioned, you enjoy the confidence of most of the members of the nobility and of a majority of the men noted for their erudition. Above all, we congratulate you on the happiness of enjoying the confidence of your Imperial Master. We ourselves are also convinced of the disinterested zeal and loyalty with which your Excellency has hitherto responded to the calls of your countrymen."

REPORT OF MR. NAKAHAMA ON THE CHOLERA.

MR. NAKAHAMA, an official expert attached to the Home Department, who was ordered to proceed to Nagasaki at the end of June, returned to the capital on the 16th ultimo. The following is the substance of the report he has made to the Home Office:—"The examination of the matter discharged from the patients has confirmed the presence of the comma bacillus, thus proving the present epidemic to be Asiatic cholera of pure type. Moreover, the case of Idsumito Kiku, the first patient, has been traced to a foreign vessel, in which her husband was employed as a labourer on the day previous to her sickness, while the third patient, Harada Odokichi, was one of the working hands employed by a German vessel, which had come into the port from Hongkong with foreign rice. In regard to the cause of the present epidemic, various surmises have been formed; some persons attributing it to the unwholesome food which the poorer class have been compelled to use owing to the exorbitant price of rice, while others think that germs of endemic cholera were called into activity in consequence of the excavation made for constructing the Nagasaki Water-works. There is, however, no evidence warranting the reference of the disease to these sources. The real cause is evidently communication held with foreign vessels. Shanghai and other places are yearly visited by cholera, various forms of fever have been prevailing this year, and although the existence of cholera among the crews of the vessels referred to above is not proved, little doubt can be entertained that contagion took place through the medium of the cargoes, &c., of those vessels. Thus in Tsunoguchi, nearly every case can be clearly traced to the *Foritomo-maru*, a vessel plying between that place and Shanghai (without going to Nagasaki). Among the victims at that place, Taguchi Fusa and her sister had lovers whom they frequently met among the crew of the vessel, and Mori Matsuburo was a labourer engaged in carrying coal to the same vessel, while Yamazaki Sei was the concubine of the captain. In short, out of the ten cases that appeared there, six have been directly traced to the above-named vessel." We commend these facts to the notice of the very wise journalists who recently informed the public that defective sanitation was the sole cause of cholera in Nagasaki, and that a little good management would soon eradicate the plague.

VISITORS TO THE EXHIBITION.

IN one sense the Industrial Exhibition which was closed on Thursday proved a success: the number of persons who visited it was greater than the number at either of the preceding Exhibitions. The figures are as follow:—

First Exhibition, total number of visitors ...	451,168
Second Exhibition, total number of visitors ...	822,305
Third Exhibition, total number of visitors ...	1,023,691
The last total is made up thus:—	
Complimentary ticket-holders	7,667
Special ticket-holders	42,609
Ordinary visitors	946,802
Students	26,709

An increase of two hundred thousand visitors in 1890, as compared with 1881, though to a certain extent satisfactory, falls considerably below what might have been expected. The facilities for travel are so much greater now than they were nine years ago, that if the exhibition had attracted even two million visitors, no one need have been surprised. Thus, though the vernacular press alludes with satisfaction to the above figures, we must confess that to us they are a disappointment. Indeed, in many respects,

the Exhibition has created a bad impression many foreign observers. It has shown, indeed, that all the old artistic skill of Japan survives and many are turned to excellent account, but it has shown also a lack of business organization which argues ill for the development of the country's resources.

TREATY REVISION AND ENGLISHMEN.

WRITING on the question of treaty revision, which has once more begun to attract public attention, the *Kokumin-no-Tomo* of the 23rd instant addresses to Englishmen a few words of warning. Hitherto, it observes, the United States of America has been the first gate through which every proposal for the revision of the treaties had to pass. But now the plan has been changed, and it is to England that the first appeal is made. Once through this gate, the success of the battle will be secured, but "to carry the gate is a task of immense difficulty." Why is England so tardy to admit Japanese claims? "Simply because," says our contemporary, "England does not know the true worth of our country, or, in other words, because she does not recognize the progress which Japan has made in the past twenty years along the path of Occidental civilization. Are Englishmen blind? Are they deaf? They know the value of Australian hides and Indian jewels, but they do not seem to have eyes to see, or ears to hear of, a country as big as their own, shining by its own light on the horizon of the East. 'To die for the sake of one's true friend' (*onore wo shiru mono no tame ni shisu*), is a principle guiding the conduct of Orientals. You Englishmen ought then to consider what our feelings would be to those who are unfriendly to us. The Japanese may be a prejudiced people, but then they are preëminently patriotic. Thirty years ago, we bore enmity towards foreigners; we considered them little better than beasts, and some of us did not hesitate to kill them wherever we found them. The custom of regarding foreigners as barbarians has long since disappeared, but the instinct of patriotism and the courage to avenge an insult and to resent any ignominy cast upon the honour of the country, cannot be removed from the heart of the nation in the short interval of thirty years. Whether Englishmen preserve their prestige and influence in this country or not, depends entirely upon whether or not they revise their treaty with us on the basis of equality. The continuance of England's commercial ascendancy in Japan cannot but be seriously affected by the course which she may decide to take in respect of this question. It is not a question which England can afford to treat with indifference."

THE "KIUSHU DOSHIKAI."

AMONG the parties pretty largely represented at the recent elections there was one calling itself the *Kiushu Doshikai*, or the fellow-thinkers of Kiushu. It is not easy for foreigners to form a clear idea of the aims and creeds of the many sections into which, through lack of any really inspiring purpose, Japanese politicians are divided, and when a political coterie calls itself by no more distinctive title than that of "fellow-thinkers," the perplexity of outsiders becomes still more marked. With regard to the *Doshikai*, however, we read in the vernacular press that the leading members met, on the 22nd instant, in Fukuoka, and that, under the presidency of Mr. Okada Koroku, they passed various resolutions, constituting themselves a party, and subscribing to the following platform:—(1) That in accordance with the fundamental principles of Constitutional Government, the line of demarcation between the Legislative and the Executive be distinctly drawn; (2) that the Imperial prerogatives be constitutionally determined and the responsibility of Ministers of State towards the Legislature be clearly defined; (3) that the supervisory power (*Kintoku-ken*) of the Legislature over the Executive be satisfactorily determined; (4) that the power of pronouncing upon official measures and of impeachment be vested in the Legislature, as well as the power of judging all questions of national importance; (5) that the national expenditure

be economised and a proper fiscal system organized; (6) that the national income be duly calculated, the system of taxation reformed, and the national resources fostered; (7) that the fiscal system of local Governments be reformed and steps taken to develop local autonomy; (8) that official interference be excluded from the field of commerce and industry, and the system of official protection abandoned; (9) that the Newspaper, Publication and Meetings Regulations be reformed; (10) that the power of the courts and the police be curtailed, and the rights of the subject increased; (11) that the franchise be extended and the manner of determining electoral districts amended.

The meeting also discussed and adopted another schedule of propositions some even more general than the above and some relating to organization. They are as follow:—(1) The Party shall be organized on principles of progress; (2) the party shall devote itself to political reform and to increasing the rights of the people, on the basis of parliamentary government; (3) the members of the party shall not be at liberty to form other political associations at will; (4) the party shall have a place of business; (5) the party shall have a standing committee of 42 members, who shall meet for general purposes in the 3rd month of each year, but special meetings may be held at the request of 18 committee-men or upwards; (6) should it be deemed necessary by the committee in session, a general meeting of the whole party or a meeting of representatives may be summoned; (7) six members shall be chosen from each prefectural organization to constitute the standing committee, and the choice shall be made in a manner suited to local conditions; (8) these rules must not be altered except by a decision of the standing committee. The place of business mentioned in the fourth article has been fixed in Fukuoka, and the Radical Club hitherto established in that city is to be moved elsewhere.

HYPNOTISM.

RECENTLY the *British Medical Journal* published an account of certain experiments into the phenomena attending hypnotism conducted at Leeds in the presence of a large concourse of physicians and surgeons—attention was confined to the use of hypnotism as an anæsthetic during the performance of dental and surgical operations. The absolute insensibility to pain which characterised the operations seems less astonishing than the circumstance that one of the patients is reported to have been hypnotised by a written order. "I send you," wrote Dr. Milne Bramwell, of Goole to the operating dentist, "a patient with enclosed order. When you give it her she will fall asleep at once and obey your commands." The order, which operated with perfect success, was given in the following terms:—"Go to sleep by order of Dr. Bramwell and obey Mr. Terner's commands." An example given by Dr. Charcot of Paris, in a paper which appeared in the *Forum* early this year, indicates the wonderful force of suggestion. He persuaded a hypnotised patient that a sheet of blank paper was his photograph. He next placed the pseudo-photograph among a score of other blank sheets exactly alike, and gave her the pack, telling her to find whether it contained anything she had seen before. As soon as she came to the imaginary photograph she instantly recognised it, and never failed to do so as often as the experiment was repeated. But something more marvellous is to come. The operator had but to express a wish to the patient before awakening her, and "for hours, nay for days, sometimes for weeks," the hallucination survived after the mind had resumed its normal life and function, and she still identified the blank sheet as a portrait. Similarly a criminal "suggestion" may be impressed on the mind of the patient. At the Salpêtrière a paper knife has often been placed in the hands of a hypnotic subject with an order to murder one of the persons present, and on awaking the patient has deliberately and often cunningly attempted to

execute the command. According to MM. Binet and Féré, the colleagues of Dr. Charcot, "the danger of these criminal suggestions is increased by the fact that at the will of the experimenter the act may be accomplished several hours, and even several days after the date of suggestion." Those who act under the influence of suggestion display more daring and courage, and even more intelligence, than when they act from their own impulse. Loss of memory is one chief characteristics of the facts of suggestion, so that the hypnotic subject does not while awake know from whom, when, or how the suggestion was received; and even when hypnotised anew, he will be unable to reveal anything if in the first trance he has received a special suggestion of complete oblivion. Finally, the time required for putting in train a scheme of crime in almost inconceivably brief. "We have observed," write these authorities, "that in the course of fifteen seconds we could throw a subject into a lethargy, and then into somnambulism, suggest an act, and then awake him." To these facilities for the criminal use of hypnotic suggestion it may, apparently, now be added that by means of a fabricated order or telegram an irresponsible third person may assume control of a hypnotic subject. But notwithstanding all these apparent facilities for the perpetration of crime and the security of the criminal, hypnotic suggestion is, according to Dr. Charcot, by no means so simple, safe, and certain a weapon as it at first appears. Even hysterical men, are seldom and only with difficulty hypnotisable. Fit subjects are comparatively few, and they frequently require training—a task which is not easy and which needs time. Moral resistance has next to be taken into account. Some subjects positively refuse to obey even in hypnotic sleep commands which they would resist if awake. Supposing, however, the suggestion—one of murder, for instance—has been accepted. The assassin, overmastered by the suggestion, lies in ambush for his victim. "But if the victim does not pass. What then? Will he put off the crime till the next day? By no means. The victim must be there at the appointed hour, else, as I know very well from repeated experiments, a fit of hysteria will in most cases be the ending of the matter. Or perhaps the subject will have an attack of acute delirium or of babbling mania, very unfortunate for the magnetiser; and this cannot be checked save by counter suggestions that it is always very difficult to make the subject accept." What Dr. Charcot calls "laboratory crimes" are, on the whole, simple operations in which the elements of chance, accident, and circumstances are eliminated; but he greatly doubts the possibility of a scheme of crime being successfully executed in real life by means of hypnotic suggestion. At any rate, no single crime actually committed by these means has, he contends, ever been discovered. Whatever hypnotism may in the future contribute, under any of its aspects, to our knowledge or advantage, there can be no doubt that its use by the ignorant and irresponsible is as dangerous and often as disastrous as its phenomena are attractive. Dr. Charcot asserts that the course of the mesmeric showman may be traced from city to city by the nervous maladies and mental diseases which he leaves behind him; and there is little doubt that the results of private experiment, prompted by mere curiosity or performed simply for amusement, are of the same mischievous character.

THE "TEN-SOKU."

THE *Ten-soku*, which has hitherto been edited entirely by Mr. Kato Hiroyuki, has been transferred to the joint editorship of the members of the Tetsugaku Kenkyu Kwai (Association for Philosophical Investigations), of which Mr. Kato is President. The change became advisable in consequence of his appointment to the position of President of the Imperial University. In the first number under the new management, Mr. Kato writes about Natural Laws and explains the mode of their operation in the human as well as the physical world. Mr. Inouye Enryō,

a Buddhist philosopher, defines the term *tetsugaku* (philosophy) about which some erroneous notions are popularly entertained. The next article is on Industrial Depression, by Mr. Hamada Kenjiro. He alludes to the periodical occurrence of trade depression in Japan, and explains at some length the theory advanced by Mill, Jevons, and other economists of the English school. Lastly, Mr. Suzuki Kentaro contributes an essay on Man, which is a mere collection of questions relating to the origin and destiny of the human race. A few reviews of current publications, two or three poems, and some comments on current events, complete the table of contents. Judging from this number, we cannot say that the magazine has acquired greater interest or developed additional merit under its new management, but we may fairly hope that in future times, the members of the Tetsugaku Kenkyu Kwai will show themselves more competent to maintain the high standard which the *Ten-soku* always preserved under the sole editorship of Mr. Kato.

SHIMA SPRINGS.

As the hot weather comes, spa-going has become the order of the day. Those who are ruraly inclined, may take interest in the following letter from a correspondent of the *Yiji Shimo* at Shima thermal springs in Joshiu, dated the 23rd ult.:—"At present, visitors number about two hundred, most of them country people. The temperature is comfortable; all that could be desired, in fact, for ease and for the purpose of idling. In the hottest part of the day the mercury stands at a point ranging between eighty-five and seventy degrees Fah. The Tokyo mail gets here in a day. Tokyo visitors desiring to come here should take the first train bound for Kodsuke, and alight at Takasaki, whence the trip to this place can be accomplished before sunset.

A "SOSHI" AND THE CHIEF OF THE POLICE.

A GENTLEMAN, by name Sugeno Michichika, who is apparently a leader of the Osaka *Soshi*, though we confess with humiliation that his name only now becomes known to us, has interviewed Viscount Tanaka, Chief of the Metropolitan Police, with results which the *Hochi Shimbun* describes as calculated to produce a wholesome and satisfying effect on the mind of the representative of physical force. Received very courteously, Mr. Sugeno opened the conversation by enquiring whether the harsh measures of repression adopted by the police towards the *Soshi* were planned by the Cabinet or whether Viscount Tanaka alone was responsible. "In the latter event," the visitor proceeded to remark, "I have to remind you that even though we *Soshi* be thrown into prison, others will know how to proceed." To this curious query and its accompanying intimation, Viscount Tanaka replied that the Chief of Police acts on the authority of his office, and that he does not consult the Cabinet except in cases of exceptional gravity. Up to the present all his action had been taken without any reference to the Cabinet. He denied, however, that any harsh measures had been adopted. The only object kept in view had been to prevent disturbance. Let the *Soshi* be ever so clever, they could not have thoroughly thought out every problem. "I too, in my youth," the Viscount added, "yielding to the impetuosity that accompanies juvenility, often resorted to perilous proceedings, and when, from the standpoint of my present experience, I look back upon those times, I see how much I erred. No one, therefore, is less likely to resort to severe measures of repression, towards those who only repeat the mistakes he once made himself. Mr. Sugeno then went on to enquire what course the Government intended to pursue when the Diet assembled, but upon that topic Viscount Tanaka would give no information except that, while desiring and hoping to follow a lenient course, the Government would know how to proceed should emergencies arise. To this Mr. Sugeno replied that as the *Soshi* were inspired by purely patriotic motives, there was no fear of

their disturbing the peace, and he therefore hoped that the power of their police would not be lightly employed against them. But Viscount Tanaka answered that the power of the police had not been lightly employed in the past, and that he, on his side, hoped to see the *Soshi* conduct themselves with such honest consideration for the national welfare as to obviate all occasion for the exercise of that power. Mr. Sugeno is said to have retired content, a fact which indicates that his nature is not exacting. It is certain that since Viscount Tanaka's assumption of office as Chief of Police, the public has heard very little of the doings of *Soshi*.

THE IMPERIAL NOMINEES IN THE HOUSE OF LORDS.

WITH regard to the members of the House of Peers who remain to be nominated by His Majesty the Emperor for meritorious services to the State or for erudition, the *Mainichi Shimbun* says that things have not fallen out quite as the public had expected. The general idea was that as the Emperor might be expected to confer the honour of nomination upon the titled members of the Senate, the Peers, in electing representatives from their several Orders, would avoid voting for Senators. It was found, however, that no such precaution commended itself to the Peers, for, with a very few exceptions, they cast their ballots for the titled members of the Senate. Many conjectures are consequently afloat as to the persons upon whom the Imperial choice will fall. The *Mainichi* avers that Mr. Fukuzawa and Mr. Iwasaki Yanosuke are generally talked of, and it is certain that foreign opinion would strongly endorse such a selection. We have often spoken of Mr. Fukuzawa, and expressed the hope that his eloquence and erudition might find a fitting field for their display in the Diet, while with regard to Mr. Iwasaki Yanosuke, considered in respect of the immense services he has rendered the country by developing her resources, and the benefit he has conferred on the reputation of her business-men for enterprise and integrity, his nomination to the House of Peers would be universally applauded. But we are persuaded that, however high the honour of being thus selected by the Sovereign, neither Mr. Iwasaki nor Mr. Fukuzawa covets it. The latter is resolutely wedded to his often expressed wish of standing aloof from politics, for the present at all events, and the former is one of those rare men who, with all the means and temptations to live a life of ease, are nevertheless unable to separate themselves from business. Doubtless this is one of the secrets of Mr. Iwasaki's success, and being a person who never puts his hand to anything unless he can be sure of giving it a measure of earnest energy, he would probably regard nomination to the Upper House with no sort of satisfaction.

DISSOLUTION OF THE "DAIDO DANKETSU" AND "JIYU-TO" PARTIES.

LAST Wednesday was the day on which the *Daido Danketsu* and the *Jiyu-to* were to take final action in regard to the question of dissolving their respective party organizations as a preliminary step toward the much talked-of triple alliance. Since the consummation of this alliance scheme depended directly upon the issue of Wednesday's deliberations, it was watched with keen interest. From the report of the *Kokumin Shimbun*, we learn that the *Daido Danketsu* party opened an official meeting, in which the resolution to dissolve was adapted by a large majority. A few, however, including Messrs. Suehiro, the present editor of the *Daido Shimpō*, Inouye Kakugoro, and Oye Taku, objected to this course. Some of them even went so far as to express their willingness to ally with the *Aikoku-to* and the *Jiyu-to*. But the provincial members of the *Daido Club* supported almost in a body the resolution to dissolve, and, after much discussion, succeeded in carrying their point. Commenting on this, the editor of the *Kokumin* observes that, the *Daido Danketsu* having now taken this final move, the triple alliance is a foregone con-

clusion, and the time is not far off when we shall see the grand alliance of all progressive parties successfully accomplished. As to the movements of the *Jiyu-to*, the *Yomiuri Shimbun* reports that Messrs. Oi, Naido, Kiyama, Arai, and others convened a meeting in the Fujimiro, and formally resolved to dissolve the *Jiyu-to*. Some of the members expressed a desire to establish a social club, but this proposition was rejected on the ground that it might wound the feelings of others.

FATAL ACCIDENT ON THE "OMAHA."

AN accident resulting in the death of two of the crew of the U.S.S. *Omaha* occurred on board that vessel on Wednesday afternoon, while at rapid firing practice off Ōwari Bay. The occurrence took place while the crew of one of the starboard guns, a Dahlgren 9-in. muzzle loader, were ramming home a projectile, and it is supposed that a spark had remained in the chamber from the previous charge. Both sponger and loader were killed by the discharge, the former, J. E. Kirke, being blown clean from the ship, while the latter, Carl Emanuelson, a Swede, was frightfully injured, the top of his skull being destroyed, his left arm torn off, and his chest crushed. Kirke, who was a native of Baltimore, was 31 years of age, and Emanuelson was 27 years of age. Both men were much liked by their officers and comrades, and the sad occurrence is most deeply felt by the whole ship's company. The Admiral, we are informed, has returned to the port to hold an inquiry into the accident.

THE CONTRACT FOR THE HOUSES OF PARLIAMENT.

WHILE Count Inouye occupied the office of President of the Temporary Construction Board, a proposal to build the Houses of Parliament on the Hibiya Parade Ground, at a cost, to be defrayed in ten years, of yen 8,160,000, found considerable favour with the authorities. The German style of architecture was believed to be most suitable, and in order that nothing should be wanting to secure success the work was entrusted to the German firm of Messrs. Indo and Beckman, who came to Japan in 1886, and after making surveys entered into a contract with the Japanese Government. One of the conditions of this contract was that yen 30,000 should be paid annually for five years as the cost of drawing plans, &c., and that Mr. James and other four persons should be employed to conduct surveys, on allowances of four or five hundred yen each per annum during the same period. On Viscount Yamao assuming charge of the Temporary Construction Board exception was taken to this arrangement on the score of its very great expense, which it was felt ought not to be incurred in view of the empire's financial position. The five persons mentioned were dismissed, receiving their salaries in full for the five years, and the firm of architects were notified of the determination of the contract. They are understood now, however, to decline abrogation of the contract, and the Authorities, according to the *Hochi Shimbun*—from which we take the above story—are a good deal embarrassed as to the course which they ought to pursue.

GENERAL GRANT'S ENTERTAINMENT.

OF course there is not a grain of truth in the statement gravely made by a correspondent of one of our local contemporaries that "the poor of Tokyo were so ground down by a special tax to pay for the entertainment of General Grant that they were driven to the necessity of selling their clothes to pay for it." It is surprising that grown men can be found credulous enough to believe such silly canards, and that newspapers can be reckless enough to publish them. The facts about entertainments to General Grant are that Messrs. Masuda, Shibusawa, Okura, and others, "citizens of Tokyo" as they called themselves, held a meeting at which a committee was appointed, and subscriptions were then and there raised to the amount of from sixty to seventy thousand yen. The contributions were purely voluntary, the subscribers being bankers, business men, and well-to-do folks of the capital.

This sum was subsequently increased largely by further voluntary contributions. The Government had nothing whatever to do with the matter, and the poor did not pay one *sen*, voluntarily, or by way of tax. The idea of entertaining General Grant on his arrival in Tokyo originated with Mr. Masuda, and was prompted by a desire to return the civility shown by the citizens of New York to the first Japanese embassy to America. The fêtes at Ueno, the theatrical performance at Shintomiza, the ball at the Kobu-daigakko, and so forth were all paid for out of these voluntary subscriptions, and no tax of any kind was levied for the purpose. The correspondent signing himself, "British Subject," who makes the above extraordinary statement, and supplements it by the still stranger comment that if "General Grant had known how the money was obtained, he would not have remained in the country an hour after the departure of the first steamer that could take him away," has been the means of disseminating a gross error, and will doubtless regret his mistake sincerely.

GERMANY AND AUSTRIA.

IN an article on Count Andrassy that has just appeared in the June number of *North and South*, a widely read German magazine, the curtain hitherto veiling the inner history of the negotiations that led to the German-Austrian alliance has been partly drawn aside, and we are told that the terms of this famous treaty did not altogether correspond to Prince Bismarck's wishes. The latter, according to the authority quoted, urged Austria to assume the obligation to aid Germany even in case of a war with France alone, a proposal opposed by Count Andrassy on the ground that he could not guarantee its execution should it be accepted; so much, he said, would such an obligation be at variance with the sentiments of Emperor Francis Joseph's subjects. Prince Bismarck, however, who in the first article of the treaty had bound Germany with all her military forces to aid Austria in case of an attack by Russia, insisted that it was the express wish of his Emperor that Austria should render Germany the same service *vis-à-vis* France, and added that the alliance itself probably depended on this one point. Count Andrassy then declared that, in case of hopeless disagreement on that point, he was ready to ask his Emperor to name another negotiator in his stead; as for himself he could not conscientiously put his name to a treaty the chief stipulation of which, according to his firm conviction, was altogether impossible of execution. For days this one point was the one difficulty of the negotiations, and the hope of a satisfactory result gradually vanished. All things have an end, and Bismarck's departure was at hand. The day before, the *Hôtel Impérial* was once more the scene of anxious but useless negotiations lasting till midnight. Andrassy wearied and exhausted, retired to Schönbrunn, with the conviction that nothing had been and, indeed, that nothing could be done. The next day, early in the morning, Bismarck appeared in Andrassy's residence: once more he urged his proposal, once more the old arguments were passed in review. The Austrian premier, though not without fear and misgivings, remained firm. Bismarck, getting more and more excited, finally exclaimed in a loud voice: "In case you are irrevocably opposed to this, well then," here followed a long pause—"I'll put my name to the treaty as it is."

THE OFFICIAL INTERPRETATION OF THE NEW PUBLIC MEETINGS, ETC., LAW.

MESSRS. KONO HIRONAKA, Suehiro Shigeyasu, Oye Taku, Inouye Kakugoro, and other leading members of the *Daido Club*, were summoned on Friday morning last to the police office of the Kyobashi district and were informed that they must take speedy steps to abolish the *Koin Club*, since it is regarded by the Authorities as a combination of political associations in direct conflict with Article 28 of the Law of Meetings and Political Associations. They were told that the Authorities refrained from adopting legal measures against them in consideration of

the fact that the *Koin* Club had been formed previously to the publication of the law, and also because the Government did not wish to exercise severity in political matters. They were therefore given a week's time for careful consideration before being required to declare a definite course in respect of this matter. They were also warned of the illegality of the intention ascribed to them of forming an alliance of all the progressive parties. On the same day, Messrs. Kataoka Kenkichi, Sugita Teiichi, Uyeki Yemori, and two other representatives of the *Aikokuko* Party were summoned to the Atagoshita Police Office, where they were ordered within one week either to dissolve their party organization, or to give to the proper authority the intimation required by the Law of Public Meetings and Political Associations. Simultaneously with the above proceedings, the police served the same summons on prominent members of the *Jiyu-to* and the *Kaishin-to*, and admonished them in regard to the alliance of the progressive parties.

THE FIXED EXPENDITURES.

A SPECIAL issue of the *Official Gazette* of Monday reported the promulgation of a law, in regard to the fixed expenditures referred to in Art. 67 of the Constitution, which has for some time past formed the subject of political discussion both in official and journalistic circles. The following is a translation of the text of the law:—

We, with the advice of our Privy Council, hereby give our sanction to subsidiary Regulations of the Law of Finance, and order the same to be duly promulgated.

(His Imperial Majesty's Sign-manual).
(Great Seal).

Dated August 2nd, 1890.

(Countersigned)

Count YAMAGATA ARITOMO,
Minister President of State.

Count SAIGO TSUKUMICHI,
Minister of State for Home Affairs.

Count YAMADA AKIYOSHI,
Minister of State for Justice.

Count MATSUKATA MASAYOSHI,
Minister of State for Finance.

Count OYAMA IWAO,
Minister of State for War.

Count GOTO SHOJIRO,
Minister of State for Communications.

Viscount AOKI SHUZO,
Minister of State for Foreign Affairs.

Viscount KABAYAMA SUKENORI,
Minister of State for the Navy.

YOSHIKAWA AKIMASA,
Minister of State for Education.

MUTSU MUNEMITSU,
Minister of State for Agriculture and Commerce.

LAW No. 57.

Art. 1.—The following items of expenditure included in the estimate of the annual expenditures for the 23rd year of Meiji, shall be treated in the budget of the 24th year of Meiji, as the Fixed Expenditures provided in Art. 67 of the Constitution:—

- (1.) The salaries of civil and military officers, and allowances granted to civil officers on retiring from office.
- (2.) Expenses for the maintenance of the army, the navy, the gendarmerie, and the Colonial Militia.
- (3.) Expenses for decorations, pensions, and rewards.
- (4.) Expenditures arising from the operation of treaties and agreements concluded with foreign countries.
- (5.) The current expenses, and the ordinary expenses for repairs, of government offices.

Art. 2.—The following items of expenditure based upon laws and ordinances promulgated before the opening of the Imperial Diet, shall be regarded as the "expenditures arising by the effect of laws":—

- (1.) The expenses for the Imperial Diet.
- (2.) The ordinary expenses for Courts of Law, and for the Board of Audit.
- (3.) Allowances granted for good service, and superannuation.
- (4.) Expenses for military conscription.
- (5.) Expenses for the collection of taxes and revenue.

- (6.) Prison expenses.
- (7.) Expenses for matters relating to communications, and for marks and signals for navigation.
- (8.) Expenses for shipwrecked vessels, both native and foreign.
- (9.) The local expenses of Okinawa Prefecture (Riukiu) and Ogasawara-jima (Bonin Islands).
- (10.) Famine Relief Fund (*Biko Chochiku*).
- (11.) Expenses for the purchase of land in Hokkaido sold by the Government.
- (12.) Rewards and relief funds.

Art. 3.—The following items of expenditure shall be treated in the budget for the 24th year of Meiji as the "Expenditures arising from the legal obligations of the Government," according to the provision made in the second paragraph of Art. 67 of the Constitution.

- (1.) Expenses for shrines and temples.
- (2.) Expenses for redeeming public loans, their interest, and expenses connected with paying the same.
- (3.) Subsidies annually granted on public works and police expenses in different places, in compliance with ordinances which have already gone into operation.
- (4.) Various kinds of pension bonds of Okinawa Prefecture.
- (5.) Subsidies and guarantees given to various enterprises of navigation, railroads, manufactures, and industries, as well as to schools and hospitals.
- (6.) The salaries, rewards and grants (*oukin oyubi tei ate*) for foreigners in the Government employment.
- (7.) Legal damages and costs.
- (8.) Moneys to be paid back.
- (9.) Expenses for the management of money in the Treasury.
- (10.) Interest on money in the Government's keeping (*adsuke kin*).
- (11.) Rent of buildings and lots which have already been hired.

Art. 4.—Expenses relating to Government undertakings requiring several years for completion, which have been provided for in the Budget before the 23rd year of Meiji, and which cannot be completed before the 24th year, shall be regarded as continuing expenditures.

It may be assumed that before committing itself by Imperial Rescript to a hard and fast definition of the interpretation of Article Sixty-seven, the Cabinet gave the fullest consideration to this important matter. For some time rumour had assigned to Ministers the intention of supplementing the much disputed article by an ordinance, but public opinion, very freely expressed in the newspapers, was against any such step, and we scarcely expected that it would be taken. But the Government is under the necessity of laying an annual Budget before Parliament, and to compile the Budget involved a practical decision as to the significance of Article Sixty-seven. Apparently it has been deemed expedient to clothe that decision with conclusive authority by the endorsement of an Imperial Rescript. Parliament will now be precluded from raising any question as to the construction of the Budget in respect of Article Sixty-seven. We should have thought, however, that the same end might have been obtained for all practical purposes without recourse to the special issue of a Rescript, for any Budget, compiled by the Minister of Finance with the approval of the Cabinet, and submitted to the Diet in the name of the Government, must have been accepted as embodying the Emperor's interpretation of the Law of Finance. But the Government must be assumed to know its own business best. It doubtless foresaw that nothing short of the issue of this Rescript could prevent inconvenient discussion.

With regard to the interpretation put on the 67th Article, our readers will observe that it tallies almost exactly with that given in Count Ito's Commentary on the Constitution. Count Ito's words are:—"Ordinary expenditures required by the organization of the different branches of the Administration and by that of the Army and Navy, the salaries of all civil and military officers, and expenditures that may be required in consequence of treaties concluded with foreign countries, are to be regarded as expenditures based by the Constitution upon the powers

appertaining to the Emperor." Among "expenditures that have arisen by the effect of law," he includes "the expenses of the Houses of the Diet, annual allowances and other miscellaneous allowances to the members, pensions, annuities, expenses and salaries required by the organization of offices determined by law, and other expenses of a like nature;" while "expenditures that appertain to the legal obligations of the Government" are stated to be "interest on the national debt, redemption of the same, subsidies or guarantees to companies, expenses necessitated by the civil obligations of the Government, compensations of all kinds, and the like." It thus appears, as indeed might have been anticipated, that the drafters of the recent Law have strictly adhered to the intention of the Constitution interpreted by its principal framer.

THE AMENDED MEETINGS REGULATIONS.

Writing of the Amended Meetings Regulations, the *Mainichi Shimbun* while noting various respects in which the new enactment shows improvement on the old law, describes the provision excluding women and minors from participation in political meetings as a point involving considerable severity. Our contemporary finds itself unable to understand why the Government should prohibit women from listening to speeches, and why combination of and communication between parties should not be allowed. The provision, also, requiring 48 hours' notice of a meeting seems to be uncalled for. As a whole, however, the amendments embodied in the new regulations are distinctly on lines of improvement, and while congratulating the public as well as the Authorities on this fact, the *Mainichi* hopes to see the spirit of tolerance more largely introduced in the treatment accorded to the press by official circles.

The *Hochi Shimbun*, while admitting that the tendency of the new measure is undoubtedly less in the direction of severity, looks forward to still greater freedom in the future, for in the present state of the public mind the *Hochi* finds nothing but cause for regret in anything that may tend to give rise to ill feeling or resentment towards the Authorities. Our contemporary desires greater moderation in connection with the articles prohibiting the sending out of letters or delegates in advocacy of a party's principles, and combination or correspondence by parties, regarding these restrictions as not only useless but tending to introduce inconvenience and obstruction in the new era of constitutional government.

The *Daido Shimbun* thinks that the work of legislating for the matters covered by these regulations should fall more properly within the scope of the Imperial Diet. The *Daido* condemns the provision excluding women from political meetings; that which forbids meetings and processions within three miles of the Houses of Parliament while the latter are in session; and that which prohibits combination and communication between parties. The progress of society, the Tokyo journal thinks, necessarily involves the coming forward of women in political matters; the limit within which crowds may not meet and move about should be reduced to ten *cho*; while the third restriction is unnecessarily harassing, and must interfere with the natural growth and development of parties.

JAPAN AND CHICAGO.

The *Fiji Shimpō*, always watching for opportunities to advance the material interests of the nation, calls attention to the importance of making full preparations for the International Exhibition, to be held in Chicago in 1893. The United States is Japan's best customer, being the largest purchaser of Japanese staples. In the countries of the Old World, people have long been educated to admire a certain style of fine arts. Taste and skill are fully developed there on fixed lines. As a natural consequence, men are very slow to appreciate the value and beauty of Japanese fine art. Even if they de-

fect some features that command their admiration, they modify and transform them to suit their own canons of art. Therefore the most that Japan can expect from the display of her objects of art in European exhibitions is the hollow fame of being endowed with artistic taste. No substantial benefit results in the way of obtaining a market. But it is entirely different in the case of the United States. America is a new country keenly engrossed with the business of practical life. A large portion of the inhabitants are only emigrants from the lower orders of European society. These, having no predilection for any special style of fine arts, are apt to become admirers of purely Japanese articles. The display of Japan's fine art articles in the Philadelphia Exhibition resulted in the creation of a large market in the eastern part of the States. But in this eastern regions of America, the population is increasing and labour becomes more abundant year by year, so that it has become possible to supply local wants by local manufactures instead of purchasing from abroad. There is consequently little prospect of maintaining, much less of widening, Japan's market in these sections of the Republic. But in the great West, thousands of broad acres replete with undeveloped resources still wait to absorb the whole energy of the people in the busy pursuits of practical life. There men have no time to spare for the cultivation of fine art and the manufacture of decorative articles. For such things they must depend entirely on foreign supply. Moreover, these people are mostly men of great wealth, possessing an enormous amount of purchasing power and very fond of displaying their riches, as is only too natural in the case of persons who have acquired sudden opulence. What stupendous encouragement would be given to Japan's foreign trade, could she only succeed in making the inhabitants of the Western States appreciate the true merits of her industrial arts! The Chicago Exhibition affords just the needed opportunity for attaining this most desirable end. By its means Japanese artists can display the riches of their taste and genius. It must be borne in mind, however, that articles of true merit cannot be produced in the course of a few months or even years. This, then, is the time to begin preparations in order to utilize so rare an opportunity. As a preliminary and most essential step, our Tokyo contemporary recommends that the executive commissioners of the present Exhibition should exert every effort to impress upon the minds of exhibitors the great importance and advantage of showing their artistic skill to the American public in the coming exhibition of Chicago.

We do not wish to write a word that can be construed in the sense of deterring Japanese art artisans from following the wholesome advice given by the *Jiji Shimpō*. It is vitally necessary that they should put forth all their energies to make a worthy display at the Chicago Exhibition, for they will there have an exceptional opportunity of appealing, not to America alone, but to the whole world. Nevertheless, our respected contemporary's enthusiasm carries it beyond the boundaries of veracity. What is meant by saying that the artistic taste of Europe, fitted to a conservative groove, is incapable of appreciating the beautiful novelty of Japanese style, and that a wide market for this country's objects of art cannot be looked for in the Old World? How singular is this misapprehension, and how painful the ingratitude underlying it. Will the *Jiji Shimpō* pause for a moment and consider gravely who have been the exponents of Japanese Art, and who its introducers to the Occidental world. Anderson, Franks, Gouse, Rein, Audsley and Bowes, Huish, Dresser, Conder, Cutler, the Editors of *Artistic Japan*—are not these the men who have taught the world the alphabet of Japanese art, and is it not through the labours of these men and these men only that her artistic genius has been interpreted and proclaimed? Judged by the standard of published work, there is not so much as one American citizen who can claim to belong to the first rank of Japan's

art apostles. By and by we anticipate that Professor Fenollosa and perhaps Professor Morse will greatly modify this verdict, but our present business is with accomplished facts not with eventualities, and from that point of view it is beyond dispute that Englishmen, Frenchmen, and Germans have been the Western exponents of Japanese art. Turning to the more practical question of a market, we assert, with equal confidence that Paris and London, not New York, are the great centres of demand for Japanese objects of art. The American collector, with the true instinct of a decorative furnisher, seeks above all things for fine Chinese porcelains, and cares comparatively little for the less striking though more exquisitely finished productions of old Japan. It is not so with the Frenchman or Englishman. He is an eager buyer of everything Japanese that is really fine and that dates from an era prior to the Restoration, and it is to France and England that the great bulk of Japan's choicest *chefs-d'œuvre* have found their way. American taste remains to be educated, and if the opportunity of the Chicago Exhibition can be utilized for that purpose, the benefit to Japan will be immense. Thus our contention does not militate in any degree against the recommendation of the *Jiji Shimpō*, though we have thought it right to protest against some of that journal's statements.

ACCIDENT TO THE "DAIMOYO" SCIENTIFIC PARTY. News has come from Misaki, whither the *Daimyo*, as we mentioned the other day, had gone with a scientific party, of a rather serious accident, which has abruptly cut short the programme of Professor West and his guests. It seems that on Tuesday arrangements had been made to conduct a series of experiments with apparatus designed to take submarine photographs. *Daimyo* was moored about two miles off Misaki in the position where the experiments were to be carried and a boat containing the gear had been brought out from the shore, with Professors Burton and Mitsukuri on board. When the boat came alongside *Daimyo*, her sando jumped on board, and in doing so upset the gear which instantly exploded. It should be said that the photographic apparatus was designed to be operated by the agency of an explosive put up in a glass bottle. The effect of the explosion was to seriously injure *Daimyo's* sando about the body while Professor Burton was a good deal hurt about the legs. The gear, which was very valuable, went to the bottom but was afterwards recovered. As showing the power of the explosion it may be stated that the report was heard at Misaki, two miles away.

THE SUSPENSION OF THREE TOKYO PAPERS.

THREE of the metropolitan dailies, the *Choya Shimbun*, the *Miyako Shimbun*, and the *Nippon*, were recently placed under the ban of suspension on the ground of having circulated opinions prejudicial to peace and good order. The offence of the *Nippon* does not, strictly speaking, seem to be political, the obnoxious article being, so far as we can judge, one in which the military authorities are spoken of as being steeped in corruption in pecuniary matters. So far as the *Nippon* is concerned, therefore, the public does not attach much importance to the stringent measure taken against it. But criticism is pretty busy about the propriety of the official measure in respect of the suspension of the other two papers, for in their case there is no doubt that the offence consists in an attempt to discredit the present Government, and the nature of an offence of this kind naturally appears in different lights to men differently situated. Apart from the question whether the Authorities have acted wisely in giving importance to what, without much danger, might perhaps have been left to its own fate, we may observe that the *Choya* lately took much pains to prove that the present Cabinet is in a state of hopeless embarrassment, that it is deserted and attacked by its own servants, and in effect that its authority is gone. Such seems, on the most favourable construction, to be the object of the two

articles in our contemporary's issues of the 21st and 22nd ultimo; for, although the issue officially declared obnoxious is that of the latter date, we cannot separate from the offence a remarkable article in the issue of the preceding day. As to the *Miyako Shimbun*, it assumed a tone somewhat similar to that of the *Choya*. In an article entitled "Difficulties of the Cabinet," it took the trouble to map out three courses of policy, either one of which the Government might pursue in view of the approaching opening of the Diet: first to servilely obey the dictates of the Diet; secondly, to stand aloof from the Diet altogether; and thirdly, to remain in office by contending against the opposition according to parliamentary methods. The first course no manly Government could stoop to adopt. As to the second course, the *Miyako* thought that it would be impracticable, for to pursue such a line of policy the Government would have either to manage the Opposition in the Diet with a skill and authority not apparently possessed by the present Cabinet, or to resort to a military despotism incompatible with the representative system of government inaugurated by the grace of the Emperor. The third and last course, our contemporary declared the Government entirely disqualified to pursue, the present Ministers being most of them more skilled to command troops than to wield the pen or wag the tongue. "The Cabinet being unable to pursue any of these courses," the *Miyako* continued, "is it then doomed to perish? We answer, such is about the fate of the present Government." In conclusion, however, our contemporary condescended to charitably advise "the clan Cabinet" to rally its forces, small as they are, and try the last chances of parliamentary warfare, "for it is more manly to dare death bravely than to timidly await its advent." It is plain that according to the present system of press censorship, such articles as these were most unlikely to escape official censure. If the Government's control of newspapers have any vitality whatever, the *Choya* and the *Miyako* were doomed to suffer. Of course their fate has awakened the usual chorus of foreign critics who hold the press sacred, and have persuaded themselves to think that its complete freedom is a crucial test of civilization. Perhaps they are right, but of one thing we are quite certain, namely, that the conduct of free newspapers does not always redound to the credit of civilization.

THE SUPERINTENDENT OF THE HEALTH BUREAU ON CHOLERA.

THE *Hochi Shimbun* reports and comments upon a speech delivered the other day by the Superintendent of the Sanitary Bureau (Mr. Nagayo Sensai) on the treatment of cholera. Mr. Nagayo said the principle involved in recent amendments of the rules governing the treatment of cholera, was the withdrawal of power and responsibility from the police, and their transference to the medical faculty. The carrying out of methods of disinfection, etc., must now be performed by members of a patient's family under medical orders, while other steps that do not come within the province of a medical man are delegated to neighbours. The functions of the police, then, are mainly of inspection, and when necessary of guidance. Formerly patients had to be conveyed to a disinfecting station (*hihyo-in*) in accordance with the orders of the police, but now only those who cannot be properly treated in their own houses, or who wish to go to hospital, or people residing in hotels need be subjected to removal. By this means it is hoped to banish from the public mind that fear of removal to the hospital which has been found in many cases to lead to concealment of disease. In short the new rules dispense as much as possible with official interference, and encourage the people to act for themselves in cases of emergency. Our contemporary applauds the spirit that has prompted the changes thus described, and urges on the Authorities the advisability of requiring the public to elect—in addition to the official medical staff—several local doctors for each

ward, who may be expected to more successfully inculcate on the residents of their particular locality the nature of their responsibilities, and who will at any rate be generally acquainted with the condition of neighbouring families.

JAPANESE WALL-PAPER.

JAPANESE wall-paper made in imitation of leather first came before the foreign public at the Austrian Exhibition of 1871, but its capabilities were so imperfectly understood at that time that its exhibitor, Mr. Yamada Jirobei, offered it as a substitute for carpeting. It was then made in pieces 36 feet long, and of various widths, but though its superior quality evoked favourable notice it failed to commend itself as a floor covering, being too thin and fragile for such a purpose. From an English gentleman, however, who had observed the adaptability of the fabric as wall-paper, Mr. Yamada received an order, and subsequently a small export business was done in the article. In 1877 Mr. Yamada exhibited 200 rolls in the Paris Exhibition, and in the following year, attention having been directed to the product, employment in the Government Printing Bureau was offered to him which, however, he refused. About this period various competitors entered the field, and bad workmanship soon caused a decrease in the export business. Mr. Yamada in his attempts to maintain the quality of his manufacture being reduced by the high rate of wages and price of materials, to applying to the Department of Agriculture and Commerce for financial aid. This he obtained in the form of a grant of yen 30,000, and by its means he was able to produce a paper which gained a second class silver medal in the Second Industrial Exhibition of 1887, and he has now received a first class prize of merit in the Exhibition just closed. Mr. Yamada owns five factories, in which he employs a thousand hands.

THE "JIJI SHIMPO'S" ADVICE TO THE GOVERNMENT AND THE DIET.

We do not doubt that the following advice of the *Jiji Shimpō* has the endorsement of many sober-minded Japanese. The editor writes thus:—"Now that the elections are over and the opening of the Imperial Diet is near at hand, both the Government and the people are busy preparing for the coming event, and the political world is roused to unwonted life and activity. The Authorities have, indeed, been engaged for years past making preparations for this great crisis, but now being brought face to face with its actuality, they may naturally find that their foresight was not quite equal to the occasion. Thus, while we fully recognize the necessity imposed on them of making as many preparations as may appear prudent, we cannot, at the same time, think that mere preparations based on theoretical estimates will enable them to successfully weather the coming storm. It is of the greatest importance that they should set before them a definite line of action for their guidance through all phases of practical affairs with which the Diet may concern itself. We are informed that the Government, being specially anxious to be well prepared in matters relating to the budget, entertain the idea of defining by laws and ordinances the exact limits of the so-called "fixed expenditures," that the Diet may have no opportunity to interfere with this part of the budget. We do not gainsay the Government's wisdom in being very cautious *vis-à-vis* the first representative body, but to convene the Diet and yet to try to restrain its action by such measures, is, we venture to assert, just as improper and injudicious as to extend to a full-grown man the treatment of a child. We do not at all pretend to deny the very serious blunder of leaving in the hands of the Assembly the fate of vitally important expenditures, such for instance as those for the national defence upon which our very existence as a State must depend. But we cannot persuade ourselves that the Japanese Diet is capable of claiming any control of such questions. Even on the supposition that such a thing may possibly, and contrary to all expectation, come to pass, surely the Government will

still have time to take a firm stand. It would be highly injudicious to fetter the action of the legislative body simply in deference to the apprehension of such a remote possibility. The true foundation of a Government's strength *vis-à-vis* a representative body lies in the confidence of the country. This foundation once laid, there will be no occasion to be disturbed by any hostile mood of the opposition. To take refuge in the set terms of laws and ordinances for controlling the Diet, is by no means a measure well calculated to inspire the nation with confidence. From from accomplishing its purpose, such a measure could not fail to engender a spirit of discontent and hostility, and thus defeat its own end. From these considerations, it is our earnest hope that the Government will take an open-hearted and manly attitude towards the Diet, giving to the latter's action the same full scope that they claim for their own. Turning now to the Diet itself, we wish to remark that at present political parties exist only in name in our country. Mere cliques there are, magnified into political parties under various high sounding names, but a grand organization with a really efficient following is a thing yet unseen in Japan. Moreover, the members of these little parties, as well as persons professing independence, have formed no definite plan of action to guide their movements in the Diet. All their efforts thus far have been to secure a seat in the House, not to hold it, when secured. We need not dwell upon the evil consequences that will inevitably follow, if members representing so many little cliques and divergent views should make the Diet an arena for petty strife. Some of them have doubtless given pledges to their constituencies, but should they, in order to redeem these pledges, be disposed to place undue importance upon matters of such comparatively minor consideration as the reduction of the Government expenses, the number of officials and so forth, and should they raise clamorous debates on the floor of the first Parliament, the only result will be to lower the dignity of Japan's first representative body as well as to destroy their own reputation. In short, as the members of the coming Diet have had no time to arrange among themselves any plan of united action this year, they will be very apt to follow the bent of their own fancies, like an army having no discipline. To advance to the attack with such disorganised forces would be a fatal error of tactics. The Diet's best plan will be to act on the defensive rather than on the offensive, and to take every precaution to strengthen its position. Instead of attacking the Government it should seek to erect a strong line of fortifications round its rights and privileges with full determination to dispute every inch of ground in case of encroachment. Such a course would not only be tactically the most advantageous, but would also tend to lay a permanent foundation of future parliamentary strength."

THE JUDGES OF SOY AT THE EXHIBITION.

AMONG the complaints made by exhibitors who feel aggrieved about the Judges' awards at the Ueno Exhibition, the most vehement is that of Mr. Iwasaki Juiro, a well-known manufacturer of soy (*shoyu*) in Chiba Prefecture. His firm sent to the Exhibition samples of the soy called *Yamaju-shoyu*, and received only a third-class prize, the soy of other manufacturers being placed higher. Of course this means a great deal to Mr. Iwasaki, for in Japan people set much store by official awards, and an article of consumption which has been publicly placed below its rivals is not likely to find a large sale. But what recourse is possible? We should have thought that nothing remained for Mr. Iwasaki except to sit down quietly and suffer in patience. He does not think so himself, however, and what is more to the point, he has found two eminent barristers, Messrs. Masujima and Oyagi, who advise him that he ought not to resign himself to the unfavourable verdict. A suit has accordingly been instituted against the three Judges—Messrs. Akimoto, Shinizu, and Hida—praying that their award may be upset, and that they be compelled to

pay to the plaintiff damages amounting to 21,428,568 yen, together with the costs of the suit, and to grant such other relief as the nature of the case may require. We do not know how the three places of decimals in the estimate of damages was arrived at, but they convey a clear impression of the minute injury to which the plaintiff has been subjected. The complaint addressed to the Court makes no reference to any law or regulation, and the question which will occur to most persons, as it does to us, is whether legal relief can properly be invoked under such circumstances. Could it be proved that the jurors at the Exhibition had been guilty of corrupt practices, a case would obviously lie against them for fraudulent conduct. But nothing of the kind appears to be claimed. The only ground of petition is that an error has been made, to the grave detriment of the plaintiff's business. Jurors at an Exhibition seem to us to be a kind of private tribunal before which exhibitors come of their own free will, voluntarily submitting their manufactures for mutual comparison. The jurors, so long as they refrain from fraudulent or corrupt practices, for which everyone in every capacity of life is criminally responsible, cannot be required to justify their opinion before a law court. Mr. Iwasaki Juiro consented, of his own choice, to submit his soy to the verdict of the jurors, and however largely the result may entitle him to public sympathy, it certainly does not entitle him to legal redress. If the principle were once admitted that the jurors may be summoned before a law court to answer for every decision they pronounce, the discharge of their functions would become quite impossible. Mr. Iwasaki Juiro has probably by this procedure advertised his *shoyu* far more effectually than the award of a gold medal would have advertised it, so that, on the whole, he is not perhaps to be greatly pitied.

THE ISHIKAWAJIMA CONVICTS.

THE *Daido Shimbun* writes as follows on the condition of the Ishikawajima convicts:—There were in the prison on the 28th ult. 1,959 persons, which shows an increase of 200 as compared with the same date last year. The prisoners range in age between twenty and thirty, very few indeed being above the latter limit, from which it may be concluded that the criminal classes are largely recruited from those in whom the passions of youth still hold sway. Some surprise may be expressed because the high price of rice has not driven a larger proportion of the population to evil courses, but it should be remembered that if food is dearer people can get along on less in lot than in cold weather. Many of the prisoners are quite unable to read, and a deplorably large number do not know their age, their own, or their parents' names. These latter are mostly those who have while young been subjected to imprisonment, and have spent much of their time since in the prison. The chief ailments of convicts are indigestion, consumption, &c., and the Authorities are most careful to guard their health, especially from the attacks of cholera.

RESOLUTIONS OF THE EXECUTIVE COMMITTEE OF THE "KAISHIN TO."

THE caucus of the *Kaishin-to*, attended by more than twenty leading members of the party, was held in the afternoon of the 2nd inst. in their office at Minaminabecho. As the special business of the day, the sense of the assembly was taken on the premonitory caution given by the police authorities to Messrs. Shimada, Ozaki, and Kato in regard to the formation of an alliance between all progressive parties. Some held the opinion that the earnest desire of the *Kaishin-to* for this alliance as a step most conducive to the best interests of the nation, should not be abandoned on the appearance of so slight an obstacle, and that they should dissolve the existing party organization and organize a grand party with all men of the same political sentiment throughout the country. Others, opposing this opinion, maintained that this was not an occasion for taking any rash step under the influence of passionate feelings, and recom-

mended the more moderate course of obeying the admonition of the authorities. Various other views were advanced, but the moderate opinion prevailed in the end, with the understanding that another caucus should be convened in the near future to deliberate carefully what line of action ought to be adopted hereafter. Messrs. Shimada, Ozaki, and Kato were then instructed to convey to the police the reply of the party in the above sense. At the same meeting a motion was adopted unanimously for presenting a memorial to the Government recommending the amendment of the Law of Meetings and Political Associations. A committee consisting of Messrs. Koyedzuka Riu, Kato Masanosuke, and Yoshida Kiroku were appointed to prepare the draft forthwith, so that it may be presented to the proper quarter at an early day after receiving the signatures of all fellow thinkers. It was further resolved that, for realizing the object of this memorial, the party should take steps as active as are allowed within the limits of law, in order to arouse public opinion through the medium of the press and speech. Should they still fail to obtain a favourable hearing from the Government, they purpose to make the subject the first question on the opening of the Imperial Diet by virtue of the provision made in Art. 62 of the Law of the Diet.

In regard to the same matter, the *Fyū-to*, the *Aikoku-koto*, and the *Koin Club* have already taken steps to give the police authorities proper notice of their intention to dissolve their respective party organizations. On the other hand, the *Daido Danketsu* still remains undecided. Judging from statements in the vernacular papers, it appears that men who occupy the position of political satellites to Count Goto, or "the body-guard of Count Goto" as the editor of the *Choya Shimbun* calls it, are strenuous advocates of the maintenance of the *Daido Danketsu* as an independent party, renouncing the idea of forming an alliance with other parties except in respect of living issues on the floor of the Diet. On the other hand, the rank and file of the party, chiefly composed of provincial members, are inclined to the dissolution of the party, with the purpose of paving the way for the formation of a new party embracing all men of progressive principles.

THE "SOSHI."

In recent times the so-called *soshi* cut no unimportant figure in the political affairs of the country, and seemed to enjoy a pretty free hand. But if we may credit what is stated in the *Fiji Shimpō*, they will soon be subjected to a dose of their own particular kind of medicine. In a certain part of Kiushiu, says our contemporary, there is a band of resolute youths, who, having heard that the so-called *soshi* are strutting about in Tokyo and other places, violently intruding upon political meetings and generally indulging in disgraceful intimidation and mob law, have become very indignant, and determined that the character of chivalrous and patriotic Japanese would suffer were these desperadoes allowed to wield their pernicious power without restraint, especially now that the opening of the Diet is so near at hand. They have, therefore, formed themselves into what is styled "The *Soshi* Suppression Band," and about fifty of them are reported to be on their way to Tokyo with the determination of thrashing the *soshi* into sense and teaching a lesson to the student class generally. It is further reported that they will not care a straw for such a trifling matter as the loss of their own lives, if only they succeed in their purpose.

A NEW EDUCATIONAL DEPARTURE.

THE Tokyo Semmon Gakko has introduced into its curriculum a new feature of great importance from a literary point of view, as it marks the public recognition of the efforts of the *literati* of the rising school. Hitherto the Imperial University and other educational institutions of high standing, whether Governmental or private, have all recognized the importance of giving instructions in the much

neglected native language and Chinese literature. But the instructors appointed for this purpose being in almost every case men educated according to the old system, have proved themselves singularly deficient in capacity for systematizing what they were asked to teach. Meanwhile, many young men, fully trained under the new system, have applied themselves to the study of the Japanese and Chinese literature, and under their influence the chaotic mass of Japanese national literature is now being brought into order and system. Clothed thus in wholly new garments by leaders of the modern school, the study of Japanese and Chinese literature, hitherto the duldest of all studies, has begun to fascinate every young student of imaginative tendency. But the honour of affording public recognition to the literary men of the new school for the first time belongs to the Tokyo Semmon Gakko. That college, it is announced, has obtained the services of Mr. Morita Shiken as instructor in Chinese; of Mr. Mori Kwainan, as instructor in poetry, Chinese novels, and the drama; of Mr. Mori Ogwai, as instructor in esthetics; and of Mr. Aiba Kōson as instructor in the Japanese drama. These gentlemen are now very well known in Japan among the rising *literati*. Mr. Morita Shiken is the literary editor of the *Hochi Shimbun*, and his miscellaneous sketches are admired for simplicity and grace of style. Mr. Mori Kwainan, son of the late Mr. Mori Shuntō, one of the best poets of his time, is already recognized as a worthy successor of his father's fame in a certain branch of versification. He is an extremely fascinating writer. Mr. Mori Ogwai is a military surgeon by profession. Having graduated with distinction at the Medical College of the Imperial University, he subsequently spent several years in Germany completing his professional studies. But he is best known as a literary man, the most celebrated of his stories being *Mai Hime*, which appeared in the literary supplement of the first number of this year's *Kokumin-no-Tomo*. Mr. Aiba Kōson has long been, and we think still is, on the staff of the *Yomiuri Shimbun*. He is one of the most prolific novelists of the new school. The range of his ideas does not seem very comprehensive, yet there is no gain-saying that he is among the best living masters of pure Japanese.

PANORAMA.

CONSIDERING how matter-of-fact the Japanese are in matters of every-day life, we are often surprised and amused to observe their habitual tendency to attribute highly philanthropic motives to enterprises of a purely business character. Probably this is chiefly because every one engaging in any undertaking seeks above all things to secure official patronage and protection, and is consequently anxious to pose as a public benefactor. The panorama at Ueno is a case in point. It was originally projected by Mr. Okura Kihachiro with the same object, we presume, that would have influenced any other shrewd man of business. But the *Tokyo Shimpō* now assures us that the main purpose of the enterprise was to convey instruction to students and soldiers, and that a profit of some ten thousand *yen* which has resulted is quite an unexpected pleasure. The main point, however, is that the panorama has proved a success and that it is to be kept open until winter, when the total net earnings are to be converted into a capital fund for a panorama company, which will establish relations with other companies abroad so as to obtain a constant supply of new views. It is also in contemplation to erect a solid building upon which insurance can be effected, and to let it to panorama companies from foreign countries should they visit Japan. We congratulate Mr. Okura on the result of his scheme, and are glad to think that he has been the means of introducing a harmless and instructive kind of entertainment.

LESSONS OF THE RECENT ELECTIONS.

TAUGHT by the experience of the recent elections, the *Kokumin-no-Tomo* calls attention to the desirability of altering some of the provisions

of the Public Meetings Regulations and the Law of Election. As to the former, the provision which has proved most inconvenient is contained in Art. I., which requires that, whenever a public meeting is to be held for political purposes, notice should be given to the police three days previous to the date of the meeting. Any one who knows what an election means need not be told how irksome such a provision is. It is admitted that at the recent elections, the police authorities did not insist on the strict observance of the provision; but in some cases the law had the indirect effect of encouraging corruption by compelling the candidates to appeal to the electors personally. In other words, the provisions became either a dead letter or a positive nuisance. The *Kokumin-no-Tomo* demands an entire modification of the provision. Still more productive of evil at the recent elections was the rule requiring electors to write their own names on the ballot. The effect of this rule is that some electors were induced to vote against their conscience through fear of offending relatives, friends, landlords, or creditors. At the time of polling it was remarked that the number of persons failing to exercise the franchise was greater in localities where there were numerous candidates than in localities where there were few. The plain inference is that, appealed to by numerous rival candidates, many electors were so afraid of giving offence that they preferred to stand aloof altogether rather than run the risk of either giving umbrage to persons with whom they or their relatives desired to remain on good terms, or damaging their custom and patronage. The object of legislators, says the *Tokyo journal*, was to impress upon electors the grave importance of the franchise, but "human nature is weaker than our law-makers seem to think."

It is absolutely necessary that the rule be altered and that voters be permitted to vote without giving their own names. The *Kokumin-no-Tomo* also complains of the narrow limits of the franchise. A certain class of men argue that this circumstance prevented the prevalence of bribery at the recent elections. But the *Tokyo periodical*, while to a certain extent acknowledging the truth of this opinion, contends that it is absurd on that account to exclude from the franchise the intelligent middle class, the numbers of which generally pay from five to fifteen *yen* in direct national taxes. Men of this class take a keen interest in political matters, and at the elections they showed themselves very active in canvassing for their favourite candidates. So our contemporary believes that the extension of the limits of the franchise will become the subject of an animated discussion when Parliament meets. Lastly, we are assured that the provision in the Law of Election declaring the non-eligibility of *Fu, Ken, or Gun* officials within the locality under their control failed in many cases to accomplish its purpose. For, according to the *Kokumin-no-Tomo*, there were many local officials who, having completed all necessary preparations while holding their official positions, resigned on the eve of election and presented themselves as candidates. Among these there are no doubt some who were elected by fair means, but there were also others who, in our contemporary's opinion, used the authority of their office to secure votes. The *Kokumin* suggests that the provision be so modified as to make local officials disqualified for election for one full year after their resignation.

DISTRESS IN TIENTSIN.

THERE seems to be considerable distress in and about Tientsin. We read in the *Chinese Times* translations from the *Shih Pao* that "the city has recently been crowded with poor and starving people from the country places. The sight of them would draw forth pity from any one who has seen them. Some of these poor people are selling their own flesh and blood to save them from starvation. The other day a man and his wife were leading through the streets two beautiful little girls of about three or four years old to sell to the people for slaves; their faces showed the want of nourishing food, and

- they were wailing and begging for something to appease their hunger, and finally they were sold to a brothel keeper for a mere pittance. May," says the *Shih Pao*, "this pitiable instance be brought to the notice of the local charitable institutions, and it is hoped that some means may be devised to prevent innocent young children falling into the hands of those who will make ill use of them."

CHOLERA RETURNS.

The following are the latest cholera returns, taken from official sources:—

Prefecture.	Date.	New Cases.	Deaths.
Nagasaki	1st	62	21
	2nd	64	40
	3rd	60	51
	4th	13	24

The numbers of cases and deaths since the commencement of the epidemic, inclusive of the above figures, appear in the following table:—

Prefecture.	Cases.	Deaths.
Nagasaki	759	310
Yamaguchi	447	139
Fukuoka	711	330
Saga	101	61
Kumamoto	253	123
Kagoshima	124	80
Oita	15	4

The *Official Gazette* during the week contained the following additional returns:—

Place.	Prefecture or City.	Remarks.
Kobe	Hyogo	A student in the <i>Meiji Maru</i> of the Department of Communications, which came from Moji harbor, Oita, Kyushu, was attacked on the 30th ult. and sent to the Wada Cholera Hospital.
Mitsuma-gun	Fukuoka	4 men seized on the 1st.
Toga-gun	Ditto	at men seized on the 1st.
Fukuoka-shi, Kamagata-gun, and Shima-gun	Ditto	One case in each place on the 1st.
Kamitsuma-gun	Ditto	One man seized and one man died on the 1st.
Miike-gun	Ditto	3 cases and 1 death on the 1st.
Nagaura	Kanagawa	2 cases in the Turkish man-of-war, and three cases among cholera nurses of the Nagaura Cholera Hospital on the 31st.
Yokohama	Ditto	Three men and 2 women seized on the 31st ultimo.
Innan-gun	Hyogo	One woman on the 25th ultimo.
Kasai-gun	Ditto	One case on the 25th ult.
Itsuno-gun and Aizawa-gun	Ditto	One man seized and one died in each place on the 25th.
Ubara-gun	Ditto	One man and one woman attacked and died in these places on the 25th ultimo.
Iwafune-gun	Niigata	One man on the 27th ult.
Kitamuro-gun	Miyagi	One man on the 27th ult.
Momou-gun	Miyagi	One case on the 27th.
Kamimihagi-gun	Okayama	One case on the 26th.
Vebara-gori	Tokyo	One woman seized and died on the 1st instant.
Honjo	Ditto	One man on the 1st inst.
Nishiku	Osaka	One woman seized and died on the 29th ultimo.

Nagaura	Kanagawa	Two Turks and one Japanese on the 1st instant.
Yokohama	Ditto	3 men on the 1st instant.
Yofu-gun	Hyogo	A traveller attacked on the 25th and died on the 26th ultimo.
Shirosaki-gun	Ditto	One woman on the 26th ult.
Jinto-gun	Ditto	One woman on the 27th ult.
Yoshida-gun	Fukui	One man on the 27th ult.
Savagi-gun	Hiroshima	One woman on the 25th ult.
Hiroshima-shi	Ditto	One woman on the 26th ult.
Takamiya-gun	Ditto	One man on the 26th ult.
Urato-minato	Kochi	A man in a vessel at anchor became ill on the 27th ult.
Oita-gun and Usa	Oita	One man in each district on the 26th ult.
Nima-gun	Shimane	One man attacked and died on board a ship near Susa, Yamaguchi Prefecture.
Hyogo	Hyogo	One man died on board the <i>Meiji Maru</i> on the 1st inst.
Kyobashi & Kanda	Tokyo	One man in each district on the 2nd and 3rd inst.
Osaka-shi	Osaka	1 case on the 30th ult.
Yokohama	Kanagawa	15 cases from the commencement of the epidemic on the 13th ultimo up to the 31st ult., of which 8 died, 3 recovered and the remaining four are convalescent.
Nagaura	Ditto	27 cases since the commencement of the epidemic on the 18th ult. up to the 31st ult. on board the <i>Eriougroul</i> , of which 8 died, 5 were cured and the remaining 11 are convalescent.
Nagaura	Ditto	One seaman of the cholera guard-vessel died, and one nurse was seized, since the commencement of the epidemic up to the 31st ultimo.
Nagaura	Ditto	One Turk and one Japanese on the 2nd instant.
Yokohama	Ditto	2 cases on the 2nd instant.
Kuraki-gun and Kitatama-gun	Ditto	One case in each district on the 3rd instant.
Kako-gun	Hyogo	One woman who died on the 30th ultimo.
Nishikubiki-gun	Niigata	One man in the former district on the 28th ultimo, and one woman in the latter on the 29th ult.
Moda-guo	Chiba	One man who died on the 30th ult.
Higashiyamanashi-gun	Yamanashi	One case on the 28th ult.
Nakakoma-gun	Ditto	One case on the 1st inst.
Kamido-gun	Okayama	One case on the 1st inst.
Sayeguni-gun	Hiroshima	One case in the first place on the 23rd ult., one case at Aki on the 25th ult., and one case in Hiroshima on the 27th ult.
Nagasaki-gun	Kochi	One case on the 29th ult.
Yoshiwara, Asakusa	Tokyo	A woman on the 4th.
Daicho, Hongo	Ditto	A woman on the 4th.
Kamezawacho	Ditto	A man on the 4th.
Honjo	Ditto	(These three cases were non-Asiatic.)
Kobikicho, Kyobashi	Ditto	One man on the 5th.
Sanyacho, Asakusa	Ditto	A woman who died on the 5th. (These two cases were non-Asiatic.)
Masagocho	Yokohama, Kanagawa	A woman on the 4th.
Hagoromocho	Yokohama	Ditto
Yoshihamacho	Yokohama	Ditto
Isecho Nihonbashi	Tokyo	One woman who died on the 5th.
Shin-Funamatsu	Ditto	A <i>godairiki sendo</i> (non-Asiatic) on the 5th.
Tamachi	Ditto	One man who died on the 1st (non-Asiatic).
Kawarayamachi	Miyazaki, Osaka	One woman on the 1st.
Ajikawa-dori, Kitaku	Ditto	A man on the 2nd.
English Hatoba	Kanagawa	A man and a woman on the 5th.
Homoku, Kuraki-gun	Yokohama	Ditto
Fukuzi-mura	Yokohama	A man on the 5th.
Murato-mura	Kobe	A man who died on the 2nd.
Nishigumma	Gumma	One woman who died on the 29th ultimo.
Hatcho-boi	Tokyo	One man on the 5th.
Senzoku-mura	Ditto	One woman on the 6th.
Asakusa	Ditto	One woman on the 6th.
Konyacho	Ditto	Five women and one man on the 6th.
Kyobashi	Ditto	One man on the 6th (Mr. Hanaka Kyojoro, a leading member of the <i>Jiyu-to</i> party, who was only released last year from prison, whether he had been considered some years ago for revolutionary schemes).
Hamaguricho	Fukagawa	Ditto
Iriyecho, Honjo	Ditto	One woman who died on the 5th.

Minami-Sakumacho, Shiba	Ditto	One man seized and died on the 5th.
Sugamo-cho	Ditto	One man on the 6th.
Kita-Toshima	Ditto	One man on the 6th.
Nakashima-cho	Ditto	One woman seized and died on the 6th.
Futagawa	Ditto	One woman seized and died on the 6th.
Kawaoka-mura	Kyoto	One man (non-Asiatic).
Minato-bashi	Yokohama	One man on the 6th.
Naka-cho, Ishikawa	Ditto	Two men on the 6th.
Horai-cho	Ditto	One man on the 6th.
Choja-machi	Ditto	One man on the 6th.
Disinfecting Station	Ditto	One man on the 6th.
Kanagawa-cho	Kanagawa	Two men on the 6th.
Kitsukegori	Ditto	One man on the 6th.
Odawara-cho	Ditto	One man on the 6th.
Asahigaragori	Ditto	One man on the 6th.
Nakamura	Yokohama	One man on the 6th.
Takino-mura	Yamanashi	One woman on the 3rd (non-Asiatic).
Koya-mura	Okayama	One man on the 1st.
Higashi-Nanjo	Okayama	One man on the 1st.
Miyomura, Iitaka-gun	Wakayama	One man on the 29th ult. (non-Asiatic).
Minami-Konyacho	Tokyo	Five women and 3 men.
Kobikicho, Kyobashi	Ditto	One man.
Yamahushicho	Ditto	One man.
Shitaya	Ditto	One woman.
Hamamatsucho	Ditto	One woman.
Shin-Fukucho	Ditto	One man.
Asakusa	Ditto	One man on board the vessel <i>Bishamon Maru</i> .
Etchujima	Ditto	One man on board the vessel <i>Bishamon Maru</i> .
Yazamonocho	Ditto	One man, a beggar. (The above 14 cases all occurred between noon on the 7th and 6 a.m. on the 8th.)
Kyobashi	Ditto	One case on the 7th.
Wakabacho	Yokohama	One case on the 7th.
Tsurumi, Tsukigori	Kanagawa	One case on the 7th.
Sueshiro-mura	Niigata	One woman on the 1st (non-Asiatic).
Yoshida-mura	Nagano	One woman on the 2nd (non-Asiatic).

On the 1st instant three cases occurred in Yokohama, one in Masagocho, Ichome, and two at the Disinfecting Station in Hinodecho, one of the latter resulting fatally. On the 1st also three cases were reported from the *Eriougroul* at Nagaura, one of the patients dying the same day. On the 2nd inst. one man, a Japanese sendo, was seized in Motomachi, Ichome, and died on Sunday; and three cases were reported from the *Eriougroul* of which two proved fatal. This morning a case of supposed cholera at Masagocho, Sancho, was brought to the notice of the authorities.

A seaman on board the outgoing Shanghai steamer *Kobe Maru* was attacked by cholera on Wednesday, and the vessel was consequently taken to the Quarantine Station at Nagaura where she will remain until disinfected. The man was first seized with vomiting at five a.m., and was removed to the Ishikawa Cholera Hospital, where his case was pronounced to be genuine cholera. The *Kobe Maru* was at Nagasaki on the 28th ult. and arrived here on the 1st inst. A case is also reported to have occurred on the *Takachiho Maru* on the Nagasaki-Vladivostok route.

FLOODS AT MITO.

A CORRESPONDENT writing on the 7th inst. from Mito, says:—"After a heavy down-pour of rain during yesterday afternoon and late into the night, the Naka River began to rise, and has deluged the surrounding country almost as badly as during the great floods of last August. Houses have been washed away, bridges broken, but, so far as known yet, no lives have been lost. The river, however, is still (noon) rising, and is flowing with a very swift current. The crops, which had been doing nicely, are badly damaged. High winds and an abundance of rain have marked the past few days."

TOKYO WATER SUPPLY.

By way of prelude to the construction of water-works in the capital, an accurate estimate of the amount likely to accrue from the charges for water has been undertaken by the Tokyo City Improvement Committee. The task was completed on the 31st ultimo, and the result reported to Mr. Yoshikawa, chairman of

the committee. According to this estimate, the income from the above source is estimated at 540,000 *yen*, while the expenditure for the maintenance of the Aqueduct Office is estimated at 220,000 *yen* per annum, thus leaving a net annual profit of 320,000 *yen*. These charges will be collected on three different scales according to the quantity of water consumed. The charge for an ordinary householder's consumption will be about 54 *sen* per month. We take these particulars from the *Fiji Shimpō*.

ANT TOWERS.

The *Daido Shimbun* has been favoured with a description of several very curious works which it calls "ant-towers." These edifices are situated in a godown of the Obinagami at Chiyoda-mura, Nishi Yamanashi, Yamanashi Prefecture. They are carefully concealed from the public view because the late owner of the godown died immediately after exhibiting them in connection with the festival of Mitakesan, but the *Daido's* informant was successful in obtaining a peep at them. The "towers" are three in number, and while one is three feet in height, the others are respectively one and two feet high. They are of a dark colour, and are very hard and solid. The "towers" are perforated by numerous holes, and suggest the idea that they are fortalices of some powerful ant magnate. It is conjectured that the death of the former proprietor of the godown and its curious contents was in some way due to the formic acid secreted by the ants. The *Daido* commends the ant strongholds to the attention of scientific persons.

THE DIET AND THE BUDGET.

It is reported, according to the *Tokyo Shimpō*, that there exists a difference of opinion in official circles in respect of the question whether or not the right of making motions to increase the amount of the budget submitted to the Diet belongs to that body. Those who adopt the negative side of this question argue that the Diet might possibly be led by some political chicanery to abuse the right. They point out that in England no such function is exercised by Parliament. On the other hand, those who hold the affirmative, contend that there is no express provision on this subject in the English constitution, and that in some cases the British Parliament has actually taken such a course. No evil effect, in their opinion, would follow the concession of the right, provided the sphere of the "fixed expenditures" defined in Article 67 of the Constitution be kept sufficiently extensive. It is said that the latter opinion will probably be adopted, but we have only the authority of the *Tokyo Shimpō* for the assertion.

THE PRESS REGULATIONS.

The *Tokyo Shimpō* says numerous instances have appeared of late in which newspapers have suffered loss in consequence of mischievous writings, while in very few cases have there come forward journals courageous enough to face and combat evils. Meanwhile, the attitude of the Government towards the press is one of severity. This is not as it should be. Journals should be fair and candid in their actions, and the authorities should allow moderation to influence them more largely than at present. The press ought to discuss such matters as seem to call for treatment, and if the Government deems that cause for suspension exists it should accompany its action with a statement of the reasons which warrant suspension. On the other hand, newspapers should have the right to apply for redress to the Administration Court if they think themselves unfairly treated.

MOVEMENT OF INDEPENDENT MEMBERS OF THE DIET.

On Thursday last, Messrs. Sugiura, Oyagi, and other members of the Diet, who profess no attachment to any of the existing political parties, opened a meeting in the Charyo restaurant on the Hoshigaoka Hill, with a view to forming an independent party in the coming Diet. We learn from the *Fiji Shimpō* that they are intended to unite all the members of the Diet professing neutrality throughout the country, and

for this purpose, letters have already been forwarded, urging these members to come to the capital before the 20th proximo to be ready to attend the general meeting of the Independents. The names of Messrs. Mutsu and Suyematsu have been associated with the movement by some newsmongers, but the report is contradicted.

GOLD AND SILVER RATIOS.

The *Official Gazette* gives the following table of comparative values of gold and silver coins and of the pound sterling for the week ended the 2nd inst., as derived from the returns of the Bank of Japan and the Yokohama Specie Bank:—

Days	Gold Coin. (Per yen 100) Silver Yen.	Pound Sterling. Per Yen.
28th	113.800	A.M. 5.6304 P.M. 5.6304
29th	114.000	A.M. 5.5976 P.M. 5.5976
30th	113.300	A.M. 5.5976 P.M. 5.5976
31st	113.300	A.M. 5.5976 P.M. 5.5976
1st	113.300	A.M. 5.5976 P.M. 5.5976
2nd	113.000	A.M. 5.5172 P.M. 5.5172
Averages	113.250	5.5777

The above averages show for gold coin a decrease in value of *yen* .317, and for the pound sterling a decrease in value of *yen* 0.0200 as compared with the previous week.

THE BANK OF JAPAN.

The amounts of convertible notes and reserves in the Bank of Japan for the week ended the 2nd inst. were as follows:—

Convertible Notes.	Reserves and Securities.
Yen.	Yen.
Notes issued	Gold coin and bullion
71,548,331	24,205,247
	Silver coin and bullion
	24,077,004
	Public Loan Bonds
	13,470,450
	Treasury Bills
	—
	Government Bills
	—
	Other securities
	4,734,183
	Commercial Bills
	4,307,328
71,548,331	71,548,331

Of the above total issue of notes, the sum of *yen* 4,410,132 is in the treasury of the Bank, and *yen* 67,138,199 in actual circulation, the latter showing a decrease of *yen* 109,062 as compared with *yen* 67,247,261 at the end of the previous week.

SATURDAY'S SAILING RACE.

SATURDAY'S sailing race was brought to a premature conclusion by the disinclination of the yachtsmen to go round the course in the face of certain very threatening weather indications. *Maid Marion*, *Lady Louise*, *Molly Bawn*, *Mosquito*, *Princess Maud*, *Scow*, and *Ronin*, were started by Mr. Campbell, who acted as officer of the day, and with a fresh breeze from the S.E. got out to the Lightship close hauled. Shortly after two o'clock, however, a heavy rain-squall came up, and as the weather looked very forbidding the leading boats after getting some distance on the reach to the Tomioka Mark put about and ran back. *Ronin* persisted in the intention to go round the course, but the officer of the day declared the race off, and so all returned to their moorings.

THE CURE OF RHEUMATISM.

From the *Daido Shimpō* we learn that Dr. Tsuno Kōyō, who has opened a special hospital at No. 5, Nishi Kōya-cho, Kyobashi, Tokyo, is the proprietor of a sovereign remedy for rheumatism. This ailment, in its various Japanese forms of *tsufu*, *fudoku*, *fushitsu* and others, has many victims in this country, and Dr. Tsuno's attention, while attached to the *Kakke* Section of the Medical College (Imperial University) and later as professor of the acupuncture and moxa methods of treatment, was long devoted to the attempt to obtain a cure. A description of his methods appeared not long ago in the *Tokyo Medical Journal*.

CENTRAL TELEPHONE EXCHANGE.

The building for the Central Telephone Exchange is already in course of construction at the former site of the Tatsunokuchi Bazaar. The posts which are now being erected are considerably thicker and generally more substantial than common telegraph posts, and

can carry a hundred and fifty lines each. At present the central office is expected to commence business with three hundred lines, but there is a good prospect that this number will be much increased ere long. For the convenience of those who live at a distance, branch lines will be extended in various directions. The business is expected to come into full operation early in September.

THE INDEPENDENT MEMBERS OF THE HOUSE OF REPRESENTATIVES.

The *Koron* states that a few days ago a number of gentlemen who have been chosen members of the Lower House, and who are not connected with any party, met at Hoshigaoka. An address was delivered by Mr. Oyaki, one of the promoters of the meeting, who expressed the opinion that the independent members should hold themselves aloof from parties, and decide for themselves what policy they should pursue towards questions that may crop up. The essential feature of independence, our contemporary thinks, is that those professing such principles should act on their own discretion; for should they combine then they must lose their independence.

ALLIANCE OF THE PROGRESSIVE PARTIES IN THE SEVEN PROVINCES OF THE NORTH-EAST.

We are informed by the *Yomuri Shimbun* that a telegram has been received to the effect that the union meeting held in Akita, by the progressive parties of the seven provinces of the North-East, has resulted in the formation of an alliance. According to the same journal, an understanding has at last been arrived at between the three sections of the progressive party in the other provinces of the empire. If this be so, we may expect soon to see these sections break up their present organizations, with the view of amalgamation on a wide basis.

UNSOLD ARTICLES IN THE EXHIBITION.

SEVERAL plans have been proposed, says the *Kokumin Shimbun*, for the disposal of the unsold articles in the Ueno Exhibition. The latest scheme is that the Authorities should give a certain amount of bounty to the exhibitors. The articles will be appraised and should there be found a difference between the prices fixed by the appraisers and those asked by the exhibitors, a certain portion of the difference will be given by the Authorities. The money needed for this purpose will be defrayed from the amount realized by the sale of tickets.

THE "KOIN CLUB."

THE time for opening the general meeting of the *Koin Club* is at present fixed for the 10th August, but, owing to a certain difference of opinion held by the *Daido* wing of the Club, the date may have to be postponed. At present the executive committee of the Club are very busily engaged in the preparation of the matters to be submitted to the meeting for deliberation.

THE CABINET.

THE *Fiji Shimpō* reports that all the Ministers of State met in the Cabinet on the 29th ultimo, and continued their deliberations till five o'clock in the afternoon. As a Cabinet meeting with so full an attendance is of rather rare occurrence during the summer vacation, the *Tokyo* journal construes it as a sign that some matter of great importance is engaging the attention of Ministers.

We are informed by the Agent of the Pacific Mail Steamship Company that telegraphic information has been received reporting an accident to the *City of Rio de Janeiro*. It seems that, while lying at her buoy in Hong-kong Harbour, she was run into on Monday and damaged about the bows. The injury is not serious, but the vessel must go into dock, which will cause a detention of a few days in her departure from this port for San Francisco.

We have to acknowledge the receipt of \$5 from the Rev. Dr. T. Romeyn Beck and \$5 from H. M. & Co., for the relief fund of the Jizen-kai.

THE AMENDED MEETINGS REGULATIONS.

LONG looked for and earnestly desired, the amended Regulations for Public Meetings have not, of course, given unalloyed satisfaction, though the friends of liberty welcome their promulgation with considerable enthusiasm. One great change effected by them is that the projectors of a political meeting, instead of being obliged to petition for official permission at least three days previously, are now required only to intimate their intention forty-eight hours beforehand. Moreover, no power of discrimination is reserved to the police. It is not even prescribed that the subject or subjects of proposed discussion shall be mentioned in the intimation forwarded by the projectors of a meeting. Only the place and date of the meeting, as well as the names, residences, and ages of intending speakers, together with the signature and seal of the projector, are required. It will be seen that this is, in effect, a concession of the vital principle that the right to assemble for purposes of political discussion is vested in the people, and that the Authorities cannot interfere with its employment except in the event of actual abuse. The police are still authorized to attend meetings and to disperse them in the event of any breach of the Regulations, or any action or language considered prejudicial to the cause of peace and good order. Moreover, since it will still rest with the police to decide what constitutes action or language prejudicial to peace and good order, liberty of speech remains much as it was before. But the right of public meeting is undoubtedly conceded in a full sense, and we are somewhat surprised that the fact has not received more emphatic recognition at the hands of Japanese journalists. Increased liberty is also granted in that the advertisement of projected political speeches is permitted, whereas formerly it was forbidden, and the police are not directed to dissolve a meeting merely because some one speaker's address is considered improper: it suffices to prohibit that particular speaker from proceeding. As a set-off, however, to these liberal provisions, the 28th Article is viewed with great disfavour. It interdicts attempts to influence public opinion by issuing manifestoes or dispatching deputies, and it also forbids a political association to establish branch offices, or combine or correspond with other political associations. We confess inability to understand precisely what is meant by these prohibitions. Manifestoes and deputies are ordinary resources of political propaganda everywhere, and combination and correspondence with other parties cannot scarcely be deemed improper measures under ordinary circumstances. It is next to idle to conjecture, and we possess no means of ascertaining, why the Govern-

ment felt obliged to enact these restrictions, but since the tendency in official circles sets strongly in the direction of full recognition of personal rights we must conclude that convincing reasons exist for the prohibitions still enforced by the law. The vernacular press does not recognise any such reasons, but then the vernacular press has never failed to advocate entire freedom of speech and public meeting—advocacy the persistence and age of which are becoming in themselves evidences of its justice.

Of a different character is the prohibition that while the Diet is in session no open air meeting or procession will be permitted within a circle of three miles radius from the Houses of Parliament. Demonstrations by mobs are at once a dangerous and intimidatory species of political agitation, and we do not, for our own part, think this provision unbecoming or reactionary. The Japanese newspapers, however, condemn it, as they do also and unanimously the article prohibiting women from becoming members of political parties. We should have imagined that this veto would have escaped all censure in Japan, but apparently there is a strong disposition in liberal circles to concede political rights to women, and possibly we shall soon see Japanese ladies organizing Primrose Leagues or canvassing for their male friends. May the day be far distant! On the whole it does not seem that the public takes any very keen interest in these amended Regulations. Had they been issued before the elections greater practical value would have attached to them; but the evident feeling with regard to all such legislation now is that within four months it will have to run the gauntlet of parliamentary discussion, and that whatever old-fashioned or irksome provisions it enacts are not likely to survive the ordeal. The fact will nevertheless stand to the Government's credit that it endeavoured to be as liberal as possible within the limits of safety.

JAPANESE EMIGRATION TO HAWAII.

EMIGRATION to Hawaii has unquestionably proved a most fortunate thing for Japan. The meaning of it is simply this—that a Japanese who, living in his own country, can scarcely hope to keep body and soul together, is by emigration provided with employment on such terms that, at the end of five years, he can return home with savings amounting to six or seven hundred dollars in gold. Nor do we by any means count this the limit of the benefit conferred. There is the further consideration that Japanese employed in Hawaii learn the advantage of continuous work, unbroken by the multitude of petty interruptions which, in this country, are suffered to interfere between a labourer and his task. Neither in thrift, industry,

nor perseverance do the Japanese rank below other nations, but in appreciation of the value of persistent, unremitting toil they are assuredly inferior to Europeans and Americans. Hawaii is a school where this wholesome lesson is taught, and every Japanese who returns thence brings home with him experience of the greatest usefulness. A school where valuable practical lessons are inculcated, while, at the same time, the scholars acquire a sum of capital sufficient to raise them permanently from the low stratum of life in which they were born—such a school is a veritable boon to any people. Fourteen thousand Japanese have been educated, or are undergoing education, in Hawaii, and by these men and women, originally common labourers without any prospect of saving money, sums aggregating no less than two million *yen* have been sent to their country, within a space of five years, and half of a million *yen* has been paid as passage-money to the principal Japanese steamship company. Many have found employment as domestic servants; a position much coveted, since its occupants are able to save three times as much as their fellow-countrymen working on the sugar plantations. In other words, a Japanese who becomes a house servant in Hawaii, and who behaves with ordinary steadiness and thrift, can lay up about two thousand gold dollars in five years. Two thousand dollars is not a fortune; still less is six or seven hundred. But think what even the smaller of these amounts signifies to a Japanese who counts himself secure against hunger and cold if he can reckon on an income of five dollars monthly. The fact is that those who return from Hawaii with practically ingrained ideas of industry and with a capital of several hundred dollars, become thenceforth, in nine instances out of every ten, material contributors to the national wealth. None of the objections usually urged against emigration apply to their case. Their labour, so far from being lost to their country, is most profitably employed in the nation's behalf, and draws from abroad a solid increment of wealth. It is probable that these great advantages are not secured without some cost. The world has nothing to bestow on men without grit to work or courage to endure, and it has sometimes struck us as a very discouraging element of Japanese character that people should be willing to listen to and circulate complaints about the supposed hardships which the emigrants to Hawaii have to endure. If the Japanese cry out the moment they feel the pinch of toil, there is little hope of their achieving national greatness. We believe, however, that they are made of sterner stuff, and that they know how to estimate the thoughtless murmurs of effeminate sentimentalists. The Hawaiian planters have always shown themselves most willing to consider and adopt any suggestions made on behalf of the Japanese immi-

grants, who, for the rest, are protected by a treaty probably the most comprehensive and inelastic that was ever framed in the interest of any body of settlers. At present Korea and Hawaii may be called the trial grounds of Japan. In the former the Japanese merchant has almost shown that he can hold his own against both Western and Chinese competitors; in the latter the Japanese labourer is fairly on the way to contradict the pessimists who used to declare him incapable of regular and sustained toil. It is to be hoped that neither experiment will be interrupted. Nothing would surprise us less than to see the Japanese in Hawaii rise from subordinate positions to be themselves owners of plantations. If sugar can only find its way into the United States on greatly changed terms, as the new tariff proposes, the conditions of its production in Hawaii will be so altered as to increase the premium on Japanese coöperation. Without pausing to consider this question, however, it seems to us that the nation may well congratulate itself on an undertaking which, in the space of five years, has enabled fourteen thousand of its labouring folks—eleven thousand men and three thousand women—to transmit two million dollars from a foreign country to their own, and which, at the same time, has put half a million dollars into the pockets of the principal Japanese Steamship Company. There cannot be much doubt about the expediency of prosecuting and if possible developing such an enterprise.

MR. NOSE ON THE ART OF MANAGING SCHOOLS.

ENCOURAGED by the success of his "Science of Education," which was noticed at some length in these columns, Mr. NOSE has just published another bulky volume on the Management of Schools. On the title page are inscribed in English the words:—"Dedicated to the memory of Viscount MORI ARINORI, late Minister of Education, at whose request this volume was written, and for whose untimely end its author feels a deeper regret than words can express or tears reveal."

The materials Mr. NOSE has collected and digested into one volume embrace everything of interest in the history of Japanese education from the days of the Emperor TENCHI down to the present time. It seems to us that a volume of this kind would well bear translating into English as a book of reference on education in Japan. Hitherto such treatises on education as have been published have been almost exclusively confined to generalities, to theories, to characteristics which are common to most countries alike. Mr. NOSE has set himself the task of writing a history of Japanese education, as it was and as it is, and of sketching the outlines of what it may become under pro-

per guidance. In order to give some idea of the scope of the book, we append a table of contents. The work is divided into sixteen chapters. The headings of these chapters, usually give a good idea of the subjects discussed, when they do not we add sub-headings:—

Chap. I.—History of Japanese Education. (1) The systems pursued in ancient times, from the days of Tenchi (A.D. 668-672) to the beginning of the Meiji era. (2) The modern system. Chap. II.—The necessity of suiting the method of education to the occupations of the people concerned. Chap. III.—The two theories of education. (1) Education as culture. (2) Education as the imparting of knowledge. Chap. IV.—The distinction between individual and national education. Chap. V.—Necessary qualification in teachers. Chap. VI.—The difficulties of teachers. (1) From parents. (2) From incompetent predecessors less proficient than themselves. (4) From unsuitable pupils. (5) Connected with the removal of unpromising elements either in the pupils or their parents, or purely national elements. (6) From the slowness or irregular attendance of pupils. Chap. VII.—System of teaching. Chap. VIII.—Methods of division into classes. Chap. IX.—The division of time. Chap. X.—Discipline. Chap. XI.—Rewards and punishments. Chap. XII.—Examinations. Chap. XIII.—School buildings. XIV.—School furniture. Chap. XV.—Economy in schools. Chap. XVI.—School registers.

The minute details into which Mr. NOSE enters on each subject constitute, in our opinion, the chief value of his work. Our own peregrinations through the country and examination of a great number of schools have convinced us that, as a rule, the local school authorities fail in carrying out those numerous details of arrangement which in the West prove so conducive to the health, comfort, and general progress of the pupils.

In speaking of ancient systems of education, Mr. NOSE maintains that in so far as the Government had anything to do with them, their main object was the training of officials. For centuries this was so much the case that until recent years to be educated at a Government school was considered a sure prelude to receiving an official appointment, and in the event of this appointment not being forthcoming the parents or guardians of the youth concerned felt aggrieved. This way of regarding education is by no means uncommon even at the present day, if not among parents and guardians at any rate among the crowds of students who year by year flock to the capital. That the number of those who obtain employment under Government is comparatively small goes without saying. The remainder find it difficult to make a living by means of the book learning they have acquired, and in the hopes of gaining some kind of celebrity wander about the country as political orators, or as leaders of agitation against the powers and things that be. Government education in ancient times, Mr. NOSE argues, left the masses out of account. It was designed for the select few. Hence that the books which were used as text-books should be full of advice to officials, should discourse of the art of government and of the sphere that official life offers for the display of the highest virtue is no cause for surprise. For the small section of the community for

whom the training was designed, and taking into consideration the despotic character of the Government in those days, the knowledge imparted by these books was not unsuitable. What is now known as *Futsu kyō-iku*, or general education, did not exist prior to the Meiji era. The only education outside the Government schools to be obtained in those days consisted of the instruction imparted by parents to their children, or what was obtainable from the *Tenarai Shisho* or writing masters. This was confined to the elements of the three Rs.

The issue in August, 1872, of a Government order on education inaugurated a new era. The system of elementary education adopted by the Government at that time was not, Mr. NOSE argues, well adapted to the needs of the country. It was the American system combined with the old Chinese method, as practised here from ancient times. The main defect of this system, Mr. NOSE contends, was that it was too complicated and too high class to suit the mental status of the masses.

A general simplification of methods and subjects took place in 1886 under the supervision of the late Viscount MORI. But even now, in Mr. NOSE's opinion the system followed needs further simplification and adaptation. He says that in every place the influence of the *shizoku* predominates over that of other classes: councillors, representatives, heads of villages, commissioners, are all of this class. And as a body, in educational matters, the *shizoku* are conservative and unpractical. They hold in deep regard a system of education that is theoretic and high-flown, but nothing beyond. They never ask whether such a system is required or not; they pay no regard to questions of economy; they delight in nothing but theorising and in appearing to be deeper than they actually are. They have the field to themselves. The mercantile classes become rich without education, the poorer classes fail to see how education can help them to become rich and hence take no interest in it whatever. Thus, according to Mr. NOSE, the education of the country is managed by a select few, who have not freed themselves from the trammels of the old way of regarding learning and its objects.

Mr. NOSE thus sums up the present situation:—"Waga kuni no kyō-iku wa chūtō shakwai, koto ni shizoku jinshu no senyubutsu to nari, masumasu kōshō ni nase, zaisan no toboshiku gakusha wo haishutsu shi, fusha no chishiki wa sōshin suru koto naku, katō jimmin wa masumasa mugaku ni ochiiru nomi." Which may be rendered thus: "Education in this country is the exclusive property of the middle classes, specially of the *shizoku*. It is rapidly becoming more and more high-class. It is producing a race of scholars who have no property, and does nothing in the way of enlightening the real owners

of property. And as for the lower orders, they are lapsing more and more into ignorance."

Mr. NOSE goes on to observe that there is no saying to what disastrous results these things may lead, whether in the minds of the uneducated lower classes, and in those of the over-educated but moneyless middle orders socialism may not find a congenial soil, and society be revolutionised by its reign. We ourselves, while entirely agreeing with Mr. NOSE as to the unsatisfactory mental condition of the youth of Japan, and while thinking that he is correct in the causes to which he attributes this state, believe that there are counter-acting influences of sufficient force to prevent the spread of socialism to any extent.

Into the numerous details of Mr. NOSE'S valuable book we have no space to enter. To the teacher and to those who have the control of scholastic affairs it cannot but prove of immense value. The practicality with which every subject is discussed is no less commendable than rare in a production of this kind.

The main point of Mr. NOSE'S book is the necessity of simplifying and adapting to Japanese means of livelihood the education of the lower orders and the middle classes. He is on the right track, but it may comfort him and those who think with him to know that, even in countries where education has been studied as a science for many decades, there is the same complaint against the unpractical nature of the information imparted in schools. A copy of *The Times* which has just reached us contains a leader on the new Educational Code; the London journal concludes with these words: "Manual training, the acquisition of artistic capacity, and the qualities which contribute to the making of a helpful citizen, are to profit at the expense of mere book knowledge. We have taken twenty years to learn the lesson that the accumulation of unpractical knowledge is a rather barren exercise for boys and girls who have to make their way in the world! but we are now in a fair way of turning the discovery to a good account."

A JAPANESE ON THE EASTERN QUESTION.

A VOLUME has just been published in London which is of interest in more than one respect. It is entitled "Japan and the Pacific, and a Japanese view of the Eastern Question." The Author is Mr. MANJIRO INAGAKI, a Graduate of Cambridge. The most striking feature about the book is that a Japanese gentleman should have the courage to undertake to discuss the Eastern Question for the English reading public. The book consists of two parts which are wholly distinct; the first, occupying about seventy pages, is devoted to a discussion of the position and power, present and future, of Japan in the

Pacific, which practically means, in the world; while the second part is nothing more than an account of that series of complicated and sometimes dangerous problems popularly called the Eastern Question. Obviously to the English reader the first part is by far the more interesting. In the preface the author says that his object has been two-fold. He desires to arouse his own countrymen to a sense of the great rôle they have to play in the 20th century, and also to call the attention of Englishmen to the important position Japan occupies in respect of British interests in the Far East. He explains that he deals, in the second part of his book, with the Eastern Question because he considers that the position of Japan in the Pacific has in effect become part and parcel of that question, and because he believes that an acquaintance with the Eastern Question will be a necessity for Japanese statesmen in the future. In the present volume he confines himself to England and Russia in Asia, but he promises to continue his investigation in regard to Eastern Europe and other countries. The volume, by the way, is dedicated to Professor SEELY, and apparently the author has been assisted by several eminent Cambridge men. At the same time it is clear from the style, and, it might even be said, from the grammar, that the book is from Mr. INAGAKI'S own pen. None of the information given in its pages is new. One cannot fail to perceive that the writer has carefully studied official and other publications relating to England and the East and to Russia; but neither in originality nor in arrangement would the book pass muster now-a-days did it come from the pen of an English author. At the same time, the views of a cultivated Japanese on his own country and especially on her foreign relations, are always interesting.

Mr. INAGAKI argues strongly, in the first place, for an alliance between Great Britain and Japan against Russia. The gist of his argument may be stated in the words with which he concludes his first chapter:—"This fact remains a certainty that will one day come to pass, that England and Russia will at some future period fight for supremacy in the North Pacific. Japan lies between the future combatants!" Commenting on the occupation of Port Hamilton by Great Britain, he observes that although that island forms the gate to the Yellow Sea, it could never become the base of operations for an attack upon Russia in the Pacific without Japanese alliance, for Japan holds the key to the situation in Tsushima, and could keep the British fleet from attacking Russia through the Japan Sea. Moreover, he says that a Japanese occupation of Fusan would render the Sea of Japan impregnable to any attack from the South. It is fair to add that these speculations of the writer are grounded upon

certain observations of Sir CHARLES DILKE in his recent work, "The present condition of European Politics." After referring to the military and naval progress of his country, Mr. INAGAKI says that Japan would be able to sever communications between Port Hamilton and either Canada or Hongkong, for "*without doubt Japan is the key of the Pacific.*" He approves, however, of the abandonment of Port Hamilton, because by that step "England not only regained a firm and complete commercial alliance, but also maintained and strengthened a political alliance against Russian attacks from Korea and indirectly from Manchuria and Mongolia." The latter appears to him the only feasible plan for a Russian attack on an Anglo-Chinese alliance. He believes that a Russian annexation of Korea would be followed by an alliance of England, China, and Japan, and might cause a second Crimean War, this time in the Pacific and not in the Black Sea.

On the commercial side of the question, Mr. INAGAKI points out that a canal of some description to connect the Atlantic and Pacific Oceans through Central America is sure to be constructed, and that Japan would then be the most important centre of trade in these regions. The Siberian railway must also add to her importance, and will lead to the inevitable construction of railways in China. "Thus," he says, "Japan has not only a splendid future before her with regard to commercial greatness, but has every chance of rising to the head of manufacturing nations. In the latter respect she has advantages over Vancouver's Island and New South Wales, her rivals in the Pacific. These advantages are her mineral reserves, her climate, abundance of good harbours, cheap labour, and her physical position enabling her to readily import raw material." He comes unhesitatingly to the conclusion that England is not able to secure absolute power in the North Pacific with her present forces and with Hongkong as a military centre but he thinks that she could hold her ground if she occupied Formosa. In regard to the strategical position of this island he gives some information, and comes to the conclusion that in all probability England will occupy it.

So much for the first part of the book. As will be seen from this summary, there is much that is academical, much that is outside the range of practical politics, and much also that is sensible and well-informed. We need take little notice of the second part, which traces the history of the Eastern Question down to the treaty of Berlin and in the last chapter discusses the situation in Central Asia. We fear that in this section of the book the author has obeyed a propensity for arranging nations as one would arrange chess-men in a combination. He thinks that England's true policy in Central Asia is to

construct a railway to India from the Mediterranean, and he winds up by saying that an alliance of England, France, Turkey, Austria, and Italy would effectively thwart Russian schemes. No doubt it would, but it would be easier for single-handed England to "thwart Russian schemes" than to secure an alliance between these five Powers. On the whole, there is a good deal that smacks of the young University man, of the Youthful Orators of the Unions of Oxford and Cambridge in Mr. INAGAKI'S book, but youth, as Mr. PARNELL said on a famous occasion, "is a fault that time invariably cures."

PUT THE SADDLE ON THE RIGHT HORSE.

PEOPLE have been known to become persuaded of the truth of a great many curious things which they were sufficiently anxious to believe, and which they repeated to themselves often enough. Charity prompts us to attribute this kind of selfish and mechanical credulity to the folks who try so hard to prove that the *Japan Mail* has created bad blood between Japanese and foreigners, and that, but for its writings, the Japanese people would give themselves no real concern about Treaty Revision. Men who profess to put faith in such absurdities cannot be expected to exercise discernment about anything else, yet surely they should be able to appreciate the unfortunate position in which they are placed by their own pretence. For they themselves habitually write, and have long habitually written, about everything Japanese in a tone of insolent contempt that would stir the pulses of the most phlegmatic people under the sun, whereas our rôle has been to protest against such writing, and to insist that it no more represents the genuine feelings of decent Englishmen than the mud on a river's bank represents the colour of the current. Is it credible that our words of remonstrance and sympathy have provoked hatred and engendered ill-feeling, whereas the harsh taunts and scornful intolerance of the other side have passed unnoticed and unresented? Then, in the matter of Treaty Revision, it is asserted that this journal is alone responsible for Japan's aspirations, and that if our columns were silent the question would be suffered to lapse into the limbo of apathy and forgetfulness. Is our influence indeed so paramount, and are the voices of our opponents so powerless? We estimate them at the value which they put on themselves, and when they assure us that it is we who have created all the commotion, whereas their own unremitting efforts to calm it have proved quite abortive, we know not which to admire more, their self-effacement, or the animosity that prompts them to strike even though they impale themselves in the act. But in

truth it were worse than idle to waste a moment's serious attention on such childish pretences. They are as futile to turn any thinking man from his purpose, or to influence the course of public events, as an atom of dust is to deflect the sun from its path. Treaty Revision will be accomplished, by negotiation or by repudiation, whatever clamour its feeble and evil-tongued opponents may raise, and its accomplishment will be welcomed most heartily by Englishmen, for neither political intrigue, nor passing fancy, nor yet the graceless virulence of journalists who parody British sentiment, can in any degree obscure the fact that Englishmen, above all Westerns, have assisted Japan to adopt her new civilization, and that England, above all Western countries, is interested in promoting that development of Japan's material resources which can only follow the removal of every restriction upon trade and industry.

Considering the overwhelming strength of the forces that make for this event, as compared with the puny and ever weakening struggles of its opponents, one experiences a strong repugnance to notice the petty bickerings and frivolous arguments still indulged in by the parasites of that now discredited form of patriotism which consists simply in truculence and intolerance. We ourselves have long learned to count the calumny and abuse of such patriots as the best compliment that could be paid to us: their applause alone would be intolerable. Yet it has seemed worth while to answer their charges of inconsistency, and we may repeat here what we have already asserted, namely, that we retract nothing of what we wrote either last year or in preceding years. We strongly advocated the adoption of Count INOUE'S scheme of Treaty Revision, not indeed in the extraordinary and impossible form which it ultimately assumed, but in its original and simple shape. We regarded it, and do still regard it, as the best settlement that could have been made at the time. Count OKUMA'S scheme was but a modification of Count INOUE'S; a modification very favourable to Japan, though it embodied the limits of the concessions which her statesmen dared to make. That scheme also we supported, holding, as we still hold, that it met the situation well. Unfortunately or fortunately—who shall decide?—some of the Great Powers hesitated to accept it, and while they waited, Japanese public opinion grew more and more resolute, until at length the scene witnessed in 1887 was repeated on a much larger scale in 1889. We said then, and we now repeat, that, in our opinion, it would have been far better for Japan could she have reconciled herself to Count OKUMA'S compromise, and that by rejecting it at the eleventh hour she did herself great injury. But the fact is that she did reject it, and that any Cabinet now proposing to employ foreigners on the Japanese bench as

a guarantee to Foreign Powers, could not remain in office for 24 hours. On the other hand, the longer the treaties are left unrevised, the longer the present system of restricted intercourse is continued, the bitterer will Japan's feeling grow, and the less liberal will be the terms she can be persuaded to offer. "Let her wait," say the opponents of Revision. Aye, truly, let her wait, when the first item in the programme of every political party in the country is Treaty Revision, and when the conduct of the affair is about to be virtually transferred from the hands of liberal and patient statesmen into those of men who know only what treatment free countries in the West are entitled to expect, and who desire nothing better than to arraign the Government's failure to secure that treatment for their own country. Let her wait, until the sentiment of umbrage now thrusting itself into her daily intercourse with foreigners, ripens into a likeness of the antipathy that grew up in mediæval times, and until history verifies the old adage by repeating its most disagreeable incidents. Let her wait by all means, while fools build a paradise for their kind, and malevolent babblers accuse the barometer of producing the storm which it predicts.

LAW OF MEETINGS AND POLITICAL ASSOCIATIONS.

LAW No. 53.

We hereby give our sanction to the present Regulations relating to the Law of Meetings and Political Associations (*Shukwai oyobi Seisha-ho*), and order the same to be promulgated.

(His Imperial Majesty's Sign-manual.)
(Great Seal.)

Dated July 25th, 1890.

(Countersigned)

COUNT YAMAGATA ARITOMO,
Minister President of State.

COUNT SAIGO TSUKUMICHI,
Minister of State for Home Affairs.

Article 1.—"Political Meetings" in this law mean meetings assembled in public for the delivery of lectures and the discussion of matters relating to politics, whatever such meetings may be called; "political associations" include all organized bodies with objects relating to politics, whatever names such associations may bear.

Article 2.—Each political meeting shall be arranged for by a projector.

When it has been decided to hold a meeting, the projector shall intimate the fact to the police station of the district where the place of meeting is, 48 hours before the opening of the meeting.

On such intimation being made the police station shall at once acknowledge its receipt of the same.

The place and date, the name of the projector of the meeting, as well as the names, residences and ages of the speaker or lecturers, shall be mentioned in the above letter of intimation (*todokeho*), and the signature and seal of the projector shall be affixed to the same.

The effect of the intimation (*todoke-ide*) shall cease, if the meeting be not opened within 3 hours after the period mentioned in the same.

Article 3.—No person other than adult male subjects of Japan in the possession of public rights (*koken*) can be the projector of a political meeting.

Article 4.—Soldiers of the army or seamen of the navy, on service, or with the first and second reserves when mobilized, police officials, instructors and students of Government, public and private schools, infants and women, are not permitted to assemble in political meetings.

In the case of meetings which may be opened to make preparations for the election of members of

an assembly organized by law, the restrictions of this article which shall not apply to those who have the right of electing or of being elected, during the thirty days which precede the date of voting.

Article 5.—No foreigner can speak or lecture in political meetings.

Article 6.—No political meeting can be held in the open air.

Article 7.—Should it be intended to assemble in public or to hold a procession in the open air, the projector of the same shall intimate the place of assembly, the date, and the road through which it is intended to pass, to the police station of the district, 48 hours beforehand and obtain permission for the same. This regulation shall not, however, apply to festivals, religious celebrations or clubs, the games of students or other occasions which are recognized by custom and usage.

Police stations may not give permission should injury to peace and order be apprehended.

Police stations may prohibit meetings and movements of crowds in the open air in any case, should the same be deemed injurious to peace and order.

Article 8.—No meeting or movement of a crowd (procession) in the open air is allowable during the time from the opening till the close of the Houses, within a radius of three miles of the Imperial Diet. The additional sentence of paragraph 1, Article 7, shall also be applied in the case of this Article.

Article 9.—A police station may detail constables in uniform who shall attend political meetings and regulate the same.

Projectors of political meetings shall supply to the police attending the meetings any seats demanded by them, and shall answer whatever questions relating to such meetings may be asked by them. The attendance and superintendence of the police referred to in the first paragraph of this article may take place in the case of meetings deemed to be injurious to peace and order.

Article 10.—No person can attend any assembly, carrying arms or lethal weapons. Persons who carry arms in accordance with regulations are, however, excepted.

Article 11.—No meetings are permitted to be held where speeches are delivered to shield criminals, or to protect or congratulate persons guilty under the criminal law, or persons *pendente lite* of a Criminal Court, or to instigate the commission of crime.

Article 12.—Police officers may challenge any who wilfully conduct themselves in a tumultuous or turbulent manner, and if such do not observe their orders may expel them from the hall.

Article 13.—Police officers may order the dissolution of a meeting in the following case:—

- (1). When the existence of the meeting is a contravention of any of the provisions of this law.
- (2). When Article 11 is contravened, or the meeting is deemed to be injurious to peace and order.
- (3). When the attendance of the police is opposed, or their seats are not provided at their request, or their questions are not answered.
- (4). When the persons assembled are tumultuous, and do not become quiet when ordered to do so.
- (5). When a number of persons contravene Articles 4 and 10 and do not observe the orders of the police to leave the hall.

Article 14.—Should political meetings be held without the communication mentioned in Article 2 being made, the projectors shall be punished by fines of not less than *yen* 10 and not more than *yen* 100; and the persons who lease the hall shall be similarly punished.

Article 15.—Should the information mentioned in Article 2 be false, projectors shall be punished as prescribed in the previous article.

Article 16.—Any person who contravenes Article 3, or who assembles in contravention of Article 4, and any projector who does not prohibit them from doing so, shall be punished by fines of not less than *yen* 2 and not more than *yen* 20.

The penalty on projectors who contravene Article 5 shall be similar to that in the last paragraph. Projectors who cause persons prohibited from assembling in a political meeting, to so assemble by enticing or inducing them, shall be liable to punishment one degree heavier than that mentioned in paragraph 1 of this Article.

Article 17.—Projectors and speakers who contravene Article 6 shall be punished by minor imprisonment for not less than 11 days and not more than 6 months, or by fines of not less than *yen* 5 and not more than *yen* 50.

Article 18.—For contraventions of Article 7, projectors or instigators shall be punished by fines of not less than *yen* 10 and not more than *yen* 100.

Article 19.—For contraventions of Article 8,

projectors and instigators shall be punished by minor imprisonment for not less than 11 days and not more than 6 months, or by fines of not less than *yen* 10 and not more than *yen* 100.

Article 20.—Contraventions of Article 10 shall be punished by minor imprisonment for not less than 11 days and not more than 6 months; projectors who fail to prohibit such contravention shall be similarly punished.

Article 21.—Contraventions of Article 11 shall be punished by fines of not less than *yen* 20 and not more than *yen* 200, or by minor imprisonment for not less than 1 month and not more than 6 months.

Article 22.—Persons who refuse to leave a meeting when ordered to do so or who refuse to obey the orders of the police dissolving a meeting, shall be punished by minor imprisonment for not less than 11 days and not more than 6 months, or by fines of not less than 2 *yen* 20.

Article 23.—Political associations shall be controlled by officials (*yakunin*).

Each political association shall intimate its name, its officials, and members to the police station of the district where its office is situated, through the medium of its officials within three days after its formation. The same process is necessary when any change occurs in the matters to be reported as above.

Police stations shall at once intimate the receipt of the information above mentioned.

Officials shall answer whatever questions relating to the association the police may ask.

Article 24.—When a political association shall open a meeting for the delivery of political speeches, Article 2 shall be observed. Meetings held at fixed times, and the places and speakers of which are settled beforehand, need not be reported to the police when intimation has been made of the first meeting, always provided such intimation be made 48 hours before the first meeting. Should changes occur in the matters to be reported, Article 2 shall be observed.

Article 25.—Soldiers or seamen on service, or in the first or second reserve when the same are mobilized, police officials, instructors, and students of Government, public and private schools, infants, women, and males who do not possess public rights, may not become members of political associations.

Article 26.—Foreigners are prohibited from becoming members of political associations.

Article 27.—Political associations may not use marks or flags.

Article 28.—Political associations may not influence the public by issuing documents or sending deputies, or establish branch offices or combine and correspond with other political associations.

Article 29.—No political association is permitted to establish rules making members of any assembly organized by law responsible for their utterances or votes outside said assembly.

Article 30.—Should any political association be deemed injurious to peace and order the Minister of State for Home Affairs may suspend or prohibit it; should such association fail to dissolve when ordered, the offenders shall be punished by minor imprisonment for not less than 2 months and not more than 2 years, or by fines of not less than *yen* 20 and not more than *yen* 200.

Article 31.—Should the necessary report (*todokeide*) of a political association be omitted, or the questions of the police be not answered, in contravention of Article 23, the officials shall be punished by fines of not less than *yen* 10 and not more than *yen* 100.

Should the information mentioned in Article 23 be false, or a false answer be given to any question, punishment one degree heavier than that mentioned in the last paragraph shall be inflicted.

Article 32.—Persons who have become members of any political association, or officials who have caused them to do so, in contravention of Article 25, shall be punished by fines of not less than *yen* 2 and not more than *yen* 20.

Officials who contravene Article 26 shall be similarly punished.

Article 33.—Persons who use marks or flags, in contravention of Article 27, as well as officials of the association concerned, shall be punished by fines of not less than *yen* 2 and not more than *yen* 20.

Article 34.—For contraventions of Article 28 the offending officials or deputies shall be punished by minor imprisonment for not less than 1 month and not more than 1 year, or by fines of not less than *yen* 5 and not more than *yen* 50.

Article 35.—Persons who are actually officials of associations or projectors of meetings shall be conjointly responsible as officials or projectors, without respect to the name used, whether such name be that of one person or of several and other persons.

Article 36.—Offences against this law shall not be treated under the rule as to simultaneous offences (*susai gukatsu*).

Article 37.—The period of prescription for prosecutions under this law shall be 6 months.

Article 38.—Meetings regulated by laws and ordinances shall not be dealt with under this law.

AMENDED ORGANIZATION OF CUSTOM HOUSES.

IMPERIAL ORDINANCE No. 142.

We hereby give our sanction to the present Amendment of the Organization of Custom Houses, and order the same to be promulgated.

[His Imperial Majesty's Sign-manual.]
[Great Seal.]

Dated July 24th, 1890.

(Countersigned)

COUNT YAMAGATA ARITOMO,
Minister President of State.

COUNT MATSUKATA MASAYOSHI,
Minister of State for Finance.

Article 1.—Custom Houses shall be under the superintendence of the Minister of State for Finance, and shall deal with business connected with customs.

Article 2.—The following officials shall be attached to the various Custom Houses of the empire:—

Superintendents	6 <i>Sonin</i> rank.
Vice-Superintendents	2 <i>Sonin</i> rank.
Chief Appraisers (<i>Kwantei-kan</i>)	5 <i>Sonin</i> rank.
Probationers for the office of Chief Appraiser (<i>Kwantei-kan shiho</i>)	5
<i>Zoku</i>	207
Appraisers (<i>Kwantei-ri</i>)	21 <i>Hannin</i> rank.
Inspectors (<i>Kwan-ri</i>)	24 <i>Hannin</i> rank.
Assistant-Inspectors	274 Six <i>Hannin</i> rank.

Article 3.—Superintendents of Custom Houses shall be under the guidance and control of the Minister of State for Finance, and shall have control of affairs relating the respective Custom Houses.

Article 4.—Vice-Superintendents of Custom Houses shall be officials of rank below that of the superintendents whom they are to assist, shall be attached one each to the Custom Houses of Yokohama and Kobe, and shall render assistance to the Superintendents of such offices, and discharge the latter's duties should they be prevented by some cause from doing so.

Article 5.—Chief Appraisers shall be guided and controlled by the Superintendents, and shall discharge duties relating to the examination and appraising of goods.

Chief Appraisers may in addition discharge the duties of heads of offices (*kwaicho*).

Article 6.—*Zoku* shall be under the control of their respective superiors, and shall discharge duties pertaining to records, accounts, and book-keeping.

Article 7.—Appraisers shall be under the orders of their respective superiors, and shall be engaged in the examination and appraising of goods.

Article 8.—Inspectors shall be under the control of their respective superiors, and shall deal with affairs connected with the prevention of smuggling and the non-payment of taxes (*datsu-wei*) having control over assistant-inspectors.

Article 9.—Assistant-Inspectors shall assist inspectors in their duties.

IMPERIAL ORDINANCE No. 144.

We hereby give our sanction to the present Regulations relating to the appointment of Inspectors and Assistant Inspectors of Custom-Houses, and order the same to be duly promulgated.

[His Imperial Majesty's Sign-manual.]
[Great Seal.]

Dated July 24th, 1890.

(Countersigned)

COUNT YAMAGATA ARITOMO,
Minister President of State.

COUNT MATSUKATA MASAYOSHI,
Minister of State for Finance.

The Minister of State for Finance may frame and issue regulations providing for the special examination and appointment of Inspectors and Assistant Inspectors of Custom-Houses, and officials so examined and appointed may not, without passing the ordinary examination, be transferred to other *hannin* offices.

AMENDED MINING REGULATIONS.

LAW No. 55.

We hereby give our sanction to the present Amendment of the Mining Regulations, and order the same to be promulgated.

(His Imperial Majesty's Sign-manual.)
(Great Seal.)

Dated July 29th, 1890.

(Countersigned)

COUNT YAMAGATA ARITOMO,
Minister President of State.
MUTSU MUNEMITSU,
Minister of State for Agriculture and Commerce.

The Law as to Mining Operations shall be amended to the following effect:—

Chapter II., Art. 5.—Persons desiring permission to commence experimental mining operations shall submit to the Minister President of State a petition to that effect, with plans and sketches. Should two or more petitions be presented in reference to the same piece of land, one of which is by the owner of such land, the petition of such owner shall be granted in preference to others.

Chapter III., Art. 9.—Persons desiring permission to lease a mine shall present a petition to that effect to the Minister President of State, with relative plans and sketches. Should it be difficult to present the plans and sketches at the same time as the petition, they may be submitted within thirty days after the presentation of the petition. The petition, however, shall be void in the event of the plans and sketches not being presented within that period. The area for permission to work which a petition is presented, shall be in the case of coal over 10,000 *tsubo*, and in the case of other minerals over 3,000 *tsubo*, and the maximum area shall be 600,000 *tsubo*.

Art. 10.—Persons presenting petitions for the lease of a mining area must prove the existence within such district of the mineral which it is intended to exploit. Permission may not be granted should the Minister of State for Agriculture and Commerce not be convinced of the existence of the mineral, or should he deem the experimental or mining operations to be injurious to the public interest; and in such case also he may withdraw and annul permission previously given. Should any person who has applied for permission to conduct experimental operations or to commence mining operations be dissatisfied or aggrieved by the operation of the last provision, he may lay the matter before the Administrative Court. In this case, however, damages may not be sued for. Should it appear that license to commence experimental or mining operations has been obtained by false representation or by mistake, the Minister of State for Agriculture and Commerce may withdraw the permission so obtained. Any person interested in the matter may, by memorial to the Minister of State for Agriculture and Commerce, call attention to such irregularities. Persons aggrieved by the action of the Minister of State for Agriculture and Commerce in regard to the foregoing provisions may lay the matter before the Administrative Court.

Chapter V., Art. 22.—With the permission of the local chief, persons desiring of filing a petition for leave to commence experimental or mining operations may make measurement of other or adjoining lands; but such persons must make good any damage caused in so doing. Should it be necessary to use other or adjoining lands for (1) opening a mine shaft; (2) depositing ore, &c.; (3) cutting a tunnel or road, or laying a tramway or railway, or making a canal, ditch, or reservoir; or (4) erecting offices necessary for mining operations, conference shall be had with the owner of such other or adjoining lands; and should such conference be ineffective, the decision of the Minister of State for Agriculture and Commerce shall be obtained. No owner of, or person connected with such land, can take objection to a lease granted on the decision of the Minister of State for Agriculture and Commerce. Persons who conduct experimental or mining operations shall pay reasonable compensation for the land they have used. Should any one having a license to begin experimental operations, or having a lease of a mining area, intend to occupy the land for over three years, or to alter the character of the land, or erect buildings on it, he may at the request of the owner of such land be required to purchase the same.

In reference to the use and purchase of land Arts. 18, 19, 20, 21, 22, 23, 24, 25, par. 1, of Art. 26, and Arts 34, 35, 36, and 37 shall be applicable.

THE CENTRAL METEOROLOGICAL OBSERVATORY.

IMPERIAL ORDINANCE No. 156.

We hereby give our sanction to the present Regulations relating to the Amended Organization of the Central Meteorological Observatory, and order the same to be promulgated.

(His Imperial Majesty's Sign-manual.)
(Great Seal.)

Dated August 2nd, 1890.

(Countersigned)

COUNT YAMAGATA ARITOMO,
Minister President of State.
COUNT SAIGO TSUKUMICHI,
Minister of State for Home Affairs.

Article 1.—The Central Meteorological Observatory shall be under the superintendence of the Minister of State for Home Affairs, and deal with the following subjects:—

- (1.) Meteorological Observations;
- (2.) Meteorological Reports.
- (3.) Meteorological Investigations.
- (4.) Examination of apparatus used in Meteorological Observations.
- (5.) Weather Reports.
- (6.) Hurricane Reports.
- (7.) Measurement of earthquakes.
- (8.) Measurement of the magnetism in the earth.
- (9.) Measurement of electricity in the atmosphere.
- (10.) Measurement of the atmosphere.

Article 2.—The following officials shall be attached to the Meteorological Central Observatory:—

A Chief.
Engineers.
Engineer Probationers.
Gishu.

Article 3.—The Chief of the Observatory shall be an engineer, and shall superintend the affairs of the observatory, and control his subordinate officials under the guidance of the Minister of State for Home Affairs.

Article 4.—Engineers shall be of *souin* rank, and their settled number 4. They shall take respectively a share in the work of the observatory under the guidance of the Chief. There shall be one engineer probationer.

Article 5.—*Gishu* shall be of *kannin* rank and their settled number 15. They shall take a share in the work of the observatory under the guidance of their superiors.

Article 6.—Clerks shall be of *kannin* rank and their settled number 5. They shall deal with miscellaneous business under the guidance of their superiors.

Article 7.—The division of business shall be decided by the Minister of State for Home Affairs.

CORRESPONDENCE.

"SECULARIAN'S" LETTER.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—In your issue of the 29th ult. appears a letter written by "Secularian" in which the recent utterances of Bishop Newman are severely criticised. In reading that letter I must confess that I was much surprised and pained, surprised at the bald and inaccurate assertions it contained, and pained at the unjust, unkind, and deeply censorious spirit which the writer manifested. I pray that "Secularian's" heart may yet be touched by the power of God, and that his eyes may be opened to the truth. Then he will know that Christianity is not a vicious institution, the enemy of progress and a curse to humanity. In the light of history how can an intelligent man utter such words as these:—"We have only to be thankful that the tares of Christianity have not utterly choked the good seed of humanity." With all due respect to "Secularian," I must affirm that such words savour much more strongly of blind prejudice and bitter hatred than of calm intelligence and dispassionate reason. At any rate, they indicate the absence of that breadth and liberality of spirit and fairness of mind which the enemies of Christianity are wont to claim for themselves. I freely admit that Christians are but human beings and as such are liable to err, and the history of the Churches bears testimony to many glaring inconsistencies, but, whatever else can be said, certainly it can not be said that true followers of Christ are misanthropes, and I appeal to "Secularian's" own experience in defence of the

statement. I am persuaded that a lack of proper discrimination in the use of the term "Christian" led to the above rash and unadvised statement. When reference is made to "fires of persecution lighted by Christians," the implication is that a spirit of religious intolerance is the common heritage of all followers of Christ. But in reality that sect of so-called Christians who kindled these fires is the sect which has substituted traditions of men and conciliatory decrees for the Word of God, viz., Romanists, and those Christians who manifested the greatest intolerance after the overthrow of Romish supremacy were those who were nearest to Rome in ritual, polity, and sympathy, and furthest from the Bible. Religious intolerance and persecution are utterly at variance with the teachings and spirit of Christ. Then, because some who are called Christians, but who have openly forsaken the teachings of Christ, have been guilty of shameful persecution, is it right to stigmatize the whole body of Christians as religious bigots and persecutors? Let there be a judicious discrimination in the use of the word "Christian." Let it be remembered also that Church connection is by no means synonymous with Christianity, but that no one is a Christian until he is born again regenerated by the power of God. I boldly assert, without fear of contradiction, that an unconverted church-membership is one of the great curses of the world.

Now let us examine some of the remarkable statements made by "Secularian." He says: "Infidelity has quenched the fires of persecution lighted by Christians." Of course reference is made here to modern infidelity, for Julian the Apostate may be considered the last representative of ancient infidelity. Modern infidelity takes its rise in the seventeenth century in the person of Lord Herbert of Cherbourg, whose writings were philosophical and original, but contained no polemics against Christianity. After Herbert came Hobbes, Blount, Locke and others whose writings were deistical rather than atheistic, and in which were advocated very strongly many of the fundamental tenets of Christianity. And not till after the middle of the eighteenth century were there any writers to whom the appellation "infidel" seemed peculiarly fitting, the days of Hume, Gibbon, and Paine. But by this time "the fires of persecution lighted by Christians" had almost ceased to burn. The great Reformation had been accomplished, the inquisition and rack had been shorn of their power, and the great battle for religious freedom was practically ended. And what part did infidelity take? None. When the battle was raging fiercest, infidelity was yet unborn. Freedom of thought and of religious conviction are conditions absolutely necessary to the existence of infidelity. The very meaning of the term as popularly employed implies freedom of belief. How then can it be instrumental in gaining religious freedom or quenching the fires of Christian persecution? The conduct of Galileo and his retraction before the dreaded Inquisition illustrates the behaviour of a free-thinker when confronted by a narrow, bigoted, ecclesiastical hierarchy. Exoneration from religious bigotry was gained by Tyndall, Luther, Calvin, Knox, and their noble coadjutors, many of whose bodies were burned at the stake, and not by infidelity. The freedom from intolerance that we now enjoy was bought at the price of martyrs' blood, and there is not that in infidelity which makes martyrs.

Again, "Secularian" claims that "infidelity has abolished the fiendish treatment of old women for the Bible-created offence of witchcraft ('Thou shalt not suffer a witch to live,' Exodus 22:18.). Just here it is worthy of remark that the words "witch" and "witchcraft" do not properly occur in the Bible at all. Exodus 22:18, is wrongly translated in the King James common version. The Hebrew literally rendered would read, "A female practitioner of magic thou shalt not suffer to live," and in the Revised Version it reads, "thou shalt not suffer a sorceress to live." In Exodus 7:11, it is recorded, "Then Pharaoh also called for the wise men and the sorcerers; and they also, the magicians of Egypt, did in like manner with their secret arts." The Hebrew word here translated "sorcerers" is the masculine form plural number of the word which King James' translators rendered "witch." And in every instance in which the word "witch" or "witchcraft" occurs in the common version it is a translation of this same Hebrew word or its derivative. Hence I say that these words do not properly occur in the Bible. Sorcery, divination, augury, and kindred practices are strongly condemned both in the Old and New Testaments, and on just grounds. The nations which surrounded the Israelites were guilty in a remarkable degree of just such abominations, and the enactment and enforcement of very stringent laws were necessary

to prevent Israel's lapse into the same. The grand, central idea of the religion of the Israelites was monotheism, and around this cardinal truth all their laws, ordinances, and restrictions clustered. Now the use by an ignorant and superstitious people predisposed to idolatry, of such degrading and deceptive arts as divination, sorcery, &c., was a practical abandonment of monotheism and could not be tolerated. The sin of divination was classed with that of rebellion, 1 Sam. 15:23. Hence the wisdom of punishing, under the circumstances, such crimes with death is easily demonstrable. Then to say that witchcraft is a "Bible created offence" is certainly unjust and ill-timed; yea more, it is untrue. That a wrong interpretation of the Bible did for many years lend support to the punishment of witches is an indisputable fact, and constitutes one of the dark blots upon the pages of history. But in the name of justice do not ascribe to the Bible the follies and crimes of a people who did not understand it. But the punishment of witchcraft has been discontinued, and the question arises what led to its abandonment? Certainly infidelity did not. It is the result of scientific investigation and a better understanding of God's Word. But that is not infidelity, nor anything resembling it. Infidelity is too ready to arrogate to itself a monopoly of free thought, and herein it exhibits a narrowness even surpassing that ascribed to Christians.

The last remarkable claim that "Secularian" makes for infidelity which I shall notice is this: "infidelity has fought for and won that privilege of thinking and writing freely which has given so great an impetus to progress in the present age." I am constrained to ask, how does "Secularian" read history? If infidel writers fought for and won the great privilege of free-thinking and writing, certainly historians have been delict in recording their names. The revival of learning of which the nineteenth century with its boasted achievements is the result, began in the fourteenth century, perhaps two hundred and fifty years before the first germ of infidelity was known. John Wycliff, the first great apostle of learning and free-thought, did more perhaps for the intellectual freedom of England than any other man, and his greatest work was the translation of the Bible into the vernacular of the English people. Then followed such scholarly men as Tyndall, Colet, Erasmus, and others in England. In Germany John Reuchlin was among the first to rise up and throw off the fetters of ignorance and superstition, the heritage of the "dark ages." All of these were but "reformers before the Reformation," and prepared the way for Luther and his contemporaries. Then came the life and death struggle, the result of which would turn the destiny of the world, the struggle between religious intolerance, intellectual thralldom, ignorance and superstition on the one side, and the liberty of conscience, free-thought, speech, and belief on the other. The latter won, and the world has been blessed, and infidelity, "seeing that these things are good, now comes in and claims the harvest," whereas the brunt of battle was borne before infidelity was conceived of. Now let me say a word or two in regard to "Secularian's" interpretation of the Bible respecting slavery and the position of woman. He quotes Lev. 25: 44-46, in proof of the assertion that the spirit and teaching of the Bible give their support to slavery. First, let me observe that "Secularian's" method of interpretation is exceedingly unjust, and very frequently leads to inaccurate conclusions. He first wrests his passage from the context, and then puts a literal construction thereon, and in this way extorts a meaning that harmonizes with his preconceived opinions. Restoring Lev. 25: 44-46 to its immediate context, we ascertain that Moses is interdicting the enslavement of one Israelite by another. He says, "If thy brother be waxen poor with thee, and sell himself unto thee; thou shalt not make him to serve as a bond-servant: as an hired servant, and as a sojourner, he shall be with thee." He then continues to say that if the Israelites wanted bond-servants they must buy them of the surrounding nations and from the strangers sojourning among them, for it was forbidden for one Israelite to bring another into bondage. All that can be said of this passage is that Moses recognized slavery as an existing institution. He neither advocates nor condemns it, but he does restrict it, and in this restriction is the promise and prophecy of subsequent condemnation. The world was not yet ready for the abolition of slavery, and Moses was wise enough to recognize it, and legislate accordingly, but the very restriction that he threw about it indicates that he perceived its harmful tendency. So in the days of Christ and his Apostles the world was still unprepared to see slavery abolished, and was only prepared by the benign and elevating influences

of the Gospel working through eighteen hundred years. Christ taught the brotherhood of man, and this idea when properly developed and understood tends to obliterate all caste distinction.

In regard to the elevation of woman practically the same line of argument can be followed. In Dent. 29: 1, Moses provides for "a bill of divorcement" in case a woman does not "find favour" in the eyes of her husband. It is also true that polygamy was practised, a most degrading custom. But here also we find in the law of divorce a most wholesome restriction upon the loose and licentious practices of the times, and a recognition of woman's true worth and promise of future elevation. This idea continued to grow and spread until the world was prepared for the lofty teaching of Christ on the subject. In Matt. 5: 17, the words of Christ are: "Think not that I came to destroy the law or the prophets; I came not to destroy but to fulfil." To fulfil means to fill full. Hence, Christ's avowed purpose is not to destroy, but to fulfil the law, develop it, carry it farther in the same direction. Christ then proceeds to give a sort of running commentary on the law of divorce: "It was said also, whosoever shall put away his wife, let him give her a writing of divorcement: but I say unto you, that every one that putteth away his wife, saving for the cause of fornication, maketh her an adulteress: and whosoever shall marry her when she is put away committeth adultery." Matt. 5: 31 and 32. Again: "And they said, Moses suffered to write a bill of divorcement, and to put her away. But Jesus said unto them, for your hardness of heart he wrote you this commandment;" Mark 10: 4 and 5. In regard to 1 Tim 2: 11, Paul, recognizing a common weakness of humanity, warns women against making a display of jewelry and fine dress and exhorts them to "adorn themselves in modest apparel," and also forbade them speaking in public. Nothing degrading in this. And be it remembered that woman has maintained her present rank and dignity in observing these very commands which certainly is a practical disproof of their tendency to degrade. So I am still convinced that the teachings of Christ by revealing the true worth and dignity of the human soul have been largely efficacious in "striking the gyves" from the slave and in elevating woman.

JNO. A. BRUNSON.

151, Hill, Kobe, August 4th, 1890.

MR. HOSIE'S TRAVELS IN WESTERN CHINA.

Three Years in Western China: a Narrative of Three Journeys in Szechuan, Kweichow, and Yunnan. By ALEXANDER HOSIE, H.B.M. Consular Service, China. With an introduction by Archibald Little, F.R.G.S. 1890: George Philip & Son, London.

This volume is published at a most appropriate moment. Owing to the arrangement recently concluded by Sir John Walsham for the partial opening of Chungking to British trade, people want to know more about Western China, its trade, productions, routes, and, so to speak, in the nick of time, Mr. Hosie comes forward to answer the questions which commercial communities at home are asking. No one can do so with more authority; for he resided in Western China for three years for the special purpose of investigating topics of interest to foreign trade. He succeeded the late Mr. Baber as Consular Agent at Chungking, and in the course of his duty travelled over five thousand miles, with the intelligent eyes and the keen appreciation of what was important to his mission, which we are in the habit of expecting from members of the British Consular Service in the East. In addition to the special commercial objects of all his journeys, Mr. Hosie studied much else that came within the range of his observation—the scattered aboriginal tribes all over Western China, of which we know so little, and yet which if thoroughly studied would seem capable of revealing so much to the ethnologist and student of the world's history; Mount Omei, the Mecca of Buddhism in Western China since the eight century of our era, and much else of a similarly varied and interesting character. Mr. Hosie's book is not perhaps like Mr. Baber's famous records of his travels in the "Supplementary Papers" of the Royal Geographical Society, for the latter is one of the half dozen most charming books of travel in the language—the late Sir Henry Yule always complained that the press and public took it for a Blue-book because the cover was blue—but the more recent author gives us abundance of information of the kind which we urgently want just now, and gives it and much else of an interesting de-

scription in an entertaining and attractive way. The publishers have also been fortunate in inducing Mr. Archibald Little to write an introduction explaining to the public the causes of the recent convention respecting Chungking, and the value to trade which the concession will be.

The book is mainly occupied with the record of three journeys from Chungking as the centre. Adopting Mr. Little's general summary of these, it may be said that the first, occupying sixty-eight days in the spring of 1882, led due south from Chungking through the province of Kwei-chow, the "Chinese Switzerland," and home of the Miao-tse or aboriginal inhabitants, now almost exterminated by the Chinese, to Kuei-yang Fu, the capital, thence to Yunnan Fu, the metropolis of Yunnan, and from there back to Chungking across the mountains of north-eastern Yunnan, and down the Nan-kwang river to the Yangtze. It was on this journey that Mr. Hosie first met with the white-wax insects, the rearing of which forms, with that of the silk-worm, one of the most interesting illustrations of the ingenuity of the Chinese in applying the minute labours of insects to wholesale industrial purposes. His next journey occupying from February to July, 1883, covered a much larger extent of ground, and enabled him to describe a still more interesting region. Setting out from Chungking in a north-westerly direction, he traversed the celebrated plain of Cheng-tu, the one large expanse of level ground in Western China, a plateau situated one thousand feet above sea level, at the foot of the Tibetan mountains, containing an area of 2,400 square miles, and a population of about three and a half millions, of which Baron von Richthofen, who visited it in 1872, thus speaks:—"There are few regions in China that, if equal areas are compared, can rival with the plain of Cheng-tu Fu as regards wealth and prosperity, density of population and productive power, fertility of climate and perfection of natural irrigation, and there is no other where, at the present time, refinement, and civilisation are so generally diffused among the population." Thence Mr. Hosie turned south-west past the country of the Lolo, that unique aboriginal tribe described by Francis Garnier and by Colborne Baber, to the renowned valley of Chien-chang, which Baber, who visited it in 1877, and Colonel Yule, who has so painstakingly traced each step of the Great Venetian, have identified as Marco Polo's Cain-du, the chief place of birth and early development of the white-wax insect, before he is transported, by running coolies who travel only by night, for his finishing "education" to the prefectural district of Kia-ting, 200 miles to the north-east; thence past the snow-capped mountains of the Tsang-shan and the "Sun-bridge" across the Gold-dust river (as the Yangtze is here called) to Tai-li Fu, the peerless capital of Western Yunnan, the Carajan of the great Marco. From this point Mr. Hosie turned his face homewards, and passing east again through Yunnan Fu, the eastern capital of the province, and thence north by the valley of the Ch'i-hsing to the navigable Yangtze river, he once more reached Chungking after six months' absence. Mr. Hosie's third journey was made in the summer of 1884, mainly with a view to collecting information upon the subject of Chinese Insect Wax, for the benefit of the Royal Gardens at Kew. He passed up the valley of the Kia-ling, the river which, coming from the north, falls into the Yangtze under the walls of Chungking; the main river, and this, its affluent, combining to form the narrow peninsula upon which the city stands. Three days' march brought him to the mart of Ho-chow, situated at the junction of the Fu river, an affluent that here flows into the Kia-ling from the west, and celebrated for its manufactures of Soy, made from the Soy bean, large plantations of which exist in the neighbourhood; hence through highly cultivated, typical Szechuan luxuriance, to the districts of Kia-ling and O-mei, in which flourish the celebrated white wax trees—a species of ash known to the Chinese as the Pai-la-shu. From this point he made the ascent of the great mountain of O-mei, a region entirely devoted to the worship of Buddha, to whom the mountain is said to have been exclusively dedicated by the pious Emperors of the Tang dynasty, in the eighth century of our era; the oldest shrine dating as far back as the Chin dynasty, A.D. 265. Descending the precipitous slopes of the great O-mei mountain, which towers among the clouds, a vast limestone rock eleven thousand feet high, Mr. Hosie turned south across a poor, mountainous country to the banks of the Golden river, which he descended from a point situated fifty miles above Blakiston's highest. He and his party suffered considerable hardship in this journey, being all struck down by fever, to which one of them, the native groom, unfortunately succumbed.

The story of the extraordinary career of the white

wax insect from its cradle to a somewhat dishonoured grave is told in a special chapter, and records one of those curious industries for which the Chinese are celebrated. In March he found attached to the bark of the boughs and twigs of the large-leaved privet numerous brown pea-shaped excrescences. The larger excrescences or scales were readily detachable, and, when opened, presented either a white-brown pulpy mass, or a crowd of minute animals like flour, whose movements were only just perceptible to the naked eye. He plucked the scales from the trees and on opening them found a swarm of brown creatures, crawling about, each provided with six legs and a pair of antennae. Each of these was a white wax insect. Many of the scales also contained a small white bag or cocoon covering a pupa, or perfect imago in the shape of a small black beetle. If left undisturbed in the broken scale the beetle, which, from his ungainly appearance, is called by the Chinese the "buffalo," will, heedless of the cocci which begin to crawl outside and inside the scale, continue to burrow in the inner lining of the scale, which is apparently his food. The Chinese declare that the beetle eats his minute companions in the scale, or at least injures them by the pressure of his comparatively heavy body. Thien-chang valley is the great insect producing country. Two hundred miles to the north-east, and separated from it by a series of mountain ranges, is the prefecture of Chia-ting, within which insect white wax as an article of commerce is produced. In the end of April, the scales are gathered in the Chien-chang valley, and collected for the most part at the town of Te-chang, on the right bank of the An-ning River. To this town porters from Chia-ting annually resort in great numbers—in former years they are said to have numbered as many as ten thousand—to carry the scales across the mountains to Chia-ting. The scales are made up into paper packets, each weighing about sixteen ounces, and a load usually consists of about sixty packets. Great care has to be taken in the transit of the scales. The porters between the Chien-chang valley and Chia-ting travel only during the night, for, at the season of transit, the temperature is already high during the day, and would tend to the rapid development of the insects, and their escape from the scales. At their resting places, the porters open and spread out the packets in cool places. Notwithstanding all these precautions, however, each packet, on arrival at Chia-ting, is found to be more than an ounce lighter than when it started from Chien-chang. In years of plenty, a pound of scales laid down in Chia-ting costs about half-a-crown; but in years of scarcity, the price is doubled.

West from the right bank of the Min River, on which the city of Chia-ting lies, stretches a plain to the foot of the sacred Omei range of mountains. This plain is an immense rice-field, being well-watered by streams from the western mountains. Almost every plot of ground, as well as the bases of the mountains, are thickly edged with stumps, varying from three or four to a dozen feet in height, with numerous sprouts rising from their gnarled heads. These resemble, at a distance, our own pollard willows. The leaves spring in pairs from the branches; they are light green, ovate, pointed, serrated, and deciduous. It is to this, the great home of the wax tree, that the scales are carried from the Chien-chang valley. On their arrival, about the beginning of May, they are made up into small packets of from twenty to thirty scales, which are enclosed in a leaf of the wood-oil tree. The edges of the leaf are tied together with a rice-straw, by which the packet is also suspended close under the branches of the wax tree. A few rough holes are drilled in the leaf with a blunt needle, so that the insects may find their way through them to the branches. On emerging from the scales, the insects creep rapidly up the branches to the leaves, among which they nestle for a period of thirteen days. They then descend to the branches and twigs, on which they take up their positions, the females, doubtless, to provide for a continuation of the race by developing scales in which to deposit their eggs, and the males to excrete the substance known as white wax. The wax first appears as a white coating on the under sides of the boughs and twigs, and resembles very much sulphate of quinine, or a covering of snow. It gradually spreads over the whole branch, and attains, after three months, a thickness of about a quarter of an inch. When the white deposit becomes visible on the branches, the farmer may be seen going the round of his trees, carefully belabouring each stump with a heavy wooden club, in order, as he says, to bring to ground the "wax dog," a declared enemy of the wax insect. This clubbing of the stumps is done during the heat of the day, when the wax insects are said to have a firm hold of the bark.

After the lapse of a hundred days from the placing of the insects on the wax tree, the deposit is complete. The branches are then lopped off, and as much of the wax as possible removed by hand. This is placed in an iron pot of boiling water, and the wax, melting, rises on the surface, is skimmed off, and placed in a round mould, whence it emerges as the white wax of commerce. Where it is found impossible to remove the wax by hand, twigs and branches are thrown into the pot, so that the wax is harder and inferior. Finally, not satisfied that all the wax has been collected, the operator takes the insects, which have meanwhile sunk to the bottom of the pot, and placing them in a bag, squeezes them until they have given up the last drop of their valuable product. They are then—an ignominious ending to their short and industrious career—thrown to the pigs! We have given from Mr. Hosie's chapter this summary of an extraordinary industry in the belief that it cannot fail to interest our readers.

As to the trade of Western China, although Mr. Hosie's chapter is long and detailed, we think it is not difficult to summarise its contents briefly and to some extent in his own words.

There are two water-routes in Yunnan, one in the south and the other in the north, the Songkoi or Red River of Tonquin and the Yangtze. The West River is navigated from Canton to Pe-se, close to the south-eastern frontier of the province, and is a very important trade highway to southern and eastern Yunnan. In default of a waterway in the west, communication is kept up by the Bhano-Tali Fu route, which, being now partly within the Indian Empire, has attracted no little attention, and raised considerable expectations for British trade. These are doomed to disappointment. The total import and export trade of this route three years ago did not exceed half a million sterling. The difficulties of the route are so great that no great improvement is possible. Yunnan is described as a rich province, but it contains a poor population, and, until the condition of the latter is improved, no great development of trade need be looked for in that direction. It is estimated to contain a population of from five to six millions, the great mass of which is engaged in agricultural pursuits. There are copper mines in the north and east, and tin and lead mines in the south of the province; but mining industries are so hampered by official interference as to profit little the owners or the workmen. Agriculture, too, is carried on under a system of small farms, and the absence of good roads and the impossibility of greatly improving those that exist, owing to the mountainous character of the province, do not tend to the enrichment of the peasantry. Immense tracts in the north and west of the province have been laid waste since the Mohammedan rebellion, and owing to the antipathy of the Chinese to settle on lands which they look upon as the property of people who may still be living, or whose descendants may still be living, it must be many years before the agriculture of the province is properly developed.

Kwei-chow, owing to its proximity to the great waterway of China, is better situated for trade than Yunnan, but is even less developed. A large area of the province has been laid waste during the struggle of the last 20 years between the Chinese and the aborigines, and, at the present time, traces are everywhere to be seen in the shape of ruined towns and villages and lands lying waste and desolate. The waterways that lead to the province flow through Szechuan, with the exception of the Yuan River, which flows east and north-east into the Tung-ting Lake, which debouches into the Yangtze, 123 miles to the west of Hankow. Although obstructed by numerous rapids, it is navigated to within 130 miles of Kwei-yang Fu, the capital, and is the trade highway to Eastern Kwei-chow. The trade of the rest is intimately bound up with that of Szechuan, through which it naturally passes. Like Yunnan, it is rich in the variety of its mineral wealth. Coal, iron, copper, and quicksilver exist in large quantities; but they are very imperfectly worked. Szechuan is a picture of what peace, contentment, industry, and trade are able to accomplish. When Yunnan and Kwei-chow were convulsed by civil wars, the people there were peacefully journeying up and down the Great River, disposing of their surplus produce, and bringing back not only what they required to satisfy their actual wants, but also luxuries in the shape of goods of foreign manufacture. On all the numerous rivers of the province there is one constant stream of traffic. No other province in China can vie with it in the richness and variety of its products. It exports eastward opium, silk, salt, sugar, and medicines. Of these, silk is the only article that reaches Europe; but, amongst the minor exports, tobacco, hides, musk, and rhubarb are well-known abroad. The total value of the export trade of Chungking, which is the great trade emporium of the province

amounts to more than five million sterling annually. This does not represent the total value of the surplus produce of the province. There are several other important trade centres each of which contributes its quota to the large export trade of the province last named. The greater part of the surplus wealth is consumed in the purchase of raw cotton, native cottons, and what is of great importance to British commerce, foreign cotton and woollen goods. Raw cotton exceeds, while native and foreign piece-goods are about one million sterling each. Mr. Hosie then enters into a description of the manner in which trade with China is conducted, and explains *likin* and *transit* passes, and much else that is tolerably familiar to most persons in the East though not to those at home. The volume concludes with a chapter, which is most interesting, on the non-native races of China. It is on the whole as interesting a work as has been published on China for a long time, not to speak of all of its practical value especially at this moment, and unless we are mistaken it will have at home that large measure of success which it deserves richly.

LETTER FROM SAN FRANCISCO.

(FROM OUR SPECIAL CORRESPONDENT)

San Francisco, July 19th.

The dog days are upon us, and dullness rules the hour. A dreadful hot wave has just swept over the East, and everybody has wilted under it. In New York the thermometer registered the unprecedented figure of 110°; but the suffering in Chicago, with a temperature of 75° and 80°, is said to have been still greater. You are probably familiar in Japan with the principle that the suffering entailed by heat depends upon its moisture rather than upon its intensity; in Chicago, men and horses fell exhausted when the thermometer stood at 80°, while at Fresno in this State, workmen laboured steadily in the vineyards when the instrument registered 110° in the shade. In the one case the air was charged with moisture from the lake. In the other the air was dry and parched.

At Washington, Congressmen and Senators are mopping their perspiring brows, and wishing they were at home. The administrative party seems as far from the goal of its hopes as ever. Mr. Blaine not only repeats his denunciations of the Mr. Kinley tariff bill to all who will listen, but does not hesitate to denounce also the bill which proposes to place congressional elections under federal control. Simultaneously the chief organ of the Administration—the New York Tribune—calls a halt on pension legislation. It says—positively if tardily—that the party cannot stand any more veteran grabs. Between these two assaults the administrative leaders in Congress stagger demoralized. No one knows whether the President is with Mr. Blaine or Speaker Reed. No Republican can tell where the path of duties, or the dictates of party lead. All the Republicans know is that they are in a very bad box indeed.

A knave discovered that it is a question of law whether the Copyright Act is violated by the publication of a photographed copy of a copyrighted work, and he photographed Webster's Unabridged Dictionary, and offered it for sale at one quarter the price of the regular edition. His agent for distributing the work is John Wanamaker, the Sunday School teacher and Postmaster General.

The difficulty which prevents the adjustment of the Behring's Sea dispute is said to be another dirty job. No American of repute believes that Behring's Sea is a closed sea. But it is said that Mr. Windom and some of his colleagues are partners in the lease of the fur-seal islands, and the Government has got to maintain a position which no constitutional lawyer can justify in order that the lessees may enjoy a monopoly of sealing. Probably this is pure scandal, but it helps to discredit the Administration.

Another instance of the trend of events is the defeat in the Senate of the appropriation for irrigation surveys. In these surveys, as Mulberry Sellers would have said, there are millions, if they are handled discreetly. A system of irrigation will raise the value of land from 25 cents an acre to \$50 an acre: the man who knows where the irrigating canals are to run, in advance of his fellows, can easily make all the money he can use in this world. Accordingly, when Congress was asked to appropriate three quarters of a million for next year's work, Major Parnell, the engineer who has had charge of the work, was immediately beset by a swarm of land grabbers in search of information. He had none to give. They set Senator Stewart to work, and he tried to get the business of irrigation transferred to the Agricultural

tural Bureau, which is run by a friend. Baffled in this, he gathered round him enough Administration Senators to defeat the appropriation altogether.

An American variety of the Jack the Ripper genius has appeared in North Carolina. One Mary Sellers of Maxton was engaged to be married to a man named Crawford. She has another admirer in the person of Simon Ward. She was walking out last Sunday morning with her fiancée when Ward suddenly emerged from the bushes and ordered Crawford to leave her. With a docility which cannot be too warmly commended, Crawford complied. Ward took his place by the girl's side, and begged her to accompany him to church. She refused, and bade him leave her. He pleaded with her to yield to his request, but she was inflexible. On this, without a word of warning and with his fortunate rival watching him from the bush, he struck the girl with a razor in the throat, and severed the jugular vein. She died almost instantly and when she was still, Ward proceeded to cut off her head with his razor and to mutilate her person in the fashion of Jack the Ripper. When he had completed his bloody work, he fled to the woods, and then, but not till then, Crawford crawled out of the bush, and ran to the village to give the alarm. The people turned out *en masse*, and there is no doubt but Ward will be lynched in short order if he can be caught.

The President of the Pacific Mail Company will arrive here next week to consider the subject of running vessels from Tacoma and Vancouver to Yokohama. The Canadian ships will henceforth make this their terminus, stopping *en route* at Vancouver. So the prospect is fair for ample steam communication with your part of the world, and, possibly, for cheaper rates of travel.

THE THEATRE IN JAPAN.

The Japanese theatre, Chinese in origin, when once transplanted, attained remarkable perfection. In this metamorphosis we are made to feel the influence of the taste and sentiment of a race whose life consists mainly in the enjoyment of the wonders of nature and in the pursuit of art.

The pedigree of French comedy is well known; how the comic element was introduced, while yet imperfect, from Italy with the Renaissance, and how it became transformed to the extent of becoming the theatre of Molière, while in its native country it remained almost in its primitive state until the advent of Goldoni, which was not till the end of the last century. China has never had and can never expect to have a Goldoni. We dare not affirm that Japan will have its Molière. In these countries of the far East little is said of reformers in the walk of art. Progress is rather the effect of many influences which are the characteristics of an epoch. Still it cannot be denied that Japan has passed through an era of dramatic reform, for after deriving its theatre from China, it has left China far behind; but this reformation has not been the work of a single man nor of one generation. It has come gradually as the logical consequence of the Japanese taste for scenic representation. The long period of internal peace inaugurated by the coming to shogunal power of the Tokugawa has no doubt had a large share in the perfecting of the theatre, as in the development of all other arts. Iyeyasu, the founder of this Shogun dynasty, may in some sort be considered the promoter of a Japanese Renaissance which coincides with our seventeenth century.

No doubt the principles and rules of Japanese dramatic art have many shortcomings, but such as it is, the kind being conceded, it has arrived at such a point of perfection that further progress is not to be looked for without a change of style. It would cease to be the same art. This is perhaps what has preserved it hitherto from that movement of reform, which has for some years tended to deprive ancient Japan of its local colouring under the whitewash of new institutions and manners pretending to be European, but whose consequences have not yet been seriously regarded except by the Japanese themselves. The theatre has not yet been invaded by the coat and white tie.¹ So that the amateur of local colouring whom business or pleasure brings to Japan cannot do better than seek it at the theatre. He will there find it in its most delicate and original shades. The auditorium and the stage compose between them a field of observation, marvellously adapted as a study of manners and history.

The building is a great square edifice. It is entered by a vestibule on a level with the street,

whose general appearance is that of our entrance halls. There are situated the box offices. Tickets are also to be had in the houses near, but we do not affirm that they are "cheaper than at the theatre." Two doors lead almost directly to the pit, and two staircases, ladders rather, lead to the amphitheatre and to the passages towards the boxes. It must be understood that there is but one story. Garlands of lanterns in the façade, highly coloured banners, a series of paintings of the play in course of acting, all have a rather clamorous note; they are good puffs. The great space which we call the pit is divided into squares of equal size like a draught-board, or rather like a ceiling in compartments. These are boxes for four, but they are often made to hold six persons or even seven. The spectators step over the partitions to gain their place; consequently when once a family is installed in its box—a very suitable name—it cannot very easily get out again. For all that, many of them are emptied at each interval between the acts, for the performances last ten hours or more. But people dine there as they would at home—smoke, nurse children, and are generally at their ease. There are no chairs, the Japanese mode of sitting being to squat upon the heels, which position, being the least tiring and the most convenient, can be retained throughout the day. Two boarded passages, raised above the boxes to about the level of the heads of the audience, whose heads alone are seen above the partitions, run from one end to the other of the auditorium right up to the stage. By these the public of the pit enters; by them also most of the actors during the representation make their exits or their entrances, especially when illusion demands their arrival from a distance, when, in quitting the scene, they have to walk through streets or across country.

The doorkeeper has, in a fashion, the office of a call-boy. To this is added the care of a varied collection of umbrellas and parasols, which he opens and hands to each actor who enters, when the "business of the play" requires those accessories. This distribution goes on under the eyes of the audience; often the dialogue commences in the rear of the public, directly when the artist has set his foot inside the auditorium, and long before he gets to the level of the stage. Sometimes he stops midway to say something, or perhaps turns back, then goes in again, arriving at length at the desired moment. The drama gains much in life in this way, all the spectators participate in the action of the piece. We see what proportions the scenes assume when they thus invade the auditorium above the heads of the spectators. For appeals, parting exhortations, and above all, for provocations, the distance justifies all the tones of the voice. Whilst the principal action unfolds itself before the public, accessory scenes can be simultaneously played at the sides of the auditorium, independent from the actors' point of view, but from the spectators' part and parcel of the events which compose the play. Often the principal action is transferred to the middle of the pit. In that way a triple enlargement of the area of the theatre is gained. This also allows the conspirators, the assassins, liberators, and other personages who have to concert before they can act, deliberately to lay down their plans, or their proposed stroke of business, before arriving at the spot where it is to be carried out. The want of space in our stages often brings about very improbable situations. Thus, for example, we may see an actor who does not know what to do with his hands while waiting for the assassins to have arranged how they shall cut his throat. Nothing of the kind need be apprehended in a Japanese theatre. But it is precisely because this goes on above the heads of the audience that it is practicable. Everyone is in the thick of the drama, and probably is so much the more interested in it. For a spectator who gives the rein to his imagination the boarded passages may become rural roads and the pit a cultivated field; and if he would make his pleasure complete, he would annihilate himself as a man and make himself part of the play as an invisible spirit.

The mounting of the piece is astonishingly exact. If the action takes place in a house, it is represented entire with its approaches and neighbourhood. Moreover, Japanese architecture lends itself to this kind of decoration, for even palaces do not attain monumental proportions. In truth, when a house is completely open, little beyond the framework remains. We see everything that goes on inside; in this case, the theatre needs no illusion. If the scene is played in a closed house, it must be bisected. Still the Japanese give you the roof, the garden, the wall and the entrance gate, in one word all that immediately surrounds the house, all of the same cut.

There are changes of scene. The scenery with its decorations goes round upon a turn-table. This plan has the advantages occasionally of making the play seem more natural. Thus an actor having

entered a house by the doorway, we presently see the interior of the house.² How well all this is conceived to make the audience live in the very midst of the action! There is nothing fictitious or conventional in the exit or the return of this actor; what we see is the reality. It is desired to show the public in succession the front and the rear of a house. So the scene is turned round; what more simple, since the house in its entirety is there? The turntable may contain three pictures, or, more strictly speaking, three theatres at once, so that two changes of scene may be made, one after the other. The area of the scene is much larger than the height of it.³ Some accessory decorations are added at the sides; they are sometimes continued into the auditorium in the midst of the spectators. The curtain is drawn to one side. It is ornamented with some boldly drawn design with a gigantic inscription.

The orchestra is concealed on the left, and is on a level with the stage, behind a decoration of open work, which varies according to the theatre of action. It plays almost without ceasing, accompanying the dialogue with melody grave or gay, discreet or violent, low or noisy, accommodating itself to the situation. This melody is also made to represent the murmur of nature; it is imitative, and becomes by turns the zephyr, storm, tempest, thunder, rain, waterfall, running stream, the noise of a body which is thrown into the water, and the rushing of the water which fills its place.

Japanese music is wholly in the minor key. Suffice it to say that it has no relation to our musical canons, and that the European ear needs time in order to become used to it, and still more to like it. Still that comes about. A peculiarity of Japanese music is, that it is in some sort the counterpart of Chinese music, which, exclusively in the major key, is equally foreign to our notions of harmony. From this fact a curious and yet logical consequence has resulted, that European musicians have amused themselves by obtaining an extremely oriental extract from a combination of the two systems, which, with its fantastic belongings, could be rendered by our instruments.

In its main divisions the Japanese orchestra is not unlike ours. It has three great categories of instruments. The *koto* and the *samisen* resemble the harp and the violin with its allies the violoncello, bass viol, &c. The *koto* likewise produces different effects according to its size. The *samisen* has certain affinities to the guitar. Generally speaking, the strings of the *samisen* and the *koto* are touched with the finger; now and then use is made of a bow of which the strings are scarcely stretched. A kind of flute, of no particular shape, is the principal wind instrument. And there is a series of tambourines and kettledrums of quite an original aspect, which occupy a place much more important among musical instruments than do their congeners in the West.

The chorus is placed at the side opposite to the orchestra, in a small box closed by a blind. This is a personage who is not seen, but may often be heard. His functions are precisely those of the chorus in Greek tragedy; but he is of more importance, although concealed. He represents the good sense and morals of the people, but he chiefly explains the unfolding of the drama. On occasions, he recounts what takes place outside the scene, and unveils the inner sentiments of the *dramatis personæ*. The Japanese drama, a reflection of actual things, often develops through entire scenes in mere pantomime. In real life people are not always talking, but action goes on incessantly, because we are alive. We may be said to act, whether it be for some definite end, whether we repose or think, or are kept motionless by fear, expectation, or fatigue. If we are asleep, we may not seem to act; and yet is not sleep an action *sui generis*, susceptible of many varieties which have their manifestations in dreams and visible signs according as we are agitated or calm, well or ill, happy or unhappy? In any case we exist during sleep, and the world moves about the sleeper, because of him, and in relation to him. Indeed, if we are dead, we still exist as a corpse, as a recollection, as something which has been, and are therefore not extinct in the life of men. The actions of human beings mutually react, they live after death. Directly or indirectly we are always in action. But we only speak now and then. In this respect the European theatre is removed from all probability. Action with us is always associated with words, and if they are suspended to allow of the spectators' attention being concentrated on some capital point of action, that is only for a moment. In Japan, throughout whole scenes the actors may exchange but a few

¹ One may even pass from one play to another in the interior of same house.

² Which does not prevent its holding a house. Japanese houses are generally of one story, called *nika*. Later they have been houses of two stories built in Japan, but these are not introduced in theatres.

words; monologues are rare and always justified, which cannot be said of our dramas. Here it is that the use of the chorus is felt. He recites or chants the piece; he explains the pantomime which is going on before the public, his expressive voice takes suitable intonations—it is terrible or harmonious, it is generally solemn, and sometimes goes off into song. This mode of conducting a drama has caused Japanese actors to be the best mimics in the world. In this art they have attained a surprising perfection, thanks to which the Japanese theatre is always interesting, even to the stranger who knows not a word of the language. Beside them our actors are but commonplace puppets. What can we call for example, the series of conventional gestures with which they load their grimaces, but ridiculous apings, from which the Japanese theatre is entirely exempt. Therein consists its vast superiority in point of resemblance; what the Japanese represent is, they insist, life itself. With us, spoken pieces or pantomime are alike remote from it. In actual life we are not always speaking, but we do speak. The conventional gestures, so piteously grotesque, of our pantomimes are there to take the place of speech when it is absent. Japanese mimics have not to perpetrate these absurdities, because they speak when they have to speak. Life is composed of words and actions. With us the theatre is or nearly so, one or the other. In Japan it is the one and the other. We may thus define Japanese dramatic art as pantomime freed from conventional improbabilities, and where there is speech as there would be in real life. Do the Japanese actors speak naturally? The auditoria not being acoustically constructed, and the spectators also "going in for" actual life, which is far from being silent, the actors are obliged, in order to be heard, to speak out in a way which surprises us at first and is displeasing, but which we soon get used to.

In a future number we shall go behind the scenes and endeavour to give an account of a Japanese drama.—A. LEAUX in *Artistic Japan* for May.

IN H.B.M. COURT FOR JAPAN.

Before J. J. ENSLIE, Esq., Acting-Assistant Judge.
—WEDNESDAY, August 6th, 1890.

DEGRON V. GABARETTA.

This case, adjourned in order to afford parties an opportunity of arriving at an arrangement as to payment of the amount for which the plaintiff received judgment the other day, came up again this morning.

His Honour said he should be glad to hear whether any progress had been made in the direction of a settlement.

Mr. Litchfield said he was afraid the parties had not been able to come to any arrangement; their ideas seemed to diverge very much.

Mr. Walford said what had passed between the parties was as follows:—On the 30th ult., instructed by Mr. Gabaretta, counsel wrote to his learned friend: "Mr. Gabaretta's estimate in your possession shows his assets to be worth some \$800. Whether they will fetch as much in an auction it is of course impossible to say. His salary is \$70 a month, and out of that he has to maintain his wife and five children so that he cannot make any offer to pay his debt to Mr. Degron by instalments out of his salary. Mr. Gabaretta, however, has friends who are willing to help him if their assistance will really relieve him, and if Mr. Degron will accept a present payment of \$1,000 in full discharge of all claims arising out of the action, Mr. Gabaretta will exert himself to the utmost to procure that sum within the week. Kindly let me know Mr. Degron's views in this matter at your early convenience." This was the outside offer that Mr. Gabaretta was able to make, and of course it was entirely beyond his own means, and he depended entirely on the assistance of his friends to carry it out. In reply to that letter he received the following, dated 4th August:—"I submitted the terms of your letter of the 31st ult. to my client but he declines to accept the offer. Mr. Degron writes me that if \$2,000 and the costs of all proceedings are paid he will stay all proceedings, but on no other terms." Counsel wrote back to say that this was impossible as his client could not offer more than \$1,000, which was beyond his own means, and so the matter was at a complete dead lock, for his client could offer nothing more. Of course obviously with a wife and five children to support and the eldest of those children only 16 years old, it was quite impossible that on \$70 a month Mr. Gabaretta could make any offer to pay anything out of his salary. He had carefully estimated his assets and the value appeared to be under \$800, and

therefore he thought Mr. Degron would willingly have accepted an offer of \$1,000.

Mr. Litchfield with the permission of the Court would like to ask defendant one question, as to what really was—

Mr. Ensle said that would be reopening the case, while as a matter of fact the case had been closed.

Mr. Litchfield said he would hand the Court information that had come into his possession since the last hearing, and would take his Honour's decision as to what course he should adopt.

Mr. Ensle said he did not think that at the present stage and in this form he could accept any representation from counsel.

Mr. Litchfield said his contention was either that the property No. 224, Bluff, had been purchased really by the money of the defendant, or that supposing for a moment the whole of it was purchased by the money of the wife, it was personal property which had been reduced into the possession of the husband during coverture, and as such was liable to the claims of the defendant's creditors. There had been such dealing with this money during several years as was shown—

Mr. Ensle said he did not think at this stage he could allow the reopening of the case. The case was really closed, and it was simply adjourned at the last sitting till to-day with the view of affording an opportunity to come to some arrangement. Such arrangement had unfortunately not been arrived at.

Mr. Litchfield said of course if that was the ruling of the Court he should bow to it. He was only stating his reasons for wishing to add further evidence, as the Court had under the rules the power of adjourning from time to time. But if his Honour considered that the case was closed and the adjournment merely for one purpose—

Mr. Ensle said he most decidedly did so, and he had stated so at the time if counsel would remember. He still was of the opinion that he held at the last sitting, that this was evidently a case on which some arrangement might have been arrived at between the parties, and he very much regretted that the facilities he had afforded had not led to the desired result. Of course that being the case the matter rested with the Court. He therefore ordered execution against the estate, in addition to an attachment of the wages of the defendant to the extent of \$20 a month.

LETTER FROM YANG SHIN.

TO CHING SAN, MENG CH'EN, AND TZU CH'EN. WORTHY BROTHERS.

The letter despatched on the 25th of last month from Chan Hwa you will have already perused. On the 26th I arrived at Yang Shin. Ch'ien Cho-fu has now returned home, and I have left with me Wang Chieh-San only. We have already made a house to house investigation of 55 villages among the most impoverished, and were occupied from the 29th to the 3rd in distributing to them. We gave 1,000 cash (½ dollar) to adults and 500 cash to juniors. There are two grades of poverty a shade less extreme than these, besides many who have made no official report of calamity, but whose destitution is very great. We intend to make a further examination of these, and having completed the examination, knowing how many we have to relieve and the amount of money available, we can then fix upon the amount per head. If additional funds are forthcoming from Tientsin we still purpose to continue the rate of 1,000 cash adults, and 500 cash juniors. If there are no further funds from Tientsin we can only make a complete examination and divide what we have among them. It will take until the middle of the month to complete the examination. Apart from those already relieved, the number of households in extreme distress will probably exceed 5,000. All I have left after having distributed to the worst villages (as above) is just 100,000 strings of cash (Tls. 3,300).

On the 6th I go to Ti Chin, and at the quickest, going and returning, shall be ten days. There is great drought throughout the *chou* and *hsien* eastward, and I hear that the whole of Yen San and Ch'ing Yün is covered with locusts in very great numbers, which are a cause of some anxiety.

This year the wheat harvest is very fine, everywhere alike, and the thing to be specially glad about is that the finest of all is in the localities which were (formerly) sand-covered.

On the 28th I went to Wu Ting Fu, and there staying for an early bait I started in the afternoon for Ti San P'u with the purpose of examining the

whole of the country which had been covered with sand. Rather more than five *li* beyond the town I crossed the new embankment of the "Sah" (sand) river. It was this embankment which in the eighth month of last year broke open two or three *li* from Hsi Feng K'ou and flooded the whole of Yang Shin. It has now been repaired, and is very strong: twice as high and as thick as before. The people of Hui Min and Yang Shin, having combined to make this bank, have now some control (over the floods). South of the Sah river the newly over-laid land is good soil, and has a rich growth (of crops) on it. After the waters had gone down last winter it was sown all over with spring wheat, and the extent as you look over it is boundless. It is (almost but) not quite ripe, and waves in yellow clouds over the plain. There was some wheat gathered here last year, but the autumn harvest was destroyed by floods. I am told that the Sah river embankment was opened by the people living here. Looking at the willow trees as I passed (their appearance was as if) the roots extended for 5 or 6 feet up the trunk, and this enabled me to see in imagination what the aspect of things was during the long period when they were surrounded by water. This stretch of more than 100 villages is (fairly) populous, hence the people will be able to straighten themselves up and come safely through their dangerous condition. Proceeding some 10 *li* further south, I expected to see sand-dust obscuring the whole heavens. The day was a very windy one too, but the prospect southwards was clear and bright. Still south for 10 more *li* and approaching Ti San P'u on the west side, I found all was covered with flourishing wheat (stretching away) in boundless beauty, and not a vestige of the white sand to be seen. Coming on to the street of Ti San P'u they were busy with the wheat-floors, and the faces of men and women looking healthy and prosperous, a complete contrast with last year's aspect. I was sadly delighted. It was like a confused dream. The day was drawing late, and after a short pause I went east for another 12 *li* and passed the night at Hsin Tien. All along the way, closely examining the ground, I found a red deposit had been made. It would seem that last year's waters floated away some portion of the sand and covered the whole face of the land with a (fresh) deposit of reddish earth. The whole country is already sown with autumn crops. Though the soil is somewhat cold, and in places (the crops) are not very healthy, yet once it has been well rained on the land will be as good as ever it was.

The population of the villages has become very sparse. There are not more than some 10 families left out of 100. The rest have all taken flight and have not yet returned. One village near Shin Tien, Shing Sheng Lu Chia, has but a single family left, the rest have stopped up their windows and doors with mud and all left. Probably they went last year.

Now the soil of this region is recovered, the stronger ones are returning to cultivate the fields. Their families, there being no food, have not yet ventured to come back. When the autumn crops are ripe they will be able to return. Along this route things are far worse than on the west, south, and north sides of Ti San P'u. It is wonderfully different, however, from last year, when a vast stretch of white sand covered the whole region. By inquiry of the Hsin Tien people (I find) that on their east and extending northwards (the people) are all in good condition. The worst portion is from Ti San P'u to Hsin, some 10 villages which I saw as I passed through them. Elsewhere (in this neighbourhood) there is no distress.

The merciful love of High Heaven in thus restoring to this people the whole of their land, is it not wonderful? The strangest marvel of all though is what they say in Hui Min, that a few days back to the south of Ti San P'u, along the H'u Hai River, locusts appeared, but fortunately they were smothered by the sand and so the plague was arrested. I have been myself to the place and there are indeed no locusts, *neither is there sand*. But the other day, in an interview with his worship Chiao Chien Ch'ien, the Yang Shin official, he told me that the locusts south of Hui Min being very numerous the mandarin went with the people to destroy them, when they found that without (apparent) cause the locusts every one of them were clean dead. The grace of High Heaven, is it not beyond measure wonderful?

If this year the Yellow River does not break its banks there is sure to be a harvest in the autumn, and henceforth the people of this eastern province will easily find their misery converted into happiness. Those for whom there is no salvation are the people entangled within the pit of the river (the bed between its inner and outer banks). From Chi Tung downwards to Pu Tai there is a large number of villages covered by water. Last

year some greatly benevolent gentlemen relieved the entire people of Ch'ing Ch'ing (county) giving them means to move away to any place they might choose. There are still left (in the same state) about 2,000 villages belonging to Chi Tung, Pin Chou, and Pin Tai. Of the population of these villages, the numbers wandering and lost are beyond all attempt to count them, besides those now in the midst of the water, who the live-long day are the companions of fishes and turtles, and who if they are not quickly saved will soon be swept away and nothing be left of them. In about a couple of years they will all be buried in the fishes' bowels. Whoever has merciful thoughts I beg of you to devise in all haste a plan for their recovery. If there is any delay in saving them there will be no one to be saved.

In the eastern part of Li Chin there are also about 100 villages in much the same condition as those in the pit of the river. Whether the bank breaks or not there is no way of escape for them; whether there is a harvest or not they are beyond recovery. These people, however, if they can continue when the waters have receded to construct embankments will not be without resource. But at present with the land under water there is no way of helping them.

The weather is very hot. I have just learnt from Ch'ang Er that though there are locusts at Yen San and Ch'ing Yün the evil is not serious. The day is very close and clouds are rising in the west. The rains perhaps are not far off. This solely for your information with greetings of peace.

CHIN JU CH'U.

Respectfully salutes,

Despatched the 5th day of 5th Month (June 21st, 1890) from the Ch'iu Ching College, Yang Shin.—Chinese Times.

LATEST TELEGRAMS.

[REUTER "SPECIAL" TO "JAPAN MAIL."]

London, August 2nd.

Peace has been restored in the Argentine Republic, after severe fighting in which one thousand were killed and five thousand were wounded. The rebel squadron has surrendered. The Argentine Chambers will suspend payment of all obligations for one month. Buenos Ayres is again quiet, and the banks have reopened. Dr. Celman has returned, and remains President. The United States Treasury commences the purchase of silver on the 13th inst.

London, August 5th.

The Emperor of Germany has gone on a visit to Cowes.

Cholera has broken out very badly at Mecca. The cholera continues bad in Spain.

Outrages and rioting have again occurred in the Argentine Republic.

London, August 6th.

The Portuguese have seized a British steamer on the Shiré River. The Authorities in Portugal have ordered severe punishment to be meted out to all its subjects concerned in the affair.

The political excitement at Buenos Ayres is not yet calmed down and the financial crisis continues.

London, August 7th.

Dr. Celman, President of the Argentine Republic, has resigned.

Twenty-four seamen belonging to the British Squadron, whilst at Newport, in America, deserted from the ships' boats. All were recaptured, in the execution of which one man was shot and another disabled by a cutlass.

["SPECIAL" TELEGRAM TO "JAPAN MAIL."]

Kobe, August 6th, 4.35 p.m.

Mrs. and Miss Schroeder, who were passengers by the *Kobe Maru* from Shanghai to this port on that vessel's last voyage, have been

seized with cholera. The daughter died this morning, and Mrs. Schroeder is in the Cholera Hospital.

August 7th, 8 a.m.

Mrs. Schroeder died last evening after only eighteen hours illness.

[FROM THE "SINGAPORE FREE PRESS."]

London, July 11th.

The Government drops the Procedure proposals, the Land Purchase Bill, and the Tithes Bill, but will re-introduce them next Session.

Mr. W. H. Smith has changed his decision to go to the Upper House, and will seek re-election to the House of Commons.

London, July 17th.

A Court Martial is ordered upon the recent mutiny of the Grenadier Guards, Second Battalion.

The Spriggs Cabinet has resigned, and Mr. Cecil Rhodes becomes Premier.

London, July 22nd.

The Grenadiers are being sent to Bermuda. The Duke of Cambridge, addressing the regiment, told them he was ashamed of their conduct, that they had disgraced the Queen's uniform, and that he disowned his connection with the second battalion.

The finding of the Court Martial was then read. Three men are sentenced to two years' imprisonment, two others to 18 months'.

Two men thereupon tore off their medals, and threw them across the parade ground.

[FROM TOKYO PAPERS.]

Paris, July 17th.

The Chamber is still discussing the law as to direct taxes.

The Chamber has voted another 300,000 francs for the relief of the sufferers by the fire at Martinique.

TIME TABLES AND STEAMERS.

TOKYO-YOKOHAMA RAILWAY.

DOWN TRAINS LEAVE SHIMBASHI Station at 6.05, 6.40, 8.35, 9.30, 10.25, and 11.45 a.m., and 2.30, 3.55, 4.45, 5.50, 6.50, 8.30, 9.55, and 11.15 p.m.

UP TRAINS LEAVE YOKOHAMA Station at 6.30, 7.20, 8.10, 9.15, 10.22, and 11.30 a.m., and 12.45, 2.30, 3.45, 5.30, 6.35, 7.50, 9.10, 10.05, and 11.05 p.m.

FARES—First-class, *sen* 60; second-class, *sen* 40 and third-class, *sen* 20.

Trains marked * run through without stopping at Omori, Kawasaki, Tsunomi, and Kanagawa Stations. Those marked (†) run through without stopping at Omori, Kawasaki, and Tsunomi Stations.

TOKAIDO RAILWAY.

UP TRAINS LEAVE YOKOHAMA (down) at 6.50, 9.10, 11.25 a.m., and 12.40, 3.25, 4.55, 5.35, and 7.45 p.m.; and KOZU (up) at 6.35, 8.40, 9.40, and 11.07 a.m., and 1.17, 2.45, 4.58, 7.25, and 9.46 p.m.

FARES—To Huddogaya, first-class *sen* 6, second-class *sen* 4, third-class *sen* 2; to Totsuka, *sen* 18, *sen* 12, *sen* 6; to Ofuna *sen* 36, *sen* 24, *sen* 12; to Fujisawa, *sen* 42, *sen* 28, *sen* 14; to Hiratsuka, *sen* 66, *sen* 44, *sen* 22; to Oiso, *sen* 75, *sen* 50, *sen* 25; and to Kozu, *sen* 93, *sen* 62, *sen* 31.

Down trains at 6.50 a.m. run no further than Koto arriving there at 11.20 p.m.; at 10.20 a.m. no further than Nagoya, arriving at 6.40 p.m.; at 12.40 p.m. no further than Shizuoka, arriving at 8.45 p.m.; and the train at 5.35 p.m. runs to Kobe, arriving at 12.45 p.m. next day.

A tramway runs between Kozu and Yemoto (distance 4 ri. Jirikiaba may be hired between Yemoto and Miyahoshita distance 14 ri).

OFUNA-YOKOSUKA RAILWAY.

TRAINS LEAVE OFUNA (down) at 7.30 and 9.40 a.m., and 12.05, 1.30, 4.03, 6.14, and 8.30 p.m.; KAMAKURA (down) at 7.41 and 9.51 a.m., and 12.16, 1.41, 4.14, 6.25, and 8.41 p.m.; and ZUSHIMURA (down) at 7.50 and 10 a.m., and 12.25, 1.50, 4.23, 6.34, and 8.50 p.m.; YOKOSUKA (up) at 6.45, 8.55, and 11.20 a.m., and 12.50, 3.50, and 7.45 p.m.; ZUSHIMURA (up) at 7.01, 9.12, and 11.36 a.m., and 1.06, 3.16, 5.26, and 8.01 p.m.; and KAMAKURA (up) at 7.11, 9.22, and 11.46 a.m., and 1.15, 3.26, 5.36 and 8.10 p.m.

FARES—To Kamakura, first-class *sen* 9, second-class *sen* 6, third-class *sen* 3; to Zushimura *sen* 15, *sen* 10, *sen* 5; and to Yokosuka *sen* 30, *sen* 20, *sen* 10.

UTSUNOMIYA-NIKKO RAILWAY.

TRAINS LEAVE UTSUNOMIYA (down) at 5.25 and 10.05 a.m., and 12.25* and 3.05 p.m.; and NIKKO (up) at 7.20 and 11.55 a.m., and 2.25 and 4.55* p.m.

* Through Trains to and from Ueno.

KOZU-KOBE RAILWAY.

DOWN TRAINS LEAVE KOZU at 8.30 a.m., and 12.50, 2.15, 4.57, and 7.10 p.m.; GOTEMBA at 9.52 a.m., and 1.34, 3.35, 6.18, and 8.32 p.m.; NUMAZU at 5.20 and 10.40 a.m., and 2.30, 4.27, 7.09, and 9.24 p.m.; SHIZUOKA at 7.20 a.m., and 12.19, 4.12, 6.50, and 10.59 p.m.; HAMAMATSU at 6 and 10 a.m., and 2.40 and 6.45 p.m., and 1.16 a.m.; TOYOHASHI at 7.10 and 11.10 a.m., and 3.39 and 7.45 p.m., and 2.14 a.m.; OFU at 8.59 a.m., and 1.06, 5.22, and 9.28 p.m., and 4.02 a.m.; NAGOYA at 9.15 and 11.50 a.m., and 2 and 6.08 p.m., and 5 a.m.; Gifu at 10.53 a.m., and 1.30, and 7.09 p.m., and 6 a.m.; OKAZU at 11.24 a.m., and 1.28, 3.33, and 7.38 p.m., and 6.28 a.m.; MAIBARA at 9.45 a.m., and 1.29, 5.07, and 8.55 p.m., and 7.45 a.m.; HIKONE at 10.05 a.m., and 1.18, 3.02, 5.25, and 9.06 p.m., and 7.58 a.m.; BABA (Otsu) at 12.31, 4.40, 7.10, and 10.43 p.m., and 9.34 a.m.; KYOTO at 12.45, 4.05, 5.35, and 8 p.m., and 10.14 a.m.; and OSAKA at 2.25, 5.35, 7.20, and 9.50 p.m., and 11.42 a.m.

UP TRAINS LEAVE KOBE at 5.55 and 9.55 a.m., and 1.55, 3.45, and 5.30 p.m.; OSAKA at 7.06 and 11.06 a.m., and 4.06, 5. and 6.36 p.m.; KYOTO at 5.35 and 8.40 a.m., and 12.40, 4.36, 6.40, and 8.05 p.m.; BABA (Otsu) at 6.18, and 9.31 a.m., and 1.30, 5.25, 7.31, and 8.50 p.m.; HIKONE at 7.56, and 11.05 a.m., and 3.03, 7.02, 9.08, and 10.25 p.m.; MAIBARA at 8.13, and 11.20 a.m., and 3.19, 7.20, and 10.42 p.m.; OKAZU at 9.30 a.m., and 12.36, 4.37, 8.16, and 11.54 p.m.; Gifu at 9.57 a.m., and 1.02, 5.04, and 9.15 p.m., and 12.17 a.m.; NAGOYA at 6 and 11 a.m., and 2.10 and 6.20 p.m., and 1.09 a.m.; OFU at 6.43 and 11.44 a.m., and 2.56 and 7.04 p.m., and 1.41 a.m.; TOYOHASHI at 8.30 a.m., and 1.30, 4.42, and 8.52 p.m., and 3.17 a.m.; HAMAMATSU at 6.30 and 9.45 a.m., and 2.45 and 6 p.m., and 4.25 a.m.; SHIZUOKA at 5.15 and 9.07 a.m., and 12.45, 5.20, and 9.45 p.m., and 7.08 a.m.; NUMAZU at 7.03 and 10.40 a.m., and 2.24 and 7.14 p.m., and 8.43 a.m.; GOTEMBA at 8.15 and 11.58 a.m., and 3.38 and 8.28 p.m., and 9.53 a.m.; and Kozu at 9.40 a.m., and 1.17, 4.58, and 9.47 p.m., and 11.07 a.m.

FARES—Kozu to Gotemba: first-class, *sen* 60; second-class *sen* 44, third-class *sen* 22; to Numazu *sen* 1.11, *sen* 74, *sen* 37; to Shizuoka *sen* 2.13, *sen* 1.42, *sen* 71; to Hamamatsu *sen* 3.57, *sen* 2.38, *sen* 1.19; to Toyohashi *sen* 4.23, *sen* 2.82, *sen* 1.41; to Otsu *sen* 5.22, *sen* 3.48, *sen* 1.74; to Nagoya *sen* 5.58, *sen* 3.72, *sen* 1.80; to Gifu *sen* 6.15, *sen* 4.10, *sen* 2.05; to Okazaki *sen* 6.42, *sen* 4.28, *sen* 2.14; to Maibara *sen* 7.05, *sen* 4.70, *sen* 2.35; to Hikonoe *sen* 7.17, *sen* 4.78, *sen* 2.39; to Baba *sen* 8.10, *sen* 5.40, *sen* 2.70; to Kyoto *sen* 8.40, *sen* 5.60, *sen* 2.80; to Osaka *sen* 9.21, *sen* 6.14, *sen* 3.07; and to Kobe *sen* 9.81, *sen* 6.54, *sen* 3.27.

The down train at 8.32 a.m. runs no further than Kyoto, arriving there at 11.20 p.m.; at 12.12 p.m. no further than Nagoya, arriving at 10.10 p.m.; at 5.05 p.m. no further than Shizuoka, arriving at 9 p.m.; and the train at 7.10 p.m. runs to Kobe, arriving at 12.50 p.m. next day. The up train at 5.55 a.m. runs no further than Shizuoka, arriving there at 6.40 p.m.; at 9.55 a.m. and 1.55 p.m. no further than Nagoya, arriving respectively at 6.57 and 10.45 p.m.; and the train at 5.30 p.m. runs to Shimbashi arriving at 1.40 p.m. next day.

TOKYO-SHIOGAMA RAILWAY.

TRAINS LEAVE UENO (down) at 6.40, 8.50, and 11.40 a.m., and 2.40 and 5.40 p.m.; UTSUNOMIYA (down) at 10 a.m. and 3.03 and 5.59 p.m.; SHIRAKAWA (down) at 8 a.m. and 12.30 and 5.41 p.m.; KORIYAMA (down) at 9.25 a.m. and 1.54 and 6.58 p.m.; FUKUSHIMA (down) at 7.35 and 11.33 a.m., and 3.45 p.m.; SENDAI (down) at 6.15, 10.25, and 10.40 a.m. and 2.30, 6.35, and 6.50 p.m.

TRAINS LEAVE ICHINOSEKI (up) at 6.40 a.m., and 2.50 p.m.; SHIOGAMA (up) at 7 and 11.05 a.m., and 3.10 and 7.15 p.m.; SENDAI (up) at 7.35 and 11.40 a.m., and 3.45 p.m.; FUKUSHIMA (up) at 6.40 and 10.26 a.m., and 2.36 p.m.; KORIYAMA (up) at 8.29 a.m., and 12.22 and 4.28 p.m.; SHIRAKAWA (up) at 6.35 and 9.47 a.m., and 1.40 p.m.; UTSUNOMIYA (up) at 6.20 and 9.05 a.m., and 12.18, 4.14, and 6.33 p.m.

FARES—Ueno to Utsunomiya, first-class *sen* 2, second-class *sen* 1.32, third-class *sen* 66; to Koriyama *sen* 4.10, *sen* 2.74, *sen* 1.37; to Fukushima *sen* 5, *sen* 3.32, *sen* 1.66; to Sendai *sen* 6.45, *sen* 4.30, *sen* 2.15; to Shiogama *sen* 6.75, *sen* 4.50, *sen* 2.25.

TOKYO-MAEBASHI RAILWAY.

TRAINS LEAVE TOKYO (Ueno) (down) at 6.40, 8.50, and 11.40 a.m., and 2.40 and 5.40 p.m.; and MAEBASHI (up) at 6.55, and 11.50 a.m., and 2.50 and 5.55 p.m.

OYAMA-MITO RAILWAY.

TRAINS LEAVE OYAMA (down) at 6.50 and 9.25 a.m., and 2.20 and 5.15 p.m.; and MITO (up) at 6.25 and 10.10 a.m., and 2.05 and 4.55 p.m.

FARES—First-class, *sen* 1.20; second-class, *sen* 84; third-class, *sen* 42.

YOKOSUKA STEAMERS.

STEAMERS LEAVE the Nippon Hattori daily at 7.55 and 10.30 a.m., and 1.45 and 4.00 p.m.; and LEAVE YOKOSUKA at 7.10 and 10.30 a.m., and 1.30, and 4.00 p.m.—Fare, *sen* 20.

A NERVE TONIC.

HORSFORD'S ACID PHOSPHATE.

Dr. JAMES BLACK, L.R.C.S., Pinrose Hill, Cockburnspath, Scotland, says: "As a nerve tonic I know nothing like it. It gives me great satisfaction."

PASSENGERS.

ARRIVED.

Per Japanese steamer *Kobe Maru*, from Shanghai and ports:—Mr. and Mrs. Southage, Miss Sherwood, Miss Webster, Mr. Inouye, Dr. Salter, Messrs. G. K. Mosle, H. K. Bather, J. Meger, and J. C. Williams in cabin; Messrs. J. C. Donenburgh, P. Lamachio, Aslanoff, Nessakoff, J. Koo, Cheng, and Kasatani in second class.
Per British steamer *Tsinan*, from Taiwan:—Mr. and Mrs. Meinich in cabin; Mrs. Jeffreys and daughter in second class.

Per British steamer *Ancona*, from Hongkong via ports:—Messrs. E. O. Kenyon, Kennard, Davis, and R. Howie in cabin; 5 passengers in steerage.
Per British steamer *Gaelic*, from San Francisco:—Dr. C. Begg, Mr. and Mrs. Ambrose de Ath, Mr. and Mrs. F. Reddaway, Mrs. M. Ford, Mr. Norman Donisthorpe, Rev. and Mrs. N. W. Utley, Mr. Sidney R. Heap, Mr. J. O. Heyworth, Mrs. Alexander Center, Mr. and Mrs. F. R. Hoover, and Mr. C. W. Collier in cabin. For Hongkong: Rev. C. E. Copeland, Captain R. G. Waterhouse, and Mrs. Waterhouse and child in cabin.

Per British steamer *Port Philip*, from Saigon:—Rev. Mr. and Mrs. Elancy and 2 children, and Mr. Bousey in cabin.
Per British steamer *Parthia*, from Hongkong via ports:—Mrs. Le Prevost and 2 children, Messrs. McLean, Gilroy, Gittens, Mr. and Mrs. Stevens, Mr. and Mrs. G. Clark, Messrs. McGregor, Barnes, Hawes, Harvie, Campbell, Siyan, Mrs. Walker, Miss Stewart, Messrs. Hill, Sale, and A. F. Howe in cabin; Mr. Plagett, and 4 Chinese women and 2 children in second class, and 116 Chinese in steerage.

Per British steamer *Oceanic*, from Hongkong:—Surgeon Howard Smith, U.S.N., Mrs. Blockinger, Mrs. Marsh, Mr. Bryant, Mr. Richard Kirby, Lieutenant Berryman, Mr. J. Pestonjee and servant, Mr. S. P. Read and servant, Miss Rowe, and Ho Ming Sam in cabin. For San Francisco: Mr. James S. Feeney, Mr. C. Vivian Ladd, Mr. and Mrs. C. Tooley, Mrs. Emerson, Mrs. Field, Messrs. E. Fontanix, C. H. C. Moller, A. E. Dowler, Mrs. Read and child, Mr. Liebard, and Hee Choi Chune in cabin.
Per French steamer *Congo*, from Hongkong via ports:—Mr. K. Onné, Mr. Taki Yeyufi, Mr. and Mrs. Klobukowski, Mr. and Mrs. Tanks and two daughters, Mr. Lemercier, Mr. Lejeune Simons, Mr. and Mrs. Aranger, 2 children, and amah, Dr. de Malherbe and son, Messrs. B. Wagner, Ward Hall, Bredon, son, and amah, J. E. Tona-van, Mr. and Mrs. Ramer and 2 children, Mr. Luscombe, Mr. Rouze, Miss Sophie Canin, Mrs. and Miss Rosa Blank, Miss Augusta Avidia, Mr. J. Weber, Messrs. E. Tuck, Schlener, G. M. Vos Scinedias, and Alex. Seiman in cabin.

DEPARTED.

Per French steamer *Djemnah*, for Shanghai via Kobe:—Messrs. Max Niclussen, Delahaye, Masutaro, R. W. Mustard, Sister Angelique Joseph, Sister Marie Olier, Messrs. Hori Michinosuke, de Tinsseu, and Takashima Kekiiji in cabin.
Per British steamer *Parthia*, for Vancouver, B.C., via San Francisco:—Mr. A. W. Thomson, Mr. T. A. Singleton, Lieutenant Colomb, R.N., Mr. Coward, Rev. A. Lloyd and party, Mr. Kakuzen, Rev. W. J. White, Mr. and Mrs. Schinck and child, Messrs. T. and A. L. Hardy, Rev. H. Wigan, Messrs. J. Macpherson, T. K. Tunesaki, T. Tono, Ikeda, S. Iwashita, Kato, Rev. Mr. Sullivan, and Rev. M. N. McLaren, Jun., in cabin. From Hongkong: Messrs. Gilroy and E. W. MacLaine in cabin; Miss Suey San, Mrs. Looh Dese, Mrs. Di Sing, Miss Look Hoi San, Mrs. Man Kee and 1 girl, and Mr. B. W. Plagett in second class. From Foochow: Mr. John Gittins in cabin. From Shanghai: Miss C. Cushman, Dr. A. F. Howe, Messrs. J. A. Hawes, E. R. G. Barnes, James Harvie, Alexander Campbell, Mr. and Mrs. Geo. Clark, Mr. H. N. Macgregor, Mr. F. W. Siyan, Mr. and Mrs. F. H. Stevens, Miss Stewart, Mrs. M. Waller, and Mr. M. B. Hill in cabin. From Nagasaki: Dr. Salter in cabin.

Per British steamer *Gaelic*, for Hongkong:—Messrs. E. H. Melbye, H. Norman and native servant, Gilbert, J. A. Church and native servant, M. M. Noorden and native servant, C. Vogel, E. Blodgett, and Hara Asa and native servant in cabin.
Per Japanese steamer *Kobe Maru*, for Shanghai and ports:—Mrs. Ashton, Mrs. McGrath, and Mr. Walkinshaw in cabin; Messrs. N. Nakajima and K. Nakajima in second class, and 32 passengers in steerage.

CARGOES.

Per French steamer *Djemnah*, for Shanghai via Kobe:—Silk for France 91 bales. Waste Silk for France 1 bale. Treasure for Singapore \$100,000. For Shanghai \$2,000.

Per British steamer *Parthia*, for Vancouver, B.C.:—

REPORTS.

The British steamer *Hoihow*, Captain Sloss, reports:—Left Hongkong the 26th July; had light winds and very fine weather with smooth sea; the 28th at 5 p.m. weather looked squally from N.E. and for a short time appeared very unsettled and threatening; at 3.30 p.m. cleared up again; the 30th at 5 p.m. passed between the Islands of Akusu-shima and Suwa-shima in very fine weather and smooth sea; at 10 p.m. very heavy swell from the east which gradually got higher, and at daylight on the 31st had increased so much as to cause the ship to roll heavily, wind gradually increasing, and barometer at 29.82. August 1st barometer gradually falling and blowing a heavy gale, wind from N.E. with heavy cross and sea, weather looking very threatening speed was reduced to slow; the 2nd at 6 a.m. north-easterly wind and barometer steadily going down, tremendous cross sea and blowing a very heavy gale with terrific squalls accompanied with rain; at 7.30 p.m. observed Omai skai light; the 3rd at 4 a.m. still blowing a heavy gale, squalls also heavy wind N.N.E., barometer gradually falling, easterly swell decreasing; at 9.30 a.m. passed Vries Island. Arrived at Yokohama at 4.30 a.m. Barometer at noon 29.46, blowing still a heavy gale.

The British steamer *Gaelic*, Captain Pearne, reports:—Left San Francisco the 19th July at 3.50 p.m.; to the 21st had strong N.W. winds and head sea; thence to August 2nd light westerly winds with smooth sea, and foggy weather; August 3rd, moderate gale from south with heavy S.W. swell, wind veering to E.N.E. and blowing a gale, with very heavy squalls, and thence veering to N.W.; the 4th, strong N.W. gale, with heavy squalls and high sea. Arrived at Yokohama the 5th August at 10.05 a.m. Time, 16 days, 4 hours, 47 minutes.

LATEST COMMERCIAL.

IMPORTS.

The Yarn market has continued very quiet during the week. Only a few transactions in English spinnings have taken place and those show a marked decline on former quotations. Bombays have also remained quiet; all prices are more or less nominal. Shirts are very dull, and quotations are nominally 2½ to 5 cents. lower. Fancy Piece Goods have been very quiet. Sales for the week amount to 150 bales English, 85 bales Bombay spinnings, and 3,750 pieces Shirts.

METALS.

Some business on a small scale has been done at lower prices, especially for Iron bars. Importers begin to feel uneasy, and godown room is scarce, so they are tempted to let a few parcels go at these low rates. Wire Nails seem to be especially depressed, and prices tending down. Tin plates, though only in small supply, hang fire badly.

Flat Bars, 1 inch	12.70 to 2.80

Tin Plates, per box	4.80 to 5.10
Pig Iron, No. 3	1.30 to 1.35

KIROSENK.

Quotations are unchanged, but the market is very quiet. Dealers appear quite satisfied to look on, and await developments at present. A few thousand cases Devoo are reported sold, but the actual price has not transpired. There have been no fresh arrivals during the week, and considerable deliveries leave the stock about 610,000 cases of sold and unsold Oil.

QUOTATIONS.

Chester	Nom. \$1.75 to 1.77 1/2
Comet	Nom. 1.70 to 1.72 1/2
Devoo	Nom. 1.67 1/2 to 1.70
Russian	Nom. 1.65 to 1.67 1/2

SUGAR.

Holders of the remaining stock of Takao have succeeded in getting high figures for fully 12,000 piculs, parcels having been sold as follows:—4,200 piculs, at \$4.10 per picul; 3,200 piculs, at \$4.20; 2,500 piculs at \$4.55; and 3,000 piculs at \$4.70. Only 1,550 piculs of Refined have been disposed of at \$9.20 per picul for 300 piculs, \$7.74 for 750 piculs, and \$6.20 for 500 piculs. On the whole the market is very fine for Brown Takao, as remaining stocks are small with little to come forward. Advances from Takao report inclement weather throughout Formosa, but no serious damage has been done to the young cane.

White Refined	\$5.80 to 8.40
Manila	3.80 to 4.60
Taiwanfoo	— to —
Pentama	3.00 to 3.40
Namiida	2.90 to 3.20
Cake	3.70 to 4.10
Brown Takao	4.55 to 4.60

EXPORTS.

RAW SILK.

Our last issue was of the 1st inst., since which date our market has been fairly active, and settlements are entered as 250 piculs, divided thus:—*Filatures* 100, *Re-reels* 114, *Kakeda* 54, *Oshu* 2. Besides these Japanese have taken about 60 piculs for direct shipment, making the total business of the week equal to 330 piculs.

The chief demand has been for the United States Markets, and during the last two or three days considerable business has been done; prices paid show a slight reduction on those of last week, but holders are very firm about reducing quotations any further. At the same time buyers generally are not eager to enter the market at the present time; rates of Exchange now turning downwards, holders are somewhat encouraged to stand out for their own prices.

Supplies come in freely and regularly; *Filatures* and *Re-reels* being especially well represented in the stock list. It remains to be seen how long the present state of things will last; buyers for Europe are very conservative, consumers there stating

that they can buy Italian Silk to much better advantage than they can Japans. There is some danger of the American manufacturers taking the same view of things and operating in Europe instead of in Japan if holders here are too unflinching in their attitude.

There have been two shipping opportunities during the interval, French and Canadian Mail steamers each taking something. The *Djemnah* (3rd inst.) had 91 bales for France, and the *Parthia*, which sailed yesterday, took about 55 bales for New York. These departures bring the present export figures to 1,639 piculs, against 2,582 last year, and 3,648 at same date in 1888. The *Oceanic*, leaving to-morrow morning, will probably have 200 or 300 bales also for the United States Market.

Hanks.—There has been no business for export during the week; natives report that a few parcels have been taken for home consumption, but beyond this nothing has been done.

Filatures.—Here there has been some little business in good *Shinshu* kinds destined for the United States; holders have at last made some slight concession, and several parcels have been purchased at a reduction of \$15 on last week's rates. The last prices paid include *Hakusuru* and *Meishinsha* at \$675, with *Kairusha*, *Toeisha*, and *Seven Stars* at \$670. For Europe very little has been done; the only business being in No. 2 *Filatures*, part old Silk, which brought \$630 to \$640 per picul.

Re-reels.—Considerable business has been done in these during the last two days, and holders have succeeded in getting very good prices. They are now inclined to ask something more in the anticipation that Exchange will go still lower. Among recent purchases we find *Kite Chop* \$640, *Shorusha* \$630, *Shomeisha* \$630, *Kodama* \$627 1/2; all these purchases are apparently for the United States. For Europe about 40 boxes medium *Yechigo* and *Miyagi* have been done at about \$600 per picul.

Kakeda.—The principal transaction has been the purchase up country at high prices, which have been kept secret, of about 35 piculs. The silks went forward to Lyons by last French Mail.

Oshu kinds.—Nothing has been done beyond a sample bale of *Hamatsuki*, price unknown.

WASTE SILK.

There has been some little business in new fibre (mixed with old) resulting in the purchase of about 50 piculs.

There is no real change to note in the position of affairs; buyers and sellers still keep asunder, and at present it seems as though there would not be any serious business for some time to come.

The *Djemnah* took 33 bales, and the export for present season to date is now 727 piculs, against 314 last year and 1,148 on the 8th August, 1888.

Pierced Cocoons.—Stock of these has increased considerably, but at present no transactions have

taken place. Owners still ask high prices, which buyers refuse; we must therefore wait a little longer before anything can be done.

Noshi.—The only business of the week has been in this department a buyer for France taking about 50 piculs *Bushu Filature* at prices ranging from \$135 to \$147. The market for the great staple *Josku* has not yet opened, and sellers must moderate their ideas very considerably if they want to do any business in the near future.

In other departments nothing whatever has been done.

CONTRACTORS TO THE ADMIRALTY, LEADING STEAMSHIP COMPANIES, AND YACHT OWNERS.

STEAM LAUNCHES & YACHTS,

Fitted with KINGDON'S PATENT MACHINERY (of which we are sole makers) are far superior to any others. The chief advantages are:—

1. Wonderful Economy of Fuel.
2. First-class Workmanship.
3. Moderate Prices.
4. Greatest obtainable power for weight and space occupied.
5. Quickness in raising steam.
6. High rates of speed guaranteed.
7. Absence of noise and vibration.

We build Steam Launches of every description, from the smallest also suitable for carrying on yachts of 10 tons and upwards. We also build small light Draft Paddle Boats, Tugs, Stern Wheel Paddle Steamers, and Boats in Frames, &c., &c. We supply also of Machinery separately. Illustrated Catalogue in English, French or Spanish. Send for Copy to

SIMPSON, STRICKLAND & CO.

WORKS:
DARTMOUTH, SOUTH DEVON (ENGLAND).

LONDON OFFICE:
181, QUEEN VICTORIA STREET, E.C.

MACHINERY.—Mr. ARTHUR WADHAM, proprietor of *The Machinery Market and Exporter* (illustrated)—the greatest machinery business journal published—(subscription 12s. 6d. per annum post free); London Agent of Messrs. Simpson, Strickland & Co., steam-launch builders, is also a large exporter of Machinery and Engineering Materials. Mr. Wadham is open to act as sole Buying Agent in England for one or two good firms in Japan desiring to deal with a reliable house. Mr. Wadham's intimate knowledge of the English Machinery and Engineering Trades enables him to save large sums to foreign customers placing their orders in his hands. Firms dealing with Mr. Wadham may rely upon being served in a prompt and straightforward manner. Address:—Mr. Arthur Wadham, Engineering Offices:—181, Queen Victoria St., London. Registered address for telegrams:—“Wadham, London.” June 28, 1890.

THE GREATEST WONDER OF MODERN TIMES. HOLLOWAY'S PILLS.

PERSONS suffering from weak or debilitated constitutions will discover that by the use of this wonderful medicine there is “Health for all.” The blood is the fountain of life, and its purity can be maintained by the use of these Pills.

SIR SAMUEL BAKER, in his work entitled “The Nile Tributaries in Abyssinia,” says:—“I ordered the druggist to inform the Fakir that I was a Doctor, and I had the best medicines at the service of the sick, with advice gratis. In a short time I had many applicants, to whom I served out a quantity of Holloway's Pills. These are most useful to an explorer, as, possessing unmistakable purgative properties, they create an undeniable effect upon the patient, which satisfies them of their value.”

SIMPLE, SAFE, AND CERTAIN! HOLLOWAY'S OINTMENT

Is a certain remedy for bad legs, bad breasts, and ulcerations of all kinds. It acts miraculously in healing ulcerations, curing skin diseases, and in arresting and subduing all inflammations. Mr. J. T. COOPER, in his account of his extraordinary travels in China, published in 1871, says:—“I had with me a quantity of Holloway's Ointment. I gave some to the people, and nothing could exceed their gratitude; and, in consequence, milk, fowl, butter, and horse feed poured in upon us, until at last a teaspoonful of Ointment was worth a fowl and any quantity of peas, and the demand became so great that I was obliged to lock up the small remaining ‘stock.’”

Sold by all Chemists and Medicine Vendors throughout the World.

KEATING'S INSECT POWDER.

BUGS, BEES, MOTHS, BEETLES, and all other insects, are destroyed by KEATING'S INSECT POWDER, which is quite harmless to Domestic Animals. In exterminating Bees, the success of this Powder is extraordinary, and no one need be troubled by these pests. It is perfectly clean in application. Ask for and take no other than “KEATING'S POWDER,” as imitations are noxious, and fail in giving satisfaction. Sold by all Chemists, in Tins and Bottles. May 3, 1890.

NOW READY,

WITH COLOURED PLAN.

A FULL REPORT on the ERUPTION of BANDAI-SAN, being a reprint from the “JAPAN MAIL” of copious translations from Tokyo Journals, a Description by “Our Reporter,” and an “Editorial,” written after a visit to the locality. Price 50 Cents.

To be obtained at the Japan Mail Office, or of KELLY & WALSH, Limited.

YARROW'S SMALL STEAMERS AND STEAM LAUNCHES.

SCREW STEAMERS WITH SPEEDS RANGING UP TO 30 MILES AN HOUR.

PADDLE STEAMERS WITH DRAFT RANGING DOWN TO 6 INCHES OF WATER.

Stern Wheel Steamers with very shallow draft especially suitable for river navigation.

NOTICE TO CORRESPONDENTS.

No notice will be taken of anonymous correspondence. Whatever is intended for insertion in the "JAPAN WEEKLY MAIL" must be authenticated by the name and address of the writer, not for publication, but as a guarantee of good faith. It is particularly requested that all letters on business be addressed to the MANAGER, and Cheques be made payable to same; and that literary contributions be addressed to the EDITOR.

YOKOHAMA: SATURDAY, AUGUST 16, 1890.

BIRTHS.

On the 10th inst., at 008, Bluff, the wife of PAUL EMIL FREDERIC STONE of a Daughter.

At 121, Bluff, on the 10th instant, the wife of G. K. DINDALE of a Daughter.

MARRIAGE.

At Christ Church, Yokohama, on the 11th inst., by the Rev. E. Champneys Irwin, M.A., ROBERT HAY, *Japan Mail*, to JESSIE, second daughter of A. T. Watson, Yokohama.

DEATH.

On the 14th August, at 141, Bluff, Yokohama, DAVID FITZ-HENRY, aged 40.

SUMMARY OF NEWS.

Mr. Tsuji, Vice-Minister for Education will, it is said, be appointed Japanese Minister to China shortly.

VISCOUNT TORIO was to leave Nagoya on the 9th inst. for the province of Mino, to meet his political friends.

COMMANDER PRINCE ARISUGAWA TAKEHITO was promoted to Captain on the 11th instant, being raised to second class of *sonin* rank.

DURING the month of July last the coins struck in the Osaka Mint were yen 792,386 in silver and yen 111,000 in nickel pieces.

THE line of the Osaka Railway Company between Kashiwabara and Nishiguchi, will be opened on the 1st September for traffic.

MR. ASADA, Prefect of Kanagawa, proceeded to Odawara on the 8th inst. and had an interview with Count Ito lasting several hours.

H.L.H. PRINCESS KITASHIRAKAWA returned to Tokyo on the 8th instant from Nikko, where the Princess had been staying for some time.

HIS MAJESTY THE EMPEROR was present at a meeting of the Privy Council held on the 8th instant, returning to the Palace at 1.40 p.m.

THE revised Regulations relating to the Bank of Japan were promulgated on the 8th inst. over the signatures of Counts Yamagata and Mats-

kata, by Law No. 61. The regulations will come into force on the same day as the Commercial Code.

DURING May last, the number of visitors to the Industrial Show, Shiba, was 42,137, by whom 42,217 articles, valued at yen 9,347,249 were purchased.

IT is stated that Count Oyama, having resigned his position of Minister of State for War, Lieutenant-General Viscount Takashima will succeed him.

DURING the month of July last the number of visitors to the Botanical Garden of the Imperial University was 856, of whom 6 were foreigners and 170 special visitors.

MR. ARAI IKUNOSUKE was appointed Superintendent of the Meteorological Central Observatory on the 7th instant, being raised to second class of *sonin* rank.

A STORM of great violence swept over Kadokamura, Higashiusuki, Miyasaki Prefecture, on the 27th ultimo, and destroyed seven houses, four persons also being injured.

THE number of persons attacked by cholera throughout the Empire from the commencement of the epidemic to the 11th instant was 3,916, of whom 2,094 died.

THE total number of persons attacked by cholera throughout the Empire from the commencement of the epidemic to the 13th instant was 4,331, of whom 2,306 died.

AT the half-yearly meeting of the Tokyo Electric Light Company held on the 11th inst. at the Bankers' Club, Sakamoto-cho, a dividend was declared at the rate of 7 per cent. per annum.

HER MAJESTY THE EMPRESS, accompanied by Viscount Kagawa and several Ladies-in-Waiting, paid a visit to the Empress-Dowager at the Aoyama Detached Palace on the afternoon of the 8th inst.

AN application by Mr. Takasaki, Senator, for permission to commence coal mining operations at Shirami, Fukushima Prefecture, has been rejected by the Minister of State for Agriculture and Commerce.

DYSENTERY is now prevailing extensively in the city of Fukuoka, and the number of persons attacked from the commencement of the epidemic to the 9th instant was 7,623, of whom 1,039 died.

IT is stated that Mr. Yano Fumio, leading member of the *Katchin-to* party, and Mr. Hato-yama Kadzuo, late chief of the Law Bureau in the Foreign Department, will be nominated by the Emperor as members of the House of Peers.

DURING the week ended the 31st ultimo, exhibits valued at yen 2,649.02 were sold in the Exhibition, showing an increase of yen 82.655 as compared with the previous week, and making a total of yen 107,354.019 since the opening of the Exhibition.

ACCORDING to investigation made by the Department of Communications during July last, the telegraphic offices in the Empire dealt with 391,698 telegrams, showing an increase of 103,616 telegrams as compared with the same month of last year.

IN consequence of the recent heavy rainfalls, the Mamigasaki river, in Yamagata Prefecture, overflowed on the 6th instant, twenty-one houses and thirty bridges were carried away, about one

thousand two hundred houses being partially destroyed by the flooding, and three persons were drowned.

AT a meeting of members of the *Seinen Jiyu* Club, Tokyo, organized by *soshi*, held on the 10th instant, it was decided that the Club should be dissolved.

A NOTIFICATION has been issued by Count Matsukata, Minister of State for Finance, to the effect that Seven per Cent. Capitalised Pension Bonds, amounting to yen 1,500,000, will be drawn in the present month.

VISCOUNT INOUYE, President of the Railway Bureau, who went to Nikko on the 1st instant, to be present at the opening of the line between Nikko and Imaichi, returned to Tokyo on the 11th instant.

ACCORDING to a report by the Japanese Consul at Jinsen during the month of June last, the imports at Jinsen amounted to yen 191,114.20, and the exports to yen 173,860.28, making a total of yen 364,974.48.

OWING to the recent continuous and heavy-rainfall, several rivers in the Adzumi district of Iwashiro province, overflowed on the 16th instant, and sixteen houses, twenty-four bridges, and twenty telegraph posts were carried away, eight persons being drowned.

A PHYSICIAN named Kaneda Seichichi, residing at Minamitemma-cho, Kyobashi, was sentenced to pay a fine of one yen in the Kyobashi Police Office on the 10th instant, for having failed to report to the Authorities that a person whom he examined was attacked by cholera.

THE Import trade is very dull, and transactions are so insignificant as to leave prices almost nominal. This is especially the case with regard to Manchester goods, Metals, and Kerosene, and stocks are generally heavy. A few small parcels of Sugar have been sold, and the high price obtained for Takao is due to the strength of holders and the depletion of the stock on hand, there being but little more to arrive. The Silk market continues to be controlled by the condition of exchange, holders asking about the same dollar prices as last year when exchange was 3s. 2d. as against the present rate of 3s. 9d. Less than 500 piculs have been put through during the week, including 82 piculs direct shipment, and the stock in now nearly double that of last season at same date. Telegrams from consuming quarters show that Italian Silk is being purchased freely on account of the high figures demanded here, and there does not appear to be any immediate prospect of the heavy transactions in this market which usually take place at this period. The quality of the summer reelings is described as "superb." This fact, taken with the good assortment and large stock now on the market, shows that the only thing necessary to induce a brisk business is a modicum of reason on the part of holders in regard to the exchange question. Dealers are apparently waiting for a fall in silver, but there is no indication of a downward course for the white metal at present. The Waste Silk business is small, but some new staple has at length passed the scales; buyers, however, cannot go on at present prices. The Tea trade is steady, and values are unaltered. The receipts of leaf here are already 5,000 piculs more than the total last season, and there is doubtless a good deal more to come in if present rates are maintained. Exchange has fluctuated slightly, but after declining a point or two has risen again to-day, and closes firm with a further upward tendency.

EDITORIAL NOTES.

THE 28TH ARTICLE OF THE NEW LAW OF PUBLIC MEETINGS AND POLITICAL ASSOCIATIONS.

We have explained that the provisions of the 28th article of the new Law of Public Meetings and Political Associations exist in British statutes enacted in the reign of George III. and still in force. As the fact is interesting we quote the parallel provisions of the British statutes:—

Every Society which shall be composed of different divisions or branches, or of different parts acting in any manner separately or distinct from each other, or of which any part shall have any separate or distinct president, secretary, treasurer, delegate or other officer, elected or appointed by or for such part, or to act as an officer for such part, shall be deemed and taken to be unlawful combinations and confederacies; and every person who from and after the passing of this Act shall become a member of any such Society, or who being a member of any such Society at the passing of this Act shall afterwards act as a member thereof, and every person who after the passing of this Act shall directly or indirectly maintain correspondence or intercourse with any such Society, or with any division, branch, committee or other select body, president, treasurer, secretary, delegate or other officer or member thereof as such, or who shall, by contribution of money or otherwise, aid, abet, or support such Society, or any members or officers thereof, such shall be deemed guilty of an unlawful combination and confederacy. * * * Every Society or club that shall elect, appoint, nominate or employ a committee, delegate or delegates, representative or representatives, missionary or missionaries, to meet, confer or communicate with any other Society or Club, or with any committee, delegate or delegates, representative or representatives, missionary or missionaries of such other Society or Club, or to induce or persuade any person or persons to become members thereof; shall be deemed and taken to be unlawful combinations and confederacies.

The corresponding provision in the new Japanese Law is:—"Political associations may not influence the public by issuing documents or sending deputies, or establish branch offices, or combine and correspond with other political associations."

* * *

The identity of British law and Japanese law in this particular instance serves to point a moral only too often illustrated by the carping ignorance of certain foreign critics in our settlement. One of our English local contemporaries denounces the new Japanese law as a "grossly coercive measure," and calls upon "the Foreign Ministers in Japan to take the opportunity of pointing out to the Governments that accredit them what are the species of laws under which it is hoped that foreigners will be placed." How sapient Her Majesty's Representative would seem if he addressed a despatch to Lord Salisbury protesting against the danger of placing British subjects in Japan under laws to which they are already submitted in Great Britain? It is scarcely possible for the victims of blind prejudice to render themselves more ridiculous than they have done by thus crying out against an English law merely because it is presented to them in a Japanese dress.

* * *

Yet the feat is not impossible, for the same silly critic presents a still more laughable spectacle when he attempts to comment on the practical application of the new law. He prattles sarcastically about "the beauties of constitutional government as understood in Japan," and about the iniquity of giving the law "a retrospective effect" by enforcing it against the *Koin* Club, which was formed previously to its enactment. Nay, so completely does his desire to abuse Japan transport this exultant traducer that he finds "the whole affair a capital warning to European statesmen as to what constitutes constitutional government in Japan." A capital warning indeed, not of Japanese arbitrariness, but of the prodigious nonsense that an ignorant journalist can pen when his only guide is a consuming desire to revile everything Japanese. The most childish person ought to understand that if a law interdicting gambling houses, for example, were enacted, it would be enforced against gambling houses already in existence just as uncompromisingly as against gambling houses subsequently opened. The *Koin* Club is an illegal association under the new Law, and to pretend that, despite its illegality, it must be suffered to exist simply because it existed before the Law was framed, is quite one of the funniest contentions we have ever heard. If this common-sense view is beyond the com-

prehension of our very abusive contemporary, we recommend him to peruse carefully the above-quoted extracts from the British statutes, where he will find it laid down that "every person who being a member of any such society at the passing of this Act shall afterwards act as a member thereof * * * shall be deemed guilty of an unlawful combination and confederacy." Truly "the beauties of constitutional government, as understood in Great Britain, are charmingly exemplified" by this statute of Geo. III., and "the whole affair is a capital warning to Japanese statesmen as to what constitutes constitutional government in England."

VISCOUNT TANAKA AND POLITICAL ASSOCIATIONS.

A reporter of the *Kokumin Shimbun* has had an interview with Viscount Tanaka, Chief of the Metropolitan Police Board, in regard to the law prohibiting political associations from entering into combination. The following is a translation of the interview:—On hearing of the steps taken by the police for the enforcement of the Law of Meetings and Political Associations, I repaired at once to the official residence of the Chief of Metropolitan Police in order to interview him. I found Viscount Tanaka in his carriage ready to go out, but on seeing me, he alighted very kindly, invited me into the house and gave me time for conversation. I stated that the object of my visit was to obtain detailed information about the intimations given by the police to various political parties. "As you know," said the Viscount, "we have at present many kinds of associations, some of which pretend to be merely social clubs, when in reality they are political, while others form combinations with one another in direct contravention of Art. 28 of the Law of Meetings and Political Associations. Take the case of the *Koin* Club, for instance. Ostensibly it is organized by persons who have separated themselves from the *Daido Danketsu*, the *Aikokuho-to* and the *Yiyo-to*, but in reality they retain their original connection with their respective parties, so that their action in forming the club is in direct conflict with Art. 28 of the above named Law. The Government is determined to enforce the law to the letter, but as this matter has been dealt with in the past with great leniency, any sudden enforcement of the new law might bring many persons within the scope of criminal procedure, and for this reason the Authorities have allowed a week's interval in order to avoid such deplorable consequences." On being asked the reason for this change of the Government's policy, the Viscount replied:—"Simply because the Government has learned by experience that leniency in regard to such matters must involve evil consequences. It was owing to such leniency that the disastrous incident occurred in Count Okuma's case," (referring doubtless to the combination of five political parties opposed to Count Okuma's programme of Treaty Revision. "Is this change of front on the Government's part on account of the contemplated alliance of all progressive parties?" I ventured to ask. "According to what is reported in the newspapers," said Viscount Tanaka, "the so-called triple alliance as well as the alliance of all progressive parties, initiated by Kiushiu people, are all attempts to combine the different parties, not because they entertain the same political principles, but simply because they are opposed to the present Government. And viewed in this light, such attempts cannot but be regarded as prejudicial to the maintenance of public peace and order. But bear in mind that the Government is actuated in this matter by no prejudice against the people. The only solicitude of the Authorities is to avoid the necessity of inflicting punishment on agitators." "So then the Government is determined to enforce the law in question according to its strict letter, and to the full extent of its scope?" was my next query. The Viscount replied:—"I am not fully prepared to give a definite reply to your question. You see the case is quite different from an ordinary exercise of the judicial authority. The sole object of the Government in enforcing the law,

is the preservation of public peace and order. Consequently, unless there is a danger of this object being defeated, there will be no need of resorting to rigorous measures; but on the other hand, should any such danger present itself, the law will be enforced to the utmost. In short, much depends upon actual circumstances." "But can we understand that the general policy of the Government is to enforce the law strictly?" I asked. "Yes, of course" was the reply. "In my opinion the organization of a new association by persons whose names have already been stricken out of the rolls of their original political parties, can in no way conflict with the law in question," I observed. "Yes," said the Chief of the Police Board, "if they really have severed their connection, but if they merely seek to evade the legal technicality, the case will be fully investigated and dealt with accordingly."

OFFICIAL REPORTS OF THE DIET'S PROCEEDINGS.

THE arrangements for publishing an official report of the proceedings of the Diet (*Gijiroku*) appear to have involved a good deal of thought. The Chief Secretaries of each House are said, by the *Hochi Shimbun*, to have held various consultations, and to have finally decided that the report of the proceedings of each day shall appear in the *Official Gazette* of the following morning. For this purpose eighteen stenographers (*sokki ka*) are to be employed in each House, the time for one stenographer's work being fifteen minutes. Doubtless the organisers have been guided in this matter by English practice, the custom of stenographers in the House of Commons being the same with regard to time as that now to be adopted in Japan. In England, however, there is no hard-and-fast rule. The stenographic staff of a great journal, *The Times* for example, consisting of ten or twelve writers, is under the control of a chief who schedules the time when each stenographer is to go on, and in fact regulates the movements of his subordinates as though they were a squadron of soldiers. The theory is that to transform short-hand into long-hand requires about eight times as long as to write the former; but of course when a stenographer is making copy for a journal which he habitually supplies, and where his abbreviations in long-hand are well-known, he can appreciably shorten this time. We do not know whether accurate investigations have been made to ascertain the comparative labour of transforming Japanese short-hand into ideographic script, but the operation would probably be more expeditious than that of transcribing into alphabetical long-hand. In the English Parliament it is often found necessary at the close of a debate to phonograph "copy" to the printing room of a newspaper. We shall be interested to learn whether anything of this kind is contemplated in the Japanese Diet. The operation would be a good test of the phonetic capabilities of a language which, according to some sinologues, can only be ideographically rendered in writing.

RECENT FLOODS IN IBARAKI.

A CORRESPONDENT, writing from Mito on the 9th inst. says:—"The past week has been rather a calamitous week in Ibaraki *ken*. Last Sunday night the ocean waves rose "like a mountain" (to quote the local journal), and caused great damage on the coast. In the town of Minatu, at the mouth of the Naka River, 40 houses were partially or entirely destroyed, but no lives were lost. At Hirabata, farther to the north, a few houses were destroyed, and two persons perished. I presume that there was more or less damage "all along shore," but I have no specific information. Next came the floods, which were much worse than my hasty note of the 7th inst. indicated. I have just returned from a day's trip to the north, and found that the damage occasioned by this flood was much greater than that occasioned by the floods of last year. The waters had to a great extent subsided by yesterday (Friday); but they are still higher and much swifter than ordinary. From the natural bed of the Naka River to the hill on which Mito

(upper town) is located is a distance of about half a mile. The fields of this district were entirely submerged, many houses were washed above the floor, and, just at the foot of the hill, even almost to the roof. On the morning of the 7th inst. houses came floating on the rapid current, and, striking against the bridge at Aoyagi, broke down almost half of it, and also demolished the bridge a little farther down stream. Mito (lower town), being situated in the lowland nearer the river, was badly flooded. There were no lives lost along the Naka River, so far as known up to date. The damage of 3,000 *yen*, estimated for Tokiwamura alone, may give some idea of the destructive effects of the floods. But when we reach the Kuji River, farther to the north, we find yet more terrible effects. For a good half mile on both sides, that river, with an incredibly rapid current, spread its devastation. The flood came so suddenly, that there was, in some cases, no opportunity to remove the mats, furniture, &c., which were either completely drenched or swept away. Along the Kuji River many houses were overthrown or carried away, and some lives were lost; but I am not yet able to verify the report on good authority. In some places even the drains rose so high as to enter many houses; so that along the sides of the road to-day mats and other articles of furniture were to be seen set out to dry. The houses on the bank of the river at one ferry were submerged to the second storey. The crossing at that place was made under great difficulties, only by paddling quite a way up stream, rowing across side-ways with the current, and perhaps, paddling up again to the landing-place. Ferry charges were, of course, higher than usual. In some localities, as the rice had not yet blossomed, it was not greatly damaged, but along the Kuji River all the crops, being either washed out or crushed down, will probably be a failure. So strong was the current of the overflow that even trees, some distance from the river, were uprooted. The local newspaper says that there has been no such flood in this locality for 50 years.

MR. YANO FUMIO.

THE *Kokumin-no-Tomo* of the 3rd instant has an interesting article on Mr. Yano Fumio, one of the leading political figures in Japan. He is a comparatively young man, being scarcely over forty years of age, but he has been for the last few years considered as the most important member of the *Kaishin-to*, next to its leader, Count Okuma. His retirement from the political field at a time like the present has, therefore, been received by the public with much astonishment and suspicion. The Tokyo magazine thinks that Mr. Yano has probably decided to take this step in order to survey his situation in the political world, and reflect on the course which he ought to steer in the future. After noticing a few of the current rumours as to the object for which he chose to retire from public life, our contemporary proceeds to remark that nothing is more regrettable for a statesman than that he should be forgotten by the people. In this respect Mr. Yano is to be envied, as he can scarcely move a step without calling forth public criticism, whether favourable or not, which shows how highly he is considered by his countrymen. A statesman being public property, the people ought to know his true value, and accordingly the *Kokumin-no-Tomo*, though it does not pretend to understand Mr. Yano thoroughly, proceeds to explain his situation in politics. The present juncture, we are told, is of special importance to him. He has to decide once for all whether he will continue to be a partisan or whether he will henceforth stand aloof from parties. "In other words he has to decide whether he will aspire to become the nation's leader, or whether he will be contented with the leadership of a party. To put it in a concrete form, is he to be a second Count Okuma or a second Mr. Fukuzawa? We suppose that Mr. Yano is now considering this question and that he is as yet unable to decide it." Which way he will decide, our contemporary does not pretend to foretell, but his mind being at present engrossed with the question, the Tokyo

periodical is sure that he has no leisure to think of the various projects and intrigues with which his name has lately been associated. Then passing on to the analysis of his character, the *Kokumin* quotes the well-known saying that Burke was too much of a philosopher as a statesman, and too much of a statesman as a philosopher, and avers that the same may be said of Mr. Yano. It is the combination of these two qualities that has hitherto prevented Mr. Yano from achieving decided success as a practical statesman. Our contemporary considers him too fair-minded to be an effective partisan. Another circumstance disqualifying him for taking an active part in party warfare is a lack of that physical verve which has sustained Count Iwakura under extremely trying circumstances, and which has enabled Mr. Mutsu to become a leading member of the Government against which he once rebelled. Mr. Yano is therefore, in the opinion of our contemporary, better qualified to be a tactician than a general. The Tokyo journal regrets, for his sake, that circumstances have compelled him to be at once a tactician and general in the camp of the *Kaishin-to*, a Honda Sadonokami and an Ii Naomasa. But it does not by any means follow that Mr. Yano is indifferent and cold. On the contrary, his nature is warm, and when he is once excited he is capable of rising to a majestic height of eloquence. Very seldom, however, does he become roused in this manner. His retirement is, in our contemporary's opinion, analogous in one respect to that of Count Ito. What the latter has been to the Government, the former has been to the *Kaishin-to*, and they have both chosen to quit the political field when they are most wanted in their respective spheres of activity. In conclusion, the *Kokumin* observes that, if Mr. Yano intends to continue a party politician, he will have to change his nature more or less, but that, if he chooses, he may without doing any violence to his inclinations, aspire to be a second Mr. Fukuzawa. He is advised, therefore, to think thrice rather than twice before taking a step.

OFFICIAL CHANGES.

No predictions of the vernacular papers prove false, as a rule, than those they are so fond of uttering about changes in the official personnel. We dare not attempt to estimate how many Cabinets have been made and unmade by our Tokyo contemporaries, but we venture to assert that general scepticism is the outcome of their past utterances. In order, however, that our readers may know the undercurrent of public thought, we give the following from the *Fumiuri Shimbun*:—"A report, to the effect that the Minister of Justice has the intention of resigning his office, is obtaining greater currency every day. We are unable to say whether the cause of Count Yamada's contemplated resignation is because serious opposition has been raised against the enforcement of the Commercial Code, and because of the unfavourable criticisms heaped upon it, or because, having successfully carried out his great work, he desires to retire at the zenith of his fame, in order to make a triumphant tour round the world as another Napoleon of the land of the Rising Sun. To the query who will be his successor, the ready answer is that Mr. Inouye Ki would be the right man in the right place."

THE PRESIDENCY OF THE UPPER HOUSE.

REFERRING to the question, who shall be president of the House of Peers, the *Kokumin Shimbun* reports that this point is at present a very prolific topic of discussion among the peers. Count Yanagiwara appears to be the most popular. He is a man of firm resolution and great zeal, and, though somewhat disliked by the older portion of the peers as being too independent, he is in great favour with the younger nobles. In his present post as President of the Senate, he has acquitted himself so creditably that his ability to fill the chair of the House of Peers, is admitted on all hands. But Count Ito, continues our contemporary, is very popular with all ranks of the peers, and if he consents to become a candidate for the post,

there is no room for doubt that he will obtain more votes than Count Yanagiwara. Marquis Saionji is another popular man, but the *Kokumin Shimbun* thinks that, owing to his absence at this juncture, he will have no chance of election. As to the vice-presidency, the Tokyo journal reports that Marquis Asano and Viscount Ogita stand most prominent. But the fact that the Marquis belongs to the so-called "Great Daimyo" class detracts something from his popularity with the general body of peers. There are, the *Kokumin Shimbun* informs us, two parties in the Peers' Club known as "the Great Daimyo Party" and "the Small Daimyo Party." The former being inferior both in number and ability, are always defeated in debate, and consequently they try to abolish the club, to which course the peers belonging to the Small Daimyo Party are strongly opposed. As Viscount Ogita is the champion of this dominant party, it is very probable that he will be the successful candidate.

AN EXCITING CONFLAGRATION.

A CORRESPONDENT writes:—"I arrived in Edinburgh from Liverpool at noon on Monday, 16th June, and, leaving my baggage at the Caledonian depot in West Princes Street, went off in search of rooms. About 3 p.m. having found these, I hired a cab, and giving the man the left luggage receipt, told him to bring the things to my new address. He heard me to the end, and then, with true Doric cannyism, responded quietly: "Ay, but I'll maybe no get them. The station's been in a low (blaze) this hour and a quarter." I stared at the man for a moment, then entered the vehicle, banged the door to, and told him to drive off thither as quickly as he could. When we arrived, the sky was lurid with the flames from the station, a mean wooden erection quite unworthy of the locality. The plans, indeed, for a more suitable structure have for some time been drawn out. Fire-engines were playing upon the main shed, seemingly with but little effect. The wind was from the south-west, driving the flames through the long main shed, which lies N.E. and S.W., and it was therefore found impossible to work from that side. Passengers' luggage was strewn in heaps over the grass plot in front—valises, trunks, cloaks—and even an old-fashioned eight-day clock lay face downward among the rest. It was an exciting scene. I managed with difficulty to obtain an entry, and finally was delighted to secure all my belongings, and to make off in triumph through the gates. The flames were extinguished before the whole building was consumed; and such was the energy of the officials that traffic was resumed in the depot that evening. The loss is estimated at from £5,000 to £6,000. Some of the rolling stock was burned."

SUPERNATURAL DESIGNS OF BIGAMY.

HERE is a story from the *Shih Pao*:—"The strange phenomenon of a dual bride often occurs in certain parts of the Canton province. A family consisting of a mother, a father, and a son living in the district of Liang-shan of the Liang-cho in the province of Canton, had a marriage celebration in the first part of the 2nd moon. When the sedan chair containing the precious load, the bride, arrived at the door, and at the time for the performing of the usual nuptial ceremonies; lo! there appeared two brides exactly the same in person and dress, confusing the bridegroom as to the rightful one for him to take for wife. The dual personages followed exactly each other's movements. The parents, after much mooted discussion, decided to send for the bride's mother to identify her own daughter, but upon her arrival, on questioning her daughter, she was also thrown into great mental confusion by their giving out exactly the same replies. She thought she was afflicted with mental aberration, so she said that she must examine her daughter *in nudo*, for on her daughter's right leg there was an old scar and a peculiar birth mark upon her abdomen, by which signs only could she distinguish the true daughter; but she was greatly surprised by finding these marks

on both! The bridegroom, after impatiently waiting for two days after the auspicious day, made a bold stroke by having the marriage ceremonies performed with both, when the false one disappeared as strangely and suddenly as she appeared in the chair. The family was put into great fear that some calamity would happen to them, as it was believed this beautiful appearance must have been one of the Devils personified, and whenever such an occurrence happens in a family, some of its members either die or other evils befall them. The public may incline to discredit such a mysterious phenomenon, but there must be some truth in it, or else it would not have been repeated so frequently in that district. It had occurred to one person, there is every possibility of his mental derangement, but the whole company witnessed it."

COUNT GOTO, THE LAW OF PUBLIC MEETINGS, AND POLITICAL ASSOCIATIONS.

FOR some days past, public attention has been keenly directed to the new Law of Public Meetings and Political Associations. Some of the vernacular papers have been pretty free in pronouncing adverse criticisms and have endeavoured to hold up its initiators to public odium. Some have even gone so far as to insinuate that the unenviable reputation of being father to this unpopular measure, belongs to Count Goto, whom they represent as having resorted to it in the hope of frustrating the well-known alliance scheme and of keeping his own party intact. But judging by a statement of the *Fiji Shimpō's* interviewer, the Count appears in this instance, to have fallen a victim to the proverbial misrepresentations of partisan journalism. On being interviewed, he is represented as having told the reporter that he could not divulge the confidential affairs of the Government by naming the authors of the laws that pass through the hands of the Cabinet; in fact he did not even know them all. "You see," said the Count, "all the drafts of laws submitted to the Cabinet are initiated in their proper department. Thus the drafts of laws relating to financial affairs are prepared by the Department for Finance, those connected with posts and telegraphs by the Communications Department, &c., &c. These distinctions are very strictly observed, and a little reflection will show at once the absurdity of the report that the law in question, bearing no relation whatever to the official functions of the *Teishin Daijin*, was initiated by me." When asked his personal opinion concerning the law, the Count replied to the effect that he would not make any comment on a law which had already been promulgated after passing the proper channels of legislation, but that he did not think the law so objectionable as is generally represented.

Since the promulgation of the law, nearly all our Tokyo contemporaries have persisted in representing Viscount Aoki, and Messrs. Yoshikawa and Mutsu, especially the last named Minister, as in strong opposition to this measure. The idea that three of the Cabinet Ministers should be opposed to a measure which they must be assumed to have endorsed before it became a law, is quite beyond our comprehension. The *Fiji Shimpō* tries now to solve this puzzle. "The difference between the old and the new Law of Public Meetings and Political Associations," says our contemporary in effect, "consist not in its form, but only in the manner of enforcing it. So far as the form is concerned, the new is much more liberal than the old, but when the manner of enforcement is considered, the reverse is the case. Thus the prohibition placed on the union of different political associations was expressly provided in the old, just as much as in the new law. But while the former was in force, the Authorities acted with great leniency, scarcely enforcing the provision except in unavoidable cases, so that political parties had practically no cause to complain of the law. Such being the case, when the draft was submitted to the deliberations of the Cabinet, it readily obtained the endorsement of the Ministers, as it was evidently much more liberal in other respects than the original provi-

sions. When, however, the amended law came to be carried into practice, it assumed an entirely different aspect, and some of the Ministers, including Viscount Aoki and Mr. Mutsu, are reported to be much surprised at this unexpected result." How true the *Fiji's* statement may be we do not pretend to say, but we do think that a great deal of needless fuss has been made about this law. In point of fact it places no obstacle whatsoever in the path of party combination. If political associations really desire to combine, they have only to dissolve their existing organizations, a sacrifice which ought not to deter them if their union is honestly based on community of principles. There may be some subtle purpose in their apparent wish to join hands for the attainment of a special object and afterwards to break up into separate camps. But we do not appreciate that purpose, neither can we easily conceive it to be based on sound considerations of public utility.

THE NORTHERN RAILWAY.

ACCORDING to the expectation of the Japan Railway Company, says the *Fiji Shimpō*, the line will be extended to Morioka in September and on to Nonai during the present year. This leaves a very short distance to Aomori, the northern terminus, but in consequence of the exorbitant price asked for land by some unprincipled real-estate brokers, the Railway Bureau temporarily stopped the purchase of land for the track between Nonai and Aomori. Recently, however, Viscount Inouye and Mr. Ono, the Vice-President of the Japan Railway Company, made an tour of inspection to those places and declared their readiness to commence the work at once in this section, if the land could be purchased at a reasonable price. This induced the Aomori folks to come to the conclusion that they would consent to dispose of the land required for the track at the rate of a hundred yen per *tan* (300 *tsubo*), a further sum to be paid to the owners out of a fund raised by voluntary contributions.

THE TOKYO WATER-WORKS.

ACCORDING to the *Mainichi Shimbun*, it has been decided that the Government shall contribute two and a quarter million yen, in fifteen annual instalments of a hundred and fifty thousand yen each, to the Tokyo water-works. The appropriation is to commence from the current fiscal year, and will consequently be independent of the Diet's interference. It is now stated that the water-works are to cost eight million yen, and we observe that the vernacular newspapers, in describing the scheme of the works, altogether ignore the fact that the original plan was made by Major-General Palmer. That plan, we believe, with very insignificant modifications, is to be carried out, and it is singular that no notice should be taken of its existence by journals which profess to be acquainted with the story of the works. Indeed, there are several features of this affair which seem to demand explanation. The original scheme only involved an expenditure of six million yen, and would not have entailed any subsidy or onerous guarantee whatsoever from the Treasury. Its projectors were willing to carry it out at their own risk. They merely asked for an official guarantee of six per cent., which would not have required any payment from the public funds, unless the estimates of revenue and expenditure had proved very erroneous, a contingency beyond the pale of reasonable expectation. The management of the works, the rates, and all other important matters, would have been subjected to official control, and after thirty years the whole would have become the absolute property of the city of Tokyo. In lieu of this most favourable and economical project, the works are to cost eight millions and the Treasury is to pay a contribution of a hundred and fifty thousand yen for fifteen years. If to these yearly payments we add interest at the rate of 5 per cent., the total cost to the country becomes 3,012,500 yen. Of course after the promulgation of the law interdicting the construction of water-works by private companies, it was out of the question that the economical and

liberal project of Messrs. Shibusawa, Masuda, and others should be sanctioned. With the principle of the law we are entirely in accord, but we cannot forget that an unnecessary delay of nearly two years has occurred; that the works, as now planned, are to cost 33 per cent. more than the original estimate, and that the contribution from the public funds is to be over 3 million yen. What are the modifications and improvements for which such a heavy outlay is to be incurred? The plans of Major-Palmer and Mr. Burton are said to have been carried to Berlin where they underwent examination and amendment. Practical folks will be disposed to smile at the notion of submitting to German inspection in Berlin water-works designs prepared by English engineers in *loco*. Putting this aside, however, we shall be interested to learn how the additional two million yen is to be spent, and what the city is to gain for it. Stated in gold, an estimate of 8 million yen in 1890 is about 50 per cent. higher than an estimate of 6 million yen in 1888. This is a big difference. Doubtless when the details of the new scheme are published, the criticism prompted by our present fragmentary knowledge will be disarmed.

EMIGRATION FROM THE UNITED KINGDOM.

THE emigration and immigration returns of the United Kingdom for last year have lately been circulated by the British Board of Trade. A memorandum on the emigration and immigration of foreigners is appended. The most noticeable point in this year's report is the falling off in the net immigration of population from the United Kingdom. The country lost only 195,243 persons of all nationalities last year. The net loss for 1887 was 277,481, and for 1888, 269,615. Thus while the gross emigration from the United Kingdom has diminished during the last three years, immigration is on the increase, the latter having grown from 119,013 in 1887 to 147,398 last year. Mr. Giffen, the well-known statistician, who signs the report, points out that these particular figures are a fairly correct indication and measure of the state of trade and the general prosperity of the country. When wages are high and employment abundant at home, not only do fewer people go abroad, but an increasing number of people return. The conditions of travel vary also with the time—77,000 cabin or saloon passengers emigrated in 1889, against 66,000 the year before and 61,000 in 1887. Some curious figures are given on this subject. Three saloon passengers leave Southampton for every steerage passenger. From London the numbers are about equal. Glasgow and Greenock returned 4,211 cabin and 23,812 steerages last year. From Queenstown the proportion is 316 cabin to 37,506 steerage, while no cabin passenger left Galway in 1889. When business is good a large proportion of persons sons "of British and Irish origin" return from abroad. The numbers under this head have increased from 15,475 in 1887 to 103,070 in 1889. Of the latter, 71,392 came from the United States, 8642 from Canada, and 10,433 from Australia. Conversely the prospect of employment and high wages, in various countries at various periods determine the field of emigration for British subjects. The attractions of Australian alluvial gold discoveries in the early "fifties" is shown by the high figure of 77,526 emigrants to that part of the world in 1854. The number dwindled to 28,294 last year. The American War of Secession reduced the emigrants from the United Kingdom to the United States in 1860 to 38,160. There was a rise to 169,730 in 1873 and a fall to 45,481 during the year of American panic and depression in 1877. In 1887 the members rose to 201,526 and last year fell to 168,777. The United States still absorb most of the British emigrants, although the proportion fell from 70 to 67 per cent. last year. Emigration to Australia "continues stationary." In 1889 28,461 persons emigrated from the United Kingdom to "all other places." This is the largest total yet reached under that head, and Mr. Giffen accounts for it by the rush to South Africa, which alone absorbed 14,000 last year.

and will, he thinks, absorb many more in the future. He regards the proportion of British emigration to population, 0.67 per cent. as still high. The gross total for last year was 342,641 of all nationalities, and 253,795 "of British and Irish origin"—against 398,494 and 279,928 for 1888. It appears that during the last 37 years 2,297,399 persons of English and Scottish origin have emigrated to the United Kingdom, as against 2,289,735 of Irish origin. To Canada 537,743 of the former emigrated, against 173,347 of the latter; while as regards Australia the Irish represent about one-fourth of the emigrants from the United Kingdom. The number of Irish emigrants to Canada has been steadily falling off—from 8,085 thirty years ago to 2,203 last year; the English have risen from 3,791 to 22,417, while the Scottish emigrants remain at about the same figure, 3,500, during that period. Emigration from Scotland fell from 35,873 in 1888, to 25,354 in 1889. Fewer Irish go to Australasian colonies, it seems, year by year. During the early years of the Land League agitation the gross emigration from Ireland to all places reached the high average of 79,731. In 1883 it was 105,743. As soon as the present Government came into power it oddly enough fell to 61,276. Last year the gross number for Ireland was close on 65,000. It seems that some 9,000 aliens arrive in London annually, most of them coming from Hamburg. Although about 50,000 aliens land at Hull, all but a couple of hundred of them are en route for the United States. The numbers at both ports show a marked decrease for 1889.

THE KIUSHU DOSHIKAI.

In addition to the particulars already given in these columns as to the organization of the "Fellow-thinkers of Kiushu," we note that their practical programme (*undo-an*) is headed by an article declaring that union with all other parties of similar convictions shall be a prime object of the association. To this end there are to be appointed, among other officials, united representatives (*rengo jimu-tin*), three at most from each prefecture. The *Doshikai* is also to have a club in Tokyo—the word "club," by the way, has now passed finally into the Japanese, as it did long ago into the French language—and three representatives are to be sent to the capital from each prefecture in Kiushu, by the 5th of August. Messrs. Kawashima, Gamo, and Utsunomiya have been appointed delegates from Kagoshima, Mr. Yamada from Kumamoto, Mr. Okada from Fukuoka, and Messrs. Matsuda and Taketomi from Saga.

The *Doshikai* has also been sufficiently practical to publish a statement of the subjects concerning which it intends to interrogate the Government in the Diet. At the head of this list stands foreign policy, and the points of enquiry are extra-territoriality, the most-favoured nation clause, and the tariff. Other subjects of debate are army and navy organization, military expenditure, the law of conscription, finance, departmental economy, paper currency, the Bank of Japan and the National Banks, and the system of protection to trade and industry.

HOUSE FURNISHING.

CARPETS, curtains, wall-papers—these are the principal difficulties to furnishers of houses in the East. Good furniture can be procured, but when one comes to look for carpets which shall match it, for curtains which shall match the carpets, and for paper which shall match all three, the task grows serious. Hongkong, we observe, is saved much of this trouble by the employment, recently introduced, of a new system of interior decoration which takes the place of paper, and can be applied quickly and inexpensively to walls and ceilings plastered even in very mediocre fashion. The point of the system is that the colours and style of the decoration can be made to suit the furnishing of the room, so that one is sure of harmony in one's surroundings. Advertisements say that the decoration is cheaper than paper, and that

folks in Japan may obtain designs and estimates free of cost, by reference to Mr. W. S. Marten in Hongkong. If the system really accomplishes what the advertisers promise, we do many of our readers a favour by asking their attention to it.

POPULATION OF THE HOKKAIDO EMIGRANTS AND THE ABORIGINAL AINU.

It is commonly believed that the aboriginal Ainu race is rapidly dwindling away before the advance of civilization, and the fact is cited as another example of the "survival of the fittest." But according to the information of the *Jiji Shimpō*, this popular belief does not appear to be altogether corroborated by facts. Under the Tokugawa régime, says our contemporary, the population of Yezo emigrants was estimated at 40,000, but in consequence of protection and encouragement given by the Government, this number increased to 350,000 in the 21st year of Meiji. As a natural consequence, the Ainu's means of sustenance were encroached upon, and they have been popularly believed to be going down before the advance of the dominant race. But the following statistics, prepared by the Hokkaido Administration Board, show that the truth is far from the common hypothesis:—

AINU POPULATION IN YEZO.

Year.	Male.	Female.	Total.
1872	7,954	7,314	15,275
1873	8,167	8,032	16,199
1874	8,171	8,160	16,331
1875	8,547	8,583	17,130
1876	8,579	8,598	17,177
1877	8,483	8,483	16,966
1878	8,537	8,521	17,058
1879	8,513	8,515	17,028
1880	8,566	8,575	17,141
1881	8,470	8,457	16,923
1882	8,546	8,554	17,100
1883	8,617	8,615	17,232
1884	8,702	8,770	17,472
1885	8,735	8,687	17,422
1886	8,464	8,571	17,035
1887	8,437	8,525	16,962
1888	8,475	8,587	17,062

KOREA.

Our Sōul correspondent writes:—Three weeks ago Dr. J. W. Heron, Director of the Royal Korean Hospital, and Court Physician, moved his family from the heat and filth of Sōul to the Mountain City or the Southern Fortress (Nam Han) about 17 miles from the city. Her Majesty, the Queen, offered this delightful retreat to Mrs. Heron, who accepted the gracious offer. After spending a few days with his family and the friends who accompanied them, Dr. Heron returned to his post of duty. This was on the 8th of July. In Sōul he was attacked by a sharp bout of dysentery the following day, and after a week or more of great suffering, blood-poisoning set in, and it was known that the end could not be distant. He died on Saturday morning, July 26th, and on the 28th was buried in the foreign cemetery on the banks of the Hau River, about three miles from Sōul. Dr. Heron was an able physician, and during the five years of his life in Sōul faithfully attended to the duties of his profession. He was popular at Court. The King on several occasions counselled with him on matters outside his profession. All the foreigners in Sōul, including the Chinese and Japanese Representatives, attended the funeral. The services were conducted by the Rev. H. G. Underwood of the same Mission. A native preacher of the Mission made a very earnest and appropriate address in Korean. The Rev. H. G. Appenzeller, of the Methodist Mission, also spoke feelingly of his departed friend and brother. Dr. H. A. Allen, formerly Foreign Secretary of the Korean Legation at Washington, has been appointed Secretary of the U.S. Legation at Sōul. The appointment gives great satisfaction to his friends, as the doctor is wide awake and very popular with the Koreans.

THE COALITION OF PARTIES.

The *Daido Shimbun* of Sunday last has an extremely sensible article entitled "Why is there no commencing of preparation for practical work?" The *Daido* argues that the coalition of political parties is not in itself to be regarded as beneficial to the country. As long as the members of the giant party that has been

formed retain their old notions, they will prove as powerless to effect any real reform in Japanese politics as they have hitherto showed themselves. Where a definite practical object forms the basis of union, definite results of an unmistakably satisfactory character usually follow. But where coalition is regarded as an end in itself, where politicians are led to fancy that some special merit is associated with the submerging of small differences, the assumption of a name of wide import, and the apparent augmentation of fellow-thinkers that attends such a movement as has lately been witnessed in Japan, they are doomed to disappointment. Coalition is beneficial if some practical good springs from it. Not otherwise. If the new giant party still spends its time in irresponsible theory-spinning, if it knows of no other object of existence than readiness to oppose the measures brought forward by the present government, it cannot but prove a fiasco. The question, says the *Daido*, which we put to ourselves is, "what practical good is the party going to effect? Why is there such delay in commencing operations that have some definite end in view?"

SEA INUNDATION IN MIYAGI AND IBARAKI PREFECTURES.

About 2 o'clock in the morning of the 4th inst., a sudden rise of the sea occurred along the coast line of Nagatohama, Yoshidahama, Ushibashihama, &c., in Miyagi Prefecture. By seven o'clock, the water was more than ten feet above the ordinary level and, in spite of all efforts to keep it in check, it swept away embankments and inundated the country, doing more or less damage to over sixty-six *cho* (165 acres) of farms and rice-fields, and destroying five bridges. There was, however, no loss of life. The flood subsided slowly at ten o'clock. This inundation is said to be the largest that has occurred during the past ninety years. At Ishinomaki, in the same prefecture, a similar phenomenon was witnessed one day previously, but the extent of the damage is not yet ascertained. In Ibaraki Prefecture, a place named Minado was the scene of an inundation of even greater force than the above. "On the 2nd inst.," says the report, a violent gale prevailed from the morning. Eight dwelling houses and thirteen sheds were swept away by the waves along the sea front in Minado, and the people in the vicinity all removed to other places. The sea rose more than twenty feet, and maintained its height for several hours. On the following day, the waves were more furious than ever, threatening to flood the whole town of Minado. Happily, however, they subsided gradually without causing any loss of life.

REVISED PRESS REGULATIONS.

The *Yomiuri Shimbun* states that revised press regulations will be promulgated in a very short time, having already been submitted to the Senate for deliberation. Our contemporary mentions as one of the most salient points of revision, that, according to the existing regulations, the Authorities can suspend papers without indicating what particular article has been the cause of punishment, but in future it will be incumbent to point out the offending matter in all cases of suspension. The same journal says that the opinion that the Peace Preservation Regulation should either be revoked or revised prior to the opening of the Imperial Diet, is gaining strength among the Senators, and that some definite steps will be taken before the end of August in regard to this important matter.

TERRIBLE FLOODS IN FUKUSHIMA.

The vernacular papers contain a report to the effect that floods of unprecedented magnitude occurred in Fukushima, a town well known as the centre of the silk producing country in the north. In consequence of rainy weather, says the report, the rivers Sugawa and Okumagawa rose enormously, the volume of water increasing rapidly day by day up to the 7th inst., when it flooded the town of Fukushima. Without a moment's warning, about thirty houses along Ichome were inundated by two feet of water,

which rose above the floors before the people could remove their effects. Nishiura Ichome was also invaded by the rushing flood and the houses along Higashi Ichome were submerged to the extent that the highest part of the roof only was out of water. A butcher's shop yielded to the pressure of the flood, and floated away, demolishing a few houses on its way. In the surrounding country many houses were either submerged or swept away. In some places the flood covered so large an area that the country looked like a big lake, in which the roofs of the submerged houses presented the appearance of so many islets. Altogether this inundation is believed to be the most disastrous that has ever occurred in the locality. There were many deaths, but the exact number has not yet been ascertained.

ERUPTION IN FUKUSHIMA.

THE *Nichi Nichi Shinbun* of the 12th inst. states that the eruption of a sulphur mountain situate at Doyomura, Shinobu-gun, Fukushima Prefecture, has recently taken place, the result being the destruction of scores of houses and great loss of life. No further particulars are given by the Tokyo paper, but it says that the eruption was followed by floods, and that the latter were caused by the former. It is more likely, however, owing to the heavy rains that have fallen in the neighbourhood, that the Sugawa and Abukumagawa, two rivers in Fukushima Prefecture that receive the rainfall of an extended area, became suddenly swollen after an unusually heavy downpour and worked the havoc described. The *Nichi Nichi* says that on the 7th inst. Fukushima-machi was suddenly flooded, the town and neighbourhood presenting the appearance of a great lake, the houses in low lying localities being completely submerged. Furniture and property of all descriptions were swept away, and a great many lives were lost, though the number at present cannot even be guessed approximately, such a sudden and disastrous deluge never before having been seen in Fukushima. The Nagasegawa also rose, and death and destruction followed the course of the flood. At Yokotsuka, about 10 *cho* from Gunzan-machi, the Abukumagawa overflowed, but the people saw it coming and climbed to the roofs of their houses. Thousands of acres were soon under water, and no attempt could be made by the people to secure their property which they saw floating away while they were helplessly perched on the roofs of their dwellings. The district officers and police were energetic in rendering all the assistance in their power and saved many lives. The loss will be enormous.

The following loss and damage to house property have already been ascertained, though these returns must necessarily, from the nature of the disaster, be incomplete:—At Fukushima-machi 8 houses floated away and 75 were inundated; at Sugisuma 59 houses were inundated and one destroyed, and at Yoshida-mura 20 houses were washed out; at Watari-mura 28 houses were demolished or floated away and 11 others were inundated; at Iiamabe-mura 4 houses were destroyed and 26 inundated; at Honmiya-machi 118 houses were flooded and 33 destroyed; at Doyo hot-spring 16 houses suffered destruction. Deaths occurred to an extent not yet ascertained, and in addition to places from which no returns have been received, the damage to property and loss of life at the above-named villages are said to be much greater than the figures indicate. No such occurrence, it is said, has ever before afflicted this district.

A CURIOUS TALE.

THE *Kobe Herald* publishes, on authority which it calls "unimpeachable," a story that the police authorities in Hyogo—at least we presume that Hyogo is referred to, though our contemporary leaves the point in doubt—recently employed torture to exact confession from some coolies charged with having stolen certain cases of kerosene oil. The method of torture was to fasten bits of wood between the fingers of the

accused, and then suspend the unhappy men so that the weight of their bodies depended from these bits of wood. Now if the *Kobe Herald* has information justifying the publication of such a tale, it must know exactly where and by what police office this outrage was perpetrated. We altogether disbelieve the story ourselves, because we hold it incredible that the police would resort to a performance which could not fail to be discovered, and the discovery of which must necessarily lead to their severe punishment. Be that as it may, however, the plain duty of the *Kobe Herald* is to publish precise information by means of which the supposed torturers may be discovered. The charge preferred in its present vague form can only be interpreted as a desire to fix the infamy of a brutal and illegal act upon the Japanese police without furnishing such particulars as may enable the accusation to be refuted or the persons charged to be punished. We are very familiar with these stories. They have been recklessly ventilated from time to time, but as yet not one of them rests on anything but the vague statement of witnesses evidently prejudiced or reporters who wished to be persuaded.

THE JUDGES AT THE EXHIBITION.

REFERRING to the discontent felt by some of the exhibitors at the late industrial show at Ueno, the *Nichi Nichi Shinbun* says:—Despite the admitted inferiority in magnitude of the recent exhibition at Ueno when compared with the international show last year at Paris, there is room for congratulation both in regard to the improvements noticeable at our last exhibition as compared with previous attempts of a similar kind, as well as the industrial progress of the country as shown in the exhibits. But there appears to be a feeling of discontent amongst certain of the exhibitors in regard to the awards of the judges in some cases, a feeling that, so far as we know, never showed itself in connection with the decisions of the judges at previous exhibitions held in Japan. But that this feeling exists there can be no question, inasmuch as some exhibitors who are dissatisfied with the verdict of the judges have gone the length of entering actions for damages against them. It is only fair and reasonable that judges should be expected to show that their verdicts were in accordance with the general view and entirely unbiassed, otherwise it is to be feared that many exhibitors may be deterred from taking an active part in future exhibitions. We do not by any means infer, though, that the recent judgments were not right and proper verdicts, nor do we think it desirable that the judges should be called upon to review their decisions, as, having given them, they may be expected to stand by them. Further, we do not see how the dissatisfied exhibitors can expect to succeed in their actions at law against the judges, and the only method that occurs to us as calculated to soothe the feelings of those exhibitors who consider that they have been ill-treated by the judges, is for the Government to take the matter in hand and cancel the objectionable awards.

MEETING OF THE INDEPENDENTS AT KYOTO.

WHILE the politicians in the progressive camp are working with might and main for the formation of a grand coalition of all their sections, the independent members of the Diet are fast growing in political importance by the process of consolidation. As we reported at the time, about thirty of the Independents in Tokyo and vicinity recently held their first meeting at the Chargo Restaurant. Now we are informed by the *Choya Shinbun* that the Independents of the southern prefectures held their meeting in Kyoto on the 5th inst. The meeting was attended by about thirty men, all members of the Diet, and was addressed by Messrs. Okata Ryoichi, and Tanaka Gentaro, members from Shizuoka Prefecture and Kyoto respectively. The former gentleman, unless we are mistaken, has the credit of being the first to urge the advisability of all the members who have no party attachment forming themselves into an independent body in the Diet. According to the *Choya's* report, the meeting adopted resolu-

tions to preserve a neutral attitude *vis-à-vis* all existing political parties, and to attend the assembly of Independents to be held in Tokyo on the 20th inst. As to a political platform, it was decided to leave that question for deliberation on the occasion of the Tokyo Meeting. The Authorities are said to have taken great precautions that no disturbance should occur in connection with this Kyoto meeting. But everything passed off very peacefully, except that two members of the "Young Men's Liberal Club" came to the entrance of the meeting house and demanded an interview with either Mr. Tanaka or Mr. Iiamaka, in order, as they said, to make enquiry as to the object of the meeting. On being refused an interview, however, the young Liberals went off quietly.

THE CONSERVATIVES.

OWING to the want of party organization, writes the *Fonjuri Shinbun*, it is impossible to exactly ascertain the parliamentary strength of the new conservatives led by Generals Tani and Miura. But nearly fifty members of the party are said to have been returned in the prefectures of Kumamoto, Hiroshima, Miyagi, Aichi, &c. These conservative members are supposed to entertain the idea of holding a meeting in Tokyo in the near future in order to secure unity in their parliamentary action. The election returns, as published by the various newspapers, do not show anything like 50 conservative members of the Diet. We are therefore quite at a loss to conceive how the estimate referred to by the *Fonjuri* has been arrived at. If there be any truth in the statement, it becomes plain that the manner in which the various parties have hitherto been supposed to be represented among the 300 members, is untrustworthy. The fact is that we shall probably know nothing definite about the composition of the Diet, until the preliminary conferences of the different parties, to be held probably in September and October, afford some solid basis for an estimate.

SUREFOOT.

THOUGH Surefoot's roguish running in the Derby will be remembered by his backers for many a year, the colt has redeemed his somewhat tarnished reputation by the easy manner in which he afterwards won the Thirty-second Biennial, and, as we now learn from American papers, the Prince of Wales' Stakes at Leicester, worth £8,500. In this race Memoir ran second, and Surefoot probably met Le Nord, Semolina, Rightaway, and other "cracks" who would have shown him their heels had he ran so ungenerously as he did at Epsom. It is plain from these performances that Mr. Merry's colt has not "gone off," and that, though he may not care to go much over a mile, he is just as good at that distance as ever he was. How much the Derby was at his mercy, however, had he been disposed to try, is shown by the time of that race and the Oaks. In the latter it was 2.40½, and in the former 2.49½, a difference of 9 seconds. Of course it may be argued that the fillies this year are better than the colts, but, even admitting this, it can hardly be so to the extent indicated by the time in the two races.

NEWSPAPER RATES.

THE ruinous tendency which, beginning five years ago, gradually led Japanese journalists to reduce their prices to impossibly low rates, is apparently beginning to be replaced by a more wholesome mood. It was the *Hochi Shinbun* that set the example of cutting down the price of subscription, and it is the *Mainichi Shinbun* which has now the courage to revert to more reasonable figures. The latter journal announces that, in view of the progress of society and, above all, of the near opening of the Diet, it can no longer furnish adequate intelligence and comment at the rates hitherto charged. In future, therefore, the price of one number will be 2 *sen* instead of 1½ *sen*; the monthly subscription will be 30 *sen* instead of 25, and the semi-annual subscription will be 1.80 *sen*. These prices are already small enough in all

conscience. Nowhere else in the world could a daily paper exist on a subscription of some 12 shillings annually, or less than a halfpenny per number.

SALE OF THE UNSOLD ARTICLES IN THE UYENO EXHIBITION.

As reported in these columns from time to time, various plans have been proposed for the disposal of the unsold articles in the Exhibition at UYENO. At first the lottery plan was considered very desirable, but it was abandoned in consequence of legal objections raised in some quarters. The latest scheme is that the Government should grant a certain amount of subsidy on the articles, so as to enable them to be disposed of cheaply without entailing loss on the exhibitors. The official estimate for this subsidy, we are informed by the *Fiji Shimpō*, is some ninety thousand yen. It is further reported that those who are desirous of availing themselves of this plan of selling their articles, will be permitted to do so in the exhibition buildings, the sale commencing on the 16th or 17th inst. and lasting for about a week. We can understand and sympathise with the perplexity of the authorities in this matter, but we doubt whether much success will attend the proposed course. Most of the unsold articles are probably of such a nature that, even though their selling price be reduced by thirty or forty per cent., are not very likely to find purchasers. At all events a week is not a sufficient interval, unless the unsold articles are much less numerous than we have been led to suppose.

THE NEW COMMERCIAL CODE.

We have already reported that the Tokyo Chamber of Commerce (*Shoko Kai*) has resolved to make representations to the proper authorities for the postponement of the date of putting the new Commercial Code into force, and has also decided to communicate its resolutions to the various chambers of commerce throughout the country, with the object of inviting their opinion on the subject. The *Kokumin Shimbun* thinks that the other chambers will not fail to endorse the resolutions of the Tokyo body. It is reported that this movement is not prompted by any spirit antagonistic to the Government's measures, its explanation being that the merchants are determined to oppose the enforcement of laws which, they are convinced, would entail inconvenience in commercial transactions. It will be disappointing to find them take such a course, but if they accompany their protest with a full statement of reasons, the results cannot fail to be valuable.

FIXED EXPENDITURES.

THE proper interpretation of Art. 67 of the Constitution relating to fixed expenditures has long been a theme of public discussion. According to report, the original intention of the Authorities was to promulgate a law in regard to this matter. But the Privy Council raised very serious objections to this course, and its views were supported by some of the newly appointed Ministers of State. Thus the thing became a moot point in the Yamagata Cabinet, and the opposition seemed so strong for a time that the original intention of the Government was supposed to have been dropped, but the latest *on dit* is that the opposition was at last defeated and that, in the course of a few days, the law will be promulgated in the original form proposed by the Minister President. It is further said that the law will consist of thirteen articles. These statements are from the *Fiji Shimpō*.

CRICKET IN ENGLAND.

THE cricket column in the mail edition of *The Times* of June 23rd is good reading. It records three innings in which the total number of runs obtained was 1,704. We do not remember to have seen such a record in any single week before. The first of these great innings was in the match Players of England v. Australians. The players scored 526 in their one innings, against a total of 263 in the two innings of the Australians. The highest figure stood to Gann's

credit: he scored no less than 228 runs off his own bat. Every man of the Players, however, excepts Briggs (first bowler) and Sherwin (wicket-keeper) got into double figures. The second remarkable innings was played by Lancashire against Oxford University. The county team scored 475—of which Sugg made 171—in one innings, against a total of 406 for the University's two innings. But the heaviest scoring of all was witnessed when Cambridge University made 703 in its second innings against Sussex. To this huge total three men contributed over a century each; namely Mr. F. G. F. Ford 191, Mr. C. P. Foley 117, and Mr. McGregor 131.

SAILING RACE.

A SAILING race for 17-raters took place on Saturday afternoon over an eight-mile course, being four times round a triangle composed of *Princess Maud* (off the Boat-house), *Ronin* moored some distance outside the Spit Buoy, and *Lady Louise* stationed off the Niche. The boats were sent off by Mr. A. Owston, who acted as officer of the day, at 1.40, the wind being from S.E. to S., and light. *Sayonara* was first across the line followed by *Scamp*, *La Belle*, *Violet*, *Dot*, and *Jessie*. *Jessie* took first and *Sayonara* second place before the finish of the first round, and retained this advantage to the last. The wind was very shifty and all kinds of sailing were called for, from close-hauled to running under spinnakers. *Jessie* took first prize (the *Violet* Cup) easily, and *Sayonara* the second, the former scoring two record points and the latter one. The following are the times:—

	Rating.	1st Round.	2nd Round.	3rd Round.	Finish.
<i>Jessie</i>	16	2.35.48	3.21.03	4.11.20	4.53.05
<i>Dot</i>	16	2.47.04	3.35.10	4.30.05	5.21.05
<i>Violet</i>	16	2.46.35	3.43.33	4.37.40	5.22.25
<i>La Belle</i>	16	2.47.15	3.43.20	4.41.04	5.32.10
<i>Sayonara</i>	13	2.41.54	3.33.23	4.25.21	5.17.50
<i>Queenie</i>	13	did not start.	—	—	—
<i>Scamp</i>	10	2.16.01	2.26.45	3.25.50	did not finish.

	Allowance.	Corrected Time.
<i>Jessie</i>	—	4.53.05
<i>Dot</i>	—	5.21.05
<i>Violet</i>	—	5.22.25
<i>La Belle</i>	—	5.32.10
<i>Sayonara</i>	5.52	5.10.58
<i>Queenie</i>	5.52	—
<i>Scamp</i>	16.51	—

The Committee of the Sailing Club issue the following notices:—

On Saturday, the 16th August, 1890, there will be a race for 17 raters only as already notified, start at 2 p.m.; also, the "Ronin" Cup Race for Boats above 17 Rating, as notified for the 2nd August, will be sailed, start at 4 p.m.; officer of the day, Mr. A. Brent.

On Saturday, the 10th August, 1890, there will be a race for all boats over 17 rating, start at 2 p.m.; club course, twice round. Time limit, 4½ hours. Prizes, under measurement handicap. One in each class; there will also be a race for 17 raters only, start at 2.30 p.m.; course, the 17 rater course, once round. Time limit, 4½ hours. Prizes, under measurement handicap, first and second; officer of the day, Mr. Alan Owston.

Saturday, the 6th September, 1890, there will be a race for 17 raters only, start at 2 p.m.; course, from an imaginary line between the Bathing Barge (leaving same on starboard hand) and the French Hatoba around a flagboat at Kanagawa and the Green Lightship (leaving both these marks on starboard hand) and finish across the starting line (leaving Bathing Barge on starboard hand). Once round; time limit, 4½ hours; prizes, under measurement handicap, one; officer of the day, Mr. H. J. Gorman.

Saturday, the 13th September, 1890, there will be a race for all boats over 17 rating, start at 2 p.m.; club course, twice round. Time limit, 4½ hours; prizes, under measurement handicap, one in each class; officer of the day, Mr. J. O. Arell.

Saturday, the 20th September, 1890, there will be a race for 17 raters only, start at 2 p.m.; course, the 17 rater course once round. Time limit, 4½ hours; prizes, under measurement handicap, (presented) and second; officer of the day, Mr. C. D. West.

On Tuesday, the 23rd September, 1890, there will be a race for all boats over 17 rating, start at 2 a.m.; course, from an imaginary line between the Bathing Barge (leaving same on port hand) and the French Hatoba around a flagboat off Min-en-san (leaving same on starboard hand) and back to the starting line. Bathing Barge to be left on starboard hand in finishing. Distance about 21 knots. Time limit, none; prizes, under arbitrary handicap first, the "Lesbelle" Cup (presented), second, and third; officer of the day, Mr. W. W. Campbell; entrance fee for all above races \$1, each.

MEETING OF THE DAIDO PARTY.

As the appointed time approaches for the final settlement of the question of amalgamating the *Daido Danketsu*, the *Aikokukoto* and the resuscitated *Fiyu-to*, the movements of these parties are watched with growing interest by the public. According to present prospects,

both the *Aikoku* and the *Fiyu* seem willing to coalesce, but grave doubts are entertained as to the readiness of the *Daido* factor to form such a coalition. The *Kokumin Shimbun* has published the report of the *Daido* meeting held in Kobikicho on the 26th ultimo. The report informs us that the meeting had a very small attendance, and that no definite resolution was passed. But, judging from the general tenor of the conversation which took place, the *Kokumin* thinks that much hostility is entertained by the *Daido* members towards the two other parties. Our contemporary is nevertheless sanguine that this hostile spirit will finally be overcome, and that the party will disband their organization in order to meet their political fellow-workers half-way in the scheme of amalgamation.

GOLD AND SILVER RATIOS.

The *Official Gazette* gives the following table of comparative values of gold and silver coins and of the pound sterling for the week ended the 9th inst., as derived from the returns of the Bank of Japan and the Yokohama Specie Bank:—

Days	Gold Coin. (Per yen 100) Silver Yen.	Pound Sterling. (Per £1) Silver Yen.
4th	111.500	A.M. 5.4857 P.M. 5.4857
5th	111.500	A.M. 5.4857 P.M. 5.4857
6th	111.500	A.M. 5.5172 P.M. 5.5172
7th	111.700	A.M. 5.5491 P.M. 5.5491
8th	112.300	A.M. 5.5491 P.M. 5.5491
9th	112.300	A.M. 5.5491 P.M. 5.5491
Averages	111.800	5.5227

The above averages show for gold coin a decrease in value of yen 1.450, and for the pound sterling a decrease in value of yen 0.0550 as compared with the previous week.

PRINCE BISMARCK.

ALL the deplorable and despicable of Germany, says *Truth*, have been engaged during the last few weeks in the congenial task of kicking the dead lion; but I do not suppose that Prince Bismarck troubles himself about the malevolent inventions of such contemptible vermin. The idea of Prince Bismarck having impaired his faculties by morphia-drinking is really too extravagantly preposterous a fiction for even lunatics to credit, and the even more offensive allegation of "alcoholism" is not less nonsensical. Prince Bismarck formerly took his fair share of wine or beer, but he is man of iron head, and certainly never was affected in any way by his potations. The days, however, when he drank champagne, beer, and Rhine wines have passed away. A few years ago Prince Bismarck found his neuralgia benefited by a daily bottle of strong dry port, the wine being of a special quality which he obtained direct from Oporto; but this was discontinued when he consulted Dr. Schweneberger; and for a long time past his customary beverage has been weak whisky and Apollinaris, and even of this only a comparatively small quantity has been allowed.

CHANGES IN THE IMPERIAL UNIVERSITY.

THE *Fiji Shimpō* asserts that a radical change in the method of working the Imperial University is about to take place, and that the present heads of departments will be replaced by others. We ourselves have no information on the point; but we think it pretty certain that a man of such decided opinions on educational methods as Mr. Kato will sooner or later introduce changes in the system hitherto adhered to by the different faculties. What, exactly, the modification he has in contemplation will amount to we are not in a position to say. But we have full confidence in Mr. Kato. No one is better acquainted with the defects and the merits of the present mode of managing the University than he. We shall be interested to see what will be the direction of the reforms which he inaugurates.

GOOD WATER FOR THE POOR.

We are pleased to see that the leading Japanese merchants of Yokohama recognise the import-

ance of supplying the poorer classes with pure water in times of epidemic like the present. A fund has been formed for the purpose of enabling those who are too poor to pay for water from the waterworks to receive a regular supply. Messrs. Hara Zenzaburo, Mogi Sobei, Hirayama Senzo, Takashima Kaemon, and a number of others have subscribed liberally to this object. We trust it will not be many years before every great city in Japan is provided with the means of preventing the spread of cholera which Yokohama now enjoys, and the value of which is so keenly appreciated by Japanese as well as foreigners.

THE ROKUMEIKAN.

Rumours about the building in Tokyo called the Rokumeikan have been in circulation since last year. Constructed originally with funds appropriated for the purpose by various Departments of the Government, the edifice was intended to serve chiefly for social purposes and for the entertainment of foreign guests of distinction. The latter office had been previously discharged by the Yenriyokan, but this, being one of the detached Palaces, could only be used on very special occasions. It often happened, therefore, that the Authorities were perplexed to find accommodation for visitors who, though necessarily entertained at the public expense, could not with propriety be lodged in an Imperial Palace. Further, even though this difficulty did not exist, the Yenriyokan was by no means invariably available, and thus many reasons conspired to suggest the construction of another and more generally serviceable building in a convenient situation. Count Inouye was the chief promoter of the scheme, and the results justified his foresight, for the Rokumeikan has been almost uninterruptedly useful since the date of its opening. Balls, dinners, concerts, charity bazaars, theatrical entertainments, official meetings, and all sorts of entertainments have been held in its fine salons, while its suits of bedrooms have been repeatedly placed at the disposal of guests of distinction. For some reason, however, of which we have no precise knowledge, the arrangements for the maintenance of building and grounds did not work smoothly, and a proposition to rent it to the Imperial Household Department seemed, at one time, likely to be carried through. But the Household Department having already at its disposal two detached Palaces, the Yenriyokan and the Shiba Rikui, finally decided to abstain from taking over the Rokumeikan, and it has now been let to the Nobles at a yearly rental of two thousand yen, the lessees making themselves responsible for the repair of the building and the preservation of the grounds. These proceedings have been watched with the keenest interest by the members of the Tokyo Club, which, by the kindness of the Government, enjoys the privilege of occupying a portion of the ground floor of the building rent free. Count Inouye, ever foremost in devising and maturing schemes to promote intercourse between Japanese and foreigners, started the Tokyo Club, and placed at its disposal the handsome rooms it has ever since occupied in the Rokumeikan; an act of consideration to which the Club owes not only its origin, but also its continued existence. It cannot be said, indeed, that Count Inouye's purpose of bringing foreigners and Japanese into close social relations has succeeded in a degree at all proportionate to his desire. Yet the Club has certainly accomplished something in this respect, and has at any rate proved an incalculable boon to the foreign residents of the capital. Its loss would be a public calamity, and the possibility that a transfer of the building might involve that contingency was viewed with great uneasiness. Happily, however, nothing of the kind appears to be contemplated. On the contrary, we learn that the Nobles have made a proposition which will probably result in their own admission to the Tokyo Club under special conditions, and in a considerable enlargement of the premises occupied by the latter. We sincerely trust that this arrangement will be consummated, for it would not only improve the

Club and place it on a more secure footing, but also help materially to promote the original purpose of the institution.

FLOODS IN FUKUSHIMA, MIYAGI, AND YAMAGATA PREFECTURES.

We have already reported the floods of Fukushima. Further north of that town, at a place named Senokami, a considerable number of houses have been swept away and much damage done to rice-fields and farms. But as yet we have heard of no loss of life. In a town named Motomiya, more than a thousand houses were submerged in the muddy waters, and had it not been for the little hill upon which rests the shrine of Adachi Taro, a terrible loss of life would have been the result. With the exception of two men who were drowned, the people all fled to the hill. The waters subsided completely during the morning of the 8th inst. A great deal of damage was done to the track of the railway between Kori and Matsukawa, and communication has been entirely cut off since the 7th last. Many telegraph posts were damaged near Nihommatsu, Shirakawa, Wakamatsu, Fukushima, and other places, interrupting the telegraphic communication between Tokyo and Sendai.

In Yamagata Prefecture, the town of Yamagata was inundated by the overflow of the river Umamigasaki on the 6th inst. Most of the houses in the town, including the Prefectural Office, the Legislature Hall, the Court House, the Police Office, and other public buildings, were carried away by the flood, and there was some loss of life. In the surrounding country damage is supposed to have been done, but as yet no details have reached us.

In Miyagi Prefecture the rivers Narusegawa, Tadagawa, Kitakamigawa, and Abukumagawa all rose to an alarming extent above their ordinary level. The embankments were destroyed in many places involving much loss and suffering.

Owing to the enormous rise in various rivers, the railway was damaged between Fukushima and Kori, so that the first up train from Ueno on the 6th inst. could not proceed beyond Fukushima. On the same day, the down train from Sendai was stopped at Iwamura on account of the overflow of the Abukumagawa. Near Sukagawa, an iron bridge over the Shakadogawa was swept away. At present the Tokyo train can go no further than Kuroiso. Repairs are being executed with all possible despatch, but it is said that about two weeks will elapse before the reopening of the whole line up to Sendai.

FLOODS IN CHINA.

In the days of mediæval superstition, China would surely have been thought to have incurred the wrath of heaven, for if ever an unfortunate country was persecuted by the plague of waters it is she. Last year her sufferings moved the pity of the civilized world and large sums were contributed by foreigners, especially Englishmen, for the relief of her destitute millions. Even to this day barrowing accounts reach us from the districts invaded last year by the Yellow River, and now comes a story of an outbreak of water on a still larger scale. What may be the exact dimensions of the new calamity we cannot yet tell, but that it is on an immense scale and that it must cause wide-spread and dire misery, there can be no doubt. The records from Tientsin almost take away the breath of any one sufficiently acquainted with the topography of the place to trace the path of the floods. A specially shocking feature of inundations in China is that the waters very soon become freighted with coffins. The Chinese do not bury their dead in the ground, but on it. They lay the coffin on the surface of the field of sepulture, and then pile a mound of clay over the big wooden box, the dimensions of the mound varying directly with the importance and opulence of the defunct. Moreover, special sites for cemeteries are not chosen. The coffins are deposited here, there, and everywhere to suit the convenience of the relatives of the dead.

Thus, when the rivers burst their banks, the waters, as they spread themselves abroad, encounter funeral mounds in innumerable places, and whenever the heap of superincumbent clay is insignificant, the coffins are sapped out and floated hither and thither, sometimes to be sucked into the main current and swept seaward—as was the case recently at Tientsin, where fourteen of these ghastly waifs travelled past the wharfs in one day, moving towards the bar at the rate of six knots an hour—and sometimes to be deposited incontinently at any spot whence the falling flood finds itself unable to carry them. But shocking as this feature may be, it is a small matter compared with the terrible sufferings of the living who are deprived of food and lodging by the cruel inundations. Once again, doubtless, and for the twentieth time, foreign charity will be invoked on behalf of the flooded-out millions, but however wide may be this charity, it will rebel, we imagine, against the wretched helplessness which exposes the Chinese to repeated visitations of such calamities. The miserable tinkering that does duty for intelligent and vigorous engineering, serve no purpose except to afford an opportunity for official peculation. An Occidental nation situated as the Chinese are, would soon grapple with its rebellious rivers and save the thousands of lives and the millions of property sacrificed by their ravages every year. But the people of the Middle Kingdom go on year after year exposing their lives and their belongings to calamities which resolution and ability would certainly avert. How futile, in view of such facts as these, do the predictions sound which tell us that the Mongols are the coming race! Does the history of the world furnish a single example of a resuscitated civilization; a civilization which, having fallen into a state of decadence, has risen on its own ashes to renewed life? China's day is past. Destiny holds in store for her no new achievements as a nation.

THE HONGKONG AND SHANGHAI BANKING CORPORATION.

THE following is the fiftieth report of the court of directors to be presented to the shareholders at the ordinary half-yearly general meeting to be held on the 23rd instant:—"The directors have now to submit to you a general statement of the affairs of the bank, and balance-sheet for the half-year ending 30th June, 1890. The net profits for that period, including \$141,310.47 balance brought forward from last account, after paying all charges, deducting interest paid and due, and making provision for bad and doubtful accounts, amount to \$1,249,943.81, of which, after taking out remuneration to directors, there remains for appropriation \$1,239,943.81. From this sum, the directors recommend the payment of a dividend of one pound and ten shillings per share, which at 4/6 will absorb \$400,000, and a bonus of one pound per share which will absorb \$266,666.67. The difference in exchange between 4/6, the rate at which the dividend and bonus are declared, and 3/4, the rate of the day, amounts to \$224,974.20. They recommend transferring \$200,000 to the credit of reserve fund, which with instalments of premium on new shares, \$682,127.20, will then stand at \$5,482,127.20. The balance \$148,302.94 to be carried to new profit and loss account. Mr. B. Layton and Mr. W. G. Brodie (directors) have resigned. The directors invited Mr. A. McConachie to join the board, which appointment requires confirmation at this meeting. The accounts have been audited by the Hon. Phineas Ryrie and Mr. Fullarton Henderson."

CHOLERA RAVAGES IN JAPAN.

THE other day one of our Kobe contemporaries worked itself into something very like a white heat over the commonly received notion that cholera came to Japan from abroad. The southern journal seemed to think that some covert insult to foreigners was conveyed in the assertion of a simple historical fact. Such sensitiveness is surely a little hysterical. If foreigners brought cholera to Japan, no person with a grain of sense can blame them for being

the unwilling media of communicating such a plague, and to take offence because the origin of the disease is traced to their intercourse is as silly as it would be on the part of the Japanese to abuse Westerners for giving them locomotives which sometimes crush people to death and steamers which occasionally blow their passengers into eternity. There is no occasion for this attitude of prancing anxiety to vindicate foreign reputation against charges however chimerical or shadowy. Foreign reputation does not require to be protected by such means. If cholera came from abroad, China is probably responsible for the gift, and if China is responsible we imagine that our Kobe contemporary and other champions of its type will find the ardour of their defence materially cooled. The matter is brought to our recollection by a note in the *Daido Shimbun*, where we read that cholera first made its appearance in Japan in the *Ansei* era (1852-8), when it received the name of *Korori*. Not until the present era of *Meiji* did it come to be known as "cholera" (*Korera*). According to the investigations of the Sanitary Bureau, the great epidemic of 1886, when 154,736 persons were attacked and 109,484 died, was the worst that has occurred in the present era of *Meiji*.

THE BURIAL OF MRS. RODGERS AND HER DAUGHTER.

MRS. SCHROEDER and her mother Mrs. Rodgers fell victims to cholera at Kobe last week. Mrs. Schroeder, who was the first to be attacked, had, prior to her coming to Japan, been suffering from an acute form of dysentery. Her arrival in this country at a time when cholera was daily on the increase with a strong predisposition to attack was most unfortunate and might have been prevented by the exercise of a little more discretion on the part of her advisers in Shanghai. It appears that the two unfortunate ladies, who came in search of health and fell victims to the direst of diseases, had to be buried in a hurry and without the usual funeral ceremonies. This is made the subject of one of those outcries against the clergy to which we are every now and again treated by certain of our contemporaries. The *Hyogo News* suggests all sorts of uncharitable and improbable reasons why the clergy were not forthcoming on the occasion. This class of aspersion cannot be too strongly condemned. In the first place, if we are rightly informed, there is no clergyman in Kobe who is wholly supported by foreigners, and hence whose exclusive duty it is to perform such ceremonies as may be in request by foreign residents or visitors; therefore the case in point cannot be regarded as neglect of duty on the part of the missionaries residing in Kobe. Then the question which it is pertinent to ask is, were any of the clergy asked to perform the funeral ceremony by those who had charge of the burial of the deceased? We think that the most probable explanation is that most of the clergy were out of town and that some unavoidable impediment prevented the remaining ones from conducting the service, even supposing that they were actually applied to. To any one who knows the tender and refined feelings with which the clergy as a body regard their obligation to perform the last sad obsequies over the dead, such insinuations as those made by our Kobe contemporary appear most unjust and malicious.

CHOLERA IN THE KYOBASHI DISTRICT.

The cholera which has broken out in Minami Koyacho, Kyobashi District, proves to be of a virulent type, and the Authorities are doing all in their power to suppress it. Careful investigations are being conducted as to the cause of the outbreak. Mr. Nagayo, the Director of the Sanitary Bureau, repaired to the infected locality in order to make personal inspection. Finding that the water in this neighbourhood was entirely unfit for drinking, he gave orders at once that no one should be allowed to drink water from the wells in the vicinity, and that boiled water should be supplied. Subsequent report says, however, that water is to be conveyed from the wells near Hitotsubashi and distributed to the people

living in the infected district. In view of the fact that the wells in Kyobashi District are all supplied by the Kanda Josui, it may seem somewhat inexplicable that this particular locality only should suffer. But experts account for the bad water by percolation and defective pipes.

CHOLERA RETURNS.

The latest cholera returns derived from official sources are as follow:—

Prefecture.	Date.	New cases.	Deaths.
Nagasaki	9th	62	33
	10th	58	43
	11th	84	40
	12th	25	25
	13th	48	27
Yamaguchi	8th	27	17
	9th	37	18
	10th	31	9
	11th	31	22
	12th	13	7
Fukuoka	8th	24	24
	9th	47	22
	10th	23	28
	11th	80	34
	12th	53	27
Kumamoto	8th	18	10
	9th	11	5
	10th	6	6
	11th	24	6
	12th	19	15
Kagoshima	8th	4	5
	9th	6	4
	10th	8	4
	11th	3	4
	12th	3	1
Saga	8th	6	8
	9th	7	6
	10th	11	9
	11th	5	1
	12th	24	—
Oita	13th	13	5
	13th	1	3

The numbers of cases and deaths since the commencement of the epidemic, inclusive of the above figures, appear in the following table:—

Prefecture.	Cases.	Deaths.
Nagasaki	1,034	1,130
Yamaguchi	400	426
Fukuoka	1,630	498
Oita	38	18
Saga	104	90
Kumamoto	346	100
Kagoshima	233	100

The total number of cases and deaths in the following Cities and Prefectures since the commencement of the epidemic to the 12th instant, not included in the above, are:—

	Cases.	Deaths.
Tokyo	130	65
Osaka	35	20
Kanagawa	127	79
Hyogo	40	24
Hiroshima	37	21
Ehime	14	3

A seaman on board the bark *Lagoda* was seized with cholera on Tuesday and died at 4.30 p.m., and the captain of the steamer *Ping-Suey*, which arrived here on the 9th, was attacked on Tuesday and removed at once to hospital, the steamer being taken to Nagaura and placed in quarantine.

Captain Jacques, of the steamer *Ping-Suey*, who was removed from his ship to the hospital, is progressing favourably, and will recover. His case is not Asiatic cholera, though the symptoms at the outset were very similar.

It was reported to the Settlement Police Station on Saturday morning that a sendo had died in his boat at the English Hatoba of cholera. The body was removed to the Hospital.

A CHOLERA-PREVENTION FUND.

We learn from the leading columns of the *Fiji Shimpoo* of Sunday last that the Sanitary Association has inaugurated a Fund for the purpose of defraying the heavy expenses incurred by the preventive measures, rendered necessary by the rapid spread of the cholera. Our contemporary alludes to the ready response which every benevolent object meets with at the hands of the well-to-do residents of the capital and of provincial towns. It points out that even the selfish have a motive for subscribing to a fund of this kind; that it is a mode of self-protection which they cannot afford to ignore. The *Fiji* maintains that it is undesirable to increase the municipal taxes with the object of suppressing the cholera; that the occasion being a special one, the creation of a special fund is the most appropriate and most effective way of dealing with

it. The administration of this fund being in the hands of specialists, there is no fear of its being misapplied. The writer of the article makes an earnest appeal to his fellow-countrymen to respond to the call of the Sanitary Association.

THE BANK OF JAPAN.

The amounts of convertible notes and reserves in the Bank of Japan for the week ended the 9th inst. were as follows:—

CONVERTIBLE NOTES.		RESERVES AND SECURITIES.	
Yen.		Yen.	
Notes issued	71,810,015	Gold coin and bullion	24,205,412
		Silver coin and bullion	24,161,415
		Public Loan Bonds	13,470,450
		Treasury Bills	—
		Government Bonds	4,723,152
		Other securities	4,950,723
	71,810,015		71,610,152

Of the above total issue of notes the sum of yen 3,837,015 is in the treasury of the Bank, and yen 67,779,000 in actual circulation, the latter showing an increase of yen 640,801 as compared with yen 67,138,199 at the end of the previous week.

THE LATE MR. D. FITZ-HENRY.

It is with much regret that we place on record the death of an old resident, Mr. D. Fitz-Henry. The deceased was for many years the Agent here of the Comptoir d'Escompte de Paris, and went subsequently to China in a similar capacity, where his affable manner and gentle disposition won for him the friendship of the entire community, as these characteristics had already done for him in Japan. Mr. Fitz-Henry was a good sportsman, a clever actor, and a genial companion. The condition of his health since his return to Japan from a visit to Europe had not been good, and apoplexy carried him off yesterday at mid-day. The funeral will take place this afternoon at four o'clock from the Catholic Church, Main Street.

SHIPS FROM SHANGHAI.

We have clear evidence that cholera prevails in Shanghai, and hence we are somewhat surprised that it has not as yet been treated as an infected port. Vessels reaching Yokohama from Japanese infected ports are put into quarantine. But, as far as we are aware, vessels arriving direct from Shanghai are not thus treated. Is it that the attention of the Japanese Authorities has not been called to the existence of the epidemic in Shanghai? The case on the *Saikio Maru* ought to suffice to put them on the alert in the case of ships hailing from foreign infected ports.

THE SENATE.

In regard to the question of the abolition of the Senate (*Genro-in*), various reports have been in circulation. For a time an opinion prevailed that the abolition would not be effected until the opening of the Diet, as the Government machinery would otherwise be thrown out of gear. According to the latest report, however, the Authorities are said to have decided to carry out the scheme of dissolution before the end of August.

CONSUMPTION OF COAL IN TOKYO.

The *Official Gazette* says that the total consumption of coal in Tokyo during 1889 was 428,857,143 catties. Of this quantity, the amount used for manufacturing purposes was 72,656,930 catties; that used by ships 339,391,182 catties; and that used by railways 18,809,031 catties.

"THE INDUSTRIAL ARTS OF JAPAN."

We learn that the Council of the Royal Society of Arts has awarded the Society's silver medal to Mr. A. Lasenby Liberty for his paper on "The Industrial Arts of Japan," which was published in these columns in the early part of last month.

SAVING LIFE AT SEA.

The German steamer *Lydia*, Captain Forch, which recently arrived here from Hongkong, sighted a Japanese coaster in a sinking condition when about 27 miles S.W. by W. from Omai-saki from which she saved 12 men. The wreck lies in 34° 21' N. and 137° 47' E.

KOBÉ.

THE relations between foreigners and the lower orders of Japanese in Kobe seem to be decidedly strained. We hear of constant collisions, in all of which the foreigners come off second best. It is difficult to comprehend how such an unhappy state of affairs has been brought about in the "sunny settlement." Never before, during the thirty years' existence of the foreign settlements, have Japanese coolies and sendoes been known to behave with violent rudeness towards foreigners, and if they have so far broken this wholesome record in Kobe as to justify the very hard things said about them by the local English press, there must be causes in operation which do not appear on the surface. The *Hyogo News*, generally a moderate and accurate journal, refers to recent occurrences in language of the bitterest and most unmeasured kind; language expressive of so much indignation that one is disposed, at first sight, to form a very severe opinion about the conduct of the Japanese. But there are one or two points in our contemporary's comments which lead us to doubt whether they may be accepted as a dispassionate account. When we are told, for example, that "the immunity from punishment which Japanese coolies have hitherto enjoyed has made them bolder than their natural cowardice would lead one to suppose they could be," we become conscious at once that we are listening to words of passion not of reason. For Japanese coolies are not naturally cowardly: they are, on the contrary, remarkably plucky. No one unblinded by anger or prejudice could deliberately call them cravens. Seeing, then, that our contemporary has obviously suffered its calmer and more characteristic mood to be invaded by some access of strong sentiment, it becomes worth while to examine the charges of assault and battery upon which it arraigns the Japanese coolies. The first is that of a Manila seaman. Being very drunk, advantage was taken of his condition to demand an exorbitant *jinrikisha* fare. He refused to pay; had his coat pulled; lost his temper; took out a clasp knife; was set upon by a number of coolies; received a bad beating and was arrested by the police. At the station he was charged with stabbing two Japanese, but the *Hyogo News* avers that the charge was utterly false, and that the man never attempted to use the knife: "it dropped out of his pocket while he was being arrested, and was then picked up by either the police or some of the crowd." The *Kobe Herald* says that he "pulled it out": the *Hyogo News* says it dropped out of his pocket in the most innocent way conceivable. Now is it not taxing our credulity just a little too much to ask us to believe that a drunken Manila seaman was set upon and severely beaten by a Japanese crowd

merely because he declined to pay an exorbitant fare to a *jinrikisha* coolie, and that, even after he had been arrested by the police, this wantonly ferocious mob followed him and struck at him again and again? We cannot credit all that. Crowds do not behave in such a manner anywhere in the world. In the second incident alluded to by the *Hyogo News* four Chinamen were the victims. Concerning them we are told that "objecting to pay forty cents *sampan* fare, they were set upon and shamefully beaten by *jinrikisha* coolies and others who, seeing the row, joined in." A striking tale, is it not? A mob of *jinrikisha* coolies interfering to enforce the extortionate demands of a boat-man! Are the Kobe boat-men and *jinrikisha* coolies in league to assist one another's exactions? Then we have the case of an officer from the *Kashgar* who, seeing a sailor disputing about a *jinrikisha* fare, and wishing to avoid a disturbance, himself offered to pay the fare demanded, whereupon "the coolies standing round set upon him, belaboured him with bamboos, tore his clothes and robbed him." Coolies in Kobe have many moods, it would seem. They beat a man for refusing to be robbed, and they beat him also for allowing himself to be robbed, and there is no satisfying them. Yet another case is reported—that of the Captain of the *Parthia* who hired a *jinrikisha* by the day and paid seventy-five *sen*, though fifty *sen* appears to be the proper fare in Kobe. On coming ashore the next day the Captain had a volley of choice Anglo-Saxon epithets fired at his head by the aggrieved coolie. This is called a "disgraceful incident." So it was no doubt, but it loses something of its shocking character when we recall the heights of eloquence to which a London cabby sometimes climbs in his intercourse with a close-fisted fare. On the whole, we cannot persuade ourselves to imagine that those incidents for which Kobe is becoming notorious are quite such one-sided affairs as their foreign historian asks us to believe. At all events it seems plain that the writing of the *Hyogo News* can only have the effect of obtruding international sentiment into every miserable fracas between drunken foreign sailors and Japanese coolies or boat-men, as well as of greatly increasing the difficulties in the path of the Japanese police. It is already a very hard task for a Japanese constable to arrest a foreigner. Englishmen or Americans who would submit quietly at a mere touch from a policeman of their own nationality, will violently resent the notion of being arrested by a Japanese, and if this disposition is encouraged by the fable that Japanese constables behave with abandoned brutality towards foreign prisoners, and that the latter will be publicly applauded if they resist and commiserated if they get hurt in resisting, the preservation of good order cannot fail to be greatly

impeded. There cannot be much doubt that mismanagement exists somewhere in Kobe, and that the police are by no means as efficient as they ought to be. But the spirit displayed just now by the foreign local press will inevitably aggravate matters greatly, for it must have the effect of exasperating the Japanese, on the one hand, and of encouraging foreigners to defy the police, on the other.

A LEARNED PARSEE'S OPINIONS ABOUT JAPAN.

IT ought to be very interesting to the Japanese to hear a candid expression of the impressions produced by their country and their customs on an unprejudiced and friendly observer like Mr. K. M. SHROFF, whose account of what he has seen in Japan, and what he thinks about it, will be found elsewhere in our columns. Of course many of Mr. SHROFF's observations sound familiar to old residents. The wonderful thews and endurance of the *jinrikisha* coolie; the sunny and suave manners of the people; the charming grace and helpfulness of the women—all these are things which have often been descanted upon, and which have elicited admiration that threatens to grow a little stale. It is when Mr. SHROFF becomes critical that his comments have most value. He is not, we think, altogether just in one or two respects. Thus, when he speaks of a number of elections vitiated owing to corruption, we fail to follow him, for although there have been several attempts to unseat members on the ground of bribery and corruption, it has not been reported that any of them were successful. He has been misled, too, about expenditure on account of Parliament buildings. It was never contemplated, we believe, to spend over eight million *yen* for such a purpose, and of course the idea of contracting with a German firm for the buildings never entered the head of any Japanese Minister. The architectural designing and direction of the work were entrusted to a very eminent German expert, and it is possible that a sum approximating to that mentioned by Mr. SHROFF may have been contemplated as the total expenditure on Houses of Parliament, Courts of Justice, new Departments of Finance, Justice, and Home Affairs, as well as other public buildings the erection of which will have to be undertaken sooner or later. But under any circumstances the money would have been spread over a long series of years, and its employment in the manner contemplated cannot, we think, be called "heavy and unwarrantable expenditure," and certainly would not have embarrassed the country. The sums spent by Japan on public buildings are, on the whole, moderate. It surely cannot be alleged that her temporary Houses of Parliament are costly, though they are expected to serve for

fifteen years. Mr. SHROFF'S misapprehension extends also to the question of the national debt. He speaks of it as "considerable," doubtless failing to distinguish that it consists chiefly of a class of obligations—pension bonds given in commutation of the feudal nobles' and *samurai's* revenues—which cannot properly be classed as ordinary national debt. In point of fact one of the most remarkable pages of Japan's modern history is that containing the story of her finance; for when we consider what she has accomplished during the past twenty years, and when we observe that her total national debt—apart from the indebtedness directly arising out of the abolition of feudalism—does not amount to a year's ordinary revenue, we are constrained to confess that her financial management has been of the most creditable kind. No charge against Japanese Ministers could be less just than that of launching the State into "heavy and unwarrantable expenditure." These, however, are errors which may easily be made by a new comer whose opportunities for study are still incomplete. Mr. SHROFF'S observations on what he himself has actually seen are more to the point. Like every humane observer he is shocked at the treatment of horses in the capital. We cannot, indeed, endorse his comments about the condition of the tram-car and omnibus ponies, which seem to us to be generally well fed and well cared for. But that their strength is greatly overtaxed there can be no manner of doubt, and as for the animals driven in the tumble-down traps called *hako-basha*, their state is deplorable in the extreme. The suffering they are compelled to endure shocks every foreign observer, and is remembered to Japan's discredit by many a traveller. It is wholesome to find men like Mr. SHROFF speaking plainly on this subject. Judging by what one sees in country places, animals in Japan are not subjected to ill treatment. The leader of a pack-horse and the driver of a cart never carry whips or sticks: the sound of their voices seems to suffice. But in Tokyo and on the main roads leading to it, poor beasts of burden are too often forced to work under circumstances so agonizing that merciful observers cannot choose but draw damaging inferences as to the disposition of the Japanese. In this matter, as in his comments on the insanitary condition of Tokyo, and the want of a pure water supply, we are entirely with Mr. SHROFF. He will also find many to sympathise with his remarks about Japan's imitation of Western ways and her adoption of Western costume, but he will pardon us, we trust, for saying that we find him here a little superficial. In certain matters a nation cannot afford to be singular, and one of these matters is dress. Diversity may be exercised within certain limits, but since, speaking roughly, all Christendom dresses alike, and since

folks are silly enough to set great store by externals, we fear that to remain outside this circle of orthodox costume is to be consigned to the pale of heathendom. Certainly the rule applies to male attire, though happily it need not yet be extended radically to female. No rational objection, as we think, can be urged against the adoption of Western dress by the men of Japan. Even sentimental and artistic arguments yield to the plea of utility. And what is true of dress is true also of much that seems to have offended Mr. SHROFF'S conservative instincts. Japan's modern progress may be very differently represented according to the terms used to describe it. What one man praises as liberal adoption, another condemns as self-effacing imitation. We do not at all agree with Mr. SHROFF'S theory that a nation should preserve, "in their primitive entirety, its ancient customs, costumes, social habits and manners." Nose-rings and cannibalism would be perennial under such a system. Civilization cannot be sacrificed to the picturesque, and Japan cannot afford to perpetuate her isolation by preserving her singularity. Argue this matter how we may, the same conclusion is invariably reached. It is a large example of the natural principle, protection by mimicry, and though mimicry may be difficult to reconcile with independence, it is certain that the latter can be maintained by a due exercise of the former.

POLITICAL PARTIES IN THE DIET.

WRITING under this heading, the *Kokumin-no-Tomo* of the 3rd instant reviews the position of the various political parties represented in the Diet. After reproducing statistical classifications of the members from four of the Tokyo daily papers, the *Hochi Shimbun*, the *Daido Shimbun*, the *Fiji Shimpō*, and the *Kokumin Shimbun*, our contemporary proceeds to observe that, much as these papers differ in respect of the numerical strength of the several parties in the Diet, men capable of judgment seem to agree in assigning the largest number to the so-called "Independents," who are followed in order by the *Daido-ha*, the *Kaishin-to*, and the *Aikoku-ko-to*. Thus of all the parties, the *Daido-ha* has obtained the largest number of members. That it has been able to secure so many is attributed by our contemporary to the extremely favourable circumstances under which it was brought into existence. It was organized on a very broad basis, and at a moment when the old *Jiyu-to* had for some time been dissolved, and the *Kaishin-to* was in a state of temporary torpor. When, further, it is remembered that the avowed object of the party was to attack the clan system of Government, there is no wonder that it obtained the adhesion of all the politicians

out of power and not belonging to the *Kaishin-to*. Thus the *Daido Danketsu*, as it was called before the breaking up of its ranks into three parties,—the *Aikoku-ko-to*, the resuscitated *Jiyu-to*, and the *Daido-ha*—extended its influence over a wide area. Owing chiefly to these circumstances the party succeeded in emerging from the late elections with much *éclat*, notwithstanding that its influence was weakened by the organization of the *Aikoku-ko-to* and the resuscitated *Jiyu-to*. Though numerically strong, the *Daido-ha*, as might be inferred from the manner in which it sprang into being, is not distinguished by any strong cohesion among the different elements composing it. Our contemporary divides these elements into three classes; first, the centre, which is composed of men more distinguished for audacity in changing with the changes of the times than for devotion to any particular cause or principle; secondly, the right wing, which contains men professing liberal principles; and thirdly, the left wing, which leans to conservatism. The *Kokumin-no-Tomo* admires the consummate skill of the centre in maintaining apparent harmony among these incongruous elements. The Tokyo journal, however, shares the common belief that the *Daido-ha* is not destined to retain long its present influence. The right wing may readily be detached by Count ITAGAKI if only he sees his way to assume an attitude of greater liberality, while it would be easy for Viscount TANI to obtain the adhesion of the left wing. Thus the only portion of the party likely to remain true to its leader will be the wary centre. Moreover, those members of the *Daido-ha* who are of the provinces of the North-east—and they form the majority of the party—are not, according to the view of the *Kokumin-no-Tomo*, by any means ardent in their attachment to Count GOTO; neither are they as ambitious of political distinction as the members of the centre. Our contemporary is persuaded to believe that, for the present at least the members of the *Daido-ha* in the North-East will maintain an independent political organization of a liberal tendency after the fashion of the *Shimpō-to* of Kyushu. As yet, however, the *Daido-ha* may justly be proud of the number of gifted members in its ranks. Especially in political manœuvres its members are far ahead of even those among the *Kaishin-to* noted for their sagacity. In literary talent Mr. SUEHIRO JUKYO is most distinguished; in business capacity Mr. OYE TAKU; in political experience Mr. KONO HIRONAKA; in legal ability Mr. SUEMATSU (hitherto KO MYOJI) SABURO, and in boldness Mr. SUZUKI SHOJI. The Tokyo journal is sure that the members of the *Daido-ha* will distinguish themselves in the Diet more for skill in taking advantage of every turn of affairs than for constancy to any fixed policy. As to the resuscitated *Jiyu-to*

our contemporary observes that its influence in the Diet will be comparatively weak. But its members will not be disconcerted by this, as they have not been very solicitous of obtaining seats in the Legislature. The *Kokumin-no-Tomo*, however, thinks it a very lamentable fact that the leader of the party, Mr. OI KENTARO, was declared disqualified for sitting in the Diet. Among the members, the more celebrated are Messrs. NAKAE TOKUSUKE, formerly editor of the *Osaka Shinonome Shimbun*, SHIMAZU TADASADA, President of the Nagano Prefectural Assembly, and ARAI SHOGO of the "Osaka Affair" fame. The party will be unable to wield any formidable influence in the Diet, but as an adjunct to some of the larger parties it is certainly not to be slighted. Its closest affinities will probably be with the *Aikoku-ko-to*, concerning the future prospects of which our contemporary seems to entertain a highly favourable opinion. Its numerical strength in the Diet is not as great as that of the *Daido-ha*, but it is far stronger than the latter in respect of cohesion and combination. Its distinctive characteristic is sincere devotion to its political creed. From this point of view, the actions of its representatives in the Diet may be too scrupulous and unbending, but they will never, the *Kokumin* predicts, be open to a charge of inconstancy or tergiversation. The courageous Mr. HAYASHI YUZO, the solid Mr. KATAOKA KENKICHI, the business-like Mr. TAKENOUCHI TSUNA, the logical Mr. UYEKI EMORI, and the experienced Mr. SUGITA are the more distinguished members. There is one circumstance, however, which our contemporary regrets for the sake of the party: namely, that the majority of its members are of Tosa origin. It has thus a somewhat exclusive appearance, and may on that account fail to find favour with the inhabitants of other localities. The Tokyo magazine recommends Count ITAGAKI and his followers to take suitable measures to obviate this unfavourable impression. With regard to the *Fichi-to*, the *Kokumin-no-Tomo* observes that it is not by any means strongly represented in the Diet. Some people believe that it will be led in the Lower House by Mr. MUTSU, and in the upper by Viscount AOKI. Our contemporary is of opinion that this party labours under three serious disadvantages; first its aristocratic associations; secondly its Choshu clan tendency; and thirdly, its "odour of silver" (love of money). It is not destined, we are told, to grow powerful, and our contemporary doubts very much whether a man of Mr. MUTSU's penetration really contemplates identifying himself with such a party. The *Hoshu-to* and the *Kyushu Shimpoto* are nearly equally represented in the Diet, and must not be overlooked in any forecast of the political situation, because they are both rich in talented members. Mr. KAWASHIMA

JUN of Kagoshima, Mr. MATSUDA MASA-HISA of Saga, and Mr. YAMADA BUHO of Kumamoto, are the most conspicuous members of the *Kyushu Shimpoto*. The *Hoshu-to* can, on the other hand, boast of such distinguished names as those of Messrs. SUGIURA JUKO, OYAGI BICHIRO, MOTODA HAJIME, and SASA TOMOFUSA. Our contemporary persists in calling these persons Conservatives, though some of them strongly object to the title. With reference to the *Kaishin-to*, the *Kokumin-no-Tomo* observes that its failure to obtain a majority, or at least the largest relative number of members in the Diet, is the more significant, as it has endeavoured ever since its first appearance to enlist the sympathies of men certain to possess the franchise. The cause of the failure is ascribed to its unfortunate record with regard to the question of Treaty Revision last year. It is to be regretted that men like Messrs. KOIZUKA RYU, TSUNODA SHIMPEI, KATO MASANOSUKE, SUNAGAWA YUSHUN, YAMADA ICHIRO, ICHISHIMA KENKICHI, and HADANO DENZABURO were defeated at the late elections. Further, whatever may have been the cause of his decision, it is to be sincerely regretted for the sake of the *Kaishin-to*, that Mr. YANO FUMIO has retired from political life. It is also unfortunate that Mr. HATOHAMA, who is reported—though incorrectly we (*Japan Mail*) believe—to have intimate connections with the *Kaishin-to*, was unable to obtain a seat in the Diet. Equally regrettable is the absence from the list of the elected of the name of Mr. KATO TAKAAKI, a confidential lieutenant of Count OKUMA, though it should be observed that he made no attempt to canvass. Still the *Kaishin-to*, with Messrs. SHIMADA SABURO, OZAKI YUKIO, FUJITA MOKICHI, and INUKAI KI at its head, is by no means an unimportant factor in the Diet. Its organization may appear to outsiders firm and strong, but those well acquainted with its affairs seem to doubt this, and even question whether it will be able to hold its different sections in the bonds of discipline in the Diet. Last year, when the question of Treaty Revision was agitating the public mind, the two great organs of the party, the *Hochi Shimbun* and the *Mainichi Shimbun*, were observed to adopt different and conflicting lines of argument on some important points. For instance, when Count OKUMA endeavoured to conciliate Count ITO and his followers by promising that the judges of foreign origin mentioned in the Diplomatic Note should be naturalized in Japan, the *Hochi* supported its leader, while the *Mainichi* argued as if little or no importance attached to the naturalization proviso. However, the *Kokumin* hopes that the leaders of the party, taught by the experience of last year, may take precautions against a repetition of such fatal errors. As to the so-called "Independents," our contemporary ridicules the notion attributed to some of

them, of forming themselves into a distinct party on an independent platform; for the "Independents," though spoken of as one class, are an extremely heterogeneous body, being composed of men of all kinds of political creeds, from extreme conservatism to extreme radicalism. Lastly, as to the proposed alliance of the progressive parties, the *Kokumin-no-Tomo* considers that the settlement of this question will decide the political situation for the present, at least since a union of all the parties would mean 173 votes in a House of 300. Many persons doubt whether the *Daido-ha* will join the alliance, but, even excluding that party, and supposing that one-fourth of the "Independents" are won over, there still remain 135 votes, a formidable number when we consider that the rest of the House is divided into several separate parties. Our contemporary does not believe that the alliance, even if successfully formed, will last long; neither does it believe that the existing parties will long remain in their present condition. A time will come when entirely new parties with intelligible platforms will be formed out of the present associations, the latter being only provisional in their nature. At present, the best course for the progressive parties to adopt, in the opinion of the *Kokumin*, is union, for thus and thus alone will they be able to effect what they desire to accomplish in the coming Diet. Union, however, does not look at all as probable now as it did a fortnight ago.

THE 28TH ARTICLE OF THE LAW OF POLITICAL ASSOCIATIONS.

THE 28th Article of the new Law of Public Meetings and Political Associations has provoked wide comment. It forbids political associations to issue manifestoes or employ deputies for the purpose of influencing the public, and it also forbids them to establish branch offices or combine and correspond with other political associations. A year ago the enactment of such a law would not have caused any special excitement, but the sting of it at present lies in the fact that it has been promulgated just as the various parties constituting the opposition had begun to talk seriously of combining into one great association for parliamentary purposes. The law does not, indeed, render such combination impossible, but it applies a tolerably severe test of sincerity, and apparently the advocates of combination are not fully prepared to satisfy such a test. If the *Fiyu-to*, the *Aikoku-ko-to*, the *Daido Danketsu* and others are really in earnest as to their desire for union, the new law places no solid obstacle in their path. They need only dissolve their present organizations and re-group themselves into a united association with a new name and an intelli-

gible platform. The *Fiyu-to* and the *Aikokuko-to* have actually taken, or resolved upon taking, this step, but the *Daido Danketsu*, the *Kaishin-to*, and the *Kinshu Shimpō-to* refuse to break up their organizations or to surrender their independence. It results that a fusion of the three latter with the two former is no longer feasible, and that, for the present at all events, the formidable union which, a fortnight ago, seemed imminent has been postponed. Nothing succeeds like success. If the Government's purpose has been to defer a powerful combination of its opponents, it has certainly been successful, and that alone will go far to justify the enactment of the new law in the eyes of many folks. But beyond this superficial consideration come the questions—is the law a wise measure, and may not its severity have the ultimate effect of driving into opposition politicians who would otherwise have remained neutral? In attempting to form a conclusion on these points we are confronted by the old difficulty—ignorance of the precise nature of the case. It is not given to outsiders to know with any degree of accuracy the information upon the strength of which the Authorities have acted. Certain facts, however, are evident enough, and may be worth re-stating, since they appear to have escaped the attention of persons criticising the measure. In the first place, what is the object of the union contemplated by the various sections of the progressionists? It must be at once conceded that when men desire to combine for the defence or assertion of a principle not in itself immoral or illegal, their union ought to be beyond the reach of official interdict. In England there exists a law precisely analogous to that now enacted in Japan; in fact so identical are the two, that the latter may almost have been copied from the former. Yet in England at the present moment the administration is in the hands of a party composed of the Conservatives and a section of the Liberals, a general union between the two having been effected for the specific purpose of opposing home rule in Ireland. Such a union, unless we read the new law incorrectly, would not be illegal in Japan. Any number of the *Kaishin-to* members, for example, might with perfect propriety detach themselves from that party and enlist under the banners of the *Daido Danketsu*. Only, the detachment must be actual not nominal. Their names could not remain on the roll of the *Kaishin-to*—observe that in Japan lawfully formed political associations have publicly recognised lists of members—and appear at the same time on that of the *Daido Danketsu*. In short, there is nothing in the new law to prevent politicians, whatever their professed creed, from combining to support a special cause, provided only that, while so combined, they do not continue to preserve their origi-

nally separate organizations. Thus viewed, the new law appears to possess little real efficacy as against the opposition. It forbids a combination of separately organised parties, but it does not forbid a genuine solidarity, the members of which merge their individuality in the general union. It is in this distinction, as we think, that the true intention of the new law is to be sought. The so-called political parties existing at present in Japan are not in any sense worthy of the name. In almost every case they were for years content to take their stand upon platforms which could never have brought or held them together and which were obviously mere conventional formulæ. The real centre of attraction, the real rallying point, of these associations was some statesman who had seceded from the Government and whose prime motive was opposition. Over and above the individuality of their leaders no conceivable reason held them apart, but since they rallied about persons, not principles, the idea of fusion seemed above all things repugnant. Then came a time when, in view of the elections, these various parties found themselves compelled to formulate intelligible programmes. The result is fresh in everybody's memory. It was little short of a ludicrous fiasco. For with every desire in the world to attract support by enunciating concrete and tangible views, and with every inducement to establish clear mutual distinctions, they failed completely in both directions. To this moment it is impossible to differentiate, with any pretence of accuracy, the political tenets of members of the *Fiyu-to*, the *Aikokuko-to*, the *Daido Danketsu*, the *Kaishin-to*, the *Kinshu Shimpō*, and so forth. No thoughtful person will adduce these facts to the discredit of Japanese politicians. The plain truth is that the time has not yet come for the formation of genuine political parties in the Western sense of the term. Until men are brought face to face with living issues on the floor of the Diet, no rational and lasting bonds of union can be devised to hold a party together. One common purpose and one only can constitute a temporary link, and that is, opposition to the Government. Here then the question arises—would the Government be justified in tamely suffering such a link to be forged, knowing well that the result could only be public embarrassment if not administrative confusion? Working together merely so long as might be necessary to accomplish their object of driving the Cabinet out of office, could these parties be expected to continue their union for the conduct of the administration? Such a result could only be anticipated on the hypothesis that the several factions of the opposition are joined by the ties of common political principles, which is precisely what they are not. No secret has been made of the fact that their coalition would only be for temporary

and specific ends, and that they do not purpose working together permanently. The present is a most important crisis in Japanese political history. It will be an evil thing for the country if the first Diet is to be merely a congeries of political factions, willing to coalesce for the purpose of overthrowing the Government, but ready to fly at each other's throats immediately afterwards. We do not anticipate anything so unfortunate, but we do think that if, after years of mutual rivalry and recrimination, the existing political coteries should form a superficial union prompted solely by animosity to the Government, while preserving their individual organizations for subsequent uses, the best interests of the State cannot but suffer materially. It is, therefore, easy to appreciate the Government's motive when it enacts a law saying, in effect:—"Combine, if you please, but furnish a proof of the sincerity of your intentions by breaking up your present organizations, which, being based on persons not on principles, have hitherto served chiefly to prevent anything like sound political union, and by re-marrying yourselves on a platform of genuine and permanent agreement." Interpreted in this manner, the 28th Article of the new Law loses much of its arbitrary and restrictive character. It cannot, indeed, commend itself entirely to Englishmen of the present day. Yet English statesmen in the reign of GEORGE the Third thought it wise to frame a precisely similar enactment, and English statesmen of our own time have discovered no reason to repeal it. On the whole we think that, from the point of view of constitutional government, Japan is not more advanced than Great Britain was in the days of that illustrious monarch.

THE DIET AND FINANCE.

THE supplementary law of finance issued on the 2nd inst. has provoked much discussion. From the day of the promulgation of the Constitution, journalists and politicians fixed their attention on the 67th article, seeing plainly that on its interpretation depended the vital question, how far the power of the purse should be vested in the Government, how far in the Diet. According to the Constitution the control of the Diet in respect of finance is tolerably extensive. No new taxes can be levied, nor can national loans or other liabilities to the charge of the Treasury be incurred without the Diet's consent. Further, the annual expenditure and revenue of the State must be submitted for the consideration of the Diet in a Budget, and parliamentary sanction must be obtained for any outlay in excess of the sums thus estimated. But the powers conferred by these provisions are otherwise limited. In the first place, "administrative fees, or other revenue having the nature of com-

pensation," do not fall within the category of taxes concerning which the Diet must be consulted. Count ITO in his Commentary defines this to mean fees "collected from private individuals for undertakings engaged in, or for transactions conducted by, the Government, for them at their request or for their benefit." Railway fares, warehouse charges, school fees, and so forth come under this category. Naturally, too, taxes actually imposed at the time of the promulgation of the Constitution are to be continued without parliamentary sanction, unless remodelled by a new law. The expenditures of the Imperial House are also exempted from the purview of the Diet, except in case of an increase. And finally, when the Diet has not voted the Budget—that is to say, when the Diet has closed or been prorogued, or the House of Representatives has been dissolved, before the Budget has been definitively voted,—or again, when the Budget has not been brought into actual existence—that is to say, when the Budget has been rejected in one of the Houses—the Government is empowered to carry out the Budget of the preceding year. Briefly speaking, this means that the Government can manage the public finance over the head of the Diet, in the event of the latter proving recalcitrant. All these provisions are clear enough, and, being distinctly laid down in the Constitution, have not provoked hostile comment, though in some respects they fall considerably short of the strict theory of constitutional government. But then comes the celebrated Sixty-seventh Article, which forbids the Diet to reduce or reject, without the concurrence of the Government, "already fixed expenditures based by the Constitution on the powers appertaining to the EMPEROR, and such expenditures as may have arisen by the effect of law, or that appertain to the legal obligations of the Government." What are these "already fixed expenditures" and what the expenditures arising by the effect of law or appertaining to the legal obligations of the Government? Over and over again the newspapers examined the question and politicians discussed it, all contending for a liberal interpretation of the article, and complaining that if it were construed according to the terms of Count ITO'S Commentary on the Constitution, the scope of the Diet's authority in respect of finance would be unduly narrowed. Count ITO, however, had directed the framing of the Constitution. If any man in the empire knew exactly what its provisions meant, he was that man. It must have been felt from the first therefore that when the Budget came to be laid before the House of Representatives, it would prove to have been framed in the sense mapped out by the Commentary. But before that practical testimony could be furnished, rumour began to say that the Cabinet contemplated the promulgation of a law defining pre-

cisely in what manner the Sixty-seventh Article should be interpreted for the purposes of the Budget. It did not by any means appear absolutely necessary that such a law should be framed, since, according to the organization of the Cabinet, the Finance Department might have received instructions from the Government as to the framing of the Budget, and the official interpretation of the Constitution might thus have been conveyed to Parliament in a manner sufficiently conclusive. But, after long and anxious deliberation, the Authorities decided that the wiser course was to frame a supplementary law explaining the practical application of the Sixty-seventh Article, and this decision has now been acted upon. Speaking broadly, the new law divides the national expenditure into two parts, of which one—about sixth-sevenths of the whole—is removed from Parliamentary control, and the other—about one-seventh of the whole—falls directly within the sphere of that control. The *Nippon*, taking the last Budget, draws up a detailed schedule of the items which come under the various headings defined by the new law. The schedule is as follows:—

EXPENDITURES WHICH MAY NOT BE REDUCED OR ABOLISHED BY THE DIET WITHOUT THE CONCURRENCE OF THE GOVERNMENT.

CLASS I.	
EXPENDITURES BASED ON THE CONSTITUTIONAL PRIVILEGES OF THE EMPEROR.	
(1) Salaries of Civil and Military officers and retiring allowance to civil officials	Yen. 7,441,738
(2) Expenses for maintenance of Army, Navy, Gendarmerie, and Colonial Militia	17,906,221
(3) Expenses for decorations, pensions and rewards	157,250
(4) Expenditure arising from operation of treaties, and agreements with foreign countries	159,176
(5) Current expenses, and ordinary expenses for repairs, of Government offices	1,644,166
Total	27,308,551
CLASS II.	
EXPENDITURES ARISING FROM THE EFFECT OF LAW.	
(1) Expenses of the Imperial Diet	Yen. 791,231
(2) Ordinary Expenses for Courts of Law and the Board of Audit	3,697,397
(3) Allowances for good service and superannuation	538,884
(4) Conscription Expenses	188,039
(5) Expense of collecting taxes and other revenue	2,038,241
(6) Prison expenses	481,432
(7) Expenses connected with communications and aids to navigation	2,847,416
(8) Expenses for shipwrecked vessels, Japanese and foreign	1,961
(9) Local expenses of Okinawa Prefecture and Ogasawara-jima	162,176
(10) Famine Relief Fund	163,100
(11) Expenses for purchase of land in Hokkaido	3,000
(12) Reward and reliefs	93,014
Total	11,005,891
CLASS III.	
EXPENDITURES ARISING FROM THE LEGAL OBLIGATIONS OF THE GOVERNMENT.	
(1) Expenses for Shrines and Temples	Yen. 241,181
(2) Expenses for redeeming public loans	19,000,000
(3) Subsidies to public works and police expenses in various localities, in accordance with ordinances which have already gone into operation	1,266,279
(4) Pension Bonds of Okinawa Prefecture	154,500
(5) Subsidies and guarantees to various enterprises of navigation, railways, manufactures, industries, schools, and hospitals	2,002,822
(6) Salaries, rewards, and grants to foreigners	301,611
(7) Legal damages and costs	2,527

(8) Monies to be paid back	181,322
(9) Expenses for management of money in Treasury	575,617
(10) Interest on monies in the keeping of Government	1,103,262
(11) Rent of lands and buildings already hired	42,115
Total	24,876,258
CLASS IV.	
Yen.	
Continuing Expenditure	9,079,217

Grand Total 72,220,217

Now since the whole expenditure in the Budget from which these figures are taken is 84,551,310 yen, it follows that in such a budget the sum controllable by the Diet would only be 12,281,093 yen, or about one-seventh of the whole. Naturally this result is not favourably viewed by the opposition, but, at the same time, it is recognised that the wisest course to be pursued in respect of the first Diet is to confine its power within the strictest limits prescribed by the Constitution. Parliamentary institutions are an experiment in Japan. It will always be easy to increase the scope of the Diet's authority, whereas to revoke or curtail power once vested in it would be extremely difficult. Doubtless the official interpretation of the Sixty-seventh Article will be challenged, directly or indirectly, in the Diet, but on the whole we believe that the good sense of the nation will endorse the prudence shown by the Government in this matter.

ORGANIZATION OF THE POSTAL AND TELEGRAPH BUREAU.

IMPERIAL ORDINANCE No. 129.

We hereby give our sanction to the present amendment of and additions to the Organization of the Postal and Telegraph Bureau, and order the same to be promulgated.

(His Imperial Majesty's Sign-manual.)
(Great Seal.)

Dated July 16th, 1890.

COUNT YAMAGATA ARITOMO,
Minister President of State.
COUNT GOTO SHOJIRO,
Minister of State for Communications.

The following amendments and additions shall be made to the Organization of the Postal and Telegraph Bureau:—

The words "Assistant Postal and Telegraph Clerk" shall be inserted after "Clerk of Posts and Telegraphs" in Article 2.

The words "Assistant Postal Clerk" shall be inserted after "Postal Clerk" in Article 3.

The words "Assistant Telegraph Clerk" shall be inserted after "Telegraph Clerk" in Article 4.

Article 11 shall be amended to read as follows:—Assistant Postal Clerks, Assistant Postal Clerks, and Assistant Telegraph Clerks shall be of sixth *kanjin* rank, and assist clerks in their duties.

The following two articles shall be inserted after Article 11, and Article 12 shall be amended to Article 14.

Article 12.—The settled number of Assistant Postal and Telegraph Clerks, Assistant Postal Clerks, and Assistant Telegraph Clerks shall be 2,735.

Article 13.—Telegraph Engineers (*gishu*) shall be attached to the Postal and Telegraph Bureau, the settled number of whom shall be 947.

HORSFORD'S ACID PHOSPHATE.
Beware of Imitations.

SANITARY EXAMINATION OFFICES.

IMPERIAL ORDINANCE No. 155.

We hereby give our sanction to the present Amendment of the Organization of Sanitary Examination Offices (*Yei-shi-shiken-jo*), and order the same to be promulgated.

[His Imperial Majesty's Sign-manual.]
[Great Seal.]

Dated August 2nd, 1890.

(Countersigned)

Count YAMAGATA ARITOMO,
Minister President of State.

Count SAITO TSUKUMICHI,
Minister of State for Home Affairs.

Article 1.—Sanitary Examination Offices shall be established in Tokyo, Osaka, and Yokohama.

Article 2.—Sanitary Examination Offices shall be under the control of the Minister of State for Home Affairs, and shall deal with affairs relating to sanitary examination.

Article 3.—The following officials shall be attached to each sanitary examination office:—

A Chief,
Probationers for the office of engineer,
Gishu,
Clerks.

Article 4.—The Chief of the observatory shall be an engineer, and shall superintend the affairs of his office and control his subordinate officials under the guidance of the Minister of State for Home Affairs.

Article 5.—Engineers shall be of *sonin* rank and their settled number 7. They shall discharge the duties of examination according to the commands of their Chief, being attached to each examination office.

Probationers for the office of engineer shall be attached to each office, their settled number being 4.

Article 6.—*Gishu* shall be of *hannin* rank, and their settled number 21. They shall deal with miscellaneous affairs in accordance with the commands of their superiors.

Article 7.—Clerks shall be of *hannin* rank and their settled number 10. They shall manage miscellaneous affairs under the guidance of their superiors.

Article 8.—The division of the affairs of each examination office shall be decided by the Minister of State for Home Affairs.

JUDICIAL RANKS AND SALARIES.

IMPERIAL ORDINANCE No. 158.

We hereby give our sanction to the present Regulations relating to the Ranks and Salaries of Judges and Public Procurators.

[His Imperial Majesty's Sign-manual.]
[Great Seal.]

Dated August 2nd, 1890.

(Countersigned)

Count YAMAGATA ARITOMO,
Minister President of State.

Count YAMADA AKIYOSHI,
Minister of State for Justice.

Article 1.—The Ranks and Salaries of Judges and Public Procurators shall be in accordance with the following table.

Article 2.—The numbers, ranks, and yearly salaries of judges and public procurators shall be as follow:—

COURT OF CASSATION.

President (1), first *chokunin* rank; yearly salary, yen 5,000. (Yen 5,500 may, however, be given in special cases.)

Judges of Sections (3), first or second *chokunin* rank; yearly salary, yen 4,000-4,500.

Judges (27), second *chokunin* rank or second *sonin* rank; yearly salary, yen 1,800-3,500.

PUBLIC PROCURATORS' OFFICE OF THE COURT OF CASSATION.

Public Procurator-General (1), first *chokunin* rank; yearly salary, yen 4,500-5,000.

Public Procurators (5) second *chokunin* rank, or second *sonin* rank; yearly salary, yen 1,800-3,500.

APPEAL COURTS.

Presidents (7) Tokyo and Osaka, first *chokunin* rank; yearly salary yen 4,500; other places, second *chokunin* rank; yearly salary yen 3,500-4,000.

Chiefs of Sections (15) first or second *sonin* rank; yearly salary, yen 1,800-2,600.

Judges (85) third or fourth *sonin* rank; yearly salary, yen 1,000-1,500.

PUBLIC PROCURATORS' OFFICES OF APPEAL COURTS.

Chief Public Procurators (7) second *chokunin* rank; yearly salary yen 4,000 for Tokyo and Osaka; yen 3,000-3,500 for other places.

Public Procurators (20) first *sonin* rank to fourth *sonin* rank; yearly salary, yen 1,000-2,400.

DISTRICT COURTS.

Presidents (48) Tokyo and Osaka, first *sonin* rank; yearly salary yen 2,600; other places first *sonin* rank to third *sonin* rank, yearly salary, yen 1,600-2,400.

Chiefs of Sections (90) third or fourth *sonin* rank; yearly salary, yen 1,000-1,400.

Judges (415), fourth *sonin* rank or sixth *sonin* rank; yearly salary, yen 500-900.

PUBLIC PROCURATORS' OFFICES OF DISTRICT COURTS.

Chief Public Procurators (48) Tokyo and Osaka, first *sonin* rank; yearly salary, yen 2,400; other places, second *sonin* rank to fourth *sonin* rank, yearly salary, yen 1,100-2,200.

Public Procurators (125) fourth *sonin* rank to sixth *sonin* rank; yearly salary, yen 500-1,000.

LOCAL COURTS.

Judges (840), fourth *sonin* rank to sixth *sonin* rank; yearly salary yen 500-900.

PUBLIC PROCURATORS' OFFICES OF LOCAL COURTS.

Public Procurators (275), fourth *sonin* rank to sixth *sonin* rank; yearly salary yen 500-900.

Article 3.—The number of supernumerary judges shall be 35, and, of supernumerary public procurators 15.

Supernumerary judges and supernumerary public procurators shall be of sixth *sonin* rank and shall receive yen 400 as yearly salary.

The number of probationers for judicial offices shall be 110.

Probationers for judicial offices shall be treated as of *sonin* rank, and receive yen 300 or under as yearly salary.

Article 4.—In cases where the yearly salaries attached to an office mentioned in Article 2, are different, the number of officials shall be regulated with a view to the total amount payable. Should, however, there be too many officials, those lowest shall be gradually raised to higher office.

Article 5.—Judges or public procurators newly appointed in accordance with Article 62 of the Law for the Constitution of Courts of Justice, shall take sixth *sonin* rank and be granted yen 500 as a yearly salary. Supernumerary judges or supernumerary public procurators shall be similarly treated.

Judges or public procurators who are newly appointed in accordance with paragraph 1, Article 65 of the Law for the Constitution of Courts of Justice, shall take the lowest rank of the office for which they are destined, and receive the lowest yearly salary.

Should Judges or public procurators who have been transferred to other office or who have resigned, be re-appointed judges or public procurators they shall take rank equal to or below that of their former office, and receive a yearly salary equal to or below their former salary.

Article 6.—The promotion of judges or public procurators shall only take place when vacancies arise.

Promotion means a rise in rank or an increase of salary.

Article 7.—The promotion of judges or public procurators shall take place in accordance with the order of appointment to the respective offices, mentioned in Article 2. In deciding the order of appointment with a view to promotion, judges of local courts shall be reckoned the same as judges of district courts, and public procurators of local courts the same as public procurators of district courts.

Appointments to the posts of judges of sections, and judges of the Court of Cassation, public procurator-general, public procurators of the Court of Cassation, presidents, judges of sections, and judges of the Court of Appeal, chief public procurators and public procurators of the Court of Appeal, presidents and judges of sections in District Courts and chief public procurators of District Courts, may be regulated according to ability and talent without respect to seniority of service. Rank, however, shall not be ignored, and only the lowest yearly salary attached to the new office may be given.

Appointment to the post of president of the Court of Appeal of Tokyo or Osaka, chief public

procurators of the Court of Appeal of Tokyo or Osaka, president of District Courts in Tokyo or Osaka, and chief public procurators in the District Courts in Tokyo or Osaka may be regulated according to ability and talent without respect to seniority of service. Rank, however, shall not be ignored.

Article 8.—The order of appointment of judges and public procurators shall be decided in accordance with the amounts received as yearly salary; should these be the same then the order of the dates on which appointment took place; should these dates be the same, then the order of the dates on which the former yearly salary was begun, and should these be the same, then the ages of the respective candidates shall be taken.

The precedence of judges and public procurators in Courts shall be in accordance with the last paragraph.

Article 9.—Should judges or public procurators be transferred to other offices, only yearly salaries equal to or below the salary of their former office may be granted. The order of appointment in the latter case shall be decided in accordance with the date on which appointment to the former office took place.

These regulations shall be applied equally to cases where judges or public procurators who have been waiting for appointment are appointed, or where judicial or executive officials who are qualified to become judges or public procurators are to be appointed judges or public procurators.

Should judges or public procurators who have retired (*taishoku*) be re-appointed, only yearly salaries equal to or below the amounts formerly received by them may be given. The order of appointment shall be decided in this case in accordance with the dates of reappointment.

Article 10.—Articles 2, 3, 4, 6, 21, 22, 23, 24, 26, and 27 of the Regulations relating to the Salaries and Ranks of Higher Officials shall be applied to judges and public procurators.

SUPPLEMENTARY RULES.

Article 11.—Persons who are appointed before the Law for the Constitution of the Courts of Justice comes into force may be promoted without respect to the provisions of paragraph 1, Article 7.

Article 12.—Judges or public procurators who are in office when the Law for the Constitution of the Courts of Justice is carried out, may be continued in office with the same rank and salary, though their rank or salary may be higher or greater than those mentioned in Article 2.

Article 13.—This ordinance shall come into force on and after the first day of the 11th month of the 23rd year of Meiji.

AN INDIAN JOURNALIST ON JAPAN.

Mr. K. M. Shroff, a Parsee gentleman, editor and joint-proprietor of the *Fam-e-Famshid*, of Bombay, and Secretary to the Bombay Society for the Prevention of Cruelty to Animals, and a Municipal Councillor of Bombay, who delivered an address the other day before the Merchants' and Manufacturers' Association in Tokyo, has at our request kindly furnished the following, embodying the results of his observation during a three weeks' stay in the capital:—

After spending a day in Kobe I landed in Yokohama on the 10th July, and, having stayed two days in the latter port, I came on to Tokyo and have been here three weeks.

I have seen a great deal of Tokyo. I have wandered extensively in the first city of the empire, and have been greatly struck with its vastness, its enormous population—I am told, of about 1,300,000 souls—its immense traffic, some of its magnificent public buildings, with the politeness of the people, the characteristic cleanliness of their houses, with the beautiful and fascinating features of the female inmates, with the marvellous physical and muscular strength of the *jirikisha* coolies, who can drag one at a stretch for miles together, and have noted with surprise the progress, activity, and intelligence I see in every direction.

It was fortunate that I happened to be in Tokyo a few days before the Third Industrial National Exhibition was closed, because by taking a few rounds in the Exhibition I have obtained a very good idea of the art, industry, and imitative power

of the country, which I should never have got by even one year's travel in various parts of Japan. I think the Exhibition reflects very great credit on the government and the promoters of the movement, who must have gone through a stupendous amount of heavy work, months before the formation of the Exhibition, to have brought together such a vast collection of various articles from different parts of the country and put them in the order in which they stood—so effective and so systematic. The Exhibition, which contained exclusively things of Japanese make, greatly surprised me. Every imaginable article of necessity, luxury, and art was there; and I was told everything was made by Japanese without any European guidance or instruction. It bespeaks voluminous progress all round. There I saw even pianofortes, almost similar to those we get from Europe, and these were made by Japanese, not to speak of the innumerable other fancy and useful articles. It is no wonder that the Exhibition has been visited by a million of people, as your paper says. There was much in it to learn, to admire, and to be delighted with. I certainly was not prepared to see such things in Japan. To tell you the truth, we in India know very little of Japan. When I was at school twenty-five years ago, I was taught that Japan was near China, that its capital was Yedo, and that it was an island. Beyond that we knew nothing. I believe boys at school in Bombay at present learn that much and no more. Even some of our highly educated natives do not know much about Japan. Of late some Bombay merchants have become aware that Japan imports cotton and yarn. This ignorance is perhaps owing to the non-existence of any great commercial dealings between Bombay and Japan, and the paucity of visitors from your country to ours. We know more about China, because our countrymen have had dealings with that empire for more than half a century. Japan is as yet only peeping out into the world; but her progress during the last twenty-five years has been something astounding I must confess. She has an army and a navy kept up efficiently on European principles, and two or three lines of steamers commanded by Japanese. The dock-yards, the arsenals, the mining operations, and the Mint are also superintended by natives of the country. All the railways are managed by children of the soil. This is all very gratifying to me.

I regret that, owing to the summer vacation, most of the educational institutions are closed, which I should very much like to visit carefully. But I have inspected such as are open. I saw the Arsenal, the Military Academy, the Government Printing Bureau, the Headquarters of the Imperial Body-Guards, also those of the Artillery and Infantry, the school for military engineers, the Military Museum at Kuden, and I have also visited some of the mills and factories in the suburbs, the Shinto and Buddhist temples in the city, even the rings for Japanese wrestling matches and the Imperial palaces at Shiba and Hama, also the Zoological Collection in Ueno Park and the Museum there. Through the kindness of Colonel Teraoutsi, *Directeur de l'Ecole Militaire*, I was invited the other day to a brilliant military assemblage of officers to witness the distribution of diplomas and prizes, where the Emperor was present for full three hours. And what an active interest he took in the display of really excellent horsemanship and military sports by the students. We went with the Emperor from place to place in the extensive compound of the *Ecole Militaire*, and saw every manoeuvre through which the students went after their three years' course. The work done at the Arsenal and Printing Bureau is remarkable—the more so because it is done exclusively by Japanese. The Printing Bureau makes all the postage stamps and currency notes, with a lot of other litho work and steel plate engraving. I saw hundreds of Japanese girls employed there, which reminded me of a similar institution I had seen in Washington, U.S., sixteen years ago when I travelled there. It would be too long to narrate all I saw in the military headquarters which Captain Tenouchi with Mr. Sayayoshi, the interpreter, took me through. Everything was in excellent European order, ready for active service at any moment. But the zoological collection in Ueno Park is very poor, unworthy of the capital city, though the Museum is rich in its natural history department.

At that rate you will say, I have already seen much. But I have seen much more. I have visited nooks and corners of this great city—some of its best parts, and some of its worst parts; because I am interested in the municipal administration of Bombay, where we have several difficult problems to solve, affecting the welfare of a population of 800,000. I am, therefore, very anxious to study some of Tokyo's municipal questions, to find how they are dealt with

in a city with a population of 1,300,000. I have repeatedly driven through and closely watched some of the districts of the city, and I come to the conclusion that were it not for the numerous creeks and canals by which Tokyo is intersected, it would be next to impossible to live safely in this city. Although the authorities have hastened to light the streets by electric and gas light, the sanitary arrangements are so positively defective that only the canals and creeks conceal them; and the passage of the river through the length of the city mitigates the nuisance to a great extent. The creeks themselves are so full of filth and stagnant matter that I wonder how thousands of people live on either side of them. But for the flow and ebb of the sea passing through the entire length of these creeks, Tokyo would be a hot bed of cholera, because I perceive that all the sewage and filth of nearly half the city find their way into the creeks, and no ostensible means are employed for their periodical removal. I also notice that the art of roadmaking is understood in Japan. Some of the principal roads in Tokyo are well made, and properly kept; but lots of lanes and streets are full of pits and sadly require metalling. A drive through some of them by jinrikisha is full of jolting, and not very comfortable to one with a bad liver.

Talking of this mode of locomotion the jolliest drive I have ever enjoyed is by "ricksha." I envy the muscle of the "ricksha" coolies. How fast they run! How long they run—for miles together! I am told a coolie can take me by a "ricksha" forty miles at a stretch. This is almost superhuman; yet it is a fact. The number of "ricksha" plying for hire in the city is forty thousand, as I am informed by a Government officer, my valued friend, Mr. Tsuneki Sano, on the authority of the official registers. Notwithstanding, I see the traffic of the city is so large that there are in addition omnibuses or tram-cars running all day long. These tram companies pay handsomely, something like 16 per cent. But, alas! for the horses in the busses and tram-cars. They are such emaciated, lean, half-starved, and miserably kept animals that in my opinion it is a disgrace to Tokyo, and to the Japanese directors of the joint stock companies for these public conveyances. Even the traces of the horses are of the most slovenly character. It moves my heart to see these unfortunate animals worked in the streets so mercilessly by their cruel drivers. When the horses fail to draw the heavily-loaded cars they are beaten most inhumanly and dragged about atrociously by the month. I see these cars have no fixed number of passengers to carry. They let in as many as can find room barely to stand. When the Japanese are trying to imitate Europeans in all respects, why do not some kind-hearted citizens endeavour to establish a Society for the Prevention of Cruelty to Animals, to remedy these barbarous practices? Most of the people are Buddhists here, and Buddhism, of all the ancient religions, enjoins kindness to animals. Is it not revolting to Buddhist feelings to see such cruelties inflicted on animals in broad daylight in the principal thoroughfare of the Ginza? On the other hand, I observe that bullocks as beasts of burden in the city are admirably treated. They are in nice condition, and are well fed, healthy looking animals of large size. Very few of them are yoked to carts, but I am highly satisfied to see the condition of those few. I admire the contrivance made to protect them from the heat of the sun by the cart-men, who never take their seats in the cart to drive them, but walk with them all the way, and simply lead them. They easily drag heavy loads.

But I should prefer not to be drawn into a discussion on municipal matters in this city. Just at present I cannot speak authoritatively on them, inasmuch as I have not had time to study municipal questions. I have applied for papers and reports bearing on them; and until I go through them carefully I must reserve my remarks. However, I see from local papers that "the powers that be" are now earnestly taking up the question of a copious water supply to Tokyo from a distance of 20 miles, at a cost of \$7,000,000, by a distribution of iron pipes the aggregate length of which will be about 400 miles. Several schemes have been submitted by local and foreign engineers, and one of them is well nigh approved of. The sooner they do it the better, because the present supply is full of such impurities that I am told by my hotel men that they boil the water and then cool it before offering it to us for drink at the table.

I now come to the question of education, which is a broad and delicate one. It requires careful handling. To educate a nation is one thing; to denationalize it under the pretext of education is another. I am a great admirer of education, an ardent lover of the learning of the West. But at the same time I am a great abhorer of denationalization. I always long to see a nation kept up in its primitive entirety in regard to its ancient re-

ligion, customs, and costumes, social habits and manners, regardless of its intellectual advancement by contact with foreign nations. Japanese gentlemen will pardon me if I speak out my mind with reference to their progress. As I have already observed, their material progress has been rapid and marvellous; but there is much below the polished surface which is by no means desirable. With a little of superficial learning there is a considerable amount of disagreeable imitation of European costumes and customs. I wonder why the educated and even many uneducated Japanese should have set aside altogether their graceful national costume and gone in for European dress entirely. It is highly ridiculous to come across a man clad in full European dress, and still not able to speak a word of English, French, German, Italian, or any of the European languages which a man in such a dress ought to be able to speak. Why there should have been such a greedy craving for European dress throughout the principal city of the Empire passes all my comprehension. Hitherto I have not come across any Japanese of great learning, any citizens well read in European literature, from whose conversation I can form a correct idea of their mental culture. As scores of Japanese students have studied in European and American colleges and hold high posts in the civil administration of the country, they must carry an amount of learning undoubtedly. But some of them assume airs which remind one of the famous couplet of Pope:—

"A little learning is a dangerous thing," &c., &c.

Others smatter a little of incorrect English, or make up for their deficiency by smoking copiously in your presence. From their talk I gather that they know very little of what is going on in the world, beyond what occurs in Japan, and that they are very proud of their country. My remarks may undergo some modification when I come in contact with more highly educated persons after the summer vacation, when I hope to see some of their academical institutions. At present, I believe most of the educated men have gone to hill stations and summer resorts. There are few in Tokyo, and I have seen fewer. So I should refrain from forming hasty opinions. However, I am delighted to notice one thing in Tokyo—and that is that most of the men are able to read and write Japanese. As a proof of this I find that the Japanese newspapers are most widely circulated. No one has yet furnished me with the exact number of Japanese dailies issued in Tokyo alone. Some say the number is 20, some say 30. But I find from the directory that there are five principal Japanese papers in the capital, and the first of them has a daily circulation of thirty thousand. It makes my mouth water; in India we are so backward in that respect, despite all our honest efforts. It is no wonder that the Japanese papers should have such a wide circulation; for I find that every shopkeeper reads his paper; nay, all my hotel boys spend their leisure hours in reading local papers, even late at night. This, in one respect, is a healthy sign of national advancement.

As to the political aspect of the country, my opinions must necessarily be very crude and ill-digested, were I to form them from hearsay and what I read in the local papers, without a patient study of some of the politico-economic questions of Japan, now that the country is in a transition stage, for the new organizations since the revolution 25 years ago have not had sufficient time and trial, and are not yet finally settled. In the meantime, I see from the papers that the country has just gone through the excitement of a general election, and that you are going to have what the Japanese proudly call a "Parliament." From the number of cases of vitiated elections owing to corruption, as reported by the papers, the candidates must have been very keen for their return. Well, I wish the country every success on its new experimental measure of self-government. But I see the Ministers are going headlong, launching the State into heavy and unwarrantable expenditure. Why, I see from your own paper of the 1st inst., that although the Parliament has not yet met, one of the Ministers had almost arranged with a German firm of contractors to build the House of Parliament at a cost of yen 8,160,000. When he vacated the office, his successor upset his arrangements and cancelled the contract as being too costly. But the contractors decline to abrogate the contract, and I am told the authorities are a good deal embarrassed to get rid of the difficulty. This is another instance of hasty imitation of foreign countries. Because the Houses of Parliament in England are rich architectural possessions, the Japanese Parliament, yet in embryo, should have similar houses? The Japanese Ministers apparently forget that the present condition of England has been the result of the hard struggles of a sturdy and energetic nation for several cen-

turies. They forget that England has abundant wealth, boundless resources, innumerable foreign possessions; while Japan is a small, rising country, with not a yard of ground as its foreign possession, devoid of much mineral wealth which makes a country rich, has only one-tenth of the population of China, and has yet to amass wealth by developing its trade with foreign countries. And before all that is done, to have Houses of Parliament, at an enormous outlay, is surely calculated to make the country the laughing stock of foreign nations. Those who are at the helm of the State must cut their coat according to their cloth, and look before they leap. Otherwise, the result of all this headlong rush will be disastrous to the nation. I see the National Debt already reaches a respectable figure. If the Ministers increase it by unjustifiably heavy expenditure, the poor people will, ere long, be crushed under unbearable taxation, and discontent and disaffection will reign in a now peaceful and contented land. But I think I have said enough for the present. I may some other day trouble you with some further expressions of opinion as to what I see and hear. I remain in Tokyo till about the 20th, when I shall visit several other parts of the country, and I intend to leave Japan in October.

THE STRANGE RIDE OF MORROW-BIE JUKES.

BY RUDYARD KIPLING.

There is, as the conjurers say, no deception about this tale. Jukes by accident stumbled upon a village that is well known to exist, though he is the only Englishman who has been there. A somewhat similar institution used to flourish on the outskirts of Calcutta, and there is a story that if you go into the heart of Bikanir, which is in the heart of the Great Indian Desert, you shall come across not a village, but a town, where the dead have established their head-quarters.

And, since it is perfectly true that in the same desert is a wonderful city where all the rich money-lenders retreat after they have made their fortunes (fortunes so vast that the owners cannot trust even the strong hand of the Government to protect them, but take refuge in the waterless sands), and drive sumptuous C-spring barouches, and buy beautiful girls and decorate their palaces with gold and ivory and Minton tiles and mother-of-pearl, I do not see why Jukes' tale should not be true.

He is a civil engineer, with a head for plans and distances and things of that kind, and he certainly would not take the trouble to invent imaginary traps. He could earn more by doing his legitimate work. He never varies the tale in telling, and grows very hot and indignant when he thinks of the disrespectful treatment he received. He wrote this quite straightforwardly at first, but he has since touched up the places and introduced Moral Reflections, thus:

In the beginning it all arose from a slight attack of fever. My work necessitated my being in camp for some months between Palkpatan and Mubarakpur—a desolate, sandy stretch of country, as every one who has had the misfortune to go there may know. My coolies were neither more nor less exasperating than other gangs, and my work demanded sufficient attention to keep me from moping had I been inclined to so unmanly a weakness.

On the 23rd December, 1884, I felt a little feverish. There was a full moon at the time, and, in consequence, every dog near my tent was baying at it. The brutes assembled in twos and threes and drove me frantic. A few days previously I had shot one loud-mouthed singer and suspended his carcass in *terrorem* about fifty yards from my tent door. But his friends fell upon, fought for, and ultimately devoured the body, and, as it seemed to me, sang their hymns of thanksgiving afterward with renewed energy.

The light-headedness which accompanies fever acts differently upon different men. My irritation gave way after a short time to a fixed determination to slaughter one huge black and white beast who had been foremost in song and first in flight throughout the evening. Thanks to a shaking hand and a giddy head I had already missed him twice with both barrels of my shot-gun, when it struck me that the best plan would be to ride him down in the open and finish him off with a hog spear. This, of course, was merely the semi-delirious notion of a fever patient, but I remember that it struck me at the time as being eminently practical and feasible.

I therefore ordered my groom to saddle Pornic and bring him round quietly to the rear of my tent. When the pony was ready, I stood at his head pre-

pared to mount and dash out as soon as the dog should again lift up his voice. Pornic, by the way, had not been out of his pickets for a couple of days; the night air was crisp and chilly, and I was armed with a specially long and sharp pair of persuaders with which I had been rousing a sluggish cob that afternoon. You will easily believe, then, that when he was let go he went quickly.

In one moment, for the brute bolted as straight as a die, the tent was left far behind, and we were flying over the smooth, sandy soil at a racing speed. In another we had passed the wretched dog, and I had almost forgotten why it was that I had taken horse and hog spear.

The delirium of fever and the excitement of rapid motion through the air must have taken away the remnant of my senses. I have a faint recollection of standing upright in my stirrups and of brandishing my hog spear at the great white moon that looked down so calmly on my mad gallop, and of shouting challenges to the camel thorn bushes as they whizzed past. Once or twice, I believe, I swayed forward on Pornic's neck, and literally hung on by my spurs, as the marks next morning showed.

The wretched beast went forward like a thing possessed over what seemed to be a limitless expanse of moonlit sand. Next, I remember, the ground rose suddenly in front of us, and as we topped the ascent I saw the waters of the Sutlej shining like a silver bar below. Then Pornic blundered heavily on his nose and we rolled together down some unseen slope.

I must have lost consciousness, for when I recovered I was lying on my stomach in a heap of soft white sand, and the dawn was beginning to break dimly over the edge of the slope down which I had fallen. As the light grew stronger, I saw that I was at the bottom of a horseshoe-shaped crater of sand, opening on one side directly on to the shoals of the Sutlej. My fever had altogether left me, and with the exception of a slight dizziness in the head, I felt no bad effects from the fall over night.

Pornic, who was standing a few yards away, was naturally a good deal exhausted, but had not hurt himself in the least. His saddle, a favourite polo one, was much knocked about, and had been twisted under his belly. I took me some time to put him to rights, and in the meantime I had ample opportunities of observing the spot into which I had so foolishly dropped.

At the risk of being considered tedious I must describe it at length, inasmuch as an accurate mental picture of its peculiarities will be of material assistance in enabling the reader to understand what follows.

Imagine, then, as I have said before, a horseshoe-shaped crater of sand with steeply graded sides and walls about thirty-five feet high. (The slope, I fancy, must have been about 65°.) This crater enclosed a level piece of ground about fifty yards long by thirty as its broadest part, with a rude well in the centre.

Round the bottom of the crater about three feet from the level of the ground proper, ran a series of eighty-three semi-circular, ovoid, square and multilateral holes, all about three feet at the mouth. Each on inspection showed that it was carefully shored internally with driftwood and bamboos, and over the mouth a wooden trip-board projected, like the peak of a jockey's cap, for two feet.

No sign of life was visible in these tunnels, but a most sickening stench pervaded the entire amphitheatre—a stench fouler than any which my wanderings in Indian villages have introduced me to.

Having remounted Pornic, who was as anxious as I to get back to camp, I rode round the base of the horseshoe to find some place whence an exit would be practicable. The inhabitants, whoever they might be, had not thought fit to put in an appearance, so I was left to my own devices.

My first attempt to "rush" Pornic up the steep sandbanks showed me that I had fallen into a trap exactly on the same model as that which the ant lion sets for its prey. At each step the shifting sand poured down from above in tons, and rattled on the drip boards of the holes like small shot. A couple of ineffectual charges sent us both rolling down to the bottom half choked with the torrents of sand, and I was constrained to turn my attention to the river bank.

Here everything seemed easy enough. The sand hills ran down to the river edge, it is true, but there were plenty of shallows across which I could gallop Pornic and find my way back to terra firma by turning sharply to the right or left. As I led Pornic over the sands I was startled by the faint pop of a rifle across the river, and at the same moment a bullet dropped with a sharp "whit" close to Pornic's head.

There was no mistaking the nature of the missile—a regulation Martini-Henry "picket." About 500 yards away a country boat was anchored in

midstream, and a jet of smoke drifting away from its bows in the still morning air showed me whence the delicate attention had come. Was ever a respectable gentleman in such an *impasse*? The treacherous sand slope allowed no escape from a spot which I visited most involuntarily, and a promenade on the river frontage was the signal for a bombardment from some insane native in a boat. I'm afraid that I lost my temper very much indeed.

Another bullet reminded me that I had better save my breath to cool my porridge, and I retreated hastily up the sands and back to the horseshoe, where I saw that the noise of the rifle had drawn sixty-five human beings from the badger holes, which I had up till that point supposed to be untenanted. I found myself in the midst of a crowd of spectators—about forty men, twenty women, and one child who could not have been more than five years old.

They were all scantily clothed in that salmon coloured cloth which one associates with Hindu mendicants, and at first sight gave me the impression of a band of loathsome fakirs. The filth and repulsiveness of the assembly were beyond all description, and I shuddered to think what their life in the badger holes must be.

Even in these days, when local self-government has destroyed the greater part of a native's respect for a Sahib, I have been accustomed to a certain amount of civility from my inferiors, and on approaching the crowd naturally expected that there would be some recognition of my presence. As a matter of fact there was, but it was by no means what I had looked for.

The ragged crew actually laughed at me. Such laughter I hope I may never hear again. They cackled, yelled, whistled, and howled as I walked into their midst, some of them literally throwing themselves down on the ground in convulsions of unholy mirth. In a moment I had let go Pornic's head, and irritated beyond expression at the morning's adventure, commenced cuffing those nearest to me with all the force I could.

The wretches dropped under my blows like ninepins, and the laughter gave place to wails for mercy, while those yet untouched clasped me around the knees, imploring me in all sorts of uncouth tongues to spare them.

In the tumult, and just when I was feeling very much ashamed of myself for having thus easily given way to my temper, a thin, high voice murmured in English from behind my shoulder: "Sahib! Sahib! Do you not know me? Sahib, it is Gunga Dass, the telegraph master."

I spun round quickly and faced the speaker. Gunga Dass (I have, of course, no hesitation in mentioning the man's real name). I had known four years before as a Deccanese Brahmin sent by the Punjab Government to one of the Khalsia States. He was in charge of a branch telegraph office there, and when I had last met him was a jovial, full-stomached, portly Government servant, with a marvelous capacity for making bad puns in English—a peculiarity which made me remember him long after I had forgotten his services to me in his official capacity. It is seldom that a Hindu makes English puns.

Now, however, the man was changed beyond all recognition. Caste mark, stomach, slate-coloured continuations and unctuous speech were all gone. I looked at a withered skeleton, turbanless and almost naked, with long, matted hair and deep-set codfish eyes. But for a crescent-shaped scar on the left cheek—the result of an accident for which I was responsible—I should never have known him. But it was indubitably Gunga Dass, and—for this I was thankful—an English-speaking native, who might at least tell me the meaning of all that I had gone through that day.

The crowd retreated to some distance as I turned toward the miserable figure and ordered him to show me some method of escaping from the crater. He held a freshly plucked crow in his hand, and in reply to my question climbed slowly on a platform of sand which ran in front of the holes, and commenced lighting a fire there in silence. Dried hents, sand poppies and driftwood burn quickly, and I derived much consolation from the fact that he lit them with an ordinary sulphur match. When they were in a bright glow and the crow was neatly spitted in front thereof, Gunga Dass began, without a word of preamble:

"There are only two kind of men, sar. The alive and the dead. When you are dead you are dead, but when you are alive you live." (Here the crowd demanded his attention for an instant as it twirled before the fire in danger of being burned to a cinder.) "If you die at home and do not die when you come to the ghat to be burned, you come here."

The nature of the reeking village was made plain now, and all that I had known or read of the grotesque and the horrible paled before the fact just communicated by the ex-Brahmin. Sixteen years

Original from

ago, when I first landed in Bombay, I had been told by a wandering Armenian of the existence, somewhere in India, of a place to which such Hindus as had the misfortune to recover from trance or catalepsy were conveyed and kept, and I recollect laughing heartily at what I was then pleased to consider a traveller's tale.

Sitting at the bottom of the sand trap the memory of Watson's Hotel, with its swinging pookahs, white robed attendants, and the saw-toothed Armenian rose up in my mind as vividly as a photograph, and I burst into a loud fit of laughter. The contrast was too absurd!

Gunga Dass, as he bent over the unclean bird, watched me curiously. Hindus seldom laugh, and his surroundings were not such as to move Gunga Dass to any undue excess of hilarity. He removed the crow solemnly from the wooden spit, and as solemnly devoured it. Then he continued his story, which I give in his own words:—

"In epidemics of the cholera you are carried to be burnt almost before you are dead. When you come to the riverside, the cold air, perhaps, makes you alive, mud is put on your nose and mouth, and you die conclusively. If you are rather more alive, more mud is put; but if you are too lively, they let you go, and take you away.

"I was too lively, and made protestations with anger against the indignities that they endeavoured to press upon me. In those days I was Brahmin and proud man. Now I am a dead man and eat"—here he eyed the well-gnawed breast bone with the first sign of emotion that I had seen in him since we met—"crows and other things. They took me from my sheets when they found that I was too lively and gave me medicines for one week, and I survived successfully. Then they sent me by rail from my place to Okara Station, with a man to take care of me, and at Okara Station we met two other men, and they conducted we three on camels, in the night, from Okara Station to this place, and they propelled me from the top to the bottom, and the other two succumbed, and I have been here ever since—two and a half years. I was Brahmin and proud man, and now I eat crows."

"There is no way of getting out?"

"None of what kind at all. When I first came I made experiments frequently, and all the others also, but we have always succumbed to the sand which is precipitated upon our heads.

"But surely," I broke in at this point, "the river front is open, and it is worth while dodging the bullets, while at night—"

I had already matured a rough plan of escape which a natural instinct of selfishness forbade me sharing with Gunga Dass. He, however, divined my unspoken thought, almost as soon as it was formed, and to my intense astonishment gave vent to a long, low chuckle of derision—the laughter, be it understood, of a superior or at least of an equal.

"You will not!"—he had dropped the air completely after his opening sentence—"make any escape that way. But you can try. I have tried. Once only."

The sensation of nameless terror and abject fear which I had in vain attempted to strive against overmastered me completely. My long fast—it was now close upon 10 o'clock, and I had eaten nothing since tiffin on the previous day—combined with the violent and unnatural agitation of the ride, had exhausted me, and I verily believe that for a few moments I acted as one mad. I hurled myself against the pitiless sand slope. I ran round the base of the crater, blaspheming and praying by turns. I crawled out among the sedges of the river front only to be driven back each time in an agony of nervous dread by the rifle bullets which cut up the sand round me—for I dared not face the death of a mad dog among that hideous crowd—and finally fell, spent and raving, at the curb of the well.

No one had taken the slightest notice of an exhibition which makes me blush hotly even when I think of it now.

Two or three men tried on my panting body as they drew water, but they were evidently used to this sort of thing, and had no time to waste upon me. The situation was humiliating. Gunga Dass, indeed, when he had banked the embers of his fire with sand, was at some pains to throw half a cupful of fetid water over my head, an attention for which I could have fallen on my knees and thanked him, but he was laughing all the while in the same mirthless, wheezy key that greeted me on my first attempt to force the shoals. And so, in a semi-comatose condition, I lay till noon.

Then, being only a man after all, I felt hungry, and intimated as much to Gunga Dass, whom I had begun to regard as my natural protector. Following the impulse of the outer world when dealing with natives, I put my hand into my pocket and drew out four annas. The absurdity

of the gift struck me at once, and I was about to replace the money.

Gunga Dass, however, was of a different opinion. "Give me the money," said he, "you have, or I will get help and we will kill you!" All this as if it were the most natural thing in the world.

A Briton's first impulse, I believe, is to guard the contents of his pockets; but a moment's reflection convinced me of the futility of differing with the one man who had it in his power to make me comfortable, and with whose help it was possible that I might eventually escape from the crater. I gave him all the money in my possession. Rs. 9-8-5—nine rupees, eight annas, and five pie—for I always keep small change as *bakushish* when I am in camp.

Gunga Dass clutched the coins and hid them at once in his ragged loin cloth, his expression changing to something diabolical as he looked round to assure himself that no one had observed us.

"Now I will give you something to eat," said he. What pleasure the possession of my money could have afforded him I am unable to say; but inasmuch as it did give him evident delight I was not sorry that I parted with it so readily, for I had no doubt that he would have had me killed if I had refused. One does not protest against the vagaries of a den of wild beasts; and my companions were lower than any beasts.

While I devoured what Gunga Dass had provided, a coarse *chopatti* and a cupful of the foul well water, the people showed not the faintest sign of curiosity—that curiosity which is so rampant, as a rule, in an Indian village. I could even fancy that they despised me. At all events, they treated me with the most chilling indifference, and Gunga Dass was nearly as bad. I plied him with questions about the terrible village, and received extremely unsatisfactory answers. So far as I could gather, it had been in existence from time immemorial, whence I concluded that it was at least a century old, and during that time no one had ever been known to escape from it. (I had to control myself here with both hands, lest the blind terror should lay hold of me a second time and drive me raving round the crater.) Gunga Dass took a malicious pleasure in emphasizing this point and in watching me wince. Nothing that I could do would induce him to tell me who the mysterious "They" were.

"It is so ordered," he would reply, "and I do not yet know any one who has disobeyed the order."

"Only wait until my servants find that I am missing," I retorted, "and I promise you that this place shall be cleared off the face of the earth, and I'll give you a lesson in civility, too, my friend."

"Your servants would be torn in pieces before they came near this place; and, besides, you are dead, my dear friend. It is not your fault, of course, but none the less you are dead and buried."

At irregular intervals supplies of food, I was told, were dropped down from the band side into the amphitheatre, and the inhabitants fought for them like wild beasts. When a man felt his death coming on he retreated to his lair and died there. The body was sometimes dragged out of the hole and thrown on the sand or allowed to rot where it lay.

The phrase "thrown on the sand" caught my attention, and I asked Gunga Dass whether this sort of thing was not likely to breed a pestilence.

"That," said he, with another of his wheezy chuckles, "you may see for yourself subsequently. You will have much time to make observations."

Whereat, to his great delight, I winced once more and hastily continued the conversation: "And how do you live here from day to day? What do you do?" The question elicited exactly the same answer as before—coupled with the information that "this place is like your European heaven; there is neither marrying nor giving in marriage."

Gunga Dass had been educated at a mission school, and, as he himself admitted, had he only changed his religion, "like a wise man," might have avoided the living grave which was now his portion. But as long as I was with him I fancy he was happy.

Here was a Sahib, a representative of the dominant race, helpless as a child and completely at the mercy of his native neighbours. In a deliberate, lazy way he set himself to torture me as a schoolboy would devote a rapturous half hour to watching the agonies of an impaled beetle, or as a ferret in a blind burrow might glue himself comfortably to the neck of a rabbit.

The burden of his conversation was that there was no escape, "of no kind whatever," and that I should stay here till I died and was "thrown on the sand." If it were possible to forejudge the conversation of the Damned on the advent of a new soul in their abode, I should say that they

would speak as Gunga Dass did to me throughout that long afternoon. I was powerless to protest or answer; all my energies being devoted to a struggle against the inexplicable terror that threatened to overwhelm me again and again. I can compare the feeling to nothing except the struggles of a man against the overwhelming nausea of the Channel passage—only my agony was of the spirit and infinitely more terrible.

As the day wore on the inhabitants began to appear in full strength to catch the rays of the afternoon sun, which were now sloping in at the mouth of the crater. They assembled in little knots and talked among themselves without even throwing a glance in my direction. About 4 o'clock, as far as I could judge, Gunga Dass rose and dived into his lair for a moment, emerging with a live crow in his hands. The wretched bird was in a most dragged and deplorable condition, but seemed to be in no way afraid of his master.

Advancing cautiously to the river front, Gunga Dass stepped from tussock to tussock until he had reached a smooth patch of sand directly in the line of the boat's fire. The occupants of the boat took no notice. Here he stopped, and with a couple of dexterous turns of the wrist pegged the bird on its back with outstretched wings.

As was only natural, the crow began to shriek at once and beat the air with its claws. In a few seconds the clamor had attracted the attention of a bevy of wild crows on a shoal a few hundred yards away, where they were discussing something that looked like a corpse. Half a dozen crows flew over at once to see what was going on, and also, as it proved, to attack the pinioned bird.

Gunga Dass, who had lain down on a tussock, motioned me to be quiet, though I fancy this was a needless precaution. In a moment, and before I could see how it happened, a wild crow, who had grappled with the shrieking and helpless bird, was entangled in the latter's claws, swiftly disengaged by Gunga Dass, and pegged down beside its companion in adversity. Curiosity, it seemed, overpowered the rest of the flock, and almost before Gunga Dass had time to withdraw to the tussock, two more captives were struggling in the upturned claws of the decoys. So the chase—if I can give it so dignified a name—continued until Gunga Dass had captured seven crows. Five of them he throttled at once, reserving two for further operations another day: I was a good deal impressed by this, to me, novel method of securing food, and complimented Gunga Dass on his skill. "It is nothing to do," said he. "To-morrow you must do it for me. You are stronger than I am."

This calm assumption of superiority upset me not a little, and I answered peremptorily: "Indeed, you old ruffian! What do you think I have given you money for?"

"Very well," was the unmoved reply. "Perhaps not to-morrow, nor the day after, nor subsequently, but in the end, and for many years, you will catch crows and eat crows, and you will thank your European God that you have crows to catch and eat."

I could have cheerfully strangled him for this, but judged it best under the circumstances to smother my resentment. An hour later I was eating one of the crows, and, as Gunga Dass had said, thanking my God that I had a crow to eat.

Never as long as I live shall I forget that evening meal. The whole population were squatting on the hard sand platform opposite their dens, huddled over tiny fires of refuse and dried rushes. Death, having once laid his hand upon these men and forbore to strike, seemed to stand aloof from them now, for most of our company were old men, bent and worn and twisted with years, and women aged to all appearance as the Fates themselves. They sat together in knots and talked—God only knows what they found to discuss—in low, equable tones, curiously in contrast to the strident babble with which natives are accustomed to make day hideous.

Now and then an access of that sudden fury which had possessed me in the morning would lay hold on a man or woman, and with yells and imprecations the sufferer would attack the steep slope, until, baffled and bleeding, he fell back on the platform incapable of moving a limb. The others would never even raise their eyes when this happened, as men too well aware of the futility of their fellows' attempts and wearied with their useless repetition. I saw four such outbursts in the course of that evening.

Gunga Dass took an eminently business-like view of my situation, and while we were dining—I can afford to laugh at the recollection now, but it was painful enough at the time—pre-occupied the terms on which he would consent to "do" for me. My nine rupees, eight annas, he agreed, at the rate of three annas = day, would provide me with food for fifty-one days, or about seven weeks

—that is to say, he would be willing to care for me for that length of time. At the end of it I was to look after myself.

For a further consideration—*videlicet*, my boots—he would be willing to allow me to occupy the den next to his own, and would supply me with as much dried grass for bedding as he could spare.

"Very well, Gunga Dass," I replied; "to the first terms I cheerfully agree, but as there is nothing on earth to prevent my killing you as you sit here—(I thought of the two invaluable crows at the time)—I flatly refuse to give you my boots, and shall take whichever den I please."

The stroke was a bold one, and I was glad when I saw that it had succeeded. Gunga Dass changed his tone immediately and disavowed all intention of asking for my boots.

At the time it did not appear to strike me at all strange that I, a civil engineer, a man of thirteen years' standing in the service, and I trust an average Englishman, should thus calmly threaten murder and violence against the man who had, for a consideration, it is true, taken me under his wing. I had left the world, it seemed, for centuries. I was as certain then as I am now of my own existence that in the accursed settlement there was no law save that of the strongest; that the living dead men had thrown behind them every canon of the world which had cast them out, and that I had to depend for my own life on my strength and vigilance alone. The crew of the ill-fated *Mignonette* are the only men who would understand my frame of mind.

"At present," I argued to myself, "I am strong and a match for six of these wretches. It is imperatively necessary that I should, for my own sake, keep both health and strength until the hour of my release comes—if it ever does."

Fortified with these resolutions, I ate and drank as much as I could, and made Gunga Dass understand that I intended to be his master, and that the least sign of insubordination on his part would be visited with the only punishment I had it in my power to inflict—sudden and violent death. Shortly after this I went to bed.

That is to say, Gunga Dass gave me a double handful of dried beets, which I thrust down the mouth of the lair to the right of his and followed myself, feet foremost, the hole running about nine feet into the sand with a slight downward inclination, and being neatly shored with timbers. From my den, which faced the river front, I was able to watch the waters of the Sutlej flowing past under the light of a young moon and compose myself to sleep as best I might.

The horrors of that night I shall never forget. My den was nearly as narrow as a coffin, and the sides had been worn smooth and greasy by the contact of innumerable naked bodies, added to which it smelled abominably. Sleep was altogether out of the question to one in my excited frame of mind. As the night wore on it seemed the entire amphitheatre was filled with legions of unclean devils that, trooping up from the shoals below, mocked the unfortunates in their lairs.

Personally, I am not of an imaginative temperament—very few engineers are—but on that occasion I was as completely prostrated with nervous terror as any woman. After half an hour or so, however, I was able once more to calmly review my chances of escape. Any exit by the steep sand walls was, of course, impracticable. I had been thoroughly convinced of this some time before.

It was possible, just possible, that I might, in the uncertain moonlight, safely run the gamut of the rifle shots. The place was so full of terror for me that I was prepared to undergo any risk in leaving it. Imagine my delight, then, when after creeping stealthily to the river front, I found that the infernal boat was not there. My freedom lay before me in the next few steps!

By walking out to the first shallow pool that lay at the foot of the projecting left horn of the horse-shoe, I could wade across, turn the flank of the crater and make my way inland. Without a moment's hesitation I marched briskly past the tussocks where Gunga Dass had snared the crows and out in the direction of the smooth white sand beyond. My first step from the tufts of dried grass showed me how utterly futile was any hope of escape, for as I put my foot down, I felt an indescribable drawing, sucking motion of the sand below. Another moment and my leg was swallowed up nearly to the knee. In the moonlight the whole surface of the sand seemed to be shaken with devilish delight at my disappointment. I struggled dear, sweating with terror and exertion, back to the tussocks behind me and fell on my face.

My only means of escape from the semi-circle was protected with a quicksand!

How long I lay I have not the faintest idea; but I was aroused at last by the malevolent chuckle of Gunga Dass at my ear. "I would advise you, Protector of the Poor" (the ruffian was speaking

English), "to return to your house. It is unhealthy to lie here. Moreover, when the boat returns, you will most certainly be rifled at." He stood over me in the dim light of the dawn, chuckling and laughing to himself.

Suppressing my first impulse to catch the man by the neck and throw him on to the quicksand, I rose sullenly and followed him to the platform below the burrows.

Suddenly, and futilely, as I thought while I spoke, I asked: "Gunga Dass, what is the good of the boat if I can't get out, anyhow?" I recollect that even in my deepest trouble I had been speculating vaguely on the waste of ammunition in guarding an already well-protected foreshore.

Gunga Dass laughed again and made answer: "They have the boat only in daytime. It is for the reason that there is a way. I hope we shall have the pleasure of your company for much longer time. It is a pleasant spot when you have been here some years and eaten roast crow long enough."

I staggered, mumbled and helpless, toward the fetid burrow allotted to me, and fell asleep. An hour or so later I was awakened by a piercing scream—the shrill, high-pitched scream of a horse in pain. Those who have once heard that will never forget the sound. I found some little difficulty in scrambling out of the burrow. When I was in the open I saw Pornic, my poor old Pornic, lying dead on the sandy soil.

How they had killed him I cannot guess. Gunga Dass explained that horse was better than crow, and "greatest good of greatest number is political maxim. We are now republic, Mister Jukes, and you are entitled to a fair share of the beast. If you like we will pass a vote of thanks. Shall I propose?"

Yes, we were a republic, indeed! A republic of wild beasts penned at the bottom of a pit, to fight and sleep till we died. I attempted no protest of any kind, but sat down and stared at the hideous sight in front of me. In less time almost than it takes me to write this, Pornic's body was divided, in some unclean way or other; the men and women had dragged the fragments on to the platform and were preparing their morning meal. Gunga Dass cooked mine.

The almost irresistible impulse to fly at the sand walls until I was wearied laid hold of me afresh, and I had to struggle against it with all my might. Gunga Dass was offensively jocular until I told him that if he addressed another remark of any kind whatever to me, I should strangle him where he sat. This silenced him until silence became insupportable, and I bade him say something.

"You will have to stay here till you die, like the other Feringhi," he said, coolly, watching me over the fragment of gristle that he was gnawing.

"What other Sahib, you swine? Speak at once, and don't stop to tell me a lie."

"He is over there," answered Gunga Dass, pointing to a burrow mouth about four doors to the left of my own. "You can see for yourself. He died in the burrow as you will die and I will die, and as all these men and women and the one child will also die."

"For pity's sake, tell me all you know about him. Who was he? When did he come, and when did he die?"

This appeal was a weak step on my part. Gunga Dass only leered and replied:

"I will not—unless you give me something first."

Then I recollected where I was, and struck the man between the eyes, partially stunning him. He stepped down from the platform at once, and, cowering and fawning and weeping, and attempting to embrace my feet, led me round to the burrow which he had indicated.

"I know nothing whatever about the gentleman. Your God be my witness that I do not. He was as anxious to escape as you were, and he was shot from the boat, though we all did all things to prevent him. He was shot here." Gunga Dass laid his hand on his lean stomach and howled to the earth.

"Well, and what then? Go on."

"And then—and then, your Honour, we carried him into his house and gave him water and put wet cloths on the wound, and he laid down in his house and gave up the ghost."

"In how long? In how long?"

"About half an hour after he received his wound. I call Vishu to witness," yelled the wretched man, "that I did everything for him. Everything which was possible, that I did."

He threw himself down on the ground and clasped my ankles. But I had my doubts about Gunga Dass's benevolence, and kicked him off as he lay protesting.

"I believe you robbed him of everything he had. But I can find out in a minute or two. How long was the Sahib here?"

"Nearly a year and a half. I think he must

have gone mad. But hear me swear, Protector of the Poor! Won't your Honour her me swear that I never touched an article that belonged to him? What is your Worship going to do?"

I had taken Gunga Dass by the waist and had hauled him upon the platform opposite the deserted burrow. As I did so I thought of my wretched fellow prisoner's unspeakable misery among all these horrors for eighteen months and the final agony of dying like a rat in a hole, with a bullet wound in the stomach. Gunga Dass fancied I was going to kill him, and he howled pitifully. The rest of the population, in the plethora that follows a full flesh meal, watched us without stirring.

"Go inside, Gunga Dass," said I, "and fetch it out."

I was feeling sick and faint with horror now. Gunga Dass nearly rolled off the platform and howled aloud:

"But I am Brahmin, Sahib—a high-caste Brahmin. By your soul, by your father's soul, do not make me do this thing!"

"Brahmin or no Brahmin, by my soul and my father's soul, in you go!" I said, and seizing him by his shoulders, I crammed his head into the mouth of the burrow, kicked the rest of him in, and sitting, covered my face with my hands.

And at the end of a few minutes I heard a rustle and a creak, and then Gunga Dass, in a sobbing, choking whisper, speaking to himself; then a soft thud—and I uncovered my eyes.

The dry sand had turned the corpse intrusted to its keeping into a yellow-brown mummy. I told Gunga Dass to stand off while I examined it. The body—clad in an olive-green hunting suit, much stained and worn, with leather pads on the shoulders—was that of a man between thirty and forty, above middle height, with light, sandy hair, long mustache and a rough, unkempt beard. The left canine of the upper jaw was missing, and a portion of the lobe of the right ear was gone.

On the second finger of the left hand was a ring—a shield-shaped bloodstone set in gold, with a monogram that might have been either "B. K." or "B. L." On the third finger of the right hand was a silver ring in the shape of a coiled cobra, much worn and tarnished. Gunga Dass deposited a handful of trifles he had picked out of the burrow at my feet, and covering the face of the body with my handkerchief, I turned to examine these. I give the full list in the hope that it may lead to the identification of the unfortunate man:

1. Bowl of a briarwood pipe, serrated at the edge, much worn and blackened, bound with string at the screw.
2. Two patent lever keys, wards of both broken.
3. Tortoise shell handled penknife, silver or nickel name plate, marked with monogram "B. K."
4. Envelope, postmark undecipherable, bearing a Victorian stamp, addressed to "Miss Mon—" (rest illegible)—"I am"—"nt."
5. Imitation crocodile skin note book, with pencil. First forty-five pages blank; four and a half illegible; fifteen others filled with private memoranda, relating chiefly to three persons—a Mrs. L. Singleton, abbreviated several times to "Lot Single," "Mrs. S. May," and "Garrison," referred to in places as "Jerry" or "Jack."
6. Handle of small-sized hunting knife. Blade snapped short. Buck's horn, diamond cut, with swivel and ring on the butt; fragment of cotton cord attached.

It must not be supposed that I inventoried all these things on the spot as fully as I have here written them down. The notebook first attracted my attention, and I put it in my pocket with a view to studying it later on. The rest of the articles I conveyed to my burrow for safety's sake, and there, being a methodical man, I inventoried them. I then returned to the corpse and ordered Gunga Dass to help me carry it out to the river front.

While we were engaged in this the exploded shell of an old brown cartridge dropped out of one of the pockets and rolled at my feet. Gunga Dass had not seen it; and I fell to thinking that a man does not carry exploded cartridge cases, especially "browns," which will not bear loading twice, about with him when shooting. In other words, that cartridge case had been fired inside, the crater, consequently there must be a gun somewhere. I was on the verge of asking Gunga Dass, but checked myself, knowing that he would lie.

We laid the body down on the edge of the quicksand by the tussocks. It was my intention to push it out and let it be swallowed up—the only mode of burial that I could think of. I ordered Gunga Dass to go away.

Then I gingerly put the corpse out on the quicksand. In doing so—it was lying face downward—I tore the frail and rotten khaki shooting coat open,

disclosing a hideous cavity in the back. I have already told you that the dry sand had, as it were, mummified the body. A moment's glance showed the gaping hole had been caused by a gun-shot wound; the gun must have been fired with the muzzle almost touching the back. The shooting coat, being intact, had been drawn over the body after death, which must have been instantaneous.

The secret of the poor wretch's death was plain to me in a flash. Some one in the crater, presumably Gunga Dass, must have shot him with his own gun—the gun that fitted the brown cartridge. He had never attempted escape in the face of the rifle fire from the boat.

I pushed the corpse out hastily and saw it sink from sight liberally in a few seconds. I shuddered as I watched. In a dazed, half-conscious way I turned to peruse the note-book. A stained and discoloured slip of paper had been inserted between the binding and the back, and dropped out as I opened the pages. This is what it contained:

"Four out from crow clump; three left; nine out; two right; three back; two left; fourteen out; two left; seven out; one left; nine back; two right; six back; four right; seven back."

The paper had been burned and charred at the edges. What it meant I could not understand. I sat down on the dried bents, turning it over and over between my fingers until I was aware of Gunga Dass standing immediately behind me with glowing eyes and outstretched hands.

"Have you got it?" he panted. "Will you not let me look at it also? I swear that I will return it."

"Got what? Return what?" I asked.

"That which you have in your hands. It will help us both." He stretched out his long, bird-like talons, trembling with eagerness.

"I could never find it," he continued. "He had secreted it about his person. Therefore I shot him, but nevertheless I was unable to obtain it."

Gunga Dass had quite forgotten his little fiction about the rifle bullet. I received the information perfectly calmly. Morality is blunted by consorting with the dead who are alive.

"What on earth are you raving about? What is it you want me to give you?"

"The piece of paper in the note-book. It will help us both. Oh, you fool! you fool! Can you not see what it will do for us? We shall escape!"

His voice rose almost to a scream, and he danced with excitement before me. I own I was moved at the chance of getting away.

"Don't skip! Explain yourself. Do you mean to say that this slip of paper will help us? What does it mean?"

"Read it aloud! Read it aloud! I beg and pray to you to read it aloud!"

I did so. Gunga Dass listened delightedly, and drew an irregular line in the sand with his fingers.

"See now! It was the length of the gun-barrels without the stock. I have those barrels, four gun-barrels out from the place where I caught crows. Straight out: do you follow me? Then left—Ah! how well I remember when that man worked it out night after night. Then nine out, and so on. Out is always straight before you across the quick-sand. He told me so before I killed him."

"But if you knew all this why didn't you get out before?"

"I did not know it. He told me that he was working it out a year and a half ago, and how he was working it out night after night when the boat had gone away and he could get out near the quicksand safely. Then he said that we would get away together. But I was afraid that he would leave me behind one night when he had worked it all out, and so I shot him. Besides, it is not advisable that the men who once get in here should escape. Only I, and I am a Brahmin."

The prospect of escape had brought Gunga Dass' caste back to him. He stood up, walked about and gesticulated violently.

Eventually I managed to make him talk soberly, and he told me how this Englishman had spent six months night after night in exploring, inch by inch, the passage across the quicksand; how he had declared it to be simply itself up to within about twenty yards of the river bank after turning the flank of the left horn of the horseshoe. This much he had evidently not completed when Gunga Dass shot him with his own gun.

In my frenzy of delight at the possibilities of escape, I recollect shaking hands effusively with Gunga Dass after we had decided that we were to make an attempt to get away that very night. It was weary work waiting throughout the afternoon.

About a o'clock, as far as I could judge, when the moon had just risen above the lip of the crater, Gunga Dass made a move for his burrow to bring out the gun barrels whereby to measure our path. All the other wretched inhabitants had retired to their lairs long ago. The guardian boat drifted down stream some hours before, and we were

utterly alone by the crow-clump. Gunga Dass, while carrying the gun-barrels, let slip the piece of paper which was to be our guide.

I stooped down hastily to recover it, and as I did so I was aware that the diabolical Brahmin was aiming a violent blow at the back of my head with the gun barrels. It was too late to turn round. I must have received the blow somewhere on the nape of my neck. A hundred thousand fiery stars danced before my eyes, and I fell forward senseless at the edge of the quicksand.

When I recovered consciousness the moon was dying down, and I was sensible of intolerable pain in the back of my head. Gunga Dass had disappeared, and my mouth was full of blood. I lay down again and prayed that I might die without more ado. Then the unreasoning fury which I have before mentioned laid hold upon me, and I staggered inland toward the walls of the crater.

It seemed that some one was calling to me in a whisper, "Sahib! Sahib! Sahib!" exactly as my bearer used to call me in the mornings. I fancied that I was delicious until a handful of sand fell at my feet. Then I looked up and saw a head peering down into the amphitheatre—the head of Dunnoo, my dog boy, who attended to my collies. As soon as he had attracted my attention he held up his hand and showed a rope. I motioned, staggered to and fro the while that he should throw it down.

It was a couple of leather punkah ropes, knotted together, with a loop at one end. I slipped the loop over my head and under my arms, heaved Dunnoo up something forward, was conscious that I was being dragged, face downward, up the steep sand slope, and the next instant found myself choked and half fainting on the sandhills overlooking the crater. Dunnoo, with his face ashy gray in the moonlight, implored me not to stay, but to get back to my tent at once.

It seems that he had tracked Purnic's footprints fourteen miles across the sands to the crater; had returned and told my servants, who flatly refused to meddle with any one, white or black, once fallen into the hideous Village of the Dead; whereupon Dunnoo had taken one of my ponies and a couple of punkah ropes, returned to the crater and hauled me out, as I have described.

To cut a long story short, Dunnoo is now my personal servant on a gold mohur a month—a sum which I still think far too little for the services he has rendered. Nothing on earth will induce me to go near that devilish spot again or reveal its whereabouts more clearly than I have done. Of Gunga Dass I have never found a trace, nor do I wish to. My sole motive in giving this to the public is the hope that some one may positively identify, from the details and the inventory which I have given above, the corpse of the man in the olive-green hunting suit.—*Alta*.

THE INSTITUTION OF ENGINEERS OF JAPAN.

Recent advices from Japan give us an account of proceedings in that country which will be of interest to engineers and others who study the developments of technical education and its applications to engineering. It is now seventeen years since the Imperial College of Engineering, Tokyo, was instituted, and a little over ten since the first graduates completed their course. At the first graduation ceremony, Mr. Henry Dyer, who was the first Principal and the organizer of the College, in his address to the students, suggested the foundation of an Institution of Engineers somewhat on the lines of those in this country, and he subsequently drew out and printed a set of regulations to guide those who were likely to be the first members of the Institution. The matter was taken up with great energy and spirit, and the new Institution was organized and managed without further foreign assistance. For some years the members were entirely graduates of the Imperial College of Engineering, but when the Public Works Department was abolished, and the College was incorporated with the University, the Institution was placed on a wider basis, and members were admitted who had studied in other colleges at home and abroad, or who were otherwise qualified, and the Institution of Engineers is now one of the largest and most prosperous in Japan, having one thousand members in the departments of civil, mechanical, electrical, mining, and chemical engineering, and in those of architecture, metallurgy, and naval architecture. At the beginning of May there were held a series of meetings of various kinds to celebrate the tenth year of the existence of the Institution, and the further fact that it had now 1,000 members. The extraordinary session of the Society lasted six days, and was evidently planned

in imitation of the meetings of the British Association and similar Institutions, and was carried on with as much *elaboration*. The programme included banquets, lectures, reading of papers, excursions to works, and garden parties and picnics. A very artistic medal had been struck for the occasion, and was worn by all the members, while pocket maps and programmes, together with historical and descriptive accounts of the works to be visited, were distributed, and served to make the business of the gathering clear.

The President of the Society is Viscount Yamato, formerly Minister of Public Works, and whose sagacity was due the founding of the College; its Vice-President, Mr. Watanabe Hachimoto, President of the Imperial University; its Chairmen, Mr. Shida and Mr. Nakamura, both graduates of the Imperial College of Engineering; its secretaries, Mr. Shimadzu and Mr. Matsui. Among the guests on the first day were several Ministers of State, past and present, the Directors and Professors of the various colleges, the President of the Chemical Society, and the editors of most of the leading newspapers. The proceedings were opened in the afternoon of the 3rd of May in the fine hall of the buildings which were erected for the Imperial College of Engineering, at Toranomon, and which were appropriately decorated for the occasion. On the right of the President sat some distinguished guests and honorary members; on the left the officers of the Institution. President Yamato having in a few words opened the proceedings, the history of engineering education and enterprise in Japan, and the nature of the occasion of the extraordinary meeting of the Institution, was given by two of the leading members, Messrs. Tatsuno and Furukichi. In the course of his remarks, the latter announced that His Majesty the Emperor, having heard of the doings of the Institution, had generously expressed his approbation and presented \$1,000 to its permanent funds. Thereafter various congratulatory addresses were delivered, and thus terminated the first part of the proceedings. The evening was taken up with a banquet in a large hall in Shiba Park, which was attended by a large number of guests and of the members who were then in Tokyo. The menu card was a beautiful work of art, being bordered with allegorical figures of architecture, civil engineering, mining, chemistry, naval architecture, mechanical and electrical engineering, in which the old Japanese household deities had been made to do service. It had been designed and prepared by some members of the Society, and showed that engineering had not stamped out art. The toast of the evening was given by H.E. Count Yamagata, in which he commended the work of the Institution. Of special interest was the speech of the Vice-President of the Institution in honour of Mr. Henry Dyer, the organizer and first Principal of the Engineering College, and of H.E. Otori Katsuke, now Minister at Peking, who was for a long time the Director of the same Institution. Dr. Dyer, Mr. Dyer's successor as Principal of the College, was asked to write to Mr. Dyer and convey to him the sentiments of regard and esteem in which he was held.

The 4th and 5th of May were partly occupied with popular lectures on engineering subjects, and with original papers in different departments. As is usual, however, on such occasions, the out-of-door attractions proved the stronger. Excursions to engineering works in and about Tokyo filled the 6th and the 7th of the month, and occupied the time of the members and associates most pleasantly and usefully. The works are now so numerous, and so many invitations had been received, that several had to be declined from the impossibility of finding time to make so many visits. A full description of these excursions would occupy too much of our space, but the following series may be mentioned:—(1) The Shimabashi railway works, Tokyo Bay dredging operations, Ishikawajima docks. (2) Furukawa copper refinery at Fukugawa, where the Ashiwa copper is prepared for the market; fertilizer works, also at Fukugawa, where all sorts of artificial manures are manufactured, which are said to be proving very valuable to Japanese farmers; the Furukawa coke ovens; and the Kanegafuchi cotton spinning mills, which are newly erected, and are of enormous dimensions. (3) Paper mills at Oji, where newspapers, post-cards, and many other kinds of paper are made; the sulphuric acid, bleaching powder, and soda works; the Koishikawa Arsenal; and the Electric Light Company's works at Kojimachi. (4) The Dai Nippon medicine factory near Shimabashi; the steel works of the Naval Department; the Portland cement works at Fushigawa; the Senjū woollen mills. In the evening of the 7th there was a *conversazione* in the works of the Electric Light Company, to which were invited the ladies of the families of members. Many in-

interesting experiments were shown, and the phonograph and other instruments exhibited.

The whole proceedings were carried out with remarkable order, and reflect great credit on the special committees and the secretaries. They are interesting as a striking example of what can be done in a short time by a well-devised system of education, in practically revolutionising the industry of a country. The Institution of Engineers in Japan has already done good work in the ten years of its existence, and it is destined to have most important effects on the future of the country. We wish it all success.—*Industries.*

LATEST TELEGRAMS.

[REUTER "SPECIAL" TO "JAPAN MAIL."]

London, August 8th.

Speaking at the Mansion House, the Marquis of Salisbury said that the political situation was everywhere pacific so far as England was concerned, and that the African Agreement had removed the only cause of quarrel that had recently existed. Referring to Egypt, his Lordship said that the withdrawal of the British forces from that country would greatly depend upon the action of other nations, who might be able to advance or retard the departure of the English troops.

London, August 11th.

General the Hon. Sir Leicester Smyth, K.C.B., K.C.M.G., has been appointed Governor of Gibraltar. The Duke of Connaught takes command at Portsmouth vice Smyth.

Governor Barkly, of Heligoland, has delivered the island over to the Germans. There was but a very slight ceremony.

A great strike has commenced in South Wales.

London, August 13th.

The Czarevitch will visit Stamboul and Palestine during September next, thence travelling through Egypt and India, will call at some of the Treaty Ports of China, and then come on to Japan, returning to Russia in the spring by way of Siberia.

London, August 14th.

Cardinal Newman is dead.

The House of Commons, after protracted sittings, has finished Supply, and Parliament will be prorogued next Tuesday.

[NEWMAN, His Eminence John Henry, Cardinal Deacon of the Holy Roman Church, elder brother of Francis William Newman, was born in London in 1801, educated at Ealing School, whence he proceeded to Trinity College, Oxford, where he graduated B.A. in 1820, taking classical honours, and was elected Fellow of Oriel College. In 1825 he became Vice-Principal of St Alban's Hall, then under the late Dr. (afterwards Archbishop) Whately, and in 1826 Tutor of his College, which post he held until about 1831. In 1828 he accepted the incumbency of St. Mary's, Oxford, with the outlying chaplaincy of Littlemore; and in 1832 he quitted Oxford, and established at Littlemore an ascetic community on a medieval model, over which he presided for three years. He held St. Mary's from 1838 till 1843, where, by his preaching, he gained such influence over the younger members of the university, that he became, in conjunction with Dr. Pusey, the recognised leader of the High Church Party. He took a leading part in the publication of the "Tracts for the Times," to which he contributed the small tract, No. 90, which was severely censured by the university authorities as practically annulling the broad lines of demarcation between the English and Roman Catholic Churches. In Oct. 1842, he succeeded from the Established Church, was received into the Roman communion, and after being ordained priest, became founder of the English Oratory and head of its Birmingham House. In 1844 he was appointed Rector of the newly-founded Catholic University in Dublin, but resigned that post in 1848, and established a school for the sons of Roman Catholic gentry at Edgbaston, near Birmingham. Dr. Newman was elected an honorary Fellow of Trinity College, Oxford, Dec. 28, 1857. It has been frequently asserted that Dr. Newman did not believe in the doctrine of the infallibility of the Roman Pontiff when speaking *ex cathedra* to the University Church on questions of faith or morals. In reply to a criticism to the effect made by a Mr. Capes, Dr. Newman wrote as follows (Sept. 13, 1872): "He assumes that I did not hold or profess the doctrine of the Pope's infallibility till the time of the Vatican Council, where, as I have committed myself to in print again and again from 1845 to 1867. And, on the other hand, as it so happens—though I hold it, as I ever have done—I have had no occasion to profess it, whether in print or otherwise, since that date. Any one who knows my writings will recollect that in so saying I state a simple fact." Dr. Newman was created and proclaimed a Cardinal Deacon by Pope Leo XIII. in 1879. His Eminence has written "Lectures on Romanism and Popular Protestantism" 1837; "Letter to J. Bailett on certain Points of Faith," 1838; "Parochial Sermons," 8 vols., 1838-41; "Lectures on Justification," 1839; "Church of the Fathers," 1840; "Essay on the Miracles of the Middle Ages," 1843; "Annotated Translation of St. Athanasius," 1844-44; "Sermons on the Subject of the Day," 1844; "Sermons on Theory of Religious Relief," 1844; "Development of Christian Doctrine," 1849; "Discourses addressed to Mixed Congregations," 1849; "Life of Apollonius Tyaneus," 1849; "Loss and Gain, or the Story of a Convert," 1849; "Lectures on the History of the Turks as to Christianity," 1854; "Arians of the Fourth Century," 1853; "Callista, a Sketch of the Third Century," "Discourse on the Nature of Universities," and essays on the "Office and Work of Universities," in 1854-55; "Sermons preached on Various

Occasions," 1857; "Lectures and Essays on University Subjects," 1859; and "Letter to Dr. Pusey on his recent 'Evening Lectures,'" 1863. He published an autobiographical record of his life, entitled "Autobiographical Sketch," in 1864; a "Collection of Poems," in 1868; an "Essay on Assent," in 1870; and "A Letter addressed to His Grace the Duke of Norfolk, on occasion of Mr. Gladstone's recent Exposition," 1875.—*Men of the Times.*

TIME TABLES AND STEAMERS.

TOKYO-YOKOHAMA RAILWAY.

Per German steamer *General Werder*, from Hongkong:—Mr. F. M. Kibero (Spanish Consul), Mr. M. Cordero (Chancellor Consul), Mrs. T. Diebes, Messrs. O. Mueller, F. Hesp, F. E. T. Haimah, Eschabloy, Lo Kin Yuen, Wong See, and Calimoodin in cabin; 37 Chinese in steerage.

Per British steamer *Batavia*, from Vancouver, B.C.:—Bishop Wilson, Messrs. M. Woolf, G. E. Gauntlett, G. H. Scindmore, Captain Harvey, R. N. M. G. Walker, Mr. E. A. Brocklehurst, and Dr. Anderson in cabin; 4 Japanese in steerage.

For Kobe: Miss McGregor in cabin. For Shanghai: Mr. A. M. Bisset in cabin. For Hongkong: Mrs. A. Holt, Mrs. Dong Choi, Miss F. Meade, Mr. and Mrs. S. L. Gracey, Miss M. Gracey, Messrs. S. F. Gracey, H. M. Gracey, D. F. Gracey, Rev. Dr. Dike, Mr. D. C. Worcester, and Mr. F. S. Bourns in cabin; 66 Chinese in steerage.

DEPARTED.

Per British steamer *Ancona*, for Hongkong via ports:—Lieutenant Renny, Lieutenant Campbell, Mr. and Mrs. Kutzochmar, 4 children and servant, Mr. and Mrs. C. S. Taylor, Messrs. C. Wagner, J. Rickett, H. K. Bather, T. W. Hammond, and W. S. Martin in cabin; 2 Japanese in steerage.

Per British steamer *Oceanic*, for San Francisco:—Mr. C. Vivian Ladds, Mr. E. Fontaine, Mr. and Mrs. C. Tooley, Mr. J. W. Blockblinn, Mrs. Emerson, Mrs. Field, Messrs. C. H. C. Muller, Hee Choi Chune, A. E. Dowler, Mrs. Read and child, Messrs. Liebard, J. S. Fearon, E. Halton, A. Kleinwort, P. Brunat, D. S. Fuller, A. Hoge, F. H. Mowatt, A. B. Walker, M. Bethum, F. Lutscher, R. Duval, M. Raspe, E. Wismer, S. P. Simond, Commander Fautroix, Commander Boissier, Messrs. A. S. Pagden, L. Davidson, R. W. Deas, O. C. Flemmick, Mr. and Mrs. W. L. Davis, Misses Davis (3), Mr. Davis, Jun., Mr. A. Kimpen, Rev. K. Ibuka, Mr. H. C. Sutton, Sir W. Levinge, Dr. A. E. Broomall, Messrs. J. R. Foster, R. L. Foster, Yoshida, Hoo Sui Ting, W. H. Caldwell, C. G. Moon, Wong Wing Yet, Mrs. H. S. Jefferys and child, Mr. Woanyou, Miss Fuji Tsukamoto, Messrs. Jules Blom, E. Kildayle, and M. Sato in cabin.

Per Japanese steamer *Yokohama Maru*, for Shanghai and ports:—Mr. and Mrs. Urim, Mrs. Nakamura, Lieutenant W. M. Constans, Messrs. C. Braess, Ludlow, F. Aglen, H. J. Marshall, Faichney, Nagano, Weldron, and Rev. G. H. Jones in cabin; Mrs. Nozaki and child, Miss Nozaki, and Mr. Tamase in second class, and 72 passengers in steerage.

CARGOES.

Per British steamer *Ancona*, for Hongkong via ports:—Silk for France 72 bales.

REPORTS.

The Japanese steamer *Yokohama Maru*, Captain Swain, reports:—Left Shanghai the 2nd August at 11.45 a.m.; had fresh to strong N.E. winds. Arrived at Nagasaki the 4th at 7 a.m. and left at 6.15 p.m. Arrived at Shimomoseki the 5th at 7.45 a.m. and left at 8.20 a.m.; had fine weather throughout the passage. Arrived at Kobe the 6th at 6.15 a.m. and left the 7th at noon; had light S.W. winds with pleasant weather throughout the passage. Arrived at Yokohama the 8th August at 7.15 p.m.

The German steamer *Lydia*, Captain Forch, reports:—Left Hongkong the 5th August at 7 p.m. During the passage fine weather to Ooshima; thence heavy sea from east and squalls with rain from N.W. to N.E. About 27 miles S.W. by W. from Omai-saki took of 11 men from a Japanese coaster which was in sinking condition; the wreck lies in 34° 21' N. and 137° 47' E.; 3 to 4 miles from the wreck quantities of wood in the water. Arrived at Yokohama the 12th August at 9 a.m.

The Japanese steamer *Wakanoura Maru*, Captain Hussey, reports:—Left Hakodate the 10th August at 8 a.m.; had light southerly winds and fine weather; passed Shiriya-saki at 00.30 p.m. with light south wind and fog continuing throughout the night. Arrived at Oginohama the 11th at 9.40 a.m. and left at 3.30 p.m.; had moderate south-east wind and cloudy weather increasing through the night to a strong S.E. gale and high sea; passed Imbuoye the 12th at 8.10 a.m. with a strong easterly gale and high sea; passed Noshima at 2.30 p.m. Arrived at Yokohama at 7 p.m.

The Japanese steamer *Yamashiro Maru*, Captain Young, reports:—Left Hakodate the 11th August at 8 a.m.; had easterly breeze and dull misty weather to 4 p.m.; thence dense fog to midnight with southerly breeze; the 12th at 7 a.m. off Kinkasan gentle southerly breeze and fine clear weather; after rounding Kinkasan came into a heavy southerly sea which we kept to Noshima; from Noshima the 12th had easterly to E.N.E. moderate to fresh breeze and fine clear weather with occasional squalls of rain; passed Imbuoye light at 11.40 p.m. same weather and heavy sea; wind hauled N.N.E., moderate wind sea to port. Arrived at Yokohama at 10 a.m.

The German steamer *General Werder*, Captain Eichel, reports:—Left Hongkong the 8th August at 4.15 p.m.; had through the Formosa Channel calm and light southerly winds with fine weather; thence to port fresh breezes from S.S.W. to W.S.W. with rough sea. Arrived at Yokohama the 14th August at 0.50 a.m.

The British steamer *Batavia*, Captain Williams, reports:—Left Vancouver, B.C., the 28th July at noon; experienced moderate westerly winds and fine weather throughout the voyage; sighted Imbuoye light the 14th August at 2 a.m. Arrived at Yokohama at 2 p.m.

LATEST COMMERCIAL.

IMPORTS.

Practically nothing doing in Yarns, and prices are unchanged but quite nominal. A few bales only have been sold during the week, and values droop continually. Shittings slumber peacefully, and no business is done. Dealers look for some trade by the end of the month, but talk of low prices, especially for those kinds of which the present stock consists. In Velvets and Italian Cloth there are nothing beyond retail transactions.

COTTON PIECE GOODS.

Grey Shittings—8 1/2 yds. 39 inches	\$1.35	to 1.90
Grey Shittings—9 1/2 yds. 45 inches	1.65	to 2.54

METALS.

Stagnation seems to be the order of the day here as well as in other departments of the import market. We leave quotations unchanged, although doubtless holders would have to take less if they want to move at all. Buyers, however, are very shy, and seem disposed to stay out of the market altogether.

Flat Bars, 1 inch	\$2.70 to 2.80
Flat Bars, 1 1/2 inch	2.80 to 2.90
Round and square up to 1 1/2 inch	2.70 to 2.90
Nailrod, assorted	Nom.
Nailrod, small size	Nom.
Iron Plates, assorted	3.00 to 3.15
Sheet Iron	3.30 to 3.50
Galvanized Iron sheets	6.00 to 6.50
Wire Nails, assorted	4.00 to 4.50
Pin Plates, per box	4.80 to 5.10
Pig Iron, No. 3	1.30 to 1.35

KEROSENE.

Market is very quiet, and all quotations more or less nominal. Dealers are smart enough to ask a fresh reduction in price with every advance in Sterling exchange. No fresh arrivals, but in spite of fair deliveries the stock is more than ample for prospective requirements.

Chester	Nom. \$1.75 to 1.77 1/2
Comet	Nom. 1.70 to 1.72 1/2
Devoe	Nom. 1.67 1/2 to 1.70
Russian	Nom. 1.65 to 1.67 1/2

SUGAR.

With high prices ruling for Takao, only 3,400 piculs, at \$3.65 per picul, have been sold. White Refined sorts have moved off to a small extent, namely, 1,500 piculs at \$7.46 1/2 per picul, 150 piculs at \$7.20, and 332 piculs at \$6.20.

White Refined	\$5.80 to 8.40
Mailla	3.80 to 4.60
Taiwanfoo	— to —
Pentaina	3.00 to 3.40
Namiida	2.90 to 3.20
Cake	3.70 to 4.10
Brown Takan	4.55 to 4.60

EXPORTS.

RAW SILK.

Our last report was dated the 8th instant; since then settlements are entered as 361 piculs divided thus:—*Filatures* 149, *Re-reels* 146, and *Kakeda* 66. In addition to these figures Japanese have shipped 82 bales, making a total business for export equal to 445 piculs for the week.

The buying has been somewhat spasmodic; for two or three days nothing would be done, and then there would be quite a brisk trade for the next two or three days, resulting in purchases as named above. As before, the demand seems to be almost entirely for the United States. The sharp rise in Exchange does not apparently deter some very determined buyers, although the majority of shippers are content to wait a little longer.

We can make but little change in our quotations, the only thing that will help us is a quiet market and absence of transactions for some days which would bring holders down to their bearings. Or, on the other hand, some sensible reduction in the rates of sterling exchange would undoubtedly assist matters, but of this at the moment there appears to be no sign.

Supplies come in freely, the stock list now being close upon 7,000 piculs; the quality of present Summer reeling is superb, and with some disposition on holders part to meet buyers there would undoubtedly be considerable business; but while holders are so exceedingly stubborn there is but a very poor chance for any large transactions.

News from consuming Markets is dull and depressing. Cables are in town reporting tight

money in New York, which seems to interfere with the progress of the silk market there. In Europe manufacturers appear content to work along with Italians, and leave Japanese alone at any like present lay down cost. This being so, there seems nothing for shippers but to wait with what patience they can for some turn in the tide.

There have been two shipping opportunities since we last wrote, both on the 9th instant. The *Oceanic* took 345 bales for New York, while the *Ancona* had 72 bales for Lyons. These departures bring the present export figures to 2,030 piculs, against 3,684 last year and 3,814 on the 15th August, 1888.

Hanks.—Not a single bale has been sold to foreigners during the week and quotations are quite nominal; dealers report the home trade willing to pay these prices and that if the market does not improve they will bring down very few hanks to Yokohama this season.

Filatures.—Considerable business has been done in these, mostly in full sizes. *Kaimisha* and equal quality thereto have brought \$670; while *Tokosha* and similar quality have been done at \$660; buyers now pause, striving for some further reduction which at the moment holders will not grant. In fine sizes for Europe very little has been done; a few small lots number 2 quality Mino and Bishu bringing from \$600 to \$620 per picul according to *Re-reels*.

Re-reels.—A few parcels of well known clips have been taken for the States principally by one buyer who has paid \$630 for Ichimurasha and Kihana brands. Inferior qualities are noted at \$605 and with the present rate of Exchange these silks look dear enough.

Kakeda.—Some amount of trade has been put through on the following bases:—Kinko, \$635; Taiyo, \$627 1/2; Hana-musume, \$607 1/2; Red Lion, \$607 1/2; Tiger, \$590; Black Lion, \$587 1/2.

Oshu.—In Oshu sorts nothing whatever has been done.

Available supplies to date	9,000	8,500	9,800

WASTE SILK.

Settlements in this branch reach 260 piculs for the week, all *Noshi*.

It will be seen from the above that our market has at last opened; still the amount of business is not large, buyers are by no means eager, and sellers hesitate to accept the prices which shippers are able to offer them; meanwhile, the stock increases and is now fully 8,300 piculs. Exchange is high, causing present purchases to lay down at an almost prohibitive cost; and it looks as though there could not possibly be a large or healthy trade unless quotations recede.

There has been no export during the week; and the figures therefore remain at 727 piculs to date, against 383 last year, and 1,148 on the 15th August, 1888.

Pierced Cocoons.—These come in daily, but so far no business has been done; cables forwarded

to consuming markets fail to bring in orders at present quotations.

Noshi.—In this department all the business of the week has been done; it consists principally of *Yoshu* (grading good medium and under) which has been settled at from \$72 to \$78 per picul first cost; beyond this there have been small purchases of *Filature* at \$147 1/2; *Oshu* at \$135; and *Kuwagoya* at \$110.

Kibiso.—No move in this as yet; holders require from \$110 to \$115 for good to best *Shinshu Filature*, but with present high rate of Exchange buyers hold off. The quotations in Dollars are about the same as this time last year; but news from consumers does not warrant buyers in paying these figures while Exchange stands at 3/9 against 3/2 a year ago.

TEA.

Tea has been taken to the extent of 5,095 piculs for the week, and Common to Medium continue to be in most request, the market being firm with no alteration in prices. Total receipts to date are already 5,000 piculs more than the whole season 1889-90. Fourth pickings, consisting entirely of low grade leaf, are now daily arriving, and probably we shall have a fifth picking before the season is over. The Suez Canal steamers are taking Teas for New York at the remarkably low rate of 25/- per ton of 40 cubic feet. The American ship *Eclipse* is shortly due from Kobe to fill here for Tacoma.

CONTRACTORS TO THE ADMIRALTY, LEADING STEAMSHIP COMPANIES, AND YACHT OWNERS.

STEAM LAUNCHES & YACHTS,

Fitted with KINGDON'S PATENT MACHINERY (of which we are sole makers) are far superior to any others. The chief advantages are:-

1. Wonderful Economy of Fuel.
2. First-class Workmanship.
3. Moderate Prices.
4. Greatest obtainable power for weight and space occupied.
5. Quickness in raising steam.
6. High rates of speed guaranteed.
7. Absence of noise and vibration.

We build Steam Launches of every description, from the smallest also suitable for carrying on yachts of 10 tons and upwards. We also build small light Draft Paddle Bontas, Tugs, Stern Wheel Paddle Steamers, and Boats in Frames, &c., &c. We supply sets of Machinery separately. Illustrated Catalogue in English, French or Spanish. Send for Copy to

SIMPSON, STRICKLAND & CO.

WORKS:

DARTMOUTH, SOUTH DEVON (ENGLAND),

LONDON OFFICE:

181, QUEEN VICTORIA STREET, E.C.

MACHINERY.—Mr. ARTHUR WADHAM, proprietor of *The Machinery Market and Exporter* (illustrated)—the greatest machinery business journal published—(subscription 12s. 6d. per annum post free); London Agent of Messrs. Simpson, Strickland & Co., steam-launch builders, is also a large exporter of Machinery and Engineering Materials. Mr. Wadham is open to act as sole Buying Agent in England for one or two good firms in Japan desiring to deal with a reliable house. Mr. Wadham's intimate knowledge of the English Machinery and Engineering Trades enables him to save large sums to foreign customers placing their orders in his hands. Firms dealing with Mr. Wadham may rely upon being served in a prompt and straightforward manner. Address:—Mr. Arthur Wadham, Engineering Offices:—181, Queen Victoria St., London. Registered address for telegrams:—"Wadham, London." June 28, 1890.

THE GREATEST WONDER OF MODERN TIMES. HOLLOWAY'S PILLS.

PERSONS suffering from weak or debilitated constitutions will discover that by the use of this wonderful medicine there is "Health for all." The blood is the fountain of life, and its purity can be maintained by the use of these Pills.

Sir SAMUEL BAKER, in his work entitled "The Nile Tributaries in Abyssinia," says:—"I ordered the druggist Mahomet to inform the Fakir that I was a doctor, and I had the best medicines at the service of the sick, with advice gratis. In a short time I had many applicants, to whom I served out a quantity of Holloway's Pills. These are most useful to an explorer, as, possessing unmistakable purgative properties, they create an undoubted effect upon the patient, which satisfies them of their value."

SIMPLE, SAFE, AND CERTAIN! HOLLOWAY'S OINTMENT

Is a certain remedy for bad legs, bad breasts, and ulcerations of all kinds. It acts miraculously in healing ulcerations, curing skin diseases, and in arresting and subduing all inflammations. Mr. L. T. COOPER, in his account of his extraordinary travels in China, published in 1879, says:—"I had with me a quantity of Holloway's Ointment. I gave some to the people, and nothing could exceed their gratitude; and, in consequence, milk, fowls, butter, and horse feed poured in upon us, until at last a teaspoonful of Ointment was worth a fowl and any quantity of peas, and the demand became so great that I was obliged to lock up the small remaining stock."

Sold by all Chemists and Medicine Vendors the throughout World. May 1st, 1889.

KEATING'S INSECT POWDER.

BUGS, PLEAS, MOTHS, BEETLES, and all other insects, are destroyed by KEATING'S INSECT POWDER, which is quite harmless to Domestic Animals. In exterminating beetles the success of this Powder is extraordinary, and no one need be troubled by those pests. It is perfectly clean in application. Ask for and take no other than "KEATING'S POWDER," as imitations are numerous, and fail in giving satisfaction. Sold by all Chemists, in Tins and Bottles. May, 3, 1888.

NOW READY,

WITH COLOURED PLAN,
A FULL REPORT ON THE ERUPTION OF BANDAI-SAN, being a reprint from the "JAPAN MAIL" of copious translations from Tokyo Journals, a Description by "Our Reporter," and an "Editorial," written after a visit to the locality. Price 50 Cents.

To be obtained at the *Japan Mail Office*, or to KELLY & WALSH, Limited.

YARROW'S SMALL STEAMERS AND STEAM LAUNCHES.

SCREW STEAMERS WITH SPEEDS RANGING UP TO 30 MILES AN HOUR.

NOTICE TO CORRESPONDENTS.

No notice will be taken of anonymous correspondence. Whatever is intended for insertion in the "JAPAN WEEKLY MAIL" must be authenticated by the name and address of the writer, not for publication, but as a guarantee of good faith. It is particularly requested that all letters on business be addressed to the MANAGER, and cheques be made payable to same; and that literary contributions be addressed to the EDITOR.

YOKOHAMA: SATURDAY, AUGUST 23, 1890.

DEATHS

At Zurich, his native place, in the 66th year of his age, H. C. MOORE, Esq., formerly of Japan.
On the 22nd August, at his residence, No. 13, Bluff, Yokohama, GEORGE WAUCHOPE, in his 50th year.

SUMMARY OF NEWS.

THE father of Count Sô expired on the 13th instant.

H.I.H. PRINCESS KITASHIRAKAWA left the capital on the 18th instant for Nikko.

MR. WATANABE, Japanese Minister to Austria, will leave Japan on the 14th September next for his post.

VISCOUNT INOUE, President of the Railway Bureau, and his family, left Tokyo on the 19th instant for Koza.

COMMANDER MOCHIHARA, naval attaché of the Japanese Legation at London, returned to Japan on the 17th instant.

MR. KAWAKITA, Consul at San Francisco, was ordered by the Foreign Department on the 18th instant to return to Japan.

DURING the period from the 5th May to the 24th July last the number of persons attacked by influenza in Osaka was 4,025.

RAILWAY communication between Okawara and Iwanuma, which had been suspended in consequence of the damage to the line, was re-opened on the 19th instant.

THE Regulations relating to Costs in Civil Cases were promulgated on the 15th instant over the signatures of Counts Yamagata and Yama-

da, by Law No. 64, which will come into force on and after the 1st January, 1891. The Regulations consist of sixteen articles.

It is stated that the Senate will be abolished next month, when about forty Senators and secretaries will be appointed officials of the Bureau for Affairs of the Imperial Diet.

RAILWAY communication between Kuwaori and Shiraiishi, which had been suspended in consequence of the damage to the line, was re-opened on the 17th instant.

RAILWAY communication between Kuroiso and Shirakawa, which had been stopped for some time in consequence of the damage to the line by flooding, was re-opened on the 15th instant.

AN ordinary meeting of the Cabinet was held on the 19th instant, and was attended by Counts Yamagata, Matsukata, and Oki, Viscount Yoshikawa, and Mr. Mutsu, the proceedings closing at 3 p.m.

FIRE broke out on the night of the 17th inst., in the office of the *Tokyo Asahi Shimbun* at Takiyamacho, Kyobashi, the place being partially destroyed before the flames were extinguished.

THE usual meeting of the Cabinet was held on the 15th instant, at which Counts Yamagata, Yamada, Saigo, Matsukata, and Goto, Viscount Aoki, and Messrs. Mutsu and Yoshikawa were present, the proceedings lasting till a late hour.

AT a meeting of members of the Kodo Club, Yokohama, held on the 18th instant, it was decided that the club should be dissolved. On the same day a motion of dissolution was passed at a meeting of members of the Kanagawa Club, Yokohama.

IN the Exhibition, articles valued at yen 5,875.102 were sold during the week ended the 28th ult., showing an increase of yen 3,226.082 as compared with the previous week and making a total of yen 113,229.121 since the opening of the Exhibition.

TWO women were killed by lightning on the 11th instant, at Kinekimura, Kamikado-gun, Shimane Prefecture. On the same day three houses were entirely destroyed and two men were killed by lightning at Minomura, Ana-gun, Hiroshima Prefecture.

AT a meeting of members of the Central Sanitary Association, held on the 19th instant at the Home Department, it was decided that physicians who neglect to report to the Authorities persons attacked by cholera should be suspended from practice.

THE town office at Akechimachi, Ena-gun, Gifu Prefecture, was destroyed by lightning on the afternoon of the 11th instant, one man being killed. On the same day one man was killed and two women injured by lightning at Imaichicho, Kamikado-gun, Shimane Prefecture.

A MAN named Sakamoto Senjiro, a clerk of the Finance Section in the Imperial Body Guards, was convicted in the Military Court on the 19th instant of having committed a breach of trust and stolen the sum of yen 5,000. He was sentenced to eleven years' penal servitude.

ACCORDING to a report of the Fukushima Prefectural Government, four hundred and thirty-three houses floated away, two hundred and seventy were destroyed *in situ*, and five thou-

sand nine hundred and fifty-one were inundated. Thirty-six persons were drowned by the floods which occurred in Fukushima Prefecture on the 7th instant.

THE Kyoto Chamber of Commerce presented a memorial to the Agricultural and Commercial Department on the 14th instant, asking that the Regulations as to Chambers of Commerce which have been rejected by the Senate should be promulgated, as they are of pressing importance.

AN outbreak of fire took place on the night of the 9th instant in a house at Higawa-mura, Nishitama-gun, Tokyo, and before the flames could be subdued twelve houses were destroyed. Early on the morning of the 9th inst., nine dwellings were also entirely destroyed by fire at Amasecho, Mishima-gun, Niigata Prefecture.

THE exports from Japan during the month of July last amounted to yen 5,258,875.370 in value, and the imports to yen 8,857,832.720, imports exceeding exports by yen 3,598,957.350. Bullion amounting to yen 1,329,522.190 was exported, and yen 29,494.040 imported during the same period. The receipts of various Custom Houses during the month were yen 429,573.261.

THE ordinary half-yearly meeting of shareholders of the Bank of Japan was held a few days ago. The net profits for the past half of the present year were yen 1,633,339.451; of which yen 480,000, were set apart for the reserve fund, yen 80,000 awarded to officers, yen 50,000 to expenses of the new buildings, and yen 750,000 were appropriated to dividend, at the rate of 15 per cent. per annum, the remaining yen 273,339.451 being carried forward to the next account.

FIRE broke out on the afternoon of the 7th instant in a house at Owanimura, Minamitsuguru-gun, Aomori Prefecture, destroying fifteen houses before the flames could be extinguished. Early on the morning of the 10th instant, the Nakanogo Elementary School, at Nakanogo, Kimisawa-gun, Shizuoka Prefecture, was destroyed by fire. The village office at Hikawa-mura, Nishitama-gun, Kanagawa Prefecture, was burned to the ground on the 9th instant.

THE Import and Export trade appears to be considerably affected by the constant and rapid rise in sterling exchange, which has upset all calculations made a month ago. Buyers of Manchester goods and Metals are in no mood for business, and operations are almost suspended, though of course imports are nominally lower in view of the price of silver. A few hundred bales of Yarn have been taken, mostly English spinnings, and about 3,500 pieces of Shirtings have sold, and this includes nearly all the business in this line. Scarcely anything is done in Metals, and the small sales of Wire Nails reported have been at very low rates. Kerosene is dull, and prices are easier, though without quotable change. Next to nothing done in Sugar. Exchange is responsible for the stagnation in the Silk market, the small wants of manufacturers and the price of silver making a large business at the figures demanded here an impossibility, the settlements being less than half and the stock on hand about double that at same date last year. There has been a dribbling daily trade in Waste Silk, but the total is insignificant. Tea has been steadily purchased, but in less quantity, though at late rates. Exchange is still on the ascending scale, and closes firm with every indication of a further rise.

EDITORIAL NOTES.

COUNT ITAGAKI, VISCOUNT TANI, AND MR. KŌNO. THE *Koku-Hon* of the 5th instant publishes three open letters addressed to Count Itagaki, Viscount Tani, and Mr. Kōno, respectively. In the letter to Count Itagaki, our contemporary ventures to observe that, despite the service which he rendered to the State at the time of the Restoration and the services which he has since given in the cause of freedom, the public is inclined to doubt his fitness for the leadership of a great political party. For his sincerity and disinterested zeal everybody admires the Count, but men are not so ready to credit him with the higher intellectual qualifications of statesmen. The *Koku-Hon* thinks, however, that the very deficiency of Count Itagaki in intellectual capacity has been a means of adding to his fame. His name has long been associated in the public mind with that of Count Goto. The latter's success was marvellous when he organized the *Daido Danketsu*; but what is his position now? People only laugh at him, says our contemporary, for his inconsistency. On the other hand, Count Itagaki seems to be on the eve of harvesting the produce of the seeds so assiduously sown by him through so many years. From this circumstance, it will be seen that Count Itagaki, though he is no match for Count Goto in intellectual endowments, has attained his present enviable position in virtue of his sincerity and zeal. The *Koku-Hon* then goes on to remark that, though Count Itagaki may desire to obtain a seat in the Cabinet, the time has not yet come for him to do so. At present a field of activity offers itself, apart from the Government, in which he may render incalculable service to the State. There are, on the one hand, some extreme radicals rash enough in their zeal for imaginary principles to sacrifice the practical interests of the country; while, on the other, there are public functionaries equally ready to abuse the power vested in them. Count Itagaki being highly respected by the statesmen, in power as well as by those out of office, our contemporary thinks that he is in a unique position to act as a sort of interpreter between the two parties above mentioned and to check the extravagance of both. The *Koku-Hon* considers this to be the mission which the Count, among all the statesmen of the present day, is best qualified to fulfill. He would do himself an injustice, should he accept a Ministerial responsibility which, at this juncture, betrayed him into irretrievable errors.

The letter to Viscount Tani may be summarized in a few words. Our contemporary observes that he is well read in Chinese philosophy, but that the public regards him in no other light than that of a brave, upright, and disinterested soldier. Alluding to the fact that he enjoys the good opinion of noblemen, the *Koku-Hon* advises him to become a leader among the members of the House of Peers, and to make it his business to set in the right direction the political opinions of nobles; a useful rôle, but one not very likely to satisfy Viscount Tani, we imagine.

To Mr. Kōno Toguma, a Privy Councillor, the *Koku-Hon* addresses itself in an unusually out-spoken manner. After alluding in high terms to some celebrated episodes in his judicial career, when he distinguished himself by the inflexible impartiality of his judgments, our contemporary proceeds to observe that when he afterwards became Minister of Education and subsequently Minister of Agriculture and Commerce, the public found out for the first time that, with all his eloquence and his varied judicial experience, he was not fitted to assume direction in administrative affairs. Especially severe is the criticism on his conduct while he was one of the three *Kanji* of the Senate, his colleagues in that office being Mr. Mutsu, the present Minister of State for Agriculture and Commerce, and Mr. Kato, President of the Imperial University. In those times the

late Marquis Kido and Count Ito were inclined to conservative opinion. Strange as it may appear, Mr. Kato was more liberal at that period than either of these two statesmen, and he was consequently obliged to resign his position. But Messrs. Kōno and Mutsu, though men of decidedly radical opinions, endeavoured to retain office by sacrificing their political ideas. The *Koku-Hon* goes so far as to say that, in those days, Mr. Kōno was popularly regarded as a hard-hearted sharper, while Mr. Mutsu was called a flippant sharper. These two gentlemen our contemporary regards as a well assorted couple, differing only in the manner here pointed out. They have also been closely matched rivals in official life. But lately, Mr. Kōno has apparently become inactive and is growing more and more insignificant, while his rival's influence is daily increasing. Rumour has it, says the *Koku-Hon*, that the elevation of Viscounts Yoshida and Aoki to the peerage and the exclusion of Mr. Kōno from that honour excited his jealousy, because Viscounts Yoshida and Aoki performed no distinguished services either at the time of, or since, the Restoration whereas he himself was one of the most meritorious officials of the State under the new régime. He is reported to be very anxious to court the favours of the present Government so as to obtain a patent of nobility, but our contemporary hopes that this rumour of his wish may prove groundless, since it would ill become him "to wag his tail for the favour of the clan Government." Comparing him with Mr. Mutsu, the Tokyo journal frankly remarks that his intellect is good but narrow, while that of Mr. Mutsu is volatile but wide. In conclusion the *Koku-Hon* advises Mr. Kōno to part company with the Government and to enter the Diet, which seems to be a proper place for the exercise of his talent. The inference apparently suggested is that the *Koku-Hon* assigns to him the rôle of a parliamentary agitator.

JOURNALISTIC PIQUANCY.

For ingenuity of device to render its columns piquant and entertaining, perhaps the *Kokumin Shimbun* ranks second to none of the metropolitan newspapers, the *Yūji Shimpō* not excluded. By way of illustration we invite our readers' attention to the following translation from that journal, not because we endorse its observations, but merely to show its methods. Let our contemporary speak for itself:—"The following articles are reported to have been ordered lately from China and other foreign countries by distinguished personages:—a copy of John Bright's Life, by Count Goto, who is said to entertain the intention of studying it carefully in order to introduce himself to a history of political fidelity; a wild boar,* by Count Ito, who having opened his eyes to the insufficiency of mere cleverness as a means for successfully steering one's course in life, intends to ride on the stout animal's back; the boar, it should be added, has no tail worth speaking of; a book on elocution, by Count Saigō, evidently for purposes of preparation against the time when he will be called upon to exercise his elocutionary powers in support of the Government's policy; a book on the art of grafting, by Count Yamada, who desires to learn from its pages the art of grafting a bamboo scion on a crotomaria, or the flesh of a youth on the dried bones of an octogenarian—in short any new thing on any old one: a treatise on evolution, by a certain conservative gentleman of great fame, who wishes to study the principles of evolution in order to learn the mysterious process of effecting wonderful metamorphoses in a night, such as from a monkey into a human being, from an Imperialist into a Jacobin, or from stiff-necked conservatism to hare-brained radicalism."

A PRESENT FOR THE IMPERIAL UNIVERSITY.

THE Imperial University is on the eve of a most fortunate event. It is about to receive a gift which will make it the most celebrated and remarkable institution of its kind in the world.

* This animal is regarded in Japan as the symbol of a blind and headstrong soldier.

On a certain hill in the province of Bingo, there is a temple which was erected some six centuries ago. Within the enclosure of this edifice digging was undertaken recently with the object of planting some edible. At a depth of about two feet a stone coffin was unearthed. Opened in the presence of the priests and a large concourse of curious folks, it was found to contain vermillion, the conventional environment of aristocratic corpses, and in the cosy mineral reposed a skull with a face more than two feet long, and one arm. The hair of the skull, still in a good state of preservation, was of extraordinary thickness, and the point of each hair was split so as to resemble a bundle of bristles. From the forehead grew two horns. More unmistakable fragments of a devil could not be imagined, but how did they come to be buried in a temple ground and honoured with a stone coffin and vermillion packing? These questions remain unanswered. The hideous relics have, however, passed into the possession of the abbot of Heto-in, in Tsunmachi, Owari Prefecture, who intends to send them first to the Hospital in Nagoya and thence to the Imperial University.

SERVANTS' CHARACTERS.

MR. JUSTICE HAWKINS, summing up in a case of libel recently brought by a butler against a master who had given him a character that he objected to, used words which are of interest and value to all householders. "The learned Judge," says *The Times*' report, "said that this case might not be without advantage to the public, since it might serve as a useful warning. No master or mistress was bound by law to give a character to a servant, although of late a practice had sprung up of servants asking for and almost demanding them. If, however, a master did give a character, the person asking for it had a right to have a true one given, and if a true one was not given the person knowingly giving a false one was liable, by Act of Parliament, to be fined £20. No action would lie against any one honestly giving a character to a servant, although a bad one, because it was a privileged occasion, and an action would only lie when any one gave a false character, knowing it to be false, or not believing it to be true. If, however, the defendant honestly believed that what he was writing of the plaintiff was true, even although it might not be so in fact, the letter was privileged, and no action would lie against him. In this case it was for the plaintiff to affirmatively satisfy the jury that the defendant had written the letter maliciously—that is, either knowing that it was untrue or not believing that it was true, in order to deprive the defendant of the privilege under which the letter had undoubtedly been written!"

JAPANESE COMMENTS ON YOKOHAMA JOURNALISM.

AN idea exists among a section of this community that the anti-Japanese writing of certain local English newspapers attracts little attention outside the foreign Settlement and does not beg any feeling of indignation or dislike among the Japanese. The curiously ample share of patience, or indifference, or long-suffering—call it what we may—with which this convenient doctrine credits the Japanese, has often provoked astonishment, especially when people observe that its propounders attribute a wide-spread and pernicious influence upon the Japanese nation to every word written by a local English newspaper in defence of Japan's rights or in condemnation of the arbitrary treatment she sometimes receives at foreign hands. As an interesting illustration of this subject we translate a few words from a recent editorial note in the *Yokyo Shimpō*—a note written, be it observed, before the publication by our local English contemporaries, of two articles abusing and sneering at Sir Edwin Arnold because he has adopted views different from theirs in the matter of Treaty Revision:—"Recently when the Tokyo correspondent of the London *Times* wrote favourably of Treaty Revision and *The Times* published a leading article in the same sense, the *Japan Gazette* and *Japan Herald*

vehemently attacked these opinions and abused Major-General Palmer, Captain Brinkley, and the conductors of *The Times*. Subsequently Sir Edwin Arnold addressed a letter to the *Daily Telegraph* on the same subject, and we were fully prepared to find that he too would become the object of the *Gazette* and *Herald's* abuse. We were not mistaken, for the *Herald* has published a letter the writer of which asserts that it is natural for foreign men of letters to praise Japan when they come here, inasmuch as they receive kind and hospitable treatment at the hands of the Japanese, and are so carried away by the affability of the people and the beauty of the scenery, that they have no time to consider the true state of affairs, but devote themselves simply to collecting materials for attractive writing and to discussing the things that please themselves. He goes on to hint that Sir Edwin Arnold has been the object of special attention at the hands of the Japanese Government, and that as he knows nothing about Japan, his arguments on the subject of Treaty Revision are unworthy of notice. At this rate, no foreign tourist visiting Japan will hereafter be able to say a word in its favour. The *Japan Herald* has certainly furnished an exhaustive statement of Englishmen's selfishness."

* * *

This note, as we have said, shows how such writing as that of our local contemporaries reacts upon English reputation. They never reflect that the character they give to their own countrymen is petty and mean in the extreme. When an English visitor of note comes to this country and writes pleasantly or kindly about it, he is at once declared to have been either cajoled, deceived, or bribed. There is absolutely no exception. Every man who ventures to urge that Japan is entitled to more liberal international treatment, finds a shower of mud cast at him and hears the public called upon to pronounce him weak-minded, selfish, or depraved. Can we be surprised if such a miserable estimate of Englishmen by Englishmen is accepted by a Japanese journal? And yet, what a consummately insolent farce the whole thing really is! Compare the revilers with the reviled. Just think for a moment what manner of men they are who have this mud thrown at them, and what manner of men are these who throw it. This is for the Japanese to consider. They are thoroughly capable of appreciating the distinction, and when they make it they will see clearly how grossly British sentiment towards Japan is travestied by its professed representatives in such journals as those quoted by the *Tokyo Shimpō*. We cannot at the present moment recall so much as one solitary English newspaper of respectability which has ever written of Japan in an unsympathetic or ill-natured strain. There do occasionally appear stupid items betraying ignorance or thoughtlessness, but no serious article is disfigured by an unappreciative or unfriendly tone. By what class of writers, then, is British sentiment towards Japan to be gauged? By men whose abilities, erudition, and wide knowledge of public affairs have established their title to mould their country's views; or by men whose ignorance, illiteracy, ignoble conceptions, and bitter prejudice would disgrace any type of civilization. We well understand that however strong may be the foundations of Japan's friendship for England, they run great risk of being sapped by this perpetual stream of wretched reviling and misrepresentation, but our belief is that the Japanese are competent to judge between the true and the false, between the writers who parody and the writers who reflect British sentiment.

THE HOUSES OF PARLIAMENT.

It has been decided, according to the *Mainichi Shimbun*, that the new Parliament House shall be regarded as a part of the Home Office's buildings. The question of its attachment is said to have caused some controversy, one party being in favour of placing it in the hands of the Imperial Household Department, after the English precedent, and another advocating its transfer to the Treasury, as is the case

in America. The Authorities have, however, finally decided that the business of repair and so forth can be managed most conveniently by the Home Office. Some unfavourable comments have been made by foreign critics about the style of these new buildings, but it has to be remembered that the structure is of an essentially temporary character, and that the first duty imposed on the architect, who is a German gentleman of established competence, was to reduce the expenditure on account of the shell of the building to a minimum. An ordinary wooden structure gives little scope for architectural display under any circumstances, but when the designer is limited by considerations of the strictest economy, he wisely abandons all half-hearted attempts at ornamentation and contents himself with absolute plainness and simplicity. These temporary structures tell their own story, namely, that no effort has been made to render them externally attractive, since that would have been mere waste of money, and that every available cent has been saved to lay out on interior arrangements. Such a plan of procedure, though eminently practical, makes some demand on the courage of the architect adopting it, for he must know that it exposes him to the harsh comments of superficial observers who think only of the appearance of an edifice and forget its purpose or the conditions under which it was erected. Every competent critic who has inspected the interior of the new buildings pronounces the arrangements most excellent and highly creditable to the architect. We may therefore take it for granted that the German architect entrusted with the planning and superintendence of the buildings has loyally and ably carried out the intention of the Government, by avoiding all futile expenditure in the matter of externals and devoting the utmost possible care to internal fittings and arrangement.

COUNT ITAGAKI'S POLITICAL INFLUENCE.

Among prominent statesmen now out of power, says the *Nippon*, there are very few who have had much experience in the organization of political parties. Count Itagaki is a conspicuous exception to this rule. With indefatigable energy he has worked constantly in the cause of liberalism. His patience has been such that ten years seemed to him like one day, and he has left no stone unturned to promote the interests of his party. By a large section of the public it has long been regarded as a matter of regret that the Count has met with so little success in all his endeavours. But now, at length, the time for harvesting the fruits of his past toils appears to be approaching. His influence is evidently needed for bringing about an alliance between the various progressive parties. The *Kokumin Shimbun* suggested recently that he should be made the keystone of the contemplated alliance, and the *Hochi Shimbun* seems to concur entirely with this view, for, in its issue of the 25th instant, it enlogized the Count as one of those rare statesmen who are just and magnanimous, willing to sacrifice self-interest to the public good, and to forgive past wrongs and enmity in order to promote the cause of popular rights and good government. Thus it will be seen, says the *Nippon*, that in matters relating to this alliance, both Count Okuma and Count Goto are willing to yield to the Tosa statesman's claims, and when the alliance is effected, Count Itagaki is likely to be made generalissimo of the whole solidarity of progressive parties.

POLITICAL KNAVERY.

A few days ago, some of our Tokyo contemporaries published a sensational report to the effect that a murderous attempt was in contemplation on the life of Mr. Muro Kojiro, the member of the Diet elected for the eighth district of Niigata Prefecture. The report said that one Ono Jinsuke, and one Aizawa Keisaku, his brother Kenji, and one Kiga Kobunji, all belonging to the *Daido* party, having been deeply mortified by the defeat of their candidate at the last election, had determined to wreak their vengeance on the successful candidate of the *Kaishin-to*, that their plan was to dog their victim to Tokyo and murder him by means of

explosives; that Kiga, one of the accomplices, turned informer, divulged the whole affair to one of the *Kaishin-to* politicians in the district, and asked him to furnish the informant with money to enable him to run away; that the information having been conveyed to the police authorities, all the would-be assassins were arrested; and that three bombs were found in their possession. The fact that the eighth district of Niigata was one of the most hotly contested places at the late election, as well as the circumstance that this district is said to be the focus of the *Daido-ha Soshi*, contributed to give to this report an air of probability. But on account of certain features in the story, we were inclined to entertain doubts as to its accuracy, and consequently forbore to make any comments on it. Our conjectures have proved right. The latest news says that the whole affair is nothing more than a farce. In short, it appears now that the so-called murderous attempt was a pure fabrication of Kiga, who played the rôle of informant in order to impose upon the *Kaishin-to* men and thus obtain money by false pretences. Thus the supposed political murder turns out to be nothing more than a sneaking attempt on the part of a swindler!

NO MORE BALD HEADS.

According to the *New York Medical Journal*, an almost infallible remedy for, if not an absolute preventive of, baldness has at length been discovered. The American paper says:—"The treatment recommended by Lassar, of Berlin, for *alopecia pityrodes* and *alopecia areata* has been attended with some brilliant results. According to Dr. Graetzer's article in the *Therapeutische Monatschrift*, but few cases resist the treatment, and after a few applications the downy sprouts may be seen. The following procedure is to be repeated daily:—

1. The scalp should be lathered well with a strong tar soap for ten minutes.
2. This lather is to be removed with lukewarm water, followed by colder water in abundance; then the scalp is to be dried.
3. A solution of bichloride of mercury, 1 to 500, the menstruum being equal parts of water, glycerine, and Eau d'Cologne or alcohol, is to be rubbed on.
4. The scalp is then rubbed dry with a solution containing beta-naphthol, 1 part, and absolute alcohol, 200 parts.
5. The final step in the process is an anointing of the scalp with an unguent containing 4 parts of salicylic acid, 3 parts of tincture of benzoin, and 100 parts of neatfoot oil.

This treatment should be persisted in for a period of six weeks or longer. Lassar, who, by the way, is the secretary-general to the International Congress of this year, has done much to awaken the profession from the lethargic state into which it had fallen in regard to the treatment of alopecia. He is reported to have treated a thousand cases in the manner described."

REORGANIZATION OF POLITICAL PARTIES.

In regard to the question of reorganizing political parties, nearly all the leading members in the camp of the *Kaishin-to* appear to entertain the opinion that the best interests of the country as well as of their party will be secured by dissolving their present organization and meeting other progressionist coteries half way in the efforts to form a new consolidation. To this course, Mr. Ozaki Yukio, the chief editor of the *Choya Shimbun*, has been, and still is, raising a solitary, but by no means weak voice of dissent. What power of persuasion Mr. Ozaki has with the rank and file of the *Kaishin-to* will be seen at the general meeting of that party to be opened September 1st, when some final step is to be taken in regard to this question. In the meantime, it is interesting to follow Mr. Ozaki's arguments in the columns of the *Choya Shimbun*. In the issue before us, he contends that the first duty of all the progressionist parties lies in coöperation for the revision of the Law of Public Meetings and Political Associations. After explaining that Article 28 of the law in question is a measure which cannot fail to cause great inconvenience to the people without bringing corresponding benefit to the Government, the editor proceeds to argue that it would be almost dangerous in the present excited temper of public opinion to insist on the rigorous enforcement of the law. At least, it would be highly injudicious for the Govern-

ment to stir up hostile feeling, especially at a time when the opening of the Diet is so near at hand. He then exhorts all parties in favour of progress to direct their united efforts towards the repeal of this obnoxious article, as an essential step precedent to amalgamation. For, he argues, so long as this article remains in force, successful amalgamation will be next to an impossibility. It may seem, Mr. Ozaki admits, that should the existing parties dissolve their organizations first, and then proceed to amalgamation, their action would in no wise violate the regulation of the law in question. But such is, in his opinion a superficial, rather than a practical, view. The names and other accidental circumstances of political parties may be changed *ad libitum*, but their reality will stand firm as long as the principles that called them into existence remain unchanged. Consequently, in order to properly consummate a scheme of amalgamation, it will be a matter of prime necessity, even after the preliminary dissolution of existing party organizations, that a certain number of committees representing the various political creeds held by their original parties should meet together and make due arrangements for the formation of a new association. Now nothing is more clear than that such a movement in reality comes into direct conflict with the provision of the obnoxious article. Men may talk of amalgamation, but what they really mean is nothing more or less than alliance, for, says Mr. Ozaki, party spirit and sentiments do not depend for their existence upon mere names. What simpleton can imagine, he contemptuously asks, that the nominal dissolution of the parties could have the effect of eradicating, in a few months, all party spirit? The expectation would be utterly chimerical, and it will therefore be clearly seen that the 28th Article of the new Law places an almost insurmountable obstacle in the path of the progressionist parties successfully carrying out their pet scheme. Why, then, are those advocating this course so tardy in coming forward and uniting their efforts with the *Kaishin-to* for the repeal of this objectionable provision? Mr. Ozaki declares himself quite unable to comprehend their hesitation. "If their apathy," he says, "is caused by chagrin at being led by the *Kaishin-to* in this matter, it must be construed as unmistakable evidence that their old animosity to that party still survives, and in that case, who will believe in the genuineness of their desire for amalgamation?" In conclusion, the editor of the *Choya* expresses a very pessimistic view as to the final success of the scheme of consolidation. "We do not hesitate to say," he writes, "that it is simply an impossibility to form a truly harmonious association out of elements which cannot even be persuaded to coöperate efficiently for the removal of a common and patent evil."

Whatever may be said about the Government's liberality in its manner of enforcing this 28th article, we cannot but think that the results will be wholesome. We speak of the enforcement of the article, because, as our readers are already aware, its actual provisions are not in any sense new. They were embodied in the old law in precisely the same terms, and though the Authorities may be blamed for not repealing them, the charge that such an article has been specially enacted at this juncture, is based on pure ignorance. Practically speaking, however, the difference between the former state of affairs and the present seems to be radical, for whereas nothing was officially done, under the provisions of the old Law, to oppose the steps taken by the *Kaishin* progressionists for the amalgamation of the various liberal parties, the enactment of a new Law embodying the vetoes was immediately followed by resolute police interference. And what has been the result thus far? Has it not been that strong grounds are furnished to doubt the sincerity of the scheme of amalgamation? We quite agree with Mr. Ozaki Yukio that a meeting of representative committees to arrange a general platform would be expedient as a step precedent to the effective fusion of parties, and that the Law forbids such a meeting. But it

seems to us that the Government's action has brought out the spirit of mutual independence really existing between the various political factions of the present day, and has afforded warrant to believe that the proposed amalgamation had for its unique purpose the overthrow of the Cabinet and would not have survived the achievement of that result. Every incident of the political campaign confirms our often expressed belief that there can be no really genuine and permanent basis of party organization until the nation's representatives are brought face to face with living issues within the walls of the Diet. Unions formed before that time cannot be inspired by pure solicitude for the public weal, or stand on a foundation of honest principles. The Government has ardently acted on this belief, and there is reason to hope that the end will justify the means.

THE IMPORT OF RICE.

The *Daido Shimbun* thinks it will be of interest to give figures of the total import of foreign rice since the harvesting of the Japanese crops in October last. The table is as follows:—

	YOKOHAMA.	Kobe.	OSAKA.
	oku.	oku.	oku.
Oct., 1889	7,751,600	1,477,000	1,817,600
Nov., 1889	91,000	738,000	—
Dec., 1889	200,400	506,400	—
Jan., 1890	590,400	7,373,600	240,000
Feb., 1890	2,277,600	9,810,400	890,200
Mar., 1890	13,573,000	30,710,000	11,741,600
April, 1890	33,190,800	47,559,600	24,310,800
May, 1890	45,311,200	47,248,000	12,817,000
June, 1890	131,712,000	100,473,600	65,464,400
Total	234,561,600	246,929,600	117,991,200

	NAGASAKI.	OTHER PORTS.	TOTAL.
	oku.	oku.	oku.
Oct., 1889	525,600	610,400	12,252,800
Nov., 1889	28,400	1,597,200	2,667,600
Dec., 1889	86,000	3,756,000	4,608,800
Jan., 1890	321,000	7,614,800	15,992,800
Feb., 1890	1,039,200	8,951,600	22,694,000
Mar., 1890	1,574,100	7,458,800	20,058,400
April, 1890	4,216,800	10,108,000	119,867,000
May, 1890	2,882,800	12,588,800	121,888,800
June, 1890	29,321,200	18,594,400	345,567,600
Total	40,018,400	71,580,000	710,580,800

As will be seen from the above table, the largest import in one month is that for June last, the smallest figure being in November last year, and the grand total representing 710,580,800 koku or 1,776,452 piculs.

DINNER IN TOKYO.

AMONG the foreign guests responding to the special invitations sent abroad to attend the Ueno Exhibition was Mr. Gustavus Goward, who some years ago was First Secretary of the American Legation at Tokyo. The United States Government, out of compliment to Japan, made Mr. Goward an Honorary Commissioner to the National Exhibition for the purpose of studying and reporting upon its exhibits. Special stress was laid in the making of this appointment upon Mr. Goward's connection with the World's Columbian Exposition of 1893, which corporation had commissioned him its Representative in Japan under the title of Commissioner. Mr. Goward arrived in this country in time to appear at the ceremonies of the presentation of prizes by the Emperor at the Exhibition. He has meanwhile been promoting the work of his mission, so it seems, with very successful results. On the 7th instant, at a meeting of the exhibitors, called for the purpose and presided over by Commissioner-General Hanabusa, Mr. Goward delivered a lengthy address upon the International Exposition of 1893, full reports of which have been published in the Japanese Press.

As a partial return for the many courtesies received, Mr. Goward gave, on the 15th instant, at the Noble's Club, Shiba, an informal Japanese dinner complimentary to the officials of the Exhibition, to which other officials were invited. Absence from the city prevented the attendance of some, though in the general acceptance, we noticed as present Count Matsukata, Viscount Sano, their Excellencies Hanabusa, Kuki, and Watanabe, Vice-Minister Okabe, and others of the Foreign Office, and

many heads of Bureaux of several Departments connected with exhibition affairs, such as Messrs. Saito, Sakata, Yamataka, Hatano, and Okakura. Chief Secretary Kaneko, of the House of Peers, and Mr. Shingio, as Honorary Commissioners of the World's Columbian Exposition of 1893, by their presence cemented the ties between America and Japan. Thoroughly Japanese in character, the entertainment was enlivened by special features appropriate to the occasion. In the dances "the ball was set in motion" by the rolling of a large sphere representing the globe, on which was painted the map of the world, midst the fluttering of foreign flags carried by the dancers who were costumed in Yukata, decorated in an artistic manner by Japanese writing and designs descriptive of the World's Fair. In the march of nations around the sphere and in the many evolutions, the Japanese character of the *odori* was strictly preserved and the song adapted to the dance was in harmony with the general idea. The applause that greeted the new dance marked its success. In the subsequent dances it was apparent that in the selection the World's Fair had not been forgotten, though not made obtrusive.

Not unmiadful of the dignity and importance of "the Press," which every American reveres, Mr. Goward gave on the 16th a dinner to the newspaper editors of Tokyo and Yokohama. Nearly all the Press were represented at the gathering. Having been called together for social converse, but few speeches were made, and those partook largely of welcome or were of a congratulatory order. The special dances of the former occasion were repeated with varying features and additions. The guests manifested their enjoyment and appreciation by an unusual attention to the exercises, and prolonged their stay for some hours afterwards. On both evenings each guest carried away with him the souvenirs of the feast in shape of fans, &c., among which were hemispherical sake cups, illustrating in colours the various countries of the world which would be represented at the Chicago Exposition of 1893.

THE PRESIDENT OF THE HOUSE OF REPRESENTATIVES.

COUNT ITAGAKI, according to the *Tokyo Shimpō*, is of opinion that the President of the House of Representatives should be chosen from among the political parties of the time. The Count's reasons for this view are very vaguely stated by the *Shimpō*, but the principal of them is that the plan he recommends is the custom in Western lands. So it is undoubtedly, but chiefly, we imagine, because to find a man who to competence for such a post adds the quality of belonging to no political party, would be practically impossible. In the Japanese House of Representatives as recently elected, there are, it is true, about a hundred members of so-called "independent" principles, but recent events have shown that a large proportion of these will probably enlist under the banners of the *Kokusei Hozon-to*, so that even if the House desired to choose three neutral persons from whom the Emperor might nominate a President, the task would be beyond its power.

THE NEW MINING RELATIONS.

THE *Nichi Nichi Shimbun*, noticing the issue of the amended Mining Regulations, by Law No. 55, remarks that the old law, having been promulgated in 1873, has in several respects come into conflict, or at any rate variance, with later statutes, and for some time the necessity of alteration has been fully recognised. Since last year, it is stated, the Cabinet has had under consideration a measure dealing comprehensively with the subject of mining, but in view of anticipated delay in promulgating it, the Authorities deemed it advisable to issue a temporary set of regulations. These latter are in several respects welcome additions to the legislative enactments of the empire, particularly the provision limiting the area that may be held for mining purposes to 600,000 *tsubo*, which of course will tend to prevent the accumulation of mining property in a

few hands. The old article providing that, in case of disagreement between an owner of land and an intending purchaser, the land should be bought by the Government, does not find a place in the new measure, as it has been shown to be inconsistent with the present financial system.

TEMPERATURE DURING THE DOG-DAYS.

The temperature during the period called *Dog Days*—from the 20th of July to the 10th of August—is supposed, doubtless correctly, to have a great influence on the rice harvest. The fiercer the heat during that interval the better, provided only that there has been rain enough previously. The Japanese farmer desires nothing better than a sun hot enough to boil the water in which the young rice plants are growing. This year the temperature is generally supposed to have been below the average, and there has been so much rain that all kinds of vaticinations have been uttered about crop prospects by interested persons. In order to furnish trustworthy data for forming an opinion, the Meteorological Bureau of the Home Department has published a table showing the temperature during the *Dog Days* period for the past five years. The figures are as follow:—

TEMPERATURE (IN FAHRENHEIT DEGREES) FROM THE 18TH OF JULY TO THE 10TH OF AUGUST.

Years.	Average temperature.	Maximum.	Minimum.
1886	81.21	96.34	74.3
1887	79.75	86.36	81.20
1888	84.91	89.06	79.34
1889	91.94	93.94	84.17
1890	83.12	97.88	77.74

It appears from this table that while the variations of temperature have been far greater this year than in any year since 1886, the average temperature has been nothing remarkable, being in fact less than the corresponding figure for 1888 or 1889, though greater than that for any of the preceding three years. On the whole, most people will be disposed to agree that this has been a cool summer, though the heat was occasionally severe enough to create a very different impression for the time being. Some days at the end of June and in the beginning of July were at least as hot as anything we remember to have felt at the corresponding season in any year since 1868.

CONCERT BY FOREIGN MUSICIANS AT THE PALACE.

THEIR MAJESTIES THE EMPEROR AND EMPRESS have for the third time honoured foreign musicians by allowing them to perform at the Palace in the Imperial presence. The artists thus graciously distinguished on the present occasion were the celebrated flautist Professor Terschak, the great pianist Madame Schüller, and the violinist whose presence at the Japanese Academy of Music so often enables us to hear first-rate music on the king of instruments, Professor Dittich. The intimation that their Majesties would be pleased to hear these eminent experts was conveyed in writing through H.E. Marquis Nabeshima, President of the Japanese Musical Society, and Mr. Izawa, Director of the Imperial Academy of Music. The Concert was held in the new Palace, in the beautiful salon known as the "Hall of the Thousand Grasses." The large windows, extending to half the height of the hall, made of plate glass, and the exquisitely carved doors, with their red and gold lacquer and inlaid mother-of-pearl, and many other striking features were subsequently spoken of by the artists with much admiration. They were happy too in finding an excellent piano. It was one of Steinway's, and in tone and condition were everything that could be desired. The artists were introduced by Marquis Nabeshima. The arrangement of the audience resembled in every respect that of a European Court Concert. Their Imperial Majesties sat in the centre, and the Princes and Princesses of the Imperial family occupied seats ranged along two sides of the hall. The heat was unfortunately great, but the performers showed no symptom of fatigue, playing throughout with the greatest verve. The Japanese fantasia by Professor Terschak gave great pleasure, and elicited marked applause from several of those

present. It not infrequently happens that impressive parts of performances of this kind are made still more telling by something quite casual. Such was the case when Professor Terschak was rendering the "Chant du Démon" in his most effective manner. The heavens clouded over and the large hall grew dark, and just as the Professor had reached the most weird part of the Chant, the darkness grew deeper and the wind came whistling into the building and blew the artist's hair to and fro, thus adding intensity to the impressive aspect which, under the excitement of his performance, his giant form assumed. And when he came to those strangely loud notes the sound of which has alarmed so many people in the course of the Professor's travels, the low moaning of the wind was heard throughout the building, as though nature were in sympathy with art. Their Imperial Majesties were graciously pleased to express much satisfaction at the performance. The artists were first thanked on behalf of their Majesties by Marquis Nabeshima immediately after the concert, and the next day Viscount Hijikata was sent by the Emperor and Empress to assure them that their "wonderful playing" had greatly pleased their Imperial Majesties. The following is the programme:—

1. Terschak—Allegro de Concert für Flöte u. Piano Op. 147—der Compositeur u. Mme. Schüller.
2. Vieuxtemps—Ballade und Polonaise für Violin u. Piano—Prof. Dittich u. Mme. Schüller.
3. Liszt—Rhapsodie Hongroise No. 9 für Piano—Mme. Schüller.
4. Terschak—Fantasie über zwei japanische Lieder (Hana Kurasu und Satori) für Flöte und Piano—der Compositeur u. Mme. Schüller.
5. a. Rag—"Cavatina" b. Haver—Elegische Melodie für Violin u. Piano—Prof. Dittich u. Mme. Schüller.
6. Wallace—"Grand Polka de Concert" für Piano—Mme. Schüller.
7. Terschak—Sensational Fantasia mit der grossen Cadence "Chant du Démon" für Flöte und Piano Op. 43—der Compositeur u. Mme. Schüller.

PRESIDENT OF THE HOUSE OF PEERS.

Thus far, Count Yatsugawara has been popularly believed to be the most probable President of the House of Peers. But if we may credit a report published by the *Yomiuri Shinbun*, this notion appears to be groundless. That paper states in unhesitating terms that Count Ito will be called on to fill the important office. According to positive information obtained by our contemporary, Count Ito's recent visit to the Palace, instead of being connected with the Count's entering the Cabinet as conjectured by the public generally, was the occasion of communicating the Imperial intention of appointing him President of the Upper House, which office the Count is represented to have accepted gratefully. In this context, the Tokyo journal ventures upon another prediction in regard to the Speakership of the House of Representatives. On the supposition that the proposed alliance of progressive parties will be accomplished, the *Yomiuri* is fully convinced that the prize will certainly fall to either Mr. Nakajima Nobuyuki or Mr. Kataoka Kenkiichi. As one of the avowed organs of the *Kaishin-to*, our contemporary remarks, with laudable impartiality, that, though neither of these gentlemen has had any affinity with the *Kaishin-to*, the party will be most willing to accept either as a man of catholic views far above party spirit and caprice. In this case, the opposite side of the House will name as their standard-bearer either Mr. Kusumoto Masataka or Mr. Yoshino Seikei. We (*Japan Mail*) attach no credit to this prediction about the Speakership.

THE TOKYO MUNICIPAL LOAN FOR WATER WORKS.

According to the *Chugai Shōgō Shimpō*, a municipal loan of 8,000,000 yen is to be raised for defraying the cost of supplying the capital with good drinking water. The total amount of estimated expense is 7,950,000; and originally it was proposed that this outlay should be met, first, by a Government subsidy of 2,250,000 yen in annual instalments of 150,000 yen for 15 years; secondly, by the proceeds of the sale of public lands on the banks of rivers and canals (popularly called *Kashi-chi*); and thirdly, by raising a municipal loan. It has lately been decided, however, not to make use

of the second of these sources, but to raise the whole sum in the form of a municipal loan of 8,000,000 yen. According to the present plan, water pipes will be at first laid only through densely populated districts of the city, because in the districts where houses are widely separated, profits would be relatively small. The works to be undertaken in the more thickly peopled parts of the city will cost about 6,500,000 yen. There will, therefore, be a surplus of 1,500,000 yen which sum is to be employed for the purchase of land and for other purposes, it being anticipated that the laying of pipes will involve some changes in the streets of the capital. Consequently this latter sum will be placed to the joint account of the Water-works and City Improvements. For the first year or two, there will not be much profit from the works, and the Government subsidy will be used for the payment of interest (7 per cent.) on the municipal debt. It is expected that an Imperial Ordinance will be shortly issued deciding the control of the Water-works affairs. The municipal loan will be raised on the promulgation of the said ordinance. Our contemporary does not state how the expenses for supplying the less densely populated parts of the city are to be defrayed, but it appears that the Government subsidy and the profits arising from the finished part of the water system are to be employed for the purpose.

MEMBERS OF THE HOUSE OF PEERS BY IMPERIAL NOMINATIONS.

On the authority of the *Nippon*, whose information in regard to Court affairs proves very frequently accurate, we publish some news relating to the Imperial nomination of Members of the House of Peers. In the first place, our contemporary informs us that the number of members who are to have this distinguished honour, has already been decided to be thirty in all, of whom twenty will be chosen out of the present Senators and the rest from among the people. The selection of only thirty members out of nearly seventy Senators naturally involved great difficulty and led to a difference of opinion among "the powers that be." Some advocated that, in considerations of their past services, the older Senators should be chosen in preference to the younger, while others preferred the latter on the score of ability. This point remained undecided for some time, but the second opinion finally prevailed. About half of the Senators thus elected will be appointed Court Councillors in addition to membership of the Upper House. As to the date for the official announcement of these appointments, the Tokyo journal names the 14th and the 15th of September.

THE LAW OF POLITICAL ASSOCIATIONS AND PROGRESSIVE PARTIES.

We have already reproduced the comments of the Tokyo daily papers on the 28th article of the new Law of Public Meetings and Political Associations. It may, however, be worth while to quote also the opinions of some of the influential magazines of the capital. The *Keisai Zasshi*, which is generally noted for the sobriety of its views, is unusually excited in discussing this question. After noting that the enforcement of the 28th Article has been like a peal of thunder in a blue sky, our contemporary proceeds to observe that, as the result of the decisive step taken by the Authorities, the proposed alliance of progressive parties will probably be converted into their amalgamation. In another editorial note, the Tokyo periodical reports that Mr. Mutsu and Viscount Aoki are in favour of repealing the obnoxious article. However that may be, there is no doubt that the *Kaishin-to* has decided to present a memorial for its repeal, and, in case the memorial should fail to obtain the favourable attention of the Authorities, the party will make its first motion in the Diet in that sense. "We also," the *Keisai Zasshi* continues, "are of opinion that the article ought to be revoked. If it be meant to prohibit the formation of political parties, well and good. But so long as such is not the object of the Government, political parties ought to have a full measure of

freedom in their actions. The Government may forbid the alliance of parties, but how can it prevent them from uniting themselves against it, in the event of its adopting measures condemned by public opinion. To anticipate others is the first step towards defeating them, while to be anticipated is the prelude of discomfiture. The Government ought to repeal the obnoxious article before the parties out of power bring the matter before the Diet. Otherwise the Authorities will incur the disgrace of being forced to do what they might have done voluntarily with a certain amount of grace."

The *Kokumin-no-Tomo*, writing on the same subject, observes that the way in which the Government has given effect to its own interpretation of the 28th Article has excited surprise and indignation—an exactly similar provision couched in exactly the same words was contained in the old law, but it remained a dead letter, for no official step was ever taken to prevent alliances between political parties. Our contemporary illustrates this by referring to the formation of the *Daido Danketsu*—an organization formed originally by the union of several small political bodies—and the association of five parties last year in opposition to the treaty programme of Count Okuma. The grand scheme of alliance, our contemporary goes on to observe, has now indeed been thwarted, but the rigorous step taken by the Government has paved the way for the formation of a great political party by amalgamation. The Tokyo journal then ironically remarks that this may possibly be the ardent desire of the Government, and that those who imagine the suppression of political parties to be the aim of the Cabinet, do not perhaps know the true intentions of Ministers.

As to the formation of a great progressive party, the above two influential periodicals entertain high hopes. The *Aikoku-to*, the *Jiyu-to*, and the *Kiushu Shimpō* have already dissolved their organizations. The *Daido Danketsu* and the *Kaishin-to* have not yet come to any definite decision. It is, however, announced that they will adopt some conclusive resolution at their general meetings to be shortly convened, the former party about the 17th or the 18th instant and the latter about the beginning of September. [Since this was in type a paragraph in the *Nippon* says:—"At a general meeting of members of the *Daido Danketsu* party, held on the 17th instant at the Yayoisha, Shiba, it was decided, after a long discussion, that the party should be dissolved."] As to the *Daido Danketsu*, the *Kokumin-no-Tomo* observes that the members from the North-East are very enthusiastic about amalgamation, while a small section of the party in Tokyo is inclined to oppose the idea. With regard to the *Kaishin-to*, the *Keizai Zasshi* tells us that the party is divided into three groups: the first group favouring amalgamation, but desiring to decide the question at a general meeting; the second opposing amalgamation, but advocating the dissolution of the present organization, with the object of starting a social club by way of prelude to the formation of a new party; and the third maintaining that the *Kaishin-to* ought to preserve its present organization, there being no necessity for amalgamation, which, even, if accomplished, will not last long. The Tokyo periodical states that the first group is the most numerous, and that its opinion will prevail in the coming general meeting of the party.

SECRET MEETING IN HIRAKAWACHO.

ON the afternoon of the 12th inst., in a room of the residence of Mr. Kawashima Jun, in Hirakawacho, Tokyo, a small knot of gentlemen were observed to be engaged in a conversation of apparently absorbing interest. The size and the general surroundings of the meeting were not of a nature to attract the attention of casual observers, but to persons at all conversant with the present state of Japanese politics the great political importance of this seemingly insignificant gathering will be manifest at once, when

we say that the names of the gentlemen assembled were Messrs. Naido Roichi, Oi Kentaro, Nakaye Tokusuke, Shimada Saburo, Kato Masanosuke, Takata Sanai, Hayashi Yuzo, Kataoka Kenkichi, Sugita Tei-ichi, Kono Hironaka, Suzuki Shoji, Oye Taku, Yamada Buho, Matsuda Masahisa, and Kawashima Jun. The meeting was ostensibly of a social nature, but the fact that each of the five political parties now contemplating amalgamation was represented in exactly equal numbers, was too significant to escape the notice of the vernacular press, which has commented eagerly on the incident. Indeed, it has now become an open secret that the meeting was really intended as a sort of preliminary conference to negotiate terms of amalgamation. The *Nippon* gives what purports to be a report of the proceedings of the conference. It runs thus:—

After some embarrassing silence, Mr. Nakaye was the first to break the ice. Well, gentlemen, he said, it gives us no pleasure to be thus blankly regarding one another's faces. Let us do something.

Mr. Shimada—Let me take upon myself the work of recording the proceedings of the meeting.

Here a proposition was made for appointing a committee to prepare a draft scheme of amalgamation.
